For the quarterly period ended March 31, 2014

or

£ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 000-07246
PDC ENERGY, INC.
(Exact name of registrant as specified in its charter)

Nevada
(State of incorporation)
1775 Sherman Street, Suite 3000
Denver, Colorado 80203
(Address of principal executive offices) (Zip code)

95-2636730
(I.R.S. Employer Identification No.)

Registrant's telephone number, including area code: (303) 860-5800

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes T No £

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes T No £

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer x

Accelerated filer o

Edgar Filing: PDC ENERGY, INC. - Form 10-Q

Non-accelerated filer

(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: 35,793,603 shares of the Company's Common Stock (\$0.01 par value) were outstanding as of April 18, 2014.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 ("Securities Act") and Section 21E of the Securities Exchange Act of 1934 ("Exchange Act") regarding our business, financial condition, results of operations and prospects. All statements other than statements of historical facts included in and incorporated by reference into this report are "forward-looking statements" within the meaning of the safe harbor provisions of the United States ("U.S.") Private Securities Litigation Reform Act of 1995. Words such as expects, anticipates, intends, plans, believes, seeks, estimates and similar expressions or variations of such words are intended to identify forward-looking statements herein. These statements relate to, among other things: estimated crude oil, natural gas and natural gas liquids ("NGLs") reserves; future production (including the components of such production), sales, expenses, cash flows and liquidity; our evaluation method of our customers' and derivative counterparties' credit risk is appropriate; expected 2014 production; anticipated capital projects, expenditures and opportunities; future exploration, drilling and development activities; our drilling programs and number of locations; expected timing of additional drilling rigs in the Wattenberg Field and Utica Shale; the effect of additional midstream facilities and services; availability of sufficient funding for our 2014 capital program and sources of that funding; expected 2014 capital budget allocations; acquisitions of additional acreage and other future transactions; the impact of high line pressures; compliance with debt covenants; expected funding sources for conversion of our 3.25% convertible senior notes due 2016; impact of litigation on our results of operations and financial position; effectiveness of our derivative program in providing a degree of price stability; that we do not expect to pay dividends in the foreseeable future; our expected tax liability for uncertain positions to decrease to zero in the next 12 months; the outcome of the May 2014 borrowing base redetermination; and our future strategies, plans and objectives.

The above statements are not the exclusive means of identifying forward-looking statements herein. Although forward-looking statements contained in this report reflect our good faith judgment, such statements can only be based on facts and factors currently known to us. Consequently, forward-looking statements are inherently subject to risks and uncertainties, including known and unknown risks and uncertainties incidental to the exploration for, and the acquisition, development, production and marketing of crude oil, natural gas and NGLs, and actual outcomes may differ materially from the results and outcomes discussed in the forward-looking statements.

Important factors that could cause actual results to differ materially from the forward-looking statements include, but are not limited to:

- changes in worldwide production volumes and demand, including economic conditions that might impact demand;
- volatility of commodity prices for crude oil, natural gas and NGLs;
- the impact of governmental policies and/or regulations, including changes in environmental and other laws, the interpretation and enforcement related to those laws and regulations, liabilities arising thereunder and the costs to comply with those laws and regulations;
- potential declines in the value of our crude oil, natural gas and NGLs properties resulting in impairments;
- changes in estimates of proved reserves;
- inaccuracy of reserve estimates and expected production rates;
- potential for production decline rates from our wells being greater than expected;
- timing and extent of our success in discovering, acquiring, developing and producing reserves;
- our ability to secure leases, drilling rigs, supplies and services at reasonable prices;
- availability of sufficient pipeline, gathering and other transportation facilities and related infrastructure to process and transport our production, particularly in the Wattenberg Field and the Utica Shale, and the impact of these facilities and regional capacity on the prices we receive for our production;
- timing and receipt of necessary regulatory permits;
- risks incidental to the drilling and operation of crude oil and natural gas wells;

- our future cash flows, liquidity and financial condition;
- competition within the oil and gas industry;
- availability and cost of capital;
- reductions in the borrowing base under our revolving credit facility;
- our success in marketing crude oil, natural gas and NGLs;
- effect of crude oil and natural gas derivatives activities;
- impact of environmental events, governmental and other third-party responses to such events, and our ability to insure adequately against such events;
- cost of pending or future litigation;
- effect that acquisitions we may pursue have on our capital expenditures;
- our ability to retain or attract senior management and key technical employees; and
- success of strategic plans, expectations and objectives for our future operations.

Further, we urge you to carefully review and consider the cautionary statements and disclosures, specifically those under the heading "Risk Factors," made in this Quarterly Report on Form 10-Q, our Annual Report on Form 10-K for the year ended December 31, 2013 ("2013 Form 10-K"), filed with the U.S. Securities and Exchange Commission ("SEC") on February 20, 2014, and our other filings with the SEC for further information on risks and uncertainties that could affect our business, financial condition, results of operations and prospects, which are incorporated by this reference as though fully set forth herein. We caution you not to place undue reliance on the forward-looking statements, which speak only as of the date of this report. We undertake no obligation to update any forward-looking statements in order to reflect

Table of contents

any event or circumstance occurring after the date of this report or currently unknown facts or conditions or the occurrence of unanticipated events. All forward-looking statements are qualified in their entirety by this cautionary statement.

REFERENCES

Unless the context otherwise requires, references in this report to "PDC Energy," "PDC," "the Company," "we," "us," "our" or "ours" refer to the registrant, PDC Energy, Inc. and all subsidiaries consolidated for the purposes of its financial statements, including our proportionate share of the financial position, results of operations, cash flows and operating activities of our affiliated partnerships and PDC Mountaineer, LLC ("PDCM"), a joint venture currently owned 50% each by PDC and Lime Rock Partners, LP. Unless the context otherwise requires, references in this report to "Appalachian Basin" refer to our operations in the Utica Shale in Ohio and the Marcellus Shale in West Virginia and Pennsylvania, including PDC's proportionate share of our affiliated partnerships' and PDCM's assets, results of operations, cash flows and operating activities. See Note 1, Nature of Operations and Basis of Presentation, to our condensed consolidated financial statements included elsewhere in this report for a description of our consolidated subsidiaries.

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31, 2014

(Unaudited)

NOTE 1 - NATURE OF OPERATIONS AND BASIS OF PRESENTATION

PDC Energy, Inc. is a domestic independent exploration and production company that produces, develops, acquires and explores for crude oil, natural gas and NGLs with primary operations in the Wattenberg Field in Colorado, the Utica Shale in southeastern Ohio and the Marcellus Shale in northern West Virginia. Our operations in the Wattenberg Field are focused on the liquid-rich horizontal Niobrara and Codell plays. We are currently focusing our Ohio development in the liquid-rich portion of the Utica Shale play. As of March 31, 2014, we owned an interest in approximately 2,900 gross wells. We are engaged in two business segments: (1) Oil and Gas Exploration and Production and (2) Gas Marketing.

The accompanying unaudited condensed consolidated financial statements include the accounts of PDC, our wholly owned subsidiaries, and our proportionate share of PDCM and our affiliated partnerships. Pursuant to the proportionate consolidation method, our accompanying condensed consolidated financial statements include our pro rata share of assets, liabilities, revenues and expenses of the entities which we proportionately consolidate. All material intercompany accounts and transactions have been eliminated in consolidation.

In our opinion, the accompanying condensed consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of our financial statements for interim periods in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the SEC. Accordingly, pursuant to such rules and regulations, certain notes and other financial information included in audited financial statements have been condensed or omitted. The information presented in this Quarterly Report on Form 10-Q should be read in conjunction with our audited consolidated financial statements and notes thereto included in our 2013 Form 10-K. Our results of operations and cash flows for the three months ended March 31, 2014 are not necessarily indicative of the results to be expected for the full year or any other future period.

Certain reclassifications have been made to prior period financial statements to conform to the current year presentation. These reclassifications had no impact on previously reported cash flows, net income, earnings per share or shareholders' equity.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recently Adopted Accounting Standard

On January 1, 2014, we adopted changes issued by the Financial Accounting Standards Board ("FASB") regarding the accounting for income taxes. The change provides clarification on the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss or a tax credit carryforward exists. Adoption of these changes had no impact on the condensed consolidated financial statements.

Recently Issued Accounting Standard

In April 2014, the FASB issued changes related to the criteria for determining which disposals can be presented as discontinued operations and modified related disclosure requirements. Under the new pronouncement, a discontinued operation is defined as a disposal of a component of an organization that represents a strategic shift and that has a

major effect on the organization's operations and financial results. These changes are to be applied prospectively for new disposals or components of our business classified as held for sale during interim and annual periods beginning after December 15, 2014, with early adoption permitted. We are currently evaluating the impact these changes will have on our condensed consolidated financial statements.

NOTE 3 - FAIR VALUE OF FINANCIAL INSTRUMENTS

Derivative Financial Instruments

Determination of fair value. Our fair value measurements are estimated pursuant to a fair value hierarchy that requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date, giving the highest priority to quoted prices in active markets (Level 1) and the lowest priority to unobservable data (Level 3). In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The lowest level input that is significant to a fair value measurement in its entirety determines the applicable level in the fair value hierarchy. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability, and may affect the valuation of the assets and liabilities and their placement within the fair value hierarchy levels. The three levels of inputs that may be used to measure fair value are defined as:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 – Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for the asset or liability, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived from observable market data by correlation or other means.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

Level 3 – Unobservable inputs for the asset or liability, including situations where there is little, if any, market activity.

Derivative Financial Instruments. We measure the fair value of our derivative instruments based on a pricing model that utilizes market-based inputs, including, but not limited to, the contractual price of the underlying position, current market prices, crude oil and natural gas forward curves, discount rates such as the LIBOR curve for a similar duration of each outstanding position, volatility factors and nonperformance risk. Nonperformance risk considers the effect of our credit standing on the fair value of derivative liabilities and the effect of our counterparties' credit standings on the fair value of derivative assets. Both inputs to the model are based on published credit default swap rates and the duration of each outstanding derivative position.

We validate our fair value measurement through the review of counterparty statements and other supporting documentation, the determination that the source of the inputs is valid, the corroboration of the original source of inputs through access to multiple quotes, if available, or other information and monitoring changes in valuation methods and assumptions. While we use common industry practices to develop our valuation techniques and believe our valuation method is appropriate and consistent with those used by other market participants, changes in our pricing methodologies or the underlying assumptions could result in significantly different fair values.

Our fixed-price swaps, basis swaps and physical purchases are included in Level 2 and our crude oil and natural gas collars, natural gas calls and physical sales are included in Level 3. The following table presents, for each applicable level within the fair value hierarchy, our derivative assets and liabilities, including both current and non-current portions, measured at fair value on a recurring basis:

	March 31, 2014			December 31, 2013		
	Significant Other Observable Inputs (Level 2) (in thousands)	Significant Unobservable Inputs (Level 3)	Total	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets:						
Commodity-based derivative contracts	\$1,810	\$1,498	\$3,308	\$5,325	\$2,385	\$7,710
Basis protection derivative contracts	85	—	85	463	—	463
Total assets	1,895	1,498	3,393	5,788	2,385	8,173
Liabilities:						
Commodity-based derivative contracts	31,166	1,393	32,559	17,537	988	18,525
Basis protection derivative contracts	122	—	122	5	—	5
Total liabilities	31,288	1,393	32,681	17,542	988	18,530
Net asset (liability)	\$(29,393)	\$105	\$(29,288)	\$(11,754)	\$1,397	\$(10,357)

The following table presents a reconciliation of our Level 3 assets measured at fair value:

Edgar Filing: PDC ENERGY, INC. - Form 10-Q

	Three Months Ended March	
	31,	
	2014	2013

Commodity price risk management loss, net	\$(1,531) \$(2,739
Sales from natural gas marketing	(5) (16
Total	\$(1,536) \$(2,755

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The significant unobservable input used in the fair value measurement of our derivative contracts is the implied volatility curve, which is provided by a third-party vendor. A significant increase or decrease in the implied volatility, in isolation, would have a directionally similar effect resulting in a significantly higher or lower fair value measurement of our Level 3 derivative contracts.

Non-Derivative Financial Assets and Liabilities

The carrying value of the financial instruments included in current assets and current liabilities approximate fair value due to the short-term maturities of these instruments.

The liability associated with our non-qualified deferred compensation plan for non-employee directors may be settled in cash or shares of our common stock. The carrying value of this obligation is based on the quoted market price of our common stock, which is a Level 1 input.

The portion of our long-term debt related to our revolving credit facility, as well as our proportionate share of PDCM's credit facility and second lien term loan, approximates fair value due to the variable nature of related interest rates. We have not elected to account for the portion of our debt related to our senior notes under the fair value option; however, as of March 31, 2014, we estimate the fair value of the portion of our long-term debt related to our 3.25% convertible senior notes due 2016 to be \$184.1 million, or 160.0% of par value, and the portion related to our 7.75% senior notes due 2022 to be \$551.3 million, or 110.3% of par value. We determined these valuations based upon measurements of trading activity and broker and/or dealer quotes, respectively, which are published market prices, and therefore are Level 2 inputs.

Concentration of Risk

Derivative Counterparties. Our derivative arrangements expose us to credit risk of nonperformance by our counterparties. We primarily use financial institutions who are also lenders under our revolving credit facility as counterparties to our derivative contracts. To date, we have had no counterparty default losses relating to our derivative arrangements. We have evaluated the credit risk of our derivative assets from our counterparties using relevant credit market default rates, giving consideration to amounts outstanding for each counterparty and the duration of each outstanding derivative position. Based on our evaluation, we have determined that the potential impact of nonperformance of our counterparties on the fair value of our derivative instruments was not significant at March 31, 2014, taking into account the estimated likelihood of nonperformance.

The following table presents the counterparties that expose us to credit risk as of March 31, 2014 with regard to our derivative assets:

Counterparty Name	Fair Value of Derivative Assets (in thousands)
Wells Fargo Bank, N.A. (1)	\$904
Bank of Montreal (1)	716
Bank of Nova Scotia (1)	425
JP Morgan Chase Bank, N.A (1)	380
Other lenders in our revolving credit facility	756
Various (2)	212
Total	\$3,393

(1)Major lender in our revolving credit facility. See Note 7, Long-Term Debt.

(2)Represents a total of 30 counterparties.

NOTE 4 - DERIVATIVE FINANCIAL INSTRUMENTS

Our results of operations and operating cash flows are affected by changes in market prices for crude oil, natural gas and NGLs. To manage a portion of our exposure to price volatility from producing crude oil and natural gas, we utilize the following economic hedging strategies for each of our business segments.

For crude oil and natural gas sales, we enter into derivative contracts to protect against price declines in future periods. While we structure these derivatives to reduce our exposure to changes in price associated with the derivative commodity, they also limit the benefit we might otherwise have received from price increases in the physical market; and

For natural gas marketing, we enter into fixed-price physical purchase and sale agreements that qualify as derivative contracts. In order to offset the fixed-price physical derivatives in our natural gas marketing, we enter into financial derivative instruments that have the effect of locking in the prices we will receive or pay for the same volumes and period, offsetting the physical derivative.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

We believe our derivative instruments continue to be effective in achieving the risk management objectives for which they were intended. As of March 31, 2014, we had derivative instruments, which were comprised of collars, fixed-price swaps, basis protection swaps and physical sales and purchases, in place for a portion of our anticipated production through 2017 for a total of 58,541 BBtu of natural gas and 7,687 MBbls of crude oil. The majority of our derivative contracts are entered into at no cost to us as we hedge our anticipated production at the then-prevailing commodity market prices.

We have elected not to designate any of our derivative instruments as hedges and therefore do not qualify for use of hedge accounting. Accordingly, changes in the fair value of our derivative instruments are recorded in the statements of operations. Changes in the fair value of derivative instruments related to our Oil and Gas Exploration and Production segment are recorded in commodity price risk management, net. Changes in the fair value of derivative instruments related to our Gas Marketing segment are recorded in sales from and cost of natural gas marketing.

The following table presents the location and fair value amounts of our derivative instruments on the condensed consolidated balance sheets as of March 31, 2014 and December 31, 2013:

Derivatives instruments:	Balance sheet line item	Fair Value	
		March 31, 2014	December 31, 2013

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The following table presents the impact of our derivative instruments on our statements of operations:

Condensed consolidated statement of operations line item	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Commodity price risk management loss, net		
Net settlements	\$ (8,240) \$ 8,474
Net change in fair value of unsettled derivatives	(18,915) (30,829)
Total commodity price risk management loss, net	\$ (27,155) \$ (22,355)
Sales from natural gas marketing		
Net settlements	\$ (476) \$ 201
Net change in fair value of unsettled derivatives	(312) (968)
Total sales from natural gas marketing	\$ (788) \$ (767)
Cost of natural gas marketing		
Net settlements	\$ 535	\$ (162)
Net change in fair value of unsettled derivatives	296	1,076
Total cost of natural gas marketing	\$ 831	\$ 914

All of our financial derivative agreements contain master netting provisions that provide for the net settlement of all contracts through a single payment in the event of early termination. Our fixed-price physical purchase and sale agreements that qualify as derivative contracts are not subject to master netting provisions and are not significant. We have elected not to offset the fair value positions recorded on our condensed consolidated balance sheets.

The following table reflects the impact of netting agreements on gross derivative assets and liabilities as of March 31, 2014 and December 31, 2013:

As of	Derivatives instruments, recorded in condensed consolidated balance sheet, gross (in thousands)	Effect of master netting agreements	Derivative instruments, net
As of March 31, 2014

NOTE 5 - PROPERTIES AND EQUIPMENT

The following table presents the components of properties and equipment, net of accumulated depreciation, depletion and amortization (DD&A):

	March 31, 2014 (in thousands)	December 31, 2013
Properties and equipment, net:		
Crude oil and natural gas properties		
Proved	\$1,876,762	\$1,784,466
Unproved	308,865	307,203
Total crude oil and natural gas properties	2,185,627	2,091,669
Pipelines and related facilities	21,597	21,781
Equipment and other	29,439	29,246
Land and buildings	13,617	13,617
Construction in progress	75,447	53,810
Properties and equipment, at cost	2,325,727	2,210,123
Accumulated DD&A	(599,935) (553,893
Properties and equipment, net	\$1,725,792	\$1,656,230

The following table presents impairment charges recorded for crude oil and natural gas properties:

	Three Months Ended March 31, 2014		2013
	(in thousands)		
Continuing operations:			
Impairment of proved properties	\$—		\$45,000
Impairment of individually significant unproved properties	—		154
Amortization of individually insignificant unproved properties	979		1,305
Total continuing operations	979		46,459
Discontinued operations:			
Amortization of individually insignificant unproved properties	—		3
Total discontinued operations	—		3
Total impairment of crude oil and natural gas properties	\$979		\$46,462

During the three months ended March 31, 2013, we recognized an impairment charge of approximately \$45.0 million related to all of our shallow Upper Devonian (non-Marcellus Shale) Appalachian Basin producing properties located in West Virginia and Pennsylvania previously owned directly by us, as well as through our proportionate share of PDCM. The impairment charge represented the excess of the carrying value of the assets over the estimated fair value, less cost to sell. The fair value of the assets was determined based upon estimated future cash flows from unrelated third-party bids, a Level 3 input. The impairment charge was included in the statement of operations line item impairment of crude oil and natural gas properties. See Note 12, Assets Held for Sale, Divestitures and Discontinued Operations, for additional information regarding these properties.

NOTE 6 - INCOME TAXES

We evaluate our estimated annual effective income tax rate on a quarterly basis based on current and forecasted operating results and tax laws. The estimated annual effective tax rate is adjusted quarterly based upon actual results and updated operating forecasts. Consequently, based upon the mix and timing of our actual earnings compared to annual projections, our effective tax rate may vary quarterly and may make quarterly comparisons not meaningful. A tax expense or benefit unrelated to the current year income or loss is recognized in its entirety as a discrete item of tax in the period identified. The quarterly income tax provision is generally comprised of tax expense on income or tax benefit on loss at the most recent estimated annual effective tax rate, adjusted for the effect of discrete items.

The effective tax rate for continuing operations for the three months ended March 31, 2014 was a 39.5% benefit on loss compared to a 35.5% benefit on loss for the three months ended March 31, 2013. The effective tax rate for the three months ended March 31, 2014 is based upon a full year forecasted tax provision on income and is greater than the statutory rate primarily due to nondeductible officers' compensation, partially offset by percentage depletion deductions. For the three months ended March 31, 2013, the nondeductible item for officers' compensation exceeded our deduction for percentage depletion, thereby reducing our tax benefit rate. Additionally, state statutory limits on the utilization of

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

our net operating losses resulted in a reduced state tax benefit for the three months ended March 31, 2013. There were no significant discrete items recorded during the three months ended March 31, 2014 or 2013.

As of March 31, 2014, our gross liability for unrecognized tax benefits continues to be immaterial and was unchanged from the amount recorded at December 31, 2013. We expect our remaining liability for uncertain tax positions to decrease to zero in the next 12 months due to the expiration of the statute of limitations.

As of the date of this report, we are current with our income tax filings in all applicable state jurisdictions and are not currently under examination. We continue voluntary participation in the Internal Revenue Service's Compliance Assurance Program for the 2013 and 2014 tax years. We received a full acceptance "no change" notice from the IRS for our filed 2012 federal tax return.

NOTE 7 - LONG-TERM DEBT

Long-term debt consists of the following:

	March 31, 2014 (in thousands)	December 31, 2013
Senior notes:		
3.25% Convertible senior notes due 2016:		
Principal amount	\$ 115,000	\$ 115,000
Unamortized discount	(9,053) (10,010
3.25% Convertible senior notes due 2016, net of discount	105,947	104,990
7.75% Senior notes due 2022	500,000	500,000
Total senior notes	605,947	604,990
Credit facilities:		
Corporate	—	—
PDCM	46,250	37,000
Total credit facilities	46,250	37,000
PDCM second lien term loan	15,000	15,000
Total debt	667,197	656,990
Less: Current portion of long-term debt	105,947	—
Long-term debt	\$ 561,250	\$ 656,990

Senior Notes

3.25% Convertible Senior Notes Due 2016. In November 2010, we issued \$115 million aggregate principal amount 3.25% convertible senior notes due May 15, 2016 (the "Convertible Notes") in a private placement to qualified institutional buyers. Interest is payable semi-annually in arrears on each May 15 and November 15. We allocated the gross proceeds of the Convertible Notes between the liability and equity components of the debt. The initial \$94.3 million liability component was determined based upon the fair value of similar debt instruments with similar terms, excluding the conversion feature, and priced on the same day we issued the Convertible Notes. The original issue discount and capitalized debt issuance costs are being amortized to interest expense over the life of the notes using an effective interest rate of 7.4%.

Upon conversion, the Convertible Notes may be settled, at our election, in shares of our common stock, cash or a combination of cash and shares of our common stock. We have initially elected a net-settlement method to satisfy our

conversion obligation, which allows us to settle the principal amount of the Convertible Notes in cash and to settle the excess conversion value in shares, as well as cash in lieu of fractional shares.

The Convertible Notes became convertible at the option of holders beginning April 1, 2014. The conversion right was triggered on March 20, 2014, when the closing sale price of our common stock on the NASDAQ Global Select Market exceeded \$55.12 (130% of the applicable conversion price) for the 20th trading day in the 30 consecutive trading days ending on March 31, 2014. In the event a holder elects to convert its note, we expect to fund any cash settlement of any such conversion from working capital and/or borrowings under our revolving credit facility. Through May 6, 2014, no holders of the Convertible Notes have elected to convert their notes. As a result of the Convertible Notes becoming convertible, we have included the carrying value of the Convertible Notes, net of discount, in the current portion of long-term debt on our condensed consolidated balance sheet as of March 31, 2014. We will reassess the convertibility of the Convertible Notes, and the related balance sheet classification, on a quarterly basis. In the event that a holder exercises the right to convert its note, we will write-off a ratable portion of the remaining debt issuance costs and unamortized discount to interest expense. Based on a March 31, 2014 stock price of \$62.26, the “if-converted” value of the Convertible Notes exceeded the principal amount by approximately \$53.9 million.

7.75% Senior Notes Due 2022. In October 2012, we issued \$500 million aggregate principal amount 7.75% senior notes due October 15, 2022 (the “2022 Senior Notes”) in a private placement to qualified institutional buyers. Interest on the 2022 Senior Notes is payable semi-

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

annually in arrears on each April 15 and October 15. The indenture governing the notes contains customary restrictive incurrence covenants. Capitalized debt issuance costs are being amortized as interest expense over the life of the notes using the effective interest method.

As of March 31, 2014, we were in compliance with all covenants related to the Convertible Notes and the 2022 Senior Notes, and expect to remain in compliance throughout the next 12-month period.

Credit Facilities

Revolving Credit Facility. In May 2013, we entered into a Third Amended and Restated Credit Agreement with JPMorgan Chase Bank, N.A. as administrative agent and other lenders party thereto. This agreement amends and restates the credit agreement dated November 2010 and expires in May 2018. The revolving credit facility is available for working capital requirements, capital expenditures, acquisitions, general corporate purposes and to support letters of credit. The revolving credit facility provides for a maximum of \$1 billion in allowable borrowing capacity, subject to the borrowing base. As of March 31, 2014, the borrowing base was \$450 million. The borrowing base is based on, among other things, the loan value assigned to the proved reserves attributable to our and our subsidiaries' crude oil and natural gas interests, excluding proved reserves attributable to PDCM and our affiliated partnerships. The borrowing base is subject to a semi-annual size redetermination based upon quantification of our reserves at June 30 and December 31, and is also subject to a redetermination upon the occurrence of certain events. The revolving credit facility is secured by a pledge of the stock of certain of our subsidiaries, mortgages of certain producing crude oil and natural gas properties and substantially all of our and such subsidiaries' other assets. Neither PDCM nor our affiliated partnerships are guarantors of our obligations under the revolving credit facility. We had no outstanding draws on our revolving credit facility as of March 31, 2014 or December 31, 2013.

As of March 31, 2014, Riley Natural Gas, a wholly owned subsidiary of PDC, had an irrevocable standby letter of credit of approximately \$11.7 million in favor of a third-party transportation service provider to secure firm transportation of the natural gas produced by third-party producers for whom we market production in the Appalachian Basin. The letter of credit reduces the amount of available funds under our revolving credit facility by an equal amount. The letter of credit expires in September 2014. As of March 31, 2014, the available funds under our revolving credit facility, including a reduction for the \$11.7 million irrevocable standby letter of credit in effect, was \$438.3 million.

The revolving credit facility contains covenants customary for agreements of this type, with the most restrictive being certain financial tests on a quarterly basis. The financial tests, as defined per the revolving credit facility, include requirements to: (a) maintain a minimum current ratio of 1.00 to 1.00 and (b) not exceed a maximum leverage ratio of 4.25 to 1.00.

As of March 31, 2014, we were in compliance with all the revolving credit facility covenants and expect to remain in compliance throughout the next 12-month period.

PDCM Credit Facility. PDCM has a credit facility dated April 2010, as amended in February 2014, with a borrowing base of \$105 million, of which our proportionate share is approximately \$53 million. The maximum allowable facility amount is \$400 million. No principal payments are required until the credit agreement expires in April 2017, or in the event that the borrowing base falls below the outstanding balance. The credit facility is subject to and secured by PDCM's properties, including our proportionate share of such properties. The borrowing base is subject to size redetermination semi-annually based upon a valuation of PDCM's reserves at June 30 and December 31. Either PDCM or the lenders may request a redetermination upon the occurrence of certain events. The credit facility is

utilized by PDCM for the exploration and development of its Marcellus Shale assets. In February 2014, PDCM entered into a Sixth Amendment to Credit Agreement. The amendment increased the amount of future production from proved, developed and producing properties that is permitted to be hedged.

The credit facility contains covenants customary for agreements of this type, with the most restrictive being certain financial tests that must be met on a quarterly basis. The financial tests, as defined by the credit facility, include requirements to maintain a minimum current ratio of 1.0 to 1.0, not to exceed a debt to EBITDAX ratio of 4.25 to 1.0 (declining to 4.0 to 1.0 on July 1, 2014) and to maintain a minimum interest coverage ratio of 2.5 to 1.0. As of March 31, 2014, our proportionate share of PDCM's outstanding credit facility balance was \$46.3 million compared to \$37.0 million as of December 31, 2013. The weighted-average borrowing rate on PDCM's credit facility was 3.4% per annum as of March 31, 2014, compared to 3.7% as of December 31, 2013.

As of March 31, 2014, PDCM was in compliance with all credit facility covenants and expects to remain in compliance throughout the next 12-month period.

PDCM Second Lien Term Loan

In July 2013, PDCM entered into a Second Lien Credit Agreement ("Term Loan Agreement") with Wells Fargo Energy Capital as administrative agent and a syndicate of other lenders party thereto. The aggregate commitment under the Term Loan Agreement is \$30 million, of which our proportionate share is \$15 million. The aggregate commitment may increase periodically up to a maximum of \$75 million, as PDCM's reserve value increases and the covenants under the Term Loan Agreement allow. The Term Loan Agreement matures in October 2017. Amounts borrowed accrue interest, at PDCM's discretion, at either an alternative base rate plus a margin of 6% per annum or an adjusted LIBOR for the interest period in effect plus a margin of 7% per annum. As of March 31, 2014, amounts borrowed and outstanding on the Term Loan Agreement were \$30.0 million, of which our proportionate share is \$15.0 million. The weighted-average interest rate on the term loan was 8.5% per annum as of both March 31, 2014 and December 31, 2013.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The Term Loan Agreement contains financial covenants, as defined in the agreement, that must be met on a quarterly basis, including requirements to maintain a minimum current ratio of 1.0 to 1.0, not to exceed a debt to EBITDAX ratio of 4.5 to 1.0, to maintain a minimum interest coverage ratio of 2.25 to 1.0 and a present value of future net revenues to total debt ratio of 1.50 to 1.00.

As of March 31, 2014, PDCM was in compliance with all Term Loan Agreement covenants and expects to remain in compliance throughout the next 12-month period.

NOTE 8 - ASSET RETIREMENT OBLIGATIONS

The following table presents the changes in carrying amounts of the asset retirement obligations associated with our working interest in crude oil and natural gas properties:

	Amount (in thousands)
Balance at beginning of period, January 1	\$41,030
Obligations incurred with development activities	137
Accretion expense	861
Revisions in estimated cash flows	(12)
Obligations discharged with divestitures of properties and asset retirements	(1,561)
Balance end of period, March 31	40,455
Less: Current portion	(1,158)
Long-term portion	\$39,297

NOTE 9 - COMMITMENTS AND CONTINGENCIES

Firm Transportation, Processing and Sales Agreements. We enter into contracts that provide firm transportation, sales and processing services on pipeline systems through which we transport or sell natural gas. Satisfaction of the volume requirements includes volumes produced by us, purchased from third parties and produced by PDCM, our affiliated partnerships and other third-party working interest owners. We record in our financial statements only our share of costs based upon our working interest in the wells. These contracts require us to pay these transportation and processing charges whether or not the required volumes are delivered. With the exception of contracts entered into by PDCM, the costs of any volume shortfalls are borne by PDC.

The following table presents gross volume information, including our proportionate share of PDCM, related to our long-term firm transportation, sales and processing agreements for pipeline capacity as of March 31, 2014:

Area	For the Twelve Months Ending March 31,				2019 and Through Expiration	Total	Expiration Date
	2015	2016	2017	2018			
Volume (MMcf)

Dollar commitment (in thousands)	\$7,323	\$7,429	\$7,745	\$7,287	\$36,807	\$66,591
----------------------------------	---------	---------	---------	---------	----------	----------

Litigation. The Company is involved in various legal proceedings that it considers normal to its business. The Company reviews the status of these proceedings on an ongoing basis and, from time to time, may settle or otherwise resolve these matters on terms and conditions that management believes are in the best interests of the Company. There is no assurance that settlements can be reached on acceptable terms or that adverse judgments, if any, in the remaining litigation will not exceed the amounts reserved. Although the results cannot be known with certainty, we currently believe that the ultimate results of such proceedings will not have a material adverse effect on our financial position, results of operations or liquidity.

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

Alleged Class Action Regarding 2010 and 2011 Partnership Purchases

In December 2011, the Company and its wholly-owned merger subsidiary were served with an alleged class action on behalf of certain former partnership unit holders, related to its partnership repurchases completed by mergers in 2010 and 2011. The action was filed in U.S. District Court for the Central District of California and is titled Schulein v. Petroleum Development Corp. The complaint primarily alleges that the disclosures in the proxy statements issued in connection with the mergers were inadequate, and a state law breach of fiduciary duty. In June 2012, the court denied the Company's motion to dismiss. In January 2014, the plaintiffs were certified as a class by the court, subject to reconsideration in pre-trial motions which we have requested. A jury trial initially scheduled for May 20, 2014 has been rescheduled to begin July 1, 2014. We have held three mediation meetings with plaintiffs in the last few months; there can be no assurance, however, that these discussions will continue. We recorded an estimated liability of \$3.3 million during the quarter ended March 31, 2014 for this litigation. We continue to believe we have good defenses to the asserted claims; however, it is reasonably possible that actual losses could be in excess of the amount accrued.

Environmental. Due to the nature of the natural gas and oil industry, we are exposed to environmental risks. We have various policies and procedures designed to mitigate the risks of environmental contamination and related liabilities. We conduct periodic reviews to identify changes in our environmental risk profile. Liabilities are recorded when environmental damages resulting from past events are probable and the costs can be reasonably estimated. As of March 31, 2014 and December 31, 2013, we had accrued environmental liabilities in the amount of \$3.2 million and \$5.4 million, respectively, included in other accrued expenses on the condensed consolidated balance sheets. We are not aware of any environmental claims existing as of March 31, 2014 which have not been provided for or would otherwise have a material impact on our financial statements. However, there can be no assurance that current regulatory requirements will not change or unknown past non-compliance with environmental laws will not be discovered on our properties.

Employment Agreements with Executive Officers. Each of our senior executive officers may be entitled to a severance payment and certain other benefits upon the termination of the officer's employment pursuant to the officer's employment agreement and/or the Company's executive severance compensation plan. The nature and amount of such benefits would vary based upon, among other things, whether the termination followed a change of control of the Company.

NOTE 10 - COMMON STOCK

Stock-Based Compensation Plans

The following table provides a summary of the impact of our outstanding stock-based compensation plans on the results of operations for the periods presented:

	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Stock-based compensation expense	\$3,847	\$2,602
Income tax benefit	(1,462)) (994
Net stock-based compensation expense	\$2,385	\$1,608

Stock Appreciation Rights ("SARs")

The SARs vest ratably over a three-year period and may be exercised at any point after vesting through 10 years from the date of issuance. Pursuant to the terms of the awards, upon exercise, the executive officers will receive, in shares of common stock, the excess of the market price of the award on the date of exercise over the market price of the award on the date of issuance.

In January 2014, the Compensation Committee awarded 88,248 SARs to our executive officers. The fair value of each SAR award was estimated on the date of grant using a Black-Scholes pricing model using the following assumptions:

	Three Months Ended March 31,		
	2014	2013	
Expected term of award	6 years	6 years	
Risk-free interest rate	2.1	% 1.0	%
Expected volatility	65.6	% 65.5	%
Weighted-average grant date fair value per share	\$29.96	\$21.96	

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The expected life of the award was estimated using historical stock option exercise behavior data. The risk-free interest rate was based on the U.S. Treasury yields approximating the expected life of the award in effect at the time of grant. Expected volatilities were based on our historical volatility. We do not expect to pay or declare dividends in the foreseeable future.

The following table presents the changes in our SARs:

	Three Months Ended March 31, 2014			2013			Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
	Number of SARs	Weighted-Average Exercise Price	Remaining Contractual Term (in years)	Number of SARs	Weighted-Average Exercise Price	Remaining Contractual Term (in years)		
Outstanding beginning of year, January 1, Awarded	190,763	\$ 33.77		118,832	\$ 30.80			
Outstanding at March 31, Vested and expected to vest at March 31, Exercisable at March 31,	88,248	49.57		87,078	37.18			
	279,011	38.76	8.6	6,555	205,910	33.50	8.9	3,310
	266,369	38.50	8.5	6,329	194,689	33.38	8.8	3,152
	109,920	32.71	7.6	3,248	56,430	31.04	8.0	1,046

Total compensation cost related to SARs granted, net of estimated forfeitures, and not yet recognized in our condensed consolidated statement of operations as of March 31, 2014 was \$3.6 million. The cost is expected to be recognized over a weighted-average period of 2.3 years.

Restricted Stock Awards

Time-Based Awards. The fair value of the time-based restricted shares is amortized ratably over the requisite service period, primarily three years. The time-based shares vest ratably on each annual anniversary following the grant date if the participant is continuously employed.

In January 2014, the Compensation Committee awarded a total of 120,428 time-based restricted shares to our executive officers that vest ratably over a three-year period ending on January 16, 2017.

The following table presents the changes in non-vested time-based awards for the three months ended March 31, 2014:

	Shares	Weighted-Average Grant-Date Fair Value
Non-vested at December 31, 2013	651,781	\$36.36
Granted	126,102	49.62
Vested	(84,235) 35.09
Forfeited	(15,466) 36.59
Non-vested at March 31, 2014	678,182	38.98

	As of/Three Months Ended March 31,	
	2014	2013
	(in thousands, except per share data)	
Total intrinsic value of time-based awards vested	\$4,317	\$2,303
Total intrinsic value of time-based awards non-vested	42,224	34,572
Market price per common share as of March 31,	62.26	49.57
Weighted-average grant date fair value per share	49.62	36.82

Total compensation cost related to non-vested time-based awards, net of estimated forfeitures, and not yet recognized in our condensed consolidated statements of operations as of March 31, 2014 was \$18.5 million. This cost is expected to be recognized over a weighted-average period of 2.1 years.

Market-Based Awards. The fair value of the market-based restricted shares is amortized ratably over the requisite service period, primarily three years. The market-based shares vest if the participant is continuously employed throughout the performance period and the market-based performance measure is achieved, with a maximum vesting period of five years. All compensation cost related to the market-based awards will be recognized if the requisite service period is fulfilled, even if the market condition is not achieved.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

In January 2014, the Compensation Committee awarded a total of 42,151 market-based restricted shares to our executive officers. In addition to continuous employment, the vesting of these shares is contingent on the Company's total shareholder return ("TSR"), which is essentially the Company's stock price change including any dividends, as compared to the TSR of a set group of 15 peer companies. The shares are measured over a three-year period ending on December 31, 2016 and can result in a payout between 0% and 200% of the total shares awarded. The weighted-average grant date fair value per market-based share for these awards granted was computed using the Monte Carlo pricing model using the following assumptions:

	Three Months Ended March 31,			
	2014	2013		
Expected term of award	3 years	3 years		
Risk-free interest rate	0.8	% 0.4	%	%
Expected volatility	55.2	% 56.6	%	%
Weighted-average grant date fair value per share	\$56.87	\$49.04		

The expected term of the awards was based on the requisite service period. The risk-free interest rate was based on the U.S. Treasury yields in effect at the time of grant and extrapolated to approximate the life of the award. The expected volatility was based on our historical volatility.

The following table presents the change in non-vested market-based awards during three months ended March 31, 2014:

	Shares	Weighted-Average Grant-Date Fair Value per Share
Non-vested at December 31, 2013	72,111	\$43.75
Granted	42,151	56.87
Non-vested at March 31, 2014	114,262	48.59

	As of/Three Months Ended March 31, 2014	2013
	(in thousands, except per share data)	
Total intrinsic value of market-based awards vested	\$—	\$—
Total intrinsic value of market-based awards non-vested	7,114	4,078
Market price per common share as of March 31,	62.26	49.57
Weighted-average grant date fair value per share	56.87	49.04

Total compensation cost related to non-vested market-based awards, net of estimated forfeitures, and not yet recognized in our condensed consolidated statement of operations as of March 31, 2014 was \$3.5 million. This cost is expected to be recognized over a weighted-average period of 2.2 years.

NOTE 11 - EARNINGS PER SHARE

Basic earnings per share is computed by dividing net earnings by the weighted-average number of common shares outstanding for the period. Diluted earnings per share is similarly computed except that the denominator includes the effect, using the treasury stock method, of unvested restricted stock, outstanding SARs, stock options, Convertible Notes and shares held pursuant to our non-employee director deferred compensation plan, if including such potential shares of common stock is dilutive.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The following table presents a reconciliation of the weighted-average diluted shares outstanding:

	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Weighted-average common shares outstanding - basic	35,690	30,270
Weighted-average common shares and equivalents outstanding - diluted	35,690	30,270

We reported a net loss for the three months ended March 31, 2014 and 2013, respectively. As a result, our basic and diluted weighted-average common shares outstanding were the same as the effect of the common share equivalents was anti-dilutive.

The following table presents the weighted-average common share equivalents excluded from the calculation of diluted earnings per share due to their anti-dilutive effect:

	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Weighted-average common share equivalents excluded from diluted earnings per share due to their anti-dilutive effect:		
Restricted stock	832	844
SARs	97	45
Stock options	3	3
Non-employee director deferred compensation	5	4
Convertible notes	614	48
Total anti-dilutive common share equivalents	1,551	944

In November 2010, we issued our Convertible Notes, which give the holders the right to convert the aggregate principal amount into 2.7 million shares of our common stock at a conversion price of \$42.40 per share. The Convertible Notes could be included in the dilutive earnings per share calculation using the treasury stock method if the average market share price exceeds the \$42.40 conversion price during the period presented. Shares issuable upon conversion of the Convertible Notes were excluded from the diluted earnings per share calculation for the three months ended March 31, 2014 and 2013 as the effect would be anti-dilutive to our earnings per share.

NOTE 12 - ASSETS HELD FOR SALE, DIVESTITURES AND DISCONTINUED OPERATIONS

Appalachian Basin. In October 2013, we executed a purchase and sale agreement for the sale of our shallow Upper Devonian (non-Marcellus Shale) Appalachian Basin crude oil and natural gas properties previously owned directly by us, as well as through our proportionate share of PDCM. The properties consisted of approximately 3,500 gross shallow producing wells, related facilities and associated leasehold acreage, limited to the Upper Devonian and shallower formations. Substantially all of the divestiture closed in December 2013 for aggregate consideration of

approximately \$20.6 million, of which our share of the proceeds was approximately \$5.1 million, subject to certain post-closing adjustments. We received our proportionate share of cash proceeds of \$0.9 million and recorded our proportionate share of a note receivable and account receivable from the buyer of \$3.3 million and \$0.8 million, respectively. Concurrent with the closing of the transaction, our \$6.7 million irrevocable standby letter of credit and an agreement for firm transportation services was released and novated to the buyer. We retained all zones, formations and intervals below the Upper Devonian formation including the Marcellus Shale, Utica Shale and Huron Shale. The divestiture of these assets did not meet the requirements to be accounted for as discontinued operations.

Piceance Basin and NECO. In February 2013, we entered into a purchase and sale agreement pursuant to which we agreed to sell to certain affiliates of Caerus Oil and Gas LLC (“Caerus”) our Piceance Basin, NECO and certain other non-core Colorado oil and gas properties, leasehold mineral interests and related assets. Additionally, certain firm transportation obligations and natural gas hedging positions were assumed by the buyer. In June 2013, this divestiture was completed with total consideration of approximately \$177.6 million, with an additional \$17.0 million paid to our non-affiliated investor partners in our affiliated partnerships. The sale resulted in a pre-tax loss of \$2.3 million. Following the sale to Caerus, we do not have significant continuing involvement in the operations of, or cash flows from, the Piceance Basin and NECO oil and gas properties. Accordingly, the results of operations related to these assets have been separately reported as discontinued operations in the condensed consolidated statement of operations for the three months ended March 31, 2013. The sale of our other non-core Colorado oil and gas properties did not meet the requirements to be accounted for as discontinued operations.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

The following table presents statement of operations data related to our discontinued operations for the Piceance Basin and NECO divestitures:

	Three Months Ended March 31, 2013	
Condensed consolidated statements of operations - discontinued operations		
Revenues		
Crude oil, natural gas and NGLs sales	\$10,274	
Sales from natural gas marketing	450	
Well operations, pipeline income and other	450	
Total revenues	11,174	
Costs, expenses and other		
Production costs	5,393	
Cost of natural gas marketing	454	
Depreciation, depletion and amortization	2,258	
Other	495	
Total costs, expenses and other	8,600	
Income from discontinued operations	2,574	
Provision for income taxes	(1,037)
Income from discontinued operations, net of tax	\$1,537	

NOTE 13 - TRANSACTIONS WITH AFFILIATES

PDCM and Affiliated Partnerships. Our Gas Marketing segment markets the natural gas produced by PDCM and our affiliated partnerships in the Appalachian Basin. Our cost of natural gas marketing includes \$9.4 million and \$3.7 million for the three months ended March 31, 2014 and 2013, respectively, related to the marketing of natural gas on behalf of PDCM and \$0.3 million for the three months ended March 31, 2013 related to the marketing of natural gas on behalf of our affiliated partnerships.

Amounts due from/to the affiliated partnerships have historically been primarily related to derivative positions and, to a lesser extent, unbilled well lease operating expenses, and costs resulting from audit and tax preparation services. Previously, we have entered into derivative instruments on behalf of our affiliated partnerships for their estimated production. In June 2013, all remaining derivative positions designated to our affiliated partnerships were liquidated prior to settlement. As a result, there were no amounts due from/to our affiliated partnerships related to derivative positions as of March 31, 2014.

We provide certain well operating and administrative services for PDCM. Amounts billed to PDCM for these services were \$2.3 million and \$3.4 million for the three months ended March 31, 2014 and March 31, 2013, respectively. Our statements of operations include only our proportionate share of these billings. The following table presents the statement of operations line item in which our proportionate share is recorded and the amount for each of the periods presented:

	Three Months Ended March 31,	
	2014	2013
Condensed consolidated statement of operations line item		

(in thousands)

Production costs	\$605	\$1,066
Exploration expense	—	105
General and administrative expense	556	515

NOTE 14 - BUSINESS SEGMENTS

We separate our operating activities into two segments: Oil and Gas Exploration and Production and Gas Marketing. All material inter-company accounts and transactions between segments have been eliminated.

Oil and Gas Exploration and Production. Our Oil and Gas Exploration and Production segment includes all of our crude oil and natural gas properties. The segment represents revenues and expenses from the production and sale of crude oil, natural gas and NGLs. Segment revenue includes crude oil, natural gas and NGLs sales, commodity price risk management, net and well operation and pipeline income. Segment income (loss) consists of segment revenue less production cost, exploration expense, impairment of crude oil and natural gas properties, direct general and administrative expense and depreciation, depletion and amortization expense.

Table of contents

PDC ENERGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

Gas Marketing. Our Gas Marketing segment purchases, aggregates and resells natural gas produced by us and others. Segment income (loss) primarily represents sales from natural gas marketing and direct interest income, less costs of natural gas marketing and direct general and administrative expense.

Unallocated amounts. Unallocated income includes unallocated other revenue, less corporate general administrative expense, corporate DD&A expense, interest income and interest expense. Unallocated assets include assets utilized for corporate, general and administrative purposes, as well as assets not specifically included in our two business segments.

The following tables present our segment information:

	Three Months Ended March 31,	
	2014	2013
	(in thousands)	
Segment revenues:		
Oil and gas exploration and production	\$ 103,325	\$ 58,156
Gas marketing	26,937	13,670
Total revenues	\$ 130,262	\$ 71,826
Segment income (loss) before income taxes:		
Oil and gas exploration and production	\$ 34,006	\$(33,702)
Gas marketing	67	(66)
Unallocated	(37,587)) (29,679)
Loss before income taxes	\$(3,514)) \$(63,447)

	March 31, 2014	December 31, 2013
	(in thousands)	
Segment assets:		
Oil and gas exploration and production	\$ 1,965,354	\$ 1,937,251
Gas marketing	28,366	20,342
Unallocated	71,448	67,610
Total assets	\$ 2,065,168	\$ 2,025,203

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis, as well as other sections in this report, should be read in conjunction with our condensed consolidated financial statements and related notes included elsewhere in this report. Further, we encourage you to revisit the Special Note Regarding Forward-Looking Statements.

EXECUTIVE SUMMARY

Financial Overview

Crude oil, natural gas and NGLs sales from continuing operations increased during the three months ended March 31, 2014 by \$50.4 million, or 63%, compared to the three months ended March 31, 2013. The growth in crude oil, natural gas and NGLs sales was the result of increased production and higher commodity prices. Production of 2.4 MMboe from continuing operations for the three months ended March 31, 2014 represents an increase of 44% as compared to the three months ended March 31, 2013, primarily attributable to our successful horizontal Niobrara and Codell drilling program in the Wattenberg Field. This translates to 26.7 Mboe per day during the three months ended March 31, 2014, compared to 18.5 Mboe per day during the three months ended March 31, 2013. Crude oil production from continuing operations increased 56% during the three months ended March 31, 2014, while NGLs production from continuing operations increased 59%. Our liquids percentage of total production from continuing operations was 59% during the three months ended March 31, 2014 compared to 54% during the three months ended March 31, 2013. Natural gas production from continuing operations increased 29% during the three months ended March 31, 2014 compared to the same prior year period.

Growth in financial metrics for the three months ended March 31, 2014 compared to the three months ended March 31, 2013 was as follows:

- ▲ Adjusted net income of \$9.6 million compared to an adjusted net loss of \$20.4 million;
- ▲ Adjusted cash flows from operations of \$69.7 million compared to \$52.4 million; and
- ▲ Adjusted EBITDA of \$76.5 million compared to \$61.1 million.

Adjusted net income/loss, Adjusted cash flows from operations and Adjusted EBITDA are non-U.S. GAAP financial measures. See Non-U.S. GAAP Financial Measures and Reconciliation of Non-U.S. GAAP Financial Measures, below, for a more detailed discussion of these non-U.S. GAAP financial measures.

Available liquidity as of March 31, 2014 was \$591.7 million, including \$7.0 million related to PDCM, compared to \$647.0 million, including \$16.1 million related to PDCM, as of December 31, 2013. Available liquidity is comprised of \$147.2 million of cash and cash equivalents and \$444.5 million available for borrowing under our revolving credit facilities. We believe we have sufficient liquidity to allow us to execute our expanded drilling program through 2014.

Operational Overview

Drilling Activities. During the three months ended March 31, 2014, we continued to execute our strategic plan of increasing our overall production and liquids mix by focusing our drilling operations primarily in the liquid-rich Wattenberg Field in Colorado and the emerging Utica Shale play in southeastern Ohio.

In the Wattenberg Field, we are currently running four drilling rigs and plan to bring on a fifth rig in the second quarter of 2014. During the three months ended March 31, 2014, we spudded 24 horizontal wells in the Wattenberg Field and turned in line 13 horizontal wells. We also participated in 13 gross, 2.5 net, horizontal non-operated drilling projects and turned in line 11 gross, 1.9 net, horizontal non-operated wells. In the Utica Shale, we are currently running one drilling rig and plan to bring on a second rig in the second half of 2014. We spudded three horizontal wells during the three months ended March 31, 2014 and turned in line two horizontal wells. In the Marcellus Shale, PDCM finalized drilling and completion operations on four horizontal wells that were in-process at December 31, 2013. Three of these wells were turned in line as of March 31, 2014 and the fourth was turned in line in April 2014.

2014 Operational Outlook

We expect our production for 2014 to range between 9.5 MMBoe to 10 MMBoe. Our 2014 capital budget of \$647 million, which includes our \$16 million share of PDCM's capital budget, is expected to be used primarily for development drilling and selective acquisitions of additional acreage. This budget includes \$576 million of development capital and \$71 million for leasehold acquisitions, exploration and other expenditures. We may revise our capital budget during the year as a result of, among other things, acquisitions or dispositions of assets, drilling results, commodity prices, changes in our borrowing capacity and/or significant changes in cash flows.

Wattenberg Field. We expect to invest approximately \$467 million in the Wattenberg Field in 2014, continuing with a four-rig drilling program with plans to add a fifth rig in the second quarter of 2014. We plan to spud 115 gross operated horizontal wells in the field, comprised of 59 horizontal Codell wells and 56 horizontal Niobrara wells, of which 92 are expected to be turned in line during 2014. Approximately \$100 million of the total Wattenberg Field capital budget is expected to be allocated to non-operated projects. During the three months ended March 31, 2014, we invested approximately \$87 million, or 19%, of our 2014 capital budget for the Wattenberg Field.

Table of contents

PDC ENERGY, INC.

Utica Shale. We expect to invest approximately \$162 million in the Utica Shale in 2014 to spud 18 horizontal wells, comprised of eight wells in our northern acreage and 10 wells in our southern acreage, of which 12 are expected to be turned in line during 2014. A second drilling rig is expected to be deployed in the second half of 2014. The Utica capital budget includes approximately \$30 million to acquire additional contiguous acreage. During the three months ended March 31, 2014, we invested approximately \$28 million, or 17%, of our 2014 capital budget for the Utica Shale.

Marcellus Shale. PDCM's 2014 capital budget is \$32 million, of which \$16 million represents our share, and is expected to be utilized to finalize drilling and completion operations on horizontal wells that were in-process at December 31, 2013 and for midstream infrastructure. During the three months ended March 31, 2014, PDCM invested approximately \$20 million, or 63%, of its 2014 capital budget for the Marcellus Shale, of which \$10 million represents our share. PDCM's capital budget is expected to be funded by PDCM's operating activities and borrowing under its credit facility or other financing transactions. PDCM has elected to temporarily suspend its drilling activities in the Marcellus Shale.

Non-U.S. GAAP Financial Measures

We use "adjusted cash flows from operations," "adjusted net income (loss)" and "adjusted EBITDA," non-U.S. GAAP financial measures, for internal management reporting, when evaluating period-to-period changes and, in some cases, providing public guidance on possible future results. These measures are not measures of financial performance under U.S. GAAP and should be considered in addition to, not as a substitute for, net income (loss) or cash flows from operations, investing or financing activities, and should not be viewed as liquidity measures or indicators of cash flows reported in accordance with U.S. GAAP. The non-U.S. GAAP financial measures that we use may not be comparable to similarly titled measures reported by other companies. Also, in the future, we may disclose different non-U.S. GAAP financial measures in order to help our investors more meaningfully evaluate and compare our future results of operations to our previously reported results of operations. We strongly encourage investors to review our financial statements and publicly filed reports in their entirety and not rely on any single financial measure. See Reconciliation of Non-U.S. GAAP Financial Measures for a detailed description of these measures, as well as a reconciliation of each to the most comparable U.S. GAAP measure.
