Item 1.01 Entry into a Material Definitive Agreement.

On July 17, 2013, Ligand Pharmaceuticals Incorporated (the “Company”), entered into a License Agreement (the “License Agreement”) with Azure Biotech, Inc. (“Azure”). Under the License Agreement, the Company granted to Azure an exclusive, nontransferable, worldwide license to develop, make, have made, use, sell, have sold, import and export a novel formulation of lasofoxifene intended for an underserved market in women’s health. Under the terms of the agreement, Ligand is entitled to receive \$2.7 million in potential development and regulatory milestones and a 5% royalty on future net sales. Azure is permitted to grant sublicenses to third parties pursuant to the terms of the License Agreement. The License Agreement may be terminated by either party in the event of an uncured material breach by the other party. Azure may terminate the License Agreement at any time on six months’ prior notice. Ligand may terminate the License Agreement if Azure challenges any licensed patents.

Lasofoxifene is an estrogen partial agonist for osteoporosis treatment and other diseases, discovered through the research collaboration between Ligand and Pfizer. Under the terms of the License Agreement, Ligand retains rights to the oral formulation originally developed by Pfizer.

The foregoing summary of the material terms of the License Agreement does not purport to be complete and is qualified in its entirety by reference to the License Agreement, a copy of which will be filed with the Securities and Exchange Commission by Ligand on its Quarterly Report on Form 10-Q for the fiscal quarter ending September 30, 2013.
