Item 1. Business

OVERVIEW

Who We Are

IAC is a leading media and Internet company. The Company is organized into four segments: The Match Group, which consists of dating, education and fitness businesses with brands such as Match, OkCupid, Tinder, The Princeton Review and DailyBurn; Search & Applications, which includes brands such as About.com, Ask.com, Dictionary.com and Investopedia; Media, which includes businesses such as Vimeo, Electus, The Daily Beast and CollegeHumor; and eCommerce, which includes HomeAdvisor and ShoeBuy. IAC's brands and products are among the most recognized in the world, reaching users in over 200 countries.

For information regarding the results of operations of IAC's segments, as well as their respective contributions to IAC's consolidated results of operations, see "Item 7-Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Item 8-Consolidated Financial Statements and Supplementary Data."

All references to "IAC," the "Company," "we," "our" or "us" in this report are to IAC/InterActiveCorp.

Our History

IAC, initially a hybrid media/electronic retailing company, was incorporated in 1986 in Delaware under the name Silver King Broadcasting Company, Inc. After several name changes (first to HSN, Inc., then to USA Networks, Inc., USA Interactive and InterActiveCorp, and finally to IAC/InterActiveCorp) and the completion of a number of significant corporate transactions over the years, the Company transformed itself into a leading media and Internet company.

From 1997 through 2002, the Company acquired a controlling interest in Ticketmaster Group (and the remaining interest in 1998), Hotel Reservations Network (later renamed Hotels.com) and Expedia, as well as acquired Match.com and other smaller e-commerce companies. In 2002, the Company contributed its entertainment assets to Vivendi Universal Entertainment LLLP, a joint venture, and sold its interests in that venture to NBC Universal in 2005.

In 2003, the Company continued to grow its portfolio of e-commerce companies by acquiring all of the shares of Expedia.com, Hotels.com and Ticketmaster that it did not previously own, together with a number of other e-commerce companies (including LendingTree and Hotwire).

In 2005, IAC acquired Ask Jeeves, Inc. (now known as IAC Search & Media, Inc.) and completed the separation of its travel and travel related businesses and investments into an independent public company called Expedia, Inc. In 2008, IAC separated into five publicly traded companies: IAC, HSN, Inc., Interval Leisure Group, Inc., Ticketmaster and Tree.com, Inc.

In 2009, we sold the European operations of Match.com to Meetic S.A. (now known as Meetic S.A.S. ("Meetic")), a leading European online dating company based in France, in exchange for a 27% interest in Meetic and a €5 million note. In 2010, we exchanged the stock of a wholly-owned subsidiary that held our Evite, Gifts.com and IAC Advertising Solutions businesses and approximately \$218 million in cash for substantially all of Liberty Media Corporation's equity stake in IAC.

In 2011, we increased our ownership stake in Meetic to 81%. In 2012, we acquired The About Group, which primarily consists of About.com, a comprehensive online content and reference library.

In 2014, we acquired the remaining publicly traded shares of Meetic, ValueClick's "Owned and Operated" website businesses, including Investopedia and PriceRunner, as well as The Princeton Review, a leading test preparation and college admission services company.

EQUITY OWNERSHIP AND VOTE

IAC has outstanding shares of common stock, with one vote per share, and Class B common stock, with ten votes per share and which are convertible into common stock on a share for share basis. As of January 30, 2015, Barry Diller, IAC's Chairman and Senior Executive, owned 5,789,499 shares of Class B common stock (the "Diller Shares")

representing 100% of IAC's outstanding Class B common stock and approximately 42.5% of the outstanding total voting power of IAC.

Pursuant to an agreement between Mr. Diller and IAC, certain transfer restrictions apply to 1.5 million of the Diller Shares, including a requirement that, until December 1, 2015 and except for transfers to certain permitted transferees, the Diller Shares must first be converted into common stock in order to be transferred. In addition, pursuant to an amended and restated governance agreement between IAC and Mr. Diller, for so long as Mr. Diller serves as IAC's Chairman and Senior Executive,

Table of Contents

he generally has the right to consent to limited matters in the event that IAC's ratio of total debt to EBITDA (as defined in the governance agreement) equals or exceeds four to one over a continuous twelve-month period. As a result of Mr. Diller's ownership interest, voting power and the contractual rights described above, Mr. Diller is currently in a position to influence, subject to our organizational documents and Delaware law, the composition of IAC's Board of Directors and the outcome of corporate actions requiring shareholder approval, such as mergers, business combinations and dispositions of assets, among other corporate transactions.

Table of Contents

DESCRIPTION OF IAC BUSINESSES

Search & Applications

Overview

Our Search & Applications segment consists of:

• Websites, including Ask.com, About.com, CityGrid, Dictionary.com, Investopedia, PriceRunner and Ask.fm, through which we provide search services, content and other services; and

• Applications, including our direct-to-consumer downloadable applications operations (“B2C”), our partnership operations (“B2B”), SlimWare and Apalon.

Our Websites and Applications businesses provide search services and content to our users. Search services generally involve the generation and display of a set of hyperlinks to websites deemed relevant to search queries entered by users. In addition to these algorithmic search results, paid listings are also generally displayed in response to search queries. Paid listings are advertisements displayed on search results pages that generally contain a link to an advertiser’s website. Paid listings are generally displayed based on keywords selected by the advertiser. The paid listings we display are supplied to us by Google Inc. (“Google”) pursuant to a services agreement with Google that expires on March 31, 2016.

Websites

Our Websites business primarily consists of the following destination websites: Ask.com, which provides general search services, as well as question and answer services that provide direct answers to natural-language questions; About.com, which provides detailed information and content written by independent, freelance subject matter experts across hundreds of vertical categories; Dictionary.com, which primarily provides online and mobile dictionary and reference services; Investopedia, a resource for investment and personal finance education and information; PriceRunner, a shopping comparison website; and Ask.fm, a question and answer social network.

Our Websites business also includes CityGrid, an advertising network that integrates local content and advertising for distribution to both affiliated and third party publishers across web and mobile platforms.

Applications

Our Applications business consists of our B2C and B2B operations, as well as SlimWare, a provider of community-powered software and services that clean, repair, update and optimize personal computers, and Apalon, a developer of a large and growing suite of mobile applications worldwide.

Our B2C operations develop, market and distribute a variety of downloadable applications that offer users the ability to access search services, as well as engage in a number of other activities online, such as play games, send e-cards, decorate e-mails and web pages and explore select vertical categories. The majority of our B2C applications are toolbars, which consist of a browser search box and related technology (which together enable users to run search queries and otherwise access search services directly from their web browsers). Many of our toolbars are coupled with other applications that we have developed that enable users to personalize their online activities and otherwise make these activities more expressive and fun. These applications include: MyFunCards, through which users can send online greeting cards; Popular Screensavers, through which users can personalize their desktops with photos, images and animations; and Retrogamer and Gaming Wonderland, through which users can access classic arcade, sports and action and other casual games directly from their web browsers. Other B2C applications target users with a special or passionate interest in select vertical categories (such as television programming, sports, shopping and gossip, among others) or provide users with particular reference information or access to specific utilities (such as maps, weather forecasts or file conversion technology). We distribute our B2C applications directly to consumers free of charge.

Our B2B operations work closely with partners in the software, media and other industries to design and develop customized browser based search applications to be bundled and distributed with these partners’ products and services. We also market and distribute a number of mobile applications through which we provide search and other services, including: the Ask.com iOS and Android applications, which provide general search and natural language question and answer services, and the Dictionary.com iOS and Android applications, which provide dictionary and reference services.

Revenue

The Search & Applications segment's revenue consists principally of advertising revenue, which is generated primarily through the display of paid listings in response to search queries, as well as from display advertisements appearing on its websites and, to a lesser extent, the syndication of search results generated by Ask-branded destination search websites. The

4

Table of Contents

substantial majority of the paid listings we display are supplied to us by Google pursuant to our services agreement with Google.

Pursuant to this agreement, we transmit search queries to Google, which in turn transmits a set of relevant and responsive paid listings back to us for display in search results. This ad-serving process occurs independently of, but concurrently with, the generation of algorithmic search results for the same search queries. Google paid listings are displayed separately from algorithmic search results and are identified as sponsored listings on search results pages. Paid listings are priced on a price per click basis and when a user submits a search query through our Search & Applications properties or services and then clicks on a Google paid listing displayed in response to the query, Google bills the advertiser that purchased the paid listing directly and shares a portion of the fee charged to the advertiser with us. We recognize paid listing revenue from Google when it delivers the user's click. In cases where the user's click is generated due to the efforts of a third party distributor, we recognize the amount due from Google as revenue and record a revenue share or other payment obligation to the third party distributor as traffic acquisition costs. To a lesser extent, we also syndicate Google paid listings to third party websites with whom we enter into syndication agreements. See "Item 1A-Risk Factors-We depend upon arrangements with Google and any adverse change in this relationship could adversely affect our business, financial condition and results of operations."

Competition

We compete with a wide variety of parties in connection with our efforts to:

- attract and retain users to our various Search & Applications properties and services generally;
- develop, market and distribute our Applications;
- attract third parties to distribute our Applications and related technology; and
- attract advertisers.

In the case of our search services generally, our competitors include Google, Yahoo!, Bing and other destination search websites and search centric portals (some of which provide a broad range of content and services and/or link to various desktop applications), third party toolbar, convenience search and applications providers, other search technology and convenience service providers (including Internet access providers, social media platforms, online advertising networks, traditional media companies and companies that provide online content). When we market our content and other services, our competitors include destination websites that primarily acquire traffic through paid and algorithmic search results.

Moreover, some of our current and potential competitors have longer operating histories, greater brand recognition, larger customer bases and/or significantly greater financial, technical and marketing resources than we do. As a result, they have the ability to devote comparatively greater resources to the development and promotion of their products and services, which could result in greater market acceptance of their products and services relative to those offered by us.

In the case of our Websites business, we believe that our ability to compete successfully will depend primarily upon:

- the relevance and authority of our search results, answers and other content;
- the quality of the content and features on our various websites, and the attractiveness of the services provided by these websites generally, relative to those of our competitors;
- our continued ability to differentiate Ask.com from its competitors through question and answer services that provide accurate, authoritative and direct answers to natural language questions (in the form of algorithmic search results and/or responses from other Ask.com users, as well as indexed question and answer pairings from various websites and online services), which depends primarily upon our ability to deliver authoritative and trustworthy content to users, as well as our ability to attract advertisers to this initiative; and
- our ability to successfully market our products and services effectively.

In the case of our Applications business, we believe that our ability to compete successfully will depend primarily upon our continued ability to:

- create toolbars and other applications that resonate with consumers (which requires that we continue to bundle attractive features, content and services, some of which may be owned by third parties, with quality search services);
- maintain industry-leading monetization solutions for our Applications;
-

differentiate our toolbars and other applications from those of our competitors (primarily through providing customized toolbars and access to multiple search and other services through our toolbars);
secure cost-effective distribution arrangements with third parties; and
market and distribute our toolbars and other applications directly to consumers in a cost-effective manner.

Table of Contents

The Match Group

Overview

The Match Group segment consists of our North America dating businesses (which include Match, Chemistry, People Media, OkCupid, Tinder and other dating businesses operating within the United States and Canada), our International dating businesses (which include Meetic, Tinder and all other dating businesses operating outside of the United States and Canada) and our non-dating businesses, The Princeton Review, Tutor.com and DailyBurn.

Through the brands and businesses within our dating businesses, we are a leading provider of subscription-based and ad-supported online personals services in North America, Europe, Latin America, Australia and Asia. We provide these services through websites and applications that we own and operate.

As December 31, 2014, we collectively provided online personals services to approximately 3.5 million subscribers. In addition, we own a 20% interest in Zhenai, Inc., a leading provider of online dating and matchmaking services in China.

Through the brands and businesses within our non-dating businesses, we provide a variety of educational services, including in-person and online test preparation and tutoring (The Princeton Review and Tutor.com), as well as streaming fitness and workout videos across a variety of platforms (DailyBurn).

Dating

Services. We provide online personals services through various branded websites that we own and operate, all of which provide single adults with a private and convenient environment for meeting other single adults. These websites provide online personals services to registered members (those who establish a username and password) and subscribers (those who establish a username and password and pay a subscription fee).

Within our portfolio of websites, we have both subscription based and ad-supported offerings. Our subscription based websites offer registered members the ability to post a profile and use any related searching and matching tools free of charge, while subscribers have access to enhanced tools and a broader feature set, including the ability to initiate, review and respond to communications with or from other users. Our subscription programs consist of programs with a single month term, with discounts for programs with various longer terms. Our ad supported websites generally provide online personals services with basic functionality without the commitment of a monthly subscription, in some cases making a variety of premium or add-on features available for a fee. We also offer access to our services via various mobile devices through our Match, OkCupid, Tinder and other branded mobile applications. We also provide live, local events for our Match members in certain markets in North America and Europe.

Marketing. We market our online personals services through a wide variety of offline and online marketing activities. Our offline marketing activities generally consist of traditional marketing and business development activities, including television, radio and print advertising and related public relations efforts, as well as events. Our online marketing activities generally consist of the purchase of banner and other display advertising, search engine marketing and e-mail campaigns.

Revenue. Dating revenue is derived primarily from subscription fees for our subscription based online personals and related services. Revenue is also derived from online advertising and the purchase of add-on or premium features.

Competition. The personals business is very competitive and highly fragmented and barriers to entry are minimal. We compete primarily with online and offline broad based personals, dating and matchmaking services (both paid and free), social media platforms and applications, the personals sections of newspapers and magazines, other conventional media companies that provide personals services and traditional venues where singles meet (both online and offline).

We believe that our ability to compete successfully in the case of our dating businesses will depend primarily upon the following factors:

- the size and diversity of our registered member and subscriber bases relative to those of our competitors;
- the functionality of our websites and mobile applications and the attractiveness of their features and our services and offerings generally to consumers relative to those of our competitors;
- how quickly we can enhance our existing technology and services and/or develop new features and services in response to:

new, emerging and rapidly changing technologies;
the introduction of product and service offerings by our competitors;
evolving industry standards; and

6

Table of Contents

- changes in consumer requirements and trends in the single community relative to our competitors;
- our ability to engage in cost-effective marketing efforts; and
- the recognition and strength of our various brands relative to those of our competitors.

Non-Dating

Services. The Princeton Review is a leading provider of college and graduate school admissions test preparation and college readiness services to individuals, schools and school districts. Through Tutor.com, we provide a wide variety of live, one-on-one, on-demand tutoring in over forty different subjects through our online interactive classroom to libraries, colleges and universities, the United States military, businesses and individuals. DailyBurn is a health and fitness property that provides streaming fitness and workout videos across a variety of platforms, including iOS, Android, Xbox and other Internet-enabled television platforms.

Marketing. We market our test preparation and tutoring services primarily through search engine marketing, direct marketing campaigns and public relations efforts, as well as through attendance at industry conferences and our sales force. We market our streaming fitness and workout videos primarily through television advertising, advertising on ad-supported video-on-demand services and content platforms and search engine marketing.

Revenue. The Princeton Review and Tutor.com's revenue consists primarily of fees received for in-person and online test preparation classes, access to online test preparation materials and individual tutoring services. DailyBurn's revenue consists primarily of subscription fees.

Competition. The markets for test preparation, college readiness services and tutoring services are highly competitive and barriers to entry are minimal. We compete primarily with regional and national test preparation companies, as well as online providers of test preparation and college readiness services with limited overhead costs that reach a national audience, and individual tutors.

We believe that our ability to compete successfully in the case of The Princeton Review and Tutor.com will depend primarily upon the following factors:

- the recognition and strength of The Princeton Review brand relative to those of its competitors and our ability to build and maintain awareness of (and loyalty to) the Tutor.com brand;
- our ability to engage in cost-effective marketing efforts;
- the quality of our offerings generally to consumers relative to those of our competitors; and
- the quality, diversity and stability of our instructors and tutors and the quality of the services provided by these professionals.

The fitness and workout market is highly competitive and barriers to entry, particularly in the case of online platforms, are minimal. We compete primarily with other streaming fitness and workout platforms and, to a lesser extent, fitness and workout DVDs.

Media

Overview

Our Media segment consists primarily of Vimeo, Electus and The Daily Beast.

Vimeo operates a global video sharing platform for creators and their audiences. Vimeo offers video creators simple, professional-grade tools to share, distribute and monetize content online, and provides viewers with a clutter-free environment to watch content across a variety of Internet-enabled devices. As of December 31, 2014, Vimeo had approximately 35 million registered members and reached a global monthly audience of more than 160 million.

Electus is an integrated multimedia entertainment studio that unites producers, creators, advertisers and distributors to produce video content for distribution across a variety of platforms in the United States and various jurisdictions abroad. Electus also operates Electus Digital, which consists of the following websites and properties:

CollegeHumor.com, Dorkly.com and WatchLOUD.com; YouTube channels WatchLOUD, Nuevon and Hungry; and Big Breakfast (a production company).

The Daily Beast is a website dedicated to news, commentary, culture and entertainment that curates and publishes existing and original online content from its own roster of contributors in the United States.

Table of Contents

Vimeo

Services. Through Vimeo, we offer video creators simple, professional grade tools to share, distribute and monetize content online, and provide viewers with a clutter-free environment to watch content across a variety of Internet-enabled devices, including mobile devices and connected television platforms. We offer these basic services free of charge.

We also offer premium services for a fee through two subscription-based products, which provide subscribers with varying levels of premium features, including: additional added storage space, priority video conversion, advanced video privacy controls, extensive video player customization options, premium support and the ability to sell videos. As of December 31, 2014, Vimeo had over 500,000 paid subscribers.

We also provide transactional video-on-demand services through Vimeo On Demand, which allows video creators to sell videos they create to viewers. As of December 31, 2014, Vimeo On Demand featured over 16,000 titles from a variety of genres that can be purchased and viewed by consumers on vimeo.com or on third party websites with an embedded Vimeo On Demand player. Titles are acquired from video creators by way of direct uploads to vimeo.com and through negotiated agreements with content owners, producers and distributors.

We also sell custom advertising through our Brand Creative Fund service, which connects advertisers with video creators to produce original, branded videos, which are then presented as brand-sponsored content on vimeo.com and/or the advertiser websites.

Marketing. We market Vimeo's services primarily through online marketing efforts, including search engine marketing, e-mail campaigns, display advertising, affiliate marketing and television advertising and, in the case of our subscription-based offerings only, through upgrade channels on vimeo.com.

Revenue. Vimeo revenue is derived primarily from subscription fees and, to a lesser extent, from video and advertising sales.

Competition. Vimeo competes with a variety of online video providers, including platforms that provide videos to consumers on an advertising-supported, subscription or transactional fee basis. We believe that Vimeo differentiates itself from its competitors by offering a customizable, high definition video player, proprietary uploading and encoding infrastructure and a clutter-free viewing experience (advertisements are not placed in videos created by registered members and subscribers). We believe that our ability to compete successfully will depend primarily on:

- the quality of our platform and the viewing experience we provide;
- our ability to engage with users on mobile devices;
- whether our subscription offerings resonate with video creators;
- our ability to attract high-quality content, both for free and fee-based viewing;
- the accessibility of our videos on search engines and social media platforms;
- the recognition and strength of the Vimeo brand relative to those of our competitors; and
- our ability to drive new subscribers and viewers to our platform through various forms of direct advertising.

Electus

Services. Through Electus, we provide production and producer services for both unscripted and scripted television, feature film and digital content, primarily for initial sale and distribution in the United States. Our content is distributed on a wide range of platforms, including broadcast television, premium and basic cable television, subscription-based and ad-supported video-on-demand services and through theatrical releases and other outlets. We sell and distribute Electus programming and other content, together with programming and other content developed by third parties, outside of the United States through Electus International. We also work with various brands to integrate their products into, as well as sponsor, Electus content through our Content Marketing team.

In addition, we operate Electus Digital, which consists of the following websites and properties: CollegeHumor.com, Dorkly.com and WatchLOUD.com; YouTube channels WatchLOUD, Nuevon and Hungry; and Big Breakfast (a production company). The various brands and businesses within Electus Digital specialize in creating content for digital, television and feature film platforms across a variety of genres, as well as provide branded and third party creative production services.

Revenue. Electus revenue is derived primarily from media production.

Marketing. We do not engage in any formal marketing efforts in the case of our production and executive producer services, instead relying on referrals and the quality of our services and projects. For content distribution, we rely on our sales force, referrals and the quality of our services and projects, and for international distribution only, attendance at industry trade

8

Table of Contents

shows. In addition, the platforms to which we license our content for distribution market our content through their own independent marketing efforts. Electus Digital attracts users and audience primarily through social media, search engine marketing and affiliate agreements.

Competition. We compete with entertainment studios, production companies, distribution companies, creative agencies and content websites. We believe that our ability to compete successfully will depend primarily upon the following factors:

- the quality and diversity of our content and the third parties to whom we license our content, as well as the quality of the services provided by licensees of our content;

- our continued ability to create new content that resonates with licensees and viewers; and

- our ability to sell integration and sponsorship opportunities for our content.

eCommerce

Our eCommerce segment consists primarily of HomeAdvisor and ShoeBuy.

HomeAdvisor

Overview. HomeAdvisor is a leading online marketplace for matching consumers with home services professionals in the United States, as well as in France and the Netherlands under various brands. HomeAdvisor connects consumers, by way of proprietary and patented technologies, with home services professionals, most of which are pre-screened and customer rated.

As of December 31, 2014, HomeAdvisor's network of home services professionals consisted of more than 85,000 professionals in the United States providing services in more than 500 categories ranging from simple home repairs to larger home remodeling projects. HomeAdvisor also operates mHelpDesk, a provider of cloud based field service software for small to mid-size businesses.

Matching and Other Consumer Services. When a consumer submits a request through the HomeAdvisor marketplace, we generally match that consumer with up to four home services professionals from our network based on the type of services desired and the consumer's location. Consumers can then review profiles of home services professionals with whom they have been matched and select the professional whom they believe best meets their specific needs. In addition to (or in lieu of) submitting a request through our marketplace, consumers can also search, select and contact home service professionals directly through our online directory. In all cases, the consumer is under no obligation to work with home service professionals referred by or found through HomeAdvisor.

In addition to matching services, consumers can access our free, online CostGuide, which provides project cost information for more than 250 project types on a local basis, as well as an online library of service related resources, which primarily includes articles about home improvement, repair and maintenance, tools to assist consumers with the research, planning and management of their projects and general advice for working with home services professionals. Consumers can also access all HomeAdvisor services and tools on iOS and Android devices through the HomeAdvisor mobile application.

Subscription Services for Home Services Professionals. We offer multiple subscription products for home services professionals, each for a flat monthly, quarterly or annual fee. The basic membership package includes membership in our network of home services professionals, as well as a listing in our online directory. Additional membership packages include all of the basic membership package services, plus matches through the marketplace and, in the case of one package, custom website and mobile development and hosting services.

Home services professionals who are new to HomeAdvisor must generally sign up for one of the subscription products described above. As of December 31, 2014, approximately 45,000 of the more than 85,000 home services professionals within our network had purchased a membership package.

Revenue. HomeAdvisor's revenue is primarily derived from fees paid by home services professionals for consumer matches (regardless of whether the professional ultimately provides the requested service), subscription fees and fees for website hosting services. Fees for matches vary based upon the service requested and where the service is provided.

Marketing. We market our services to consumers primarily through television marketing, as well as search engine marketing and through affiliate agreements with third parties. Pursuant to these agreements, third parties agree to advertise and promote our services and those of our home services professionals on their websites and we agree to pay

them a fixed fee when visitors from their websites submit a valid service request through our website (on a cost-per-acquisition basis) or click through to our website (on a cost-per-click basis). We also market our services to consumers through the purchase of paid listings displayed in yellow page directories, portals and contextual home improvement related sites and, to a lesser extent, through radio advertising. We market our subscription packages to home services professionals through our sales force, as well as through search engine marketing, relationships with trade associations and affiliate marketing relationships.

Table of Contents

Competition. We compete with home services-related lead generation services, as well as Internet search engines and directories and with other forms of local advertising, including radio, direct marketing campaigns, yellow pages, newspapers and other offline directories. We also compete with local and national retailers of home improvement products that offer or promote installation services. We believe that our ability to compete successfully will depend primarily upon the following factors:

- the size, quality (as determined, in part, by reference to our pre-screening efforts and customer ratings and reviews), diversity and stability of our network of home services professionals and the quality of the services they provide;
- our continued ability to deliver service requests that convert into revenue for our network of home services professionals in a cost-effective manner;
- whether our subscription products resonate with (and provide value to) our home services professionals;
- the functionality of our websites and mobile applications and the attractiveness of their features and our services generally to consumers and home services professionals, as well as our ability to introduce new products and services that resonate with consumers and home services professionals; and
- our ability to build and maintain awareness of (and loyalty to) the HomeAdvisor brand.

ShoeBuy

ShoeBuy is a leading Internet retailer of footwear and related apparel and accessories. ShoeBuy generally passes purchases made by customers through its various websites on to the relevant vendors for fulfillment and shipping. ShoeBuy's revenue consists of merchandise sales, reduced by incentive discounts and sales returns. We market ShoeBuy to consumers primarily through search engine marketing, affiliate agreements and comparison shopping engines. ShoeBuy competes primarily with other leading internet footwear and other retailers and traditional footwear and other retailers with an offline and online presence.

Employees

As of December 31, 2014, IAC and its subsidiaries employed approximately 5,000 full-time employees. IAC believes that it generally has good employee relationships, including relationships with employees represented by unions or other similar organizations.

Additional Information

Company Website and Public Filings. The Company maintains a website at www.iac.com. Neither the information on the Company's website, nor the information on the website of any IAC business, is incorporated by reference into this annual report, or into any other filings with, or into any other information furnished or submitted to, the SEC. The Company makes available, free of charge through its website, its Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K (including related amendments) as soon as reasonably practicable after they have been electronically filed with (or furnished to) the SEC.

Code of Ethics. The Company's code of ethics applies to all employees (including all of IAC's executive officers and senior financial officers (including IAC's Chief Financial Officer and Controller)) and directors and is posted on the Company's website at <http://ir.iac.com/corporate-governance-document.cfm?DocumentID=11373>. This code of ethics complies with Item 406 of SEC Regulation S-K and the rules of The Nasdaq Stock Market. Any changes to the code of ethics that affect the provisions required by Item 406 of Regulation S-K, and any waivers of such provisions of the code of ethics for IAC's executive officers, senior financial officers or directors, will also be disclosed on IAC's website.

Table of Contents

Item 1A. Risk Factors

Cautionary Statement Regarding Forward-Looking Information

This annual report on Form 10-K contains “forward looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The use of words such as “anticipates,” “estimates,” “expects,” “intends,” “plans” and “believes” among others, generally identify forward looking statements. These forward looking statements include, among others, statements relating to: IAC’s future financial performance, IAC’s business prospects and strategy, anticipated trends and prospects in the industries in which IAC’s businesses operate and other similar matters. These forward looking statements are based on IAC management’s expectations and assumptions about future events as of the date of this annual report, which are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict.

Actual results could differ materially from those contained in these forward looking statements for a variety of reasons, including, among others, the risk factors set forth below. Other unknown or unpredictable factors that could also adversely affect IAC’s business, financial condition and results of operations may arise from time to time. In light of these risks and uncertainties, the forward looking statements discussed in this annual report may not prove to be accurate. Accordingly, you should not place undue reliance on these forward looking statements, which only reflect the views of IAC management as of the date of this annual report. IAC does not undertake to update these forward looking statements.

Risk Factors

Mr. Diller owns a significant percentage of the voting power of our stock and will be able to exercise significant influence over the composition of our Board of Directors, matters subject to stockholder approval and our operations. As of January 30, 2015, Mr. Diller owned 5,789,499 shares of IAC Class B common stock representing 100% of IAC’s outstanding Class B common stock and approximately 42.5% of the total outstanding voting power of IAC. As of this date, Mr. Diller also owned 930,734 vested options to purchase IAC common stock and 75,000 unvested options to purchase IAC common stock.

In addition, under an amended and restated governance agreement between IAC and Mr. Diller, for so long as Mr. Diller serves as IAC’s Chairman and Senior Executive, he generally has the right to consent to limited matters in the event that IAC’s ratio of total debt to EBITDA (as defined in the governance agreement) equals or exceeds four to one over a continuous twelve month period. While Mr. Diller may not currently exercise this right, no assurances can be given that this right will not become exercisable in the future, and if so, that Mr. Diller will consent to any of the limited matters at such time, in which case IAC would not be able to engage in transactions or take actions covered by this consent right.

As a result of Mr. Diller’s ownership interest, voting power and the contractual rights described above, Mr. Diller currently is in a position to influence, subject to our organizational documents and Delaware law, the composition of IAC’s Board of Directors and the outcome of corporate actions requiring stockholder approval, such as mergers, business combinations and dispositions of assets, among other corporate transactions. In addition, this concentration of voting power could discourage others from initiating a potential merger, takeover or other change of control transaction that may otherwise be beneficial to IAC, which could adversely affect the market price of IAC securities. We depend on our key personnel.

Our future success will depend upon our continued ability to identify, hire, develop, motivate and retain highly skilled individuals, with the continued contributions of our senior management being especially critical to our success. Competition for well-qualified employees across IAC and its various businesses is intense and our continued ability to compete effectively depends, in part, upon our ability to attract new employees. While we have established programs to attract new employees and provide incentives to retain existing employees, particularly our senior management, we cannot assure you that we will be able to attract new employees or retain the services of our senior management or any other key employees in the future. Effective succession planning is also important to our future success. If we fail to ensure the effective transfer of senior management knowledge and smooth transitions involving senior management across our various businesses, our ability to execute short and long term strategic, financial and operating goals, as well as our business, financial condition and results of operations generally, could be adversely affected.

Table of Contents

We depend upon arrangements with Google and any adverse change in this relationship could adversely affect our business, financial condition and results of operations.

A substantial portion of our consolidated revenue is attributable to a services agreement with Google that expires on March 31, 2016. Pursuant to this agreement, we display and syndicate paid listings provided by Google in response to search queries generated by users of our Search & Applications properties. In exchange for making our search traffic available to Google, we receive a share of the revenue generated by the paid listings supplied to us, as well as certain other search related services.

The amount of revenue we receive from Google depends upon a number of factors outside of our control, including the amount Google charges for advertisements, the efficiency of Google's system in attracting advertisers and serving up paid listings in response to search queries and parameters established by Google regarding the number and placement of paid listings displayed in response to search queries. In addition, Google makes judgments about the relative attractiveness (to advertisers) of clicks on paid listings from searches performed on our Search & Applications properties and these judgments factor into the amount of revenue we receive. Google also makes judgments about the relative attractiveness (to users) of paid listings from searches and these judgments factor into the amount of advertisements we can purchase. Changes to Google's paid listings network efficiency, its judgment about the relative attractiveness to advertisers of clicks on paid listings from our Search & Applications properties, its judgment about the relative attractiveness to users of paid listings from searches or the parameters applicable to the display of paid listings could have an adverse effect on our business, financial condition and results of operations. Such changes could come about for a number of reasons, including general market conditions, competition or policy and operating decisions made by Google.

Our services agreement with Google requires that we comply with certain guidelines promulgated by Google for the use of its brands and services, including the manner in which Google's paid listings are displayed within search results, and that we establish guidelines to govern certain activities of third parties to whom we syndicate paid listings, including the manner in which these parties drive search traffic to their websites and display paid listings. Subject to certain limitations, Google may unilaterally update its policies and guidelines without advance notice, which could in turn require modifications to, or prohibit and/or render obsolete certain of, our products, services and/or business practices, which could be costly to address or otherwise have an adverse effect on our business, financial condition and results of operations. Noncompliance with Google's guidelines by us or the third parties to whom we syndicate paid listings or through which we secure distribution arrangements for our applications could, if not cured, result in Google's suspension of some or all of its services to our websites or the websites of our third party partners, the imposition of additional restrictions on our ability to syndicate paid listings or the termination of the services agreement by Google.

The termination of the services agreement by Google, the curtailment of IAC's rights under the agreement (whether pursuant to the terms thereof or otherwise) or the failure of Google to perform its obligations under the agreement would have an adverse effect on our business, financial condition and results of operations. In addition, our inability to obtain a renewal of our agreement with Google with substantially comparable economic and other terms upon the expiration of our current agreement could have an adverse effect on our business, financial condition and results of operations. In addition, Google's ability to limit our ability to market our products and services through its advertising services, whether due to policy or competitive reasons or otherwise, could have an adverse effect on our business, financial condition and results of operations. If any of these events were to occur, we may not be able to find another suitable alternate paid listings provider (or if an alternate provider were found, the economic and other terms of the agreement and the quality of paid listings may be inferior relative to our arrangements with, and the paid listings supplied by, Google) or otherwise replace the lost revenues.

General economic events or trends that reduce advertising spending could harm our business, financial condition and results of operations.

A substantial portion of our consolidated revenue is attributable to online advertising. Accordingly, we are particularly sensitive to events and trends that could result in decreased advertising expenditures. Advertising expenditures have historically been cyclical in nature, reflecting overall economic conditions and budgeting and buying patterns, as well as levels of consumer confidence and discretionary spending.

Small and local businesses with which we do business are particularly sensitive to these events and trends, given that they are not as well situated to weather adverse economic conditions as their larger competitors, which are generally better capitalized and have greater access to credit. In the recent past, adverse economic conditions have caused, and if such conditions were to recur in the future they could cause, decreases and/or delays in advertising expenditures, which would reduce our revenues and adversely affect our business, financial condition and results of operations.

Table of Contents

Our success depends upon the continued growth and acceptance of online advertising, particularly paid listings, as an effective alternative to traditional, offline advertising and the continued commercial use of the Internet.

We continue to compete with traditional advertising media, including television, radio and print, in addition to a multitude of websites with high levels of traffic and online advertising networks, for a share of available advertising expenditures and expect to face continued competition as more emerging media and traditional offline media companies continue to enter the online advertising market. We believe that the continued growth and acceptance of online advertising generally will depend, to a large extent, on its perceived effectiveness and the acceptance of related advertising models (particularly in the case of models that incorporate user targeting and/or utilize mobile devices), the continued growth in commercial use of the Internet (particularly abroad), the extent to which web browsers, software programs and/or other applications that limit or prevent advertising from being displayed become commonplace and the extent to which the industry is able to effectively manage click fraud. Any lack of growth in the market for online advertising, particularly for paid listings, or any decrease in the effectiveness and value of online advertising (whether due to the passage of laws requiring additional disclosure, an industry-wide move to self-regulatory principles that require additional disclosure and/or opt-in policies for advertising that incorporate user targeting or other developments) would have an adverse effect on our business, financial condition and results of operations.

We depend, in part, upon arrangements with third parties to drive traffic to our various websites and distribute our products and services.

We engage in a variety of activities designed to attract traffic to our various websites and convert visitors into repeat users and customers. How successful we are in these efforts depends, in part, upon our continued ability to enter into arrangements with third parties to drive traffic to our various websites, as well as the continued introduction of new and enhanced products and services that resonate with users and customers generally.

For example, we have entered into (and expect to continue to enter into) agreements to distribute Search & Applications search boxes, toolbars and other applications to users through third parties. Most of these agreements are either non exclusive and short term in nature or, in the case of long term or exclusive agreements, are terminable by either party in certain specified circumstances. In addition, a few of these agreements collectively represent a significant percentage of the revenue generated by our B2B operations. Our inability to enter into new (or renew existing) agreements to distribute our search boxes, toolbars and other applications through third parties for any reason would result in decreases in website traffic, queries and advertising revenue, which could have an adverse effect on our business, financial condition and results of operations.

In addition, in the case of the businesses within The Match Group segment, we have entered into a number of arrangements with third parties to drive traffic to our online personals websites. Pursuant to these arrangements, third parties generally promote our services on their websites or through e-mail campaigns and we either pay a fixed fee when visitors to these websites click through to (or register with) our online personals websites or pay a percentage of revenue we receive from such visitors who pay us subscription fees. These arrangements are generally not exclusive, are short term in nature and are generally terminable by either party given notice. If existing arrangements with third parties are terminated (or are not renewed upon their expiration) and we fail to replace this traffic and related revenues, or if we are unable to enter into new arrangements with existing and/or new third parties in response to industry trends, our business, financial condition and results of operations could be adversely affected.

In the case of our HomeAdvisor business, our ability to drive traffic depends, in part, on the nature and number of home services professionals who are members of our network. While these home services professionals are required to agree that they will operate in accordance with our terms and conditions, we do not enter into long term agreements with them generally and subscription memberships may be canceled at any time. In addition, a significant number of our home services professionals are sole proprietorships and small businesses, which are particularly sensitive to adverse economic conditions, such as constrained liquidity and decreases in consumer spending. As a result, our network of home services professionals experiences turnover. This turnover, if significant or recurring over a prolonged period, could result in a decrease in traffic to HomeAdvisor.com and increased costs, all of which could adversely affect our business, financial condition and results of operations.

Table of Contents

Even if we succeed in driving traffic to our properties, we may not be able to convert this traffic or otherwise retain users and customers unless we continue to provide quality products and services. For example, in the case of About.com, we rely on independent, freelance subject matter experts to generate quality content for our users. If we fail to recruit and retain such experts generally and/or the experts ultimately retained cannot provide us with quality content in a cost-effective manner, the experience of our users would be adversely affected, which could adversely affect our business, financial condition and results of operations. In addition, we may not be able to adapt quickly and/or in a cost-effective manner to frequent changes in user and customer preferences, which can be difficult to predict, or appropriately time the introduction of enhancements and/or new products or services to the market. Our inability to provide quality products and services would adversely affect user and customer experiences, which would result in decreases in users, customers and revenues and could adversely affect our business, financial condition and results of operations.

As discussed below, our traffic building and conversion initiatives also involve the expenditure of considerable sums for marketing, as well as for the development and introduction of new products, services and enhancements, infrastructure and other related efforts.

Marketing efforts designed to drive traffic to our various websites may not be successful or cost-effective.

Traffic building and conversion initiatives involve considerable expenditures for online and offline advertising and marketing. We have made, and expect to continue to make, significant expenditures for search engine marketing (primarily in the form of the purchase of keywords, which we purchase primarily through Google), online display advertising and traditional offline advertising in connection with these initiatives, which may not be successful or cost-effective. In the case of our search engine marketing efforts, our failure to respond successfully to rapid and frequent changes in the pricing and operating dynamics of search engines, as well as changing policies and guidelines applicable to keyword advertising (which may be unilaterally updated by Google without advance notice), could adversely affect the placement of paid listings that appear in response to keywords we purchase and the related user experience, as well as adversely affect the pricing of online advertising we purchase generally, which would increase our costs and adversely impact the effectiveness of our advertising efforts overall. In the case of paid advertising generally, the policies of sellers and publishers of advertising (including Google) may limit our ability to purchase certain types of advertising or advertise some of our products and services, which could affect our ability to compete effectively and, in turn, adversely affect our business, financial condition and results of operations.

One of the most cost-effective efforts we employ to attract and acquire new (and retain existing) users and customers is commonly referred to as search engine optimization, or SEO. SEO involves developing websites to rank well within search engine results. Search engines frequently update and change the logic that determines the placement and display of search results. The failure to successfully manage SEO efforts across our businesses, including the timely modification of SEO efforts from time to time in response to periodic changes in search engine algorithms, search query trends and related actions by providers of search services designed to ensure the display of unique offerings in search results (which actions by search service providers may result in algorithmic listings being displayed less prominently within search engine results), could result in a substantial decrease in traffic to our various websites, as well as increased costs if we were to replace free traffic with paid traffic, which would adversely affect our business, financial condition and results of operations.

In addition, search engines continue to expand their offerings into other, non-search related categories, and in certain instances display their own integrated or related product and service offerings in a more prominent manner than those of third parties within their search results. Continued expansion and competition from search engines could result in a substantial decrease in traffic to our various websites, as well as increased costs if we were to replace free traffic with paid traffic, which would adversely affect our business, financial condition and results of operations.

Lastly, as discussed above, we also enter into various arrangements with third parties in an effort to increase traffic, which arrangements are generally more cost-effective than traditional marketing efforts. If we are unable to renew existing (and enter into new) arrangements of this nature, sales and marketing costs as a percentage of revenue would increase over the long-term.

Any failure to attract and acquire new (and retain existing) traffic, users and customers in a cost-effective manner could adversely affect our business, financial condition and results of operations.

Our success depends, in part, on our ability to build, maintain and/or enhance our various brands. Through our various businesses, we own and operate a number of highly-recognizable brands with strong brand appeal within their respective industries, as well as a number of fledgling brands that we are in the process of building. We believe that our success depends, in part, upon our continuing ability to maintain and enhance our established brands, as well as build awareness of (and loyalty to) our fledgling brands. Our brands and brand-building efforts could be negatively impacted by a

Table of Contents

number of factors, including product and service quality concerns, consumer complaints, actions brought by consumers, governmental or regulatory authorities and related media coverage and data protection and security breaches. Moreover, the failure to market our products and services successfully (or in a cost-effective manner), the inability to develop and introduce products and services that resonate with consumers and/or the inability to adapt quickly enough (and/or in a cost effective manner) to evolving changes in the Internet and related technologies, applications and devices, could adversely impact our various brands and brand-building efforts, and in turn, our business, financial condition and results of operations.

The Internet and related technologies and applications continue to evolve and we may not be able to adapt to these changes.

The development of new products and services in response to the evolving trends and technologies of the Internet, as well as the identification of new business opportunities in this dynamic environment, require significant time and resources. We may not be able to adapt quickly enough (and/or in a cost-effective manner) to these changes, appropriately time the introduction of new products and services to the market or identify new business opportunities in a timely manner. Also, these changes could require us to modify related infrastructures and our failure to do so could render our existing websites, applications, services and proprietary technologies obsolete. Our failure to respond to any of these changes appropriately (and/or in a cost effective manner) could adversely affect our business, financial condition and results of operations.

In the case of certain of our applications, third parties have introduced (and continue to introduce) new or updated technologies and policies that may interfere with the ability of users to access or utilize our applications generally or otherwise make users less likely to use our services (such as through the introduction of features and/or processes that disproportionately and adversely impact the ability of consumers to access and use our services relative to those of our competitors). For example, third parties continue to introduce technologies (including new and enhanced web browsers and operating systems) that may limit or prevent certain types of applications from being installed and/or have features and policies that significantly lessen the likelihood that users will install our applications or that previously installed applications will remain in active use. In addition, there are technologies that interfere with the functionality of (or settings changes made by) our applications. For example, there are technologies that interfere with search boxes embedded within our toolbars and the maintenance of home page and web browser search settings previously selected by our users. These technologies, applications and policies adversely impact our ability to generate search queries through our applications, which in turn adversely impacts our revenues. Technologies have also been introduced that can block the display of advertisements on web pages and that provide users with the ability to opt out of advertising products. Our failure to successfully modify our toolbars and other applications in a cost-effective manner in response to the introduction and adoption of these new technologies could adversely affect our business, financial condition and results of operations.

Our success depends, in part, on our ability to develop and monetize mobile versions of our products and services. Our success depends, in part, on our ability to develop and monetize mobile versions of our products and services. While many of our users continue to access our products and services through personal computers, users of (and usage volumes on) mobile devices, including smartphones and tablets, continue to increase relative to those of personal computers. While we have developed mobile versions of certain of our products and services (and have developed certain products and services exclusively for mobile devices) and intend to continue to do so in the future, we may not be able to monetize these applications as effectively as we monetize our non-mobile products and services. In addition, the success of our mobile applications is dependent on their interoperability with various mobile operating systems, technologies, networks and standards that we do not control and any changes in any of these things that compromise the quality or functionality of our products and services could adversely impact usage of our products and services on mobile devices and, in turn, our ability to attract advertisers. Lastly, as the adoption of mobile devices becomes more widespread, we will need to take steps to ensure that our products and services are attractive to users of mobile devices. This shift could adversely affect our business, financial condition and results of operations if we are unable to replace the related revenues.

The processing, storage, use and disclosure of personal data could give rise to liabilities as a result of governmental regulation, conflicting legal requirements or differing views of personal privacy rights.

We receive, transmit and store a large volume of personal information and other user data (including personal credit card data, as well as private content (such as videos and correspondence)) in connection with the processing of search queries, the provision of online products and services, transactions with users and customers and advertising on our websites. The sharing, use, disclosure and protection of this information are determined by the respective privacy and data security policies of our various businesses. These policies are, in turn, subject to federal, state and foreign laws and regulations, as well as evolving industry standards and practices, regarding privacy generally and the storing, sharing, use, disclosure and protection of personal information and user data. Examples include the European Union Data Protection Directive (as adopted and implemented by the various European Union member states, the "EU Directive"), various U.S. state regulations concerning minimum data

Table of Contents

security standards, industry self-regulating principles that have become standard practice and more stringent contractual protections (and related compliance obligations) regarding privacy and data security.

In addition, if an online service provider fails to comply with its privacy policy, it could become subject to an investigation and/or proceeding for unfair or deceptive practices brought by the U.S. Federal Trade Commission under the Federal Trade Commission Act (and/or brought by a state attorney general pursuant to a similar state law), as well as a private lawsuit under various U.S. federal and state laws. Similarly, in the European Union, the online service provider could become subject to an investigation and/or proceeding for the violation of the data protection laws and regulations brought by a member state or its supervisory authority (an independent body charged with monitoring compliance with data protection laws), as well as private causes of action under the EU Directive. In general, personal information is increasingly subject to legislation and regulation in numerous jurisdictions around the world (particularly in the European Union), the intent of which is to protect the privacy of personal information that is collected, processed and transmitted in or from the governing jurisdiction.

U.S. and foreign legislators and regulators may enact new laws and regulations regarding privacy and data security. For example, in May 2014, the White House released a review of "big data" practices, which called for an update to U.S. privacy laws based on the proposed Consumer Privacy Bill of Rights released by the White House in February 2012 and the enactment of a federal data breach notification law. In addition, in February 2013 the U.S. Federal Trade Commission issued a report seeking changes in Internet and mobile privacy protection and disclosures. Similarly, new privacy laws and regulations at the state level, as well as new laws and directives abroad (particularly in the European Union), are being proposed and implemented. For example, legislation in the state of California that became effective on January 1, 2014 requires companies that collect personal information to disclose how they respond to web browser "Do Not Track" signals and the European Union is in the process of adopting new guidelines for data protection and privacy to address recent globalization and technological developments, which will supersede the EU Directive. In addition, existing privacy laws that were intended for brick-and-mortar businesses could be interpreted in a manner that would extend their reach to our businesses. New laws and regulations (or new interpretations of existing laws) in this area may make it more costly to operate our businesses and/or limit our ability to engage in certain types of activities, such as targeted advertising, which could adversely affect our business, financial condition and results of operations.

As privacy and data protection have become more sensitive issues, we may also become exposed to potential liabilities as a result of differing views on the privacy of consumer and other user data collected by our businesses. Also, we cannot guarantee that our security measures will prevent security breaches. In the case of security breaches involving personal credit card data, credit card companies could curtail our ability to transact payments and impose fines for failure to comply with Payment Card Industry (PCI) Data Security Standards. Moreover, any such breach could decrease consumer confidence in the case of the business that experienced the breach or our businesses generally, which would decrease traffic to (and in turn, usage and transactions on) the relevant website and/or our various websites and which in turn, could adversely affect our business, financial condition and results of operations. The failure of any of our businesses, or their various third party vendors and service providers, to comply with applicable privacy policies, federal, state or foreign privacy laws and regulations or PCI standards, as well as the unauthorized release of personal information or other user data for any reason, could adversely affect our business, financial condition and results of operations.

We may not be able to protect our systems, infrastructures and technologies from cyber attacks. In addition, we may be adversely impacted by cyber attacks experienced by third parties. Any disruption of our systems, infrastructures and technologies, or compromise of our user data or other information, due to cyber attacks could have an adverse effect on our business, financial condition and results of operations.

The incidence of malicious technology-related events, such as cyber attacks, computer hacking, computer viruses, worms or other destructive or disruptive software, distributed denial of service attacks or other malicious activities (or any combination of these events) is on the rise worldwide. From time to time, we may become the victim of these types of attacks.

While we continuously develop and maintain systems to detect and prevent events of this nature from impacting our various businesses, these efforts are costly and require ongoing monitoring and updating as technologies change and

efforts to overcome preventative security measures become more sophisticated. Despite our efforts, we cannot assure you that these events will not occur in the future and if they do occur, will not have an adverse effect on our business, financial condition and results of operations.

Furthermore, we may become the victim of security breaches, such as the misappropriation, misuse, leakage, falsification or accidental release or loss of user, customer or vendor data maintained in our information technology systems or those of third parties with whom we do business (or upon whom we otherwise rely in connection with our day to day operations).

Table of Contents

Any cyber attack or security breach we experience could prevent us from providing our products and services, damage our reputation, erode our brands and/or be costly to remedy, as well as result in a degradation of our products and services and/or cause damage to our systems, infrastructures, technologies and data. Even if we do not experience such events, the impact of any such events experienced by third parties with whom we do business (or upon whom we otherwise rely in connection with our day to day operations) could have a similar effect. Moreover, even cyber attacks and security breaches that do not impact us directly may result in a loss of consumer confidence generally, which could make consumers and users less likely to use our products and services.

In addition, we may not have adequate insurance coverage to compensate for losses resulting from any of these events. We may not be able to identify suitable acquisition candidates and even if we are able to do so, we may experience operational and financial risks in connection with acquisitions. In addition, some of the businesses we acquire may incur significant losses from operations or experience impairment of carrying value.

We have made numerous acquisitions in the past and we continue to seek to identify potential acquisition candidates that will allow us to apply our expertise to expand their capabilities, as well as maximize our existing assets. As a result, our future growth may depend, in part, on acquisitions. We may not be able to identify suitable acquisition candidates or complete acquisitions on satisfactory pricing or other terms and we expect to continue to experience competition in connection with our acquisition-related efforts.

Even if we identify what we believe to be suitable acquisition candidates and negotiate satisfactory terms, we may experience operational and financial risks in connection with acquisitions, and to the extent that we continue to grow through acquisitions, we will need to:

successfully integrate the operations, as well as the accounting, financial controls, management information, technology, human resources and other administrative systems, of acquired businesses with our existing operations and systems;

successfully identify and realize potential synergies among acquired and existing businesses;

retain or hire senior management and other key personnel at acquired businesses; and

successfully manage acquisition related strain on the management, operations and financial resources of IAC and its businesses and/or acquired businesses.

We may not be successful in addressing these challenges or any other problems encountered in connection with historical and future acquisitions. In addition, the anticipated benefits of one or more acquisitions may not be realized and future acquisitions could result in increased operating losses, potentially dilutive issuances of equity securities and the assumption of contingent liabilities. Also, the value of goodwill and other intangible assets acquired could be impacted by one or more continuing unfavorable events and/or trends, which could result in significant impairment charges. The occurrence of any these events could have an adverse effect on our business, financial condition and results of operations.

We operate in various international markets, some in which we have limited experience. As a result, we face additional risks in connection with our international operations. Also, we may not be able to successfully expand into new, or further into our existing, international markets.

We currently operate in various jurisdictions abroad and may continue to expand our international presence. In order for our products and services in these jurisdictions to achieve widespread acceptance, commercial use and acceptance of the Internet must continue to grow, which growth may occur at slower rates than those experienced in the United States. Moreover, we must continue to successfully tailor our products and services to the unique customs and cultures of foreign jurisdictions, which can be difficult and costly and the failure to do so could slow our international growth and adversely impact our business, financial condition and results of operations.

Operating abroad, particularly in jurisdictions where we have limited experience, exposes us to additional risks. For example, we may experience difficulties in managing international operations due to distance, language and cultural differences and political and/or economic instability, including issues associated with establishing and maintaining

effective management systems and infrastructures (including disclosure controls and procedures and internal control over financial reporting), the staffing of foreign operations, exchange rate fluctuations and online privacy and protection of personal information. Our success in international markets will also depend, in part, on our ability to identify potential acquisition candidates, joint

Table of Contents

venture or other partners, and to enter into arrangements with these parties on favorable terms and successfully integrate their businesses and operations with our own.

A variety of new laws, or new interpretations of existing laws, could subject us to claims or otherwise harm our business.

We are subject to a variety of laws in the U.S. and abroad that are costly to comply with, can result in negative publicity and diversion of management time and effort, and can subject us to claims or other remedies. Some of these laws, such as income, sales, use, value added and other tax laws and consumer protection laws, are applicable to businesses generally and others are unique to the various types of businesses in which we are engaged. Many of these laws were adopted prior to the advent of the Internet and related technologies and, as a result, do not contemplate or address the unique issues of the Internet and related technologies. Laws that do reference the Internet are being interpreted by the courts, but their applicability and scope remain uncertain.

For example, through our various businesses we post and link to third party content, including third party advertisements, links and websites. We also allow users to submit content, such as comments, photographs and videos. We could be subject to liability for posting, hosting or linking to third party content, and while we generally require third parties to indemnify us for related claims, we may not be able to enforce our indemnification rights. Some laws, including the Communications Decency Act, or CDA, and the Digital Millennium Copyright Act, or DMCA, limit our liability for posting or linking to third party content. For example, the DMCA generally protects online service providers from claims of copyright infringement based on the storage of third party content at the direction of the user, so long as certain statutory requirements are satisfied. However, the scope and applicability of the DMCA are subject to judicial interpretation and, as such, remain uncertain, and the U.S. Congress may enact legislation affecting (and potentially limiting) the protections afforded by the DMCA to online service providers. Moreover, similar protections may not exist in other jurisdictions in which our various businesses operate. As a result, claims have been, and could be, threatened and filed under both U.S. and foreign laws based upon use of third party content asserting, among other things, negligence, defamation, invasion of privacy or right or publicity, copyright infringement or trademark infringement.

Also, we send electronic messages to users through our various businesses, as well as develop, market and/or distribute a variety of downloadable applications through our B2C and B2B operations, which could subject us to liability for failing to comply with laws governing the sending of electronic messages to our users and the installation of downloadable applications. For example, Canada's Anti-Spam Legislation ("CASL"), which became effective on July 1, 2014, prohibits all commercial electronic messages (including e-mail, text, social media, sound and image messages) that are sent without proper consumer consent. And, effective January 15, 2015, the CASL restricts the unsolicited installation of computer programs and applications. While several Canadian regulators are jointly empowered to enforce and issue administrative and monetary penalties for CASL violations, effective July 1, 2017 individuals may also file private and class action lawsuits to collect statutory damages for CASL violations.

In addition, changing Internet business practices may attract increased legal and regulatory attention. One example of such changing practices is the increasing use of "native" advertising, a form of advertising in which sponsored content is presented in a manner that some may view as similar to traditional editorial content. The U.S. Federal Trade Commission has indicated that it will continue to monitor the use of online native advertising to ensure that it is presented in a manner that is not confusing or deceptive to consumers.

Any failure on our part to comply with applicable laws may subject us to additional liabilities, which could adversely affect our business, financial condition and results of operations. In addition, if the laws to which we are currently subject are amended or interpreted adversely to our interests, or if new adverse laws are adopted, our products and services might need to be modified to comply with such laws, which would increase our costs and could result in decreased demand for our products and services to the extent that we pass on such costs to our customers.

Specifically, in the case of tax laws, positions that we have taken or will take are subject to interpretation by the relevant taxing authorities. While we believe that the positions we have taken to date comply with applicable law, there can be no assurances that the relevant taxing authorities will not take a contrary position, and if so, that such positions will not adversely affect us. Any events of this nature could adversely affect our business, financial condition and results of operations.

We may fail to adequately protect our intellectual property rights or may be accused of infringing the intellectual property rights of third parties.

We regard our intellectual property rights, including trademarks, domain names, trade secrets, patents, copyrights and other similar intellectual property, as critical to our success. For example, the businesses within certain of our reporting segments (Search & Applications, The Match Group and eCommerce) rely heavily upon their trademarks (primarily Ask.com,

Table of Contents

About.com, Dictionary.com, Investopedia, PriceRunner, Ask.fm, our various toolbar brands, SlimWare, Match.com, OkCupid.com, OurTime.com, Meetic.com, HomeAdvisor.com and ShoeBuy.com and related domain names and logos), through which they market their products and services and seek to build and maintain brand loyalty and recognition. So long as these businesses continue to police unauthorized use of these trademarks and take action against infringement, use these trademarks to identify their products and services and timely renew trademark and related domain name registrations as required, they should continue to enjoy trademark protection indefinitely under current laws, rules and regulations.

The businesses within our Search & Applications segment also rely upon trade secrets, including algorithms for the generation, organization and presentation of search results. To a lesser extent, these businesses also rely upon patented and patent pending proprietary technologies and processes, primarily those relating to search related products and services, with expiration dates for patented technologies ranging from 2017 to 2033, and copyrighted material, primarily software and content, such as emoticons, characters and other content that is incorporated into (and used in connection with the marketing of) toolbars and applications generally.

The Match Group segment also relies upon trade secrets and patented (with expiration dates ranging from 2025 to 2034) and patent pending proprietary technologies relating to matching process systems and related features, products and services. HomeAdvisor relies heavily upon trade secrets, primarily the matching algorithm through which members of its network of home services professionals are matched with consumers, as well as related patented proprietary technologies that expire in 2020.

We rely on a combination of laws and contractual restrictions with employees, customers, suppliers, affiliates and others to establish and protect our various intellectual property rights. For example, we have generally registered and continue to apply to register and renew, or secure by contract where appropriate, trademarks and service marks as they are developed and used, and reserve, register and renew domain names as we deem appropriate. Effective trademark protection may not be available or may not be sought in every country in which products and services are made available and contractual disputes may affect the use of marks governed by private contract. Similarly, not every variation of a domain name may be available or be registered, even if available.

We also generally seek to apply for patents or for other similar statutory protections as and if we deem appropriate, based on then current facts and circumstances, and will continue to do so in the future. No assurances can be given that any patent application we have filed (or will file) will result in a patent being issued, or that any existing or future patents will afford adequate protection against competitors and similar technologies. In addition, no assurances can be given that third parties will not create new products or methods that achieve similar results without infringing upon patents we own.

Despite these measures, our intellectual property rights may still not be protected in a meaningful manner, challenges to contractual rights could arise or third parties could copy or otherwise obtain and use our intellectual property without authorization. The occurrence of any of these events could result in the erosion of our brands and limitations on our ability to control marketing on or through the Internet using our various domain names, as well as impede our ability to effectively compete against competitors with similar technologies, any of which could adversely affect our business, financial condition and results of operations.

From time to time, we have been subject to legal proceedings and claims in the ordinary course of business, including claims of alleged infringement of trademarks, copyrights, patents and other intellectual property rights held by third parties. In addition, litigation may be necessary in the future to enforce our intellectual property rights, protect our trade secrets or to determine the validity and scope of proprietary rights claimed by others. Any litigation of this nature, regardless of outcome or merit, could result in substantial costs and diversion of management and technical resources, any of which could adversely affect our business, financial condition and results of operations. Patent litigation tends to be particularly protracted and expensive.

Our success depends, in part, on the integrity of our systems and infrastructures and those of third parties. System interruptions and the lack of integration and redundancy in our and third party information systems may affect our business.

To succeed, our systems and infrastructures must perform well on a consistent basis. From time to time, we may experience occasional system interruptions that make some or all of our systems or data unavailable or that prevent us

from providing products and services. Moreover, as traffic to our websites, applications and online properties increases and the number of new (and presumably more complex) products and services that we introduce continues to grow, we will need to upgrade our systems, infrastructures and technologies generally to facilitate this growth. If we fail to do so, users, customers and third parties with whom we do business may not be able to access our products and services on an intermittent or

Table of Contents

prolonged basis, which could adversely affect the quality of their experiences. In addition, we could experience inefficiencies and/or operational failures in connection with these efforts, which could have the same effect. Moreover, even if we do not experience inefficiencies and/or operational failures in connection with these efforts, third parties with whom we do business (or upon whom we otherwise rely in connection with our day to day operations) may not make the changes to their systems, infrastructures and technologies needed to access our products and services on a timely basis, if at all. The occurrence of any of these events could adversely affect our business, financial condition and results of operations.

We also rely on third party computer systems, data centers, broadband and other communications systems and service providers in connection with the provision of our products and services generally, as well as to facilitate and process certain transactions with our users and customers. Any interruptions, outages or delays in our systems or those of our third party providers, or deterioration in the performance of these systems, could impair our ability to provide our products and services and/or process certain transactions with users and customers. Furthermore, fire, power loss, telecommunications failure, natural disasters, acts of war or terrorism, acts of God and other similar events or disruptions may damage or interrupt computer, data, broadband or other communications systems at any time. Any event of this nature could cause system interruptions, delays and loss of critical data, and could prevent us from providing services to users and customers. While we have backup systems in place for certain aspects of our operations, our systems are not fully redundant and disaster recovery planning is not sufficient for all eventualities. In addition, we may not have adequate insurance coverage to compensate for losses from a major interruption. If any of these events were to occur, it could damage our reputation and result in the loss of current and potential users and customers, which could have an adverse effect on our business, financial condition and results of operations and otherwise be costly to remedy.

Our estimated income taxes could be materially different from income taxes that we ultimately pay.

We are subject to income taxes in both the United States and numerous jurisdictions abroad. Significant judgment and estimation is required in determining our provision for income taxes and related matters. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determinations are uncertain or otherwise subject to interpretation. Our determination of our income tax liability is always subject to review by applicable tax authorities and we are currently subject to audits in a number of jurisdictions. Although we believe our income tax estimates and related determinations are reasonable and appropriate, relevant taxing authorities may disagree. The ultimate outcome of any such audits and reviews could be materially different from estimates and determinations reflected in our historical income tax provisions and accruals. Any adverse outcome of any such audit or review could have an adverse effect on our financial condition and results of operations.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

IAC believes that the facilities for its management and operations are generally adequate for its current and near-term future needs. IAC's facilities, most of which are leased by IAC's businesses in various cities and locations in the United States and various jurisdictions abroad, generally consist of executive and administrative offices, operations centers, data centers and sales offices.

All of IAC's leases are at prevailing market rates. IAC believes that the duration of each lease is adequate. IAC believes that its principal properties, whether owned or leased, are currently adequate for the purposes for which they are used and are suitably maintained for these purposes. IAC does not anticipate any future problems renewing or obtaining suitable leases for any of its principal properties. IAC's approximately 202,500 square foot corporate headquarters in New York, New York houses offices for IAC corporate and various IAC businesses within the following segments: Search & Applications, The Match Group and Media. For a discussion regarding the financing of (and related mortgage interest in) IAC's corporate headquarters, see "Item 8-Consolidated Financial Statements and Supplementary Data-Note 8."

Table of Contents

Item 3. Legal Proceedings

In the ordinary course of business, the Company and its subsidiaries are parties to litigation involving property, personal injury, contract, intellectual property and other claims. The amounts that may be recovered in such matters may be subject to insurance coverage.

Rules of the Securities and Exchange Commission require the description of material pending legal proceedings (other than ordinary, routine litigation incidental to the registrant's business) to which the registrant or any of its subsidiaries is a party or to which any of their property is subject and advise that proceedings ordinarily need not be described if they primarily involve claims for damages for amounts (exclusive of interest and costs) not exceeding 10% of the current assets of the registrant and its subsidiaries on a consolidated basis. In the judgment of Company management, none of the pending litigation matters which the Company and its subsidiaries are defending involves (or is likely to involve) amounts of that magnitude, nor do such matters involve issues or claims that may be of particular interest to the Company's shareholders.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market for Registrant's Common Equity and Related Stockholder Matters

IAC common stock is quoted on The Nasdaq Stock Market, or "NASDAQ," under the ticker symbol "IACI." There is no established public trading market for IAC Class B common stock. The table below sets forth, for the calendar periods indicated, the high and low sales prices per share for IAC common stock as reported on NASDAQ.

	High	Low
Year Ended December 31, 2014		
Fourth Quarter	\$68.40	\$56.50
Third Quarter	73.93	63.00
Second Quarter	73.27	61.00
First Quarter	80.64	64.45
Year Ended December 31, 2013		
Fourth Quarter	\$70.44	\$50.14
Third Quarter	54.71	46.48
Second Quarter	52.27	43.30
First Quarter	48.73	38.20

As of February 23, 2015, there were approximately 1,600 holders of record of the Company's common stock and the closing price of IAC common stock on NASDAQ was \$67.22. Because the substantial majority of the outstanding shares of IAC common stock are held by brokers and other institutions on behalf of shareholders, IAC is not able to estimate the total number of beneficial shareholders represented by these record holders. As of February 23, 2015, there was one holder of record of the Company's Class B common stock.

In 2013, IAC's Board of Directors declared four quarterly cash dividends, all of which were \$0.24 per share of common and Class B common stock outstanding. In 2014, IAC's Board of Directors declared four quarterly cash dividends, two of which were \$0.24 per share of common and Class B common stock outstanding and two of which were \$0.34 per share of common and Class B common stock outstanding.

On February 3, 2015, IAC's Board of Directors declared a quarterly cash dividend of \$0.34 per share of common and Class B common stock outstanding, which is payable on March 1, 2015 to stockholders of record as of the close of business on February 15, 2015. While we currently expect that comparable cash dividends will continue to be paid in the near future, any future cash or other dividend declarations are subject to the determination of IAC's Board of Directors.

During the quarter ended December 31, 2014, the Company did not issue or sell any shares of its common stock or other equity securities pursuant to unregistered transactions.

Issuer Repurchases of Equity Securities

The Company did not purchase any shares of its common stock during the quarter ended December 31, 2014. As of that date, approximately 8.6 million shares of common stock remained available for repurchase under the Company's previously announced April 2013 repurchase authorization. IAC may purchase shares pursuant to this repurchase authorization over an indefinite period in the open market and in privately negotiated transactions, depending on those factors IAC management deems relevant at any particular time, including, without limitation, market conditions, share price and future outlook.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

MANAGEMENT OVERVIEW

IAC is a leading media and Internet company. The Company is organized into four segments: The Match Group, which consists of dating, education and fitness businesses with brands such as Match, OkCupid, Tinder, The Princeton Review and DailyBurn; Search & Applications, which includes brands such as About.com, Ask.com, Dictionary.com and Investopedia; Media, which includes businesses such as Vimeo, Electus, The Daily Beast and CollegeHumor; and eCommerce, which includes HomeAdvisor and ShoeBuy. IAC's brands and products are among the most recognized in the world, reaching users in over 200 countries.

Sources of Revenue

Substantially all of the revenue from our Search & Applications segment is derived from online advertising. This revenue is primarily attributable to our services agreement with Google Inc. ("Google"), which expires on March 31, 2016. Our services agreement requires that we comply with certain guidelines promulgated by Google. Subject to certain limitations, Google may unilaterally update its policies and guidelines, which could require modification to, or prohibit and/or render obsolete certain of our products, services and/or business practices, which could be costly to address or otherwise have an adverse effect on our business, financial condition and results of operations. For the years ended December 31, 2014, 2013 and 2012, revenue earned from Google was \$1.4 billion, \$1.5 billion and \$1.4 billion, respectively.

The revenue earned from The Match Group segment is derived from dating and non-dating services. Dating revenue is principally earned from subscription fees for our subscription-based online personals and related services; with additional revenue generated from online advertising. Non-dating revenue is primarily earned from fees received for in-person and online test preparation classes, access to online test preparation materials and individual tutoring services. The revenue earned by our Media segment is derived from media production, subscriptions and advertising. HomeAdvisor's revenue is derived primarily from fees paid by members of its network of home services professionals for consumer leads and subscription sales to service professionals. ShoeBuy's revenue is derived principally from merchandise sales.

Strategic Partnerships, Advertiser Relationships and Online Advertising

A significant component of the Company's revenue is attributable to the services agreement with Google described above. We market and offer our products and services directly to consumers through branded websites and subscriptions, allowing consumers to transact directly with us in a convenient manner. We have made, and expect to continue to make, substantial investments in online and offline advertising to build our brands and drive traffic to our websites and consumers and advertisers to our businesses.

We pay traffic acquisition costs, which consist of payments to partners who distribute our B2B customized browser-based applications, integrate our paid listings into their websites or direct traffic to our websites. We also pay to market and distribute our services on third-party distribution channels, such as search engines and internet portals. In addition, some of our businesses manage affiliate programs, pursuant to which we pay commissions and fees to third parties based on revenue earned. These distribution channels might also offer their own products and services, as well as those of other third parties, which compete with those we offer.

The cost of acquiring new consumers through online and offline third-party distribution channels has increased, particularly in the case of online channels as internet commerce continues to grow and competition in the markets in which IAC's businesses operate increases.

Factors Affecting Results

In 2014, we delivered 3% revenue growth; however, Adjusted EBITDA and operating income declined 9% and 11%, respectively. Revenue growth was primarily driven by The Match Group segment, while the declines in Adjusted EBITDA and operating income were primarily driven by the Search & Applications and Media segments. Revenue from The Match Group segment benefited from increased subscribers and the contributions from The Princeton Review, which was acquired August 1, 2014, and FriendScout24, which was acquired August 31, 2014. The results of our Search & Applications segment were negatively impacted by decreased revenue from our Applications business, which was principally due to lower queries from our B2B operations. The Search & Applications Adjusted EBITDA was negatively impacted by the loss from SlimWare, which was acquired April 1, 2014, due to the write-off of

\$11.0 million of deferred revenue in connection with its acquisition, partially offset by the positive contribution of ValueClick's "Owned & Operated" ("O&O") website businesses, which was acquired January 10, 2014. Within the Media segment, additional investment in Vimeo increased its revenue and losses; this revenue increase was more than offset by the lower revenue and increased losses at The Daily Beast following its sale of Newsweek in August 2013, which generated a \$6.3 million gain.

Other events affecting year-over-year comparability include:

24

Table of Contents

- (i) a \$3.9 million benefit in 2014 related to the expiration of the statute of limitations for a non-income tax matter (reflected in The Match Group segment);
- (ii) the sale of the Rezbook assets in July 2013, which resulted in a gain of \$8.4 million (reflected in the eCommerce segment);
- (iii) the move of CityGrid from the eCommerce segment to the Search & Applications segment, effective July 1, 2013, following its reorganization; and
- (iv) \$4.2 million in employee termination costs associated with the CityGrid restructuring in 2013 (reflected in the eCommerce segment).

Results of Operations for the Years Ended December 31, 2014, 2013 and 2012

Revenue

	Years Ended December 31,			2013			2012		
	2014	\$ Change	% Change	2013	\$ Change	% Change	2012	\$ Change	% Change
	(Dollars in thousands)								
Search & Applications	\$ 1,596,251	\$(8,699)	(1)%	\$ 1,604,950	\$ 139,155	9%	\$ 1,465,795		
The Match Group	897,245	91,855	11%	805,390	91,168	13%	714,222		
Media	181,780	(9,654)	(5)%	191,434	27,383	17%	164,051		
eCommerce	435,361	13,295	3%	422,066	(35,116)	(8)%	457,182		
Inter-segment elimination	(1,090)	(237)	(28)%	(853)	(536)	(170)%	(317)		
Total	\$ 3,109,547	\$ 86,560	3%	\$ 3,022,987	\$ 222,054	8%	\$ 2,800,933		

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Search & Applications revenue decreased 1% to \$1.6 billion reflecting a decline from Applications (which includes our direct-to-consumer downloadable applications operations (B2C), our partnership operations (B2B), SlimWare and Apalon), partially offset by an increase from Websites (which is principally composed of Ask.com, About.com, CityGrid, Dictionary.com, Investopedia, PriceRunner.com and Ask.fm). Applications revenue decreased 7% to \$760.5 million, despite strong query growth from our B2C operations and the contribution of SlimWare, which was acquired on April 1, 2014, primarily due to lower queries from our B2B operations. Websites revenue grew 6% to \$835.8 million driven by the acquisition of the ValueClick O&O website businesses on January 10, 2014, growth from About.com and the contribution of CityGrid, which had been moved from the eCommerce segment to the Search & Applications segment, effective July 1, 2013, following its reorganization, partially offset by a decline in revenue from Ask.com.

The Match Group revenue increased 11% to \$897.2 million driven by a 6% increase in Dating revenue. Dating North America revenue (which includes Match, Chemistry, People Media, OkCupid, Tinder and other dating businesses operating within the United States and Canada) and Dating International revenue (which includes Meetic, Tinder and all other dating businesses operating outside of the United States and Canada) both increased 6% to \$557.2 million and \$279.3 million, respectively. These businesses are collectively referred to as "Dating." The growth in Dating revenue was driven by increased paid subscribers. North America and International paid subscribers increased 5% and 4%, respectively. Non-dating revenue (consisting of The Princeton Review, Tutor.com and DailyBurn) increased 254% principally due to the contribution of The Princeton Review, which was acquired on August 1, 2014.

Media revenue decreased 5% to \$181.8 million primarily due to the impact of the closure of the Newsweek print business and sale of the Newsweek digital business in August 2013 and declines at Electus, partially offset by strong growth at Vimeo and the contribution in the current year of \$11.3 million from IAC Films.

eCommerce revenue increased 3% to \$435.4 million due to growth at HomeAdvisor and ShoeBuy, partially offset by the move of CityGrid described above. The increase in revenue from HomeAdvisor is driven by an increase in domestic service requests and accepts of 13% and 9%, respectively.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

Search & Applications revenue increased 9% to \$1.6 billion, reflecting strong growth from Websites and Applications. Websites revenue grew 11% to \$786.9 million, reflecting the contribution from The About Group, acquired

Table of Contents

September 24, 2012, and CityGrid, following its move from the eCommerce segment to the Search & Applications segment. The About Group revenue increased \$108.4 million to \$138.6 million in 2013, as it was not in the full prior year period. Applications revenue grew 8% to \$818.0 million, driven by increased contributions from existing and new B2C products.

The Match Group revenue increased 13% to \$805.4 million driven by a 10% increase in Dating revenue. Dating North America and Dating International revenue increased 10% to \$523.7 million and 12% to \$264.5 million, respectively. The growth in Dating revenue was driven by increased paid subscribers. North America and International paid subscribers increased 18% and 23%, respectively. International revenue also benefited from the contribution of Twoo, which was acquired January 4, 2013. International revenue in 2012 was negatively impacted by the write-off of \$5.2 million of deferred revenue in connection with the acquisition of Meetic. Non-dating revenue increased to \$17.2 million due primarily to the contribution from Tutor.com, an online tutoring solution acquired December 14, 2012. Media revenue increased 17% to \$191.4 million primarily due to strong growth from Electus and Vimeo. eCommerce revenue decreased 8% to \$422.1 million due to the move of CityGrid described above, partially offset by increased sales at HomeAdvisor and ShoeBuy.

Cost of revenue

	Years Ended December 31,						
	2014	\$ Change	% Change	2013	\$ Change	% Change	2012
	(Dollars in thousands)						
Cost of revenue	\$883,176	\$(120,545)	(12)%	\$1,003,721	\$12,033	1%	\$991,688
As a percentage of revenue	28%			33%			35%

Cost of revenue consists primarily of traffic acquisition costs and includes payments made to partners who distribute our B2B customized browser-based applications, integrate our paid listings into their websites or direct traffic to our websites. These payments include amounts based on revenue share and other arrangements. Cost of revenue also includes ShoeBuy's cost of products sold and shipping and handling costs, production costs related to media produced by Electus and other businesses within our Media segment, content acquisition costs, expenses associated with the operation of the Company's data centers, including compensation (including stock-based compensation) and other employee-related costs for personnel engaged in data center functions, rent, energy and hosting fees.

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Cost of revenue in 2014 decreased from 2013 primarily due to decreases of \$135.3 million from Search & Applications and \$12.3 million from eCommerce, partially offset by an increase of \$32.9 million from The Match Group. The Search & Applications decrease was primarily due to a reduction of \$154.5 million in traffic acquisition costs driven primarily by lower revenue from our B2B operations, partially offset by the acquisition of the ValueClick O&O website businesses and the move of CityGrid from the eCommerce segment to the Search & Applications segment. The eCommerce decrease was primarily due to the move of CityGrid, partially offset by an increase in the cost of products sold at ShoeBuy resulting from increased sales. The Match Group increase was primarily due to the acquisition of The Princeton Review and increases in revenue share payments made in connection with in-app purchases sold through Dating's mobile products and hosting fees. As a percentage of revenue, cost of revenue in 2014 decreased from 2013 primarily due to an increase in the proportion of Websites revenue that resulted from increased online marketing due to the acquisition of the ValueClick O&O website businesses and strong growth from About.com.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

Cost of revenue in 2013 increased from 2012 primarily due to increases of \$12.7 million from The Match Group and \$10.1 million from Search & Applications, partially offset by a decrease of \$8.4 million from eCommerce. The Match Group increase is primarily due to various acquisitions at Dating and an increase in content acquisition costs from Tutor.com, which was acquired December 14, 2012. The Search & Applications increase was primarily due to an increase in content acquisition costs resulting from the acquisition of The About Group and the move of CityGrid from the eCommerce segment to the Search & Applications segment, partially offset by a decrease of \$7.7 million in

traffic acquisition costs driven primarily by decreased revenue from Ask.com. The eCommerce decrease was primarily due to the move of CityGrid, partially offset by increases in revenue share payments at HomeAdvisor and cost of products sold at ShoeBuy resulting from increased sales. As a percentage of revenue, cost of revenue in 2013 decreased from 2012 primarily due to the transition of Newsweek from a print business to a digital only publication in December 2012 (which was subsequently sold in August 2013) and a decrease in traffic acquisition costs due to an increase in the proportion of Websites revenue that resulted from increased online marketing.

Table of Contents

Selling and marketing expense

	Years Ended December 31,						2012
	2014	\$ Change	% Change	2013	\$ Change	% Change	
	(Dollars in thousands)						
Selling and marketing expense	\$1,124,437	\$168,027	18%	\$956,410	\$61,972	7%	\$894,438
As a percentage of revenue	36%			32%			32%

Selling and marketing expense consists primarily of advertising expenditures and compensation (including stock-based compensation) and other employee-related costs for personnel engaged in sales, sales support and customer service functions. Advertising expenditures include online marketing, including fees paid to search engines and third parties that distribute our B2C downloadable applications, and offline marketing, which is primarily television advertising.

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Selling and marketing expense in 2014 increased from 2013 due to increases of \$116.4 million from Search & Applications, \$24.0 million from The Match Group, \$19.2 million from eCommerce and \$8.9 million from Media. The Search & Applications increase was primarily due to a \$111.5 million increase in online marketing, which was primarily related to our B2C downloadable applications, About.com and the acquisitions of the ValueClick O&O website businesses and SlimWare in 2014. Search & Applications was also impacted by an increase in compensation due, in part, to recent acquisitions. The Match Group increase was primarily due to an increase of \$20.2 million in offline and online marketing and the acquisition of The Princeton Review. The eCommerce increase was primarily due to increases of \$14.0 million in offline and online marketing principally related to HomeAdvisor and \$6.9 million in compensation due, in part, to an increase in headcount at HomeAdvisor. The Media increase was primarily due to an increase in both online and offline marketing at Vimeo. Search & Applications and eCommerce were also impacted by the move of CityGrid from the eCommerce segment to the Search & Applications segment. As a percentage of revenue, selling and marketing expense in 2014 increased from 2013 primarily due to an increase in online marketing at Search & Applications as a result of the acquisition of the ValueClick O&O website businesses.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

Selling and marketing expense in 2013 increased from 2012 due to increases of \$42.7 million from Search & Applications, \$21.2 million from The Match Group and \$6.8 million from Media, partially offset by a decrease of \$7.1 million from eCommerce. The Search & Applications increase is primarily due to increases of \$28.3 million and \$11.2 million in online marketing and compensation, respectively. The increase in online marketing was primarily related to B2C downloadable applications and the inclusion of The About Group beginning September 24, 2012. The Match Group increase was primarily due to increases of \$14.3 million in advertising expenditures and \$5.6 million in compensation. The increase in advertising expenditures was primarily due to an increase in television advertising. The increase in compensation was primarily due to an increase in headcount at Meetic and various acquisitions. The Media increase was primarily due to an increase of \$5.7 million in online marketing at Vimeo. The eCommerce decrease was primarily due to the move of CityGrid to the Search & Applications segment, partially offset by an increase of \$4.0 million in online and offline marketing at HomeAdvisor.

General and administrative expense

	Years Ended December 31,						2012
	2014	\$ Change	% Change	2013	\$ Change	% Change	
	(Dollars in thousands)						
General and administrative expense	\$443,610	\$65,468	17%	\$378,142	\$(8,319)	(2)%	\$386,461
As a percentage of revenue	14%			13%			14%

General and administrative expense consists primarily of compensation (including stock-based compensation) and other employee-related costs for personnel engaged in executive management, finance, legal, tax and human resources, facilities costs and fees for professional services.

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Table of Contents

General and administrative expense in 2014 increased from 2013 due to increases of \$21.2 million from Search & Applications, \$15.8 million from The Match Group, \$11.9 million from eCommerce, \$10.4 million from Corporate, and \$6.1 million from Media. The Search & Applications increase was primarily due to recent acquisitions, the most significant being the ValueClick O&O website businesses, and increases in compensation and professional fees. The increase in professional fees was primarily due to transaction fees related to various acquisitions made in 2014. The Match Group increase was primarily due to the acquisition of The Princeton Review and an increase in compensation, partially offset by a decrease of \$13.3 million in acquisition-related contingent consideration fair value adjustments. The increase in compensation was primarily due to an increase in headcount due, in part, to recent acquisitions. The eCommerce increase was primarily due to the inclusion in the prior year of an \$8.4 million gain on the sale of Rezbook assets in July 2013 and an increase in compensation at HomeAdvisor and ShoeBuy, partially offset by \$4.2 million in employee termination costs in the prior year associated with the CityGrid restructuring. The Corporate increase was primarily due to increases in compensation and professional fees. The increase in compensation was primarily due to a \$7.5 million increase in non-cash compensation expense related to the issuance of equity awards since the prior year. The Media increase was primarily due to the inclusion of a \$6.3 million gain related to the sale of Newsweek in August 2013.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

General and administrative expense in 2013 decreased from 2012 due to decreases of \$25.3 million from Corporate, \$9.4 million from eCommerce and \$6.4 million from Media, partially offset by increases of \$20.4 million from The Match Group and \$12.4 million from Search & Applications. The Corporate decrease was primarily due to a decrease of \$25.5 million in non-cash compensation expense related primarily to the vesting of certain awards and an increase in the number of awards forfeited as compared to the prior year. The eCommerce decrease was primarily due to the inclusion of an \$8.4 million gain on the sale of the Rezbook assets in July 2013. The Media decrease was primarily due to \$7.0 million in restructuring costs in 2012 related to the transition of Newsweek to a digital only publication and a \$6.3 million gain related to the subsequent sale of Newsweek in August 2013, partially offset by an increase in compensation related to the growth in Vimeo. The Match Group increase was primarily due to various acquisitions, an increase in compensation of \$5.6 million at Dating, resulting from an increase in headcount, and an increase in professional fees due primarily to transaction fees related to the purchase of the remaining publicly-traded shares of Meetic ("Meetic tender offer"). The Search & Applications increase was primarily due to the inclusion of The About Group beginning September 24, 2012.

Product development expense

	Years Ended December 31,						2012
	2014	\$ Change	% Change	2013	\$ Change	% Change	
	(Dollars in thousands)						
Product development expense	\$160,515	\$20,756	15%	\$139,759	\$23,233	20%	\$116,526
As a percentage of revenue	5%			5%			4%

Product development expense consists primarily of compensation (including stock-based compensation) and other employee-related costs that are not capitalized for personnel engaged in the design, development, testing and enhancement of product offerings and related technology.

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Product development expense in 2014 increased from 2013 primarily due to increases of \$13.2 million from Search & Applications and \$6.7 million from The Match Group. The Search & Applications increase is primarily related to the acquisition of the ValueClick O&O website businesses and an increase in compensation at Websites primarily due to increased headcount. The Match Group increase is primarily related to an increase in compensation driven primarily by increased headcount at Tinder and Tutor.com.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

Product development expense in 2013 increased from 2012 primarily due to increases of \$16.3 million from Search & Applications, \$5.3 million from The Match Group and \$4.4 million from Media. The Search & Applications increase is primarily due to an increase in compensation associated with the inclusion of The About Group beginning September 24, 2012, and an increase in headcount related to B2C products. The Match Group increase is primarily due to various acquisitions. The Media increase is primarily due to The Daily Beast, consolidated June 1, 2012.

Refer to Note 13 to the consolidated financial statements for reconciliations of Adjusted EBITDA to operating income (loss) by reportable segment.

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Search & Applications Adjusted EBITDA decreased 6% to \$362.0 million, primarily due to the lower revenue noted above, increases in selling and marketing expense and general and administrative expense and losses related to the acquisition of SlimWare, partially offset by the move of CityGrid from the eCommerce segment to the Search & Applications segment, a decrease in cost of revenue and the contribution from the acquisition of the ValueClick O&O website businesses. The loss from SlimWare was due to the write-off of \$11.0 million of deferred revenue in connection with its acquisition on April 1, 2014. The increase in selling and marketing expense was primarily due to an increase in online marketing related to our B2C downloadable applications and About.com. The increase in general and administrative expense was primarily due to increases in compensation and professional fees. The decrease in cost of revenue was primarily due to a decrease in traffic acquisition costs driven from lower revenue from our B2B operations.

The Match Group Adjusted EBITDA decreased 1% to \$264.7 million despite higher revenue noted above, primarily due to losses related to The Princeton Review and FriendScout24 acquisitions and higher cost of revenue, selling and marketing expense and general and administrative expense. The losses from The Princeton Review and FriendScout24 were due to the write-off of \$11.8 million of deferred revenue in connection with these acquisitions. The increase in cost of revenue was primarily due to increases in revenue share payments made in connection with in-app purchases sold through Dating's mobile products and hosting fees. The increase in selling and marketing expense was primarily

due to an increase in offline and online marketing. The increase in general and administrative expense was primarily due to an increase in compensation, partially

Table of Contents

offset by a \$3.9 million benefit recorded in the first quarter of 2014 related to the expiration of the statute of limitations for a non-income tax matter.

Media Adjusted EBITDA loss increased 116% to a loss of \$36.7 million primarily due to increased investment in Vimeo, the inclusion in the prior year of a \$6.3 million gain related to the sale of Newsweek in August 2013 and losses at IAC Films, partially offset by lower losses at Electus.

eCommerce Adjusted EBITDA decreased 25% to \$17.3 million primarily due to the prior year benefiting from an \$8.4 million gain on the sale of Rezbook assets in July 2013 and the move of CityGrid to the Search & Applications segment, partially offset by \$4.2 million in employee termination costs in 2013 associated with the CityGrid restructuring.

Corporate Adjusted EBITDA loss increased 5% to a loss of \$63.3 million primarily due to higher professional fees. For the year ended December 31, 2013 compared to the year ended December 31, 2012

Search & Applications Adjusted EBITDA increased 18% to \$385.9 million, due to the higher revenue noted above, partially offset by increases of \$42.7 million in selling and marketing expense, \$16.3 million in product development expense, \$12.4 million in general and administrative expense and \$10.1 million in cost of revenue. The increase in selling and marketing expense was primarily due to B2C downloadable applications and the inclusion of The About Group, beginning September 24, 2012. The increase in both product development expense and general and administrative expense was primarily due to an increase in compensation related to the inclusion of The About Group. Product development expense was also impacted by an increase in headcount related to B2C products. The increase in costs of revenue was primarily due to an increase in content acquisition costs resulting from the acquisition of The About Group and the inclusion of CityGrid in the Search & Applications segment, partially offset by a decrease of \$7.7 million in traffic acquisition costs driven primarily by decreased revenue from Ask.com.

The Match Group Adjusted EBITDA increased 13% to \$266.9 million, due to the revenue growth noted above, partially offset by increases of \$21.2 million in selling and marketing expense, \$20.4 million in general and administrative expense, \$12.7 million in cost of revenue and \$5.3 million in product development expense. The increase in selling and marketing expense was primarily due to increases in television advertising and compensation due, in part, to an increase in headcount at Meetic and various acquisitions. The increases in general and administrative expense, cost of revenue and product development expense were primarily due to various acquisitions. General and administrative expense was also impacted by an increase in compensation of \$5.6 million at Dating, resulting from an increase in headcount and higher professional fees primarily due to transaction fees related to the Meetic tender offer.

Media Adjusted EBITDA loss decreased 56% to a loss of \$17.0 million primarily due to the closure of the Newsweek print business and the inclusion of a \$6.3 million gain related to the sale of Newsweek in August 2013.

eCommerce Adjusted EBITDA decreased 27% to \$22.9 million reflecting the move of CityGrid to the Search & Applications segment and \$4.2 million in employee termination costs associated with the CityGrid reorganization that took place in the second quarter of 2013. Partially offsetting the decrease in Adjusted EBITDA was the inclusion of an \$8.4 million gain on the sale of the Rezbook assets in July 2013.

 NM = not meaningful

For the year ended December 31, 2014 compared to the year ended December 31, 2013

Operating income in 2014 decreased from 2013 due to the decrease of \$54.2 million in Adjusted EBITDA described above and increases of \$6.6 million in non-cash compensation expense and \$2.2 million in depreciation, partially offset by decreases of \$13.7 million in acquisition-related contingent consideration fair value adjustments and \$1.9 million in amortization of intangibles. The increase in non-cash compensation expense was primarily due to the issuance of equity awards since the prior year. The decrease in acquisition-related contingent consideration fair value adjustments was principally related to changes in Twoo's forecast of earnings and operating metrics. The decrease in amortization of intangibles was primarily related to lower amortization expense at Dating due to certain intangible assets becoming fully amortized, and the inclusion in the prior year of a \$3.4 million impairment charge associated with an indefinite-lived intangible asset related to the CityGrid restructuring, partially offset by amortization of intangibles related to recent acquisitions.

At December 31, 2014, there was \$113.2 million of unrecognized compensation cost, net of estimated forfeitures, related to all equity-based awards, which is expected to be recognized over a weighted average period of approximately 2.4 years.

For the year ended December 31, 2013 compared to the year ended December 31, 2012

Operating income in 2013 increased from 2012 due to the increase of \$100.9 million in Adjusted EBITDA described above and a decrease of \$32.6 million in non-cash compensation expense, partially offset by increases of \$24.1 million in amortization of intangibles and \$6.4 million in depreciation. The decrease in non-cash compensation expense was primarily a result of the vesting of certain awards and an increase in the number of awards forfeited as compared to the prior year. The increase in amortization of intangibles was primarily related to the acquisition of The About Group and a \$3.4 million impairment charge associated with an indefinite-lived intangible asset related to the CityGrid restructuring in the second quarter of 2013.

Equity in losses of unconsolidated affiliates

	Years Ended December 31,						
	2014	\$ Change	% Change	2013	\$ Change	% Change	2012
	(Dollars in thousands)						
Equity in losses of unconsolidated affiliates	\$(9,697)	\$(3,082)	(47)%	\$(6,615)	\$18,730	74%	\$(25,345)

Equity in losses of unconsolidated affiliates in 2014 increased from 2013 primarily due to the inclusion in the second quarter of 2014 of a \$4.2 million other-than-temporary impairment charge on one of our investments following the sale of a majority of the investee's assets, partially offset by reduced losses associated with our equity method investments.

Equity in losses of unconsolidated affiliates in 2013 decreased from 2012 due to the inclusion in 2012 of a non-cash charge of \$18.6 million related to the re-measurement of the carrying value of our equity method investment in The Daily Beast to fair value in connection with our acquisition of a controlling interest.

	2014	\$ Change	% Change	2013	\$ Change	% Change	2012
	(Dollars in thousands)						
Other (expense) income, net	\$(42,787)	\$(73,096)	NM	\$30,309	\$33,321	NM	\$(3,012)

Other expense, net in 2014 includes \$66.6 million in other-than-temporary impairment charges related to certain cost method investments as a result of our assessment of the near-term prospects and financial condition of the investees, partially offset by a \$19.4 million gain related to the sale of Urbanspoon and \$3.6 million in gains related to the sale of several long-term investments.

Other income, net in 2013 includes \$35.9 million in gains related to the sale of long-term investments, partially offset by a \$5.0 million other-than-temporary impairment charge related to a cost method investment.

Other expense, net in 2012 includes an \$8.7 million other-than-temporary impairment charge related to a long-term marketable equity security as a result of the Company's assessment of the near-term prospects of the issuer in relation to the severity and duration of its unrealized loss. Partially offsetting the impairment charge is \$3.5 million in interest income and a \$3.3 million gain related to the sale of certain marketable equity securities.

Income tax provision

	Years Ended December 31,						
	2014	\$ Change	% Change	2013	\$ Change	% Change	2012
	(Dollars in thousands)						
Income tax provision	\$(35,372)	NM	NM	\$(134,502)	NM	NM	\$(119,215)

In 2014, the Company recorded an income tax provision for continuing operations of \$35.4 million, which represents an effective income tax rate of 13%. The effective rate is lower than the statutory rate of 35% due principally to a reduction in tax reserves and related interest due to the expiration of statutes of limitations for federal income taxes for 2001 through 2009 of \$88.2 million and foreign income taxed at lower rates, partially offset by the largely unbenefited loss associated with the write-downs of certain of the Company's investments and non-deductible goodwill associated with the sale of Urbanspoon. In 2013, the Company recorded an income tax provision for continuing operations of \$134.5 million, which represents an effective income tax rate of 32%. The effective rate is lower than the statutory rate of 35% due primarily to foreign income taxed at lower rates. In 2012, the Company recorded an income tax provision for continuing operations of \$119.2 million, which represents an effective income tax rate of 41%. The effective rate is higher than the statutory rate of 35% due primarily to an increase in reserves for and interest on reserves for income tax contingencies, a valuation allowance on the deferred tax asset created by an other-than-temporary impairment charge and state taxes, partially offset by foreign income taxed at lower rates. The Company recognizes interest and, if applicable, penalties related to unrecognized tax benefits in the income tax provision. Included in the income tax provision for continuing operations and discontinued operations for the year ended December 31, 2014 is a \$58.5 million and a \$19.7 million benefit, respectively, net of related deferred taxes, from the decrease in interest on unrecognized tax benefits as a result of the expiration of statutes of limitations

described above. Included in the

32

Table of Contents

income tax provision for continuing operations and discontinued operations for the year ended December 31, 2013 is a \$4.8 million expense and a \$1.4 million expense, respectively, net of related deferred taxes, for interest on unrecognized tax benefits. At December 31, 2014 and 2013, the Company has accrued \$2.8 million and \$133.0 million, respectively, for the payment of interest. At December 31, 2014 and 2013, the Company has accrued \$2.9 million and \$5.1 million, respectively, for penalties.

The Company is routinely under audit by federal, state, local and foreign authorities in the area of income tax. These audits include questioning the timing and the amount of income and deductions and the allocation of income and deductions among various tax jurisdictions. The Internal Revenue Service is currently auditing the Company's federal income tax returns for the years ended December 31, 2010 through 2012. Various other jurisdictions are open to examination for various tax years beginning with 2006. Income taxes payable include reserves considered sufficient to pay assessments that may result from examination of prior year tax returns. Changes to reserves from period to period and differences between amounts paid, if any, upon the resolution of audits and amounts previously provided may be material. Differences between the reserves for income tax contingencies and the amounts owed by the Company are recorded in the period they become known.

The statutes of limitations for federal income taxes for the years 2001 through 2009 expired on July 1, 2014. As a result, previously unrecognized tax benefits, including interest, totaling \$374.8 million were recognized in the third quarter of 2014. The income tax benefit to continuing operations and discontinued operations was \$88.2 million and \$175.7 million, respectively. The remaining amount of \$110.9 million impacted various balance sheet accounts, primarily non-current deferred tax assets, which were reduced by \$100.1 million. At December 31, 2014 and 2013, the Company has unrecognized tax benefits, including interest, of \$33.2 million and \$408.8 million, respectively. If unrecognized tax benefits at December 31, 2014 are subsequently recognized, \$30.5 million, net of related deferred tax assets and interest, would reduce income tax provision for continuing operations. The Company believes that it is reasonably possible that its unrecognized tax benefits could decrease by \$8.8 million within twelve months of the current reporting date primarily due to expirations of statutes of limitations; \$8.4 million of which would reduce the income tax provision for continuing operations.

Earnings (loss) from discontinued operations, net of tax

	Years Ended December 31,						
	2014	\$ Change	% Change	2013	\$ Change	% Change	
	(Dollars in thousands)						
Earnings (loss) from discontinued operations, net of tax	\$174,673	NM	NM	\$1,926	NM	NM	\$(9,051)

Earnings from discontinued operations, net of tax in 2014 increased from 2013 principally due to the release of tax reserves as a result of the expiration of the statutes of limitations for federal income taxes for the years 2001 through 2009.

Table of Contents

FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2014, the Company had \$990.4 million of cash and cash equivalents, \$160.6 million of marketable securities, and \$1.1 billion of long-term debt. Domestically, cash equivalents primarily consist of commercial paper rated A2/P2 or better and AAA rated money market funds. Internationally, cash equivalents primarily consist of AAA rated money market funds and time deposits. Marketable securities consist of short-to-medium-term debt securities issued by investment grade corporate issuers and an equity security. The Company invests in marketable debt securities with active secondary or resale markets to ensure portfolio liquidity to fund current operations or satisfy other cash requirements as needed. The Company also invests in equity securities as part of its investment strategy. Long-term debt consists of \$500.0 million in 2013 Senior Notes due November 30, 2018, \$500.0 million in 2012 Senior Notes due December 15, 2022 and \$80.0 million in Liberty Bonds due September 1, 2035.

At December 31, 2014, \$220.4 million of the \$990.4 million of cash and cash equivalents was held by the Company's foreign subsidiaries. If needed for our U.S. operations, most of the cash and cash equivalents held by the Company's foreign subsidiaries could be repatriated; however, under current law, would be subject to U.S. federal and state income taxes. We have not provided for any such tax because the Company currently does not anticipate a need to repatriate these funds to finance our U.S. operations and it is the Company's intent to indefinitely reinvest these funds outside of the U.S.

In summary, the Company's cash flows attributable to continuing operations are as follows:

	December 31,		
	2014	2013	2012
	(In thousands)		
Net cash provided by operating activities	\$424,048	\$410,961	\$354,527
Net cash used in investing activities	(439,794)	(79,761)	(341,307)
Net cash (used in) provided by financing activities	(80,980)	17,666	33,520

Net cash provided by operating activities attributable to continuing operations consists of earnings or loss from continuing operations adjusted for non-cash items, including non-cash compensation expense, depreciation, amortization of intangibles, asset impairment charges, excess tax benefits from stock-based awards, deferred income taxes, equity in earnings or losses of unconsolidated affiliates, acquisition-related contingent consideration fair value adjustments, an adjustment related to gains on sales of long-term investments, assets and a business, and the effect of changes from working capital activities. Net cash provided by operating activities attributable to continuing operations in 2014 consists of earnings from continuing operations of \$234.6 million, adjustments for non-cash items and gains on sales of a business and long-term investments totaling \$272.2 million, partially offset by a decrease from working capital activities of \$82.7 million. Adjustments for non-cash items and gains on sales of a business and long-term investments primarily consist of \$76.9 million of deferred income taxes, \$66.6 million of impairments related to long-term investments, \$61.2 million of depreciation, \$59.6 million of non-cash compensation expense and \$57.9 million of amortization of intangibles, partially offset by \$45.0 million of excess tax benefits from stock-based awards, a \$21.9 million adjustment related to gains on sales of a business and long-term investments and \$13.4 million in acquisition-related contingent consideration fair value adjustments. The deferred income tax provision primarily relates to a net reduction in deferred tax assets related to the expiration of statutes of limitations for federal income taxes for the years 2001 through 2009. The changes from working capital activities consist of a decrease in income taxes payable of \$94.5 million and an increase in accounts receivable of \$19.9 million, partially offset by an increase in deferred revenue of \$30.1 million. The decrease in income taxes payable is primarily due to a net reduction in tax reserves related to the expiration of statutes of limitations for federal income taxes for the years 2001 through 2009, partially offset by current year income tax accruals in excess of current year income tax payments. The increase in accounts receivable is primarily due to revenue growth at HomeAdvisor. The increase in deferred revenue is due to increases related to acquisitions and growth in subscription revenue at The Match Group and Vimeo.

Net cash used in investing activities attributable to continuing operations in 2014 includes acquisitions of \$259.4 million, which include the ValueClick O&O website businesses, The Princeton Review, SlimWare and FriendScout24, purchases of marketable debt securities, net of proceeds from maturities and sales of \$154.2 million, capital expenditures of \$57.2 million primarily related to the internal development of software to support our products

and services, and investments of \$24.3 million, partially offset by \$58.4 million of proceeds from the sales of a business and long-term investments.

Net cash used in financing activities attributable to continuing operations in 2014 includes \$97.3 million related to the payment of cash dividends to IAC shareholders, \$33.2 million for the purchase of noncontrolling interests in Tinder and Meetic, \$8.1 million in contingent consideration payments related principally to the 2013 Two acquisition, partially offset by excess tax benefits from stock-based awards of \$45.0 million and the return of \$12.4 million of funds held in escrow related to the Meetic tender offer.

Table of Contents

Net cash provided by operating activities attributable to continuing operations in 2013 consists of earnings from continuing operations of \$281.8 million, adjustments for non-cash items and gains on sales of long-term investments and assets totaling \$110.8 million, and an increase from working capital activities of \$18.4 million. Adjustments for non-cash items and gains on sales of long-term investments and assets primarily consist of \$59.8 million of amortization of intangibles, \$58.9 million of depreciation and \$53.0 million of non-cash compensation expense, partially offset by a \$50.6 million adjustment related to gains on sales of long-term investments and assets and \$32.9 million of excess tax benefits from stock-based awards. The changes from working capital activities consist of an increase in income taxes payable of \$49.2 million and a decrease in accounts receivable of \$10.4 million, partially offset by an increase of \$34.6 million in other assets. The increase in income taxes payable is due to current year income tax accruals in excess of current year income tax payments. The decrease in accounts receivable is primarily due to a \$14.8 million decrease in accounts receivable related to Newsweek's transition to a digital only publication and our services agreement with Google; the related receivable from Google declined from \$125.3 million at December 31, 2012 to \$112.3 million at December 31, 2013, mainly due to lower year-over-year December revenue. These decreases were partially offset by an increase in accounts receivable at Electus due to higher revenue. The increase in other assets is primarily due to an increase in short-term and long-term production costs at certain of our media businesses that are capitalized as the television program, video or film is being produced.

Net cash used in investing activities attributable to continuing operations in 2013 includes acquisitions of \$40.4 million, which include Twoo, capital expenditures of \$80.3 million, which include \$23.6 million related to the purchase of a 50% ownership interest in an aircraft and investments of \$51.1 million, partially offset by net maturities and sales of marketable debt securities and sales of long-term investments and assets of \$95.6 million.

Net cash provided by financing activities attributable to continuing operations in 2013 includes \$500.0 million in proceeds from the issuance of our 2013 Senior Notes and excess tax benefits from stock-based awards of \$32.9 million, partially offset by \$264.2 million for the repurchase of 4.5 million shares of common stock at an average price of \$50.63 per share, \$79.2 million related to the payment of cash dividends to IAC shareholders, \$71.5 million held in escrow related to the Meetic tender offer, \$67.9 million for the purchase of noncontrolling interests in Meetic and a subsidiary of HomeAdvisor, \$15.8 million for the payment of our 2002 Senior Notes, which were due January 15, 2013, and \$7.4 million of debt issuance costs associated with our 2013 Senior Notes.

Net cash provided by operating activities attributable to continuing operations in 2012 consists of earnings from continuing operations of \$169.8 million, adjustments for non-cash items of \$204.2 million, partially offset by a decrease from working capital activities of \$19.5 million. Adjustments for non-cash items primarily consists of \$85.6 million of non-cash compensation expense, \$52.5 million of depreciation, \$37.1 million of deferred income taxes, \$35.8 million of amortization of intangibles and \$25.3 million of equity in losses of unconsolidated affiliates, which includes a non-cash charge of \$18.6 million to re-measure the carrying value of our investment in The Daily Beast to fair value in connection with our acquisition of a controlling interest, partially offset by \$57.1 million of excess tax benefits from stock-based awards. The deferred income tax provision primarily relates to the vesting of restricted stock units, the exercise of stock options and the accelerated payment of 2012 bonuses. The changes from working capital activities primarily consist of an increase of \$31.0 million in accounts receivable, an increase of \$23.0 million in other assets, a decrease in accounts payable and other current liabilities of \$14.4 million, partially offset by an increase in income taxes payable of \$47.0 million. The increase in accounts receivable is primarily due to the growth in revenue at Search & Applications earned from our services agreement with Google; the related receivable from Google was \$125.3 million and \$105.7 million at December 31, 2012 and 2011, respectively. While The Match Group and HomeAdvisor businesses experienced growth, the accounts receivable at these businesses are principally credit card receivables and, accordingly, are not significant in relation to the revenue of these businesses. The increase in other assets is primarily related to a receivable for insurance claims related to Hurricane Sandy, an increase in capitalized downloadable search toolbar costs and an increase in short-term production costs at certain of our Media businesses that are capitalized as the television program, video or film is being produced. The decrease in accounts payable and other current liabilities is primarily due to a decrease in accrued employee compensation and benefits, partially offset by an increase in accrued advertising expense. The decrease in accrued employee compensation and benefits is due to the payment of the 2012 and 2011 bonuses in 2012. The increase in accrued advertising expense is

primarily due to an increase in advertising expenditures at Search & Applications. The increase in income taxes payable is due to current year income tax accruals in excess of current year income tax payments.

Net cash used in investing activities attributable to continuing operations in 2012 includes acquisitions of \$400.3 million, primarily related to The About Group, capital expenditures of \$51.2 million primarily related to the internal development of software to support our products and services and investments of \$36.1 million, partially offset by net maturities and sales of marketable debt securities and sales of long-term investments and assets of \$156.2 million. Net cash provided by financing activities attributable to continuing operations in 2012 includes \$500.0 million in proceeds from the issuance of our 2012 Senior Notes, proceeds related to the issuance of common stock, net of withholding taxes, of \$262.8 million, and excess tax benefits from stock-based awards of \$57.1 million, partially offset by \$691.8 million

Table of Contents

for the repurchase of 15.5 million shares of common stock at an average price of \$46.09 per share, \$68.2 million related to the payment of cash dividends to IAC shareholders, \$11.0 million of debt issuance costs associated with our 2012 Senior Notes and \$10.8 million in contingent consideration payments principally related to the 2011 OkCupid acquisition. Included in the proceeds related to the issuance of common stock are proceeds of \$284.1 million from the exercise of warrants to acquire 11.7 million shares of IAC common stock, some of which were exercised on a cashless or net basis. The weighted average strike price of the warrants was \$28.40 per share.

The Company's principal sources of liquidity are its cash and cash equivalents and marketable securities as well as its cash flows generated from operations. The Company has a \$300.0 million revolving credit facility, which expires on December 21, 2017, and is available as an additional source of financing. At December 31, 2014, there were no outstanding borrowings under the revolving credit facility.

The Company anticipates that it will need to make capital and other expenditures in connection with the development and expansion of its operations. The Company expects that 2015 capital expenditures will be higher than 2014. At December 31, 2014, IAC had 8.6 million shares remaining in its share repurchase authorization. IAC may purchase shares over an indefinite period of time on the open market and in privately negotiated transactions, depending on those factors IAC management deems relevant at any particular time, including, without limitation, market conditions, share price and future outlook. On February 3, 2015, IAC declared a quarterly cash dividend of \$0.34 per share of common and Class B common stock outstanding payable on March 1, 2015 to stockholders of record on February 15, 2015. Future declarations of dividends are subject to the determination of IAC's Board of Directors.

The Company believes its existing cash, cash equivalents and marketable securities, together with its expected positive cash flows generated from operations and available borrowing capacity under its \$300.0 million revolving credit facility, will be sufficient to fund its normal operating requirements, including capital expenditures, share repurchases, quarterly cash dividends, and investing and other commitments for the foreseeable future. Our liquidity could be negatively affected by a decrease in demand for our products and services. The Company may make acquisitions and investments that could reduce its cash, cash equivalents and marketable securities balances and as a result, the Company may need to raise additional capital through future debt or equity financing to provide for greater financial flexibility. Additional financing may not be available at all or on terms favorable to us. The indentures governing the 2013 and 2012 Senior Notes restrict our ability to incur additional indebtedness in the event we are not in compliance with the maximum leverage ratio of 3.0 to 1.0. In addition, the terms of the revolving credit facility require that we maintain a leverage ratio of not more than 3.0 to 1.0 and restrict our ability to incur additional indebtedness. As of December 31, 2014, the Company was in compliance with all of these covenants.

Table of Contents

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

Contractual Obligations ^(a)	Payments Due by Period				Total
	Less Than 1 Year	1–3 Years	3–5 Years	More Than 5 Years	
	(In thousands)				
Long-term debt ^(b)	\$52,125	\$104,250	\$579,875	\$715,250	\$1,451,500
Operating leases ^(c)	32,255	57,828	41,113	191,108	322,304
Purchase obligations ^(d)	10,710	521	—	—	11,231
Total contractual cash obligations	\$95,090	\$162,599	\$620,988	\$906,358	\$1,785,035

The Company has excluded \$30.9 million in unrecognized tax benefits and related interest from the table above as

(a) we are unable to make a reasonably reliable estimate of the period in which these liabilities might be paid. For additional information on income taxes, see Note 3 to the consolidated financial statements.

(b) Represents contractual amounts due including interest.

The Company leases land, office space, data center facilities and equipment used in connection with operations

(c) under various operating leases, many of which contain escalation clauses. The Company is also committed to pay a portion of the related operating expenses under a data center lease agreement. These operating expenses are not included in the table above.

(d) The purchase obligations primarily include advertising commitments, which commitments are reducible or terminable such that these commitments can never exceed associated revenue by a meaningful amount.

Other Commercial Commitments ^(e)	Amount of Commitment Expiration Per Period				Total
	Less Than 1 Year	1–3 Years	3–5 Years	More Than 5 Years	
	(In thousands)				
Letters of credit and surety bonds	\$1,276	\$—	\$73	\$1,437	\$2,786

(e) Commercial commitments are funding commitments that could potentially require registrant performance in the event of demands by third parties or contingent events.

Off-Balance Sheet Arrangements

Other than the items described above, the Company does not have any off-balance sheet arrangements as of December 31, 2014.

Table of Contents

IAC'S PRINCIPLES OF FINANCIAL REPORTING

IAC reports Adjusted EBITDA as a supplemental measure to U.S. generally accepted accounting principles ("GAAP"). This measure is one of the primary metrics by which we evaluate the performance of our businesses, on which our internal budgets are based and by which management is compensated. We believe that investors should have access to, and we are obligated to provide, the same set of tools that we use in analyzing our results. This non-GAAP measure should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. IAC endeavors to compensate for the limitations of the non-GAAP measure presented by providing the comparable GAAP measure with equal or greater prominence and descriptions of the reconciling items, including quantifying such items, to derive the non-GAAP measure. We encourage investors to examine the reconciling adjustments between the GAAP and non-GAAP measure, which we discuss below.

Definition of IAC's Non-GAAP Measure

Adjusted EBITDA is defined as operating income excluding: (1) non-cash compensation expense; (2) depreciation; and (3) acquisition-related items consisting of (i) amortization of intangible assets and goodwill and intangible asset impairments and (ii) gains and losses recognized on changes in the fair value of contingent consideration arrangements. We believe this measure is useful for analysts and investors as this measure allows a more meaningful comparison between our performance and that of our competitors. Moreover, our management uses this measure internally to evaluate the performance of our business as a whole and our individual business segments. The above items are excluded from our Adjusted EBITDA measure because these items are non-cash in nature, and we believe that by excluding these items, Adjusted EBITDA corresponds more closely to the cash operating income generated from our business, from which capital investments are made and debt is serviced. Adjusted EBITDA has certain limitations in that it does not take into account the impact to IAC's statement of operations of certain expenses.

Non-Cash Expenses That Are Excluded From IAC's Non-GAAP Measure

Non-cash compensation expense consists principally of expense associated with the grants, including unvested grants assumed in acquisitions, of stock options, restricted stock units ("RSUs") and performance-based RSUs. These expenses are not paid in cash, and we include the related shares in our fully diluted shares outstanding using the treasury method; however, performance-based RSUs are included only to the extent the performance criteria have been met (assuming the end of the reporting period is the end of the contingency period). Upon the exercise of certain stock options and vesting of RSUs and performance-based RSUs, the awards are settled, at the Company's discretion, on a net basis, with the Company remitting the required tax-withholding amount from its current funds.

Depreciation is a non-cash expense relating to our property and equipment and is computed using the straight-line method to allocate the cost of depreciable assets to operations over their estimated useful lives.

Amortization of intangible assets and goodwill and intangible asset impairments are non-cash expenses relating primarily to acquisitions. At the time of an acquisition, the identifiable definite-lived intangible assets of the acquired company, such as content, technology, customer lists, advertiser and supplier relationships, are valued and amortized over their estimated lives. Value is also assigned to acquired indefinite-lived intangible assets, which comprise trade names and trademarks, and goodwill that are not subject to amortization. An impairment is recorded when the carrying value of an intangible asset or goodwill exceeds its fair value. While it is likely that we will have significant intangible amortization expense as we continue to acquire companies, we believe that intangible assets represent costs incurred by the acquired company to build value prior to acquisition and the related amortization and impairment charges of intangible assets or goodwill, if applicable, are not ongoing costs of doing business.

Gains and losses recognized on changes in the fair value of contingent consideration arrangements are accounting adjustments to report contingent consideration liabilities at fair value. These adjustments can be highly variable and are excluded from our assessment of performance because they are considered non-operational in nature and, therefore, are not indicative of current or future performance or ongoing costs of doing business.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The following disclosure is provided to supplement the descriptions of IAC's accounting policies contained in Note 2 to the consolidated financial statements in regard to significant areas of judgment. Management of the Company is required to make certain estimates, judgments and assumptions during the preparation of its consolidated financial statements in accordance with U.S. generally accepted accounting principles. These estimates, judgments and assumptions impact the reported amount of assets, liabilities, revenue and expenses and the related disclosure of contingent assets and liabilities as of the date of the consolidated financial statements. Actual results could differ from those estimates. Because of the size of the financial statement elements to which they relate, some of our accounting policies and estimates have a more significant impact on our consolidated financial statements than others. What follows is a discussion of some of our more significant accounting policies and estimates.

Business Combinations

The purchase price of each acquisition is attributed to the assets acquired and liabilities assumed based on their fair values at the date of acquisition, including identifiable intangible assets that either arise from a contractual or legal right or are separable from goodwill. The fair value of these intangible assets is based on detailed valuations that use information and assumptions provided by management. The excess purchase price over the net tangible and identifiable intangible assets is recorded as goodwill.

In connection with some business combinations, the Company has entered into contingent consideration arrangements that are determined to be part of the purchase price. Each of these arrangements are recorded at its fair value at the time of the acquisition and reflected at current fair value for each subsequent reporting period thereafter until settled. The contingent consideration arrangements are generally based upon earnings performance and/or operating metrics. The Company generally determines the fair value of contingent consideration using probability-weighted analyses over the period in which the obligation is expected to be settled, and, to the extent the arrangement is long-term in nature, applies a discount rate that appropriately captures the risk associated with the obligation. Significant changes in forecasted earnings or operating metrics would result in a significantly higher or lower fair value measurement. Determining fair value is inherently difficult and subjective and can have a material impact on our consolidated financial statements. The changes in the remeasured fair value of the contingent consideration arrangements each reporting period are recognized in "General and administrative expense" in the accompanying consolidated statement of operations. See Note 7 for a discussion of contingent consideration arrangements.

Recoverability of Goodwill and Indefinite-Lived Intangible Assets

Goodwill and indefinite-lived intangible assets, which consist of the Company's acquired trade names and trademarks, are assessed annually for impairment as of October 1 or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit or the fair value of an indefinite-lived intangible asset below its carrying value. The 2014, 2013 and 2012 annual assessments identified no material impairments. The value of goodwill and indefinite-lived intangible assets that is subject to annual assessment for impairment is \$1.8 billion and \$405.2 million, respectively, at December 31, 2014.

The Company has the option to qualitatively assess whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the Company elects to perform a qualitative assessment and concludes it is not more likely than not that the fair value of the reporting unit is less than its carrying value, no further assessment of that reporting unit's goodwill is necessary; otherwise goodwill must be tested for impairment using a two-step process. The first step involves a comparison of the estimated fair value of each of the Company's reporting units to its carrying value, including goodwill. In performing the first step, the Company determines the fair value of a reporting unit using both an income approach based on discounted cash flows ("DCF") and a market approach based on multiples of earnings. Determining fair value requires the exercise of significant judgment with respect to several items, including judgment about the amount and timing of expected future cash flows and appropriate discount rates. The expected cash flows used in the DCF analyses are based on the Company's most recent budget and, for years beyond the budget, the Company's estimates, which are based, in part, on forecasted growth rates. The discount rates used in the DCF analyses are intended to reflect the risks inherent in the expected future cash flows of the respective reporting units. Assumptions used in the DCF analyses, including the discount rate, are assessed annually based on the reporting units' current results and forecast, as well as macroeconomic and industry specific factors. The discount rates used in

the Company's annual goodwill impairment assessment ranged from 13% to 19% in 2014 and 13% to 25% in 2013. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. If the carrying value of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with its carrying value to measure the amount of impairment, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. In other words, the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired

Table of Contents

in a business combination and the fair value of the reporting unit was the purchase price paid. If the carrying value of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment is recognized in an amount equal to that excess.

Any impairment charge that might result in the future would be determined based upon the excess of the carrying value of goodwill over its implied fair value using the second step of the impairment analysis that is described above but, in any event, would not be expected to be lower than the excess of the carrying value of the reporting unit over its fair value. A primary driver in the DCF valuation analyses and the determination of the fair values of the Company's reporting units is the estimate of future revenue and profitability. Generally, the Company would expect an impairment if forecasted revenue and profitability are no longer expected to be achieved and as a result, the carrying value of a reporting unit(s) exceeds its fair value. This assessment would be based, in part, upon the performance of its businesses relative to budget, the Company's assessment of macroeconomic factors, industry and competitive dynamics and the strategies of its businesses in response to these factors.

At October 1, 2014, the date of our most recent annual impairment assessment, the fair value of the Company's reporting units exceed their carrying values. The fair value of the Search & Applications reporting unit currently exceeds its carrying value by approximately 15%. If operating results vary significantly from anticipated results, future, potentially material, impairments of goodwill and/or indefinite-lived intangible assets could occur. To illustrate the magnitude of a potential impairment charge relative to future changes in estimated fair value, had the estimated fair value of Search & Applications been hypothetically lower by 20% as of October 1, 2014, the carrying value of Search & Applications would have exceeded its fair value by approximately \$100 million.

The Company also has the option to qualitatively assess whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying value. If the Company elects to perform a qualitative assessment and concludes it is not more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying value, the fair value of the asset does not need to be determined; otherwise the fair value of the indefinite-lived intangible asset must be determined and compared to its carrying value. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair value of indefinite-lived intangible assets are determined using an avoided royalty DCF valuation analysis. Significant judgments inherent in this analysis include the selection of appropriate royalty and discount rates and estimating the amount and timing of expected future cash flows. The discount rates used in the DCF analyses are intended to reflect the risks inherent in the expected future cash flows generated by the respective intangible assets. The royalty rates used in the DCF analyses are based upon an estimate of the royalty rates that a market participant would pay to license the Company's trade names and trademarks. Assumptions used in the avoided royalty DCF analyses, including the discount rate and royalty rate, are assessed annually based on the actual and projected cash flows related to the asset, as well as macroeconomic and industry specific factors. The discount rates used in the Company's annual indefinite-lived impairment assessment ranged from 10% to 20% in 2014 and 10% to 18% in 2013, and the royalty rates used ranged from 1% to 9% in both 2014 and 2013.

Recoverability of Long-Lived Assets

We review the carrying value of all long-lived assets, comprising property and equipment and definite-lived intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying value is deemed not to be recoverable, an impairment loss is recorded equal to the amount by which the carrying value of the long-lived asset exceeds its fair value. During 2013 the Company wrote off certain capitalized software costs. This charge is more fully described above in "Results of Operations for the Years Ended December 31, 2014, 2013 and 2012 - Depreciation." The carrying value of property and equipment and definite-lived intangible assets is \$389.2 million at December 31, 2014.

Income Taxes

We recognize liabilities for uncertain tax positions based on the two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second

step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. This measurement step is inherently difficult and requires subjective estimations of such amounts to determine the probability of various possible outcomes. We consider many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and which may not accurately anticipate actual outcomes. At December 31, 2014, the Company has unrecognized tax benefits of \$33.2 million, including interest. Changes to reserves from period to period and differences between amounts paid, if any, upon resolution of issues raised in audits and amounts previously provided may be material. Differences between the reserves for income tax contingencies and the amounts owed by the Company are recorded in the period they become known.

Table of Contents

The Company accounts for income taxes under the liability method, and deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying values of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. A valuation allowance is provided on deferred tax assets if it is determined that it is more likely than not that the deferred tax asset will not be realized. As of December 31, 2014, the balance of deferred tax liabilities, net, is \$390.4 million. Actual income taxes could vary from these estimates due to future changes in income tax law, state income tax apportionment or the outcome of any review of our tax returns by the various tax authorities, as well as actual operating results of the Company that vary significantly from anticipated results.

Stock-Based Compensation

As disclosed in Note 12 to the consolidated financial statements, the Company estimated the fair value of stock options issued in 2014, 2013 and 2012 using a Black-Scholes option pricing model with the following weighted average assumptions: risk-free interest rates of 1.5%, 1.0% and 0.6%, respectively, a dividend yield of 1.5%, 2.0% and 1.2%, respectively, volatility factors of 31%, 29% and 31%, respectively, based on the historical stock price volatilities of IAC and a weighted average expected term of the stock options of 4.8 years, 6.2 years and 4.4 years, respectively. For stock options, including unvested stock options assumed in acquisitions, the value of the stock option is measured at the grant date (or acquisition date, if applicable) at fair value and expensed over the remaining vesting term. The impact on non-cash compensation expense for the year ended December 31, 2014, assuming a 1% increase in the risk-free interest rate, a 10% increase in the volatility factor and a one year increase in the weighted average expected term of the outstanding options would be an increase of \$2.5 million, \$11.9 million and \$5.1 million, respectively. The impact on non-cash compensation expense for the year ended December 31, 2014, assuming a 1% increase in the dividend yield of the outstanding options, would be a decrease of \$1.1 million. The Company also issues RSUs and performance-based RSUs. For RSUs issued, the value of the instrument is measured at the grant date as the fair value of IAC common stock and expensed as non-cash compensation expense over the vesting term. For performance-based RSUs issued, the value of the instrument is measured at the grant date as the fair value of IAC common stock and expensed as non-cash compensation over the vesting term when the performance targets are considered probable of being achieved.

Marketable Securities and Long-term Investments

At December 31, 2014, marketable securities consist of short-to-medium-term debt securities issued by investment grade corporate issuers and an equity security. Long-term investments include equity securities accounted for under the equity and cost methods and marketable equity securities. The Company invests in marketable debt securities with active secondary or resale markets to ensure portfolio liquidity to fund current operations or satisfy other cash requirements as needed. The Company also invests in marketable equity securities as part of its investment strategy. Marketable securities are adjusted to fair value each quarter, and the unrealized gains and losses, net of tax, are included in accumulated other comprehensive income as a separate component of shareholders' equity. The specific-identification method is used to determine the cost of securities sold and the amount of unrealized gains and losses reclassified out of accumulated other comprehensive income into earnings. The Company recognizes unrealized losses on marketable securities in net earnings when the losses are determined to be other-than-temporary. Additionally, the Company evaluates each cost and equity method investment for indicators of impairment on a quarterly basis, and recognizes an impairment loss if the decline in value is deemed to be other-than-temporary. Future events may result in reconsideration of the nature of losses as other-than-temporary and market and other factors may cause the value of the Company's investments to decline.

The Company employs a methodology that considers available evidence in evaluating potential other-than-temporary impairments of its investments. Investments are considered to be impaired when a decline in fair value below the amortized cost basis is determined to be other-than-temporary. Such impairment evaluations include, but are not limited to: the length of time and extent to which fair value has been less than the cost basis, the current business environment, including competition; going concern considerations such as financial condition, the rate at which the investee utilizes cash and the investee's ability to obtain additional financing to achieve its business plan; the need for changes to the investee's existing business model due to changing business and regulatory environments and its ability

to successfully implement necessary changes; and comparable valuations. During 2014 and 2013, the Company recognized impairment charges of \$66.6 million and \$5.0 million, respectively, related to cost method investments and during 2012, the Company recorded an impairment charge of \$8.7 million related to one of its long-term marketable equity securities. These charges are more fully described above in "Results of Operations for the Years Ended December 31, 2014, 2013 and 2012 - Other (expense) income, net."

Recent Accounting Pronouncement

For a discussion of a recent accounting pronouncement, see Note 2 — Summary of Significant Accounting Policies in the notes to consolidated financial statements.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's cash equivalents, marketable debt securities and long-term debt.

The Company invests its excess cash in certain cash equivalents and marketable debt securities, which consist of money market funds and short-to-medium-term debt securities issued by investment grade corporate issuers. The Company employs a methodology that considers available evidence in evaluating potential other-than-temporary impairments of its investments. Investments are considered to be impaired when a decline in fair value below the amortized cost basis is determined to be other-than-temporary. If a decline in fair value is determined to be other-than-temporary, an impairment charge is recorded in current earnings and a new cost basis in the investment is established. During 2014, 2013 and 2012, the Company did not record any other-than-temporary impairment charges related to its cash equivalents and marketable debt securities.

Based on the Company's total investment in marketable debt securities at December 31, 2014, a 100 basis point increase or decrease in the level of interest rates would, respectively, decrease or increase the fair value of these securities by \$2.1 million. Such potential increase or decrease in fair value is based on certain simplifying assumptions, including a constant level and rate of debt securities and an immediate across-the-board increase or decrease in the level of interest rates with no other subsequent changes for the remainder of the period. Conversely, since almost all of the Company's cash and cash equivalents balance of \$990.4 million is invested in short-term fixed or variable rate money market instruments, the Company would also earn more (less) interest income due to such an increase (decrease) in interest rates.

At December 31, 2014, the Company's outstanding debt is \$1.1 billion, all of which pays interest at fixed rates. If market rates decline, the Company runs the risk that the related required payments on the fixed rate debt will exceed those based on market rates. A 100 basis point increase or decrease in the level of interest rates would, respectively, decrease or increase the fair value of the fixed-rate debt by \$60.5 million. Such potential increase or decrease in fair value is based on certain simplifying assumptions, including a constant level and rate of fixed-rate debt for all maturities and an immediate across-the-board increase or decrease in the level of interest rates with no other subsequent changes for the remainder of the period.

Equity Price Risk

The Company is exposed to market risk as it relates to changes in the market value of its investments.

At December 31, 2014, the Company has two investments in equity securities of publicly traded companies. These available-for-sale marketable equity securities are reported at fair value based on their quoted market prices with any unrealized gain or loss, net of tax, included as a component of "Accumulated other comprehensive loss" in the accompanying consolidated balance sheet. Investments in equity securities of publicly traded companies are exposed to significant fluctuations in fair value due to the volatility of the stock market. During 2014 and 2013, the Company did not record any other-than-temporary impairment charges related to its available-for-sale marketable equity securities. During 2012, the Company recorded an \$8.7 million other-than-temporary impairment charge related to one of its available-for-sale marketable equity securities. The other-than-temporary impairment charge is included in "Other (expense) income, net" in the accompanying consolidated statement of operations.

Foreign Currency Exchange Risk

The Company conducts business in certain foreign markets, primarily in the European Union. The Company's primary exposure to foreign currency exchange risk relates to investments in foreign subsidiaries that transact business in a functional currency other than the U.S. Dollar, primarily the Euro and British Pound Sterling. However, the exposure is mitigated since the Company has generally reinvested cash flows from international operations in order to grow the businesses. The statements of operations of these international businesses are translated into U.S. dollars at the average exchange rates in each applicable period. To the extent the U.S. dollar strengthens against foreign currencies, the translation of these foreign activities result in reduced revenue and operating results. Similarly, the Company's revenue and operating results will increase for our international operations if the U.S. dollar weakens against foreign currencies. The Company is also exposed to foreign currency exchange risk related to its assets and liabilities denominated in a currency other than the functional currency.

The economic impact of foreign currency exchange rate movements on the Company is often linked to variability in real growth, inflation, interest rates, governmental actions and other factors. These changes, if material, could cause the Company to adjust its financing and operating strategies. Foreign currency exchange gains and losses are not material to the Company's earnings in 2014, 2013 and 2012. As foreign currency exchange rates change, translation of the statements of operations of the Company's international businesses into U.S. dollars affects year-over-year comparability of operating results. Historically, the Company has not hedged foreign currency exchange risks because cash flows from international operations are generally reinvested locally. However, the Company periodically reviews its strategy for hedging foreign currency exchange risks. The

Table of Contents

Company's objective in managing its foreign currency exchange risk is to minimize its potential exposure to the changes that foreign currency exchange rates might have on its earnings, cash flows and financial position.

Item 8. Consolidated Financial Statements and Supplementary Data
Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of IAC/InterActiveCorp

We have audited the accompanying consolidated balance sheet of IAC/InterActiveCorp and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of IAC/InterActiveCorp and subsidiaries as of December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), IAC/InterActiveCorp's internal control over financial reporting as of December 31, 2014, based on criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 27, 2015 expressed an unqualified opinion thereon.

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1—ORGANIZATION

IAC is a leading media and Internet company. The Company is organized into four segments: The Match Group, which consists of dating, education and fitness businesses with brands such as Match, OkCupid, Tinder, The Princeton Review and DailyBurn; Search & Applications, which includes brands such as About.com, Ask.com, Dictionary.com and Investopedia; Media, which includes businesses such as Vimeo, Electus, The Daily Beast and CollegeHumor; and eCommerce, which includes HomeAdvisor and ShoeBuy. IAC's brands and products are among the most recognized in the world, reaching users in over 200 countries.

All references to "IAC," the "Company," "we," "our" or "us" in this report are to IAC/InterActiveCorp.

Search & Applications

Our Search & Applications segment consists of: Websites, including Ask.com, About.com, CityGrid, Dictionary.com, Investopedia, PriceRunner and Ask.fm, through which we provide search services, content and other services; and Applications, including our direct-to-consumer downloadable applications operations ("B2C"), our partnership operations ("B2B"), SlimWare and Apalon.

The Match Group

The Match Group segment consists of our North America dating businesses (which include Match, Chemistry, People Media, OkCupid, Tinder and other dating businesses operating within the United States and Canada), our International dating businesses (which include Meetic, Tinder and all other dating businesses operating outside of the United States and Canada) and our non-dating businesses, The Princeton Review, Tutor.com and DailyBurn.

Through the brands and businesses within our dating businesses, we are a leading provider of subscription-based and ad-supported online personals services in North America, Europe, Latin America, Australia and Asia. We provide these services through websites and applications that we own and operate.

The Match Group's non-dating businesses consist of The Princeton Review and Tutor.com, which together provide a variety of educational services including in-person and online test preparation and tutoring, as well as DailyBurn, a health and fitness property that provides streaming fitness and workout videos across a variety of platforms, including iOS, Android, Xbox and Internet-enabled television platforms.

Media

Our Media segment consists primarily of Vimeo, Electus and The Daily Beast.

Vimeo operates a global video sharing platform for creators and their audiences. Vimeo offers video creators simple, professional-grade tools to share, distribute and monetize content online, and provides viewers with a clutter-free environment to watch content across a variety of Internet-enabled devices.

Electus is an integrated multimedia entertainment studio that unites producers, creators, advertisers and distributors to produce video content for distribution across a variety of platforms in the United States and various jurisdictions abroad. Electus also operates Electus Digital, which consists of the following websites and properties:

CollegeHumor.com, Dorkly.com and WatchLOUD.com; YouTube channels WatchLOUD, Nuevon and Hungry; and Big Breakfast (a production company).

The Daily Beast is a website dedicated to news, commentary, culture and entertainment that curates and publishes existing and original online content from its own roster of contributors in the United States.

eCommerce

Our eCommerce segment consists principally of HomeAdvisor and ShoeBuy.

IAC/INTERACTIVECORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

HomeAdvisor is a leading online marketplace for matching consumers with home services professionals in the United States, as well as in France and the Netherlands under various brands.

ShoeBuy is a leading Internet retailer of footwear and related apparel and accessories.

NOTE 2—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company prepares its consolidated financial statements in accordance with U.S. generally accepted accounting principles ("GAAP").

Basis of Consolidation and Accounting for Investments

The consolidated financial statements include the accounts of the Company, all entities that are wholly-owned by the Company and all entities in which the Company has a controlling financial interest. Intercompany transactions and accounts have been eliminated.

Investments in the common stock or in-substance common stock of entities in which the Company has the ability to exercise significant influence over the operating and financial matters of the investee, but does not have a controlling financial interest, are accounted for using the equity method. Investments in the common stock or in-substance common stock of entities in which the Company does not have the ability to exercise significant influence over the operating and financial matters of the investee are accounted for using the cost method. Investments in companies that IAC does not control, which are not in the form of common stock or in-substance common stock, are also accounted for using the cost method. The Company evaluates each cost and equity method investment for impairment on a quarterly basis and recognizes an impairment loss if a decline in value is determined to be other-than-temporary. Such impairment evaluations include, but are not limited to: the current business environment, including competition; going concern considerations such as financial condition, the rate at which the investee utilizes cash and the investee's ability to obtain additional financing to achieve its business plan; the need for changes to the investee's existing business model due to changing business and regulatory environments and its ability to successfully implement necessary changes; and comparable valuations. If the Company has not identified events or changes in circumstances that may have a significant adverse effect on the fair value of a cost method investment, then the fair value of such cost method investment is not estimated, as it is impracticable to do so.

Accounting Estimates

Management of the Company is required to make certain estimates, judgments and assumptions during the preparation of its consolidated financial statements in accordance with GAAP. These estimates, judgments and assumptions impact the reported amounts of assets, liabilities, revenue and expenses and the related disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

On an ongoing basis, the Company evaluates its estimates and judgments including those related to: the fair values of marketable securities and other investments; the recoverability of goodwill and indefinite-lived intangible assets; the useful lives and recovery of definite-lived intangible assets and property and equipment; the carrying value of accounts receivable, including the determination of the allowance for doubtful accounts and revenue reserves; the fair value of acquisition-related contingent consideration; the liabilities for uncertain tax positions; the valuation allowance for deferred income tax assets; and the fair value of and forfeiture rates for stock-based awards, among others. The Company bases its estimates and judgments on historical experience, its forecasts and budgets and other factors that the Company considers relevant.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, services are rendered or merchandise is delivered to customers, the fee or price charged is fixed or determinable and collectability is reasonably assured. Deferred revenue is recorded when payments are received in advance of the Company's rendering of services or delivery of merchandise.

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Search & Applications

The Search & Applications segment's revenue consists principally of advertising revenue, which is generated primarily through the display of paid listings in response to search queries, as well as from display advertisements appearing on its websites and to a lesser extent, the syndication of search results generated by Ask-branded destination search websites. The Company obtains the substantial majority of its paid listings from third-party providers, primarily Google Inc. ("Google"). Paid listings are priced on a price per click basis and when a user submits a search query and then clicks on a Google paid listing displayed in response to the query, Google bills the advertiser that purchased the paid listing directly and shares a portion of the fee charged to the advertiser with the Company. The Company recognizes paid listing revenue from Google when it delivers the user's click. In cases where the user's click is generated due to the efforts of a third-party distributor, the Company recognizes the amount due from Google as revenue and records the revenue share or other payment obligation to the third-party distributor as traffic acquisition costs.

Search & Applications also generates revenue from subscription fees, which is recognized over the terms of the applicable subscriptions (which range from one to two years) and from sales of apps and in-app purchases, which is recognized at the time of the sale.

The Match Group

Revenue of the dating businesses is derived principally from subscription fees for subscription-based online personals and related services. Subscription fee revenue is recognized over the terms of the applicable subscriptions, which primarily range from one to six months. Deferred revenue at the dating businesses is \$117.9 million and \$116.5 million at December 31, 2014 and 2013, respectively. The dating businesses also earn revenue from online advertising, which is recognized when an ad is displayed, and the purchase of add-on or premium features, which is recognized based on usage.

The Princeton Review and Tutor's revenue consists primarily of fees received for in-person and online test preparation classes, access to online test preparation materials and individual tutoring services. Fees from classes and access to online materials are recognized over the period of the course and the period of the online access, respectively.

Tutoring fees are generally collected in the form of subscription fees that entitle the subscriber to a certain number of tutoring sessions over a certain period of time. These fees are recognized over the term of the subscription based on usage.

DailyBurn's revenue consists primarily of subscription fee revenue, which is recognized over the terms for the applicable subscriptions, which range from one to twelve months.

Media

Revenue of businesses included in this segment is generated primarily through media production, subscriptions and advertising. Media production revenue is recognized when the production is available for the customer to broadcast or exhibit, subscription fee revenue is recognized over the terms of the applicable subscriptions, which are one month or one year, and advertising revenue is recognized when an ad is displayed or over the period earned.

eCommerce

HomeAdvisor's lead acceptance revenue is generated and recognized when an in-network home service professional is delivered a consumer lead. HomeAdvisor's membership subscription revenue is generated through subscription sales to service professionals and is deferred and recognized over the terms of the memberships, which are one month, three months, or one year. HomeAdvisor's website hosting revenue is deferred and recognized over the period of the hosting agreement.

ShoeBuy's revenue consists of merchandise sales, reduced by incentive discounts and sales returns, and is recognized when delivery to the customer has occurred. Delivery is considered to have occurred when the customer takes title and assumes the risks and rewards of ownership, which is on the date of shipment. Accruals for returned merchandise are based on historical experience. Shipping and handling fees billed to customers are recorded as revenue. The costs associated with shipping goods to customers are recorded as cost of revenue.

IAC/INTERACTIVECORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash and Cash Equivalents

Cash and cash equivalents include cash and short-term investments, with maturities of less than 91 days from the date of purchase. Domestically, cash equivalents primarily consist of commercial paper rated A2/P2 or better and AAA rated money market funds. Internationally, cash equivalents primarily consist of AAA rated money market funds and time deposits.

Marketable Securities

At December 31, 2014, marketable securities consist of short-to-medium-term debt securities issued by investment grade corporate issuers and an equity security. The Company invests in marketable debt securities with active secondary or resale markets to ensure portfolio liquidity to fund current operations or satisfy other cash requirements as needed. The Company also invests in marketable equity securities as part of its investment strategy. All marketable securities are classified as available-for-sale and are reported at fair value. The unrealized gains and losses on marketable securities, net of tax, are included in accumulated other comprehensive income as a separate component of shareholders' equity. The specific-identification method is used to determine the cost of securities sold and the amount of unrealized gains and losses reclassified out of accumulated other comprehensive income into earnings.

The Company employs a methodology that considers available evidence in evaluating potential other-than-temporary impairments of its investments. Investments are considered to be impaired when a decline in fair value below the amortized cost basis is determined to be other-than-temporary. Factors considered in determining whether a loss is other-than-temporary include the length of time and extent to which fair value has been less than the amortized cost basis, the financial condition and near-term prospects of the issuer, and whether it is not more likely than not that the Company will be required to sell the security before the recovery of the amortized cost basis, which may be maturity. If a decline in fair value is determined to be other-than-temporary, an impairment charge is recorded in current earnings and a new cost basis in the investment is established.

Certain Risks and Concentrations

A substantial portion of the Company's revenue is derived from online advertising, the market for which is highly competitive and rapidly changing. Significant changes in this industry or changes in advertising spending behavior or in customer buying behavior could adversely affect our operating results. Most of the Company's online advertising revenue is attributable to a services agreement with Google, which expires on March 31, 2016. Our services agreement requires that we comply with certain guidelines promulgated by Google. Subject to certain limitations, Google may unilaterally update its policies and guidelines, which could require modifications to, or prohibit and/or render obsolete certain of our products, services and/or business practices, which could be costly to address or otherwise have an adverse effect on our business, financial condition and results of operations. For the years ended December 31, 2014, 2013 and 2012, revenue earned from Google is \$1.4 billion, \$1.5 billion and \$1.4 billion, respectively. This revenue is earned by the businesses comprising the Search & Applications segment. Accounts receivable related to revenue earned from Google totaled \$118.7 million and \$112.3 million at December 31, 2014 and 2013, respectively.

The Company's business is subject to certain risks and concentrations including dependence on third-party technology providers, exposure to risks associated with online commerce security and credit card fraud.

Financial instruments, which potentially subject the Company to concentration of credit risk, consist primarily of cash and cash equivalents and marketable securities. Cash and cash equivalents are maintained with financial institutions and are in excess of Federal Deposit Insurance Corporation insurance limits.

Accounts Receivable

Accounts receivable are stated at amounts due from customers, net of an allowance for doubtful accounts and revenue reserves. Accounts receivable outstanding longer than the contractual payment terms are considered past due. The Company determines its allowance by considering a number of factors, including the length of time accounts receivable are past due, the Company's previous loss history, the specific customer's ability to pay its obligation to the Company and the condition of the general economy and the customer's industry. The Company writes off accounts

receivable when they become uncollectible.

55

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company also maintains allowances to reserve for potential credits issued to customers or other revenue adjustments. The amounts of these reserves are based, in part, on historical experience.

Property and Equipment

Property and equipment, including significant improvements, are recorded at cost. Repairs and maintenance costs are expensed as incurred. Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Asset Category	Estimated Useful Lives
Buildings and leasehold improvements	3 to 39 Years
Computer equipment and capitalized software	2 to 3 Years
Furniture and other equipment	3 to 12 Years

The Company capitalizes certain internal use software costs including external direct costs utilized in developing or obtaining the software and compensation for personnel directly associated with the development of the software.

Capitalization of such costs begins when the preliminary project stage is complete and ceases when the project is substantially complete and ready for its intended purpose. The net book value of capitalized internal use software is \$36.9 million and \$30.9 million at December 31, 2014 and 2013, respectively.

Business Combinations

The purchase price of each acquisition is attributed to the assets acquired and liabilities assumed based on their fair values at the date of acquisition, including identifiable intangible assets that either arise from a contractual or legal right or are separable from goodwill. The fair value of these intangible assets is based on detailed valuations that use information and assumptions provided by management. The excess purchase price over the net tangible and identifiable intangible assets is recorded as goodwill.

In connection with some business combinations, the Company has entered into contingent consideration arrangements that are determined to be part of the purchase price. Each of these arrangements are recorded at its fair value at the time of the acquisition and reflected at current fair value for each subsequent reporting period thereafter until settled. The contingent consideration arrangements are generally based upon earnings performance and/or operating metrics. The Company generally determines the fair value of contingent consideration using probability-weighted analyses over the period in which the obligation is expected to be settled, and, to the extent the arrangement is long-term in nature, applies a discount rate that appropriately captures the risk associated with the obligation. Significant changes in forecasted earnings or operating metrics would result in a significantly higher or lower fair value measurement. Determining fair value is inherently difficult and subjective and can have a material impact on our consolidated financial statements. The changes in the remeasured fair value of the contingent consideration arrangements each reporting period are recognized in "General and administrative expense" in the accompanying consolidated statement of operations. See Note 7 for a discussion of contingent consideration arrangements.

Goodwill and Indefinite-Lived Intangible Assets

Goodwill acquired in business combinations is assigned to the reporting unit(s) that is expected to benefit from the combination as of the acquisition date. The Company assesses goodwill and indefinite-lived intangible assets for impairment annually as of October 1, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit or the fair value of an indefinite-lived intangible asset below its carrying value.

There were no material impairment charges recorded in the three year period ended December 31, 2014. At October 1, 2014, the date of our most recent annual impairment assessment, the fair value of the Company's reporting units exceed their carrying values. The fair value of the Search & Applications reporting unit currently exceeds its carrying value by approximately 15%. If operating results vary significantly from anticipated results, future, potentially material, impairments of goodwill and/or indefinite-lived intangible assets could occur. To illustrate the magnitude of a potential impairment charge relative to future changes in estimated fair value, had the estimated fair value of Search

& Applications been hypothetically

56

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

lower by 20% as of October 1, 2014, the carrying value of Search & Applications would have exceeded its fair value by approximately \$100 million.

The Company has the option to qualitatively assess whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the Company elects to perform a qualitative assessment and concludes it is not more likely than not that the fair value of the reporting unit is less than its carrying value, no further assessment of that reporting unit's goodwill is necessary; otherwise, the fair value of the reporting unit has to be determined and if the carrying value of a reporting unit's goodwill exceeds its implied fair value, an impairment loss equal to the excess is recorded. The Company also has the option to qualitatively assess whether it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying value. If the Company elects to perform a qualitative assessment and concludes it is not more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying value, the fair value of the asset does not need to be determined; otherwise, the fair value of the indefinite-lived intangible asset has to be determined and if its carrying value exceeds its estimated fair value, an impairment loss equal to the excess is recorded.

The Company determines the fair values of its reporting units using both an income approach based on discounted cash flows ("DCF") and a market approach based on a multiple of earnings. Determining fair value requires the exercise of significant judgment with respect to several items, including the amount and timing of expected future cash flows and appropriate discount rates. The expected cash flows used in the DCF analyses are based on the Company's most recent budget and, for years beyond the budget, the Company's estimates, which are based, in part, on forecasted growth rates. The discount rates used in the DCF analyses reflect the risks inherent in the expected future cash flows of the respective reporting units. Assumptions used in the DCF analyses, including the discount rate, are assessed annually based on each reporting unit's current results and forecast, as well as macroeconomic and industry specific factors. The discount rates used in the Company's annual goodwill impairment assessment ranged from 13% to 19% in 2014 and 13% to 25% in 2013.

The Company determines the fair values of its indefinite-lived intangible assets using avoided royalty DCF analyses. Significant judgments inherent in these analyses include the selection of appropriate royalty and discount rates and estimating the amount and timing of expected future cash flows. The discount rates used in the DCF analyses reflect the risks inherent in the expected future cash flows generated by the respective intangible assets. The royalty rates used in the DCF analyses are based upon an estimate of the royalty rates that a market participant would pay to license the Company's trade names and trademarks. Assumptions used in the avoided royalty DCF analyses, including the discount rate and royalty rate, are assessed annually based on the actual and projected cash flows related to the asset, as well as macroeconomic and industry specific factors. The discount rates used in the Company's annual indefinite-lived impairment assessment ranged from 10% to 20% in 2014 and 10% to 18% in 2013, and the royalty rates used ranged from 1% to 9% in both 2014 and 2013.

The Company's reporting units are consistent with its determination of its operating segments. Goodwill is tested for impairment at the reporting unit level. See Note 13 for additional information regarding the Company's method of determining operating and reportable segments.

Long-Lived Assets and Intangible Assets with Definite Lives

Long-lived assets, which consist of property and equipment and intangible assets with definite lives, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. The carrying value of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying value is deemed not to be recoverable, an impairment loss is recorded equal to the amount by which the carrying value of the long-lived asset exceeds its fair value. Amortization of definite-lived intangible assets is computed either on a straight-line basis or based on the pattern in which the economic benefits of the asset will be realized.

Fair Value Measurements

The Company categorizes its financial instruments measured at fair value into a fair value hierarchy that prioritizes the inputs used in pricing the asset or liability. The three levels of the fair value hierarchy are:

Level 1: Observable inputs obtained from independent sources, such as quoted prices for identical assets and liabilities in active markets.

IAC/INTERACTIVECORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Level 2: Other inputs, which are observable directly or indirectly, such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active and inputs that are derived principally from or corroborated by observable market data. The fair values of the Company's Level 2 financial assets are primarily obtained from observable market prices for identical underlying securities that may not be actively traded. Certain of these securities may have different market prices from multiple market data sources, in which case an average market price is used.

Level 3: Unobservable inputs for which there is little or no market data and require the Company to develop its own assumptions, based on the best information available in the circumstances, about the assumptions market participants would use in pricing the assets or liabilities. See Note 7 for a discussion of fair value measurements made using Level 3 inputs.

The Company's non-financial assets, such as goodwill, intangible assets and property and equipment, as well as equity and cost method investments, are adjusted to fair value only when an impairment charge is recognized. Such fair value measurements are based predominantly on Level 3 inputs.

Traffic Acquisition Costs

Traffic acquisition costs consist of payments made to partners who distribute our B2B customized browser-based applications, integrate our paid listings into their websites or direct traffic to our websites. These payments include amounts based on revenue share and other arrangements. The Company expenses these payments in the period incurred as a component of cost of revenue in the accompanying consolidated statement of operations.

Advertising Costs

Advertising costs are expensed in the period incurred (when the advertisement first runs for production costs that are initially capitalized) and represent online marketing, including fees paid to search engines and third parties that distribute our B2C downloadable applications, and offline marketing, which is primarily television advertising. Advertising expense is \$971.8 million, \$824.1 million and \$774.1 million for the years ended December 31, 2014, 2013 and 2012, respectively.

The Company capitalizes and amortizes the costs associated with certain distribution arrangements that require it to pay a fee per access point delivered. These access points are generally in the form of downloadable applications associated with our B2C operations. These fees are amortized over the estimated useful lives of the access points to the extent the Company can reasonably estimate a probable future economic benefit and the period over which such benefit will be realized (generally 18 months). Otherwise, the fees are charged to expense as incurred.

Legal Costs

Legal costs are expensed as incurred.

Income Taxes

The Company recognizes liabilities for uncertain tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement.

The Company accounts for income taxes under the liability method, and deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying values of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. A valuation allowance is provided on deferred tax assets if it is determined that it is more likely than not that the deferred tax asset will not be realized. The Company records interest, net of any applicable related income tax benefit, on potential income tax contingencies as a component of income tax expense.

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Earnings Per Share

Basic earnings per share is computed by dividing net earnings attributable to IAC shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if stock options and other commitments to issue common stock were exercised or equity awards vested resulting in the issuance of common stock that could share in the earnings of the Company.

Foreign Currency Translation and Transaction Gains and Losses

The financial position and operating results of foreign entities whose primary economic environment is based on their local currency are consolidated using the local currency as the functional currency. These local currency assets and liabilities are translated at the rates of exchange as of the balance sheet date, and local currency revenue and expenses of these operations are translated at average rates of exchange during the period. Translation gains and losses are included in accumulated other comprehensive income as a component of shareholders' equity. Transaction gains and losses resulting from assets and liabilities denominated in a currency other than the functional currency are included in the consolidated statement of operations as a component of other (expense) income, net.

Translation gains and losses relating to foreign entities that are liquidated or substantially liquidated are reclassified out of accumulated other comprehensive income into earnings.

Stock-Based Compensation

Stock-based compensation is measured at the grant date based on the fair value of the award and is generally expensed over the requisite service period. See Note 12 for a discussion of the Company's stock-based compensation plans.

Redeemable Noncontrolling Interests

Noncontrolling interests in the consolidated subsidiaries of the Company should ordinarily be reported on the consolidated balance sheet within shareholders' equity, separately from the Company's equity. However, securities that are redeemable at the option of the holder and not solely within the control of the issuer must be classified outside of shareholders' equity. Accordingly, if redemption of the noncontrolling interests is outside the control of the Company, the interests are included outside of shareholders' equity in the accompanying consolidated balance sheet. In connection with the acquisition of certain subsidiaries, management of these businesses has retained an ownership interest. The Company is party to fair value put and call arrangements with respect to these interests. These put and call arrangements allow management of these businesses to require the Company to purchase their interests or allow the Company to acquire such interests at fair value, respectively. The put arrangements do not meet the definition of a derivative instrument as the put agreements do not provide for net settlement. These put and call arrangements become exercisable by the Company and the counter-party at various dates over the next four years. No put and call arrangements were exercised during 2014 and 2012. During 2013, two of these arrangements were exercised. These put arrangements are exercisable by the counter-party outside the control of the Company. Accordingly, to the extent that the fair value of these interests exceeds the value determined by normal noncontrolling interest accounting, the value of such interests is adjusted to fair value with a corresponding adjustment to additional paid-in capital. During the years ended December 31, 2014, 2013 and 2012, the Company recorded adjustments of \$27.8 million, \$40.6 million and \$4.3 million, respectively, to increase these interests to fair value. Fair value determinations require high levels of judgment and are based on various valuation techniques, including market comparables and discounted cash flow projections.

Recent Accounting Pronouncement

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers, which clarifies the principles for recognizing revenue and develops a common standard for all industries. The new guidance is effective for reporting periods beginning after December 15, 2016. Entities have the option of using either a full retrospective or cumulative effect approach to adopt ASU No. 2014-09. The Company is currently evaluating the new guidance and has not yet determined whether the adoption of the new standard will have a material impact on its consolidated financial statements or the method of adoption.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation.

NOTE 3—INCOME TAXES

U.S. and foreign earnings from continuing operations before income taxes are as follows:

	Years Ended December 31,		
	2014	2013	2012
	(In thousands)		
U.S.	\$174,792	\$331,520	\$214,675
Foreign	95,137	84,781	74,387
Total	\$269,929	\$416,301	\$289,062

The components of the (benefit) provision for income taxes attributable to continuing operations are as follows:

	Years Ended December 31,		
	2014	2013	2012
	(In thousands)		
Current income tax (benefit) provision :			
Federal	\$(45,842) \$115,250	\$56,439
State	(14,787) 13,946	9,204
Foreign	19,132	14,402	16,496
Current income tax (benefit) provision	(41,497) 143,598	82,139
Deferred income tax provision (benefit):			
Federal	74,255	(821) 40,414
State	3,090	(2,117) 1,978
Foreign	(476) (6,158) (5,316
Deferred income tax provision (benefit)	76,869	(9,096) 37,076
Income tax provision	\$35,372	\$134,502	\$119,215

The current income tax payable was reduced by \$45.0 million, \$32.9 million and \$57.1 million for the years ended December 31, 2014, 2013 and 2012, respectively, for excess tax deductions attributable to stock-based compensation.

The related income tax benefits are recorded as increases to additional paid-in capital.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Income taxes receivable (payable) and deferred tax assets (liabilities) are included in the following captions in the accompanying consolidated balance sheet at December 31, 2014 and 2013:

	December 31,

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At December 31, 2014, the Company has federal and state net operating losses ("NOLs") of \$61.5 million and \$82.6 million, respectively. If not utilized, the federal NOLs will expire at various times between 2023 and 2034, and the state NOLs will expire at various times between 2015 and 2034. Utilization of federal NOLs will be subject to limitations under Section 382 of the Internal Revenue Code of 1986, as amended. In addition, utilization of certain state NOLs may be subject to limitations under state laws similar to Section 382 of the Internal Revenue Code of 1986. At December 31, 2014, the Company has foreign NOLs of \$107.5 million available to offset future income. Of these foreign NOLs, \$98.1 million can be carried forward indefinitely and \$9.3 million will expire at various times between 2015 and 2034. During 2014, the Company recognized tax benefits related to NOLs of \$0.8 million. At December 31, 2014, the Company has \$5.1 million of state capital losses. If not utilized, the state capital losses will expire between 2015 and 2017. Utilization of capital losses will be limited to the Company's ability to generate future capital gains.

At December 31, 2014, the Company has tax credit carryforwards of \$19.0 million. Of this amount, \$5.2 million relates to federal credits for foreign taxes, \$8.2 million relates to state tax credits for research activities, and \$5.6 million relates to various state and local tax credits. Of these credit carryforwards, \$10.0 million can be carried forward indefinitely and \$9.0 million will expire within ten years.

During 2014, the Company's valuation allowance increased by \$36.0 million primarily due to increases in unrealized capital losses, net operating losses, and tax credits. At December 31, 2014, the Company has a valuation allowance of \$98.3 million related to the portion of tax loss carryforwards and other items for which it is more likely than not that the tax benefit will not be realized.

A reconciliation of the income tax provision to the amounts computed by applying the statutory federal income tax rate to earnings from continuing operations before income taxes is shown as follows:

	Years Ended December 31,		
	2014	2013	2012
	(In thousands)		
Income tax provision at the federal statutory rate of 35%	\$94,475	\$145,705	\$101,172
Change in tax reserves, net	(86,151)) 1,791	17,703
Foreign income taxed at a different statutory tax rate	(8,943)) (17,428)) (16,240)
State income taxes, net of effect of federal tax benefit	7,240	7,469	7,650
Non-deductible goodwill associated with the sale of Urbanspoon	6,982	—	—
Non-deductible impairments for certain cost method investments	23,310	1,756	226
Other, net	(1,541)) (4,791)) 8,704
Income tax provision	\$35,372	\$134,502	\$119,215

No income taxes have been provided on indefinitely reinvested earnings of certain foreign subsidiaries aggregating \$605.7 million at December 31, 2014. The amount of the unrecognized deferred income tax liability with respect to such earnings is \$141.5 million.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

A reconciliation of the beginning and ending amount of unrecognized tax benefits, excluding interest, is as follows:

	December 31,		
	2014	2013	2012
	(In thousands)		
Balance at January 1	\$275,813	\$379,281	\$351,561
Additions based on tax positions related to the current year	2,159	2,887	6,278
Additions for tax positions of prior years	1,622	3,189	45,287
Reductions for tax positions of prior years	(5,611)	(17,116)	(17,545)
Settlements	(5,092)	(78,954)	(5,349)
Expiration of applicable statutes of limitations	(238,505)	(13,474)	(951)
Balance at December 31	\$30,386	\$275,813	\$379,281

The Company recognizes interest and, if applicable, penalties related to unrecognized tax benefits in the income tax provision. Included in the income tax provision for continuing operations for the years ended December 31, 2014, 2013 and 2012 is a \$58.5 million benefit, \$4.8 million expense and \$5.2 million expense, respectively, net of related deferred taxes of \$35.3 million, \$2.8 million and \$3.1 million, respectively, for interest on unrecognized tax benefits. Included in the income tax provision for discontinued operations for the years ended December 31, 2014, 2013 and 2012 is a \$19.7 million benefit, \$1.4 million expense and \$2.8 million benefit, respectively, net of related deferred taxes of \$11.7 million, \$0.8 million and \$1.7 million, respectively, for interest on unrecognized tax benefits. At December 31, 2014 and 2013, the Company has accrued \$2.8 million and \$133.0 million, respectively, for the payment of interest. At December 31, 2014 and 2013, the Company has accrued \$2.9 million and \$5.1 million, respectively, for penalties.

The Company is routinely under audit by federal, state, local and foreign authorities in the area of income tax. These audits include questioning the timing and the amount of income and deductions and the allocation of income and deductions among various tax jurisdictions. The Internal Revenue Service is currently auditing the Company's federal income tax returns for the years ended December 31, 2010 through 2012. Various other jurisdictions are open to examination for various tax years beginning with 2006. Income taxes payable include reserves considered sufficient to pay assessments that may result from examination of prior year tax returns. Changes to reserves from period to period and differences between amounts paid, if any, upon resolution of audits and amounts previously provided may be material. Differences between the reserves for income tax contingencies and the amounts owed by the Company are recorded in the period they become known.

The statutes of limitations for federal income taxes for the years 2001 through 2009 expired on July 1, 2014. As a result, previously unrecognized tax benefits, including interest, totaling \$374.8 million were recognized in the third quarter of 2014. The income tax benefit to continuing operations and discontinued operations was \$88.2 million and \$175.7 million, respectively. The remaining amount of \$110.9 million impacted various balance sheet accounts, primarily non-current deferred tax assets, which were reduced by \$100.1 million. At December 31, 2014 and 2013, unrecognized tax benefits, including interest, are \$33.2 million and \$408.8 million, respectively. If unrecognized tax benefits at December 31, 2014 are subsequently recognized, \$30.5 million, net of related deferred tax assets and interest, would reduce income tax provision for continuing operations. The Company believes that it is reasonably possible that its unrecognized tax benefits could decrease by \$8.8 million within twelve months of the current reporting date primarily due to expirations of statutes of limitations; \$8.4 million of which would reduce the income tax provision for continuing operations.

Total	\$86,702

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 5—MARKETABLE SECURITIES

At December 31, 2014, current available-for-sale marketable securities are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt securities	\$ 159,418	\$ 34	\$(255)) \$ 159,197
Total debt securities	159,418	34	(255)) 159,197
Equity security	98	1,353	—	1,451
Total marketable securities	\$ 159,516	\$ 1,387	\$(255)) \$ 160,648

The unrealized loss of \$0.3 million in the table above relates to fifty-eight securities with an aggregate fair value of \$123.2 million. There are no investments in current available-for-sale marketable debt securities that have been in a continuous unrealized loss position for longer than twelve months as of December 31, 2014.

All of the Company's marketable debt securities are rated investment grade. The gross unrealized losses on the marketable debt securities relate principally to changes in interest rates. Because the Company does not intend to sell any marketable debt securities and it is not more likely than not that the Company will be required to sell any marketable debt securities before recovery of their amortized cost bases, which may be maturity, the Company does not consider any of its marketable debt securities to be other-than-temporarily impaired at December 31, 2014.

At December 31, 2013, current available-for-sale marketable securities are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
Corporate debt security	\$ 1,004	\$ 4	\$—	\$ 1,008
Total debt security	1,004	4	—	1,008
Equity securities	216	4,780	—	4,996
Total marketable securities	\$ 1,220	\$ 4,784	\$—	\$ 6,004

The unrealized gains and losses in the tables above are included in "Accumulated other comprehensive loss" in the accompanying consolidated balance sheet.

The contractual maturities of debt securities classified as current available-for-sale at December 31, 2014 are as follows:

	Amortized Cost	Fair Value
	(In thousands)	
Due in one year or less	\$ 54,502	\$ 54,455
Due after one year through five years	104,916	104,742
Total	\$ 159,418	\$ 159,197

The following table presents the proceeds from maturities and sales of current and non-current available-for-sale marketable securities and the related gross realized gains and losses:

IAC/INTERACTIVECORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

	December 31,		
	2014	2013	2012
	(In thousands)		
Proceeds from maturities and sales of available-for-sale marketable securities	\$25,223	\$82,160	\$205,944
Gross realized gains	3,362	35,692	4,075
Gross realized losses	—	—	(5)

Gross realized gains and losses from the maturities and sales of available-for-sale marketable securities are included in "Other (expense) income, net" in the accompanying consolidated statement of operations.

NOTE 6—LONG-TERM INVESTMENTS

Long-term investments consist of:

	December 31,	
	2014	2013
	(In thousands)	
Cost method investments	\$90,910	\$137,286
Equity method investments	10,593	22,073
Long-term marketable equity securities	7,410	11,711
Auction rate security	6,070	8,920
Total long-term investments	\$114,983	\$179,990

In 2014, the Company recorded \$66.6 million of other-than-temporary impairment charges for certain cost method investments as a result of our assessment of the near-term prospects and financial condition of the investees.

In 2013, the Company recorded a \$5.0 million other-than-temporary impairment charge related to a cost method investment. The decline in fair value was due to the investees continued losses, negative working capital and significant debt financing.

These charges are included in "Other (expense) income, net" in the accompanying consolidated statement of operations.

The Company has a 20% interest in the voting common stock of Zhenai Inc. ("Zhenai"), a leading provider of online matchmaking services in China. Our voting power is limited by a shareholders agreement. In light of this limitation and the significance of our interest relative to other shareholders, we do not have the ability to exercise significant influence over the operating and financial matters of Zhenai and this investment is accounted for as a cost method investment.

Equity method investments

In 2014, the Company recorded a \$4.2 million other-than-temporary impairment charge on one of its investments following the sale of a majority of the investee's assets.

In 2013, the Company recorded a non-cash charge of \$18.6 million related to the re-measurement of the carrying value of our equity method investment in The Daily Beast to fair value in connection with the acquisition of a controlling interest.

These charges are included in "Equity in losses of unconsolidated affiliates" in the accompanying consolidated statement of operations.

IAC/INTERACTIVECORP AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Long-term marketable equity securities

The cost basis of the Company's long-term marketable equity security at December 31, 2014 is \$8.7 million with a gross unrealized loss of \$1.2 million, which is included in "Accumulated other comprehensive loss" in the accompanying consolidated balance sheet. The Company evaluated the near-term prospects of the issuer in relation to the severity and duration of the unrealized loss. Based on the duration, less than two months, of the unrealized loss and the Company's ability and intent to hold this security for a reasonable period of time sufficient for an expected recovery of fair value, the Company does not consider the security to be other-than-temporarily impaired at December 31, 2014. The cost basis of the Company's long-term marketable equity securities at December 31, 2013 is \$8.8 million, with gross unrealized gains of \$3.0 million included in "Accumulated other comprehensive loss" in the accompanying consolidated balance sheet. In 2012, the Company recorded an \$8.7 million other-than-temporary impairment charge related to one of its securities that was in a continuous unrealized loss position for more than one year, based on the Company's evaluation of the near-term prospects of the issuer in relation to the severity (fair value was 50 percent less than cost) and duration of the unrealized loss. The impairment charge is included in "Other (expense) income, net" in the accompanying consolidated statement of operations.

Auction rate security

See Note 7 for information regarding the auction rate security.

Settlements	—	8,109	—	256
Balance at December 31	\$6,070	\$(30,140)	\$8,920	\$(45,828)

Auction rate security

The Company's auction rate security is valued by discounting the estimated future cash flow streams of the security over the life of the security. Credit spreads and other risk factors are also considered in establishing fair value. The cost basis of the auction rate security is \$10.0 million, with a gross unrealized loss of \$3.9 million and \$1.1 million at December 31, 2014 and December 31, 2013, respectively. The unrealized losses are included in "Accumulated other comprehensive loss" in the accompanying consolidated balance sheet. At December 31, 2014, the auction rate security is rated BBB+ and matures in 2035. The Company does not consider the auction rate security to be

other-than-temporarily impaired at December 31, 2014, due to

69

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

its high credit rating and because the Company does not intend to sell this security, and it is not more likely than not that the Company will be required to sell this security, before the recovery of its amortized cost basis, which may be maturity.

Contingent consideration arrangements

As of December 31, 2014, there are five contingent consideration arrangements related to business acquisitions. Four of the contingent consideration arrangements have limits as to the maximum amount that can be paid; the maximum contingent payments related to these arrangements is \$166.9 million and the fair value of these four arrangements at December 31, 2014 is \$29.5 million. The fair value of the one contingent consideration arrangement without a limit on the maximum amount is \$0.7 million at December 31, 2014. The contingent consideration arrangements are generally based upon earnings performance and/or operating metrics. The Company primarily uses probability-weighted analyses to determine the amount of the gross liability, and, to the extent the arrangement is long-term in nature, applies a discount rate, which captures the risks associated with the obligation. The number of scenarios in the probability-weighted analyses can vary; generally, more scenarios are prepared for longer duration and more complex arrangements. The most significant contingent consideration arrangement relates to the acquisition of Twoo.com. The Twoo.com contingent consideration arrangement is payable in three annual installments, which began in 2014. Payments are based upon EBITDA and number of monthly active users. The 2014 installment of \$7.4 million was paid in the second quarter of 2014. The remaining aggregate amount of the 2015 and 2016 installment payments cannot exceed €77.9 million (\$94.9 million at December 31, 2014). The estimate of the fair value for the Twoo.com remaining payments was determined using a probability weighted analysis that forecasted EBITDA and monthly active users based primarily on management's internal projections and strategic plans. The fair value of this arrangement is determined using a discount rate of 15%.

The fair values of the contingent consideration arrangements are sensitive to changes in the forecasts of earnings and/or the relevant operating metrics and changes in discount rates. The Company remeasures the fair value of the contingent consideration arrangements each reporting period, and changes are recognized in "General and administrative expense" in the accompanying consolidated statement of operations. The contingent consideration arrangement liability at December 31, 2014 includes a current portion of \$10.7 million and non-current portion of \$19.6 million, which are included in "Accrued expenses and other current liabilities" and "Other long-term liabilities," respectively, in the accompanying consolidated balance sheet.

Financial instruments measured at fair value only for disclosure purposes

The following table presents the carrying value and the fair value of financial instruments measured at fair value only for disclosure purposes:

December 31, 2014		December 31, 2013	
Carrying Value	Fair Value	Carrying Value	Fair Value

(In thousands)

Long-term debt	\$ (1,080,000)	\$ (1,099,813)	\$ (1,080,000)	\$ (1,058,396)
----------------	-----------------	-----------------	-----------------	-----------------

The fair value of long-term debt is estimated using market prices or indices for similar liabilities and taking into consideration other factors such as credit quality and maturity, which are Level 3 inputs.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 8—LONG-TERM DEBT

Long-term debt consists of:

	December 31,	
	2014	2013
	(In thousands)	
4.875% Senior Notes due November 30, 2018 (the "2013 Senior Notes"); interest payable each May 30 and November 30, which commenced May 30, 2014	\$ 500,000	\$ 500,000
4.75% Senior Notes due December 15, 2022 (the "2012 Senior Notes"); interest payable each June 15 and December 15, which commenced June 15, 2013	500,000	500,000
5% New York City Industrial Development Agency Liberty Bonds due September 1, 2035 (the "Liberty Bonds"); interest payable each March 1 and September 1, which commenced March 1, 2006	80,000	80,000
Total long-term debt	\$ 1,080,000	\$ 1,080,000

We may redeem the 2013 Senior Notes at the redemption prices set forth below, together with accrued and unpaid interest thereon to the applicable redemption date, if redeemed during the twelve-month period beginning on November 30 of the years indicated below:

Year	Percentage	
2015	103.250	%
2016	101.625	%
2017 and thereafter	100.000	%

At any time prior to December 15, 2017, we may redeem the 2012 Senior Notes at a redemption price equal to the sum of the principal amount thereof, plus accrued and unpaid interest and a make-whole premium. Thereafter, we may redeem the 2012 Senior Notes at the redemption prices set forth below, together with accrued and unpaid interest thereon to the applicable redemption date, if redeemed during the twelve-month period beginning on December 15 of the years indicated below:

Year	Percentage	
2017	102.375	%
2018	101.583	%
2019	100.792	%
2020 and thereafter	100.000	%

The 2013 and 2012 Senior Notes are unconditionally guaranteed by certain domestic subsidiaries, which are designated as guarantor subsidiaries. The guarantor subsidiaries are the same for the 2013 and 2012 Senior Notes. See Note 20 for guarantor and non-guarantor financial information.

The indentures governing the 2013 and 2012 Senior Notes contain identical covenants that would limit our ability to pay dividends or make other distributions and repurchase or redeem our stock in the event a default has occurred or we are not in compliance with the maximum leverage ratio of 3.0 to 1.0. At December 31, 2014, there were no limitations pursuant thereto. There are additional covenants that limit our ability and the ability of our subsidiaries to, among other things, (i) incur indebtedness, make investments, or sell assets in the event we are not in compliance with the financial ratio set forth in the indenture, and (ii) incur liens, enter into agreements restricting our subsidiaries' ability to pay dividends, enter into transactions with affiliates and consolidate, merge or sell all or substantially all of our assets.

On December 21, 2012, the Company entered into a \$300 million revolving credit facility, which expires on December 21, 2017. The annual fee to maintain the revolving credit facility is 30 basis points. In addition, the terms of the revolving credit facility require that we maintain a leverage ratio of not more than 3.0 to 1.0 and restrict our ability to incur

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

additional indebtedness. At December 31, 2014 and 2013, there are no outstanding borrowings under the revolving credit facility. IAC's obligation under the revolving credit facility is unconditionally guaranteed by the same domestic subsidiaries that guarantee the 2013 and 2012 Senior Notes and is also secured by the stock of certain of our domestic and foreign subsidiaries.

IAC's payment obligation under the Liberty Bonds is collateralized by a mortgage interest in the corporate headquarters building.

Long-term debt maturities are as follows:

Years Ending December 31,	(In thousands)
2018	\$500,000
2022	500,000
2035	80,000
Total	\$1,080,000

NOTE 9—SHAREHOLDERS' EQUITY

Description of Common Stock and Class B Convertible Common Stock

Each holder of shares of IAC common stock and IAC Class B common stock vote together as a single class with respect to matters that may be submitted to a vote or for the consent of IAC's shareholders generally, including the election of directors. In connection with any such vote, each holder of IAC common stock is entitled to one vote for each share of IAC common stock held and each holder of IAC Class B common stock is entitled to ten votes for each share of IAC Class B common stock held. Notwithstanding the foregoing, the holders of shares of IAC common stock, acting as a single class, are entitled to elect 25% of the total number of IAC's directors, and, in the event that 25% of the total number of directors shall result in a fraction of a director, then the holders of shares of IAC common stock, acting as a single class, are entitled to elect the next higher whole number of IAC's directors. In addition, Delaware law requires that certain matters be approved by the holders of shares of IAC common stock or holders of IAC Class B common stock voting as a separate class.

Shares of IAC Class B common stock are convertible into shares of IAC common stock at the option of the holder thereof, at any time, on a share-for-share basis. Such conversion ratio will in all events be equitably preserved in the event of any recapitalization of IAC by means of a stock dividend on, or a stock split or combination of, outstanding shares of IAC common stock or IAC Class B common stock, or in the event of any merger, consolidation or other reorganization of IAC with another corporation. Upon the conversion of shares of IAC Class B common stock into shares of IAC common stock, those shares of IAC Class B common stock will be retired and will not be subject to reissue. Shares of IAC common stock are not convertible into shares of IAC Class B common stock.

Except as described herein, shares of IAC common stock and IAC Class B common stock are identical. The holders of shares of IAC common stock and the holders of shares of IAC Class B common stock are entitled to receive, share for share, such dividends as may be declared by IAC's Board of Directors out of funds legally available therefore. In the event of a liquidation, dissolution, distribution of assets or winding-up of IAC, the holders of shares of IAC common stock and the holders of shares of IAC Class B common stock are entitled to receive, share for share, all the assets of IAC available for distribution to its stockholders, after the rights of the holders of any IAC preferred stock have been satisfied.

At December 31, 2014, Mr. Diller, Chairman of the Board and Senior Executive of the Company, holds 5.8 million shares, representing 100% of IAC's outstanding Class B common stock and 42.5% of the outstanding total voting power of the Company.

Reserved Common Shares

In connection with equity compensation plans, 22.2 million shares of IAC common stock are reserved at December 31, 2014.

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Warrants

No warrants were outstanding at December 31, 2014, 2013 and 2012. No warrants were issued during the three years ended December 31, 2014. During the year ended December 31, 2012, 14.3 million warrants were exercised. Some of those warrants were exercised on a cashless or net basis and IAC received proceeds of \$284.1 million from the exercise of warrants exercised on a gross basis during the year ended December 31, 2012. A total of 11.7 million common shares were issued in connection with the exercise of these warrants.

Common Stock Repurchases

During 2014, the Company did not purchase any shares of IAC common stock. During 2013 and 2012, the Company purchased 4.5 million and 15.5 million shares of IAC common stock for aggregate consideration, on a trade date basis, of \$229.1 million and \$716.1 million, respectively.

On April 30, 2013, IAC's Board of Directors authorized the repurchase of up to 10 million shares of IAC common stock. At December 31, 2014, the Company has approximately 8.6 million shares remaining in its share repurchase authorization.

NOTE 10—ACCUMULATED OTHER COMPREHENSIVE LOSS

The following tables present the components of accumulated other comprehensive loss and items reclassified out of accumulated other comprehensive loss into earnings:

	Year Ended December 31, 2014		
	Foreign Currency Translation Adjustment (In thousands)	Unrealized Gains (Losses) On Available-For-Sale Securities	Accumulated Other Comprehensive Loss
Balance at January 1	\$ (20,352)	\$ 7,306	\$ (13,046)
Other comprehensive loss before reclassifications, net of tax benefit of \$0.7 million related to unrealized losses on available-for-sale securities	(66,496)	(6,233)	(72,729)
Amounts reclassified related to unrealized gains on available-for-sale securities, net of tax provision of \$1.2 million	—	(1,925)	(1,925)
Net current period other comprehensive loss	(66,496)	(8,158)	(74,654)
Balance at December 31	\$ (86,848)	\$ (852)	\$ (87,700)
	Year Ended December 31, 2013		
	Foreign Currency Translation Adjustment (In thousands)	Unrealized (Losses) Gains On Available-For-Sale Securities	Accumulated Other Comprehensive (Loss) Income
Balance at January 1	\$ (25,073)	\$ (7,096)	\$ (32,169)
Other comprehensive income before reclassifications, net of tax provision of \$3.9 million related to unrealized gains on available-for-sale securities	4,721	43,235	47,956
Amounts reclassified related to unrealized gains on available-for-sale securities, net of tax provision of \$6.9 million	—	(28,833)	(28,833)
Net current period other comprehensive income	4,721	14,402	19,123
Balance at December 31	\$ (20,352)	\$ 7,306	\$ (13,046)

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unrealized gains reclassified out of accumulated other comprehensive loss related to the maturities and sales of available-for-sale securities are included in "Other (expense) income, net" in the accompanying consolidated statement of operations. Unrealized gains reclassified out of accumulated other comprehensive loss into other (expense) income, net for the year ended December 31, 2012 was \$2.1 million.

NOTE 11—EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share attributable to IAC shareholders.

	Years Ended December 31,					
	2014		2013		2012	
	Basic	Diluted	Basic	Diluted	Basic	Diluted
	(In thousands, except per share data)					
Numerator:						
Earnings from continuing operations	\$234,557	\$234,557	\$281,799	\$281,799	\$169,847	\$169,847
Net loss (earnings) attributable to noncontrolling interests	5,643	5,643	2,059	2,059	(1,530)	(1,530)
Earnings from continuing operations attributable to IAC shareholders	240,200	240,200	283,858	283,858	168,317	168,317
Earnings (loss) from discontinued operations attributable to IAC shareholders	174,673	174,673	1,926	1,926	(9,051)	(9,051)
Net earnings attributable to IAC shareholders	\$414,873	\$414,873	\$285,784	\$285,784	\$159,266	\$159,266
Denominator:						
Weighted average basic shares outstanding	83,292	83,292	83,480	83,480	86,247	86,247
Dilutive securities including stock options, warrants and RSUs ^{(a)(b)}	—	5,266	—	3,262	—	6,842
Denominator for earnings per share—weighted average shares ^{(a)(b)}	83,292	88,558	83,480	86,742	86,247	93,089
Earnings (loss) per share attributable to IAC shareholders:						
Earnings per share from continuing operations	\$2.88	\$2.71	\$3.40	\$3.27	\$1.95	\$1.81
Discontinued operations	2.10	1.97	0.02	0.02	(0.10)	(0.10)
Earnings per share	\$4.98	\$4.68	\$3.42	\$3.29	\$1.85	\$1.71

If the effect is dilutive, weighted average common shares outstanding include the incremental shares that would be issued upon the assumed exercise of stock options and vesting of restricted stock units ("RSUs"). For the years (a) ended December 31, 2014, 2013 and 2012 approximately 0.3 million, 0.4 million and 0.8 million shares, respectively, related to potentially dilutive securities are excluded from the calculation of diluted earnings per share because their inclusion would have been anti-dilutive.

(b) Performance-based stock units ("PSUs") are included in the denominator for earnings per share if (i) the applicable performance condition(s) has been met and (ii) the inclusion of the PSUs is dilutive for the respective reporting

periods. For each of the years ended December 31, 2014 and 2012 less than 0.1 million PSUs that were probable of vesting were excluded from the calculation of diluted earnings per share because the performance conditions had not been met. For the year ended December 31, 2013, all PSUs that were considered to be probable of vesting were included in the calculation of diluted earnings per share as their performance conditions had been met.

NOTE 12—STOCK-BASED COMPENSATION

IAC currently has three active plans under which awards have been granted. These plans cover stock options to acquire shares of IAC common stock, RSUs, PSUs and restricted stock, as well as provide for the future grant of these and other equity

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

awards. These plans authorize the Company to grant awards to its employees, officers, directors and consultants. At December 31, 2014, there are 9.1 million shares available for grant under the Company's stock-based compensation plans.

The plans were adopted in 2005, 2008 and 2013, have a stated term of ten years, and provide that the exercise price of stock options granted will not be less than the market price of the Company's common stock on the grant date. The plans do not specify grant dates or vesting schedules of awards as those determinations have been delegated to the Compensation and Human Resources Committee of IAC's Board of Directors (the "Committee"). Each grant agreement reflects the vesting schedule for that particular grant as determined by the Committee. Broad-based stock option awards issued to date have generally vested in equal annual installments over a four-year period and RSU awards currently outstanding generally vest in two 50% installments over a three and four-year period, in each case, from the grant date. PSU awards currently outstanding vest in two installments of up to 50% over a two-year period from the date of grant. In addition to equity awards outstanding under the three plans, stock options and other equity awards outstanding under terminated plans and plans assumed in acquisitions are reflected in the information set forth below.

The amount of stock-based compensation expense recognized in the consolidated statement of operations is reduced by estimated forfeitures, as the expense recorded is based on awards that are ultimately expected to vest. The forfeiture rate is estimated at the grant date based on historical experience and revised, if necessary, in subsequent periods if actual forfeitures differ from the estimated rate. At December 31, 2014, there is \$113.2 million of unrecognized compensation cost, net of estimated forfeitures, related to all equity-based awards, which is expected to be recognized over a weighted average period of approximately 2.4 years.

The total income tax benefit recognized in the accompanying consolidated statement of operations for the years ended December 31, 2014, 2013 and 2012 related to stock-based compensation is \$22.2 million, \$19.3 million and \$31.3 million, respectively.

Stock Options

Stock options outstanding at December 31, 2014 and changes during the year ended December 31, 2014 is as follows:

	December 31, 2014			
	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
	(Shares and intrinsic value in thousands)			
Outstanding at January 1, 2014	8,074	\$36.98		
Granted	747	67.95		
Exercised	(1,790)) 31.88		
Forfeited	(496)) 46.85		
Expired	(15)) 31.13		
Outstanding at December 31, 2014	6,520	\$41.19	6.0	\$133,077
Options exercisable	3,647	\$33.50	4.7	\$99,523

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between IAC's closing stock price on the last trading day of 2014 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on December 31, 2014. This amount changes based on the fair market value of IAC's common stock. The total intrinsic value of stock options exercised during the years ended December 31, 2014, 2013 and 2012 is \$63.3 million, \$65.6 million and \$84.8 million, respectively.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes the information about stock options outstanding and exercisable at December 31, 2014:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Outstanding at December 31, 2014	Weighted-Average Remaining Contractual Life in Years	Weighted-Average Exercise Price	Exercisable at December 31, 2014	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price
	(Shares in thousands)					
\$10.01 to \$20.00	431	4.5	\$17.91	431	4.5	\$17.91
\$20.01 to \$30.00	905	4.3	22.14	905	4.3	22.14
\$30.01 to \$40.00	1,148	6.3	31.84	749	6.2	31.60
\$40.01 to \$50.00	2,913	5.7	45.16	1,426	4.0	44.05
\$50.01 to \$60.00	381	7.3	58.51	136	7.3	58.44
\$60.01 to \$70.00	492	9.3	66.14	—	—	—
\$70.01 to \$80.00	250	9.3	71.55	—	—	—
	6,520	6.0	\$41.19	3,647	4.7	\$33.50

The fair value of each stock option award is estimated on the grant date using the Black-Scholes option pricing model. The Black-Scholes option pricing model incorporates various assumptions, including expected volatility and expected term. During 2014, 2013 and 2012, expected stock price volatilities were estimated based on the Company's historical volatility. The risk-free interest rates are based on U.S. Treasury yields for notes with comparable terms as the awards, in effect at the grant date. Expected term is based upon the historical exercise behavior of our employees and the dividend yields are based on IAC's historical dividend payments. The following are the weighted average assumptions used in the Black-Scholes option pricing model:

	Years Ended December 31,			
	2014	2013	2012	
Expected volatility	31	% 29	% 31	%
Risk-free interest rate	1.5	% 1.0	% 0.6	%
Expected term	4.8 years	6.2 years	4.4 years	
Dividend yield	1.5	% 2.0	% 1.2	%

Approximately 0.7 million, 0.7 million and 3.6 million stock options were granted by the Company during the years ended December 31, 2014, 2013 and 2012, respectively. The weighted average fair value of stock options granted during the years ended December 31, 2014, 2013 and 2012 with exercise prices equal to the market prices of IAC's common stock on the date of grant are \$16.67, \$10.67 and \$10.69, respectively. There are no stock options issued during the years ended December 31, 2014 and 2013 with exercise prices greater than the market value of IAC's common stock on the date of grant. The weighted average exercise price and weighted average fair value of stock options granted during the year ended December 31, 2012 with exercise prices greater than the market value of IAC's common stock on the date of grant are \$60.00 and \$7.61, respectively.

Cash received from stock option exercises and the related tax benefit realized for the years ended December 31, 2014, 2013 and 2012 are: \$39.1 million and \$25.5 million; \$40.7 million and \$17.2 million; and \$58.2 million and \$28.2 million, respectively. In December 2013, the Company's former Chief Executive Officer (the "Executive") became the Chairman of The Match Group; in connection with the Executive's compensation arrangement, the Executive exercised 0.5 million stock options, which were settled by the Company for \$9.2 million in cash. In January 2014, a portion of the Executive's outstanding IAC stock options were canceled and replaced with equity denominated in various subsidiaries of The Match Group. The incremental expense associated with this modification is \$7.4 million.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Restricted Stock Units and Performance-based Stock Units

RSUs and PSUs are awards in the form of phantom shares or units, denominated in a hypothetical equivalent number of shares of IAC common stock and with the value of each RSU and PSU equal to the fair value of IAC common stock at the date of grant. RSUs and PSUs may be settled in cash, stock or both, as determined by the Committee at the time of grant. Each RSU and PSU grant is subject to service-based vesting, where a specific period of continued employment must pass before an award vests. PSUs also include performance-based vesting, where certain performance targets set at the time of grant must be achieved before an award vests. The Company recognizes expense for all RSUs and PSUs for which vesting is considered probable. For RSU grants, the expense is measured at the grant date as the fair value of IAC common stock and expensed as non-cash compensation over the vesting term. For PSU grants, the expense is measured at the grant date as the fair value of IAC common stock and expensed as non-cash compensation over the vesting term if the performance targets are considered probable of being achieved.

Unvested RSUs and PSUs outstanding at December 31, 2014 and changes during the year ended December 31, 2014 are as follows:

	RSUs		PSUs	
	Number of shares	Weighted Average Grant Date Fair Value	Number of shares ^(a)	Weighted Average Grant Date Fair Value
	(Shares in thousands)			
Unvested at January 1, 2014	692	\$43.50	322	\$31.27
Granted	257	67.69	35	71.39
Vested	(199)) 36.70	(102)) 31.15
Forfeited	—	—	(220)) 31.32
Unvested at December 31, 2014	750	\$53.61	35	\$71.39

^(a) Included in the table are PSUs which vest at the end of two years in varying amounts depending upon certain performance conditions. The PSU table above includes these awards at their maximum potential payout.

The weighted average fair value of RSUs and PSUs granted during the years ended December 31, 2014, 2013 and 2012 based on market prices of IAC's common stock on the grant date was \$68.13, \$42.32 and \$46.24, respectively. The total fair value of RSUs and PSUs that vested during the years ended December 31, 2014, 2013 and 2012 was \$20.4 million, \$14.5 million and \$139.0 million, respectively.

Equity Instruments Denominated in the Shares of Certain Subsidiaries

IAC has granted stock options and phantom equity units, which are denominated in the equity of its subsidiaries, to employees and management of certain subsidiaries. These equity awards vest over a period of years or upon the occurrence of certain prescribed events. In some cases, IAC has taken a preferred interest in the subsidiary with a face value equal to the subsidiary's acquisition price; or, when funding a start-up business, its investment cost, or a certain fixed other amount. In some cases, these preferred interests accrete interest or dividends at a prescribed rate of return. The value of the stock options and phantom equity units is tied to the value of the common stock of the entity, with the equity awards employees and management receive as a whole generally representing a small minority of the total common stock outstanding. Accordingly, these interests only have value to the extent the relevant business appreciates in value above the preferred interest (including the accretion of interest or dividends), our investment cost or other fixed amount or, in the case of stock options, the initial value utilized to determine the exercise price. These interests can have significant value in the event of significant appreciation. The interests are ultimately settled in IAC common stock or cash at the option of IAC, with fair market value generally determined by negotiation or arbitration, at various dates through 2024. The expense associated with these equity awards is initially measured at fair value at the grant date and is expensed as non-cash compensation over the vesting term. The aggregate number of IAC common shares

that would be required to settle these interests at current estimated fair values, including vested and unvested

77

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

interests, at December 31, 2014 is 5.8 million shares, which is included in the calculation of diluted earnings per share if the effect is dilutive. The comparable amount at December 31, 2013 is 1.8 million shares.

NOTE 13—SEGMENT INFORMATION

The overall concept that IAC employs in determining its operating segments is to present the financial information in a manner consistent with how the chief operating decision maker views the businesses, how the businesses are organized as to segment management, and the focus of the businesses with regards to the types of services or products offered or the target market. Operating segments are combined for reporting purposes if they meet certain aggregation criteria, which principally relate to the similarity of their economic characteristics or, in the case of the eCommerce reportable segment, do not meet the quantitative thresholds that require presentation as separate operating segments.

The Company's primary financial measure is Adjusted EBITDA, which is defined as operating income excluding: (1) non-cash compensation expense; (2) depreciation; and (3) acquisition-related items consisting of (i) amortization of intangible assets and goodwill and intangible asset impairments and (ii) gains and losses recognized on changes in the fair value of contingent consideration arrangements. The Company believes this measure is useful for analysts and investors as this measure allows a more meaningful comparison between our (a) performance and that of our competitors. Moreover, our management uses this measure internally to evaluate the performance of our business as a whole and our individual business segments. The above items are excluded from our Adjusted EBITDA measure because these items are non-cash in nature, and we believe that by excluding these items, Adjusted EBITDA corresponds more closely to the cash operating income generated from our business, from which capital investments are made and debt is serviced. Adjusted EBITDA has certain limitations in that it does not take into account the impact to IAC's statement of operations of certain expenses.

(b) Consistent with the Company's primary metric (described in (a) above), the Company excludes, if applicable, goodwill and intangible assets from the measure of segment assets presented above.

Revenue by geography is based on where the customer is located. Geographic information about revenue and long-lived assets is presented below:

^(c) Corporate assets consist primarily of cash and cash equivalents, marketable securities and IAC's headquarters building.

NOTE 14—COMMITMENTS

The Company leases land, office space, data center facilities and equipment used in connection with its operations under various operating leases, many of which contain escalation clauses. The Company is also committed to pay a portion of the related operating expenses under a data center lease agreement. These operating expenses are not included in the table below.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Future minimum payments under operating lease agreements are as follows:

Years Ending December 31,	(In thousands)
2015	\$32,255
2016	31,105
2017	26,723
2018	23,338
2019	17,775
Thereafter	191,108
Total	\$322,304

Expenses charged to operations under these agreements are \$41.2 million, \$36.7 million and \$30.6 million for the years ended December 31, 2014, 2013 and 2012, respectively.

The Company's most significant operating lease is a seventy-seven year land lease for IAC's headquarters building in New York City and approximates 55% of the future minimum payments due under all operating lease agreements in the table above.

The Company also has funding commitments that could potentially require its performance in the event of demands by third parties or contingent events as follows:

	Amount of Commitment Expiration Per Period				Total Amounts Committed
	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years	
	(In thousands)				
Purchase obligations	\$10,710	\$521	\$—	\$—	\$11,231
Letters of credit and surety bonds	1,276	—	73	1,437	2,786
Total commercial commitments	\$11,986	\$521	\$73	\$1,437	\$14,017

The purchase obligations primarily include advertising commitments, which commitments are reducible or terminable such that these commitments can never exceed associated revenue by a meaningful amount. The letters of credit support the Company's casualty insurance program.

NOTE 15—CONTINGENCIES

In the ordinary course of business, the Company is a party to various lawsuits. The Company establishes reserves for specific legal matters when it determines that the likelihood of an unfavorable outcome is probable and the loss is reasonably estimable. Management has also identified certain other legal matters where we believe an unfavorable outcome is not probable and, therefore, no reserve is established. Although management currently believes that resolving claims against us, including claims where an unfavorable outcome is reasonably possible, will not have a material impact on the liquidity, results of operations, or financial condition of the Company, these matters are subject to inherent uncertainties and management's view of these matters may change in the future. The Company also evaluates other contingent matters, including income and non-income tax contingencies, to assess the likelihood of an unfavorable outcome and estimated extent of potential loss. It is possible that an unfavorable outcome of one or more of these lawsuits or other contingencies could have a material impact on the liquidity, results of operations, or financial condition of the Company. See Note 3 for additional information related to income tax contingencies.

IAC/INTERACTIVECORP AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 16—SUPPLEMENTAL CASH FLOW INFORMATION

Supplemental Disclosure of Non-Cash Transactions:

The Company recorded acquisition-related contingent consideration liabilities of \$8.8 million and \$41.4 million during the years 2014 and 2013, respectively. See Note 7 for additional information on contingent consideration arrangements.

Supplemental Disclosure of Cash Flow Information:

	Years Ended December 31,		
	2014	2013	2012
	(In thousands)		
Cash paid (received) during the year for:			
Interest	\$54,027	\$28,705	\$5,214
Income tax payments	63,521	112,087	43,316
Income tax refunds	(10,477)	(17,683)	(8,187)

NOTE 17—RELATED PARTY TRANSACTIONS

Each of the Company and Expedia has a 50% ownership interest in two aircraft that may be used by both companies. The Company and Expedia purchased the second of these two aircraft during 2013. The Company paid \$25 million (50% of the total purchase price and refurbish costs) for its interest. Members of the aircrafts' flight crews are employed by an entity in which each of the Company and Expedia has a 50% ownership interest. The Company and Expedia have agreed to share costs relating to flight crew compensation and benefits pro-rata according to each company's respective usage of the aircraft, for which they are separately billed by the entity described above. The Company and Expedia are related parties since they are under common control, given that Mr. Diller serves as Chairman and Senior Executive of both IAC and Expedia. For the years ended December 31, 2014, 2013 and 2012, total payments made to this entity by the Company were not material.

NOTE 18—BENEFIT PLANS

IAC has a retirement savings plan in the United States that qualifies under Section 401(k) of the Internal Revenue Code. Participating employees may contribute up to 50% of their pre-tax earnings, but not more than statutory limits. IAC contributes fifty cents for each dollar a participant contributes in this plan, with a maximum contribution of 3% of a participant's eligible earnings. Matching contributions for the plan for the years ended December 31, 2014, 2013 and 2012 are \$7.5 million, \$6.5 million and \$6.5 million, respectively. Matching contributions are invested in the same manner as each participant's voluntary contributions in the investment options provided under the plan. An investment option in the plan is IAC common stock, but neither participant nor matching contributions are required to be invested in IAC common stock.

IAC also has or participates in various benefit plans, principally defined contribution plans, for its international employees. IAC's contributions for these plans for the years ended December 31, 2014, 2013 and 2012 are \$2.5 million, \$2.9 million and \$2.3 million, respectively.

(a) During the fourth quarter of 2014, certain expenses were reclassified between cost of revenue, selling and marketing expense, general and administrative expense and product development expense. Accordingly, cost of revenue presented above for periods prior to the fourth quarter of 2014 differs from the amounts reflected in the

Company's quarterly reports on Form 10-Q for the first, second and third quarters of 2014 and 2013 and for the fourth quarter of 2013 reflected in the Company's annual report on Form 10-K.

- (b) The second quarter of 2014 includes an after-tax other-than-temporary impairment charge of \$63.6 million related to the write-down of a cost method investment to fair value.

IAC/INTERACTIVECORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Loss) earnings from discontinued operations, net of tax, in the third quarter of 2014 includes the release of tax reserves as a result of the expiration of the statutes of limitations for federal income taxes for the years 2001 through 2009.

(d) Quarterly per share amounts may not add to the related annual per share amount because of differences in the average common shares outstanding during each period.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure
Not applicable.

Item 9A. Controls and Procedures

Conclusion Regarding the Effectiveness of the Company's Disclosure Controls and Procedures

The Company monitors and evaluates on an ongoing basis its disclosure controls and procedures in order to improve their overall effectiveness. In the course of these evaluations, the Company modifies and refines its internal processes as conditions warrant.

As required by Rule 13a-15(b) of the Exchange Act, IAC management, including the Chairman and Senior Executive and the Chief Financial Officer, conducted an evaluation, as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on this evaluation, the Chairman and Senior Executive and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) for the Company. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, our management used the criteria for effective internal control over financial reporting described in "Internal Control—Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. Based on this assessment, management has determined that, as of December 31, 2014, the Company's internal control over financial reporting is effective. The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their attestation report, included herein.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control Over Financial Reporting

The Company monitors and evaluates on an ongoing basis its internal control over financial reporting in order to improve its overall effectiveness. In the course of these evaluations, the Company modifies and refines its internal processes as conditions warrant. As required by Rule 13a-15(d), IAC management, including the Chairman and Senior Executive and the Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the quarter ended December 31, 2014.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of IAC/InterActiveCorp

We have audited IAC/InterActiveCorp's internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). IAC/InterActiveCorp's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, IAC/InterActiveCorp maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of IAC/InterActiveCorp and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2014 and our report dated February 27, 2015 expressed an unqualified opinion thereon.

Item 9B. Other Information

Not applicable.

PART III

The information required by Part III (Items 10, 11, 12, 13 and 14) has been incorporated herein by reference to IAC's definitive Proxy Statement to be used in connection with its 2015 Annual Meeting of Stockholders (the "2015 Proxy Statement"), as set forth below in accordance with General Instruction G(3) of Form 10-K.

Item 10. Directors, Executive Officers and Corporate Governance

The information required by Items 401 and 405 of Regulation S-K relating to directors and executive officers of IAC and their compliance with Section 16(a) of the Exchange Act is set forth in the sections entitled "Information Concerning Director Nominees" and "Information Concerning IAC Executive Officers Who Are Not Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance," respectively, in the 2015 Proxy Statement and is incorporated herein by reference. The information required by Item 406 of Regulation S-K relating to IAC's Code of Ethics is set forth under the caption "Part I-Item 1-Business-Description of IAC Businesses-Additional Information-Code of Ethics" of this annual report and is incorporated herein by reference. The information required by subsections (c)(3), (d)(4) and (d)(5) of Item 407 of Regulation S-K is set forth in the sections entitled "Corporate Governance" and "The Board and Board Committees" in the 2015 Proxy Statement and is incorporated herein by reference.

Item 11. Executive Compensation

The information required by Item 402 of Regulation S-K relating to executive and director compensation is set forth in the sections entitled "Executive Compensation" and "Director Compensation" in the 2015 Proxy Statement and is incorporated herein by reference. The information required by subsections (e)(4) and (e)(5) of Item 407 of Regulation S-K relating to certain compensation committee matters is set forth in the sections entitled "The Board and Board Committees," "Compensation Committee Report" and "Compensation Committee Interlocks and Insider Participation" in the 2015 Proxy Statement and is incorporated herein by reference; provided, that the information set forth in the section entitled "Compensation Committee Report" shall be deemed furnished herein and shall not be deemed incorporated by reference into any filing under the Securities Act or the Exchange Act.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information regarding ownership of IAC common stock and Class B common stock required by Item 403 of Regulation S-K and securities authorized for issuance under IAC's various equity compensation plans required by Item 201(d) of Regulation S-K is set forth in the sections entitled "Security Ownership of Certain Beneficial Owners and Management" and "Equity Compensation Plan Information," respectively, in the 2015 Proxy Statement and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information regarding certain relationships and related transactions involving IAC required by Item 404 of Regulation S-K and director independence required by Item 407(a) of Regulation S-K is set forth in the sections entitled "Certain Relationships and Related Person Transactions" and "Corporate Governance," respectively, in the 2015 Proxy Statement and is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Information required by Item 9(e) of Schedule 14A regarding the fees and services of IAC's independent registered public accounting firm and the pre-approval policies and procedures applicable to services provided to IAC by such firm is set forth in the sections entitled "Fees Paid to Our Independent Registered Public Accounting Firm" and "Audit and Non-Audit Services Pre-Approval Policy," respectively, in the 2015 Proxy Statement and is incorporated herein by reference.

IAC/INTERACTIVECORP AND SUBSIDIARIES

VALUATION AND QUALIFYING ACCOUNTS

Description	Balance at Beginning of Period (In thousands)	Charges to Earnings	Charges to Other Accounts	Deductions	Balance at End of Period
2014					
Allowance for doubtful accounts and revenue reserves	\$8,540	\$15,226 ⁽¹⁾	\$(116)	\$(11,213) ⁽⁴⁾	\$12,437
Sales returns accrual	1,208	19,743	—	(19,832)	1,119
Deferred tax valuation allowance	62,353	34,133 ⁽²⁾	1,864 ⁽³⁾	—	98,350
Other reserves	2,518				2,204
2013					
Allowance for doubtful accounts and revenue reserves	\$8,775	\$12,275 ⁽¹⁾	\$564	\$(13,074) ⁽⁴⁾	\$8,540
Magazine publishing allowance for newsstand returns	2,313	164 ⁽⁵⁾	45	(2,522) ⁽⁶⁾	—
Sales returns accrual	1,244	19,176	—	(19,212)	1,208
Deferred tax valuation allowance	60,783	8,864 ⁽⁷⁾	(7,294) ⁽⁸⁾	—	62,353
Other reserves	1,925				2,518
2012					
Allowance for doubtful accounts and revenue reserves	\$7,309	\$12,237 ⁽¹⁾	\$654	\$(11,425) ⁽⁴⁾	\$8,775
Magazine publishing allowance for newsstand returns	—	10,426 ⁽⁵⁾	33	(8,146) ⁽⁶⁾	2,313
Sales returns accrual	1,020	17,728	—	(17,504)	1,244
Deferred tax valuation allowance	45,084	9,320 ⁽⁹⁾	6,379 ⁽³⁾	—	60,783
Other reserves	2,119				1,925

(1) Additions to the allowance for doubtful accounts are charged to expense. Additions to the revenue reserves are charged against revenue.

(2) Amount is primarily related to other-than-temporary impairment charges for certain cost method investments and an increase in federal net operating losses, foreign tax credits, and state tax credits.

(3) Amount is primarily related to unbenefited unrealized losses on available-for-sale marketable equity securities included in accumulated other comprehensive income.

(4) Write-off of fully reserved accounts receivable.

Additions to the magazine publishing allowance for newsstand returns are related to magazine publishing at Newsweek and are charged against revenue. The Newsweek print business was transitioned to a digital only publication in December 2012 (and was subsequently sold in August 2013).

(5) Amount represents returns of magazines at Newsweek. The Newsweek print business was transitioned to a digital only publication in December 2012 (and was subsequently sold in August 2013).

(6) Amount is primarily related to foreign and federal net operating losses, partially offset by a decrease in deferred tax assets for investments in subsidiaries and available-for-sale securities.

(7) Amount is primary related to the release of a valuation allowance on unrealized gains on available-for-sale securities included in accumulated other comprehensive income.

Table of Contents

Amount is primarily related to an unbenefited other-than-temporary impairment charge related to a long-term
(9) marketable equity security, an increase in deferred tax assets for investments in subsidiaries and an increase in federal net operating losses.
