We have audited the accompanying statements of net assets available for plan benefits of the Savings Plan (the "Plan") as of December 31, 2006 and 2005, and the related statement of assets available for plan benefits for the year ended December 31, 2006. These financial statements and supplemental schedule referred to below are the responsibility of the Plan's management. Our audit is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required, nor were we engaged to perform, an audit of its internal controls over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing our procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly we do not express an opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for plan benefits as of December 31, 2006 and 2005, and the changes in net assets available for plan benefits for the year ended December 31, 2006 in conformity with accounting principles generally accepted in the United States of America.

Our audits were performed for the purpose of forming an opinion on the basic financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2006 is presented for the purpose of additional analysis and is not a required part of the basic financial statements. The supplemental information required by the Department of Labor's Rules and Regulations for Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is not subjected to the auditing procedures applied in our audits of the basic financial statements and, therefore, our opinion, is fairly stated in all material respects in relation to the basic financial statements as a whole.

2. **Summary of Significant
Accounting
Policies**

Basis of Accounting

The financial statements are presented on the accrual basis in conformity with accounting principles generally accepted in the United States of America (U.S.A.) applicable to employee benefit plans and ERISA.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses, and certain changes therein, and disclosure of contingent assets and liabilities. Actual results could differ materially from those estimates.

Such investments represented approximately 31 percent of the Plan's total assets as of December 31, 2006, and 2005, respectively. For more information on the uncertainties regarding investment in the Company's common stock, please refer to the Annual report on Form 10-K for the period ended December 31, 2006, and the quarterly report on Form 10-Q for the period ended December 31, 2006, Edison International, and its affiliate entities listed below:

- Midwest Generation, LLC
- EME Homer City Generation L.P.
- Mission Energy Holding Company

Notes to Financial Statements

2. Summary of Significant Accounting Policies (Continued)

The Plan provides for various funds that hold investment securities. These securities are exposed to various risks such as interest rate risk. Due to the level of risk associated with certain investments, there is a level of uncertainty related to changes in the value of investment securities. The Plan maintains a level of uncertainty that is at least reasonably possible that changes in risk in the near future may affect participants' account balances and the amounts reported Available for Plan Benefits and the Statement of Changes in Plan Benefits.

The Plan participates in various investment options that consist of investments in foreign companies, which involve special risks and considerations associated with investing in U.S.A. companies. These risks include devaluation of currencies, unreliable information about issuers, different securities market practices, settlement practices, and possible adverse political events. Moreover, securities of many foreign companies and their market prices are more volatile than securities of comparable U.S. companies.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value or estimated fair value. Investments in mutual funds valued at quoted market prices represent investments in mutual funds. Investments in the common collective funds represent investments in institutional funds (see Note 4). Investments in the common collective funds are stated at net asset value of shares held by the Plan at year-end. Stock is valued at its quoted market price at year-end. Bonds are valued at cost, which approximates fair value. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the trade-date. Dividends are recorded on the ex-dividend date.

2. **Summary of Significant Accounting Policies (Continued)** Participant loans that are in default as provided in the plan deemed distributions for tax purposes and also reported as such. Management has determined these loans in default as uncollectible. December 31, 2006, \$51,115 of participant loans in default are uncollectible and written-off. This is included as loans in net assets. Changes in Net Assets Available for Plan Benefits.

Net Appreciation (Depreciation) in Fair Value of Investment Assets

Realized and unrealized appreciation (depreciation) in the fair value of investments is based on the difference between the fair value of the assets at the end of the year, or at the time of purchase for assets purchased during the year, and the fair value on the day investments are sold with respect to appreciation (depreciation), or on the last day of the year for assets held at year-end (depreciation).

Distributions to Participants

Distributions to participants, other than loans, are recorded as a liability to participants.

3. **Investment Elections** The Trustee invests contributions in accordance with participant investment elections. Participants may elect changes to their investment mix with certain restrictions. The Plan imposes a seven-day waiting period for reallocation elections that applies to all funds except the Edison Reallocation Fund. Reallocation elections are also subject to trading restrictions and other measures imposed by investment fund managers. Participant deferral percentages and deferral investment election frequency.

4. **Investment Options** The transfer of a participant's investment from one fund to another is based on the net asset value of the units allocated to the participant's investment in the fund on the date of transfer.

As of December 31, 2006 and 2005, all participants were invested in one or more of the following investment fund offerings. These investment fund offerings consisted of the following:

- o Three Pre-mixed Portfolios - Funds are invested in U.S. stocks, non-U.S. stocks and corporate and government bonds.

- o Six Institutional Funds - Funds are invested in a classes; large and small U.S. stocks (including Stock), non-U.S. stocks and fixed income instruments;
- o Thirty Eight Mutual Funds - Funds are invested in a funds from multiple asset classes.
