PART I

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Net income for the first six months ended June 30, 2002, was down 22.6% from the same six months in 2001, whereas net income for the quarter ended June 30, 2002, was up 38.4% when compared to the second quarter of 2001. This was caused by income in 2001 from the North English Bayou Field decreasing each month in 2002, while in 2002 income from the North Gordon Field increased each month. The North English Bayou Field is now depleted and wells on property partially owned by Calcasieu Real Estate and Oil have been plugged and abandoned. We believe that income from the North Gordon Field has reached its maximum potential and will begin decreasing in the near future. Income from agriculture and timber was up 13.2% for the first six months of 2002 as compared to 2001. Expenses were down for the first six months of 2002 as compared to 2001, due to a decrease in legal fees. The legal fees for both years were to defend a suit which has recently been settled at no further expense to the Company.

The enclosed financial statements are unaudited with the exception of the Balance Sheet for December 31, 2001. The unaudited interim financial statements reflect all adjustments which are, in the opinion of management, necessary to a

Edgar Filing: CALCASIEU REAL ESTATE & OIL CO INC - Form 10-Q

fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

Management believes that the company's revenues will be sufficient to meet its existing needs and the needs for its anticipated future operations. Management does not presently anticipate that the Company will incur material additional liabilities in its future operations.
