SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS

In addition to historical information, this Quarterly Report on Form 10-Q may contain statements relating to future results of Diversified Opportunities, Inc. that are forward-looking statements. Our actual results may differ materially from those projected as a result of certain risks and uncertainties. These risks and uncertainties include, but are not limited to, without limitation, statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as expects or does not expect, is expected, anticipates or does not anticipate, plans, estimate, intends, or stating that certain actions, events or results may, could, would, might or will be taken, occur or be achieved) are not statements of historical fact and may be forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results or achievements of the Company to be materially different from any future results or achievements of the Company expressed or implied by such forward-looking statements. Such factors include, among others, those set forth herein and those detailed from time to time in our other Securities and Exchange Commission (SEC) filings including those contained in our most recent Form 10-K. These forward-looking statements are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise, except as otherwise required by law. The Company cautions readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company disclaims any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Also, there can be no assurance that the Company will be able to raise sufficient capital to continue as a going concern.

DIVERSIFIED OPPORTUNITIES, INC.

NOTES TO UNAUDITED FINANCIAL STATEMENTS

1.

Basis of Presentation

Diversified Opportunities, Inc. (hereinafter referred to as DVOP , we or the/our Company) is incorporated in Delaware. Our Company was controlled by QRSciences Holdings Limited, an Australian corporation (QRSciences) through March 31, 2010 by virtue of QRSciences 2008 purchase of 9,000,000 shares of our common stock. The 9,000,000 shares of DVOP common stock constituted 97.83% of the 9,199,192 shares of our common stock outstanding as of the date of this report.

We have prepared the accompanying unaudited financial statements in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and disclosures required by generally accepted accounting principles for complete financial statements. In the opinion of our management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Operating results for the nine months ended March 31, 2010 are not necessarily indicative of the results that may be expected for the entire year. For further information, see our consolidated financial statements and related disclosures thereto for the periods ended June 30, 2009 in our Annual Report on Form 10-K filed with the Securities and Exchange Commission.

2.

Summary of Significant Accounting Policies

Basis of Presentation

Our financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America. We adopted fresh-start account as of September 14, 2001 in accordance with the guidance specified by American Institute of Certified Public Accounts Statement of Position (SOP)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

To the extent that we have future revenues from the sale of goods, they will be recognized when an order has been received, the product has been shipped, the selling price is fixed or determinable and collection is reasonably assured and when both title and risk of loss transfer to the customer, provided that no significant obligations remain. To the extent that we have revenues from the provision of services, they will be recognized at the time services are rendered, their selling price is fixed or determinable and collection is reasonably assured, provided that no significant obligations remain. Sales revenues will not include sales taxes collected from the customer.

Cash and Cash Equivalents

Our policy is to classify as cash and cash equivalents, cash in demand deposit and checking accounts as well as investments that are readily convertible into cash with original maturities of three months or less.

DIVERSIFIED OPPORTUNITIES, INC.

NOTES TO UNAUDITED FINANCIAL STATEMENTS

Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets. Costs incurred for maintenance and repairs are expensed as incurred and expenditures for major replacements and improvements are capitalized and depreciated over their estimated remaining useful lives.

Income Tax Expense Estimates and Policies

As part of the income tax provision process of preparing our financial statements, we are required to estimate our Company's provision for income taxes. This process involves estimating our current tax liabilities together with assessing temporary differences resulting from differing treatments of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities. Management then assesses the likelihood that our deferred tax assets will be recovered from future taxable income and to the extent believed that recovery is not likely, a valuation allowance is established. Further, to the extent a valuation allowance is established and changes occur to this allowance in a financial accounting period, such changes are recognized in our tax provision in our consolidated statement of operations. We use our judgment in making estimates to determine our provision for income taxes, deferred tax assets and liabilities and any valuation allowance is recorded against our net deferred tax assets.

There are various factors that may cause these tax assumptions to change in the near term, and we may have to record a future valuation allowance against our deferred tax assets. We recognize the benefit of an uncertain tax position taken or expected to be taken on our income tax returns if it is more likely than not that such tax position will be sustained based on its technical merits.

Share-Based Compensation

We account for stock based compensation arrangements through the measurement and recognition of compensation expense for all stock based payment awards to employees and directors based on estimated fair values. We use the Black-Scholes option valuation model to estimate the fair value of our stock options at the date of grant. The Black-Scholes option valuation model requires the input of subjective assumptions to calculate the value of stock options. We use historical data among other information to estimate the expected price volatility, the expected option life and the expected forfeiture rate.

Net loss per share

Basic net loss per share is computed using the weighted average number of common shares outstanding during the period. Diluted net loss per common share is computed using the weighted average number of common dilutive and dilutive equivalent shares outstanding during the period. Dilutive common equivalent shares consist of options and warrants to purchase common stock (only if those options and warrants are exercisable at prices below the existing market price) and shares issuable upon the conversion of preferred stock. We had no common equivalent shares outstanding during any period included herein and accordingly, dilutive loss per share was equivalent to basic loss per share.

Litigation

From time to time, we may become involved in disputes, litigation and other legal actions. We estimate the range of liability related to pending litigation where the amount and range of loss can be estimated. We record our best estimate of a loss when the loss is considered probable. Where a liability is probable and there is a range of estimated loss with no best estimate in the range, we record a charge equal to at least the minimum estimated liability for a loss contingency when both of the following conditions are met: (i) information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements and (ii) the range of loss can be reasonably estimated.

DIVERSIFIED OPPORTUNITIES, INC.

NOTES TO UNAUDITED FINANCIAL STATEMENTS

3.

Stockholders' equity

Stock options and warrants

There are no employee or non-employee options grants outstanding. As of March 31, 2010, there were no warrants outstanding to purchase any class of our capital stock.

Future issuance of common stock

In connection with finders' fees incurred related to the purchase of 9,000,000 shares of our common stock by QRSciences, we agreed to the future issuance of shares of our Common Stock to individuals that provided the finder services. As of March 31, 2010, the shares had not been issued and remained a liability of our Company. On April 1, 2010, we issued warrants to two individuals to purchase a total of 100,000 shares of our common stock for \$0.20 per share, in full satisfaction of the liability. The warrants expire on April 1, 2013.

4.

Related party transactions

From May 2008 through April 2010, our principal stockholder was QRSciences. Through March 31, 2010, we have advances from and accrued interest owing to QRSciences (net of repayments) totaling \$131,280. We incurred interest expense on these borrowings totaling \$2,446 and \$7,273 for the three and nine months ended March 31, 2010, respectively (\$1,725 and \$3,476 for the three and nine months ended March 31, 2009, respectively).

5.

Subsequent events

On April 9, 2010, we entered into a non-binding Memorandum of Understanding (MOU) with CommerceTel Canada and CommerceTel, Inc. (CommerceTel) for the parties' negotiation of a definitive agreement for our acquisition of CommerceTel. The MOU provides that the parties shall negotiate exclusively with one another through June 9, 2010. Upon completion of an acquisition, CommerceTel would be operated as a wholly-owned subsidiary of the Company. The completion of the acquisition is subject to the negotiation and execution of a definitive acquisition agreement and certain closing conditions, including the completion of a financing and the audit of CommerceTel. The Company cannot provide any assurances that the acquisition will be completed, or if completed, the timing of such completion.

Effective April 13, 2010, we completed the termination of our Loan Agreement dated July 29, 2008 with QRSciences. In connection with the termination, QRSciences extinguished all outstanding repayment obligations of our Company under the Loan Agreement. Also on April 13, 2010, QRSciences completed the sale of the 9,000,000 shares of our

Company's common stock which they owned to CT Partners, a California general partnership. CT Partners includes Kevin Russeth, our Chief Executive Officer and the sole director of our Company.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended as a review of significant factors affecting our financial condition and results of operations for the periods indicated. The discussion should be read in conjunction with our consolidated financial statements and the notes presented herein. In addition to historical information, the following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. Our actual results could differ significantly from those anticipated in these forward-looking statements as a result of certain factors discussed in this Form 10-Q. See "SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS," above.

Results of Operations

We had no revenues either the three or nine months ended March 31, 2010 or 2009. Our operating expenses for the three and nine months ended March 31, 2010 totaled \$2,643 and \$6,939, respectively (\$12,935 and \$106,239 for the three and nine months ended March 31, 2009, respectively). All of our operating expenses were general and administrative expenses. Additionally, we incurred interest expense on advances from QRSciences totaling \$2,446 and \$7,273 for the three and nine months ended March 31, 2010, respectively (\$1,725 and \$3,476 for the three and nine months ended March 31, 2009, respectively).

Overview and Financial Condition

As described above, effective May 30, 2008, 9,000,000 shares of our Company's 9,199,192 shares of common stock were purchased by QRSciences. During all periods included in this Annual Report, our Company has not had significant operations. As of the date of this report, our Company's ongoing operations continue to consist primarily of expenditures to maintain our Company in compliance with Securities and Exchange Commission regulations, accounting and auditing expenditures as well as expenditures for investor relations activities. On April 13, 2010, QRSciences completed the sale of the 9,000,000 shares of our Company's common stock which they owned to CT Partners, a California general partnership.

Liquidity and Capital Resources

With no revenues or gross margin, our Company was dependent for its continued operations on funding from the holder of 97.83% of the outstanding shares of its common stock, QRSciences. Going forward, our Company will be dependent on funding from CT Partners. There can be no assurance that CT Partners will continue to fund our Company's operations or that we will be able to raise future funding from others at an acceptable price or at all.

Our only asset was cash totaling \$130 as of March 31, 2010. Our liabilities totaled \$206,843 and consisted of accounts payable and accruals for professional services rendered on our behalf (\$11,400), reimbursements due for administrative expenses incurred through that date (\$1,663), a liability for finders' fees to be satisfied with the future issuance of 208,333 shares of our common stock (\$62,500) and advances from and accrued interest owed to QRSciences totaling \$131,280. Our shareholders' deficit totaled \$206,713 at March 31, 2010 and included an accumulated deficit of \$258,912 that reflects net losses incurred from September 14, 2001 through March 31, 2010.

With the termination of our Loan Agreement with QRSciences and the extinguishment of all amounts outstanding under the Loan Agreement, we will account for this transaction as a capital contribution in the three months ended June 30, 2010 totaling \$133,807. The liability for finders' fees was also satisfied in full with the issuance on April 1, 2010 of warrants to purchase 100,000 shares of our common stock.

Plan of Operations

During the next twelve months, our Company does not expect to purchase or sell any plant or significant equipment. We currently have no employees as of the date of this Quarterly Report.

Critical Accounting Policies Involving Management Estimates and Assumptions

Our discussion and analysis of our financial condition and results of operations is based on our financial statements.

In preparing our financial statements in conformity with accounting principles generally accepted in the United States of America, we must make a variety of estimates that affect the reported amounts and related disclosures.

Revenue Recognition. Any future revenues will be recognized on the accrual basis of accounting when earned. We will recognize revenue for products sold at the time that product has been shipped, the selling price is fixed, collection is reasonably assured and when both title and risk of loss transfer to the customer, provided no significant obligations remain. We will recognize revenues from the provision of services at the time they are rendered, the selling price is fixed and collection is reasonably assured, provided no significant obligations remain. The SEC's Staff Accounting Bulletin (SAB) No. 104, *Revenue Recognition*, provides guidance on the

application of generally accepted accounting principles to selected revenue recognition issues. We believe that our revenue recognition policy is appropriate and in accordance with generally accepted accounting principles and SAB No. 104.

Stock Based Compensation. We will account for employee stock-based compensation costs in accordance with accounting standards requiring all share-based payments to employees, including grants of employee stock options, to be recognized in our statements of operations based on their fair values. We will utilize the Black-Scholes option pricing model to estimate the fair value of employee stock based compensation at the date of grant, which requires the input of highly subjective assumptions, including expected volatility and expected life. Changes in these inputs and assumptions could materially affect the measure of estimated fair value of our stock-based compensation.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Deferred Tax Valuation Allowance. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are established when necessary to reduce deferred tax assets to the amount more likely than not to be realized. Income tax expense is the total of tax payable for the period and the change during the period in deferred tax assets and liabilities.

Off-Balance Sheet Arrangements. The Company does not have any off-balance sheet arrangements, as defined in Item 303(c)(2) of Regulation S-B promulgated under the Securities Act of 1933.

Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board (FASB) issued a new standard that is a revision of previous guidance with respect to the proper accounting for business combinations. The standard was effective for our fiscal year beginning July 1, 2009 and its adoption did not have a material effect on our Company's financial statements.

In December 2007, the FASB issued a new standard that establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation. The standard was effective for our fiscal year beginning July 1, 2009 and its adoption did not have a material effect on our Company's financial statements.

In May 2008, the FASB issued a new staff position requiring the issuers of certain convertible debt instruments that may be settled in cash (or other assets) on conversion to separately account for the liability (debt) and equity (conversion option) components of the instrument in a manner that reflects the issuers' nonconvertible debt borrowing

rate. The new staff position was effective for our fiscal year beginning July 1, 2009 and its adoption did not have a material effect on our Company's financial statements.

In June 2008, the FASB issued a new staff position that clarifies that share-based payment awards that entitle their holders to receive non-forfeitable dividends or dividend equivalents before vesting should be considered participating securities. Our Company does not have grants of restricted stock that contain non-forfeitable rights to dividends and therefore our adoption of the staff position did not have a material effect on our Company's financial statements.

Item 3 Quantitative and Qualitative Disclosures about Market Risk

Intentionally omitted pursuant to Item 305(e) of Regulation S-K.

Item 4 Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures and internal controls that are designed to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized, and reported within the time

periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our Chief Executive Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures and internal controls, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance of achieving the desired control objectives. In reaching a reasonable level of assurance, management necessarily was required to apply its judgment in evaluating the cost benefit relationship of possible controls and procedures and internal controls.

As required by the Securities and Exchange Commission Rule 13a-15(e) and Rule 15d-15(e), we carried out an evaluation, under the supervision of and with the participation of our Chief Executive Officer, of the effectiveness of the design and operation of our internal controls over financial reporting. Based on this evaluation, our Chief Executive Officer has concluded that our disclosure controls and procedures were effective as of March 31, 2010.

Taken into consideration in this evaluation were the current size and scope of our operations, lack of transactions, financial activity and complexity.

Changes in Internal Controls over Financial Reporting

There have not been any changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Part II

Item 1 Legal Proceedings

From time to time and in the course of business, we may become involved in various legal proceedings seeking monetary damages and other relief. The amount of the ultimate liability, if any, from such claims cannot be determined. However, in the opinion of our management, there are no legal claims currently pending or threatened against us that would be likely to have a material adverse effect on our financial position, results of operations or cash flows.

Item 1A Risk Factors

Investment in our common stock involves a high degree of risk. You should carefully consider the risks described below together with all of the other information included in this herein before making an investment decision. If any of the following risks actually occur, our business, financial condition or results of operations could suffer. In that

case, the market price of our common stock could decline, and you may lose all or part of your investment.

Risks Related to Our Business

We have no operating history and no current business operations. We do not currently have any business operations other than maintaining our public company status. A substantial majority (9,000,000 shares) of the total shares of our 9,199,192 shares of common stock outstanding through the date this report was issued are owned and held by CT Partners. Because we have no operating history and no current business, our historical financial information is not a reliable indicator of future performance. Therefore, it is difficult to evaluate the business and prospects of our Company. Failure to correctly evaluate our Company's prospects could result in an investor's loss of a significant portion or all of his investment in our Company.

We continue to be without any business operations. Our Company at present does not have any business operations. Accordingly, we lack at present the capacity to generate future income and positive cash flows. Continued losses by our Company could result in an investor's loss of a significant portion or all of his investment in our Company.

Our failure to obtain additional adequate financing would materially and adversely affect our business. We do not currently have any revenues to cover our operating expenses and we are not profitable. We are currently dependent on CT Partners to fund the operating and working capital needs of our Company. If CT Partners decides to discontinue funding our Company and we cannot continue operations, an investor could suffer the loss of a significant portion or all of his investment in our Company.

Financial Risks

Our financial statements have been prepared assuming that the Company will continue as a going concern. We currently project that our cash on hand and existing commitments for additional funds from CT Partners will be sufficient to maintain our Company's operations beyond one year from the date of this report, however there can be no assurance that CT Partners will not decide to terminate funding for our Company. Our financial statements do not include any adjustments that might result from this uncertainty. If we cannot obtain additional capital on acceptable terms, we will need to cease operations and an investor could suffer the loss of a significant portion or all of his investment in our Company.

We do not expect to pay dividends for the foreseeable future, and we may never pay dividends and, consequently, the only opportunity for investors to achieve a return on their investment is if a trading market develops and investors are able to sell their shares for a profit or if our business is sold at a price that enables investors to recognize a profit. We currently intend to retain any future earnings to support our business and do not anticipate paying cash dividends for the foreseeable future. Our payment of any future dividends will be at the discretion of our Board of Directors after taking into account various factors, including but not limited to our financial condition, operating results, cash needs, growth plans and the terms of any credit agreements that we may be a party to at the time. In addition, our ability to pay dividends on our common stock may be limited by state law. Accordingly, we cannot assure investors any return on their investment, other than in connection with a sale of their shares or a sale of our business. At the present time there is a limited trading market for our shares. Therefore, holders of our securities may be unable to sell them. We cannot assure investors that an active trading market will develop or that any third party will offer to purchase our business on acceptable terms and at a price that would enable our investors to recognize a profit.

Our net operating loss carry-forward will be limited. We have recorded a valuation allowance amounting to our entire net deferred tax asset balance due to our lack of a history of earnings, possible limitations on the use of tax loss carry-forwards and the future expiration of the NOL. This gives rise to uncertainty as to whether our deferred tax asset is realizable. Internal Revenue Code Section 382 and similar California rules place a limitation on the amount of taxable income that can be offset by carry-forwards after a change in control (generally greater than a 50% change in ownership). Our inability to use our Company's historical NOL, or the full amount of the NOL, would limit our ability to offset any future tax liabilities with its NOL.

Corporate and Other Risks

Limitations on director and officer liability and indemnification of our officers and directors by us may discourage stockholders from bringing suit against an officer or director. Our Company's articles of incorporation and bylaws provide, with certain exceptions as permitted by governing state law, that a director or officer shall not be personally

liable to us or our stockholders for breach of fiduciary duty as a director, except for acts or omissions which involve intentional misconduct, fraud or knowing violation of law, or unlawful payments of dividends. These provisions may discourage stockholders from bringing suit against a director for breach of fiduciary duty and may reduce the likelihood of derivative litigation brought by stockholders on our behalf against a director.

We are responsible for the indemnification of our officers and directors. Should our officers and/or directors require us to contribute to their defense, we may be required to spend significant amounts of our capital. Our articles of incorporation and bylaws also provide for the indemnification of our directors, officers, employees, and agents, under certain circumstances, against attorney's fees and other expenses incurred by them in any litigation to which they become a party arising from their association with or activities on behalf of our Company. This indemnification policy could result in substantial expenditures, which we may be unable to recoup. If these expenditures are significant, or involve issues which result in significant liability for our key personnel, we may incur expenses that would render us unable to continue operating as a going concern.

QRSciences and its affiliates, directors and employees beneficially own and control a substantially all of our outstanding common stock, which may limit your ability and the ability of our other stockholders, whether acting alone or together, to propose or direct the management or overall direction of our Company. Additionally, this concentration of ownership could discourage or prevent a potential takeover of our Company that might otherwise result in you receiving a premium over the market price for your shares. A substantial portion of our outstanding shares of common stock is beneficially owned and controlled by a group of insiders, including our directors and executive officers. Accordingly, any of our existing outside principal stockholders together with our directors, executive officers and insider shareholders would have the power to control the election of our directors and the approval of actions for which the approval of our stockholders is required. If you acquire shares of our common stock, you may have no effective voice in the management of our Company. Such concentrated control of our Company may adversely affect the price of our common stock. Our

principal stockholders may be able to control matters requiring approval by our stockholders, including the election of directors, mergers or other business combinations. Such concentrated control may also make it difficult for our stockholders to receive a premium for their shares of our common stock in the event we merge with a third party or enter into different transactions which require stockholder approval. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock.

The requirements in connection with being a public company may put us at a competitive disadvantage. The complexity of operating in a public company environment could impair our ability to comply with legal and regulatory requirements such as those imposed by Sarbanes-Oxley Act of 2002 (Sarbanes-Oxley Act). We may not be able to implement programs and policies in an effective and timely manner that adequately responds to the increased legal, regulatory compliance and reporting requirements associated with being a public company. Our failure to do so could lead to the imposition of fines and penalties and distract us from attending to the growth of our business. Also, it may be time consuming, difficult and costly for us to develop and implement the internal controls and reporting procedures required by the Sarbanes-Oxley Act. We may need to hire additional financial reporting, internal controls and other finance staff in order to develop and implement appropriate internal controls and reporting procedures. If we are unable to comply with the internal controls requirements of the Sarbanes-Oxley Act, we may not be able to obtain the independent auditor certifications that the Sarbanes-Oxley Act will in the future require publicly-traded companies with our capitalization to obtain.

Our internal controls over financial reporting may not be effective, and our independent auditors may not be able to certify as to their effectiveness, which could have a significant and adverse effect on our business. We are subject to various regulatory requirements, including the Sarbanes-Oxley Act. We, like all other public companies, must incur additional expenses and the diversion of our management's time in our efforts to comply with Section 404 of the Sarbanes-Oxley Act regarding internal controls over financial reporting. While we have evaluated our internal controls over financial reporting and concluded they are effective given our current level of activity, there is no assurance that if the scope of our operations change, that such controls will remain effective. Furthermore, in the future our independent auditor(s) may be unable to attest to our conclusion concerning the effectiveness of our internal controls over financial reporting, as required (or as will be required) by Section 404 of the Sarbanes-Oxley Act and the rules and regulations of the SEC (collectively referred to as Section 404). The ongoing requirements of Section 404 may unduly divert management's time and resources from executing our future business plans. If in the future, management identifies one or more material weaknesses or our external auditors are unable to attest that our management's report is fairly stated or to express an opinion on the effectiveness of our internal controls, this could result in a loss of investor confidence in our financial reports, have an adverse effect on our stock price and/or subject us to sanctions or investigation by regulatory authorities.

Capital Market Risks

Our common stock is thinly traded, so you may be unable to sell at or near ask prices or at all if you need to sell your shares to raise money or otherwise desire to liquidate your shares. There is limited market activity in our stock (especially given our current status as a shell company) and we lack the qualities to attract the interest of many brokerage firms and analysts. We cannot give you any assurance that in the future a broader or more active public trading market for our common stock will develop or be sustained. While we are trading on the OTC Bulletin Board, the trading volume we will develop may be limited by the fact that many major institutional investment funds, including mutual funds, as well as individual investors follow a policy of not investing in Bulletin Board stocks and certain major brokerage firms restrict their brokers from recommending Bulletin Board stocks because they are considered speculative, volatile, thinly traded and the market price of the common stock may not accurately reflect the underlying value of our Company. The market price of our common stock could be subject to wide fluctuations in response to quarterly variations in our revenues and operating expenses, announcements of new products or services by us, significant sales of our common stock, including short sales, the operating and stock price performance of other companies that investors may deem comparable to us, and news reports relating to trends in our markets or general economic conditions.

The application of the penny stock rules to our common stock could limit the trading and liquidity of the common stock, adversely affect the market price of our common stock and increase your transaction costs to sell those shares. As long as the trading price of our common stock is below \$5 per share, the open-market trading of our common stock will be subject to the penny stock rules, unless we otherwise qualify for an exemption from the penny stock definition. The penny stock rules impose additional sales practice requirements on certain broker-dealers who sell securities to persons other than established customers and accredited investors (generally those with assets in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 together with their spouse). These regulations, if they apply, require the delivery, prior to any transaction involving a penny stock, of a disclosure schedule explaining the penny stock market and the associated risks. Under these regulations, certain brokers who recommend such securities to

persons other than established customers or certain accredited investors must make a special written suitability determination regarding such a purchaser and receive such purchaser's written agreement to a transaction prior to sale. These regulations may have the effect of limiting the trading activity of our common stock, reducing the liquidity of an investment in our common stock and increasing the transaction costs for sales and purchases of our common stock as compared to other securities. The stock market in general and the market prices for penny stock companies in particular, have experienced volatility that often has been unrelated to the operating performance of such companies. These broad market and industry fluctuations may adversely affect the price of our stock, regardless of our operating performance. Stockholders should be aware that, according to SEC Release No. 34-29093, the market for penny stocks has suffered in recent years from patterns of fraud and abuse. Such patterns include (1) control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer; (2) manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases; (3) boiler room practices involving high-pressure sales tactics and unrealistic price projections by inexperienced sales persons; (4) excessive and undisclosed bid-ask differential and markups by selling broker-dealers; and (5) the wholesale dumping of the same securities by promoters and broker-dealers after prices have been manipulated to a desired level, along with the resulting inevitable collapse of those prices and with consequent investor losses. The occurrence of these patterns or practices could increase the volatility of our share price.

We may not be able to attract the attention of major brokerage firms, which could have a material adverse impact on the market value of our common stock. Security analysts of major brokerage firms may not provide coverage of our common stock since there is no incentive to brokerage firms to recommend the purchase of our common stock. The absence of such coverage limits the likelihood that an active market will develop for our common stock. It will also likely make it more difficult to attract new investors at times when we require additional capital.

We may be unable to list our common stock on NASDAQ or on any securities exchange. Although we may apply to list our common stock on NASDAQ or the American Stock Exchange in the future, we cannot assure you that we will be able to meet the initial listing standards, including the minimum per share price and minimum capitalization requirements, or that we will be able to maintain a listing of our common stock on either of those or any other trading venue. Until such time as we qualify for listing on NASDAQ, the American Stock Exchange or another trading venue, our common stock will continue to trade on the OTC Bulletin Board or another over-the-counter quotation system, or on the pink sheets, where an investor may find it more difficult to dispose of shares or obtain accurate quotations as to the market value of our common stock. In addition, rules promulgated by the SEC impose various practice requirements on broker-dealers who sell securities that fail to meet certain criteria set forth in those rules to persons other than established customers and accredited investors. Consequently, these rules may deter broker-dealers from recommending or selling our common stock, which may further affect the liquidity of our common stock. It would also make it more difficult for us to raise additional capital.

Future sales of our equity securities could put downward selling pressure on our securities, and adversely affect the stock price. There is a risk that this downward pressure may make it impossible for an investor to sell his or her securities at any reasonable price, if at all. Future sales of substantial amounts of our equity securities in the public

market, or the perception that such sales could occur, could put downward selling pressure on our securities, and adversely affect the market price of our common stock.

Item 2 Sales of Unregistered Securities and Use of Proceeds

None.

Item 3 Defaults Upon Senior Securities

Not applicable.

Item 4 Submission of Matters to a Vote of Security Holders

Not applicable.

Item 5 Other Information

None.

Item 6 Exhibits and Reports on Form 8-K
