### **DuPont Expects Higher 1Q Earnings**

WILMINGTON, Del., April 10, 2008 DuPont today raised its first quarter 2008 earnings estimate to about \$1.29 per share, compared to its previous outlook of \$1.14 to \$1.19 per share which was provided March 14. This represents more than 20 percent growth in earnings in the first quarter. Last year, the company reported first quarter earnings of \$1.01 per share, including a \$.06 special item charge.

Higher first quarter 2008 earnings compared to last year reflect strong growth in DuPont's agriculture businesses combined with rapid growth in emerging markets. The strength in the first quarter is expected to more than offset continued weakness in U.S. construction and automotive markets. In addition, price and productivity gains, along with favorable currency effects, are expected to overcome the impact of significantly higher raw material costs.

For the first half of 2008, DuPont expects earnings growth of about 10 percent, with second quarter earnings about equal to 2007 at \$1.05 per share. DuPont also raised the lower end of its full-year 2008 earnings outlook by five cents to a range of \$3.40 to \$3.55 per share. The company expects that slowing in U.S. markets, including housing and automotive, will offset growth in agriculture and other markets outside the United States.

Growth in agriculture and emerging markets, along with continued cost productivity gains, are enabling us to overcome challenges in certain U.S. markets and higher cost ingredients, said Charles O. Holliday, Jr., DuPont chairman and chief executive officer. While the macroeconomic outlook remains difficult to predict, we are focused on our priorities to capitalize on rising global demand for our products; further penetrate key markets in the world's rapidly growing geographies; and extend our productivity improvement programs.

DuPont will report first quarter 2008 financial results on April 22, and will host a global web cast for investors at 9 a.m. (EDT), providing details of its first quarter results and outlook.

DuPont is a science-based products and services company. Founded in 1802, DuPont puts science to work by creating sustainable solutions essential to a better, safer, healthier life for people everywhere. Operating in more than 70 countries, DuPont offers a wide range of innovative products and services for markets including agriculture and food; building and construction; communications; and transportation.

**Forward-Looking Statements:** This news release contains forward-looking statements based on management's current expectations, estimates and projections. All statements that address expectations or projections about the future, including statements about the company's strategy for growth, product development, market position, expected expenditures and financial results are forward-looking statements. Some of the forward-looking statements may be identified by words like expects, anticipates, plans, intends, projects, indicates, and similar expressions. These statements are not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Many factors, including those discussed more fully elsewhere in this release and in documents filed with the Securities and Exchange Commission by DuPont, particularly its latest annual report on Form 10-K and quarterly report on Form 10-Q, as well as others, could cause results to differ materially from those stated. These factors include, but are not limited to changes in the laws, regulations, policies and economic conditions, including inflation, interest and foreign currency exchange rates, of countries in which the company does business; competitive pressures; successful integration of structural changes, including restructuring plans, acquisitions, divestitures and alliances; cost of raw materials, research and development of new products, including regulatory approval and market acceptance; seasonality of sales of agricultural products; and severe weather events that cause business interruptions, including plant and power outages, or disruptions in supplier and customer operations.
