EXCHANGE CONTRACTS^{††}

Counterparty	Contracts to Buy (Sell)	Currency	Settlement Date	Settlement Value	Value at August 31, 2017	Net Unrealized Appreciation/ (Depreciation)
Goldman Sachs	(6,840,000)	GBP	9/13/17	\$8,887,896	\$8,848,578	\$39,318
Bank of America	(801,000)	EUR	9/13/17	943,347	954,046	(10,699)
						\$28,619

~ The face amount is denominated in U.S. dollars unless otherwise indicated.

* Non-income producing security.

† Value determined based on Level 1 inputs, unless otherwise noted — See Note 3.

†† Value determined based on Level 2 inputs, unless otherwise noted — See Note 3.

††† Value determined based on Level 3 inputs — See Note 3.

1 Illiquid security.

2 Security was fair valued by the Valuation Committee at August 31, 2017. The total market value of fair valued securities amounts to \$24,111,521, (cost \$25,556,743) or 5.4% of total net assets.

3 Affiliated issuer.

4 Variable rate security. Rate indicated is the rate effective at August 31, 2017.

5 Perpetual maturity.

6 Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

7 All or a portion of these securities have been physically segregated in connection with borrowings, reverse repurchase agreements and unfunded loan commitments. As of August 31, 2017, the total value of securities segregated was \$149,759,599.

8 Security is a 144A or Section 4(a)(2) security. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) securities is \$175,600,902 (cost \$164,157,888), or 39.7% of total net assets.

9 Security is a 144A or Section 4(a)(2) security. These securities have been determined to be illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a)(2) illiquid and restricted securities is \$14,175,050 (cost \$21,611,325), or 3.2% of total net assets. See Note 6.

10 Payment-in-kind security.

11 Security is a step up/step down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity. Rate indicated is rate effective at August 31, 2017.

12 Security is in default of interest and/or principal obligations.

13 Security has no stated coupon. However, it is expected to receive residual cash flow payments on defined deal dates.

14 Rate indicated is the effective yield at the time of purchase.

15 Zero coupon rate security.

16 Rate indicated is the 7 day yield as of August 31, 2017.

The following is a summary of significant unobservable inputs used in the fair valuation of assets and liabilities categorized within Level 3 of the fair value hierarchy:

Category	Ending Balance at 08/31/2017	Valuation Technique	Unobservable Inputs	Input Range
Asset-Backed Securities	\$ 5,000,000	Model Price	Trade Price	-
Asset-Backed Securities	1,525,258	Option Adjusted Spread off the prior month end broker mark over the 3 month LIBOR	Indicative Quote	-
	1,502,737	Option Adjusted Spread		-

Edgar Filing: GUGGENHEIM STRATEGIC OPPORTUNITIES FUND - Form N-Q

				Indicative Quote for Comparable Security	
Asset Backed Securities				Trade Price	-
Collateralized Mortgage Obligations	2,427,528	Model Price		Valuation Multiple	9.3x-14.6x
Common Stocks	668,833	Enterprise Value		Indicative Quote	-
Corporate Bonds	6,980,329	Option Adjusted Spread off the prior month end broker mark over the 3 month LIBOR		Trade Price	-
Corporate Bonds	4,000,000	Model Price		Market Comparable Yields	5.5%-8.8%
Corporate Bonds	2,235,465	Model Price		Bid Price	-
Corporate Bonds	1,837,000	Prior month broker quote		Valuation Multiple	7.5x
Corporate Bonds	943,071	Enterprise Value		Purchase Price	-
Senior Floating Rate Interests	11,122,496	Model Price		Market Comparable Yields	5.3%-6.3%
Senior Floating Rate Interests	4,274,651	Model Price		Trade Price	-
Senior Floating Rate Interests	2,570,534	Model Price		Valuation Multiple	6.9x-10.2x
Senior Floating Rate Interests	1,527,268	Enterprise Value		Indicative Quote	-
Senior Floating Rate Interests	1,245,825	Option Adjusted Spread off the prior month end broker mark over the 3 month LIBOR			
Total Assets	\$ 47,860,995				
Liabilities:					
Unfunded Loan Commitments	\$ 869,273	Model Price		Purchase Price	-

Significant changes in an indicative quote, liquidation value, market comparable yield or valuation multiple would generally result in significant changes in the fair value of the security.

Any remaining Level 3 securities held by the Fund and excluded from the tables above, were not considered material to the Fund.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

For the period ended August 31, 2017, there were \$3,818,255 transferred from Level 2 to Level 3 due to changes in securities valuation method. There were \$4,728,167 transferred from Level 3 to Level 2 due to availability of market price information. There were no other securities that transferred between levels.

Summary of Fair Value Level 3 Activity

Following is a reconciliation of Level 3 assets and liabilities for which significant unobservable inputs were used to determine fair value for the period ended August 31, 2017:

	Assets						Liabilities
	Senior						Unfunded
	Fixed/Floating	Collateralized	Asset-Backed	Corporate	Common	Total Assets	Loan
	Rate	Mortgage	Securities	Bonds	Stocks		Commitments
	Interests	Obligations					
Beginning Balance	\$20,110,736	\$-	\$5,047,131	\$9,934,194	\$911,926	\$36,003,987	\$(812,983)

NOTES TO
SCHEDULE OF
INVESTMENTS August 31, 2017
(Unaudited)

Note 1 – Organization and Significant Accounting Policies

Organization

Guggenheim Strategic Opportunities Fund (the "Fund") was organized as a Delaware statutory trust on November 13, 2006. The Fund is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act").

The Fund's investment objective is to maximize total return through a combination of current income and capital appreciation.

Guggenheim Funds Investment Advisors, LLC ("GFIA") provides advisory services. Guggenheim Funds Distributors, LLC ("GFD") acts as principal underwriter for the Fund. GFIA and GFD are affiliated entities.

Significant Accounting Policies

The Fund operates as an investment company and, accordingly, follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") and are consistently followed by the Fund. This requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. All time references are based on Eastern Time.

Valuation of Investments

The Board of Trustees of the Fund (the "Board") has adopted policies and procedures for the valuation of the Fund's investments (the "Valuation Procedures"). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim's investment management, fund administration, legal and compliance departments (the "Valuation Committee"), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Fund's securities and/or other assets.

Valuations of the Fund's securities are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed, to review the valuation of all assets which have been fair valued for reasonableness. The Fund's officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review procedures used and valuations provided by the pricing services.

If the pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Valuation Committee.

Equity securities listed on an exchange (New York Stock Exchange ("NYSE") or American Stock Exchange) are valued at the last quoted sale price as of the close of business on the NYSE, usually 4:00 p.m. on the valuation date. Equity securities listed on the NASDAQ market system are valued at the NASDAQ Official Closing Price on the valuation date, which may not necessarily represent the last sale price. If there has been no sale on such exchange or

NASDAQ on such day, the security is valued at the mean of the most recent bid and asked prices on such day.

U.S. Government securities are valued by either independent pricing services, the last traded fill price, or at the reported bid price at the close of business.

Debt securities with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker-dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term debt securities with a maturity of 60 days or less at acquisition are valued at amortized cost, provided such amount approximates market value. Money market funds are valued at net asset value.

Typically, loans are valued using information provided by an independent third party pricing service which uses broker quotes in a non-active market.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the NYSE. The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currency are valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. Investments in foreign securities may involve risks not present in domestic investments. The Valuation Committee will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: the value of the securities traded on other foreign markets, ADR trading, closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities such as World Equity Benchmark Securities. In addition, under the Valuation Procedures, the Valuation Committee and the Guggenheim Funds Investment Advisors, LLC ("GFIA or the "Adviser") are authorized to use prices and other information supplied by a third party pricing vendor in valuing foreign securities.

Listed options are valued at the Official Settlement Price listed by the exchange, usually as of 4:00 p.m. Long options are valued using the bid price and short options are valued using the ask price. In the event that a settlement price is not

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) August 31, 2017

available, fair valuation is enacted. Over-the-counter ("OTC") options are valued using the average bid price (for long options) or average ask price (for short options) obtained from one or more security dealers.

The value of futures contracts is accounted for using the unrealized gain or loss on the contracts that is determined by marking the contracts to their current realized settlement prices. Financial futures contracts are valued at the 4:00 p.m. price on the valuation date. In the event that the exchange for a specific futures contract closes earlier than 4:00 p.m., the futures contract is valued at the Official Settlement Price of the exchange. However, the underlying securities from which the futures contract value is derived are monitored until 4:00 p.m. to determine if fair valuation would provide a more accurate valuation.

Investments for which market quotations are not readily available are fair-valued as determined in good faith by GI under the direction of the Board using methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security's (or asset's) "fair value". Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to market prices; sale prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics, or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information analysis.

In connection with futures contracts and other derivative investments, such factors may include obtaining information as to how (a) these contracts and other derivative investments trade in the futures or other derivative markets, respectively, and (b) the securities underlying these contracts and other derivative investments trade in the cash market.

Note 2 – Financial Instruments

As part of its investment strategy, the Fund utilizes a variety of derivative instruments. These investments involve, to varying degrees, elements of market risk.

NOTES TO
SCHEDULE OF
INVESTMENTS August 31, 2017
(Unaudited)

Valuation and accounting treatment of these instruments can be found under Significant Accounting Policies in Note 1 of these Notes to Schedule of Investments.

Derivatives

Derivatives are instruments whose values depend on, or are derived from, in whole or in part, the value of one or more other assets, such as securities, currencies, commodities or indices. Derivative instruments may be used to increase investment flexibility (including to maintain cash reserves while maintaining exposure to certain other assets), for risk management (hedging) purposes, to facilitate trading, to reduce transaction costs and to pursue higher investment returns. Derivative instruments may also be used to mitigate certain investment risks, such as foreign currency exchange rate risk, interest rate risk and credit risk. U.S. GAAP requires disclosures to enable investors to better understand how and why a Fund uses derivative instruments, how these derivative instruments are accounted for and their effects on the Fund's financial position and results of operations.

Options Purchased and Written

A call option on a security gives the purchaser of the option the right to buy, and the writer of a call option the obligation to sell, the underlying security. The purchaser of a put option has the right to sell, and the writer of the put option the obligation to buy, the underlying security at any time during the option period. The risk associated with purchasing options is limited to the premium originally paid.

The risk in writing a call option is that a Fund may incur a loss if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that a Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there may be an imperfect correlation between the movement in prices of options and the underlying securities where a Fund may not be able to enter into a closing transaction because of an illiquid secondary market; or, for OTC options, a Fund may be at risk because of the counterparty's inability to perform.

Futures

A futures contract is an agreement to purchase (long) or sell (short) an agreed amount of securities or other instruments at a set price for delivery at a future date. There are significant risks associated with a Fund's use of futures contracts, including (i) there may be an imperfect or no correlation between the changes in market value of the underlying asset and the prices of futures contracts; (ii) there may not be a liquid secondary market for a futures contract; (iii) trading restrictions or limitations may be imposed by an exchange; and (iv) government regulations may restrict trading in futures contracts. When investing in futures, there is minimal counterparty credit risk to a Fund because futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees against default. Cash deposits are shown as segregated cash with broker on the Statement of Assets and Liabilities; securities held as collateral are noted on the Schedule of Investments.

Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract is an agreement between two parties to exchange two designated currencies at a specific time in the future. Certain types of contracts may be cash settled, in an amount equal to the change in exchange rates during the term of the contract. The contracts can be used to hedge or manage exposure to

foreign currency risks with portfolio investments or to gain exposure to foreign currencies.

The market value of a forward foreign currency exchange contract changes with fluctuations in foreign currency exchange rates. Furthermore, the Fund may be exposed to risk if the counterparties cannot meet the contract terms or if the currency value changes unfavorably as compared to the U.S. dollar.

In conjunction with the use of derivative instruments, the Fund is required to maintain collateral in various forms. The Fund uses, where appropriate, depending on the financial instrument utilized and the broker involved, margin deposits at the broker, cash and/or securities segregated at the custodian bank, discount notes or the repurchase agreements allocated to the Fund.

The Fund has established counterparty credit guidelines and enters into transactions only with financial institutions of investment grade or better. The Fund monitors the counterparty credit risk.

NOTES TO
SCHEDULE OF
INVESTMENTS August 31, 2017
(Unaudited)

Note 3 – Fair Value Measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

Level 1 — quoted prices in active markets for identical assets or liabilities.

Level 2 — significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

Independent pricing services are used to value a majority of the Fund's investments. When values are not available from a pricing service, they may be computed by the Fund's investment adviser or an affiliate. In any event, values may be determined using a variety of sources and techniques, including: market prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information and analysis. A significant portion of the Fund's assets and liabilities are categorized as Level 2 or Level 3, as indicated in this report.

Indicative quotes from broker-dealers, adjusted for fluctuations in criteria such as credit spreads and interest rates, may be also used to value the Fund's assets and liabilities, i.e. prices provided by a broker-dealer or other market participant who has not committed to trade at that price. Although indicative quotes are typically received from established market participants, the Fund may not have the transparency to view the underlying inputs which support the market quotations. Significant changes in an indicative quote would generally result in significant changes in the fair value of the security.

Certain fixed income securities are valued by obtaining a monthly indicative quote from a broker dealer, adjusted for fluctuations in criteria such as credit spreads and interest rates.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The suitability of the techniques and sources employed to determine fair valuation are regularly monitored and subject to change.

Note 4 – Federal Income Tax Information

The Fund intends to comply with the provisions of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and will distribute substantially all taxable net investment income and capital gains

sufficient to relieve the Fund from all, or substantially all, federal income, excise and state income taxes. Therefore, no provision for federal or state income tax is required.

Tax positions taken or expected to be taken in the course of preparing the Fund's tax returns are evaluated to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. Management has analyzed the Fund's tax positions taken, or to be taken, on federal income tax returns for all open tax years, and has concluded that no provision for income tax is required in the Fund's financial statements. The Fund's federal tax returns are subject to examination by the Internal Revenue Service for a period of three years after they are filed.

At August 31, 2017, the cost of securities for federal income tax purposes, the aggregate gross unrealized gain for all securities for which there was an excess of value over tax cost, and the aggregate gross unrealized loss for all securities for which there was an excess of tax cost over value were as follows:

NOTES TO
SCHEDULE OF

Other Information (Unaudited)

Sector Classification

Information in the "Schedule of Investments" is categorized by sectors using sector-level classifications used by Bloomberg Industry Classification System, a widely recognized industry classification system provider. In the Fund's registration statement, the Fund has investment policies relating to concentration in specific industries. For purposes of these investment policies, the Fund usually classifies industries based on industry-level classifications used by widely recognized industry classification system providers such as Bloomberg Industry Classification System, Global Industry Classification Standards and Barclays Global Classification Scheme.

Item 2. Controls and Procedures.

The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) as of a date within 90 days of the filing date of this report and have concluded, based on such evaluation, that the (a) registrant's disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the registrant in this Form N-Q was recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There was no change in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the registrant's last fiscal quarter that has (b) materially affected or is reasonably likely to materially affect the registrant's internal control over financial reporting.

Item 3. Exhibits.

A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended (17 CFR 270.30a-2(a)), is attached hereto.
