Forward-Looking Statements

This report may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 about our financial condition, results of operations and business. These forward-looking statements can be identified by the use of forward-looking words, such as “may,” “could,” “should,” “estimate,” “project,” “forecast,” “intend,” “expect,” “anticipate,” “believe,” “target,” “plan” or other comparable words, and by discussions of strategy that may involve risks and uncertainties.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties which could materially affect our business, financial condition or future results including, but not limited to, risks and uncertainties with respect to: the Company's leverage; liabilities imposed by the Company's debt instruments; market demand; competitive factors; supply constraints; material and energy costs; risks and uncertainties associated with intangible assets, including goodwill or other intangible asset impairment charges; technology factors; litigation; government and regulatory actions; the Company's accounting policies; future trends; general economic and currency conditions; various conditions specific to the Company's business and industry; the Company's ability to identify attractive acquisition candidates, successfully integrate acquired operations or realize the intended benefits of such acquisitions; the Company's ability to attain targeted savings and free cash flow amounts under its Financial Improvement Plan; future prospects of the Company; and other risks that are discussed in Part I, Item 1A, "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2015. The risks described in our Annual Report on Form 10-K and elsewhere in this report are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deemed to be immaterial also may materially adversely affect our business, financial position and results of operations or cash flows.

The cautionary statements set forth above should be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue. We caution readers not to place undue reliance on the statements, which speak only as of the date of this report. We do not undertake any obligation to review or confirm analysts' expectations or estimates or to release publicly any revisions to any forward-looking statement to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

We disclose important factors that could cause our actual results to differ materially from our expectations implied by our forward-looking statements under Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this report. These cautionary statements qualify all forward-looking statements attributed to us or persons acting on our behalf. When we indicate that an event, condition or circumstance could or would have an adverse effect on us, we mean to include effects upon our business, financial and other conditions, results of operations, prospects and ability to service our debt.

TRIMAS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Basis of Presentation

TriMas Corporation ("TriMas" or the "Company"), and its consolidated subsidiaries, is a global manufacturer and distributor of products for commercial, industrial and consumer markets. The Company is principally engaged in the following reportable segments with diverse products and market channels: Packaging, Aerospace, Energy and Engineered Components. See Note 10, "Segment Information," for further information on each of the Company's reportable segments.

On June 30, 2015, the Company completed the spin-off of its Cequent businesses, creating a new independent publicly traded company, Horizon Global Corporation ("Horizon"). The Company incurred approximately \$30 million of one-time, pre-tax costs associated with the spin-off, of which approximately \$4 million was incurred during the three months ended March 31, 2015 and was included in income from discontinued operations. These costs primarily related to financing, legal, tax and accounting services rendered by third parties.

The results of operations and cash flows of the Cequent businesses are reflected as discontinued operations for all periods presented through the date of the spin-off. See Note 3, "Discontinued Operations," for further details regarding the spin-off.

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries and, in the opinion of management, contain all adjustments, including adjustments of a normal and recurring nature, necessary for a fair presentation of financial position and results of operations. Results of operations for interim periods are not necessarily indicative of results for the full year. The accompanying consolidated financial statements and notes thereto should be read in conjunction with the Company's 2015 Annual Report on Form 10-K.

2. New Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-09, "Compensation - Stock Compensation (Topic 718)" ("ASU 2016-09"). ASU 2016-09 simplifies several aspects of accounting for share-based payment award transactions, including income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. ASU 2016-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, with early adoption permitted. The Company is in the process of assessing the impact of adoption of ASU 2016-09 on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)" ("ASU 2016-02"). ASU 2016-02 requires that lessees, at the lease commencement date, recognize a lease liability representing the lessee's obligation to make lease payments arising from a lease as well as a right-of-use asset, which represents the lessee's right to use, or control the use of a specified asset, for the lease term. The new guidance also aligns lessor accounting to the lessee accounting model and to Topic 606, "Revenue from Contracts with Customers." ASU 2016-02 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018 and is to be applied using a modified retrospective approach with early adoption permitted. The Company is in the process of assessing the impact of the adoption of ASU 2016-02 on its consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, "Inventory (Topic 330): Simplifying the Measurement of Inventory" ("ASU 2015-11"). ASU 2015-11 requires an entity to measure inventory at the lower of cost and net realizable value, thereby simplifying the current guidance under which an entity must measure inventory at the lower of cost or market. The ASU defines net realizable value as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. ASU 2015-11 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016 and is to be applied prospectively with early adoption permitted. The Company is in the process of assessing the impact of adoption of ASU 2015-11 on its consolidated financial statements.

Table of Contents

TRIMAS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). ASU 2014-09 requires that an entity recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. ASU 2014-09 was originally effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2016. In August 2015, the FASB issued ASU 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date" ("ASU 2015-14"), which defers ASU 2014-09 by one year, making it effective for annual reporting periods beginning on or after December 15, 2017 while also providing for early adoption, but not before the original effective date. Additionally, in March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)," which clarifies the implementation guidance on principal versus agent considerations in ASU 2014-09. The Company is in the process of assessing the impact of the adoption of these ASUs on its consolidated financial statements.

3. Discontinued Operations

On June 30, 2015, the Company completed the spin-off of its Cequent businesses (comprised of the former Cequent Americas and Cequent Asia Pacific Europe Africa ("Cequent APEA") reportable segments), creating a new independent publicly traded company, Horizon, through the distribution of 100% of the Company's interest in Horizon to holders of the Company's common stock. On June 30, 2015, each of the Company's shareholders of record as of the close of business on the record date of June 25, 2015 received two shares of Horizon common stock for every five shares of TriMas common stock held. In addition, on June 30, 2015, immediately prior to the effective time of the spin-off, Horizon entered into a new debt financing arrangement and used the proceeds to make a cash distribution of approximately \$214.5 million to the Company.

Following the spin-off, there were no assets or liabilities remaining from the Cequent operations. The Cequent businesses are presented as discontinued operations in the Company's consolidated statement of income and cash flows for all periods presented.

Results of discontinued operations are summarized as follows:

	Three months ended March 31, 2015 (dollars in thousands)
Net sales	\$ 142,360
Cost of sales	(107,060)
Gross profit	35,300
Selling, general and administrative expenses	(30,820)
Operating profit	4,480
Interest expense	(1,220)
Other expense, net	(1,250)
Other expense, net	(2,470)
Income from discontinued operations, before income taxes	2,010
Income tax benefit	30
Income from discontinued operations, net of tax	\$ 2,040

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

Credit Agreement

The Company is party to a credit agreement (the "Credit Agreement"), consisting of a \$500.0 million senior secured revolving credit facility, which permits borrowings denominated in specific foreign currencies ("Foreign Currency Loans"), subject to a \$75.0 million sub limit, which matures on June 30, 2020 and is subject to interest at London Interbank Offered Rates ("LIBOR") plus 1.75%, and a \$275.0 million senior secured term loan A facility ("Term Loan A Facility"), which matures on June 30, 2020 and is subject to interest at LIBOR plus 1.75%. The interest rate spread is based upon the leverage ratio, as defined, as of the most recent determination date.

The Credit Agreement also provides incremental term loan and/or revolving credit facility commitments in an amount not to exceed the greater of \$300.0 million and an amount such that, after giving effect to such incremental commitments and the incurrence of any other indebtedness substantially simultaneously with the making of such commitments, the senior secured net leverage ratio, as defined, is no greater than 2.50 to 1.00. The terms and conditions of any incremental term loan and/or revolving credit facility commitments must be no more favorable than the existing credit facility.

The Company may be required to prepay a portion of its Term Loan A Facility in an amount equal to a percentage of the Company's excess cash flow, as defined, with such percentage based on the Company's leverage ratio, as defined. As of March 31, 2016, no amounts are due under this provision.

The Company is also able to issue letters of credit, not to exceed \$40.0 million in aggregate, against its revolving credit facility commitments. At March 31, 2016 and December 31, 2015, the Company had letters of credit of approximately \$18.1 million and \$21.6 million, respectively, issued and outstanding.

At March 31, 2016, the Company had approximately \$121.2 million outstanding under its revolving credit facility and had approximately \$360.7 million potentially available after giving effect to approximately \$18.1 million of letters of credit issued and outstanding. At December 31, 2015, the Company had approximately \$100.3 million outstanding under its revolving credit facility and had approximately \$378.1 million potentially available after giving effect to approximately \$21.6 million of letters of credit issued and outstanding. However, including availability under its accounts receivable facility and after consideration of leverage restrictions contained in the Credit Agreement, the Company had approximately \$66.8 million and \$107.4 million at March 31, 2016 and December 31, 2015, respectively, of borrowing capacity available for general corporate purposes.

Principal payments required under the Credit Agreement for the Term Loan A Facility are approximately \$3.4 million due each fiscal quarter from December 2015 through September 2018 and approximately \$5.2 million due each fiscal quarter from December 2018 through March 2020, with final payment of approximately \$202.8 million due on June 30, 2020.

The debt under the Credit Agreement is an obligation of the Company and certain of its domestic subsidiaries and is secured by substantially all of the assets of such parties. Borrowings under the \$75.0 million foreign currency sub limit of the \$500.0 million senior secured revolving credit facility are secured by a pledge of the assets of the foreign subsidiary borrowers that are a party to the agreement. The Credit Agreement also contains various negative and affirmative covenants and other requirements affecting the Company and its subsidiaries, including restrictions on the incurrence of debt, liens, mergers, investments, loans, advances, guarantee obligations, acquisitions, assets dispositions, sale-leaseback transactions, hedging agreements, dividends and other restricted payments, transactions with affiliates, restrictive agreements and amendments to charters, bylaws, and other material documents. The terms of the Credit Agreement also require the Company and its subsidiaries to meet certain restrictive financial covenants and ratios computed quarterly, including a maximum leverage ratio (total consolidated indebtedness plus outstanding amounts under the accounts receivable securitization facility over consolidated EBITDA, as defined) and a minimum interest expense coverage ratio (consolidated EBITDA, as defined, over cash interest expense, as defined). At March 31, 2016, the Company was in compliance with its financial covenants contained in the Credit Agreement.

As of March 31, 2016 and December 31, 2015, the Company's Term Loan A Facility traded at approximately 99.6% of par value and the Company's revolving credit facility traded at approximately 99.3% of par value. The valuations of the Credit Agreement were determined based on Level 2 inputs under the fair value hierarchy, as defined.

(unaudited)

Receivables Facility

The Company is party to an accounts receivable facility through TSPC, Inc. ("TSPC"), a wholly-owned subsidiary, to sell trade accounts receivable of substantially all of the Company's domestic business operations. Under this facility, TSPC, from time to time, may sell an undivided fractional ownership interest in the pool of receivables up to \$75.0 million to a third party multi-seller receivables funding company. The net amount financed under the facility is less than the face amount of accounts receivable by an amount that approximates the purchaser's financing costs. The cost of funds under this facility consisted of a 1-month LIBOR-based rate plus a usage fee of 1.00% and a fee on the unused portion of the facility of 0.35% as of March 31, 2016 and 2015.

The Company had approximately \$54.0 million and \$53.6 million outstanding under the facility as of March 31, 2016 and December 31, 2015, respectively. No amounts were available but not utilized as of March 31, 2016. As of December 31, 2015, approximately \$7.1 million was available but not utilized. Aggregate costs incurred under the facility were approximately \$0.2 million for both the three months ended March 31, 2016 and 2015, and are included in interest expense in the accompanying consolidated statement of income. The facility expires on June 30, 2020.

The cost of funds fees incurred are determined by calculating the estimated present value of the receivables sold compared to their carrying amount. The estimated present value factor is based on historical collection experience and a discount rate based on a 1-month LIBOR-based rate plus the usage fee discussed above and is computed in accordance with the terms of the agreement. As of March 31, 2016, the cost of funds under the facility was based on an average liquidation period of the portfolio of approximately 1.8 months and an average discount rate of 1.9%.

8. Derivative Instruments

The Company utilizes interest rate swap agreements to fix the LIBOR-based variable portion of the interest rate on its long term debt. Terms of the interest rate swap agreements require the Company to receive a variable interest rate and pay a fixed interest rate. As of March 31, 2016, the Company had interest rate swap agreements in place that hedge a notional value of debt ranging from approximately \$251.5 million to approximately \$192.7 million and amortize consistent with future debt principal payments. The interest rate swap agreements establish fixed interest rates in a range of 0.74% to 2.68% with various expiration terms extending to June 30, 2020. At inception, the interest rate swaps were and continue to be designated as cash flow hedges.

As of March 31, 2016 and December 31, 2015, the fair value carrying amount of the Company's derivative instruments are recorded as follows:

	Balance Sheet Caption	Asset / (Liability)	
		Derivatives	
		March 31, 2016	December 31, 2015
		(dollars in thousands)	
Derivatives designated as hedging instruments			
Interest rate swaps	Other assets	\$50	\$ 430
Interest rate swaps	Accrued liabilities	(800)	(150)
Interest rate swaps	Other long-term liabilities	(6,930)	(3,180)
Total derivatives designated as hedging instruments		\$(7,680)	\$(2,900)

TRIMAS CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (unaudited)

The following table summarizes the loss recognized in accumulated other comprehensive income or loss ("AOCI") and the amounts reclassified from AOCI into earnings as of March 31, 2016 and December 31, 2015, and for the three months ended March 31, 2016 and 2015:

	Amount of Loss Recognized in AOCI on Derivative (Effective Portion, net of tax)		Location of Loss Reclassified from AOCI into Earnings (Effective Portion)	Amount of Loss Reclassified from AOCI into Earnings Three months ended March 31,	
	As of March 31, 2016	As of December 31, 2015		2016	2015
	(dollars in thousands)			(dollars in thousands)	
Derivatives designated as hedging instruments					
Interest rate swaps	\$ (4,750)	\$ (1,790)	Interest expense Income from discontinued operations	\$ (110)	\$ — \$ (220)

Over the next 12 months, the Company expects to reclassify approximately \$0.8 million of pre-tax deferred losses from AOCI to interest expense as the related interest payments for the designated interest rate swaps are funded. The fair value of the Company's derivatives are estimated using an income approach based on valuation techniques to convert future amounts to a single, discounted amount. Estimates of the fair value of the Company's interest rate swaps use observable inputs such as interest rate yield curves. Fair value measurements and the fair value hierarchy level for the Company's assets and liabilities measured at fair value on a recurring basis as of March 31, 2016 and December 31, 2015 are shown below.

Description	Frequency	Asset / (Liability)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
			(dollars in thousands)		
March 31, 2016	Interest rate swaps	Recurring	\$ (7,680)	\$ —	\$ (7,680)
December 31, 2015	Interest rate swaps	Recurring	\$ (2,900)	\$ —	\$ (2,900)

9. Commitments and Contingencies

Asbestos

As of March 31, 2016, the Company was a party to 1,009 pending cases involving an aggregate of 6,184 claimants alleging personal injury from exposure to asbestos containing materials formerly used in gaskets (both encapsulated and otherwise) manufactured or distributed by certain of the Company's subsidiaries for use primarily in the petrochemical refining and exploration industries. The following chart summarizes the number of claimants, number of claims filed, number of claims dismissed, number of claims settled, the average settlement amount per claim and the total defense costs, exclusive of amounts reimbursed under the Company's primary insurance, at the applicable date and for the applicable periods:

	Claims pending at beginning of period	Claims filed during period	Claims dismissed during period	Claims settled during period	Average settlement amount per claim during period	Total defense costs during period
Fiscal Year Ended December 31, 2015	7,992	266	1,990	26	\$ 16,963	\$3,160,000
Three Months Ended March 31, 2016	6,242	38	90	6	\$ 3,333	\$670,000

In addition, the Company acquired various companies to distribute its products that had distributed gaskets of other manufacturers prior to acquisition. The Company believes that many of its pending cases relate to locations at which none of its gaskets were distributed or used.

The Company may be subjected to significant additional asbestos-related claims in the future, the cost of settling cases in which product identification can be made may increase, and the Company may be subjected to further claims in respect of the former activities of its acquired gasket distributors. The Company is unable to make a meaningful statement concerning the monetary claims made in the asbestos cases given that, among other things, claims may be initially made in some jurisdictions without specifying the amount sought or by simply stating the requisite or maximum permissible monetary relief, and may be amended to alter the amount sought. The large majority of claims do not specify the amount sought. Of the 6,184 claims pending at March 31, 2016, 122 set forth specific amounts of damages (other than those stating the statutory minimum or maximum). Below is a breakdown of the amount sought for those claims seeking specific amounts:

	Compensatory & Punitive			Compensatory Only		Punitive Only	
Range of damages sought (in millions)	\$0.0 to \$5.0	\$5.0 to \$10.0	\$10.0+	\$0.0 to \$0.6	\$0.6 to \$5.0	\$5.0+	\$0.0 to \$2.5
Number of claims	51	44	27	8	43	71	122

In addition, relatively few of the claims have reached the discovery stage and even fewer claims have gone past the discovery stage.

Total settlement costs (exclusive of defense costs) for all asbestos-related cases, some of which were filed over 20 years ago, have been approximately \$7.8 million. All relief sought in the asbestos cases is monetary in nature. To date, approximately 40% of the Company's costs related to settlement and defense of asbestos litigation have been covered by its primary insurance. Effective February 14, 2006, the Company entered into a coverage-in-place agreement with its first level excess carriers regarding the coverage to be provided to the Company for asbestos-related claims when the primary insurance is exhausted. The coverage-in-place agreement makes asbestos defense costs and indemnity coverage available to the Company that might otherwise be disputed by the carriers and provides a methodology for the administration of such expenses. Nonetheless, the Company believes it is likely there

will be a period within the next 12 to 18 months, prior to the commencement of coverage under this agreement and following exhaustion of the Company's primary insurance coverage, during which the Company will be solely responsible for defense costs and indemnity payments, the duration of which would be subject to the scope of damage awards and settlements paid.

15

Table of Contents

TRIMAS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

Based on the settlements made to date and the number of claims dismissed or withdrawn for lack of product identification, the Company believes that the relief sought (when specified) does not bear a reasonable relationship to its potential liability. Based upon the Company's experience to date, including the trend in annual defense and settlement costs incurred to date, and other available information (including the availability of excess insurance), the Company does not believe these cases will have a material adverse effect on its financial position and results of operations or cash flows.

Claims and Litigation

The Company is subject to other claims and litigation in the ordinary course of business, but does not believe that any such claim or litigation will have a material adverse effect on its financial position and results of operations or cash flows.

10. Segment Information

TriMas groups its operating segments into reportable segments that provide similar products and services. Each operating segment has discrete financial information evaluated regularly by the Company's chief operating decision maker in determining resource allocation and assessing performance. Within these reportable segments, there are no individual products or product families for which reported net sales accounted for more than 10% of the Company's consolidated net sales. See below for more information regarding the types of products and services provided within each reportable segment:

Packaging – Highly engineered closure and dispensing systems for a range of end markets, using steel and plastic industrial and consumer packaging applications.

Aerospace – Permanent blind bolts, temporary fasteners, highly engineered specialty fasteners and other precision machined parts used in the commercial, business and military aerospace industries.

Energy – Metallic and non-metallic industrial sealant products and fasteners for the petroleum refining, petrochemical and other industrial markets.

Engineered Components – High-pressure and low-pressure cylinders for the transportation, storage and dispensing of compressed gases, and natural gas engines, compressors, gas production equipment and chemical pumps engineered for use at well sites for the oil and gas industry.

Segment activity is as follows:

	Three months ended March 31,	
	2016	2015
	(dollars in thousands)	
Net Sales		
Packaging	\$80,110	\$78,960
Aerospace	40,500	45,740
Energy	44,750	51,160
Engineered Components	37,520	48,270
Total	\$202,880	\$224,130
Operating Profit (Loss)		
Packaging	\$17,840	\$17,510
Aerospace	3,460	8,080
Energy	(3,610) 340
Engineered Components	5,580	5,970
Corporate expenses	(6,820) (8,880

11. Equity Awards

The Company maintains the following long-term equity incentive plans: the TriMas Corporation Director Retainer Share Election Program, the 2011 TriMas Corporation Omnibus Incentive Compensation Plan, the TriMas Corporation 2006 Long Term Equity Incentive Plan and the TriMas Corporation 2002 Long Term Equity Incentive Plan (collectively, the "Plans"). The 2002 Long Term Equity Incentive Plan expired in 2012, such that, while existing grants will remain outstanding until exercised, vested or cancelled, no new shares may be issued under the plan. See below for details of awards under the Plans by type.

Stock Options

The Company did not grant any stock option awards during the three months ended March 31, 2016. Information related to stock options at March 31, 2016 is as follows:

	Number of Stock Options	Weighted Average Option Price	Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2016	206,123	\$ 4.84		
Exercised	(15,800)	0.86		
Cancelled	—	—		
Expired	—	—		
Outstanding at March 31, 2016	190,323	\$ 5.17	2.3	\$2,432,388

As of March 31, 2016, 190,323 stock options were exercisable under the Plans. The Company did not incur any stock-based compensation expense related to stock options during the three months ended March 31, 2016 and 2015.

Restricted Shares

The Company awarded the following restricted shares during the first quarter of 2016:

granted 600 restricted shares of common stock to certain employees that are subject only to a service condition and vest on the first anniversary date of the award so long as the employee remains with the Company;

granted 217,818 restricted shares of common stock to certain employees which are subject only to a service condition and vest ratably over three years so long as the employee remains with the Company;

granted 42,740 restricted shares of common stock to certain employees which are subject only to a service condition and vest on the first anniversary date of the award. The awards were made to participants in the Company's short-term incentive compensation plan ("STI"), where all STI participants whose target annual award exceeds \$20 thousand receive 80% of the value in earned cash and 20% in the form of a restricted stock award upon finalization of the award amount in the first quarter each year following the previous plan year; and

granted 41,174 restricted shares of common stock to its non-employee independent directors, which vest one year from date of grant so long as the director and/or Company does not terminate their service prior to the vesting date.

In addition, during the three months ended March 31, 2016, the Company issued 4,368 shares related to director fee deferrals. The Company allows for its non-employee independent directors to make an annual election to defer all or a portion of their directors fees and to receive the deferred amount in cash or equity. Certain of the Company's directors have elected to defer all or a portion of their directors fees and to receive the amount in Company common stock at a future date.

TRIMAS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

During the first quarter of 2016, the Company awarded 193,975 performance-based shares of common stock to certain Company key employees which vest on March 1, 2019, so long as the employee remains with the Company. The performance criteria for these awards is based on the Company's total shareholder return ("TSR") relative to the TSR of the common stock of a pre-defined industry peer-group, measured over a period beginning January 1, 2016 and ending December 31, 2018. TSR is calculated as the Company's average closing stock price for the 20-trading days at the end of the performance period plus Company dividends, divided by the Company's average closing stock price for the 20-trading days prior to the start of the performance period. Depending on the performance achieved, the amount of shares earned can vary from 0% of the target award to a maximum of 200% of the target award. The Company estimated the grant-date fair value and term of the awards subject to a market condition using a Monte Carlo simulation model, using the following weighted-average assumptions: risk-free interest rate of 0.96% and annualized volatility of 35.8%.

During 2013, the Company awarded performance-based shares of common stock to certain Company key employees which were earned based upon the achievement of EPS CAGR and cash generation performance metrics over a period of three calendar years, beginning January 1, 2013 and ending on December 31, 2015. The Company attained 50% of the target on a weighted average basis, resulting in a reduction of 35,850 shares during the first quarter of 2016. Information related to restricted shares at March 31, 2016 is as follows:

	Number of Unvested Restricted Shares	Weighted Average Grant Date Fair Value	Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2016	765,314	\$ 23.73		
Granted	500,675	18.46		
Vested	(227,601)	25.17		
Cancelled	(61,573)	24.14		
Outstanding at March 31, 2016	976,815	\$ 20.67	1.7	\$17,133,799

As of March 31, 2016, there was approximately \$14.6 million of unrecognized compensation cost related to unvested restricted shares that is expected to be recorded over a weighted-average period of 2.3 years.

The Company recognized approximately \$2.0 million of stock-based compensation expense related to restricted shares during the three months ended March 31, 2016 and 2015, respectively. The stock-based compensation expense is included in selling, general and administrative expenses in the accompanying consolidated statement of income.

12. Earnings per Share

Net income is divided by the weighted average number of common shares outstanding during the period to calculate basic earnings per share. Diluted earnings per share is calculated to give effect to stock options and restricted share awards. The calculation of diluted earnings per share included 286,189 and 279,269 restricted shares for the three months ended March 31, 2016 and 2015, respectively. The calculation of diluted earnings per share also included options to purchase 89,637 and 123,613 shares of common stock for the three months ended March 31, 2016 and 2015, respectively.

13. Defined Benefit Plans

Net periodic pension and postretirement benefit costs for the Company's defined benefit pension plans and postretirement benefit plans cover certain foreign employees, union hourly employees and salaried employees. The components of net periodic pension and postretirement benefit costs for the three months ended March 31, 2016 and 2015 are as follows:

	Pension Plans		Other Postretirement Benefits	
	Three months ended March 31, 2016 2015		Three months ended March 31, 2016 2015	
	(dollars in thousands)			
Service costs	\$250	\$240	\$ —	\$ —
Interest costs	400	420	—	10
Expected return on plan assets	(420)	(520)	—	—
Amortization of net (gain)/loss	230	380	(10)	(10)
Net periodic benefit cost	\$460	\$520	\$ (10)	\$ —

The Company contributed approximately \$0.5 million to its defined benefit pension plans during the three months ended March 31, 2016. The Company expects to contribute approximately \$2.0 million to its defined benefit pension plans for the full year 2016.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition contains forward-looking statements regarding industry outlook and our expectations regarding the performance of our business. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described under the heading "Forward-Looking Statements," at the beginning of this report. Our actual results may differ materially from those contained in or implied by any forward-looking statements. You should read the following discussion together with the Company's reports on file with the Securities and Exchange Commission, including its Annual Report on Form 10-K for the year ended December 31, 2015.

Introduction

We are a global manufacturer and distributor of products for commercial, industrial and consumer markets. We are principally engaged in four reportable segments: Packaging, Aerospace, Energy and Engineered Components. On June 30, 2015, we completed the spin-off of our Cequent businesses, creating a new independent publicly-traded company, Horizon Global Corporation ("Horizon"). On June 30, 2015, our stockholders received two shares of Horizon common stock for every five shares of TriMas common stock that they held as of the close of business on June 25, 2015. The financial position, results of operations and cash flows of Horizon are included as discontinued operations for all periods presented through the date of the spin-off.

Key Factors and Risks Affecting Our Reported Results. Our businesses and results of operations depend upon general economic conditions and we serve some customers in cyclical industries that are highly competitive and themselves significantly impacted by changes in economic conditions. There has been little or no overall economic growth, particularly in the United States, although global economic conditions appear to have been relatively stable over the past couple of years. The most significant external factor impacting us recently was the impact of lower oil prices, which began to decline in the fourth quarter of 2014, declined throughout 2015 and remain at low levels at the end of the first quarter of 2016. This decline directly impacts our Arrow Engine business (which serves the upstream oil and natural gas market at the well site) and our Energy business, which primarily serves petrochemical and other refineries in the downstream oil and gas markets, as well as having a smaller portion of the business dedicated to upstream activity. Our Arrow Engine business' revenue declined more than 50% during 2015 as compared to 2014, and again in the first quarter of 2016 compared with first quarter 2015, and is expected to remain at a low level until the price of oil increases over a sustained period where its customers decide to increase their activity levels and related well-site investments. The Arrow Engine business reacted aggressively in cutting costs and structuring its business in response to the lower demand levels, and was able to remain at an approximately break-even profit level in 2015 and the first quarter of 2016 despite the significant top line reduction.

In addition to the impact of lower oil prices, there were two other significant external factors that have impacted our recent results. First is the impact of a stronger U.S. dollar relative to other currencies, which has impacted our net sales in 2015 as compared to 2014 and continued in first quarter 2016 versus first quarter 2015. In addition, beginning in the second quarter of 2015, our largest two Aerospace distribution customers began reducing their investment in on-hand inventory levels of fastener products. While this has impacted our net sales, it has also had a significant impact on margin levels, as certain of these products historically command higher profit margins.

From a business perspective, there has been a shift over the past two to three years in our Energy reportable segment from historical demand and activity, both in the United States and abroad, where petrochemical plants and refinery customers deferred shutdown activity, plus we experienced decreases in engineering and construction ("E&C") customer activity. While we were able to hold sales levels essentially flat on a sequential quarterly basis in 2014 and until fourth quarter of 2015 via market share gains and adding product content to our portfolio, primarily standard and highly-engineered bolts, our margins declined significantly due to the mix of product sales and inefficiencies that resulted from the shift in activity levels. More recently, the lower oil prices have placed further pressure on the top-line and predictability of customer order patterns. Given these factors, we have been restructuring the business and its fixed cost structure to align to the current business environment, closing and consolidating certain facilities during 2014 and 2015, and opening a new lower-cost facility in Mexico, which began production in the fourth quarter of 2015. We are nearing completion of the restructuring efforts, and expect to realize the cost savings and operational efficiencies associated with leveraging the new lower fixed cost structure and other initiatives as we move through

2016.

21

Table of Contents

During the third quarter of 2015, given the uncertain economic environment and the impact on net sales and profitability of lower oil prices, a stronger U.S. dollar and slowing industrial production, we announced a financial improvement plan ("FIP") to improve our profitability, cash flow conversion and operational efficiency. As part of the FIP, we targeted cost actions to yield \$15 million of annual savings, accelerating an additional \$5 million of savings initiatives in the Energy business, with the remaining \$10 million of savings expected to be spread relatively evenly across the remainder of the Company. In February 2016, we added \$7 million of cost savings actions, thereby expecting \$22 million of annual run-rate cost savings. By implementing the FIP, we believe we have lowered the cost structure of our engine-related business, allowing it to achieve break-even operating profit despite the more than 50% decline in sales as a result of the impact of lower oil prices. The FIP consisted of headcount reductions, manufacturing and administrative cost reduction and facility closures or consolidations. We believe the FIP was necessary to help to mitigate the external factors pressuring our top-line, and position the Company for improved profitability and operating leverage across a lower fixed cost structure in the future. We continue to evaluate further actions as merited based on business performance, considering additional cost reductions or facility closures should sales and profitability levels continue below historical levels.

Critical factors affecting our ability to succeed include: our ability to create organic growth through product development, cross selling and extending product-line offerings, and our ability to quickly and cost-effectively introduce new products; our ability to acquire and integrate companies or products that supplement existing product lines, add new distribution channels, expand our geographic coverage or enable better absorption of overhead costs; our ability to manage our cost structure more efficiently via supply base management, internal sourcing and/or purchasing of materials, selective outsourcing and/or purchasing of support functions, working capital management, and greater leverage of our administrative functions. If we are unable to do any of the foregoing successfully, our financial condition and results of operations could be materially and adversely impacted.

Our businesses do not experience significant seasonal fluctuation, other than our fourth quarter has tended to be the lowest net sales quarter of the year given holiday shutdowns in certain customers or other customers deferring capital spending to the new year. We do not consider sales order backlog to be a material factor in our business. A growing portion of our sales is derived from international sources, which exposes us to certain risks, including currency risks. We are sensitive to price movements in our raw materials supply base. Our largest material purchases are for steel, aluminum, polyethylene and other resins and utility-related inputs. Historically, we have experienced volatility in costs of steel and resin and have worked with our suppliers to manage costs and disruptions in supply. We also utilize pricing programs to pass increased steel, aluminum and resin costs to customers. Although we may experience delays in our ability to implement price increases, we have been generally able to recover such increased costs. We may experience disruptions in supply in the future and may not be able to pass along higher costs associated with such disruptions to our customers in the form of price increases.

In addition to the aforementioned price movements in significant raw materials, certain of our businesses are sensitive to oil price movements. As noted earlier, our Arrow Engine business is most directly impacted by significant volatility in oil prices. Arrow's pumpjack and other engine sales and related parts, which comprise a significant portion of the business, are impacted by oil drilling levels, rig counts and commodity pricing. In addition, a portion of our Energy reportable segment serves upstream customers at oil well sites that have been impacted by changes in oil prices, while the majority of the segment provides parts for refineries and chemical plants, which may or may not choose to defer capital expenditures or changeover production stock, both of which would require retooling with our gaskets and bolts, in times of fluctuations in oil prices. Our Packaging reportable segment may be impacted by oil prices, as it is a significant driver of resin pricing, although we generally are able to maintain profit levels when oil prices change due to escalator/de-escalator clauses in contracts with many of our customers.

Table of Contents

Segment Information and Supplemental Analysis

The following table summarizes financial information for our reportable segments for the three months ended March 31, 2016 and 2015:

	Three months ended March 31,					
	2016	As a Percentage of Net Sales		2015	As a Percentage of Net Sales	
	(dollars in thousands)					
Net Sales						
Packaging	\$80,110	39.5	%	\$78,960	35.2	%

Table of Contents

Results of Operations

The principal factors impacting us during the three months ended March 31, 2016, compared with the three months ended March 31, 2015, were:

- the impact of lower oil prices, primarily in our Engineered Components and Energy reportable segments;
- the impact of acquisitions (see below for impact by segment);
- costs incurred related to restructuring activities, primarily within our Energy reportable segment;
- the impact of production, scheduling and integration costs and inefficiencies incurred in the first quarter of 2016 in our Aerospace reportable segment; and
- the impact of a stronger U.S. dollar, primarily in our Packaging and Energy reportable segments.

Three Months Ended March 31, 2016 Compared with Three Months Ended March 31, 2015

Overall, net sales decreased approximately \$21.2 million, or 9.5%, to \$202.9 million for the three months ended March 31, 2016, as compared with \$224.1 million in the three months ended March 31, 2015. The primary drivers of the year-over-year sales decline were an approximate \$14.4 million reduction within our Energy and Engineered Components reportable segments, primarily as a result of lower oil prices and weakness in the energy-facing end markets, and an approximate \$8.2 million organic sales decline within our Aerospace reportable segment as a result of lower demand from our large distribution customers and decreased OEM sales due to manufacturing constraints. Foreign currency exchange resulted in an approximate \$1.9 million reduction in sales due to net unfavorable currency exchange, as our reported results in U.S. dollars were negatively impacted as a result of the stronger U.S. dollar relative to foreign currencies, and we benefited from approximately \$3.0 million in sales related to the November 2015 acquisition of Parker-Hannifin Corporation's Tolleson, Arizona machined components facility within our Aerospace reportable segment.

Gross profit margin (gross profit as a percentage of sales) approximated 27.6% and 28.1% for the three months ended March 31, 2016 and 2015, respectively. The primary drivers of the decline in gross profit margin were both in our Aerospace reportable segment: lower fixed cost absorption associated with lower organic sales levels, and production, scheduling and integration costs and inefficiencies. The impact of lower sales and related fixed cost leverage in our Energy and Engineered Components segments was essentially offset by cost savings associated with the execution of cost savings actions in our engine and compressors business to allow it to maintain approximately breakeven profit levels, and the execution of our FIP across all of our businesses. Gross profit was also negatively impacted by approximately \$0.6 million of unfavorable currency exchange, as our reported results in U.S. dollars were negatively impacted as a result of the stronger U.S. dollar relative to foreign currencies.

Operating profit margin (operating profit as a percentage of sales) approximated 8.1% and 10.3% for the three months ended March 31, 2016 and 2015, respectively. Operating profit decreased approximately \$6.5 million, or 28.5%, to \$16.5 million for the three months ended March 31, 2016, from \$23.0 million for the three months ended March 31, 2015. Operating profit decreased primarily due to the lower sales and incremental cost of sales due to production, scheduling and integration costs and inefficiencies in our Aerospace segment. In addition, selling, general and administrative expenses increased in our Energy segment as we restructured certain back office functions to conform with the general business restructuring. The impact of lower sales and related fixed cost leverage in our Energy and Engineered Components segments was essentially offset by cost savings associated with the execution of cost savings actions in our engine and compressors business to allow it to maintain approximately breakeven profit levels, and the execution of our FIP across all of our businesses.

Interest expense remained flat at approximately \$3.4 million for the three months ended March 31, 2016 and 2015. Our weighted-average variable rate borrowings decreased to approximately \$474.8 million in the three months ended March 31, 2016, from approximately \$743.9 million in the three months ended March 31, 2015, primarily due to the distribution received from the Cequent spin-off in June 2015. The effective weighted average interest rate on our outstanding variable rate borrowings, including our credit agreement ("Credit Agreement") and accounts receivable facilities, increased to approximately 2.1% for three months ended March 31, 2016, from approximately 1.8% for the three months ended March 31, 2015. In addition, a portion of our 2015 interest expense was allocated to the Cequent businesses as part of the spin-off and was reclassified as discontinued operations.

Other expense, net decreased approximately \$1.2 million, to \$0.1 million for the three months ended March 31, 2016, as compared to \$1.3 million for the three months ended March 31, 2015, primarily due to a decrease in losses on transactions denominated in foreign currencies.

Table of Contents

The effective income tax rates for the three months ended March 31, 2016 and 2015 were 35.9% and 34.6%, respectively. The increase in the rate was a result of losses at certain foreign subsidiaries where no tax benefit could be recorded, and non-deductible expenses, partially offset by earnings in foreign jurisdictions where the effective tax rate was less than 35%, changes in uncertain tax benefits during the quarter due to the expiration of statute of limitations, and the U.S. manufacturing deduction.

Net income from continuing operations decreased by approximately \$3.6 million, to \$8.3 million for the three months ended March 31, 2016, compared to \$11.9 million for the three months ended March 31, 2015. The decrease was primarily the result of a \$6.5 million decrease in operating profit, partially offset by a \$1.7 million decrease in income tax expense and a \$1.2 million decrease in other expenses, net.

See below for a discussion of operating results by segment.

Packaging. Net sales increased approximately \$1.1 million, or 1.5%, to \$80.1 million in the three months ended March 31, 2016, as compared to \$79.0 million in the three months ended March 31, 2015. Sales of our health, beauty and home care end market products increased approximately \$1.3 million primarily due to higher demand in Europe and Asia. Additionally, sales of our industrial closures increased approximately \$0.9 million and sales of our food and beverage end market products increased approximately \$0.4 million, both primarily due to increased demand in the United States. These increases were partially offset by approximately \$1.4 million of unfavorable currency exchange, as our reported results in U.S. dollars were negatively impacted as a result of the stronger U.S. dollar relative to foreign currencies.

Packaging's gross profit increased approximately \$1.2 million to \$28.9 million, or 36.0% of sales, in the three months ended March 31, 2016, as compared to \$27.7 million, or 35.1% of sales, in the three months ended March 31, 2015. The increase in gross profit was primarily due to approximately \$0.9 million as a result of the higher sales level, with various other factors also contributing to the increase, the largest of which was as a result of continued productivity and automation initiatives, which helped increase both profit dollars and related margins. These increases were partially offset by approximately \$0.6 million of unfavorable foreign currency as a result of the stronger U.S. dollar. Packaging's selling, general and administrative expenses increased approximately \$0.8 million to \$11.0 million, or 13.8% of sales, in the three months ended March 31, 2016, as compared to \$10.2 million, or 12.9% of sales, in the three months ended March 31, 2015, primarily due to an approximate \$0.5 million increase in professional fees as well as costs incurred associated with the front end reorganization of the business to operate based on product categories on a global basis versus only regionally.

Packaging's operating profit increased approximately \$0.3 million to \$17.8 million, or 22.3% of sales, in the three months ended March 31, 2016, as compared to \$17.5 million, or 22.2% of sales, in the three months ended March 31, 2015, primarily due to the higher sales levels and continued productivity and automation initiatives, which were partially offset by higher selling, general and administrative costs.

Aerospace. Net sales for the three months ended March 31, 2016 decreased approximately \$5.2 million, or 11.5%, to \$40.5 million, as compared to \$45.7 million in the three months ended March 31, 2015. Sales to distribution customers declined approximately \$4.6 million, primarily as a result of our two largest distribution customers continuing planned reductions of their investment in on-hand inventory levels of certain fastener products which began in the second quarter of 2015. Sales to OEM customers decreased approximately \$3.6 million, while demand continued at expected levels, we experienced scheduling and production constraints which impacted our ability to meet current demand. These decreases were partially offset by approximately \$3.0 million of sales related to the November 2015 acquisition of Parker-Hannifin Corporation's Tolleson, Arizona machined components facility.

Gross profit within Aerospace decreased approximately \$6.4 million to \$9.6 million, or 23.8% of sales, in the three months ended March 31, 2016, from \$16.0 million, or 35.0% of sales, in the three months ended March 31, 2015. Of this decrease in gross profit, approximately \$2.9 million was due to the lower organic sales levels. In addition, gross profit declined approximately \$1.7 million due to additional costs incurred and lower fixed cost absorption associated with the manufacturing and production scheduling inefficiencies. Gross profit also decreased by approximately \$1.0 million due to incremental costs and inefficiencies associated with the integration of the Tolleson, Arizona facility. The remainder of the decline was primarily due to a less favorable product sales mix.

Selling, general and administrative expenses decreased approximately \$1.7 million to \$6.2 million, or 15.2% of sales, in the three months ended March 31, 2016, as compared to \$7.9 million, or 17.3% of sales, in the three months ended March 31, 2015, primarily due to cost savings associated with the FIP, as well as charges related to operational and leadership changes incurred in the three months ended March 31, 2015 that did not repeat.

Table of Contents

Operating profit within Aerospace decreased approximately \$4.6 million to \$3.5 million, or 8.5% of sales, in the three months ended March 31, 2016, as compared to \$8.1 million, or 17.7% of sales, in the three months ended March 31, 2015. The decline in operating profit and operating profit margin was mainly attributable to manufacturing and production scheduling inefficiencies, lower sales volumes, integration costs and a less favorable product sales mix, which were partially offset by lower selling, general and administrative expenses.

Energy. Net sales for the three months ended March 31, 2016 decreased approximately \$6.4 million, or 12.5%, to \$44.8 million, as compared to \$51.2 million in the three months ended March 31, 2015. Sales decreased by approximately \$3.3 million in North America and by approximately \$1.6 million in our international branches primarily due to weaker upstream sales at well sites as a result of lower oil prices. Sales further declined by approximately \$1.0 million due to lower sales resulting from branch closures in Brazil, China and the Netherlands. Sales were also impacted by approximately \$0.5 million of net unfavorable currency exchange, as our reported results in U.S. dollars were negatively impacted as a result of the stronger U.S. dollar relative to foreign currencies.

Gross profit within Energy decreased approximately \$0.3 million to \$9.4 million, or 21.0% of sales, in the three months ended March 31, 2016, as compared to \$9.7 million, or 19.0% of sales, in the three months ended March 31, 2015. Gross profit decreased approximately \$1.2 million due to the lower sales levels. However, this segment mostly offset the decline in profit resulting from the change in sales volume, and increased gross profit margin, as a result of the cost savings associated with the business restructuring and the execution of the FIP actions, primarily as a result of the leveraging the lower fixed cost structure, and as a result of selling through the lower cost inventory sourced from Asia that built-up in mid 2015 as a result of U.S. port delays.

Selling, general and administrative expenses within Energy increased approximately \$3.6 million to \$13.0 million, or 29.1% of sales, in the three months ended March 31, 2016, as compared to \$9.4 million, or 18.3% of sales, in the three months ended March 31, 2015. The increase was primarily due to approximately \$3.0 million of incremental costs resulting from our restructuring efforts, as we reconfigured certain back office functions to conform with the overall business restructuring, as well as an increase in reserves for past due account balances of approximately \$1.0 million, partially due to a customer who filed for bankruptcy protection.

Overall, operating profit within Energy decreased approximately \$3.9 million to an approximate \$3.6 million loss, or 8.1% of sales, in the three months ended March 31, 2016, as compared to profit of \$0.3 million, or 0.7% of sales, in the three months ended March 31, 2015. Operating profit and the related margin decreased as a result of lower sales levels and incremental restructuring costs incurred, which more than offset lower material sourcing costs and fixed cost leverage achieved from our restructuring initiatives.

Engineered Components. Net sales for the three months ended March 31, 2016 decreased approximately \$10.8 million, or 22.3%, to \$37.5 million, as compared to \$48.3 million in the three months ended March 31, 2015. Sales of our gas compression products declined approximately \$6.0 million and sales of our slow speed and compressor engine and related products decreased approximately \$2.5 million, both primarily as a result of reduced levels of oil and gas drilling and well completions in the U.S. and Canada in response to lower oil prices. In addition, sales of our industrial cylinders decreased by approximately \$2.3 million, primarily due to lower demand for gas cylinders in industrial applications.

Gross profit within Engineered Components decreased approximately \$1.5 million to \$8.0 million, or 21.4% of sales, in the three months ended March 31, 2016, from \$9.5 million, or 19.8% of sales, in the three months ended March 31, 2015, primarily as a result of the decreased sales of engine and compression-related products. Gross profit margin in our engine and compression-related products decreased as a result of lower fixed cost absorption despite cost reductions to better align our cost structure with current demand levels. This was partially offset by increased gross profit margin from sales of our industrial cylinders, as a result of lower input costs and ongoing productivity initiatives.

Selling, general and administrative expenses decreased approximately \$1.2 million to \$2.4 million, or 6.5% of sales, in the three months ended March 31, 2016, as compared to \$3.6 million, or 7.4% of sales, in the three months ended March 31, 2015. The decrease in selling, general and administrative expenses was largely a result of our cost savings initiatives in our engine and compression-related products business, as we reduced costs given the low oil-related activity to better align our cost structure with current demand levels.

Operating profit within Engineered Components decreased approximately \$0.4 million to \$5.6 million, or 14.9% of sales, in the three months ended March 31, 2016, as compared to \$6.0 million, or 12.4% of sales, in the three months ended March 31, 2015. Operating profit declined primarily due to lower sales; however, the operating profit margin increased due to achievement of our cost savings initiatives in our engine business to remain at approximately break-even levels despite the significant reduction in net sales combined with higher margin from our cylinder products due to lower input costs and productivity improvements.

Table of Contents

Corporate Expenses. Corporate expenses consist of the following:

	Three months ended March 31, 2016	2015
	(in millions)	
Corporate operating expenses	\$1.9	\$3.1
Employee costs and related benefits	4.9	5.8
Corporate expenses	\$6.8	\$8.9

Corporate expenses decreased approximately \$2.1 million to \$6.8 million for the three months ended March 31, 2016, from \$8.9 million for the three months ended March 31, 2015. The decrease between years is primarily attributed to approximately \$0.9 million lower employee costs due to lower headcount following the Cequent spin-off as well as headcount reductions as part of the FIP, a favorable property tax assessment settlement of approximately \$0.4 million for a former business unit during the three months ended March 31, 2016, and a decrease in costs associated with third party professional fees due to a reduction in spending levels.

Discontinued Operations. The results of discontinued operations consist of our former Cequent businesses, which were spun-off on June 30, 2015. During the three months ended March 31, 2015, income from discontinued operations, net of income tax benefit, was approximately \$2.0 million. See Note 3, "Discontinued Operations," to our consolidated financial statements included in Part I, Item 1 of this quarterly report on Form 10-Q.

Liquidity and Capital Resources

Cash Flows

Cash flows used for operating activities of continuing operations were approximately \$3.3 million for the three months ended March 31, 2016, as compared to cash flows provided by operating activities of continuing operations of approximately \$3.9 million for the three months ended March 31, 2015. Significant changes in cash flows used for and provided by operating activities of continuing operations and the reasons for such changes are as follows:

- For the three months ended March 31, 2016, the Company generated approximately \$23.5 million of cash, based on the reported net income of approximately \$8.3 million and after considering the effects of non-cash items related to losses on dispositions of property and equipment, depreciation, amortization, changes in deferred income taxes, stock-based compensation and related tax effect and other, net. For the three months ended March 31, 2015, the Company generated approximately \$23.4 million in cash flows based on the reported income from continuing operations of approximately \$11.9 million and after considering the effects of similar non-cash items.

Increases in accounts receivable resulted in a use of cash of approximately \$11.2 million and \$7.3 million for the three months ended March 31, 2016 and 2015, respectively. The increased use of cash for each of the three month periods is due primarily to the timing of sales and collection of cash within the periods, as our first quarter net sales are typically greater than those in the fourth quarter. Days sales outstanding of receivables increased to approximately 59 days as of March 31, 2016, as compared to approximately 56 days as of March 31, 2015.

For the three months ended March 31, 2016, we reduced our investment in inventory by approximately \$0.3 million. For the three months ended March 31, 2015, we used approximately \$1.9 million of cash for investment in our inventories, primarily due to higher material sourcing costs and increased purchases related to U.S. West Coast port delays, mainly in our Energy reportable segment.

Decreases in accounts payable and accrued liabilities resulted in a cash use of approximately \$23.7 million and \$8.0 million for the three months ended March 31, 2016 and 2015, respectively. The change in cash used for accounts payable and accrued liabilities is primarily a result of the timing of payments made to suppliers and mix of vendors and related terms. The use of cash was greater in 2016, as our days accounts payable on hand decreased from approximately 53 days in 2015 to approximately 45 days in 2016.

Table of Contents

Net cash used for investing activities of continuing operations for the three months ended March 31, 2016 and 2015 was approximately \$5.9 million and \$5.2 million, respectively. During the first three months of 2016, we incurred approximately \$6.0 million in capital expenditures, as we have continued our investment in growth, capacity and productivity-related capital projects. Cash received from the disposition of property and equipment was approximately \$0.1 million. During the first three months of 2015, we incurred approximately \$5.7 million in capital expenditures and received cash from the disposition of property and equipment of approximately \$0.5 million.

Net cash provided by financing activities of continuing operations in 2016 was approximately \$15.2 million, as compared to \$30.4 million in 2015. During the first three months of 2016, we incurred net borrowings of \$19.9 million on our receivables and revolving credit facilities, primarily to fund our working capital needs, and repaid approximately \$3.5 million on our term loan. We also used a net cash amount of approximately \$1.3 million related to our stock compensation arrangements. During the first three months of 2015, we incurred net borrowings of approximately \$43.6 million on our receivables and revolving credit facilities, primarily to fund our working capital needs, and repayments of approximately \$5.9 million on our term loan facilities. We also made deferred purchase price payments related to our previous acquisitions of approximately \$5.4 million and we used a net cash amount of approximately \$1.9 million related to our stock compensation arrangements.

Our Debt and Other Commitments

We are party to a Credit Agreement, consisting of a \$500.0 million senior secured revolving credit facility, which permits borrowings denominated in specific foreign currencies ("Foreign Currency Loans"), subject to a \$75.0 million sub limit, and a \$275.0 million senior secured term loan A facility ("Term Loan A Facility"). The Credit Agreement matures on June 30, 2020 and is subject to interest at London Interbank Offered Rates ("LIBOR") plus 1.75%. The interest rate spread is based upon the leverage ratio, as defined, as of the most recent determination date.

At March 31, 2016, approximately \$268.1 million was outstanding on the Term Loan A Facility and approximately \$121.2 million was outstanding on the revolving credit facility. The Credit Agreement allows issuance of letters of credit, not to exceed \$40.0 million in aggregate, against revolving credit facility commitments, of which approximately \$18.1 million was outstanding at March 31, 2016.

The Credit Agreement also provides for incremental term loan facility and/or revolving credit commitments, not to exceed the greater of \$300.0 million and an amount such that, after giving effect to the making of such commitments and the incurrence of any other indebtedness substantially simultaneously with the making of such commitments, the senior secured net leverage ratio, as defined in the Credit Agreement, is no greater than 2.50 to 1.00. The terms and conditions of any incremental term loan and/or revolving credit facility commitments must be no more favorable than the existing credit facility.

We may be required to prepay a portion of our Term Loan A Facility in an amount equal to a percentage of our excess cash flow, as defined, which such percentage will be based on our leverage ratio, as defined. As of March 31, 2016, no amounts are due under this provision.

Amounts drawn under our revolving credit facility fluctuate daily based upon our working capital and other ordinary course needs. Availability under our revolving credit facility depends upon, among other things, compliance with our Credit Agreement's financial covenants. Our Credit Agreement contains various negative and affirmative covenants and other requirements affecting us and our subsidiaries, including restrictions on incurrence of debt, liens, mergers, investments, loans, advances, guarantee obligations, acquisitions, asset dispositions, sale-leaseback transactions, hedging agreements, dividends and other restricted payments, transactions with affiliates, restrictive agreements and amendments to charters, bylaws, and other material documents. The terms of our Credit Agreement require us and our subsidiaries to meet certain restrictive financial covenants and ratios computed quarterly, including a maximum leverage ratio (total consolidated indebtedness plus outstanding amounts under the accounts receivable securitization facility over consolidated EBITDA, as defined) and a minimum interest expense coverage ratio (consolidated EBITDA, as defined, over cash interest expense, as defined). Our permitted leverage ratio under the Credit Agreement is 3.50 to 1.00 as of March 31, 2016. If we were to complete an acquisition which qualifies for a Covenant Holiday Period, as defined in our Credit Agreement, then our permitted leverage ratio cannot exceed 4.00 to 1.00 during that period. Our actual leverage ratio was 3.05 to 1.00 at March 31, 2016. Our permitted interest expense coverage ratio under the Credit Agreement is 3.00 to 1.00 as of March 31, 2016. Our actual interest expense coverage ratio was 12.16

to 1.00 at March 31, 2016. At March 31, 2016, we were in compliance with our financial covenants.

28

Table of Contents

The following is a reconciliation of net income, as reported, which is a GAAP measure of our operating results, to Consolidated Bank EBITDA, as defined in our Credit Agreement, for the twelve months ended March 31, 2016. We present Consolidated Bank EBITDA to show our performance under our financial covenants.

	Year Ended December 31, 2015	Less: Three Months Ended March 31, 2015	Add: Three Months Ended March 31, 2016	Twelve Months Ended March 31, 2016

-
- (1) Non-cash compensation expenses resulting from the grant of restricted shares and units of common stock and common stock options.
- (2) Non-recurring costs and expenses relating to cost savings projects, including restructuring and severance expenses, not to exceed \$15.0 million in any fiscal year and \$40.0 million in aggregate, subsequent to June 30, 2015.
- (3) Costs and expenses arising from the integration of any business acquired not to exceed \$15.0 million in any fiscal year and \$40.0 million in the aggregate.
- (4) Costs incurred with refinancing our credit facilities.
- (5) EBITDA from permitted dispositions, as defined.
- (6) Includes \$6.5 million of acquisition deferred purchase price.

Another important source of liquidity is our \$75.0 million accounts receivable facility, under which we have the ability to sell eligible accounts receivable to a third-party multi-seller receivables funding company. Our available liquidity under our accounts receivable facility has ranged from \$54 million to \$69 million over the nine months following the Cequent spin-off, depending on the level of our receivables outstanding at a given point in time during that period. We had approximately \$54.0 million and \$53.6 million outstanding under the facility as of March 31, 2016 and December 31, 2015. No amounts were available but not utilized as of March 31, 2016, and \$7.1 million was available but not utilized as of December 31, 2015. At March 31, 2016, we had approximately \$121.2 million outstanding under our revolving credit facility and had approximately \$360.7 million potentially available after giving effect to approximately \$18.1 million of letters of credit issued and outstanding. At December 31, 2015, we had approximately \$100.3 million outstanding under our revolving credit facility and had approximately \$378.1 million potentially available after giving effect to approximately \$21.6 million of letters of credit issued and outstanding. The letters of credit are used for a variety of purposes, including support of certain operating lease agreements, vendor payment terms and other subsidiary operating activities, and to meet various states' requirements to self-insure workers' compensation claims, including incurred but not reported claims. Including availability under our accounts receivable facility and after consideration of leverage restrictions contained in the Credit Agreement, as of March 31, 2016 and December 31, 2015, we had approximately \$66.8 million and \$107.4 million, respectively, of borrowing capacity available for general corporate purposes.

We rely upon our cash flow from operations and available liquidity under our revolving credit and accounts receivable facilities to fund our debt service obligations and other contractual commitments, working capital and capital expenditure requirements. At the end of each quarter, we use cash on hand from our domestic and foreign subsidiaries to pay down amounts outstanding under our revolving credit and accounts receivable facilities.

Our combined weighted average monthly amounts outstanding on our Credit Agreement and our accounts receivable facility during the first three months of 2016 approximated \$474.8 million, compared to the weighted average monthly amounts outstanding during the first three months of 2015 of approximately \$743.9 million. The overall decrease is due primarily to the distribution received from the Cequent spin-off in June 2015.

Cash management related to our revolving credit and accounts receivable facilities is centralized. We monitor our cash position and available liquidity on a daily basis and forecast our cash needs on a weekly basis within the current quarter and on a monthly basis outside the current quarter over the remainder of the year. Our business and related cash forecasts are updated monthly. While the majority of our cash on hand as of March 31, 2016 is located in jurisdictions outside the U.S., given aggregate available funding under our revolving credit and accounts receivable facilities of \$66.8 million at March 31, 2016, after consideration of the aforementioned leverage restrictions, and

based on forecasted cash sources and requirements inherent in our business plans, we believe that our liquidity and capital resources, including anticipated cash flows from operations, will be sufficient to meet our debt service, capital expenditure and other short-term and long-term obligation needs for the foreseeable future.

Table of Contents

Our exposure to interest rate risk results from the variable rates under our Credit Agreement. Borrowings under the Credit Agreement bear interest, at various rates, as more fully described in Note 7, "Long-term Debt," to our consolidated financial statements included in Part I, Item 1 of this quarterly report on Form 10-Q. We use interest rate swap agreements to fix the LIBOR-based variable portion of the interest rates on our term loan facility. As of March 31, 2016, we had interest rate swap agreements in place that hedge a notional amount of debt ranging from approximately \$251.5 million to approximately \$192.7 million, with established fixed interest rates in a range of 0.74% to 2.68%, with various expiration terms extending to June 30, 2020.

We are subject to variable interest rates on our term loan and revolving credit facility. At March 31, 2016, 1-Month LIBOR approximated 0.43%. Based on our variable rate-based borrowings outstanding at March 31, 2016, and after consideration of the interest rate swap agreement associated with our term loan A, a 1% increase in the per annum interest rate would increase our interest expense by approximately \$3.0 million annually.

Principal payments required under the Credit Agreement for the Term Loan A Facility are \$3.4 million due each fiscal quarter from December 2015 through September 2018 and approximately \$5.2 million due each fiscal quarter from December 2018 through March 2020, with final payment of \$202.8 million due on June 30, 2020.

In addition to our long-term debt, we have other cash commitments related to leases. We account for these lease transactions as operating leases and annual rent expense for continuing operations related thereto approximated \$17.2 million in 2015. We expect to continue to utilize leasing as a financing strategy in the future to meet capital expenditure needs and to reduce debt levels.

Market Risk

We conduct business in various locations throughout the world and are subject to market risk due to changes in the value of foreign currencies. The functional currencies of our foreign subsidiaries are primarily the local currency in the country of domicile. We manage these operating activities at the local level and revenues and costs are generally denominated in local currencies; however, results of operations and assets and liabilities reported in U.S. dollars will fluctuate with changes in exchange rates between such local currencies and the U.S. dollar. We may use derivative financial instruments to manage currency risks associated with our procurement activities denominated in currencies other than the functional currency of our subsidiaries and the impact of currency rate volatility on our earnings.

We are also subject to interest risk as it relates to our long-term debt. We use interest rate swap agreements to fix a portion of our variable rate debt to manage this risk. See Note 8, "Derivative Instruments," included in Part 1, Item 1, "Notes to Unaudited Consolidated Financial Statements," within this quarterly report on Form 10-Q.

Common Stock

TriMas is listed in the NASDAQ Global Select MarketSM. Our stock trades under the symbol "TRS."

Credit Rating

We and certain of our outstanding debt obligations are rated by Standard & Poor's and Moody's. On June 3, 2015, Moody's assigned a rating of Ba3 to our new senior secured credit facilities, as presented in Note 7, "Long-term Debt" included in Item 1, "Consolidated Financial Statements" within this Form 10-Q. Moody's downgraded our Corporate Family Rating to Ba3 from Ba2 and maintained our outlook as stable. On June 1, 2015, Standard & Poor's affirmed a BB- corporate credit rating to our amended credit facilities and maintained our outlook as stable. If our credit ratings were to decline, our ability to access certain financial markets may become limited, our cost of borrowings may increase, the perception of us in the view of our customers, suppliers and security holders may worsen and as a result, we may be adversely affected.

Outlook

We believe the current uncertain macroeconomic environment will persist in 2016, with continued significant external headwinds for many of our businesses, most notably due to lower oil prices, strengthening of the U.S. dollar relative to foreign currencies and weakness in industrial markets, all in a period with limited general economic growth expected. Our sales in the first quarter of 2016 were lower than sales in the first quarter of 2015, primarily due to these external headwinds.

While we attempt to mitigate the challenging external factors, we also continue to execute on internal projects and restructuring efforts across most of our businesses which we believe will drive future margin expansion, whether optimizing our footprint to move more production to our lower-cost facilities or pruning our product portfolios to

deemphasize or no longer sell certain lower-margin products. We are also finalizing the implementation of our Financial Improvement Plan, from which we expect \$22 million of annual run-rate cost savings across our businesses and our corporate office. We plan to execute on internal initiatives which we believe will enable us to navigate through the current challenging environment until demand levels and activity increase, and position us for improved profitability and ability to leverage our lower fixed cost structure with higher sales levels.

Table of Contents

While the tactics we employ may differ between years, our strategic priorities remain consistent: drive profitable growth, enhance margins, optimize resource and capital allocations and be a workplace of choice for great people.

Impact of New Accounting Standards

See Note 2, "New Accounting Pronouncements," included in Part 1, Item 1, "Notes to Unaudited Consolidated Financial Statements," within this quarterly report on Form 10-Q.

Critical Accounting Policies

Certain of our accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. These judgments are based on our historical experience, our evaluation of business and macroeconomic trends, and information from other outside sources, as appropriate.

During the quarter ended March 31, 2016, there were no material changes to the items that we disclosed as our critical accounting policies in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business, we are exposed to market risk associated with fluctuations in foreign currency exchange rates. We are also subject to interest risk as it relates to long-term debt. See Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for details about our primary market risks, and the objectives and strategies used to manage these risks. Also see Note 7, "Long-term Debt," and Note 8, "Derivative Instruments," in Part I, Item 1, "Notes to Unaudited Consolidated Financial Statements," included within this quarterly report on Form 10-Q for additional information.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Evaluation of disclosure controls and procedures

As of March 31, 2016, an evaluation was carried out by management, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act) pursuant to Rule 13a-15 of the Exchange Act. The Company's disclosure controls and procedures are designed only to provide reasonable assurance that they will meet their objectives. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of March 31, 2016, the Company's disclosure controls and procedures are effective to provide reasonable assurance that they would meet their objectives.

Changes in internal control over financial reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
