Sidebar text: "WE THINK THAT MUNICIPAL BOND INVESTMENTS LIKE YOUR NUVEEN FUND CAN BE IMPORTANT BUILDING BLOCKS IN A PORTFOLIO DESIGNED TO PERFORM WELL THROUGH A VARIETY OF MARKET CONDITIONS."

Dear
SHAREHOLDER

I am very pleased to report that for the period ended January 31, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income. Your Fund is managed with a value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe there are always some municipal bonds that the market is not properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Fund.

In the current environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Manager's
COMMENTS

Portfolio manager Dan Solender reviews national and state economic and market conditions, key investment strategies, and the recent performance of the Funds. Dan, who has eleven years of investment experience, including seven at Nuveen, assumed portfolio management responsibility for these Funds in November 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE REPORTING PERIOD ENDED JANUARY 31, 2004?

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

During this period, the greatest influences on the general economy and the municipal market continued to be historically low interest rates, a generally modest rate of inflation and the overall pace of economic improvement. Since its last credit easing in June 2003, the Federal Reserve has maintained the fed funds rate at 1.0%, the lowest level since 1958. Inflation remained under control, with the 1.1% annual change in the core CPI rate for 2003 representing the smallest gain in more than 40 years. The gross domestic product growth rate in 2003 was a respectable 3.1%, the fastest pace since 2000.

The combination of low interest rates, the absence of inflationary pressures, and a slowly improving economy created generally favorable conditions for municipal bonds. In 2003, municipal bond new issue supply reached \$382 billion nationally, a 7% increase over the previous new issue record set in 2002. However, the pace of issuance slowed somewhat during the last half of 2003 and this slow pace continued into the first month of 2004.

HOW WERE CONDITIONS IN MICHIGAN AND OHIO?

Michigan's long-standing reliance on the manufacturing sector continued to impede the state's recovery. While there were some signs of overall improvement in the Michigan economy early in 2003, unemployment hit a new cyclical high in October before showing some modest improvement in recent months. Although the state's budget stabilization fund was depleted at the end of fiscal 2003, Michigan's overall debt position remains low, and pension liabilities are fully funded. At the end of 2003, both Moody's and Standard & Poor's lowered their ratings on Michigan's general obligation debt to Aa1/AA+, respectively, from Aaa/AAA based on shortfalls in tax collections, the loss of manufacturing jobs, and the state's depleted reserves. Both agencies, however, assigned the state a stable outlook, stating that they expected Michigan to continue to manage its budget difficulties.

Ohio also continued to be hard-hit by the recession affecting the state's major manufacturing industries, including autos, heavy machinery and steel. However, the state has emerged as a major center for the provision of healthcare, and many expect this sector to become one of Ohio's most rapidly-growing industries. Despite depletion of reserve funds, Ohio's debt levels remained moderate relative to the state's substantial economic base. Ohio's general obligation debt maintained its rating of Aa1 with a negative outlook from Moody's and AA+ from S&P, which revised its outlook for the state to stable from negative in July 2003.

HOW DID THESE FUNDS PERFORM OVER THE 12-MONTHS ENDED JANUARY 31, 2004?

For additional information, see the individual Performance Overview for your Fund in this report.

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses. You cannot invest directly in an index.
- 2 The total returns of the three Nuveen Michigan Funds are compared with the average annualized return of the seven funds in the Lipper Michigan Municipal Debt Funds category, while the total returns of the four Nuveen Ohio Funds are compared with the average annualized return of the forty-four funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions and investment guidelines, making direct comparisons less applicable.
- 3 The taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current yield and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rate used for Michigan is 31%, and for Ohio is 33%. The yields shown for these Funds highlight the added value of owning shares that are exempt from state as well as federal income taxes.

2

For the 12 months ended January 31, 2004, the total returns of all seven of the Funds in this report outperformed the unleveraged Lehman Brothers Municipal Bond Index. The Funds' use of leverage was a primary factor that influenced their total return performance relative to the Lehman index. Leveraging can add volatility to a Fund's net asset value, share price and income. However, during periods of low short-term interest rates and low or falling long-term interest rates, such as the environment during much of this 12-month period, this strategy also can provide opportunities for net asset value appreciation and enhanced income for common shareholders.

Average duration⁴ and overall credit quality help explain much of the performance differences among the Funds themselves. In general, investments with longer durations generally would be expected to outperform those with shorter durations, all other factors being equal, during periods of declining interest rates such as that we experienced over the 12-month period. In addition, lower-rated bonds generally tended to perform better than higher-rated bonds over this time frame.

Among the Michigan Funds, NUM and NZW benefited from having longer average

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

durations than NMP. Comparing the Ohio Funds, the performance of NBJ and NVJ was helped by the relatively long average durations of these Funds, while NXI benefited from a greater concentration of lower-rated investment-grade securities. NUO's shorter average duration and relatively high credit quality positioned it to lag the performance of its Ohio Fund peers over this period.

In addition, factors such as bond calls and the price movement of specific sectors and holdings also had an impact on the Funds' relative performances during this period. For example, NXI benefited from its holdings of bonds backed by Continental Airlines, as airline-backed bonds rebounded strongly in the last part of 2003.

WHAT ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates at historically low levels, the dividend-paying capabilities of all these Funds benefited from their use of leverage. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which can leave more earnings to support common share dividends. During the 12 months ended January 2004, continued low short-term rates enabled us to implement three dividend increases in NBJ, two in NUM, NZW and NXI, and one each in NMP and NUO. Leverage also helped to support the dividend of NVJ, which as of January 31, 2004, had offered shareholders 21 consecutive months of stable, attractive dividends.

Each Fund seeks to pay a stable dividend at a rate that reflects the Fund's past results and projected future performance. The Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If the Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value (NAV). Conversely, if the Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2004, all of the Funds in this report had positive UNII.

Over this 12-month reporting period, the share prices of these Funds all ended the period higher than they began. As of January 31, 2004, all seven Funds in this report traded at premiums to their common share NAVs. (see charts on individual Performance Overview pages).

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE PERIOD ENDED JANUARY 31, 2004?

Over this reporting period, a major focus continued to be management of the Funds' durations in an attempt to make the interest rate risk more consistent across all the Funds. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk. For NZW, NBJ and NVJ, our efforts were concentrated on moderating risk by shortening the durations of these Funds. For NXI, we worked to lengthen the Fund's duration as we reinvested proceeds from bond calls and sales of shorter maturity securities into bonds with longer maturities. We were comfortable with the durations of NUM, NMP and NUO, and we didn't seek to make major adjustments in these Funds.

The majority of our purchase activity over the period focused on value opportunities in the long intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, we believed bonds in this part of the curve offered yields similar to those of longer-term bonds but had better total return potential.

Although the heavy volume of municipal issuance during 2003 provided some opportunities to make trades that we thought would benefit the Funds, the pace of new issuance fell toward the end of the reporting period. This was especially true in Michigan, where issuance during August 2003-January 2004 declined 27% from the level of the previous six months. While issuance in the Ohio market was up 4% over this same period, we had a greater amount of call proceeds to reinvest for the Ohio Funds. Therefore, it was challenging in both markets to find issues with the types of structures we prefer to buy and with the potential to add value. In general, as opportunities arose in the market, our focus was on purchasing higher quality issues, particularly in the general obligation category, reflecting the increased issuance in this sector.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF JANUARY 31, 2004?

We believe that, given the current geopolitical and economic climate, maintaining strong credit quality is a vital requirement. As of January 31, 2004, these Nuveen Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 65% to 87%.

As of January 31, 2004, potential call exposure for the 2004 - 2006 period ranged from zero in NZW to 11% in NUO. The actual number of bond calls these Funds will face in the coming months will depend largely on current and anticipated changes in market interest rates.

In general, we believe that these Funds can continue to serve as attractive sources of tax-free income, while simultaneously offering the potential for portfolio diversification. In our opinion, they represent a quality component within a well-balanced core investment portfolio that can continue to benefit shareholders over time.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Michigan Quality Income Municipal Fund, Inc. (NUM), Nuveen Michigan Premium Income Municipal Fund, Inc. (NMP), Nuveen Michigan Dividend Advantage Municipal Fund (NZW), Nuveen Ohio Quality Income Municipal Fund, Inc. (NUO), Nuveen Ohio Dividend Advantage Municipal Fund (NXI), Nuveen Ohio Dividend Advantage Municipal Fund 2 (NBJ) and Nuveen Ohio Dividend Advantage Municipal Fund 3 (NVJ). Common shares of Michigan Quality Income (NUM), Michigan Premium Income (NMP), and Ohio Quality Income (NUO) are traded on the New York Stock Exchange while Common shares of Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At January 31, 2004, there were no such outstanding purchase commitments in any of the Funds.

Investment Income

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Notes to
FINANCIAL STATEMENTS (Unaudited) (continued)

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

| | MICHIGAN QUALITY INCOME (NUM) | MICHIGAN PREMIUM INCOME (NMP) | MICHIGAN DIVIDEND ADVANTAGE (NZW) |

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended January 31, 2004.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At January 31, 2004, the cost of investments were as follows:

| | MICHIGAN QUALITY INCOME (NUM) | MICHIGAN PREMIUM INCOME (NMP) | MICHIGAN DIVIDEND ADVANTAGE (NZW) |
|---------------------|--|--|--|

Notes to
FINANCIAL STATEMENTS (Unaudited) (continued)

At July 31, 2003, the Funds' last fiscal year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

| | MICHIGAN DIVIDEND ADVANTAGE (NZW) | OHIO DIVIDEND ADVANTAGE 2 (NBJ) |
|------------------|--|--|
| Expiration year: | | |
| 2011 | \$135,162 | \$21,436 |
| Total | \$135,162 | \$21,436 |

Ohio Dividend Advantage 2 (NBJ) elected to defer net realized losses from investments incurred from November 1, 2002 through July 31, 2003 ("post-October losses") in accordance with Federal income tax regulations. Ohio Dividend Advantage 2 (NBJ) had \$10,421 of post-October losses that were treated as having arisen on the first day of the current fiscal year.

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Under Michigan Quality Income's (NUM), Michigan Premium Income's (NMP) and Ohio Quality Income's (NUO) investment management agreements with Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

| AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES) | MANAGEMENT FEE |
|---|----------------|
| For the first \$125 million | .6500% |
| For the next \$125 million | .6375 |
| For the next \$250 million | .6250 |
| For the next \$500 million | .6125 |

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On February 25, 2004, the Board approved policies that would allow each Fund, at the discretion of the Adviser, to engage in certain types of derivative transactions for the purpose of hedging interest rate risk. There is no guarantee that the Adviser will cause a Fund to enter into such transactions. If a Fund were to engage in hedging, there is no guarantee that such hedging will be successful or that it will not reduce the Fund's total return.

PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended January 31, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
