FORM 10-K

☒ ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For Fiscal Year Ended May 30, 2009

Commission File No. 001-15141

Herman Miller, Inc.

(Exact name of registrant as specified in its charter)

Michigan  
(State or other jurisdiction  
of incorporation or organization)

38-0837640  
(I.R.S. Employer  
Identification No.)

855 East Main Avenue  
PO Box 302  
Zeeland, Michigan  
(Address of principal  
executive offices)

49464-0302  
(Zip Code)

Registrant's telephone number, including area code: (616) 654 3000

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$.20 Par Value  
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☐ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of accelerated filer, large accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Small reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The aggregate market value of the voting stock held by nonaffiliates of the registrant (for this purpose only, the affiliates of the registrant have been assumed to be the executive officers and directors of the registrant and their associates) as of November 29, 2008, was \$773,740,978 (based on \$14.71 per share which was the closing sale price as reported by NASDAQ).

The number of shares outstanding of the registrant's common stock, as of July 22, 2009: Common stock, \$.20 par value 55,884,937 shares outstanding.

### DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the Registrant's Proxy Statement for the Annual Meeting of Shareholders to be held on October 15, 2009, are incorporated into Part III of this report.

PART I

Item 1 BUSINESS

**General Development of Business**

The company researches, designs, manufactures, and distributes interior furnishings, for use in various environments including office, healthcare, educational, and residential settings, and provides related services that support organizations and individuals all over the world. The company's products are sold primarily to or through independent contract office furniture dealers. Through research, the company seeks to define and clarify customer needs and problems existing in its markets and to design, through innovation where appropriate and feasible, products, systems, and services as solutions to such problems. Ultimately, the company seeks to enhance the performance of human habitats worldwide, making its customers' lives more productive, rewarding, delightful, and meaningful.

Herman Miller, Inc. was incorporated in Michigan in 1905. One of the company's major plants and its corporate offices are located at 855 East Main Avenue, PO Box 302, Zeeland, Michigan, 49464-0302, and its telephone number is (616) 654-3000. Unless otherwise noted or indicated by the context, the term "company" includes Herman Miller, Inc., its predecessors, and majority-owned subsidiaries. Further information relating to principles of consolidation is provided in Note 1 to the Consolidated Financial Statements included in Item 8 of this report.

**Financial Information about Segments**

Information relating to segments is provided in Note 20 to the Consolidated Financial Statements included in Item 8 of this report.

**Narrative Description of Business**

The company's principal business consists of the research, design, manufacture, and distribution of office furniture systems, products, and related services. Most of these systems and products are designed to be used together.

The company is a leader in design and development of furniture and furniture systems. This leadership is exemplified by the innovative concepts introduced by the company in its modular systems (including Action Office®, Ethospace®, Resolve®, My Studio Environments™ and Vivo Interiors™). The company also offers a broad array of seating (including Embody®, Aeron®, Mirra®, Celle®, Equa®, Ergon®, and Ambi® office chairs), storage (including Meridian® and Tu™ filing products), wooden casegoods (including Geiger® products), and freestanding furniture products (including Teneo®, Passage® and Abak®). Going beyond these product offerings, the company's ConViabusiness™ offers a programmable, modular electrical building infrastructure solution which enables building owners and individuals to adapt their habitat in new and profound ways. In fiscal 2009, the company introduced and began order entry for Embody® office chairs, and Teneo™ free standing storage, hosting, and display pieces.

The company's products are marketed worldwide by its own sales staff, its owned dealer network, independent dealers and retailers, and via the Internet. Salespersons work with dealers, the design and architectural community, and directly with end-users. Independent dealerships concentrate on the sale of Herman Miller products and some complementary product lines of other manufacturers. It is estimated that approximately 74 percent of the company's sales in the fiscal year ended May 30, 2009, were made to or through independent dealers. The remaining sales were made directly to end-users, including federal, state, and local governments, and several major corporations, by the company's own sales staff, its owned dealer network, or independent retailers.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

The company is also a recognized leader within its industry for the use, development, and integration of customer-centered technologies that enhance the reliability, speed, and efficiency of our customers' operations. This includes proprietary sales tools, interior design and product specification software; order entry and manufacturing scheduling and production systems; and direct connectivity to the company's suppliers.

The company's furniture systems, seating, freestanding furniture, storage and casegood products, and related services are used in (1) office/institution environments including offices and related conference, lobby, and lounge areas, and general public areas including transportation terminals; (2) health/science environments including hospitals, clinics, and other healthcare facilities; (3) industrial and educational settings; and (4) residential and other environments.

### *Raw Materials*

The company's manufacturing materials are available from a significant number of sources within the United States, Canada, Europe, and Asia. To date, the company has not experienced any difficulties in obtaining its raw materials. The costs of certain direct materials used in the company's manufacturing and assembly operations are sensitive to shifts in commodity market prices. In particular, the costs of steel components, plastics, and particleboard are sensitive to the market prices of commodities such as raw steel, aluminum, crude oil, lumber, and resins. Increases in the market prices for these commodities can have an adverse impact on the company's profitability. Further information regarding the impact of direct material costs on the company's financial results is provided in *Management's Discussion and Analysis* in Item 7 of this report.

### *Patents, Trademarks, Licenses, Etc.*

The company has 162 active United States utility patents on various components used in its products and 69 active United States design patents. Many of the inventions covered by the United States patents also have been patented in a number of foreign countries. Various trademarks, including the name and stylized Herman Miller and the Herman Miller Circled Symbolic M trademark are registered in the United States and many foreign countries. The company does not believe that any material part of its business depends on the continued availability of any one or all of its patents or trademarks, or that its business would be materially adversely affected by the loss of any thereof, except for Herman Miller®, Herman Miller Circled Symbolic M®, Geiger®, Action Office®, Ethospace®, Aeron®, Mirra®, Eames®, PostureFit®, and Vivo Interiors™. It is estimated that the average remaining life of such patents and trademarks is approximately 5 years and 7 years, respectively.

### *Working Capital Practices*

Information concerning the company's inventory levels relative to its sales volume can be found under the *Executive Overview* section in Item 7 of this report. Beyond this discussion, the company does not believe that it or the industry in general, has any special practices or special conditions affecting working capital items that are significant for understanding the company's business.

### *Customer Base*

It is estimated that no single dealer accounted for more than 4 percent of the company's net sales in the fiscal year ended May 30, 2009. It is also estimated that the largest single end-user customer, the U.S. federal government, accounted for \$167.2 million or approximately 10 percent of the company's fiscal 2009 net sales. The 10 largest customers accounted for approximately 21 percent of net sales. The company does not believe that its business depends on any single or small number of customers, the loss of which would have a materially adverse effect upon the company.

#### *Backlog of Unfilled Orders*

As of May 30, 2009, the company's backlog of unfilled orders was \$207.8 million. At May 31, 2008, the company's backlog totaled \$286.2 million. It is expected that substantially all the orders forming the backlog at May 30, 2009, will be filled during the next fiscal year. Many orders received by the company are reflected in the backlog for only a short period while other orders specify delayed shipments and are carried in the backlog for up to one year. Accordingly, the amount of the backlog at any particular time does not necessarily indicate the level of net sales for a particular succeeding period.

#### *Government Contracts*

Other than standard provisions contained in contracts with the United States Government, the company does not believe that any significant portion of its business is subject to material renegotiation of profits or termination of contracts or subcontracts at the election of various government entities. The company sells to the U.S. Government both through a GSA Multiple Award Schedule Contract and through competitive bids. The GSA Multiple Award Schedule Contract pricing is principally based upon the company's commercial price list in effect when the contract is initiated, rather than being determined on a cost-plus-basis. The company is required to receive GSA approval to increase its list prices during the term of the Multiple Award Schedule Contract period.

#### *Competition*

All aspects of the company's business are highly competitive. The company competes largely on design, product and service quality, speed of delivery, and product pricing. Though the company is one of the largest office furniture manufacturers in the world, it competes with many smaller companies in several markets and with several manufacturers that have greater resources and sales. In the United States, the company's most significant competitors are Haworth, HNI Corporation, Kimball International, Knoll, and Steelcase.

#### *Research, Design and Development*

The company draws great competitive strength from its research, design and development programs. Accordingly, the company believes that its research and design activities are of significant importance. Through research, the company seeks to define and clarify customer needs and problems and to design, through innovation where feasible and appropriate, products and services as solutions to these customer needs and problems. The company uses both internal and independent research and design resources. Exclusive of royalty payments, the company spent approximately \$36.2 million, \$38.8 million, and \$42.1 million, on research and development activities in fiscal 2009, 2008, and 2007, respectively. Generally, royalties are paid to designers of the company's products as the products are sold and are not included in research and development costs since they are variable based on product sales.

#### *Environmental Matters*

Living with integrity and respecting the environment stands as one of the company's core values. This is based in part, on the belief that environmental sustainability and commercial success are not exclusive ends, but instead exist side by side in a mutually beneficial relationship. The company continues to rigorously reduce, recycle, and reuse solid waste generated by its manufacturing processes and the company's efforts and accomplishments have been widely recognized. Additionally, the company is pursuing the use of green energy in its manufacturing processes. Based on current facts known to management, the company does not believe that existing environmental laws and regulations have had or will have any material effect upon the capital expenditures, earnings, or competitive position of the company.

#### *Human Resources*

The company considers its employees to be another of its major competitive strengths. The company stresses individual employee participation and incentives, believing that this emphasis has helped attract and retain a competent and motivated workforce. The company's human resources group provides employee recruitment, education and development, and compensation planning and counseling. There have been no work stoppages or labor disputes in the company's history, and its relations with its employees are considered good. Approximately 7 percent of the company's employees are covered by collective bargaining agreements, most of whom are employees of its Integrated Metal Technology, Inc., and Herman Miller Limited (U.K.) subsidiaries.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

As of May 30, 2009, the company employed 5,077 full-time and 152 part-time employees, representing a 19.3 percent decrease and an 18.3 percent decrease, respectively, compared with May 31, 2008. In addition to its employee work force, the company uses temporary purchased labor to meet uneven demand in its manufacturing operations.

### Information about International Operations

The company's sales in international markets are made primarily to office/institutional customers. Foreign sales consist mostly of office furniture products such as Ethospace, Abak, Aeron, Mirra, and other seating and storage products. The company conducts business in the following major international markets: Europe, Canada, the Middle East, Latin America, and the Asia/Pacific region. In certain foreign markets, the company's products are offered through licensing of foreign manufacturers on a royalty basis.

The company's products currently sold in international markets are manufactured by wholly owned subsidiaries in the United States, the United Kingdom, and China. Sales are made through wholly owned subsidiaries or branches in Canada, France, Germany, Italy, Japan, Mexico, Australia, Singapore, China, India, and the Netherlands. The company's products are offered in the Middle East, South America, and Asia through dealers.

In several other countries, the company licenses manufacturing and selling rights. Historically, these licensing arrangements have not required a significant investment of funds or personnel by the company, and in the aggregate, have not produced material net earnings for the company.

Additional information with respect to operations by geographic area appears in Note 20, of the Notes to the Consolidated Financial Statements included in Item 8 of this report. Fluctuating exchange rates and factors beyond the control of the company, such as tariff and foreign economic policies, may affect future results of international operations. Refer to Item 7A, *Quantitative and Qualitative Disclosures about Market Risk*, for further discussion regarding the company's foreign exchange risk.

### Available Information

The company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are made available free of charge through the Investors section of the company's internet website at [www.hermanmiller.com](http://www.hermanmiller.com), as soon as practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (SEC). The company's filings with the SEC are also available for the public to read and copy in person at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549, by phone at 1-800-SEC-0330, or via their internet website at [www.sec.gov](http://www.sec.gov).

**Item 1A RISK FACTORS**

The following risk factors and other information included in this Annual Report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones we face; others, either unforeseen or currently deemed less significant, may also have a negative impact on our company. If any of the following actually occurs, our business, operating results, cash flows, and financial condition could be materially adversely affected.

***Our pension expenses are affected by factors outside our control, including the performance of plan assets, interest rates, actuarial data and experience and changes in laws and regulations.*** Our future funding obligations for our U.S. defined benefit pension plans depend upon changes in the level of benefits provided for by the plans, the future performance of assets set aside in trusts for these plans, the level of interest rates used to determine funding levels, actuarial data and experience and any changes in government laws and regulations. In addition, our employee benefit plans hold a significant amount of equity securities. If the market values of these securities decline significantly, our future pension expenses and funding obligations could increase significantly. Decreases in interest rates that are not offset by contributions and asset returns could also increase our obligations under such plans. We may be legally required to make contributions to our U.S. pension plans in the future, and those contributions could be material. In addition, if local legal authorities increase the minimum funding requirements for our pension plan outside the United States, we could be required to contribute more funds, which would negatively affect our cash flow.

**Sustained Downturn in the Economy Could Adversely Impact our Access to Capital**

The recent global economic and financial market disruption has impacted the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole. These conditions could persist for a prolonged period of time or worsen in the future. The timing and nature of any recovery in the financial and credit markets remains uncertain, and there can be no assurance that market conditions will improve in the near future. Our ability to access the capital markets may be restricted at a time when we would like, or need, to access those markets, which could have an impact on our flexibility to react to changing economic and business conditions. The resulting lack of available credit, increased volatility in the financial markets and reduced business activity could materially and adversely affect our business, financial condition, results of operations, our ability to take advantage of market opportunities and our ability to obtain and manage our liquidity. In addition, the cost of debt financing and the proceeds of equity financing may be materially and adversely impacted by these market conditions. The extent of any impact will depend on several factors, including our operating cash flows, the duration of tight credit conditions and volatile equity markets, our credit capacity, the cost of financing, and other general economic and business conditions. Our credit agreements contain performance covenants, such as a limit on the ratio of debt to earnings before interest, taxes, depreciation and amortization, and limits on subsidiary debt and incurrence of liens. Although we believe none of these covenants are presently restrictive to our operations, our ability to meet the financial covenants can be affected by events beyond our control.

***We may not be successful in implementing and managing our growth strategy.***

We have established a set of key strategic goals for our business. Included among these are specific targets for growth in net sales and operating profit as a percentage of net sales. Our strategic plan assumes growth targets will be achieved by pursuing and winning new business in the following areas:

- Primary Markets* Capturing additional market share within our primary markets by offering superior solutions to customers who value space as a strategic tool.
- Adjacent Markets* Further applying our core skills in space environments such as healthcare, higher education, and residential.
- Developing Economies* Expanding our geographic reach in areas of the world with significant growth potential.
- New Markets* Developing new products and technologies that serve wholly new markets.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

While we have confidence that our strategic plan targets opportunities that are appropriate and achievable and that anticipates and manages the associated risks, there is the possibility that the strategy may not deliver the projected results due to inadequate execution, incorrect assumptions, sub-optimal resource allocation, or changing customer requirements.

There is no assurance that our current product and service offering will allow us to meet these goals. Accordingly, we believe we will be required to continually invest in the research, design, and development of new products and services. There is no assurance that such investments will have commercially successful results.

Certain growth opportunities may require us to invest in acquisitions, alliances, and the startup of new business ventures. These investments may not perform according to plan.

Future efforts to expand our business within developing economies, particularly within China and India, may expose us to the effects of political and economic instability. Such instability may cause us difficulty in competing for business. It may also put at risk the availability and/or value of our capital investments within these regions. These expansion efforts expose us to operating environments with complex, changing, and in some cases, inconsistently applied legal and regulatory requirements. Developing knowledge and understanding of these requirements poses a significant challenge, and failure to remain compliant with them could limit our ability to continue doing business in these locations.

Pursuing our growth plan in new and adjacent markets, as well as within developing economies, will require us to find effective new channels of distribution. There is no assurance that we can develop or otherwise identify these channels of distribution.

***The markets in which we operate are highly competitive, and we may not be successful in winning new business.***

We are one of several companies competing for new business within the furniture industry. Many of our competitors offer similar categories of products, including office seating, systems and freestanding office furniture, casegoods, storage, and residential and healthcare furniture solutions. We believe that our innovative product design, functionality, quality, depth of knowledge, and strong network of distribution partners differentiates us in the marketplace. However, increased market pricing pressure could make it difficult for us to win new business with certain customers and within certain market segments at acceptable profit margins.

Additionally, in recent years we have seen an increased market presence from international competitors. We expect this to continue, particularly in the area of low-priced imports into the United States. There is a risk that this competitive pricing pressure could make it difficult for us to raise prices in response to increasing raw-material prices and other inflationary pressures.

***Adverse economic and industry conditions could have a negative impact on our business, results of operations, and financial condition.***

Customer demand within the contract office furniture industry is affected by various macro-economic factors; general corporate profitability, white-collar employment levels, new office construction rates, and existing office vacancy rates are among the most influential factors. History has shown that declines in these measures can have an adverse effect on overall office furniture demand. Additionally, factors and changes specific to our industry, such as developments in technology, governmental standards and regulations, and health and safety issues can influence demand. There is no assurance that current or future economic or industry conditions will not adversely affect our business, operating results, or financial condition.

***Our business presence outside the United States exposes us to certain risks that could negatively affect our results of operations and financial condition.***

We have significant manufacturing and sales operations in the United Kingdom, which represents our largest marketplace outside the United States. We also have manufacturing operations in China. Additionally, our products are sold internationally through wholly-owned subsidiaries or branches in various countries including Canada, Mexico, Brazil, France, Germany, Italy, Netherlands, Japan, Australia, Singapore, China, and India. In certain other regions of the world, our products are offered primarily through independent dealerships.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Doing business internationally exposes us to certain risks, many of which are beyond our control and could potentially impact our ability to design, develop, manufacture, or sell products in certain countries. These factors could include, but would not necessarily be limited to:

- Political, social, and economic conditions
- Legal and regulatory requirements
- Labor and employment practices
- Cultural practices and norms
- Natural disasters
- Security and health concerns
- Protection of intellectual property

In some countries, the currencies in which we import and export products can differ. Fluctuations in the rate of exchange between these currencies could negatively impact our business. Additionally, tariff and import regulations, international tax policies and rates, and changes in U.S. and international monetary policies may have an adverse impact on results of operations and financial condition.

***Disruptions in the supply of raw and component materials could adversely affect our manufacturing and assembly operations.***

We rely on outside suppliers to provide on-time shipments of the various raw materials and component parts used in our manufacturing and assembly processes. The timeliness of these deliveries is critical to our ability to meet customer demand. Any disruptions in this flow of delivery could have a negative impact on our business, results of operations, and financial condition.

***Increases in the market prices of manufacturing materials may negatively affect our profitability.***

The costs of certain manufacturing materials used in our operations are sensitive to shifts in commodity market prices. In particular, the costs of steel, plastic and aluminum components and particleboard are sensitive to the market prices of commodities such as raw steel, aluminum, crude oil, lumber, and resins. Increases in the market prices of these commodities may have an adverse impact on our profitability if we are unable to offset them with strategic sourcing, continuous improvement initiatives or increased prices to our customers.

***Disruptions within our dealer network could adversely affect our business.***

Our ability to manage existing relationships within our network of independent dealers is crucial to our ongoing success. Although the loss of any single dealer would not have a material adverse effect on the overall business, our business within a given market could be negatively affected by disruptions in our dealer network caused by the termination of commercial working relationships, ownership transitions, or dealer financial difficulties.

If dealers go out of business or restructure, we may suffer losses because they may not be able to pay for products already delivered to them. Also, dealers may experience financial difficulties, creating the need for outside financial support, which may not be easily obtained. In the past, we have, on occasion, agreed to provide direct financial assistance through term loans, lines of credit, and/or loan guarantees to certain dealers. There is no assurance that these dealers will be able to repay amounts owed to us or to banks with which we have offered guarantees.

***Increasing competition for highly skilled and talented workers could adversely affect our business.***

The successful implementation of our business strategy depends, in part, on our ability to attract and retain a skilled workforce. The increasing competition for highly skilled and talented employees could result in higher compensation costs, difficulties in maintaining a capable workforce, and leadership succession planning challenges.

***Costs related to product defects could adversely affect our profitability.***

We incur various expenses related to product defects, including product warranty costs, product recall and retrofit costs, and product liability costs. These expenses relative to product sales vary and could increase. We maintain reserves for product defect-related costs based on estimates and our knowledge of circumstances that indicate the need for such reserves. We cannot, however, be certain that these reserves will be adequate to cover actual product defect-related claims in the future. Any significant increase in the rate of our product defect expenses could have a material adverse effect on operations.

***Government and other regulations could adversely affect our business.***

Government and other regulations apply to many of our products. Failure to comply with these regulations or failure to obtain approval of products from certifying agencies could adversely affect the sales of these products and have a material negative impact on operating results.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### Item 1B UNRESOLVED STAFF COMMENTS - none

### Item 2 PROPERTIES

The company owns or leases facilities located throughout the United States and several foreign countries. The location, square footage, and use of the most significant facilities at May 30, 2009 were as follows.

<u>Owned Locations</u>	<u>Square Footage</u>	<u>Use</u>
Holland, Michigan	917,400	Manufacturing, Distribution, Warehouse, Design, Office
Spring Lake, Michigan	818,300	Manufacturing, Warehouse, Office
Zeeland, Michigan	750,800	Manufacturing, Warehouse, Office
England, U.K.	83,500	Manufacturing, Office

#### Leased Locations

Zeeland, Michigan(1)	98,100	Office
Atlanta, Georgia	176,700	Manufacturing, Warehouse, Office
England, U.K.	93,500	Manufacturing, Warehouse
Ningbo, China	94,700	Manufacturing, Warehouse, Office

(1) The Zeeland, Michigan office facility was exited as part of the restructuring action in fiscal year 2009. The lease on this facility expires in December 2010.

The company also maintains showrooms or sales offices near many major metropolitan areas throughout North America, Europe, Asia/Pacific, and Latin America. The company considers its existing facilities to be in excellent condition, efficiently utilized, well suited, and adequate for its design, production, distribution, and selling requirements.

### Item 3 LEGAL PROCEEDINGS

The company is involved in legal proceedings and litigation arising in the ordinary course of business. In the opinion of management, the outcome of such proceedings and litigation currently pending will not materially affect the company's Consolidated Financial Statements.

### Item 4 SUBMISSION OF MATTER TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of the year ended May 30, 2009.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### ADDITIONAL ITEM: EXECUTIVE OFFICERS OF THE REGISTRANT

Certain information relating to Executive Officers of the company is as follows.

Name	Year Elected an Executive		Position with the Company
	Age	Officer	
Gregory J. Bylsma	44	2009	Executive Vice President, Chief Financial Officer
James E. Christenson	62	1989	Senior Vice President, Legal Services, and Secretary
Donald D. Goeman	52	2005	Executive Vice President, Research, Design & Development
Kenneth L. Goodson, Jr.	57	2003	Executive Vice President, Operations
Kathleen D. Koch	51	2009	Senior Vice President of Marketing
Steven C. Gane	54	2009	Senior Vice President, President, Geiger International
Andrew J. Lock	55	2003	Executive Vice President, Chief Administrative Officer
Elizabeth A. Nickels	47	2000	Executive Vice President, President, Herman Miller for Healthcare
John P. Portlock	63	2003	Executive Vice President and President, International
Curtis S. Pullen	49	2007	Executive Vice President, President, North American Office and Learning Environments
Michael A. Volkema	53	1995	Chairman
Brian C. Walker	47	1996	President and Chief Executive Officer

Except as discussed below, each of the named officers has served the company in an executive capacity for more than five years.

Mr. Bylsma joined Herman Miller, Inc. in 2000 as Director of Reporting & Planning for North American prior to being appointed Corporate Controller in 2005.

Mr. Goeman joined Herman Miller's New Product Development arena in 1980, and during his 29 years with the company he has held a variety of new product design and development leadership positions.

Mrs. Koch joined Herman Miller, Inc. in 2007 as Senior Vice President of Marketing, and prior to this she served as Chief Marketing Officer for Kodak Health Imaging and Kodak Entertainment Imaging for 10 years.

Mr. Gane joined Herman Miller in 2007 as President of Geiger International. Prior to this he worked for Furniture Brands International for 16 years serving mostly as President of HBF.

Mr. Pullen joined Herman Miller in 1991 and served as Chief Financial Officer from 2007 to 2009, Senior Vice President of Dealer Distribution from 2003 to 2007, Senior Vice President of Finance for North America from 2000 to 2003, and Vice President of Finance, Herman Miller International from 1994 to 2000. There are no family relationships between or among the above-named executive officers. There are no arrangements or understandings between any of the above-named officers pursuant to which any of them was named an officer.

PART IIItem 5 MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES**Share Price, Earnings, and Dividends Summary**

Herman Miller, Inc., common stock is traded on the NASDAQ-Global Select Market System (Symbol: MLHR). As of July 22, 2009, there were approximately 20,700 record holders, including individual participants in security position listings, of the company's common stock.

Per Share and Unaudited	Market Price High (at close)	Market Price Low (at close)	Market Price Close	Earnings Per Share- Diluted <sup>(1)</sup>	Dividends Declared Per Share
Year ended May 30, 2009

Year	\$ 36.78	\$ 22.41	\$ 24.80	\$ 2.56	\$ 0.35200

<sup>(1)</sup> The sum of the quarters may not equal the annual balance due to rounding associated with the calculation of earnings per share on an individual quarter basis

Dividends were declared and paid quarterly during fiscal 2009 and 2008 as approved by the Board of Directors. While it is anticipated that the company will continue to pay quarterly cash dividends, the amount and timing of such dividends is subject to the discretion of the Board depending on the company's future results of operations, financial condition, capital requirements, and other relevant factors.

**Issuer Purchases of Equity Securities**

The following is a summary of share repurchase activity during the fourth quarter ended May 30, 2009.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average price Paid per Share or Unit	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet be Purchased Under the Plans or Programs <sup>(1)</sup>
3/1/09-3/28/09	1,977	11.58	1,977	\$ 171,140,954
3/29/09-4/25/09	1,630	26.82	1,630	\$ 171,097,241
4/26/09-5/30/09				\$ 171,097,241
Total	3,607	18.47	3,607	

<sup>(1)</sup> Amounts are as of the end of the period indicated

## Edgar Filing: MILLER HERMAN INC - Form 10-K

The company repurchases shares under a previously announced plan authorized by the Board of Directors on September 28, 2007, which provided share repurchase authorization of \$300,000,000 with no specified expiration date.

No repurchase plans expired or were terminated during the fourth quarter of fiscal 2009, nor do any plans exist under which the company does not intend to make further purchases.

During the period covered by this report the company did not sell any of its equity shares that were not issued under the Securities Act of 1933.

### Shareholder Return Performance Graph

Set forth below is a line graph comparing the yearly percentage change in the cumulative total shareholder return on the Company's common stock with that of the cumulative total return of the Standard & Poor's 500 Stock Index and the NASD Non-Financial Index for the five-year period ended May 30, 2009. The graph assumes an investment of \$100 on May 29, 2004 in the company's common stock, the Standard & Poor's 500 Stock Index and the NASD Non-Financial Index, with dividends reinvested.

	2004	2005	2006	2007	2008	2009
Herman Miller, Inc.	\$ 100	\$ 124	\$ 128	\$ 155	\$ 107	\$ 63
S&P 500 Index	\$ 100	\$ 107	\$ 115	\$ 137	\$ 125	\$ 82
NASD Non-Financial	\$ 100	\$ 104	\$ 110	\$ 133	\$ 133	\$ 73

Item 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

**Management's Discussion and Analysis**

You should read the issues discussed in Management's Discussion and Analysis in conjunction with the company's Consolidated Financial Statements and the Notes to the Consolidated Financial Statements included in this Form 10-K.

**Executive Overview**

We use problem-solving design and performance innovation to enhance the quality of human habitats worldwide, making our customers' lives more productive, rewarding, delightful, and meaningful. We do this by providing high quality products and related knowledge services. At present, most of our customers come to us for work environments in both corporate office and healthcare settings. We also have a growing presence in educational and residential markets, including home office. Our primary products include furniture systems, seating, storage and material handling solutions, freestanding furniture, and casegoods. Our services extend from workplace to furniture asset management. We extended our industry leading position in seating as we introduced the NeoCon award winning Embody™ chair and Setu™ family of seating.

We are globally positioned in terms of manufacturing operations. In the United States, our manufacturing operations are located in Michigan, Georgia, and Washington. In Europe, we have a significant manufacturing presence in the United Kingdom, our largest marketplace outside of the United States. In Asia, we have manufacturing operations in Ningbo, China.

Our products are sold internationally through wholly-owned subsidiaries or branches in various countries including Canada, France, Germany, Italy, Japan, Mexico, Australia, Singapore, China, India, and the Netherlands. Our products are offered elsewhere in the world primarily through independent dealerships. We have customers in over 100 countries.

We manufacture our products using a system of lean manufacturing techniques collectively referred to as the Herman Miller Performance System (HMPS). We strive to maintain efficiencies and cost savings by minimizing the amount of inventory on hand. Accordingly, production is order-driven with direct materials and components purchased as needed to meet demand. The standard lead time for the majority of our products is 10 to 20 days. As a result, the rate of our inventory turns is high. These combined factors could cause our inventory levels to appear relatively low in relation to sales volume.

A key element of our manufacturing strategy is to limit fixed production costs by sourcing component parts from strategic suppliers. This strategy has allowed us to increase the variable nature of our cost structure while retaining proprietary control over those production processes that we believe provide us a competitive advantage. As a result of this strategy, our manufacturing operations are largely assembly-based.

Our business consists of various operating segments as defined by generally accepted accounting principles. These operating segments are determined on the basis of how we internally report and evaluate financial information used to make operating decisions and are organized by the various markets we serve. For external reporting purposes, we aggregate these operating segments as follows.

*North American Furniture Solutions* Includes the business associated with the design, manufacture, and sale of furniture products primarily through a Certified Dealer Network for office, learning and healthcare environments throughout the United States, Canada, and Mexico.

*Non-North American Furniture Solutions* Includes the business associated with the design, manufacture, and sale of furniture products primarily for work-related settings outside North America.

*Other* Includes our North American residential furniture business as well as other business activities such as Convia, and unallocated corporate expenses.

### *Core Strengths*

We rely on the following core strengths in delivering workplace solutions to our customers.

*Problem-Solving Design and Innovation* We are committed to developing research-based functionality and aesthetically innovative new products and have a history of doing so. We believe our skills and experience in matching problem-solving design with the workplace needs of our customers provide us with a competitive advantage in the marketplace. An important component of our business strategy is to actively pursue a program of new product research, design, and development. We accomplish this through the use of an internal research and design staff as well as third party design resources generally compensated on a royalty basis.

*Operational Excellence* We were among the first in our industry to embrace the concepts of lean manufacturing. HMPS provides the foundation for all of our manufacturing operations. We are committed to continuously improving both product quality and production and operational efficiency. We have begun to extend this lean process work externally to our manufacturing supply chain and to our distribution channel. We believe this work holds great promise for further gains in reliability, quality and efficiency.

*Building and Leading Networks* We value relationships in all areas of our business. We consider our networks of innovative designers, owned and independent dealers, and suppliers to be among our most important competitive factors and vital to the long-term success of our business.

### *Channels of Distribution*

Our products and services are offered to most of our customers under standard trade credit terms between 30 and 45 days and are sold through the following distribution channels.

*Independent Contract Furniture Dealers and Licensees* Most of our product sales are made to a network of independently owned and operated contract furniture dealerships doing business in many countries around the world. These dealers purchase our products and distribute them to end customers. We recognize revenue on product sales through this channel once our products are shipped and title passes to the dealer. Many of these dealers also offer furniture-related services, including product installation.

*Owned Contract Furniture Dealers* At May 30, 2009, we owned 8 contract furniture dealerships, some of which have operations in multiple locations. The financial results of these owned dealers are included in our Consolidated Financial Statements. Product sales to these dealerships are eliminated as inter-company transactions from our consolidated financial results. We recognize revenue on these sales once products are shipped to the end customer and installation is substantially complete. We believe independent ownership of contract furniture dealers is generally, the best model for a financially strong distribution network. With this in mind, our strategy is to continue to pursue opportunities to transition our owned dealerships to independent owners. Where possible, our goal is to involve local managers in these ownership transitions.

*Direct Customer Sales* We sometimes sell products and services directly to end customers without an intermediary (e.g. sales to the U.S. federal government). In most of these instances, we contract separately with a dealership or third-party installation company to provide sales-related services. We recognize revenue on these sales once products are shipped and installation is substantially complete.

*Independent Retailers* Certain products are sold to end customers through independent retail operations. Revenue is recognized on these sales once products are shipped and title passes to the independent retailer.

### *Challenges Ahead*

Like all businesses, we are faced with a host of challenges and risks. We believe our core strengths and values, which provide the foundation for our strategic direction, have us well prepared to respond to the inevitable challenges we will face in the future. While we are confident in our direction, we acknowledge the risks specific to our business and industry. Refer to Item 1A of our Annual Report on Form 10-K for discussion of certain of these risk factors.

### *Future Avenues of Growth*

We believe we are well positioned to successfully pursue our mission despite the risks and challenges we face. That is, we believe we can continue to improve the performance of human habitats worldwide. In pursuing our mission, we have identified the following as key avenues for our future growth.

*Primary Markets* Capturing additional market share within our primary markets by offering superior solutions to customers who value space as a strategic tool.

*Adjacent Markets* Further applying our core skills in space environments such as healthcare, higher education, and residential.

*Developing Economies* Expanding our geographic reach in areas of the world with significant growth potential

*New Markets-Developing* new products and technologies that serve new markets

### *Industry Analysis*

The Business and Institutional Furniture Manufacturer's Association (BIFMA) is the trade association for the U.S. domestic office furniture industry. We monitor the trade statistics reported by BIFMA and consider them an indicator of industry-wide sales and order performance. BIFMA publishes statistical data for the contract segment and the office supply segment within the U.S. furniture market. The U.S. contract segment is primarily with large to mid-size corporations installed via a network of dealers. The office supply segment is primarily to smaller customers via wholesalers and retailers. We primarily participate, and are a leader in, the contract segment. It is important to note that our diversification strategy lessens our dependence on the U.S. office furniture market.

We also analyze BIFMA statistical information as a benchmark comparison against the performance of our domestic U.S. business and also to that of our competitors. The timing of large project-based business may affect comparisons to this data. Finally, BIFMA regularly provides its members with industry forecast information, which we use internally as one of many considerations in our short and long-range planning process.

### **Discussion of Business Conditions**

Our fiscal years ended May 30, 2009 and May 31, 2008 each included 52 weeks of operations.

Fiscal 2009 was a year marked with unprecedented economic challenges and uncertainties. We are encouraged by our achievements in the face of these economic conditions. We were able to maintain solid operating income performance despite a rapid and steep decline in revenue, as we acted quickly to adjust our cost structure. While we took significant steps in reducing our cost structure, it did not prevent us from continuing to invest in our strategy of problem solving design and innovation. We introduced several new products designed to reach customers in nearly all areas of our business. These new products made a strong showing at NeoCon, the contract furniture industry's largest tradeshow. Our newly introduced chair, Setu™, won Gold for conference room seating, and Silver in the lounge seating category. Our Embody™ chair won Silver in task seating and we were named Manufacturer of the Year by the Office Furniture Dealers Association for the second year in a row.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

In fiscal 2009, we significantly changed our capital structure to align with the economic conditions. We suspended our share repurchases and focused on cash conservation and strengthening our balance sheet. Our intent to conserve cash is both a defensive strategy as well as offensive. We reduced our dividend in the fourth quarter from \$.088 per share to \$.022 per share. This adjustment aligns our dividend payout with our historic dividend metrics. We also announced and implemented several initiatives to improve our operating profitability and cash flow. We put in place a restructuring action that eliminated approximately 1,400 full-time positions and temporary workers. We took further action to reduce our cost structure by \$30 million by adjusting our work schedule, working 9 out of every 10 days, and suspending our 401(k) match. All these actions allowed us to end the year with a cash and investment balance of \$204.2 million. Given the uncertain nature of the current economic environment we have taken a number of actions to increase our financial strength and flexibility. At the same time, we believe there will be opportunities to increase market share for companies that are able to take advantage of these conditions. For example, subsequent to year-end we announced the acquisition of Nemschoff Chairs, LLC, (Nemschoff) a provider of lobby room seating and furnishings, administrative office lounge seating, and a wide range of healthcare patient room furniture products. We believe this acquisition, coupled with our recent acquisition of Brandrud, will make us the number one provider of furniture in healthcare environments.

Additionally, after year-end we renegotiated our syndicated revolving line of credit, reducing our availability from \$250 million to \$150 million, while giving us additional covenant flexibility. We also completed the repurchase of \$75 million of our outstanding public bonds. In addition to improving our covenant metrics this action also significantly reduces our interest expense moving forward.

In May we announced the closing of a manufacturing facility. This closing, which will take place over the next 9 to 12 months, will provide significant savings once completed. As a result of our HMPS process improvements, we do not believe this causes a reduction to our long-term manufacturing capacity.

While many of the decisions we made were difficult and had negative impacts on some of our employee-owners, they were made as a result of unprecedented economic conditions. Overall we are pleased with our performance for the year and the opportunities in front of us.

Looking forward, the general economic outlook for our industry in the U.S. is expected to be negative through calendar year 2009, and we remain appropriately cautious as a result. BIFMA issued its most recent report in May 2009 expecting that the growth rate of office furniture orders and shipments in the U.S. for calendar 2009 will be negative 29.3 percent and 28.6 percent, respectively. For calendar 2010, BIFMA expects positive 2.6 percent and 2.8 percent growth for orders and sales, respectively. This forecasted improvement is based upon an assumption of a slight improvement in the U.S. economy in the fourth quarter of calendar 2009 and the first quarter of 2010.

## Financial Results

The following is a comparison of our annual results of operations and year-over-year percentage changes for the periods indicated.

(Dollars In millions)	Fiscal 2009	% Chg from 2008	Fiscal 2008	% Chg from 2007	Fiscal 2007
Net sales	\$ 1,630.0	(19.0)%	\$ 2,012.1	4.9%	\$ 1,918.9
Cost of sales	<u>1,102.3</u>	(16.1)%	<u>1,313.4</u>	3.2%	<u>1,273.0</u>
Gross margin	527.7	(24.5)%	698.7	8.2%	645.9

Minority interest, net of tax	<u>(0.1)</u>	--	<u>(0.1)</u>	NA	--
Net earnings	\$ 68.0	(55.4)%	\$ 152.3	18.0%	\$ 129.1

The following table presents, for the periods indicated, the components of the company's Consolidated Statements of Operations as a percentage of net sales.

	May 30, 2009	Fiscal Year Ended May 31, 2008	June 2, 2007
Net sales	100.0%	100.0%	100.0%
Cost of sales	67.6	65.3	66.3
Gross margin	32.4	34.7	33.7
Selling, general, and administrative expenses	20.3	19.7	20.6
Restructuring	1.7	0.3	
Design and research expenses	2.8	2.5	2.7
Total operating expenses	24.8	22.5	23.3
Operating earnings	7.5	12.3	10.3
Net other expenses	1.5	0.8	0.6
Earnings before income taxes	6.1	11.5	9.7
Income tax expense	1.9	3.9	3.0
Net earnings	4.2	7.6	6.7

### Net Sales, Orders, and Backlog

*Fiscal 2009 Compared to Fiscal 2008*

For the fiscal year ended May 31, 2009, consolidated net sales declined 19.0 percent to \$1,630.0 million from \$2,012.1 million in fiscal 2008. This year-over-year decline was driven by the global economic environment and was experienced across nearly all operating and geographic units. The strengthening of the U.S. dollar during fiscal 2009 against most major foreign currencies reduced our top line by approximately \$30 million.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Consolidated net trade orders for fiscal 2009 totaled \$1,565 million. This is comparable to net trade orders of \$2,009 million last year, and represents a decrease of 22 percent. Starting with the financial market volatility in the early fall in part related to the instability in the banking industry we experienced a sudden and dramatic fall in order rates through most of the third quarter. Orders rates stabilized through the fourth quarter, albeit at much lower level than last year. The strong dollar reduced orders by approximately \$38 million compared with the prior year.

Our backlog of unfilled orders at the end of fiscal 2009 totaled \$208 million, a 27 percent decline from \$286 million at the end of fiscal 2008.

BIFMA reported an estimated year-over-year decline in U.S. office furniture shipments of approximately 13.8 percent for the twelve-month period ended May 2009. By comparison, the net sales decline for our domestic U.S. business was approximately 14.6 percent. We believe that while comparisons to BIFMA are important, we continue to pursue a strategy of revenue diversification that makes us less reliant on the drivers that impact BIFMA.

### *Fiscal 2008 Compared to Fiscal 2007*

Consolidated net sales of \$2,012.1 million in fiscal year 2008 increased \$93.2 million from fiscal 2007. This increase of 4.9 percent was driven by growth within both of our reportable business segments.

Consolidated net trade orders in fiscal 2008 totaled \$2,009 million representing a year-over-year growth of 2.1 percent from orders of \$1,967 million in fiscal 2007.

The backlog of unfilled orders at the end of fiscal 2008 totaled \$286 million, decreasing 0.7 percent from the fiscal 2007 level of \$288 million.

In the second quarter of fiscal 2008, we announced a restructuring program designed to reduce operating expenses and improve profitability. These actions included the elimination of approximately 150 full-time positions within the North American Furniture Solutions segment. The positions that were eliminated represented a variety of functional areas, and the individuals affected were offered one-time termination benefits, including severance and outplacement services. Pre-tax restructuring expenses for fiscal 2008 of \$5.1 million, are reflected separately in the Consolidated Statements of Operations. The related cash payments were \$4.5 million in fiscal 2008. The balance of the restructuring accrual at May 31, 2008 was \$0.6 million, and is reflected on the Consolidated Balance Sheet within Other accrued liabilities.

### *Discussion of Business Segments Fiscal 2009 Compared to Fiscal 2008*

Net sales within our North American Furniture Solutions segment decreased from \$1,636 million in fiscal 2008 to \$1,349 million in the current year. This represents a year-over-year decrease of \$287 million or 17.5 percent. We experienced a decline throughout our North American business operations, however, there were customer types within this segment that performed better than the overall average, primarily education, government and healthcare customers. Operating earnings for the segment in fiscal 2009 were \$133 million, or 9.9 percent of net sales. This compares to segment earnings of \$195.9 million or 12.0 percent in the prior year. With a top-line decline of 17.5 percent within the segment, we saw both dollar and percent-of-sales decreases to operating earnings in the North American Furniture Solutions segment. This segment's ability to generate strong operating performance despite a significant decline in volume is largely due to the variable business model in place, which allowed costs to be shed as the top line declined as well as our execution of the restructuring plan discussed above.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Net sales from our non-North American Furniture Solutions segment declined \$85 million or 26% from the prior year. The decline was compounded by the strengthening of the U.S. dollar against most foreign currencies. Nearly every region within the segment posted decreases in year-over-year net sales. There were pockets of resiliency including the Middle East, South America, and Australia. Total net sales for the segment were \$238 million, versus \$323 million in the prior year. The regions which were the hardest hit by the current economy were the U.K. which was down 35%, and Japan, down 47%. Operating earnings within our non-North American segment totaled \$15 million for the year or 6.3 percent of net sales. This compares to \$47 million or 14.6 percent of net sales in fiscal 2008, a decrease of 830 basis points. Despite the decline in operating income, our low fixed cost model generated positive income with rapid declines in the top-line.

Net sales within the Other segment category were \$42 million in fiscal 2009 compared to \$52 million in the prior year. The decrease is the result of net sales declining within our North American Home business, primarily due to the challenges associated with the U.S. macroeconomic environment. This overall decrease was somewhat offset by sales to a new retail customer.

The U.S. dollar strengthened against most major currencies throughout fiscal 2009. The changes in currency exchange rates from the prior year affected the U.S. dollar value of net sales within both primary operating segments. We estimate these changes effectively decreased our fiscal 2009 net sales within the North American Furniture Solutions segment by approximately \$18 million, driven largely by the U.S. dollar / Canadian dollar and the Mexican peso average exchange rate during the current year. Currency exchange rate fluctuations within our non-North American Furniture Solutions segment decreased net sales in fiscal 2009 by approximately \$12 million. This was primarily driven by movements in the U.S. dollar / British pound sterling. It is important to note that period-to-period changes in currency exchange rates have a directionally similar impact on our international cost structures. Operating earnings within our non-North American segment increased an estimated \$1.5 million in fiscal 2009 due to the aforementioned changes in currency exchange rates relative to the prior year level. The estimated impact on operating earnings of our North American business segment was a decrease of approximately \$1 million.

### *Discussion of Business Segments Fiscal 2008 Compared to Fiscal 2007*

Net sales within our North American Furniture Solutions segment increased from \$1,563.6 million in fiscal 2007 to \$1,636.3 million in fiscal 2008. This represents a year-over-year increase of \$72.7 million or 4.7 percent. We experienced growth throughout our North American business operations, but particularly strong growth was experienced in the healthcare industry which posted double-digit year-over-year growth. The healthcare industry remains a key growth area within the segment and lines up with our strategy to pursue diversification. Sales at our Mexican subsidiary again reached double-digit growth over fiscal 2007. Canadian sales turned around from a flat year in 2007 to impressive double-digit growth in fiscal 2008. Operating earnings for the segment in fiscal 2008 were \$195.9 million, or 12.0 percent of net sales. This compares to segment earnings of \$161.7 million or 10.3 percent in fiscal 2007. With top-line growth of 4.7 percent within the segment, we saw both dollar and percent-of-sales increases to operating earnings in the North American Furniture Solutions segment. This segment's strong operating performance is largely due to improved margins on certain recently introduced products, our focus on cost management, and our execution of the restructuring plan discussed above.

Net sales from our non-North American Furniture Solutions segment grew at double-digit rates. Every region within the segment posted increases in year-over-year net sales. Total net sales for the segment were \$323.5 million, up \$45.0 million or 16.2 percent. Sales generated from our non-North American Furniture Solutions segment increased to 16.1 percent of our consolidated net sales, an increase of 160 basis points from 14.5 percent in fiscal 2007. The largest sales contribution within this segment came from our operations in the United Kingdom, which posted a 17.5 percent year-over-year increase to the top line. We also saw a strong increase in net sales within continental Europe. Our results within the Asia Pacific region are particularly noteworthy, growing by 26.8 percent from fiscal 2007. We continued to pursue our diversification strategy and the effects are clearly visible in these results. Operating earnings within our non-North American segment totaled \$47.3 million for the year or 14.6 percent of net sales. This compares to \$28.9 million or 10.4 percent of net sales in fiscal 2007, an increase of 420 basis points.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Net sales within the Other segment category were \$52.3 million in fiscal 2008 compared to \$76.8 million in fiscal 2007. The decrease is primarily the result of OEM Sales of \$20.4 million recognized in fiscal 2007 that did not occur in fiscal 2008. Net sales within our North American Home business were down 8.3 percent primarily due to the challenges associated with the U.S. macroeconomic environment.

The U.S. dollar continued to weaken against major currencies throughout fiscal 2008. The changes in currency exchange rates from fiscal 2007 affected the U.S. dollar value of net sales within both primary operating segments. We estimate these changes effectively increased our fiscal 2008 net sales within the North American Furniture Solutions segment by approximately \$12 million, driven largely by the U.S. dollar / Canadian dollar average exchange rate during the current year. Currency exchange rate fluctuations within our non-North American Furniture Solutions segment, increased net sales in fiscal 2008 by approximately \$15 million. This was primarily driven by favorable movements in the U.S. dollar / British pound sterling and U.S. dollar / euro exchange rates as compared to fiscal 2007. It is important to note that period-to-period changes in currency exchange rates have a directionally similar impact on our international cost structures. Operating earnings within our non-North American segment increased an estimated \$6 million in fiscal 2008 due to the aforementioned changes in currency exchange rates relative to fiscal 2007. The estimated impact on operating earnings of our North American business segment was an increase of approximately \$1 million.

### Gross Margin

#### *Fiscal 2009 Compared to Fiscal 2008*

Our fiscal 2009 gross margin as a percentage of sales was 32.4 percent, a decline of 230 basis points from the prior year level. Higher direct material costs from vendors coupled with significantly lower volumes contributed to this decreased gross margin performance year-over-year. Details relative to each component of gross margin follow.

Direct material costs as a percentage of sales in the current year increased 220 basis points. The impact was front end loaded as raw material prices increased dramatically in the first half of the year, stabilized in the third quarter, and then declined substantially by the end of the year ending at approximately the same level they began the year.

Our direct labor costs were higher by only 10 basis points as a percentage of sales from prior year levels. First and foremost, this performance is an indication of the speed with which action was taken to reduce costs in the face of a significant decrease to net sales. This change in performance is also reflective of increased efficiency which was offset by the underlying increases in benefit costs, particularly medical benefits.

Overhead costs decreased by \$52 million from fiscal 2008. Our ability to react quickly to the sales decline, coupled with the variable nature of our business model, allowed us to actually improve overhead by 10 basis points from the prior year. This decrease in costs was a result of the restructuring actions which took place during the year and related primarily to headcount.

Freight expenses, as a percentage of sales, were modestly lower compared to 2008 levels. Contributing to the reduction in freight expenses was a significant decrease in diesel fuel prices in the United States, as we moved through the year.

#### *Fiscal 2008 Compared to Fiscal 2007*

Our fiscal 2008 gross margin as a percentage of sales was 34.7 percent, an improvement of 100 basis points from the prior year level. Favorable direct material costs contributed to this increased gross margin performance year-over-year. Lower relative direct labor costs also boosted our margins while overhead expenses were slightly unfavorable. Details relative to each component of gross margin follow.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Direct material costs as a percentage of sales in fiscal 2008 decreased 100 basis points. Although a higher sales volume favorably affected the percentage, the effect of our fixed contracts for the procurement of certain raw materials also contributed to the improvement. The majority of our fixed-price contracts expired during the fourth quarter of the year and we began to see the impact of increased costs for our raw material inputs late in the year.

Our direct labor costs were lower by 40 basis points as a percentage of sales from prior year levels. This reduction is primarily due to higher sales volume, and our continued manufacturing process improvements. Overhead costs increased in fiscal 2008 from prior year levels. We recognized certain costs associated with the completion of a large project, and had an overall shift into low margin service-related sales, which had the effect of increasing overhead costs by 30 basis points in fiscal 2008.

Freight expenses, as a percentage of sales, were modestly higher in fiscal 2008 compared to fiscal 2007 levels. Contributing to the additional freight expenses was a significant increase in diesel prices in the United States. We have continued to benefit from the efforts of our logistics teams to consolidate shipments, increase trailer utilization, and engage lower cost carriers, which together, served to mitigate the impact of increases in fuel costs. Pricing also served to partially offset the increases in fuel costs.

### Restructuring

In the second quarter of fiscal 2009, we announced a restructuring program designed to align our cost structure with the reality of the current economic conditions. These actions included the elimination of approximately 1,400 permanent and temporary positions across all segments. These reductions were permanent for our salaried workforce, while our direct labor positions were eliminated until business levels return. Those positions that were permanently eliminated represented a variety of functional areas, and the individuals affected were offered one-time termination benefits, including severance and outplacement services. Further actions were announced during the fourth quarter, which included a 10% reduction in the work schedule for most employees in the U.S., and the suspension of the 401(k) match. Within the non-North American Segment further reductions in force and a change to the work schedule were implemented to achieve similar savings.

Additionally, in the fourth quarter we announced the plans to shut down our IMT facility in Spring Lake, Michigan. The operations within the plant will be moved to other owned facilities, and a small component of this work will be outsourced to suppliers. We anticipate this shutdown will be completed over the next 9 to 12 months. Only the expenses related to the curtailment and special termination benefits of the pension plan have been recognized in fiscal 2009. The remaining costs are expected to be incurred over the course of the planned shutdown.

Pre-tax restructuring expenses for the aforementioned actions totaled \$28.4 million in fiscal 2009, which are reflected separately in the Consolidated Statements of Operations. The related cash payments were \$16.8 million in fiscal 2009. The balance of the restructuring accrual at May 30, 2009 is \$11.6 million, and is reflected on the Consolidated Balance Sheet within Other accrued liabilities.

### Operating Expenses

#### *Fiscal 2009 Compared to Fiscal 2008*

Operating expenses in fiscal 2009 were \$404.9 million, or 24.8 percent of net sales, which compares to \$452.1 million, or 22.5 percent of net sales in the prior fiscal year. Although there was a year-over-year decrease of \$47.2 million, we experienced a 230 basis point increase to operating expenses as a percentage of sales compared to fiscal 2008. A charge of \$28.4 million for restructuring expenses as discussed above is included in fiscal 2009. There was a restructuring charge of \$5.1 million in fiscal 2008.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

The year-over-year dollar decline in expenses, excluding restructuring expense, was \$70.5 million or 16%. This is primarily due to a decrease in employee compensation and benefit costs as a result of the restructuring actions previously described, as well as a reduction in incentive compensation.

Year-over-year changes in currency exchange rates had a deflationary impact on operating expenses associated with our international operations, as measured in U.S. dollars. We estimate these changes decreased our consolidated operating expenses in fiscal 2009 by approximately \$6 million relative to the prior year.

Design and research costs included in total operating expenses were \$45.7 million and \$51.2 million in fiscal 2009 and fiscal 2008, respectively. These expenses include royalty payments to the designers of our products. We consider such royalty payments, which totaled \$9.5 million and \$12.4 million in fiscal years 2009 and 2008, respectively, to be variable costs of the products being sold. Accordingly, we do not include them in research and development costs as discussed in Note 1.

### *Fiscal 2008 Compared to Fiscal 2007*

Operating expenses in fiscal 2008 were \$452.1 million, or 22.5 percent of net sales. This compares to \$447.8 million or 23.3 percent of net sales in fiscal 2007. Although there was a year-over-year increase of \$4.3 million, we experienced an 80 basis point reduction to operating expenses as a percentage of sales compared to fiscal 2007. A charge of \$5.1 million for restructuring expenses was included in fiscal 2008. There were no restructuring expenses in fiscal 2007.

The dollar increase from fiscal 2007 to fiscal 2008 in expenses is primarily due to increases in employee compensation and benefit costs, designer royalties, global selling expenses, program marketing costs, and the foreign exchange impact on operating expenses, partially offset by lower levels of charitable contributions, and savings from certain R&D and product management programs. Leverage on higher sales levels in fiscal 2008 drove the percent-of-sales reduction in operating expenses.

Incremental employee compensation and benefit costs in fiscal 2008, which includes merit increases, stock-based compensation, and health benefits were an estimated \$6 million higher than fiscal 2007. Global selling costs and designer royalty expenses, both of which vary with net sales levels, were \$3.7 million and \$2.4 million higher, respectively, in fiscal 2008 than in fiscal 2007. In fiscal 2008, we continued our pursuit of bringing new and innovative products to market, which drove incremental program marketing expenses of \$2.8 million compared to fiscal 2007.

Year-over-year changes in currency exchange rates had an inflationary impact on operating expenses associated with our international operations, as measured in U.S. dollars. We estimate these changes increased our consolidated operating expenses in fiscal 2008 by approximately \$4.8 million relative to fiscal 2007.

Partially offsetting these operating expense increases were charitable contributions that were \$6.3 million lower than fiscal 2007 and a combined savings from certain R&D and product management programs of \$6.6 million.

Design and research costs included in total operating expenses were \$51.2 million and \$52.0 million in fiscal 2008 and fiscal 2007, respectively. These expenses include royalty payments to the designers of our products. We consider such royalty payments, which totaled \$12.4 million and \$9.9 million in fiscal years 2008 and 2007, respectively, to be variable costs of the products being sold. Accordingly, we do not include them in research and development costs as discussed in Note 1.

### Operating Earnings

Fiscal 2009 operating earnings were \$122.8 million, which represents a decrease of 50.2 percent from our fiscal 2008 level of \$246.6 million. As a percentage of net sales, operating earnings in fiscal 2009 decreased to 7.5 percent of net sales, a 480 basis-point decrease from the 12.3 percent reported in the prior year. The increase in restructuring expense led to 90 basis points of the decline while the remainder is largely a result of the decline in volume. In fiscal year 2007, we reported operating earnings of \$198.1 million or 10.3 percent of net sales.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### Other Expenses and Income

Net other expenses totaled \$23.9 million in fiscal 2009 compared to \$16.2 million in the prior year and \$11.1 million in fiscal 2007. The increase in expense in fiscal 2009 compared to fiscal 2008 was principally driven by additional interest expense of \$6.8 million in the current year associated with the additional senior subordinated notes. Net foreign currency transaction losses recorded in fiscal 2009 totaled \$1.1 million versus a \$0.1 million gain in fiscal 2008.

The year-over-year increase in net other expenses of \$5.1 million between fiscal 2008 and fiscal 2007 was also as a result of higher interest expense related to the aforementioned debt issued in December of 2007.

### Income Taxes

Our effective tax rate was 31.4 percent in fiscal 2009 versus 33.9 percent in fiscal 2008 and 31.0% in fiscal 2007. The effective rate in fiscal 2009 was below the statutory rate of 35%, primarily due to the domestic U.S. manufacturing tax incentive and the realization of foreign tax credits. The effective rate in fiscal 2008 was below the statutory rate primarily due to the domestic U.S. manufacturing tax incentive. The effective rate in fiscal 2007 was lower than the statutory rate primarily due to \$4.3 million in tax credits for foreign taxes, other credits for research and development activities, and tax incentives for export sales and domestic manufacturing.

We expect our effective tax rate for fiscal 2010 to be between 27 and 29 percent. For further information regarding income taxes, refer to Note 15.

### Net Earnings

In fiscal 2009 we generated \$68.0 million of net earnings. This compares to net earnings in fiscal 2008 and fiscal 2007 of \$152.3 million and \$129.1 million, respectively. Fiscal 2009 diluted earnings per share were \$1.25. Earnings per diluted share in fiscal 2008 were \$2.56 and \$1.98 in fiscal 2007.

### Liquidity and Capital Resources

The table below presents certain key cash flow and capital highlights for the fiscal years indicated.

(In millions)

	<b>Fiscal Year Ended</b>		
	<b>2009</b>	<b>2008</b>	<b>2007</b>
Cash and cash equivalents, end of period	\$ 192.9	\$ 155.4	\$ 76.4
Short term investments, end of period	\$ 11.3	\$ 15.7	\$ 15.9
Cash generated from operating activities	\$ 91.7	\$ 213.6	\$ 137.7
Cash used for investing activities	\$ (29.5)	\$ (51.0)	\$ (37.4)
Cash used for financing activities	\$ (16.5)	\$ (86.5)	\$ (131.5)
Pension and post-retirement benefit plan contributions	\$ (5.3)	\$ (5.2)	\$ (7.6)
Capital expenditures	\$ (25.3)	\$ (40.5)	\$ (41.3)
Stock repurchased and retired	\$ (0.3)	\$ (266.7)	\$ (164.9)
Interest-bearing debt, end of period <sup>(1) (3)</sup>	\$ 377.4	\$ 375.5	\$ 176.2
Available unsecured credit facility, end of period <sup>(2)</sup>	\$ 236.9	\$ 236.9	\$ 136.9

<sup>(1)</sup> Amounts shown include the fair market value of the company's interest rate swap arrangement(s). The net fair value of this/these arrangement(s) was/were \$2.4 million at May 30, 2009, \$0.5 million at May 31, 2008, and \$(1.8) million at June 2, 2007.

<sup>(2)</sup> Amounts shown are net of outstanding letters of credit, which are applied against the company's unsecured credit facility, and excludes the \$100 million accordion feature disclosed in Note 9.

<sup>(3)</sup> During the third quarter of fiscal 2008, the company issued new senior unsecured private placement notes and replaced its unsecured revolving credit facility. Refer to Notes 9 and 10 to the consolidated financial statements for additional information.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### *Cash Flow Operating Activities*

Cash generated from operating activities in fiscal 2009 totaled \$91.7 million compared to \$213.6 million generated in the prior year. This represents a decrease of \$121.9 million compared to fiscal 2008. Changes in working capital balances resulted in a \$34.4 million use of cash in the current fiscal year compared to an \$11.8 million source of cash in the prior year.

The use of cash related to working capital balances in fiscal 2009 is primarily driven from decreased current liabilities of \$102.3 million over the prior year. The reduction in liabilities is primarily related to reductions in accounts payable related to inventory, and accruals related to regular and incentive compensation. The use of cash is partially offset by volume related declines in accounts receivables of \$60.1 million and inventories of \$17.8 million. Accounts receivable declined 28.8% from the prior year, though it should be noted, this decline is not as substantial as the quarterly decline in sales. However, this lag is not reflective of deterioration of the accounts receivable aging, but rather the timing of the sales within the fourth quarter and the customer type. Certain direct customers and geographic customers tend to have a longer pay cycle. A relatively large percentage of the North American accounts receivable increase pertains to our Mexican subsidiary which has the longest cash collection cycle in the North American segment.

The source of cash related to working capital balances in fiscal 2008 is primarily driven from increased current liabilities of \$33.1 million over the prior year, and to a lesser extent, lower inventory of \$2.6 million from prior year levels. The increase in current liabilities is comprised of \$16.6 million in tax-related accruals, \$6.1 million of increased trade accounts payable and \$10.4 million of other accruals. These sources of cash are offset partially by increases in volume-related accounts receivable of \$21.3 million due to increased sales inside and outside North America.

The working capital investment in fiscal 2007 was related to increases in inventory and accounts receivable, primarily due to the significant level of growth in our non-North American Furniture Solutions segment. A contributing factor to the working capital investment during fiscal 2007 relates to our business with the U.S. federal government. Order activity with the federal government increased significantly during fiscal 2007, particularly during the first and second quarters. These sales generally require a longer cash collection cycle than do sales to independent contract furniture dealers. Accordingly, we experienced a related increase in accounts receivable. Inventory levels were also affected by this growth in federal government business, since we are generally required to hold product in inventory longer than with non-government business. This extended inventory holding period is necessary to be consistent with our revenue recognition policy for direct customer sales.

Collections of accounts receivable remained strong throughout the year, and we believe our recorded accounts receivable valuation allowances at the end of fiscal 2009 are adequate to cover the risk of potential bad debts. Allowances for non-collectible accounts receivable, as a percent of gross accounts receivable, totaled 4.7 percent, 2.6 percent, and 2.5 percent at the end of fiscal years 2009, 2008, and 2007, respectively.

Included in operating cash flows are cash contributions made to our employee pension and post-retirement benefit plans which totaled \$5.3 million, \$5.2 million, and \$7.6 million in fiscal years 2009, 2008, and 2007, respectively. For further information regarding the company's pension and post-retirement benefit plans, including information relative to the funded status of these plans, refer to Note 12.

### *Cash Flow Investing Activities*

Capital expenditures totaled \$25.3 million, \$40.5 million and \$41.3 million in fiscal 2009, 2008 and 2007, respectively. Outstanding commitments for future capital purchases at the end of fiscal 2009 were approximately \$6.2 million. We expect capital spending in fiscal 2010 to be between \$25 million and \$32 million.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Included in our fiscal 2009 investing activities, is a net cash outflow of \$26.6 million related to the completion of our acquisition of Brandrud, and \$2.9 million related to our acquisition of certain elements of Ruskin Industries. In fiscal 2008, our investing activities included a net cash outflow of \$11.7 million related to the acquisition of Brandrud. In fiscal 2007, our investing activities reflected a cash outflow of \$3.5 million related to the acquisition of a technology company. This acquisition added enhanced functionality to the existing product portfolio for our Convia subsidiary. Refer to Note 2 for further information related to these acquisitions.

Our net marketable securities transactions for fiscal 2009 yielded a \$3.4 million source of cash. This compares to a \$0.3 million source of cash in fiscal 2008.

In fiscal 2009, we were advanced \$19.3 million of cash against the value of company owned life insurance policies. This is reflected as cash proceeds from investing activities in the Consolidated Statement of Cash Flows.

### *Cash Flow Financing Activities*

	Fiscal Year Ended		
	2009	2008	2007
(In millions, except share and per share data)			
Shares acquired	2,138,701	7,488,430	5,116,375
Cost of shares acquired <sup>(1)</sup>	\$ 0.3	\$ 266.7	\$ 164.9
Average cost per share acquired <sup>(1)</sup>	NA	NA	\$ 32.23
Shares issued	257,765	276,002	2,001,348
Average price per share issued	\$ 14.7	\$ 23.73	\$ 25.19
Cash dividends paid	\$ 19.2	\$ 21.2	\$ 20.7

<sup>(1)</sup> On January 3, 2008, the company entered into two agreements to purchase shares of its common stock from Morgan Stanley & Co. Inc., for an aggregate purchase price of \$200 million, plus fees, under an Accelerated Share Repurchase ( ASR ) program. The company entered into these agreements as part of a repurchase program approved by its Board of Directors. The number of shares purchased under the ASR program was based on the volume-weighted-average price of the company's common stock during the term of the agreements. On January 4, 2008 the company paid \$200.6 million in exchange for an initial delivery of 4.4 million shares, representing 70% of the shares that could have been purchased, based on the closing price of its common stock on January 3, 2008. An additional 1.0 million shares were delivered during the remainder of fiscal 2008. An additional 2.1 million shares were delivered on September 9, 2008, which completed the ASR program. The total number of shares repurchased under the ASR was 7,538,718 at an average price of \$26.61 per share.

In the fourth quarter of fiscal 2009 we announced a reduction in the cash dividend effective for first quarter of fiscal 2010 payment. This change will reduce the cash dividend to \$0.022 per share versus a total quarterly cash dividend of \$0.088 per share that was paid through the third quarter of fiscal 2009.

In fiscal 2008 we completed a debt financing transaction involving the issuance of \$200 million in senior unsecured private placement notes. Notes totaling \$50 million are due in January 2015, and bear interest at a fixed annual coupon rate of 5.94 percent. The remaining \$150 million of these notes are due in January 2018 and bear interest at a fixed annual coupon rate of 6.42 percent. We used the \$200 million proceeds from the notes for an ASR of our common stock. Refer to Note 10 for more information related to our long-term debt.

In fiscal 2008, we also completed a refinancing of our existing unsecured credit facility, increasing our borrowing capacity from \$150 million to \$250 million. The new credit facility includes a \$100 million increase option, subject to customary conditions. The facility may be used to refinance existing debt, provide working capital or for other general corporate purposes. In fiscal 2008, we also paid off \$2.1 million of debt on behalf of Brandrud, our most recent acquisition.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

As part of our decision to conserve cash we suspended share repurchases during fiscal 2009. In fiscal 2008 we repurchased shares totaling \$267 million. The amount remaining under our share repurchase authorization at the end of fiscal 2009 totaled \$171.1 million.

Interest-bearing debt at the end of fiscal 2009 of \$377.4 million increased \$1.9 million from the end of fiscal 2008, as compared to a \$199.3 million increase during the prior fiscal year. The increase in fiscal 2009 is a result in the change in the fair value of our interest rate swap instrument, while the increase in fiscal 2008 related primarily to the issuance of \$200 million of private placement notes.

The only usage against our unsecured revolving credit facility at the end of fiscal years 2009 and 2008 represented outstanding standby letters of credit totaling \$13.1 million at each date. The provisions of our private placement notes and unsecured credit facility require that we adhere to certain covenant restrictions and maintain certain performance ratios. We were in compliance with all such restrictions and performance ratios during fiscal 2009.

In fiscal 2009, we received \$3.4 million related to the issuance of shares in connection with stock-based benefit plans. This compares to receiving \$6.5 million and \$50.4 million in fiscal 2008 and fiscal 2007, respectively.

During fiscal 2009 and 2008 we repatriated \$8.0 million and \$23.9 million of undistributed foreign earnings, respectively.

We believe cash on hand, cash generated from operations, and our borrowing capacity will provide adequate liquidity to fund near term and future business operations and capital needs, subject to financing availability in the marketplace.

### Contingencies

The company leases a facility in the U.K. under an agreement that expires in June 2011. Under the terms of the lease, the company is required to perform the maintenance and repairs necessary to address the general dilapidation of the facility over the lease term. The ultimate cost of this provision to the company is dependent on a number of factors including, but not limited to, the future use of the facility by the lessor and whether the company chooses and is permitted to renew the lease term. The company has estimated the cost of these maintenance and repairs to be between \$0 and \$3 million, depending on the outcome of future plans and negotiations. Based on existing circumstances, it is estimated that these costs will most likely approximate \$1.0 million. As a result, this amount has been recorded as a liability reflected under the caption Other Liabilities in the Consolidated Balance Sheets as of May 30, 2009 and May 31, 2008.

The company has a lease obligation in the U.K. until May 2014 for a facility that it previously exited. Current market rates for comparable office space are lower than the rental payments owed under the lease agreement, as such, the company would remain liable to pay the difference. As of May 30, 2009 and May 31, 2008 the future cost of this arrangement was estimated to be \$1.6 million and \$2.0 million respectively. Accordingly this amount is reflected within Other Liabilities on the Consolidated Balance Sheets as of these dates.

The company is involved in legal proceedings and litigation arising in the ordinary course of business. It is the company's opinion that the outcome of such proceedings and litigation currently pending will not materially affect its Consolidated Financial Statements.

### Basis of Presentation

The company's fiscal year ends on the Saturday closest to May 31. The fiscal years ended May 30, 2009, May 31, 2008, and June 2, 2007 each included 52 weeks of operations. This is the basis upon which weekly-average data is presented.

**Contractual Obligations**

Contractual obligations associated with our ongoing business and financing activities will result in cash payments in future periods. The following table summarizes the amounts and estimated timing of these future cash payments. Further information regarding debt obligations can be found in Note 10 to the Consolidated Financial Statements. Likewise, further information related to operating leases can be found in Note 11.

(In millions)

	Total	Payments due by fiscal year			Thereafter
		2010	2011-2012	2013-2014	
Long-term debt <sup>(1) (7)</sup>	\$ 375.0	\$ 75.0	\$ 100.0	\$	\$ 200.0
Estimated interest on debt obligations <sup>(2)</sup>	110.1	18.9	29.5	25.2	36.5
Operating leases	61.8	16.3	24.5	13.2	7.8
Purchase obligations <sup>(3)</sup>	20.6	18.6	1.7	0.3	
Pension plan funding <sup>(4)</sup>	0.3	0.3			
Shareholder dividends <sup>(5) (7)</sup>	1.2	1.2			
Other <sup>(6) (7)</sup>	9.0	2.2	1.5	1.5	3.8
Total	\$ 578.0	\$ 132.5	\$ 157.2	\$ 40.2	\$ 248.1

<sup>(1)</sup> Amounts indicated do not include the recorded fair value of interest rate swap instruments.

<sup>(2)</sup> Estimated future interest payments on our outstanding debt obligations are based on interest rates as of May 30, 2009. Actual cash outflows may differ significantly due to changes in underlying interest rates and timing of principal payments.

<sup>(3)</sup> Purchase obligations consist of non-cancelable purchase orders and commitments for goods, services, and capital assets.

<sup>(4)</sup> Pension funding commitments are defined as the estimated minimum funding requirements to be made in the following 12-month period. Such funding, if any, is not known beyond fiscal 2010. As of May 30, 2009, the total accumulated benefit obligation for our domestic and international employee pension benefit plans was \$337.1 million.

<sup>(5)</sup> Represents the recorded dividend payable as of May 30, 2009. Future dividend payments are not considered contractual obligations until declared. <sup>(6)</sup> Other contractual obligations primarily represent long-term commitments related to deferred and supplemental employee compensation benefits, other post-employment benefits, and minimum designer royalty payments. <sup>(7)</sup> Total balance is reflected as a liability in the Consolidated Balance Sheet at May 30, 2009.

**Off-Balance Sheet Arrangements***Guarantees*

We provide certain guarantees to third parties under various arrangements in the form of product warranties, loan guarantees, standby letters of credit, lease guarantees, performance bonds, and indemnification provisions. These arrangements are accounted for and disclosed in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirement for Guarantees, Including Indirect Guarantees of Indebtedness of Others* as described in Note 19 to the Consolidated Financial Statements.

*Variable Interest Entities*

On occasion, we provide financial support to certain independent dealers in the form of term loans, lines of credit, and loan guarantees. At May 30, 2009 and May 31, 2008, we were not considered the primary beneficiary of any such dealer relationships as defined by FASB Interpretation No. 46, *Consolidation of Variable Interest Entities* (FIN 46(R)) and therefore, no entities were included as VIEs as of these dates.

The risks and rewards associated with our interests in these dealerships are primarily limited to our outstanding loans and guarantee amounts. As of May 30, 2009 and May 31, 2008, our maximum exposure to potential losses related to outstanding loans to these dealerships totaled \$0.6 million and \$3.2 million, respectively. Information on our exposure related to outstanding loan guarantees provided to such entities is included in Note 19 to the Consolidated Financial Statements.

## Critical Accounting Policies and Estimates

Our goal is to report financial results clearly and understandably. We follow U.S. generally accepted accounting principles in preparing our Consolidated Financial Statements, which require us to make certain estimates and apply judgments that affect our financial position and results of operations. We continually review our accounting policies and financial information disclosures. These policies and disclosures are reviewed at least annually with the Audit Committee of the Board of Directors. Following is a summary of our more significant accounting policies that require the use of estimates and judgments in preparing the financial statements.

### *Revenue Recognition*

As described in the Executive Overview, the majority of our products and services are sold through one of four channels: Independent contract furniture dealers and licensees, owned contract furniture dealers, direct to end customers, and independent retailers. We recognize revenue on sales to independent dealers, licensees, and retailers once the product is shipped and title passes to the buyer. When we sell product directly to the end customer or to owned dealers, we recognize revenue once the product and services are delivered and installation thereof is substantially complete.

Amounts recorded as net sales generally include any freight charged to customers, with the related freight expenses recognized within cost of sales. Items such as discounts off list price, rebates, and other sale-related marketing program expenses are recorded as reductions to net sales. We record accruals for rebates and other marketing programs, which require us to make estimates about future customer buying patterns and market conditions. Customer sales that reach (or fail to reach) certain levels can affect the amount of such estimates, and actual results could differ from our estimates.

### *Receivable Allowances*

We base our allowances for receivables on known customer exposures, historical credit experience, and the specific identification of other potential problems, including the current economic climate. These methods are applied to all major receivables, including trade, lease, and notes receivable. In addition, we follow a policy that consistently applies reserve rates based on the age of outstanding accounts receivable. Actual collections can differ from our historical experience, and if economic or business conditions deteriorate significantly, adjustments to these reserves may be required.

The accounts receivable allowance totaled \$7.3 million and \$5.6 million at May 30, 2009 and May 31, 2008, respectively. As a percentage of gross accounts receivable, these allowances totaled 4.7 percent and 2.6 percent, respectively. The year-over-year increase in the allowance percentage is primarily due to the perceived risk associated with the current economic conditions as opposed to an increase in specific customer issues.

### *Goodwill*

The carrying value of our goodwill assets as of May 30, 2009 and May 31, 2008, totaled \$69.5 million and \$40.2 million, respectively. The increase in goodwill balances relates primarily to our final payment for the acquisition of Brandrud and also the acquisition of certain elements of Ruskin Industries. We account for our goodwill assets in accordance with Statement of Financial Accounting Standards (SFAS) No. 142. Under this accounting guidance, we are required to perform an annual test on our goodwill assets by reporting unit to determine whether the asset values are impaired. If impairment is determined, we are required to reduce the net carrying value of the assets to their estimated fair market value.

Our impairment-testing model is based partly on the present value of projected cash flows and the resulting residual value as well as a market-based approach that considers recent market capitalization values. In completing the test under this approach, we assume that one of the drivers of the value of a business today is the cash flows it will generate in the future. We also assume that such future cash flows can be reasonably estimated. While these projected cash flows reflect our best estimate of future reporting unit performance, actual cash flows could differ significantly.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

The results of this test, performed in the fourth quarter of fiscal 2009, indicated that our net goodwill asset values were not impaired. We employed a market-based approach in selecting the discount rates used in our analysis. By this, we mean the discount rates selected represent market rates of return equal to what we believe a reasonable investor would expect to achieve on investments of similar size to our reporting units. We believe the discount rates selected in our testing are conservative in that, in all cases, they exceed the estimated weighted average cost of capital for our business as a whole. The results of the impairment test are sensitive to changes in discount rates, though the testing performed in fiscal 2009 would indicate that even a significant increase in the discount rate would not have changed the result.

### *Warranty Reserve*

We stand behind our products and keep our promises to customers. From time to time, quality issues arise resulting in the need to incur costs to correct problems with products or services. We have established warranty reserves for the various costs associated with these guarantees. General warranty reserves are based on historical claims experience and periodically adjusted for business levels. Specific reserves are established once an issue is identified. The valuation of such reserves is based on the estimated costs to correct the problem. Actual costs may vary and may result in an adjustment to these reserves.

### *Inventory Reserves*

Inventories are valued at the lower of cost or market. The inventories at the majority of our manufacturing operations are valued using the last-in, first-out (LIFO) method, whereas inventories of certain other subsidiaries are valued using the first-in, first-out (FIFO) method. We establish reserves for excess and obsolete inventory, based on prevailing circumstances and judgment for consideration of current events, such as economic conditions, that may affect inventory. The reserve required to record inventory at lower of cost or market may be adjusted in response to changing conditions.

### *Income Taxes*

Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse.

We have net operating loss (NOL) carryforwards available in certain jurisdictions to reduce future taxable income. We also have foreign tax credits available in certain jurisdictions to reduce future tax due. Future tax benefits for NOL carryforwards and foreign tax credits are recognized to the extent that realization of these benefits is considered more likely than not. We base this determination on the expectation that related operations will be sufficiently profitable or various tax planning strategies available to us will enable us to utilize the NOL carryforwards and/or foreign tax credits. When information becomes available that raises doubts about the realization of a deferred income tax asset, a valuation allowance is established.

### *Self-Insurance Reserves*

With the assistance of independent actuaries, we establish reserves for workers' compensation and general liability exposures. The reserves are established based on expected future claims for incurred losses. We also establish reserves for health, prescription drugs, and dental benefit exposures based on historical claims information along with certain assumptions about future trends. The methods and assumptions used to determine the liabilities are applied consistently, although actual claims experience can vary. We also maintain insurance coverage for certain risk exposures through traditional premium-based insurance policies.

### *Pension and other Post-Retirement Benefits*

The determination of the obligation and expense for pension and other post-retirement benefits depends on certain actuarial assumptions. Among the most significant of these assumptions is the discount rate, interest-crediting rate, and expected long-term rate of return on plan assets. We determine these assumptions as follows.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

**Discount Rate** This assumption is established at the end of the fiscal year based on high-quality corporate bond yields. We utilize the services of an independent actuarial firm to analyze and recommend an appropriate rate. For our domestic pension and other post-retirement benefit plans, the actuary uses a cash flow matching technique, which compares the estimated future cash flows of the plan to a published discount curve showing the relationship between interest rates and duration for hypothetical zero-coupon fixed income investments. We set the discount rate for our international pension plan based on the yield level of a commonly used corporate bond index in that jurisdiction. Because the average duration of the bonds underlying this index is less than that of our international pension plan liabilities, the index yield is used as a reference point. The final discount rate, which takes into consideration the index yield and the difference in comparative durations, is based on a recommendation from our independent actuarial consultant.

The discount rates selected for our domestic pension and post-retirement benefit plans at the end of fiscal 2009 were consistent with those established at the end of fiscal 2008. With all other assumptions and values held constant, this would not result in a significant change in our pension and post-retirement benefit plan expenses for our 2009 fiscal year, which began on June 1, 2008. The discount rate selected for our international pension plan at the end of the current year was higher than the rate established at the end of fiscal 2008. This change would result in a decrease in our international pension plan expense for fiscal 2009 if all other assumptions were held constant.

**Interest Crediting Rate** We use this assumption in accounting for our primary domestic pension plan, which is a cash balance-type plan. The rate, which represents the annual rate of interest applied to each plan participant's account balance, is established at an assumed level, or spread, below the discount rate. We base this methodology on the historical spread between the 30-year U.S. Treasury and high-quality corporate bond yields. This relationship is examined annually to determine whether the methodology is still appropriate.

**Expected Long-Term Rate of Return** We base this assumption on our long-term assumed rates of return for equities and fixed income securities, weighted by the allocation of the invested assets of the pension plan. We consider risk factors specific to the various classes of investments and advice from independent actuaries in establishing this rate. Changes in the investment allocation of plan assets would impact this assumption. A shift to a higher relative percentage of fixed income securities, for example, would result in a lower assumed rate.

While this assumption represents our long-term market return expectation, actual asset returns can and do differ from year-to-year. Such differences give rise to actuarial gains and losses. In years where actual market returns are lower than the assumed rate, an actuarial loss is generated. Conversely, an actuarial gain results when actual market returns exceed the assumed rate in a given year. As of May 30, 2009, and May 31, 2008, the net actuarial loss associated with our employee pension and post-retirement benefit plans totaled approximately \$197.4 million and \$107.4 million, respectively. At both dates, the majority of this unrecognized loss was associated with lower than expected plan asset returns.

For purposes of determining annual net pension expense, we use a calculated method for determining the market-related value of plan assets. Under this method, we recognize the change in fair value of plan assets systematically over a five-year period. Accordingly, a portion of our net actuarial loss is deferred. The remaining portion of the net actuarial loss is subject to amortization expense each year. The amortization period used in determining this expense is the estimated remaining working life of active pension plan participants. We currently estimate this period to be approximately 14 years. As of the beginning of fiscal year 2009, the deferred net actuarial loss (i.e., the portion of the total net actuarial loss not subject to amortization) was approximately \$17.2 million.

Refer to Note 12 to the Consolidated Financial Statements for more information regarding costs and assumptions used for employee benefit plans.

*Long-Lived Assets*

We evaluate long-lived assets and acquired business units for indicators of impairment when events or circumstances indicate that an impairment risk may be present. Our judgments regarding the existence of impairment are based on market conditions, operational performance, and estimated future cash flows. If the carrying value of a long-lived asset is considered impaired, an impairment charge is recorded to adjust the asset to its estimated fair value.

*Stock-Based Compensation*

We view stock-based compensation as a key component of total compensation for certain of our employees, non-employee directors and officers. We account for these programs, which include grants of restricted stock, restricted stock units, performance share units, employee stock purchases, and stock options, in accordance with SFAS 123(R). Under this guidance we recognize compensation expense related to each of these share-based arrangements. We utilize the Black-Scholes option pricing model in estimating the fair value of stock options issued in connection with our compensation program. This pricing model requires the use of several input assumptions. Among the most significant of these assumptions are the expected volatility of our common stock price, and the expected timing of future stock option exercises.

*Expected Volatility* This represents a measure, expressed as a percentage, of the expected fluctuation in the market price of our common stock. As a point of reference, a high volatility percentage would assume a wider expected range of market returns for a particular security. All other assumptions held constant, this would yield a higher stock option valuation than a calculation using a lower measure of volatility. In measuring the fair value of stock options issued during fiscal year 2009, we utilized an expected volatility of 33 percent.

*Expected Term of Options* This assumption represents the expected length of time between the grant date of a stock option and the date at which it is exercised (option life). We assumed an average expected term of 5.5 years in calculating the fair values of the majority of stock options issued during fiscal 2009.

Refer to Note 14 for further discussion on our stock-based compensation plans.

*Contingencies*

In the ordinary course of business, we encounter matters that raise the potential for contingent liabilities. In evaluating these matters for accounting treatment and disclosure, we are required to apply judgment in order to determine the probability that a liability has been incurred. We are also required to measure, if possible, the dollar value of such liabilities in determining whether or not recognition in our financial statements is required. This process involves the use of estimates which may differ from actual outcomes. Refer to Note 19 to the Consolidated Financial Statements for more information relating to contingencies.

**New Accounting Standards**

Refer to Note 1 to the Consolidated Financial Statements for information related to new accounting standards.

## Forward Looking Statements

Certain statements in this filing are not historical facts but are forward-looking statements as defined under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act, as amended. Such statements are based on management's belief, assumptions, current expectations, estimates and projections about the office furniture industry, the economy and the company itself. Words like anticipates, believes, confident, estimates, expects, forecast, likely, plans, projects, and should, and variations of such words and expressions identify forward looking statements. These statements do not guarantee future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict with regard to timing, expense, likelihood, and degree of occurrence. These risks include, without limitation, employment and general economic conditions in the U.S. and in our international markets, the increase in white collar employment, the willingness of customers to undertake capital expenditures, the types of products purchased by customers, the possibility of order cancellations or deferrals by customers, competitive pricing pressures, the availability and pricing of direct materials, our reliance on a limited number of suppliers, currency fluctuations, the ability to increase prices to absorb the additional costs of direct materials, the financial strength of our dealers, the financial strength of our customers, the mix of our products purchased by customers, our ability to attract and retain key executives and other qualified employees, our ability to continue to make product innovations, the strength of the intellectual property relating to our products, the success of newly introduced products, our ability to serve all of our markets, possible acquisitions, divestitures or alliances, the outcome of pending litigation or governmental audits or investigations, and other risks identified in this Form 10-K and our other filings with the Securities and Exchange Commission. Therefore, actual results and outcomes may materially differ from what we express or forecast. Furthermore, Herman Miller, Inc., takes no obligation to update, amend, or clarify forward-looking statements.

-37-

---

Item 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The company manufactures, markets, and sells its products throughout the world and, as a result, is subject to changing economic conditions, which could reduce the demand for its products.

**Direct Material Costs**

The company is exposed to risks arising from price changes for certain direct materials and assembly components used in its operations. The largest such costs incurred by the company are for steel, plastics, textiles, wood particleboard, and aluminum components. Commodity prices were volatile during fiscal 2009, resulting in sharp increases in costs for the first half of the year. As the year progressed, prices receded back to approximately the same level that they began the year at. The net impact of price changes during fiscal 2009 was an increase to our costs of \$24 million to \$26 million. Commodity prices were fairly flat during most of fiscal 2008, resulting in increased costs of \$2 million to \$4 million, with most of this increase occurring in the fourth quarter. During fiscal 2007, rising commodities had a significant impact, adding an estimated \$14 million to \$16 million to the consolidated cost of sales for the full year.

Steel and fuel price fluctuations have a direct impact on our input costs for many products. During the past fiscal year both factors increased sharply, followed by a steady decline in the second half of the year. During fiscal 2008 the impact of steel price increases was fairly flat due to price contracts with suppliers.

The company believes market prices for commodities in the near term may move lower but acknowledges that over time increases on its key direct materials and assembly components are likely. Consequently, it views the prospect of such increases as an outlook risk to the business.

**Foreign Exchange Risk**

The company manufactures its products in the United States, United Kingdom, and China. It also sources completed products and product components from outside the United States. The company's completed products are sold in numerous countries around the world. Sales in foreign countries as well as certain expenses related to those sales are transacted in currencies other than the company's reporting currency, the U.S. dollar. Accordingly, production costs and profit margins related to these sales are affected by the currency exchange relationship between the countries where the sales take place and the countries where the products are sourced or manufactured. These currency exchange relationships can also affect the company's competitive positions within these markets.

In the normal course of business, the company enters into contracts denominated in foreign currencies. The principal foreign currencies in which the company conducts its business are the British pound (GBP), euro (EUR), Canadian dollar, Japanese yen, Mexican peso, Chinese renminbi (CNY), and Brazilian real (BRL). For the past three fiscal years the company has entered into forward currency instruments in order to offset exposure denominated in non-functional currency. In the fourth quarter of fiscal 2009, nine contracts in total were placed to offset various currency exposures. To offset net asset exposure denominated in non-functional currency, three forward contracts for 4.8 million EUR and three forward contracts for 6.4 million USD were placed. Conversely, three contracts were placed to offset the company's net liability exposure denominated in non-functional currency. The contracts included 0.5 million BRL, 3.5 million CNY, and 1.6 million of GBP. At the end of fiscal 2008, three contracts were placed to offset 4.0 million EUR for net asset exposure and two contracts for 6.0 million USD were placed to offset net liability exposure. Similarly, in the fourth quarter of fiscal 2007, the company entered into three separate forward currency contracts in order to offset 4.0 million EUR of net asset exposure denominated in a non-functional currency. In all three years, the instruments were marked to market at the end of the period, with changes in fair value reflected in net earnings. The fair value of the forward currency instruments was \$0.1 million for both years ended May 30, 2009 and May 31, 2008, and a negligible amount at June 2, 2007.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

For fiscal year 2009, a net loss of \$1.1 million related to remeasuring all foreign currency transactions into the appropriate functional currency was included in net earnings. For fiscal year 2008, a net gain of \$0.1 million impacted net earnings, while the impact in fiscal 2007 was negligible. Additionally, the cumulative effect of translating the balance sheet and income statement accounts from the functional currency into the United States dollar increased the accumulated comprehensive loss component of total shareholders' equity by \$14.0 million as of the end of fiscal 2009. Conversely, the effect reduced the accumulated comprehensive loss component of total shareholders' equity by \$4.1 million, and \$3.3 million for the years ended May 31, 2008, and June 2, 2007, respectively.

### Interest Rate Risk

The company maintains fixed-rate debt for which changes in interest rates generally affect fair market value but not earnings or cash flows. As of the end of fiscal years 2009 and 2008, the company held one interest rate swap agreement that effectively converts \$50.0 million of fixed-rate debt securities to a variable rate. As of the end of fiscal year 2007, the company had two interest rate swaps that effectively converted \$53.0 million of fixed-rate debt to a variable-rate basis. This debt is subject to changes in interest rates, which, if significant, could have a material impact on the company's financial results. The interest rate swap derivative instruments are held and used by the company as a tool for managing interest rate risk. They are not used for trading or speculative purposes. The counterparties to these swap instruments are large financial institutions that the company believes are of high-quality creditworthiness. While the company may be exposed to potential losses due to the credit risk of non-performance by these counterparties, such losses are not anticipated.

The combined fair market value of effective interest rate swap instruments was \$2.4 million, \$0.5 million, and a negative \$1.8 million at May 30, 2009, May 31, 2008 and June 2, 2007, respectively. The impact of these swap instruments on total interest expense was a reduction to interest expense of \$1.2 million in fiscal 2009, \$0.4 million in fiscal 2008, and an addition to interest expense of \$0.6 million in fiscal 2007. All cash flows related to the company's interest rate swap instruments are denominated in U.S. dollars. For further information, refer to Notes 16 and 17 to the Consolidated Financial Statements.

As of May 30, 2009, the weighted-average interest rate on the company's variable-rate debt was approximately 3.5 percent. Based on the level of variable-rate debt outstanding as of that date, a one percentage-point increase in the weighted-average interest rate would increase the company's annual pre-tax interest expense by approximately \$0.5 million.

Expected cash flows (notional amounts) over the next five years and thereafter related to debt instruments are as follows.

(In millions)	2010	2011	2012	2013	2014	Thereafter	Total <sup>(1)</sup>
Long-Term Debt:							
Fixed rate	\$ 75.0	\$ 100.0	\$	\$	\$	\$ 200.0	\$ 375.0
Wtd. average interest rate = 6.69%							

#### *Derivative Financial Instruments Related to*

##### *Debt - Interest Rate Swaps:*

Pay variable/receive fixed	\$	\$ 50.0	\$	\$	\$	\$	\$ 50.0
Pay interest rate = 3.53% (at May 31, 2009)							
Receive interest rate = 7.125%							

<sup>(1)</sup> Amount does not include the recorded fair value of the swap instruments, which totaled \$2.4 million at the end of fiscal 2009.

# Item 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

## Quarterly Financial Data (Unaudited)

Set forth below is a summary of the quarterly operating results on a consolidated basis for the years ended May 30, 2009, May 31, 2008, and June 2, 2007. Refer to Management's Discussion and Analysis provided in Item 7 and the Notes to the Consolidated Financial Statements for further disclosure of significant accounting transactions that may have affected the quarterly operating results for each of the periods presented.

(In millions, except per share data)		First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2009	Net sales	\$ 479.1	\$ 476.6	\$ 354.4	\$ 319.9
	Gross margin <sup>(1)</sup>	162.4	155.4	105.9	104.0
	Net earnings	33.4	32.6	(5.2)	7.2
	Earnings per share-basic <sup>(1)</sup>	.60	.61	(.10)	.14
	Earnings per share-diluted <sup>(1)</sup>	.60	.60	(.10)	.14
2008	Net sales	\$ 491.7	\$ 505.9	\$ 495.4	\$ 519.1
	Gross margin <sup>(1)</sup>	167.5	180.1	170.0	181.0

## Notes to the Consolidated Financial Statements

### 1. Significant Accounting and Reporting Policies

The following is a summary of significant accounting and reporting policies not reflected elsewhere in the accompanying financial statements.

#### *Principles of Consolidation*

The Consolidated Financial Statements include the accounts of Herman Miller, Inc., and its majority-owned domestic and foreign subsidiaries. The consolidated entities are collectively referred to as the company. All intercompany accounts and transactions, including any involving VIEs, have been eliminated in the Consolidated Financial Statements.

#### *Description of Business*

The company researches, designs, manufactures and distributes interior furnishings, for use in various environments including office, healthcare, educational, and residential settings, and provides related services that support companies all over the world. The company's products are sold primarily through independent contract office furniture dealers. Accordingly, accounts and notes receivable in the accompanying balance sheets are principally amounts due from the dealers.

#### *Fiscal Year*

The company's fiscal year ends on the Saturday closest to May 31. Fiscal years ended May 30, 2009, May 31, 2008 and June 2, 2007, each contain 52 weeks. An extra week in the company's fiscal year is required approximately every six years in order to realign its fiscal calendar-end dates with the actual calendar months. *Foreign Currency Translation* The functional currency for foreign subsidiaries is the local currency. The cumulative effects of translating the balance sheet accounts from the functional currency into the United States dollar using fiscal year-end exchange rates and translating revenue and expense accounts using average exchange rates for the period is reflected as a component of Accumulated other comprehensive loss in the Consolidated Balance Sheets. The financial statement impact resulting from remeasuring all foreign currency transactions into the appropriate functional currency, which is included in Other Expenses (Income) in the Consolidated Statements of Operations, was a net loss of \$1.1 million for the year ended May 30, 2009. For the years ended May 31, 2008 and June 2, 2007, the financial statement impact was a net gain of \$0.1 million and negligible, respectively.

#### *Cash Equivalents*

The company holds cash equivalents as part of its cash management function. Cash equivalents include money market funds, time deposit investments, and treasury bills with original maturities of less than three months. The carrying value of cash equivalents, which approximates fair value, totaled \$99.0 million and \$90.7 million as of May 30, 2009, and May 31, 2008, respectively. All cash and cash equivalents are high-credit quality financial instruments, and the amount of credit exposure to any one financial institution or instrument is limited.

#### *Marketable Securities*

The company maintains a portfolio of marketable securities primarily comprised of investment-grade, fixed-income securities. These investments are held by the company's wholly owned insurance captive and are considered available-for-sale as defined in Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities. Accordingly, they have been recorded at fair market value based on quoted market prices, with the resulting net unrealized holding gains or losses reflected net of tax as a component of Accumulated other comprehensive loss in the Consolidated Balance Sheets.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

All marketable security transactions are recognized on the trade date. Realized gains and losses on disposal of available-for-sale investments are included in Interest and other investment income in the Consolidated Statements of Operations. Net investment loss recognized in the Consolidated Statements of Operations for available-for-sale investments totaled \$0.2 million for the year ended May 30, 2009 and investment gain of \$0.7 million, and \$0.8 million for the years ended May 31, 2008, and June 2, 2007, respectively. Included in the net investment loss of \$0.2 million in fiscal 2009 was an impairment charge for certain equity investments of \$0.6 million. This impairment charge also permanently reduced the cost basis in the investment by a corresponding amount.

The following is a summary of the carrying and market values of the company's marketable securities as of the dates indicated.

(In millions)	Cost	May 30, 2009		Market Value
		Unrealized Gain	Unrealized Loss	
U.S. Government & agency debt	\$ 3.6	\$ 0.3	\$	\$ 3.9
Corporate investments	3.9			3.9
Mortgage-backed	3.8		(0.6)	3.2
Other debt	0.5		(0.2)	0.3
Total	\$ 11.8	\$ 0.3	\$ (0.8)	\$ 11.3

(In millions)	Cost	May 31, 2008		Market Value
		Unrealized Gain	Unrealized Loss	
U.S. Government & agency debt	\$ 4.8	\$ 0.2	\$	\$ 5.0
Corporate investments	6.0		(0.2)	5.8
Mortgage-backed	4.2		(0.1)	4.1
Other debt	0.9		(0.1)	0.8
Total	\$ 15.9	\$ 0.2	\$ (0.4)	\$ 15.7

Maturities of marketable securities as of May 30, 2009, are as follows.

(In millions)	Cost	Market Value
Due within one year	\$ 3.6	\$ 3.5
Due after one year through five years	6.0	5.8
Due after five years	2.2	2.0
Total	\$ 11.8	\$ 11.3

### *Accounts Receivable Allowances*

Reserves for uncollectible accounts receivable balances are based on known customer exposures, historical credit experience, and the specific identification of other potential problems, including the economic climate. Balances are written off against the reserve once the company determines the probability of collection to be remote. The company generally does not require collateral or other security on trade accounts receivable.

### *Inventories*

Inventories are valued at the lower of cost or market. The inventories at the majority of the company's manufacturing operations are valued using the last-in, first-out (LIFO) method, whereas inventories of certain other of the company's subsidiaries are valued using the first-in, first-out (FIFO) method. The company establishes reserves for excess and obsolete inventory, based on prevailing circumstances and judgment for consideration of current events, such as economic conditions, that may affect inventory. Further information on the company's recorded inventory balances can be found in Note 4.

### *Property, Equipment, and Depreciation*

Property and equipment are stated at cost. The cost is depreciated over the estimated useful lives of the assets, using the straight-line method. Estimated useful lives range from 3 to 10 years for machinery and equipment and do not exceed 40 years for buildings. Leasehold improvements are depreciated over the lesser of the lease term or the useful life of the asset, not to exceed 10 years. The company capitalizes certain external and internal costs incurred in connection with the development, testing, and installation of software for internal use. Software for internal use is included in property and equipment and is depreciated over an estimated useful life not exceeding 5 years.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

During the fourth quarter of fiscal 2007, the company completed the sale of its Canton, Georgia facility which was exited in fiscal 2004. The company received net cash consideration of \$7.5 million, for assets with a carrying value of \$7.5 million. This resulted in a negligible pre-tax gain.

As of the end of fiscal 2009, outstanding commitments for future capital purchases approximated \$5.8 million.

### *Long-Lived Assets*

The company assesses the recoverability of its long-lived assets in accordance with the provisions of SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. This assessment is performed whenever events or circumstances such as current and projected future operating losses or changes in the business climate indicate that the carrying amount may not be recoverable. Assets are grouped and evaluated at the lowest level for which there are independent and identifiable cash flows. The company considers historical performance and future estimated results in its evaluation of potential impairment and then compares the carrying amount of the asset to the estimated future undiscounted cash flows (without interest charges) expected to result from the use of the asset. If the carrying amount of the asset exceeds the expected future cash flows, the company measures and records an impairment loss for the excess of the carrying value of the asset over its fair value. The estimation of fair value is made by discounting the expected future cash flows at the rate the company uses to evaluate similar potential investments based on the best information available at that time.

### *Goodwill and Other Intangible Assets*

The company's recorded goodwill at May 30, 2009 and May 31, 2008, is associated with the North American Furniture Solutions segment, which is described in further detail in Note 20. The company is required to test the carrying value of goodwill for impairment at the reporting unit level annually or more frequently if a triggering event occurs under the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS 142). As a matter of practice, the company performs the required annual impairment testing of goodwill during the fourth quarter of each fiscal year. The annual testing performed each year indicated the present value of discounted cash flows of the reporting unit exceeded the recorded carrying value of the company's goodwill assets, and accordingly no impairment charge was required for the years ending May 30, 2009, May 31, 2008, and June 2, 2007.

SFAS 142 also requires the company to evaluate its acquired intangible assets to determine whether any have indefinite useful lives. Under this accounting standard, intangible assets with indefinite useful lives, if any, are not subject to amortization. The company has other intangible assets, consisting of certain trademarks and tradenames valued at approximately \$4.3 million, which have indefinite useful lives and are evaluated in a manner consistent with goodwill. The company amortizes its other intangible assets over their remaining useful lives using the straight-line method over periods ranging from 5 to 17 years.

Other intangible assets are comprised of patents, trademarks, and intellectual property rights with a combined gross carrying value and accumulated amortization of \$24.0 million and \$9.5 million, respectively as of May 30, 2009. As of May 31, 2008, these amounts totaled \$25.7 million and \$7.6 million, respectively.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

Estimated amortization expense for existing intangible assets as of May 30, 2009, for each of the succeeding five fiscal years is as follows.

(In millions)

2010	\$1.4
2011	1.4
2012	1.3
2013	0.6
2014	0.5

### *Notes Receivable*

The notes receivable are primarily from certain independent contract office furniture dealers. These notes are the result of dealers in transition either through a change in ownership or general financial difficulty. The notes generally are collateralized by the assets of the dealers and bear interest based on the prevailing prime rate. Recorded reserves are based on historical credit experience, collateralization levels, and the specific identification of other potential collection problems. Interest income relating to these notes was \$0.1 million for the year ended May 30, 2009 and \$0.4 million for the years ended May 31, 2008, and June 2, 2007.

### *Unfunded Checks*

As a result of maintaining a consolidated cash management system, the company utilizes controlled disbursement bank accounts. These accounts are funded as checks are presented for payment, not when checks are issued. Any resulting book overdraft position is included in current liabilities as unfunded checks.

### *Self-Insurance*

The company is partially self-insured for general liability, workers' compensation, and certain employee health and dental benefits under insurance arrangements that provide for third-party coverage of claims exceeding the company's loss retention levels. The company's retention levels designated within significant insurance arrangements as of May 30, 2009, are as follows.

	Retention Level
General liability and auto liability/physical damage	\$1.00 million per occurrence
Workers' compensation and property	\$0.75 million per occurrence
Health benefits	\$0.20 million per employee

The company's policy is to accrue amounts equal to the actuarially-determined liabilities for loss and loss adjustment expenses, which are included in "Other Liabilities" in the Consolidated Balance Sheets. The actuarial valuations are based on historical information along with certain assumptions about future events. Changes in assumptions for such matters as legal actions, medical costs, and changes in actual experience could cause these estimates to change. The general and workers' compensation liabilities are managed through the company's wholly-owned insurance captive.

### *Research, Development, and Other Related Costs*

Research, development, pre-production, and start-up costs are expensed as incurred. Research and development (R&D) costs consist of expenditures incurred during the course of planned search and investigation aimed at discovery of new knowledge useful in developing new products or processes. R&D costs also include the significant enhancement of existing products or production processes and the implementation of such through design, testing of product alternatives, or construction of prototypes. Royalty payments made to designers of the company's products as the products are sold are not included in research and development costs, as they are a variable cost based on product sales. Research and development costs included in "Design and Research" expense in the accompanying Consolidated Statements of Operations of \$36.2 million, \$38.8 million, \$42.1 million, in fiscal 2009, 2008, and 2007, respectively.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### *Advertising Costs*

Advertising costs are expensed as incurred and are included in Selling, general, and administrative expense in the accompanying Consolidated Statements of Operations. Advertising costs were \$2.2 million, \$3.4 million, and \$3.2 million, in fiscal 2009, 2008, and 2007, respectively.

### *Income Taxes*

Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse.

### *Stock-Based Compensation*

The company has several stock-based compensation plans, which are described fully in Note 14. In December 2004, the FASB issued a revision of SFAS No. 123, Share-Based Payment (SFAS 123(R)), which supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. The company adopted the provisions of SFAS 123(R) in the first quarter of fiscal 2007.

### *Earnings per Share*

Basic earnings per share (EPS) excludes the dilutive effect of common shares that could potentially be issued, due to the exercise of stock options or the vesting of restricted shares, and is computed by dividing net earnings by the weighted-average number of common shares outstanding for the period. Diluted EPS for fiscal years 2009, 2008, and 2007, was computed by dividing net earnings by the sum of the weighted-average number of shares outstanding, plus all dilutive shares that could potentially be issued. Refer to Note 13, for further information regarding the computation of EPS.

### *Revenue Recognition*

The company recognizes revenue on sales through its network of independent contract furniture dealers and independent retailers once the related product is shipped and title passes to the dealer. In situations where products are sold through subsidiary dealers or directly to the end customer, revenue is recognized once the related product is shipped to the end customer and installation is substantially complete. Offers such as rebates and discounts are recorded as reductions to net sales. Unearned revenue occurs during the normal course of business due to advance payments from customers for future delivery of products and services.

### *Shipping and Handling Expenses*

The company records shipping and handling related expenses under the caption Cost of Sales in the Consolidated Statements of Operations.

### *Comprehensive Income/(Loss)*

The company's comprehensive income (loss) consists of net earnings, foreign currency translation adjustments, pension and post-retirement liability adjustments, and unrealized holding gains (losses) on available-for-sale investments. The components of Accumulated other comprehensive loss in each of the last three fiscal years are as follows.

# Edgar Filing: MILLER HERMAN INC - Form 10-K

(In millions)	Foreign Currency Translation Adjustments	Pension and Post-Retirement Liability Adjustments (net of tax)	Unrealized Holding Period Gains (Losses) (net of tax)	Total Accumulated Other Comprehensive Income (Loss)
Balance, June 3, 2006	\$ (2.8)	\$ (60.2)	\$ (0.3)	\$ (63.3)
Other comprehensive gain in fiscal 2007	3.3	58.3	0.1	61.7
Adjustments to adopt SFAS No. 158		(50.0)		(50.0)
Balance, June 2, 2007	0.5	(51.9)	(0.2)	(51.6)
Other comprehensive gain/(loss) in fiscal 2008	4.1	(12.6)		(8.5)
Balance May 31, 2008	4.6	(64.5)	(0.2)	(60.1)
Other comprehensive gain/(loss) in fiscal 2009	(14.0)	(59.9)	(0.1)	(74.0)
Balance May 30, 2009	\$ (9.4)	\$ (124.4)	\$ (0.3)	\$ (134.1)

## *Use of Estimates in the Preparation of Financial Statements*

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## *Variable Interest Entities*

The company has provided subordinated debt to and/or guarantees on behalf of certain independent contract furniture dealerships. These relationships may constitute variable interests under the provisions of FASB Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46(R)). On May 30, 2009 and May 31, 2008, the company was not considered the primary beneficiary of any such dealer relationships as defined by FIN 46(R) and therefore, no entities were included as Variable Interest Entities (VIEs) as of these dates. Refer to Note 3 for further discussion regarding VIEs.

## *Fair Value*

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which establishes a comprehensive framework for measuring the fair value of assets and liabilities and expands disclosures about fair value measurements. Specifically, SFAS 157 sets forth a definition of fair value, and establishes a hierarchy prioritizing the use of inputs in valuation techniques. SFAS 157 defines levels within the hierarchy as follows:

- Level 1 quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2 either direct or indirect inputs, other than quoted prices included within Level 1, which are observable for similar assets or liabilities.
- Level 3 - inputs are unobservable.

The company adopted the provisions of SFAS 157 for financial assets and liabilities as of June 1, 2008. There was no impact to the company's consolidated financial statements related to the adoption of SFAS 157. The following table sets forth financial assets and liabilities measured at fair value in the Condensed Consolidated Balance Sheets and the respective pricing levels to which the fair value measurements are classified within the fair value hierarchy as of May 30, 2009.

# Edgar Filing: MILLER HERMAN INC - Form 10-K

(In millions)

## Fair Value Measurements as of May 30, 2009

		Fair Value Measurements as of May 30, 2009		
		Total	Quoted Prices In Active Markets (Level 1)	Quoted Prices With Other Observable Inputs (Level 2)
<u>Financial Assets</u>				
Available-for-sale securities	\$	11.3	\$ 4.3	\$ 7.0
Interest rate swap agreements		2.4		2.4
Deferred compensation plan investments		1.4	1.4	
Foreign currency forward contracts		0.2		0.2
Total	\$	15.3	\$ 5.7	\$ 9.6
<u>Financial Liabilities</u>				
Foreign currency forward contracts	\$	0.1	\$	0.1
Total	\$	0.1	\$	0.1

In February 2007, the FASB issued SFAS No. 159 The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). SFAS 159 expands the use of fair value measurement by permitting entities to choose to measure at fair value, many financial instruments and certain other items that are not currently required to be measured at fair value. The company adopted the provisions of SFAS 159 at the beginning of fiscal 2009 and elected not to expand the use of fair value accounting beyond those assets and liabilities currently required to use this basis of measurement.

### Derivative Instruments and Hedging Activities

On February 28, 2009, the company adopted FASB Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement 133 (SFAS 161). The adoption of SFAS 161 had no financial impact on our consolidated financial statements and only required additional financial statement disclosures. The requirements of SFAS 161 have been applied on a prospective basis. Accordingly, disclosures related to periods prior to the date of adoption have not been presented.

### Interest Rate Swap Agreements

We have used interest rate swaps in order for a portion of interest bearing debt to be variable, which matches interest expense with our business cycle. As of May 30, 2009, the company has one interest rate swap agreement that has the economic effect of modifying the fixed interest obligations associated with a portion of our public debt securities due March 15, 2011 so that the interest payable on the senior notes effectively becomes variable at a rate set to the six-month LIBOR rate plus 2.65 percent. The critical terms of the interest rate swap agreement and a component of the public debt securities match, including the notional amounts, interest rate reset dates, maturity dates and underlying market indices. Accordingly, as of May 30, 2009, a total of \$50.0 million of the company's outstanding debt was effectively converted to a variable-rate basis as a result of the interest rate swap arrangement. This swap is a fair-value hedge and qualifies for hedge-accounting treatment using the short-cut method under the provisions of SFAS 133. Under this accounting treatment, the change in the fair value of the interest rate swap is equal to the change in value of the related hedged debt and, as a result, there is no net effect on earnings. The agreement requires the company to pay floating-rate interest payments in return for receiving fixed-rate interest payments that coincide with the semi-annual payments to the debt holders at the same date. The periodic interest settlements, which occur at the same interval as the public debt securities, are recorded as interest expense.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

### *Foreign Currency Forward Contracts Not Designated as Hedges*

We transact business in various foreign currencies and have established a program that primarily utilizes foreign currency forward contracts to offset the risks associated with the effects of certain foreign currency exposures. Under this program, the company's strategy is to have increases or decreases in our foreign currency exposures offset by gains or losses on the foreign currency forward contracts to mitigate the risks and volatility associated with foreign currency transaction gains or losses. These foreign currency exposures typically arise from net liability or asset exposures in non-local currencies on the balance sheets of our foreign subsidiaries. These foreign currency forward contracts generally settle within 90 days and are not used for trading purposes. These forward contracts are not designated as hedging instruments pursuant to SFAS 133. Accordingly, we record the fair value of these contracts as of the end of the reporting period in the consolidated balance sheet with changes in fair value recorded in our consolidated statement of operations. The balance sheet classification for the fair values of these forward contracts is other current assets for unrealized gains and to other current liabilities for unrealized losses. The statement of operations classification for the fair values of these forward contracts is to other expenses (income), other, net, for both realized and unrealized gains and losses.

As of May 30, 2009, the notional amounts of the forward contracts held to purchase and sell U.S. dollars in exchange for other major international currencies were \$10.4 million and the notional amounts of the foreign currency forward contracts held to sell European euros in exchange for other major international currencies were 4.8 million.

The effects of derivative instruments on the condensed consolidated financial statements were as follows for the year ended May 30, 2009 (amounts presented exclude any income tax effects) are shown below. The effect of derivative instruments on the condensed consolidated statement of operations was \$0.1 million for the period ended May 30, 2009.

### Fair Value of Derivative Instruments in Condensed Consolidated Balance Sheet

(In millions)	May 30, 2009	
	Balance Sheet Location	Fair Value
Interest rate swap agreement - fair market value	Other noncurrent assets	\$ 2.4
Foreign currency forward contracts not designated as hedges	Other current assets	\$ 0.2
Foreign currency forward contracts not designated as hedges	Other current liabilities	\$ 0.1

### Effects of Derivative Instruments of Income

(In millions)	May 30, 2009	
	Recognized Income on Derivative (Gain) Loss Location	Amount
Foreign currency forward contracts	Other Expense (Income), Other, net	\$ (0.1)

### *New Accounting Standards*

In December 2004, the FASB issued a revision of SFAS No. 123, Share-Based Payment (SFAS 123(R)), which supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. This statement focuses primarily on transactions in which an entity obtains employee services in exchange for share-based payments. Under SFAS 123(R), a public entity generally is required to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award, with such cost recognized over the requisite service period. This new accounting treatment is also required for any share-based payments to our Board of Directors. SFAS 123(R) also requires an entity to provide certain disclosures in order to assist in understanding the nature of share-based payment transactions and the effects of those transactions on the financial statements. We adopted the provisions of SFAS 123(R) in the first quarter of fiscal 2007. Further information regarding the adoption of SFAS 123(R) is provided in Note 14.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*—an interpretation of FASB Statement No. 109 (FIN 48), which clarifies the accounting for uncertainty in tax positions. Under FIN 48, the tax effects of a position should be recognized only if it is more-likely-than-not to be sustained based solely on its technical merits as of the reporting date. FIN 48 also requires significant new annual disclosures in the notes to the financial statements. The effect of adjustments at adoption is required to be recorded directly to beginning retaining earnings in the period of adoption and reported as a change in accounting principle. The company adopted the provisions of FIN 48 at the beginning of fiscal 2008. Further information regarding the adoption of FIN 48 is provided in Note 15.

In September 2006, the FASB issued SFAS No. 158 *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* (SFAS 158). SFAS 158 amends SFAS No. 87 *Employers' Accounting for Pensions*, SFAS No. 88 *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106 *Employers' Accounting for Postretirement Benefits Other than Pensions* and SFAS 132 *Employers' Disclosures about Pensions and Other Postretirement Benefits*. The amendments retain most of the existing measurement and disclosure guidance and will not change the amounts recognized in our Consolidated Statements of Operations. SFAS 158 requires companies to recognize a net asset or liability with an offset to equity, by which the defined-benefit postretirement obligation is over-funded or under-funded. SFAS 158 requires prospective application. The company adopted the provisions of SFAS 158 as of June 2, 2007, and the adoption of SFAS 158 did not require a restatement of prior periods.

In December 2007, the FASB issued a revised version of SFAS No. 141, *Business Combinations* (revised 2007) (SFAS 141(R)). The FASB also issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements—An Amendment of ARB No. 51* (SFAS 160) at the same time it issued SFAS 141(R). SFAS 160 requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements, except as required under FIN 46 (required consolidation with respect to Variable Interest Entities).

The company is required to adopt the provisions of both SFAS 141(R) and SFAS 160 simultaneously at the beginning of fiscal 2010. Earlier adoption is prohibited. The company is currently evaluating the provisions of these pronouncements; however, there will be an immediate impact from SFAS 141(R) as it relates to the announced acquisition of Nemschoff Chairs, LLC. Under SFAS 141(R) we expect to expense acquisition related costs as incurred and contingent consideration associated with the transaction will be capitalized at estimated fair value as of the acquisition date.

In June 2008, the FASB issued Staff Position ( FSP ) Emerging Issue Task Force ( EITF ) Issue No. 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* ( FSP EITF 03-6-1 ). FSP EITF 03-6-1 provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008 (fiscal year 2009 for the company). Upon adoption, a company is required to retrospectively adjust its earnings per share data, including any amounts related to interim periods, summaries of earnings, and selected financial data, to conform to the provisions of FSP EITF 03-6-1. The adoption of FSP EITF 03-6-1 during fiscal 2009 had no financial impact on our consolidated financial statements and only required additional financial statement disclosures.

On December 30, 2008, the FASB issued FSP SFAS No. 132(R)-1, *Employer's Disclosures about Postretirement Benefit Plan Assets* ( FSP SFAS No. 132(R)-1 ). This FSP amends FASB Statement No. 132 (Revised 2003), *Employers' Disclosures about Pensions and Other Postretirement Benefits* ( SFAS No. 132(R) ), to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The disclosures about plan assets required by FSP SFAS No. 132(R)-1 shall be provided for fiscal years ending after December 15, 2009 (fiscal 2010 for the company). Upon initial application, the provisions of FSP SFAS No. 132(R)-1 are not required for earlier periods that are presented for comparative purposes. Earlier application of the provisions of FSP SFAS No. 132(R)-1 is permitted. Since FSP SFAS No. 132(R)-1 requires only additional disclosures concerning plan assets, adoption of FSP SFAS No. 132(R)-1 is not expected to affect the company's financial statements.

## Edgar Filing: MILLER HERMAN INC - Form 10-K

In April 2009, the FASB released FASB Staff Position FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2). Under FSP FAS 115-2, impairment for debt securities, in certain circumstances, is separated into the credit loss amount recognized in earnings and the amount related to all other factors (non-credit loss) recognized in other comprehensive income, net of applicable taxes. FSP FAS 115-2 is effective for interim and annual periods ending after June 15, 2009, although early adoption is permitted for companies with periods ending after March 15, 2009. The company chose to adopt FSP FAS 115-2 during the fourth quarter of fiscal 2009, which did not have a material impact on the company's financial statements.

### 2. Acquisitions and Divestitures

During the fourth quarter of fiscal 2007, Convia, a subsidiary of Herman Miller, Inc. acquired a technology company for \$3.5 million in cash. The intellectual property acquired in connection with this transaction is intended to enhance the functionality of Convia's product offering.

On February 1, 2008, the company completed its acquisition of the stock of Brandrud Furniture, Inc. (Brandrud), an Auburn, Washington based manufacturer of healthcare furnishings. With annual net sales of approximately \$20 million at the time of acquisition, Brandrud focuses on seating products for patient rooms, patient treatment areas, and public spaces such as lobbies and waiting areas. The final purchase price related to this transaction included an initial \$12 million cash payment, the assumption of \$2.1 million of debt and a performance-based contingency payment of \$26.6 million cash paid in fiscal 2009 and recognized as goodwill.

Assets acquired and liabilities assumed in the acquisition were recorded on the company's Consolidated Balance Sheets based on their estimated fair values as of the date of the acquisition. The results of operations of Brandrud have been included in the company's Consolidated Statements of Operations since the date of the acquisition. The excess of the purchase price over the estimated fair values of the underlying assets acquired and liabilities assumed was allocated to goodwill. Brandrud is included in the company's North American segment; therefore all of the goodwill recorded in the acquisition has been allocated to that segment.

During the first quarter of fiscal 2009, the company completed the sale of a wholly-owned contract furniture dealership in Texas. The effect of this transaction on the company's consolidated financial statements was not material.

During the second quarter of fiscal 2009, the company completed the purchase of selected elements of Ruskin Industries, a specialized manufacturer of complex wood chair frames and wood frame components, based in Hickory, North Carolina. The purchase consideration for this transaction was approximately \$2.9 million.

Subsequent to May 30, 2009, the company acquired Nemschoff Chairs, LLC (Nemschoff) a Sheboygan, Wisconsin-based manufacturer, with additional manufacturing capabilities in Sioux Center, Iowa. Nemschoff manufactures healthcare furnishings, with an emphasis on seating products for patient rooms, patient treatment areas, and public spaces such as lobbies and waiting areas. Nemschoff also serves the higher education and office markets. Nemschoff, with revenues of greater than \$90 million in its most recently completed fiscal year, was acquired for a combination of \$32.1 million in cash, which was paid with cash-on-hand and the issuance of 2,041,666 shares of the company's common stock. Additionally, there are two forms of contingent consideration; one being in the form of a performance-based payment that is in the range of \$0 and \$25 million and would be earned over the next two years. The other contingent consideration is in the form of a contingent value right (CVR) for each share of common stock issued. In the aggregate, the CVRs will be in the range of \$0 and \$22 million in two years. Each CVR entitles the holder to compensation in the event that the company's share price is below \$24 per share in June, 2011. A floor price of \$13.28 has been established that provides a maximum payout of \$10.72 per share to payable at the time of maturity. Both the performance-based and CVR payments, if any, may be made in either cash or stock at the company's discretion.

**3. Variable Interest Entities**

The company adopted FIN 46(R) at the end of fiscal year 2004. At that time the company qualified as the primary beneficiary in certain dealer relationships which required the company to include the financial statements of the qualifying VIEs in its Consolidated Financial Statements. Since that time, triggering events occurred which caused the company to cease the consolidation of these VIE financial statements. At May 30, 2009 and May 31, 2008, the company was not considered the primary beneficiary in any of its independent dealer financing relationships.

**4. Inventories**

(In millions)	May 30, 2009	May 31, 2008
Finished goods	\$ 20.5	\$ 25.6
Work in process	4.9	13.6
Raw materials	11.9	15.9
Total	\$ 37.3	\$ 55.1

Inventories are valued at the lower of cost or market and include material, labor, and overhead. The inventories of the majority of domestic manufacturing subsidiaries are valued using the last-in, first-out method (LIFO). The inventories of all other subsidiaries are valued using the first-in, first-out method. Inventories valued using LIFO amounted to \$13.0 million and \$17.2 million as of May 30, 2009 and May 31, 2008, respectively. If all inventories had been valued using the first-in first-out method, inventories would have been \$11.5 million and \$12.0 million higher than reported at May 30, 2009 and May 31, 2008, respectively.

**5. Prepaid Expenses and Other**

(In millions)	May 30, 2009	May 31, 2008
Deferred income taxes	\$ 14.8	\$ 17.1
Taxes	16.7	9.7
Other	29.0	31.2
Total	\$ 60.5	\$ 58.0

**6. Other Assets**

(In millions)	May 30, 2009	May 31, 2008
Notes receivable, less allowance of \$0.5 in 2009 and \$3.2 in 2008	\$	\$
Other intangibles, net	14.5	18.1
Deferred income taxes	45.0	11.9
Cash surrender value of life insurance	2.1	20.4
Other	6.1	3.1
Total	\$ 67.7	\$ 53.5

**7. Accrued Liabilities**

(In millions)	May 30, 2009	May 31, 2008
Compensation and employee benefits	\$ 43.9	\$ 92.6
Income taxes	0.6	5.6
Other taxes	11.0	13.4
Unearned revenue	11.2	16.6
Warranty reserves	15.4	14.9
Charitable contributions	0.1	0.5
Pension and post-retirement benefits	1.5	1.6
Restructuring	11.6	0.6
Other	29.9	38.3
Total	\$ 125.2	\$ 184.1

**8. Other Liabilities**

(In millions)	May 30, 2009	May 31, 2008
Pension benefits	\$ 121.2	\$ 22.4
Post-retirement benefits	12.2	11.9
Other	40.3	39.5
Total	\$ 173.7	\$ 73.8

**9. Notes Payable**

In December 2007, the company entered into an unsecured revolving credit facility that provides for \$250 million of borrowings and which expires December 17, 2012. The agreement has an accordion feature enabling the credit facility to be increased by an additional \$100 million, subject to certain conditions. Outstanding borrowings under the agreement bear interest at rates based on the prime, Federal Funds, LIBOR, or negotiated rates as outlined in the agreement. Interest is payable periodically throughout the period a borrowing is outstanding. As of May 30, 2009 the only usage against this facility is related to outstanding standby letters of credit totaling approximately \$13.1 million. Usage against the previous facility at May 31, 2008 related to outstanding standby letters of credit and totaled \$13.1 million.

Subsequent to May 30, 2009, the company announced that the unsecured revolving credit facility had been renegotiated. The terms of the new agreement provided for \$150 million of borrowings, with no accordion feature, and will expire in June 2012.

**10. Long-Term Debt**

(In millions)	May 30, 2009	May 31, 2008
Series A senior notes, 5.94%, due January 3, 2015	\$ 50.0	\$ 50.0
Series B senior notes, 6.42%, due January 3, 2018	150.0	150.0
Debt securities, 7.125%, due March 15, 2011 (1)	175.0	175.0
Fair value of interest rate swap arrangements	2.4	0.5
Subtotal	377.4	375.5
Less: current portion(1)	(75.0)	
Total	\$ 302.4	\$ 375.5

(1) Subsequent to May 30, 2009, the company announced and completed a tender offer to repurchase \$75 million of the outstanding 7.125% debt securities by means of an auction. The repurchase was completed on July 23, 2009

## Edgar Filing: MILLER HERMAN INC - Form 10-K

On January 3, 2008, the company issued \$200 million Series A and Series B senior unsecured notes, each having interest payments that are due semi-annually. The \$200 million of proceeds from the notes were used for an accelerated share repurchase (ASR) of the company's common stock. The ASR was completed in the second quarter of fiscal 2009 with the delivery of 2.1 million shares, which, with the delivery of 5.4 million shares in fiscal 2008, brought the total shares repurchased to 7.5 million.

Provisions of the senior notes and the unsecured senior revolving credit facility restrict, without prior consent, the company's borrowings, capital leases, and the sale of certain assets. In addition, the company has agreed to maintain certain financial performance ratios, which are based on earnings before taxes, interest expense, depreciation and amortization. At May 30, 2009 and May 31, 2008, the company was in compliance with all of these restrictions and performance ratios.

Annual maturities of long-term debt for the five fiscal years subsequent to May 30, 2009, are as follows.

(In millions)	\$ 75.0
2010	\$ 100.0
2011	\$
2012	\$
2013	\$
2014	\$ 200.0
Thereafter	

The above amounts exclude the recorded fair value of the company's interest rate swap arrangements, which had a combined fair value of positive \$2.4 million as of May 30, 2009. Additional information regarding interest rate swaps is provided in Note 17.
