Table of Contents

**MAGELLAN PETROLEUM CORPORATION PROFIT REPORT**  
**For the Year Ended June 30, 2007**  
**(Dollars quoted are US\$)**

Magellan Petroleum Corporation recorded net income of \$670,000 for the year ended June 30, 2007, compared to \$749,000 for the previous fiscal year.

Revenues were up for the year by \$4.1 million or 15.5%.

Oil sales increased approximately \$1.3 million due to an increase in sales volume offset by a decrease in prices. Sales volume from the Nockatunga and Mereenie fields increased by 30,139 barrels, which was offset by a decrease in the Cooper Basin sales of 5,439 barrels.

Gas sales were up \$2.3 million over 2006. This was essentially due to a 5% increase in sales to 5.988 Bcf in 2007 from 5.726 Bcf in 2006 and a 7% increase in the average price per MCF of A\$3.24 in 2007 from A\$3.04 in 2006.

Total costs and expenses increased \$6.3 million over 2006 to \$30 million.

Production costs decreased \$1.2 million to \$7 million in 2007. This was primarily due to expenditures for the Mereenie workover program which was completed in 2006.

Exploration and dry hole costs increased approximately \$2.3 million to \$5.5 million in 2007. The primary reason for the increase in 2007 was the higher drilling costs related to the Cooper Basin drilling program.

Depletion, depreciation and amortization increased \$4.4 million to \$10.7 million in 2007. This increase was mostly due to depletion of the higher book value of MPAL's oil and gas properties acquired during fiscal 2006, increased depletion in the Nockatunga project due to increased production and capitalized costs and increased depreciation on revised asset retirement obligations.

Auditing, accounting and legal expenses increased \$230,000 in 2007 primarily because of increased legal fees related to the Australian Tax Office (ATO) audit (see Item 12) and required filings with the Australian stock exchange. In addition, audit costs were higher in 2007 because of certain 2006 audit costs recorded in 2007.

Accretion expense increased \$93,000 to \$518,000 in 2007. This was due mostly to accretion of the revised asset retirement obligations recorded in fiscal 2006.

There were no asset retirement settlement losses recorded in 2007. During the third quarter of 2006, the Company recorded an asset retirement settlement loss of \$445,000 related to the Mereenie field.

An impairment loss of \$984,000 was recorded in 2007 relating to the decreased value of the Kiana field in the Cooper Basin. The net book value of the Kiana oil and gas property was written down to its future estimated discounted cash flow.

Other administrative expenses decreased \$139,000 to \$2.7 million in 2007 primarily due to a non-cash charge for directors' stock option expense (\$365,539) recorded in 2006 partially offset by increased directors fees (\$32,778), insurance (\$58,468) and office rent (\$75,710) in 2007.

Further details are provided in the Preliminary Final Report to the Australian Stock Exchange, a copy of which is attached.

**12. Other Significant Information**

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"). FIN 48 is an interpretation of FASB Statement No. 109 "Accounting for Income Taxes" and must be adopted by the Company July 1, 2007. FIN 48 prescribes a comprehensive model for recognizing, measuring, presenting, and disclosing in the financial statements uncertain tax positions that the company has taken or expects to take in its tax returns. Under FIN 48, the Company is able to recognize a tax position based on whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the Company has presumed that its positions will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step of FIN 48 adoption is measurement. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. An uncertain income tax position will not be recognized if it does not meet the more-likely-than-not threshold.

MPAL, the Company's wholly-owned Australian subsidiary, has been notified that the Australian Taxation Office ("ATO") is conducting an audit of the Australian income tax returns of MPAL and its wholly owned subsidiaries for the years 1997- 2005. The ATO inquiry is focused on certain income tax deductions claimed by Paroo Petroleum Pty. Ltd., a wholly-owned subsidiary of MPAL. MPAL has been and will continue to cooperate with the ATO's inquiry, has retained the services of experienced Australian tax counsel and will also be represented by its Australian tax advisors. MPAL was previously advised to expect to receive a position paper from the ATO setting forth the ATO's position with respect to these previous deductions. However, as of June 30, 2007 and the date of filing hereof, MPAL has not received the ATO's position paper. As a result, the Company is unable at this time to determine whether an assessment will result from the ATO's audit or the magnitude of any possible assessment, if any such assessment is issued. However, the Company believes that if an assessment is issued by the ATO and if such assessment is upheld, it could have a material adverse impact on the Company's financial condition, results of operations and cash flows. Regardless of the receipt of the position paper, pursuant to the requirements of FIN 48 discussed above, the Company is currently reviewing what amounts related to the ATO tax matter will be disclosed in the Company's financial statements and footnotes for its annual report on Form 10-K (to be filed with the SEC and the ASX on or before September 28, 2007) and what amounts, if any, related to the ATO tax matter will be recorded in the Company's financial statements upon the Company's adoption of FIN 48 as of July 1, 2007, when the Company files its quarterly results for the first quarter of fiscal year 2008. As of June 30, 2007, the Company is currently evaluating its remaining tax positions and management does not believe that the remaining tax positions will have a material impact on the Company's financial condition, results of operations and cash flows.
