Approximate Date of Commencement of Proposed Sale to the Public: From time to time after this Registration Statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to

Edgar Filing: BioElectronics Corp - Form SB-2/A

Rule 415 under the Securities Act, check the following box.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

---

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. "

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. "

If delivery of the prospectus is expected to be made pursuant to Rule 434, check the following box. "

#### CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities To be Registered	Amount to be Registered	Proposed Maximum Aggregate Offering Price Per Share(1)	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee
Common Stock, \$.001 par value(2)	13,310,001 shares	\$0.36	\$4,791,600.36	\$512.70
Common Stock, \$.001 par value (3)	7,583,001 shares	\$0.36	\$2,729,880.36	\$292.10
Common Stock, \$.001 par value(4)	10,000,000 shares	\$0.36	\$3,600,000.00	\$385.20
Total Registration Fee(5)	30,893,002 shares	_____	11,121,480.72	\$1,190.00

(1) Estimated solely for the purpose of computing the amount of the registration fee pursuant to Rule 457(c) based on the average of the high and low prices on the Pink Sheets on February 13, 2006.

(2) The shares of common stock being registered hereunder are being registered for resale by certain selling stockholders named in the prospectus upon conversion of outstanding secured convertible notes. In accordance with Rule 416(a), the registrant is also registering hereunder an indeterminate number of shares that may be issued and resold to prevent dilution resulting from stock splits, stock dividends or similar transactions.

(3) The shares of common stock being registered hereunder are being registered for resale by certain selling stockholders named in the prospectus upon exercise of outstanding five-year warrants. In accordance with Rule 416(a), the registrant is also registering hereunder an indeterminate number of shares that may be issued and resold to prevent dilution resulting from stock splits, stock dividends or similar transactions.

(4) The shares of common stock being registered hereunder are being registered for sale of the shares of the Company's common stock in a best efforts, self-underwritten, offering directly to the public.

(5) Previously paid.

**The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration**

**statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.**

---

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

**Preliminary Prospectus**

**Subject to Completion, Dated February 16, 2006**

**30,893,002 Shares of Common Stock**

**Makers of Drug Free, Anti-Inflammatory Patches**

This prospectus relates to the resale of up to 20,893,002 shares of common stock (the “Common Stock”), of which 3,000,000 shares are issuable upon the conversion of promissory notes of BioElectronics Corporation (the “Company”) and the payment of the principal amount of, and interest on, these notes to, or the exercise of outstanding warrants by, certain selling stockholders and 7,583,001 shares of Common Stock are issuable upon the exercise of warrants of the Company by certain selling stockholders identified in this prospectus (the “Offering”). All of these shares, when sold, will be sold by these selling stockholders. The selling stockholders may sell their Common Stock from time to time at prevailing market prices. We will not receive any proceeds from the sale of the shares of Common Stock by the selling stockholders.

In addition to the Offering, this prospectus also relates to our direct offering (the “Direct Offering”) of up to 10,000,000 shares of our Common Stock in a best efforts, self-underwritten, offering directly to the public. There is no minimum amount of shares that we must sell in our Direct Offering, and therefore no minimum amount of proceeds will be raised. While no plans are currently in place, in the future, we may sell these shares in our Direct Offering through broker/dealers and may pay a commission of up to 10% of the gross proceeds of the number of shares of our Common Stock sold by them in our Direct Offering. No arrangements have been made to place funds into escrow or any similar account. Upon receipt, offering proceeds from the Direct Offering will be deposited into our operating account and used to conduct our business and operations. Unless we use a broker/dealer, we will be offering the shares without any underwriting discounts or commissions. The purchase price is \$.36 per share. If all of the shares offered by us are purchased, the gross proceeds we receive will be \$3,600,000. The Direct Offering will terminate 12 months after this registration statement (the “Registration Statement”) is declared effective by the Securities and Exchange Commission (the “SEC”), unless all shares being registered for the Direct Offering on this prospectus are sold earlier than that date. However, we may extend the offering for up to one year following the twelve-month offering period. This is our initial public offering and no public market currently exists for shares of our Common Stock.

Our Common Stock is traded and prices are reported on the Pink Sheets under the symbol “BIEL. OTC:PK.”

---

*See "Risk Factors" beginning on page 8 for risks of an investment in the securities offered by this prospectus, which you should consider before you purchase any shares.*

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.**

The date of this prospectus is \_\_\_\_\_, 2006

This prospectus is not an offer to sell any securities other than the shares of Common Stock offered hereby. This prospectus is not an offer to sell securities in any circumstances in which such an offer is unlawful.

We have not authorized anyone, including any salesperson or broker, to give oral or written information about this offering, the Company, or the shares of Common Stock offered hereby that is different from the information included in this prospectus. You should not assume that the information in this prospectus, or any supplement to this prospectus, is accurate at any date other than the date indicated on the cover page of this prospectus or any supplement to it.

## PROSPECTUS SUMMARY

*This summary highlights information contained elsewhere in this Prospectus and may not contain all of the information that you should consider before investing in the shares. You are urged to read this Prospectus in its entirety, including the information under “Risk Factors” and our consolidated financial statements and related notes included elsewhere in this Prospectus.*

### OUR COMPANY

The Company designs, develops, manufactures and markets a variety of proprietary, drug-free, anti-inflammatory patches for a broad range of medical indications. The Company’s patch products, which are marketed under the trade name ActiPatch Therapy™ (“ActiPatch Therapy”), deliver pulsed electromagnetic field therapy, a clinically-proven and widely-accepted anti-inflammatory and pain relief therapy. Prior to the introduction of the Company’s products, this therapy had only been offered through large office or hospital-based equipment. The Company believes pulsed electromagnetic energy therapy will increasingly be used as an alternative or adjunct to many wound care procedures or therapies because it relieves pain and swelling, shortens or halts the inflammatory phase, accelerates tissue healing, minimizes the appearance of scars and increases the strength of regenerated tissue. To date, the Company has focused its product development efforts on the plastic surgery and podiatry markets, and has established a new-product pipeline that includes products for the treatment of the following medical indications:

#### Repetitive Stress Injuries

- Heel Pain
- Carpal Tunnel
- Tennis Elbow
- Frozen Shoulder

#### Plastic and Cosmetic Surgery

- Breast Augmentation
  - Blepharoplasty
  - Rhinoplasty
  - Facial Surgery
  - Tummy Tucks
  - Liposuction

#### Chronic Wounds

- Ischemic Ulcers
- Diabetic Ulcers
  - Bed sores

#### Low Back Pain

- Sprains
- Strains
- Muscle spasms

#### Surgery

- General Surgical Procedures
- Oral Surgery

#### Other Sprains and Strains

- Ankle

- Knee
- Wrist
- Neck

Pulsed electromagnetic energy therapy is a proven and robust technology platform. Physicians and therapists around the world have used pulsed electromagnetic therapy successfully for approximately 70 years to effectively treat soft tissue injuries from surgical incisions and accidental wounds, sprains, strains and other inflammatory responses. The prohibitive costs of the cabinet-sized pulsed electromagnetic machines that are currently available and used in the marketplace, coupled with the need for daily treatment administered by medical professionals, has restricted the widespread adoption of pulsed electromagnetic energy therapy. The Company believes its ActiPatch Therapy products, which deliver a dosage of pulsed electromagnetic energy in dermal patches as small as a standard band-aid, is superior to the therapy delivered by the much larger machines in use today.

The Company's products are designed to address the need for an effective, inexpensive therapeutic agent for the estimated \$10 billion, 400 million-case-per annum worldwide soft tissue injury market. The Company believes its products offer the following competitive advantages:

- Easy to use
- Non-invasive relief of pain and swelling
  - Drug-free and clinically proven
  - Inexpensive, only a few dollars a day
- Therapeutically beneficial, unlike Transcutaneous Electrical Nerve Stimulators (TENS) units or painpatches, each of which only mask the pain.

The Company was incorporated under the laws of the State of Maryland on April 1, 2000. Since that date, the Company has, with only limited external funding, reached a number of key milestones, including the following:

- Received U.S. Food and Drug Administration (the "FDA") market clearance to sell its ActiPatch Therapy device for the treatment of edema (swelling) following blepharoplasty (eye surgery);
- Received ISO Certification and CE Mark (European Common Market) Certification for the ActiPatch Therapy device;
- Received Canadian approval to sell ActiPatch Therapy for the relief of pain and muscle skeletal complaints, without prescription. Initial Canadian reimbursement approvals are starting to come in;
  - Executed key international and domestic sales and distribution agreements;
  - Established an internal direct response sales and marketing operation;
- Executed an agreement with a major over-the-counter foot care manufacturer and distributor to sell and market our retail foot care products;
  - Initiated the adoption of its ActiPatch Therapy products by a number of professional sports teams;
- Established and maintained an intellectual property portfolio covering both the product design, medical use and the energy signal; and
  - Established a 3-5 year pipeline of new products for the treatment of sports injuries, bone fractures, pain, chronic wounds, skin conditions and arthritis.

The Company's principal executive offices are located at 401 Rosemont Avenue, 3rd Floor, Rosenstock Hall, Frederick, Maryland 21701, and the Company's telephone number at that address is (301) 644-3906. The Company has a corporate internet website at <http://www.bioelectronicscorp.com>. The reference to this website address does not constitute incorporation by reference of the information contained therein.

### About This Offering

This prospectus relates to the resale of up to 20,893,002 shares of Common Stock, of which 3,000,000 shares are issuable upon the conversion of promissory notes and the payment of the principal amount of, and interest on, these notes to, or the exercise of outstanding warrants by, certain selling stockholders identified in this prospectus and 7,583,001 shares are issuable upon the exercise of outstanding warrants of our Company by certain selling stockholders identified in this prospectus. All of the 20,893,002 shares, when sold, will be sold by these selling stockholders. The selling stockholders may sell their Common Stock from time to time at prevailing market prices. We will not receive any proceeds from the sale of the shares of Common Stock by the selling stockholders.

In addition to the Offering, this prospectus also relates to our Direct Offering of up to 10,000,000 shares of our Common Stock in a best efforts, self-underwritten, offering directly to the public. There is no minimum amount of shares that we must sell in our Direct Offering, and therefore no minimum amount of proceeds will be raised.

Common Stock Offered	30,893,002 shares
Common Stock Offered by the Selling Stockholders	20,893,002 shares. The 7,583,001 warrant shares included in such shares will be issued by the Company. Although the Company will not receive any of the proceeds from the sale of the shares, it will receive the proceeds from the exercise, if any, of the warrants included therein.
Common Stock Outstanding at December 31, 2005 <sup>(1)</sup>	62,484,892 shares
Use of Proceeds of the Offering	We will not receive any of the proceeds from the sale of the shares by the Offering, except upon exercise of certain Common Stock purchase warrants.
Use of Proceeds of the Direct Offering	We will receive proceeds from the sale of the shares offered in the Direct Offering.
Pink Sheet Ticker Symbol	BIEL

(1) Does not include (i) 3,000,000 shares that are issuable upon the conversion of outstanding convertible notes with a conversion price of \$0.25 per share, (ii) 835,000 restricted compensatory shares that have not been earned or issued and 165,000 shares which have been earned and not issued to certain of our corporate officers (iii) 8,683,001 shares issuable upon the exercise of outstanding warrants with exercise prices ranging from \$.33 to \$.50 per share, subject to adjustment, or (iv) 5,685,000 shares issuable upon the exercise of outstanding options with exercise prices ranging from \$.30 to \$.50 per share, subject to adjustment granted under our 2005 Equity Incentive Plan.

### Selected Financial Information

The selected financial information presented below is derived from and should be read in conjunction with our consolidated financial statements, including notes thereto, appearing elsewhere in this prospectus. See "Financial Statements."

#### Summary Operating Information

	September 30, 2005
Working capital	\$ 86,965
Total assets	\$ 704,876
Total liabilities	\$ 789,265
Stockholders' deficiency	\$ 84,389

## RISK FACTORS

*You should carefully consider the risks described below before investing in the Company. The risks and uncertainties described below are not the only risks we face. These risks are the ones we consider to be significant to your decision whether to invest in our Common Stock at this time. We might be wrong. There may be risks that you in particular view differently than we do, and there are other risks and uncertainties that are not presently known to us or that we currently deem immaterial, but that may in fact impair our business operations. If any of the following risks actually occur, our business, results of operations and financial condition could be seriously harmed, the trading price of our Common Stock could decline and you may lose all or part of your investment.*

### **Risks Relating to Our Business**

***Development Stage Company.*** The Company is a development stage company, and the Company faces risks and difficulties frequently encountered in connection with the operation and development of a new and expanding business. The Company has a limited operating history on which an evaluation of the Company and its business can be based. The likelihood of the Company's future success must be considered in light of such limited operating history, as well as the problems, expenses, difficulties, complications and delays frequently encountered in connection with a new business. There can be no assurance that the Company's future revenues will ever be significant or that the Company's operations will ever be profitable.

***History of Operating Losses.*** The Company was incorporated on April 1, 2000. Through September 30, 2005, the Company recorded a cumulative operating loss of approximately \$2.21 million. The Company expects to incur additional losses until sufficient sales of its ActiPatch Therapy products are achieved. The Company has not yet commenced manufacturing and shipping of any products in substantial volumes. The Company's limited operating history makes the prediction of future operating results difficult or impossible to make. There can be no assurance that the Company's future revenues will ever be significant or that the Company's operations will ever be profitable.

***Need for Additional Financing.*** The Company's ability to satisfy its future capital requirements and implement its expansion plans will depend upon many factors, including the financial resources available to it, the expansion of the Company's sales and marketing efforts and the status of competition, if any. The Company believes that current and future available capital resources, including the net proceeds from sale of Company's products, will be sufficient to fund its operations at current levels for twelve (12) months. However, the exact amount of funds that the Company will require will depend upon many factors, and it is possible that the Company will require additional financing prior to such time. There can be no assurance that additional financing will be available to the Company on acceptable terms, or at all. If additional funds are raised by issuing equity securities, further dilution to the existing stockholders will result. If adequate funds are not available, the Company may be required to delay, reduce or eliminate its programs or obtain funds through arrangements with partners or others that may require the Company to relinquish rights to certain of its products, technologies or other assets. Accordingly, the inability to obtain such financing could have a material adverse effect on the Company's business, financial condition and results of operations.

***Dependence on Limited Number of Products.*** *Virtually all of the Company's sales have been derived from sales of the Company's existing ActiPatch Therapy dermal patches.* Although additional products are currently being developed, there can be no assurance that these development efforts will be successful or, if successful, that resulting products will receive market acceptance, generate significant sales or result in gross profits. The Company believes that success in the general surgical market is somewhat dependent on product acceptance by plastic surgeons. The Company's future operating results, particularly in the near term, are significantly dependent upon market acceptance of its ActiPatch Therapy product line. Because virtually all of the Company's sales are derived from its ActiPatch Therapy product line, failure to achieve broader market acceptance of pulsed electromagnetic energy therapy as a result of competition, technological change or other factors or the failure to successfully market any new or enhanced versions of existing products would have a material adverse effect on the business, operating results and financial

condition of the Company.

**Acceptance of Company's Products Depends Upon Results of Clinical Studies for New Applications.** Clinical studies of new applications of the Company's ActiPatch Therapy products are in various stages of completion, and further clinical studies of the Company's products are expected to be conducted in the future. Clinical studies of the Company's products that result in unfavorable or inconclusive findings, or significant delays in completing clinical studies, could have a material adverse effect on the Company's business, financial condition and results of operations. There can be no assurance that the findings derived from ongoing clinical studies will be favorable or conclusive with regard to the Company's products or that the medical community will react positively to such findings as clinical studies are completed.

**Risk of Technological Obsolescence.** The medical device market is characterized by rapid, technological innovation and change. Many companies are engaged in research and development of devices, drugs and alternative methods to reduce swelling, relieve pain and enhance the healing of surgical incisions, accidental wounds, sprains, strains and chronic wounds. The Company's products could be rendered obsolete as a result of future innovations.

**Competition.** The medical device market is very competitive and competition is likely to increase. Increased competition may result in price cuts, reduced gross margins and loss of market share, any of which could seriously harm the Company's business. Many of the Company's competitors have, and potential competitors may possess, longer operating histories and significantly greater financial, technical, personnel and other resources than the Company. Competitors and potential competitors may also have larger, more established research and development departments and greater name and brand recognition than the Company possesses. These greater resources may permit them to implement extensive advertising, sales, promotions and programs that the Company may not be able to match. Better financed competitors may also have greater success in future research and development efforts. As these competitors enter the field, the Company's sales growth may fail to increase, despite its efforts to continue to design and manufacture superior products. There can be no assurance that the Company will have the ability to compete successfully in this environment. If the Company is unable to compete successfully, the Company's business will be seriously harmed.

**Management of Growth.** The Company may encounter significant strain and additional demands on its manufacturing systems, infrastructure and resources as it expands its business. The Company's ability to compete effectively and to manage future expansion will require it to continue to add to its infrastructure and management controls and to expand, train and manage its workforce. If the Company is unable to manage its expansion, the Company's level of service will decline, it may lose customers and its revenues and growth will be limited.

**Dependence on Key Existing and Future Personnel.** The Company's success will depend, to a large degree, upon the efforts and abilities of its officers and key management employees, including, without limitation, Andrew J. Whelan, the President and Chairman of the Board of Directors (the "Board") of the Company. The loss of the services of one or more of the Company's key employees could have a material adverse effect on its operations. The Company has employment agreements with certain of its employees, but does not maintain a key man life insurance policy on any employee. In addition, as its business plan is implemented, the Company will need to recruit and retain additional management and key employees in virtually all phases of its operations. Key employees will require not only a strong background in the medical device industry, but a familiarity with the markets in which the Company competes. The Company may not be able to attract successfully and retain key personnel.

**Reliance on Third Parties for Supply and Manufacture of Products.** Third parties manufacture all of the Company's products. The Company does not currently have manufacturing facilities or personnel to independently manufacture its products. If for any reason the Company is unable to obtain or retain third party manufacturers on commercially acceptable terms, it may not be able to distribute its products as planned. If the Company encounters delays or difficulties with contract manufacturers in producing or packaging its products, the distribution, marketing and subsequent sales of these products will be adversely affected. The Company may have to seek alternative sources of supply or abandon or sell product lines on unsatisfactory terms. The Company may not be able to enter into alternative supply arrangements on commercially acceptable terms, if at all. There can be no assurance that the manufacturers the Company has engaged will be able to provide sufficient quantities of these products or that the products supplied will meet the Company's specifications. In addition, production of the Company's products may require raw materials for which the sources and quantities are limited. An inability to obtain adequate supplies of raw materials could significantly delay development, regulatory approval and marketing of the Company's products.

**Dependence on Third Party Distributors.** The Company currently utilizes several third party medical device distributors to distribute its products. If for any reason the Company is unable to obtain or retain third party distributors on commercially acceptable terms, it may not be able to distribute its products as planned. If the Company encounters delays or difficulties with contract distributors, the distribution, marketing and subsequent sales of these products would be adversely affected, and the Company may have to seek alternative sources of distribution or abandon or sell product lines on unsatisfactory terms. The Company may not be able to enter into alternative distribution arrangements on commercially acceptable terms, if at all. There can be no assurance that the distributors the Company has engaged will be able to provide sufficient distribution of the Company's products in order for the Company to meet its current or future obligations to its customers.

**Product Liability Claims.** The Company faces an inherent business risk of exposure to product liability claims in the event that the use of its products are alleged to have resulted in adverse side effects, such as injury, illness or death. The Company also may be required to recall some of its products if they are damaged or mislabeled. Such events could result in product liability claims or adverse publicity. While the Company currently maintains product liability insurance, a significant product liability judgment against the Company or a widespread product recall, to the extent either such event is in excess of the limits of its product liability insurance, could substantially impair the Company's business, financial condition and results of operations.

**Protection of Intellectual Property.** The Company believes that its success depends to a significant degree upon its ability to develop proprietary technology and its ability to protect the proprietary aspects of its products. The Company acquired 44 patents that have now expired. Instead of filing for FDA regulatory delay patent extensions, the Company opted to file new patent applications to cover its technological improvements, affixing and delivery methods and medical treatments. The Company has approximately 150 new patent claims pending. We have filed in the United States, the European Common Market, Canada, and the other major markets such as Japan, South Korea, Mexico, Australia, etc.

The Company will continue to seek patent protection for its products. There can be no assurance that any patent that has been or may be issued will cover products the Company intends to sell, or if it does, will not subsequently be invalidated for any of a variety of reasons.

The Company relies upon a combination of laws and contractual restrictions, including restrictions contained in confidentiality agreements, to establish and protect its rights to any intellectual property that it creates. Any infringement of the Company's proprietary rights could result in significant litigation costs, and any failure to adequately protect its proprietary rights could result in the Company's competitors offering similar products, potentially resulting in loss of a competitive advantage and decreased revenues. Despite the Company's efforts to protect its proprietary rights, existing patent laws afford only limited protection. In addition, the laws of some foreign countries do not protect the Company's proprietary rights to the same extent as do the laws of the United States. Attempts may be made to copy or reverse engineer aspects of the Company's products or to obtain and use information that the Company regards as proprietary. Accordingly, the Company may not be able to prevent misappropriation of its technology or deter others from developing similar technology. Furthermore, policing the unauthorized use of the Company's products is difficult. Litigation may be necessary in the future to enforce the Company's intellectual property rights or to determine the validity and scope of the proprietary rights of others. This litigation could result in substantial costs and diversion of resources and could significantly harm the Company's business.

***Infringement of Third-Party Rights.*** In recent years, there has been significant litigation in the United States and elsewhere involving patents and other intellectual property rights. Third parties may assert patent, copyright, trademark and other intellectual property rights to technologies used in the Company's business. Any infringement claims, with or without merit, could be time consuming, result in costly litigation, and divert the efforts of the Company's technical and management personnel. If the Company is unsuccessful in defending itself against these types of claims, it may be required to do one or more of the following:

- stop selling those products that use or incorporate the challenged intellectual property;
- attempt to obtain a license to sell or use the relevant technology or substitute technology, which license may not be available on reasonable terms or at all; or
- redesign those products that use the relevant technology, which the Company may not be able to do on a timely or cost effective basis, or at all.

In the event a claim against the Company is successful and the Company can not obtain a license to the relevant technology on acceptable terms or license a substitute technology or redesign its products to avoid infringement, the Company's business will be significantly harmed, which would have a material adverse effect on the Company's financial condition and results of operations.

***Health Care Reform; Market Acceptance.*** The levels of revenues and profitability of pharmaceutical and medical device companies may be affected by the continuing efforts of governmental and third-party payers to contain or reduce the costs of health care through various means. In the United States there have been, and the Company expects that there will continue to be, a number of federal and state proposals to control health care costs. There have been a number of proposals introduced to Congress to comprehensively reform the nation's health care system. Some of the proposed legislation has contained measures intended to control public and private spending on health care as well as to provide universal public access to the health care system. In addition, some of the proposed legislation included limitations on Medicare and Medicaid reimbursement for medical products and services and called for the creation of a committee to monitor and evaluate the pricing of new medical products and services. Although no such legislation has been passed by Congress, federal, state and local officials and legislators (and certain foreign government officials and legislators) have proposed or are reportedly considering proposing a variety of additional reforms to the health care systems in their respective jurisdictions, including reforms that may affect the pharmaceutical and medical device industries. It is uncertain what new legislative proposals, if any, might be adopted or what actions federal, state or third-party payers may take in response to any health care reform proposals or legislation. The Company cannot predict the effect health care reforms may have on its business or the business of its collaborators.

In the United States and elsewhere, sales of therapeutic products are dependent in part on the availability of reimbursement from third-party payers, such as government and private insurance plans. These third-party payers are increasingly challenging the prices charged for medical products and services. If the Company succeeds in bringing one or more products to the market, there can be no assurance that these products will be considered cost effective and that reimbursement to the consumer will be available or will be sufficient to allow the Company to sell its products on a profitable basis.

There can be no assurance that any product developed by the Company will gain market acceptance among health care providers. Even if the Company's proposed products gain market acceptance, sales of such products may be dependent on the availability of reimbursement from third-party health care payers, such as government and private insurance plans. If adequate coverage and reimbursement levels are not authorized by government and third-party payers for use of the Company's products, market acceptance will be adversely affected.

***Physicians and Patients Acceptance of Our Device.*** Physicians and patients may not accept and use our device. Acceptance and use of the device will depend upon a number of factors, including perceptions by members of the health care community, including physicians, about the safety and effectiveness of the device; cost-effectiveness of the device relative to competing products; availability of reimbursement for the products from government or other healthcare payers; and effectiveness of marketing and distribution efforts by us and our licensees and distributors, if any. Because we expect sales of the current product device to generate substantially all of our product revenues for the foreseeable future, the failure of the device to find market acceptance would harm our business and could require us to seek additional financing.

***Compliance with Regulatory Requirements.*** The Company is subject to a variety of regulatory agency requirements in the United States and foreign countries relating to the products that the Company develops and manufactures. The process of obtaining and maintaining required regulatory approvals and otherwise remaining in regulatory compliance can be lengthy, expensive and uncertain. The FDA inspects manufacturers of certain types of devices before providing a clearance to manufacture and sell such devices, and the failure to pass such an inspection could result in delay in moving ahead with a product or project. The Company is required to comply with the FDA's quality system regulation for the manufacture of medical products. In addition, in order for the devices that the Company designs or manufactures to be exported, and for the Company and its customers to be qualified to use the "CE" mark in the European Union, the Company maintains EN International Standards Organization ("ISO") 13485:2003 certification. This certification, like the quality system regulation, subjects the Company's operations to periodic surveillance audits. To ensure compliance with various regulatory and quality requirements, the Company expends significant time, resources and effort in the areas of training, production and quality assurance. If the Company fails to comply with regulatory or quality regulations or other FDA or applicable legal requirements, the governing agencies can issue warning letters, impose government sanctions and levy serious penalties. In addition, the continued sale of products manufactured by the Company may be halted or otherwise restricted. Any such actions could have an adverse effect on the willingness of customers and prospective customers to do business with the Company. In addition, any such noncompliance or increased cost of compliance could have a material adverse effect on the Company's business, results of operations and financial condition.

**Product Revenues.** Our ability to generate product revenues will be diminished if the devices sell for inadequate prices or patients are unable to obtain adequate levels of reimbursement. Our ability to commercialize the devices, alone or with collaborators, will depend in part on the extent to which reimbursement will be available from government and health administration authorities; private health maintenance organizations and health insurers; and other healthcare payors. Significant uncertainty exists as to the reimbursement status of newly approved healthcare products. Healthcare payors, including Medicare, routinely challenge the prices charged for medical products and services. Government and other healthcare payers increasingly attempt to contain healthcare costs by limiting both coverage and the level of reimbursement for patches. Even if the new product candidates are approved by the FDA, insurance coverage may not be available, and reimbursement levels may be inadequate to cover such patches. If government and other healthcare payors do not provide adequate coverage and reimbursement levels for any of the products, the post-approval market acceptance of its products could be diminished.

### **Risks Relating to Our Common Stock**

#### ***Disappointing quarterly revenue or operating results could cause the price of our Common Stock to fall.***

Our quarterly revenue and operating results are difficult to predict and may fluctuate significantly from quarter to quarter. If our quarterly revenue or operating results fall below the expectations of investors or security analysts, the price of our Common Stock could fall substantially. Our quarterly revenue and operating results may fluctuate as a result of a variety of factors, many of which are outside our control, including:

the amount and timing of expenditures relating to the rollout of our Actipatch Therapy products

our ability to obtain, and the timing of, additional regulatory approvals;

the rate at which we are able to attract customers within our target markets and our ability to retain these customers at sufficient aggregate revenue levels;

the availability of financing to continue our expansion;

technical difficulties in manufacturing the products or network downtime;

the introduction of new services, products or technologies by our competitors and resulting pressures on the pricing of our service.

#### ***We do not intend to pay dividends on our Common Stock in the foreseeable future, which could cause the market price of our Common Stock and the value of your investment to decline.***

We expect to retain earnings, if any, to finance the expansion and development of our business. Our Board will decide whether to make future cash dividend payments. Such decision will depend on, among other things, the following factors:

our earnings;

our capital requirements;

our operating results and overall financial condition; and

our compliance with various financing covenants to which we are or may become a party.

***The market for our Common Stock is thinly traded, which could result in fluctuations in the value of our Common Stock.***

Although there is a public market for our Common Stock, the market for our Common Stock is thinly traded. The trading prices of our Common Stock could be subject to wide fluctuations in response to, among other events and factors, the following:

variations in our operating results;

sales of a large number of shares by our existing stockholders;

announcements by us or others;

developments affecting us or our competitors; and

extreme price and volume fluctuations in the stock market.

***Our Common Stock price is likely to be highly volatile, which could cause the value of your investment to decline.***

The market price of our Common Stock may be highly volatile. Investors may not be able to resell their shares of our Common Stock following periods of volatility because of the market's adverse reaction to volatility. We cannot assure you that our Common Stock will trade at the same levels of our stocks in our industry or that our industry stocks in general will sustain their current market prices. Factors that could cause such volatility may include, among other things:

actual or anticipated fluctuations in our quarterly operating results;

large purchases or sales of our Common Stock;

announcements of technological innovations;

changes in financial estimates by securities analysts;

investor perception of our business prospects;

conditions or trends in the medical device industry;

changes in the market valuations of other industry-related companies;

the acceptance of market makers and institutional investors of our business model and our Common Stock; and changes in the market valuations of other industry-related companies;

worldwide economic and financial conditions.

***The Company's Principal Shareholders Own a Majority of the Shares Outstanding and May Control the Company.*** Andrew J. Whelan, the President and Chairman of the Board of the Company, owns, directly or indirectly, approximately 49.5% of the outstanding shares of Common Stock. Through his ownership of securities, Mr. Whelan will be able to substantially impact any vote of the stockholders and exert considerable influence over the Company's affairs.

***No Assurance of Liquidity.*** There is currently only a limited public market for the Company's Common Stock and there can be no assurance that a trading market will develop further or be maintained in the future. One exemption that may be available is Rule 144 adopted under the Securities Act of 1933 (the "Securities Act"), provided the Company meets the requirements of Rule 144 for available public information. Generally, under Rule 144, any person holding restricted securities for at least one (1) year may publicly sell in ordinary brokerage transactions, within a three (3) month period, the greater of one percent (1%) of the total number of shares of the Company's Common Stock outstanding or the average weekly reported volume during the four (4) weeks preceding the sale, if certain conditions of Rule 144 are satisfied by the Company and the seller. Furthermore, with respect to sellers who are "non-affiliates" of the Company, as that term is defined in Rule 144 of the Securities Act, the volume sale limitation does not apply, and an unlimited number of shares may be sold, provided the seller meets certain other conditions enumerated in Rule 144(k), including a holding period of two (2) years. Sales under Rule 144 may have a depressive effect on the market price of the Company's securities and thereby impair the Company's ability to raise capital through the sale of its equity securities.

***Investor Warrants and Convertible Notes May Adversely Affect Shareholders and the Company in the Future.*** The holders of the 3,520,000 investor warrants (the "Investor Warrants") sold in the Private Placement in April 2005 have three (3) years after the final closing to exercise their Investor Warrants, and the holders of the 513,000 agent's warrants (the "Agent's Warrants") issued in connection with the Offering will have two (2) years or five (5) years, depending upon the type of Agent's Warrant. In December 2005, the Company issued senior secured convertible 24 month term notes in the aggregate amount of \$750,000 to LH Financial ("the Notes"). The Notes have an 8% coupon, payable on a monthly basis. The Notes issued are convertible notes at the option of LH Financial, at a fixed price of \$0.25. For every share of the Company's Common Stock for which the Notes are converted, LH Financial will receive one warrant, exercisable within a five-year period from the conversion of the Notes. The exercise of the Investor Warrants or the Agent's Warrants may cause dilution in the interests of other shareholders. Further, the terms on which the Company may obtain additional financing during the period any of such warrants remain outstanding may be adversely affected by the existence of these warrants. The holders of the Investor Warrants, the Notes, or the Agent's Warrants may exercise their warrants at a time when the Company may wish to obtain additional capital through a new offering of shares on terms more favorable.

***We do not have an underwriter for our Offering, which may make it more difficult to successfully complete this Offering.*** We are offering 10,000,000 shares of Common Stock on a direct placement basis under the provisions of Rule 3a4-1 of the Exchange Act. We have never engaged in the public sale of our securities, and have no experience in conducting public securities offerings. Accordingly, there is no prior experience from which investors may judge our ability to consummate this offering. There can be no assurance that we will be successful in selling any shares of common stock offered hereby, and as a result, we may not receive any proceeds from our Direct Offering.

***Because there is no minimum number of shares that must be sold in our Direct Offering we may not raise sufficient proceeds to commence significant operations.*** Under the terms of our Direct Offering, there is no minimum number of shares that must be sold, or a minimum amount that will be raised, and we will not refund any funds to you. Upon receipt, offering proceeds will be deposited into our operating account and used to conduct the business affairs of the Company. Because there is no minimum number of shares that must be sold or a minimum amount that will be raised, and because we will not refund any funds to you, it is possible that we may not raise enough funds to sustain operations. If we are unable to receive sufficient funds from our Direct Offering, we may have to seek other sources of financing. There is no assurance that additional sources of funding will be available at a reasonable cost. In the event that we are unsuccessful in raising sufficient funds in this or any other offerings to continue our operations, it is likely that purchasers of our Common Stock will own shares in a company that has an illiquid smaller market for its shares or will lose their investments.

***“Penny Stock” Rule Limitations.*** The SEC has adopted regulations that generally define a penny stock to be any equity security that has a market price of less than \$5.00 per share, subject to certain exemptions. Such exemptions include an equity security listed on a national securities exchange or quoted on NASDAQ and an equity security issued by an issuer that has net tangible assets of at least \$2,000,000, if such issuer has been in continuous operation for more than three (3) years. Unless such an exemption is available, the regulations require the delivery of a disclosure document to the investor explaining the penny stock market and the risks associated therewith prior to any transaction involving a penny stock. In addition, as long as the common stock is not listed on a national securities exchange or quoted on NASDAQ or at any time that the company has less than \$2,000,000 in net tangible assets, trading in the common stock is covered by Rule 15c-9 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), for non-NASDAQ and non-exchange listed securities. Under that rule, broker-dealers who recommend such securities to persons other than established customers and accredited investors must make a special written suitability determination for the purchaser and receive the purchaser’s written agreement to a transaction prior to sale. Securities are exempt from this rule if the market price is at least \$5.00 per share. To the extent that the Company does not meet the exemptions under the Penny Stock Rule, there will be reduced liquidity in the market.

### **SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS**

Some of the statements under “Prospectus Summary,” “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” “Business,” and elsewhere in this prospectus constitute forward-looking statements. These statements involve risks known to us, significant uncertainties, and other factors which may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by those forward-looking statements.

You can identify forward-looking statements by the use of the words “may,” “will,” “should,” “could,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “intends,” “potential,” “proposed,” or “continue” or the negative of those terms. Forward-looking statements are only predictions. In evaluating these statements, you should specifically consider various factors, including the risks outlined above. These factors may cause our actual results to differ materially from any forward-looking statement.

Although we believe that the exceptions reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements.

### **USE OF PROCEEDS**

We will not receive any proceeds from the sale of the shares of our Common Stock by the selling stockholders.

The net proceeds available to us from the sale of the shares in the Direct Offering are estimated to be approximately \$3,200,000 if the maximum offering is sold, after deducting offering expenses (estimated to be \$400,000). We intend to use the net proceeds provided by the Direct Offering for sales and marketing, working capital and general corporate purposes.

We will also receive proceeds of up to a maximum of \$57,430.00 upon the due exercise, if any, of the two-year warrants granted by us exercisable for an aggregate of 171,000 shares of Common Stock. We will receive proceeds up to a maximum of \$1,635,001 upon the due exercise, if any, of the three-year warrants granted by us exercisable for an aggregate of 3,770,001 shares of Common Stock. We will receive proceeds of up to a maximum of \$1,681,200.00 upon the due exercise, if any, of the five-year warrants granted by us exercisable for an aggregate of 3,642,000 shares of Common Stock. We expect to incur expenses in connection with this Offering of approximately \$50,000 for our legal fees, accounting fees, printing, Blue Sky legal and filing fees and other miscellaneous expenses. We intend to use any such proceeds for sales and marketing, working capital and general corporate purposes. Until utilized, the net proceeds of this Offering will be invested in interest-bearing accounts, or invested in short-term U.S. government obligations, certificates of deposit or similar short-term, lower risk investments.

The Company currently anticipates applying the proceeds approximately as follows:

Application of Proceeds	Approximate Dollar Amount	Approximate Percentage of Net Proceeds
Sales and Marketing	\$ 4,000,000	60.9%
Working capital and general corporate purposes	\$ 2,572,631	39.1%
Total	\$ 7,087,431	100%

Further, to the extent that any of our outstanding convertible promissory notes are converted into, or paid in the form of, shares of our Common Stock, we will be relieved of such obligations to the extent of such conversion or payment. We will receive \$1,591,200.00 upon the exercise, if any, of the five year warrants granted with the convertible promissory note for an aggregate of 3,400,000 shares.

### DILUTION

The Company had a net tangible book value of \$(117,181) or \$.002 per share, as of September 30 2005, based upon 62,484,892 shares of Common Stock outstanding. Net tangible book value per share is equal to the Company's total tangible assets less its total liabilities, divided by the total number of shares of its Common Stock outstanding. After giving effect to the sale of the 10,000,000 shares of Common Stock offered hereby at an initial public offering price of \$.36 per share and the application of the net proceeds therefrom (after deducting estimated expenses of the Offering), the net tangible book value of the Common Stock as of September 30, 2005 would have been \$3,082,819 or \$.052 per share. Dilution is determined by subtracting net tangible book value per share after this Offering from the amount paid by new investors per share of Common Stock.

### MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDERS MATTERS

**Market for Common Stock**

Our Common Stock is traded on the Pink Sheets under the symbol "BIEL. OTC:PK."

The following table contains information about the range of high and low bid prices for our Common Stock for each full quarterly period from Q2 2004 through Q4 2005, based upon reports of transactions on the OTC Pinksheets.

**Fiscal 2004**
