SEMIANNUAL REPORT ON PERFORMANCE AND OUTLOOK

1-31-01

[SCALE LOGO OMITTED]

FROM THE TRUSTEES

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM III]

Dear Shareholder:

Putnam Premier Income Trust's broadly diversified portfolio demonstrated the merits of the fund's strategy in the uncertain global fixed-income markets that prevailed throughout the first half of fiscal 2001. Its diversified strategy across investment-grade, high-yield, and international sectors provided stability as each sector reacted differently to the global environment.

In the following report, David Waldman and the Core Fixed-Income Team discuss the challenging global economic and market environments in which they worked as they pursued the fund's twin objectives of high current income and relative stability of net asset value.

As the team assesses prospects for the fiscal year's second half, it expresses some optimism about prospects for high-yield bonds and will continue to take advantage of opportunities in both international and investment-grade sectors.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill
Chairman of the Trustees
March 21, 2001

George Putnam, III
President of the Funds

REPORT FROM FUND MANAGEMENT

David L. Waldman
and the Core
Fixed-Income Team

During the six months ended January 31, 2001, world markets experienced significant volatility. Many equity markets posted negative results, while most fixed-income markets achieved positive returns as interest rates fell. Foreign currencies were stable to weaker relative to the U.S. dollar. Putnam Premier Income Trust's strategy allowed the fund to weather the volatile market environment through a diversified approach to fixed-income investing.

Total return for 6 months ended 1/31/01

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

NAV	Market price
2.78%	8.99%

Past performance is not indicative of future results. Performance based on market prices for the shares will vary from performance based on the portfolio's net asset value. Performance information for longer periods begins on page 5.

* PERFORMANCE MARKED BY CHANGING MARKET SENTIMENT

During the period, investors experienced a change in market psychology over a relatively short period. At the beginning of the fund's fiscal year, a more stable market environment had returned on the heels of the Federal Reserve Board's decisions to increase interest rates between mid 1999 and early 2000. Investors also were confident that the U.S. economy could achieve a soft landing. However, the stability was short-lived, as market psychology changed in anticipation of a U.S. and global economic slowdown which not only impacted U.S. markets but was felt worldwide.

The fixed-income market enjoyed positive performance during the period, with investment-grade sectors and emerging markets leading the way. In the international sector, local bond returns were positive as rates fell, although the weakening of foreign currencies limited the performance in terms of U.S. dollars. The high-yield markets continued to underperform because of slowing economic growth and equity market volatility.

[GRAPHIC OMITTED: horizontal bar chart SECTOR ALLOCATIONS]

SECTOR ALLOCATIONS*

High yield	48.5%
U.S. investment grade	28.4%
Foreign	23.3%

Footnote reads:

*Based on market value as of 1/31/01. Holdings will vary over time.

During the final month of your fund's semiannual period, many sectors experienced a dramatic turnaround. The Fed's surprise interest-rate cut on January 3, 2001, and its additional cut at the end of the month demonstrated its resolve to avert a hard economic landing. Investors welcomed the reduction in interest rates, and many of the sectors managed to recoup losses experienced through the end of the 2000 calendar year. Speculation that a U.S. economic soft landing could be achieved in 2001 contributed to the renewed popularity of higher-risk investments such as high-yield corporates and emerging markets.

* INVESTMENT-GRADE SECURITIES REMAINED RELIABLE AS HIGH-YIELDS RECOVERED

Within the investment-grade sector, securities posted positive returns during the period. Thanks to a rally in U.S. interest rates, the fund benefited from the strong price appreciation of investment-grade sectors; the yield of a representative U.S. 10-year Treasury bond fell approximately a full percentage point during the period. Both mortgage

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

and corporate sectors slightly outperformed Treasuries and experienced significantly stronger returns in January 2001. Because of the fund's overweighted position in investment-grade securities, we were able to take advantage of this positive performance.

Footnote reads:

These holdings represent 18.4% of the fund's net assets as of 1/31/01. Holdings will vary over time.

High-yield corporates underperformed for most of the fund's fiscal 2000. Several factors, including volatile equity markets, increasing defaults, and slowing economic growth, contributed to a difficult period for high yield securities. Specifically, telecommunications, which tends to be a large sector within the high yield universe, experienced poor performance due to investor uncertainty. Spreads of high-yield securities (the difference between the yields of high-yield corporate securities and Treasury securities of comparable maturity) widened throughout most of the period and then narrowed in January 2001. This allowed the sector to gain back some of its negative performance. Fortunately we kept the fund underweighted in high-yield securities through most of the period, which contributed to performance, but it did not completely escape the negative impact of the telecommunications sector. Towards the end of the period, we increased our high-yield allocation as valuations and fundamentals became favorable.

* DEVELOPED AND EMERGING MARKETS BOLSTERED RETURNS

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Within the international sector, emerging markets generated attractive returns because of attractive valuations and supportive economic and political environments. The fund positions in Mexico and Russia contributed to positive performance. Mexican securities benefited from a growing economy while Russia benefited from firm oil prices. The performance of international developed markets benefited from falling interest rates, but was hurt by currency weakness relative to the U.S. dollar. We were able to take advantage of opportunities in Canada, the United Kingdom, and Greece. Our position in Greece has benefited from further integration with Europe.

* OUTLOOK FOR 2001: KEEPING A CLOSE WATCH

While the market continues its bumpy ride, we continue to monitor the fixed-income universe closely and look for positive fundamentals and attractive valuations. With the Fed taking an aggressive stance with regard to the U.S. economy, resolving to avert a hard landing and engineer a more stable economic environment, we believe that a recession is unlikely in the near future. Within the investment-grade market, we will continue to take advantage of opportunities in the mortgage-backed sector.

A full recovery for high-yield bonds may very well be in the cards for the near future, as their recent positive performance and popularity suggest stronger prospects. However, we will monitor the fund's high-yield weighting closely in the short term, should this turn out not to be the case. Within the international marketplace, we continue to take advantage of opportunities in the developed market universe and remain neutral with regard to emerging markets. Although more volatility and uncertainty may be in store, we believe the fund is well positioned to meet the challenges of fiscal 2001.

The views expressed here are exclusively those of Putnam Management. They are not meant as investment advice. Although the described holdings were viewed favorably as of 1/31/01, there is no guarantee the fund will continue to hold these securities in the future. International investments are subject to certain risks, such as currency fluctuations, economic instability, and political developments. While the U.S. government backing of individual securities does not insure your principal, which will fluctuate, it does guarantee that the fund's government-backed holdings will make timely payments of interest and principal. Mortgage-backed securities in the portfolio may be subject to prepayment risk. The lower credit ratings of high-yield bonds reflect a greater possibility that adverse changes in the economy or poor performance by the issuers of these bonds will affect the issuer's ability to pay principal and interest.

A NOTE ABOUT DUPLICATE MAILINGS

In response to investors' requests, the SEC has modified mailing regulations for semiannual and annual reports and prospectuses. Putnam is now able to send a single copy of these materials to customers who share the same address. This change will automatically apply to all shareholders except those who notify us. If you prefer to receive your own copy, please call Putnam at 1-800-225-1581.

PERFORMANCE SUMMARY

This section provides information about your fund's performance, which

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

should always be considered in light of its investment strategy. Putnam Premier Income Trust is designed for investors seeking a high level of current income consistent with preservation of capital.

TERMS AND DEFINITIONS

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

COMPARATIVE BENCHMARKS

First Boston High Yield Index* is an unmanaged list of lower-rated higher-yield U.S. corporate bonds.

Lehman Brothers Government Bond Index* is an unmanaged list of U.S. government and mortgage-backed securities.

Salomon Brothers Non-U.S. World Government Bond Index* is an unmanaged list of bonds issued by 10 countries.

Consumer price index (CPI) is a commonly used measure of inflation; it does not represent an investment return.

Footnote reads:

*Securities indexes assume reinvestment of all distributions and interest payments and do not take into account brokerage fees or taxes. Securities in the fund do not match those in the indexes and performance of the fund will differ. It is not possible to invest directly in an index.

A GUIDE TO THE FINANCIAL STATEMENTS

These sections of the report constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares, the amount subtracted from total assets includes the net assets allocated to remarketed preferred shares.)

Statement of operations shows the fund's net investment gain or loss for the reporting period. This is determined by adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses. This statement also lists any net gain or loss the fund realized on the sales of its holdings and -- for holdings that remain in the portfolio -- any change in unrealized gains or losses over the period.

Statement of changes in net assets shows how the fund's net assets were affected by distributions to shareholders and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

February 1, 2001 with respect to various U.S. Government obligations -- maturity value of \$21,490,432 for an effective yield of 5.75%

Total Investments (cost \$1,060,289,636) (b)

- (a) Percentages indicated are based on net assets of \$990,784,433.
- (b) The aggregate identified cost on a tax basis is \$1,064,557,686 resulting in gross unrealized appreciation and depreciation of \$34,227,374 and \$122,114,394, respectively, or net unrealized depreciation of \$87,887,020.
- (NON) Non-income-producing security.
- (STP) The interest or dividend rate and date shown parenthetically represent the new interest or dividend rate to be paid and the date the fund will begin receiving interest or dividend income at this rate.
- (PIK) Income may be received in cash or additional securities at the discretion of the issuer.
- (SEG) A portion of this security was pledged and segregated with the custodian to cover margin requirements for futures contracts at January 31, 2001.
- (FWC/WIS) When-issued securities (Note 1).

144A after the name of a security represents those exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

FLIRB represents Front Loaded Interest Reduction Bond.

The rates shown on Floating Rate Bonds (FRB) and Floating Rate Notes (FRN) are the current interest rates shown at January 31, 2001, which are subject to change based on the terms of the security.

NOTES TO FINANCIAL STATEMENTS
January 31, 2001 (Unaudited)

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Note 1

Significant accounting policies

Putnam Premier Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The fund's investment objective is to seek high current income consistent with the preservation of capital by allocating its investments among the U.S. government sector, high yield sector and international sector of the fixed income securities market.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with generally accepted accounting principles and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are stated at market value, which is determined using the last reported sales price on its principal exchange, or if no sales are reported -- as in the case of some securities traded over-the-counter -- the last reported bid price. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are stated at amortized cost, which approximates market value. Other investments, including restricted securities, are stated at fair value following procedures approved by the Trustees. Market quotations are not considered to be readily available for certain debt obligations; such investments are stated at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees, which determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and variable relationships between securities that are generally recognized by institutional traders.

B) Joint trading account Pursuant to an exemptive order issued by the Securities and Exchange Commission, the fund may transfer uninvested cash balances into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC. ("Putnam Management"), the fund's manager, a wholly-owned subsidiary of Putnam Investments, LLC. These balances may be invested in one or more repurchase agreements and/or short-term money market instruments.

C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.

D) Security transactions and related investment income Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Any premium resulting from the purchase of corporate bonds is amortized on a yield-to-maturity basis. Discounts on zero coupon bonds, original issue discount bonds, stepped-coupon bonds and payment in kind bonds are accreted according to the yield-to-maturity basis.

Securities purchased or sold on a forward commitment basis may be settled a month or more after the trade date; interest income is accrued based on the terms of the security. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when accrued or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

F) Forward currency contracts The fund may engage in forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short-term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is "marked to market" daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers.

H) TBA purchase commitments The fund may enter into "TBA" (to be announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not fluctuate more than .01% from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for their portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

I) Interest rate swap contracts The fund may engage in interest rate swap agreements, which are arrangements between two parties to exchange cash flows based on a notional principal amount. The fund may enter into interest rate swap agreements, to manage the funds exposure to interest rates. Interest rate swaps are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are included as part of interest income. Payments received or made upon early termination are recorded as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or that the counterparty may default on its obligation to perform.

J) Federal taxes It is the policy of the fund to distribute all of its

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At July 31, 2000, the fund had a capital loss carryover of approximately \$84,751,000 available to offset future capital gains, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
-----	-----
\$39,893,000	July 31, 2007
44,858,000	July 31, 2008

K) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Capital gain distributions, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2

Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets of the fund, 0.65% of the next \$500 million, 0.60% of the next \$500 million and 0.55% thereafter.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a subsidiary of Putnam Investments, LLC. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. The fund also reduced expenses through brokerage service arrangements. For the six months ended January 31, 2001 the fund's expenses were reduced by \$28,372 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$1,035 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees Fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Compensation of Trustees in the Statement of operations. Accrued pension liability is included in Payable for compensation of Trustees in the Statement of assets and liabilities.

Note 3

Purchases and sales of securities

During the six months ended January 31, 2001, cost of purchases and proceeds from sales of investment securities other than U.S. government obligations and short-term investments aggregated \$1,020,542,897 and \$715,040,607, respectively. Purchases and sales of U.S. government obligations aggregated \$439,784,125 and \$721,321,825, respectively.

Note 4

Share repurchase program

The Trustees authorized the fund to repurchase up to 7,000,000 of its shares in the open market. Repurchases will only be made when the fund's shares are trading at less than net asset value and at such times and amounts as is believed to be in the best interest of the fund's shareholders. Any repurchases of shares will have the effect of increasing the net asset value per share of remaining shares outstanding. For the six months ended January 31, 2001, the fund did not repurchase any shares. As of January 31, 2001, 511,000 shares have been repurchased since the inception of the program.

Note 5

New accounting pronouncement

In November 2000, the AICPA issued a revised Audit and Accounting Guide, Audits of Investment Companies, which is effective for fiscal years beginning after December 15, 2000. The revised Guide will require the fund to amortize premium and accrete discount on all fixed-income securities, and classify as interest income gains and losses realized on paydowns on mortgage-backed securities which are presently included in realized gain/loss. Adopting these accounting principles will not affect the fund's net asset value, but will change the classification of certain amounts between interest income and realized and unrealized gain/loss in the Statement of operations. The fund has not yet quantified the impact, if any, resulting from the adoption of this principle on the financial statements.

WELCOME TO WWW.PUTNAMINVESTMENTS.COM

Now you can use your PC to get up-to-date information about your funds, learn more about investing and retirement planning, and access market news and economic outlooks from Putnam.

VISIT PUTNAM'S SITE ON THE WORLD WIDE WEB FOR:
