FROM THE TRUSTEES

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM III]

Dear Fellow Shareholder:

Over the six months ended January 31, 2003, changing market conditions and shifts in investor sentiment demonstrated the value of Putnam Premier Income Trust's diversified approach to fixed-income investing. The fund's solid returns for the period reflect its ability to benefit from strengths in different sectors of the bond market, as well as the success of the strategic positioning devised by the management team.

For example, during the period, underperformance in the high-yield corporate bond sector initially dampened performance, but was offset by the strength of the fund's U.S. government securities holdings. Later in the period, the high-yield sector recovered and made a valuable contribution to the fund's returns.

Timely moves such as these enabled your fund to outperform its primary benchmark index at net asset value. Details can be found on page 7. In the following report, your fund's management team provides additional details about their strategy, as well as their outlook for the remainder of the fiscal year.

Meanwhile, we would like you to know how much we appreciate your continued confidence in Putnam, especially as we continue to work our way through one of the most challenging periods in recent investment history. We believe those who maintain a long-term focus and a diversified approach to investing should eventually be rewarded for their patience.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill
Chairman of the Trustees
March 19, 2003

George Putnam, III
President of the Funds

REPORT FROM FUND MANAGEMENT

FUND HIGHLIGHTS

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

- * For the first six months of its 2003 fiscal year, Putnam Premier Income Trust had a total return at net asset value (NAV) of 8.24%. The fund's return at market price was 13.20%.
- * With greater demand in the marketplace for higher-yielding investments, the fund's market price return exceeded its return at NAV.
- * At NAV, the fund outperformed its primary benchmark, the Lehman Government Bond Index, which returned 4.87% during the six-month period.
- * The fund slightly underperformed at NAV the average return for the Lipper Flexible Income Funds (closed-end) category, which was 8.78%.
- * See the Performance Summary on page 7 for complete fund performance, comparative index performance, and Lipper data.

* PERFORMANCE COMMENTARY

The fund's solid returns were due to strategic underweighting of U.S. investment-grade bonds, which underperformed during the period, and the fund's overweighting of higher-yielding, lower-rated bonds, such as U.S. high-yield corporate bonds. These securities performed strongly from October through January.

Fund Profile

Putnam Premier Income Trust is designed for investors seeking a high level of current income. The fund maintains flexibility across three sectors -- U.S. government and agencies, high-yield corporate, and international -- to seek maximum current income without undue risk to capital. The fund may be appropriate for investors seeking a higher level of income who can accept a moderately higher level of risk.

The fund's results should be considered in the context of a generally favorable period for the bond market, especially for those sectors with greater credit risk, which performed well during the final three and a half months of the period. The fund was well served by its sector diversification. The fund's U.S. investment-grade bonds performed well at the outset, benefiting from a weak stock market and a significant flight to quality. Beginning in mid October, however, lower-rated high-yield corporate bonds outperformed, and the fund's holdings of these securities benefited from this trend.

* MARKET OVERVIEW

The bond market experienced a turning point in mid October 2002, which occurred approximately at the midpoint of the fund's semi annual period. In the summer and early fall of 2002, a number of factors contributed to a highly risk-averse psychology in the market: media reports of corporate malfeasance, the prospect of war in Iraq, poor earnings, high default rates, and a significant weakening in the economy. These factors caused investors to flock to high-quality bonds, such as U.S. Treasuries, and to shun equities, U.S. corporate investment-grade bonds, and U.S. corporate high-yield bonds.

As the fourth quarter of calendar 2002 approached, investor sentiment changed. In the fourth quarter, a brighter outlook for profits and the economy also helped boost corporate investment-grade and high-yield bonds -- as well as equities -- contributing to strong returns for these fixed-income sectors from mid October through the end of January 2003. U.S. Treasuries, by comparison, did not fare as well during this period.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Overseas, the European bond markets were generally strong throughout the period, as anemic growth (especially in France and Germany) and low inflation boosted bond returns. In addition, a significant increase in the value of the euro versus the dollar over the past 18 months has helped boost European bond returns for U.S. investors. Some emerging markets performed well, such as Russia, Mexico, and Bulgaria, while others experienced sharp declines due to economic and political woes, including Argentina, Venezuela, and Brazil.

* STRATEGY OVERVIEW

As a multi-sector fixed-income fund, Putnam Premier Income Trust's strategy worked well during the fund's semiannual period because conditions in the bond market changed drastically. As a result, the different sectors within the fund benefited at different times as market conditions varied.

During the first 10 weeks of the period, the fund's high-quality holdings performed well, offsetting the underperformance of the corporate high-yield holdings. During the latter 14 weeks of the period, when the Treasury market saw an enormous rise in yields in October and experienced a great deal of volatility thereafter, the fund's corporate high-yield holdings bolstered returns. Finally, throughout the period, the fund's foreign bonds -- in both the emerging-markets and investment-grade sectors -- performed well, exemplifying the value of geographic diversification.

A notable sector change during the period was a reduction in the fund's mortgage-backed securities (MBS) holdings and a corresponding increase in the fund's corporate investment-grade bonds.

While we believe the fund's strategy worked well during the period, it may have caused the fund to underperform other similar funds within its Lipper peer group category. For example, if the fund's emerging-markets sector weighting had been larger, the fund would have benefited more fully from the strength of these markets in the fourth calendar quarter of 2002. Similarly, within emerging markets, the fund missed the strong returns in Brazil that occurred after that country's elections in October.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

[GRAPHIC OMITTED: horizontal bar chart FUND SECTOR WEIGHTINGS]

FUND SECTOR WEIGHTINGS*

	as of 7/31/02	as of 1/31/03
U.S. investment grade	32.02%	34.49%
Corporate high yield	45.39%	44.15%
Foreign investment grade	14.13%	13.91%
Emerging markets	8.46%	7.45%

Footnote reads:

*This chart shows how the fund's sector weighings have changed over the past six months. Weighings are shown a a percentage of net assets. Holdings will vary over time.

* PERFORMANCE OVERVIEW BY SECTOR

Prior to mid October, the fund's performance was hurt by the fund's large weighting (nearly 50%) in high-yield corporate bonds. Since it is a multi-sector fund, however, the underperformance of this sector was offset by strong performance among the fund's U.S. Treasury and mortgage-backed securities (MBS) holdings. (The fund's MBS holdings consist primarily of "structured" products, including government agency bonds, asset-backed securities, commercial MBSs, and collateralized mortgage obligations.) In addition, the fund's foreign investment-grade bonds in Germany and France performed well because of weakness in those economies and the strength of the euro. In addition, the fund's holdings in Sweden, Canada, and New Zealand had solid performance during the period.

In emerging markets, the fund's performance benefited from being invested in countries that performed well, such as Russia, Mexico, and Bulgaria, and from reduced weightings in countries like Argentina, Venezuela, and Brazil, which experienced difficulties. Brazilian bonds performed well after that country's elections, and we did not capture those gains, but in general we were pleased with our security selection within the emerging-markets sector.

Footnote reads:

*These holdings represented 13.3% of the fund's net assets as of 1/31/03.
Portfolio holdings will vary over time.

During the first 10 weeks of the period, the fund's weighting in U.S. corporate investment-grade bonds was near zero. However, after the Treasury yield spike in mid October, and the more hopeful outlook for this beleaguered sector, we began adding high-grade corporate bonds to the portfolio. The increase in this weighting benefited performance, as the sector performed very well during the final 14 weeks of the period.

The increase in corporate investment-grade bonds corresponded with a decrease in the fund's holdings of structured fixed-income investments, including commercial MBSs, collateralized mortgage obligations, government agency bonds, and asset-backed securities. We felt that the strong performance of these securities for much of the year had run its course, and we invested the proceeds from these sales in corporate investment-grade bonds.

The fund held a large weighting in corporate high-yield securities throughout the period, as we believed that this sector was due for recovery and should outperform over the next several years. While risks remain significant for this sector, with an uncertain economic recovery, weak corporate spending, high default rates, and slow profit growth, we are managing these risks by maintaining a high level of diversity and not investing too much in any one holding. The fund's large high-yield weighting was a major factor in its strong performance during the period because high-yield bonds outperformed most other fixed-income sectors from mid October through the end of January. Please note that all sector weightings discussed in this report are subject to review in accordance with the fund's investment strategy and may vary in the future.

* THE FUND'S MANAGEMENT TEAM

The fund is managed by the Putnam Core Fixed-Income Team. The members of this team are D. William Kohli (Portfolio Leader), David Waldman (Portfolio Member), Carl Bell, Rob Bloenker, Andrea Burke, Kevin Cronin, Steve Horner, James Prusko, Michael Salm, and John Van Tassel.

THE OUTLOOK FOR YOUR FUND

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

The following commentary reflects anticipated developments that could affect your fund over the next six months, as well as your management team's plans for responding to them.

Looking toward the remainder of 2003, we believe that European government and government agency bonds will continue to outperform U.S. Treasuries, and that the euro will continue rising versus the dollar. As a result, we anticipate maintaining an overweighted position in Europe and de-emphasizing U.S. Treasuries. We also anticipate that we will keep the fund's high-yield exposure at current levels because of our positive views on this sector. Several factors support this view: Default rates are beginning to decrease, companies are retiring debt, and investors are seeking securities with greater yield potential.

We are reducing the fund's corporate investment-grade weighting, as we believe that there are too many uncertainties surrounding the U.S. economy and among individual bonds in this sector. Finally, we have shortened the fund's duration as a precautionary measure against a rise in interest rates this year. (Duration is a measure of interest-rate sensitivity; the shorter a fund's duration, the less sensitive it will be to changes in interest rates.) We anticipate that the other sector weightings will remain the same, but, as always, will make adjustments as conditions warrant.

The views expressed in this report are exclusively those of Putnam Management as of 1/31/03. They are not meant as investment advice. Although the described holdings were viewed favorably as of 1/31/03, there is no guarantee the fund will continue to hold these securities in the future. International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk.

A NOTE ABOUT DUPLICATE MAILINGS

In response to investors' requests, the SEC has modified mailing regulations for proxy statements, semiannual and annual reports, and prospectuses. Putnam is now able to send a single copy of these materials to customers who share the same address. This change will automatically apply to all shareholders except those who notify us. If you would prefer to receive your own copy, please call Putnam at 1-800-225-1581.

PERFORMANCE SUMMARY

This section provides information about your fund's performance during the semiannual period, which ended January 31, 2003. In accordance with NASD requirements, we also include performance for the most current calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. A profile of your fund's strategy appears on the first page of the Report from Fund Management. Terms used in this section are defined on page 8.

TERMS AND DEFINITIONS

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding common shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

COMPARATIVE BENCHMARKS

Lehman Government Bond Index is an unmanaged index of U.S. Treasury and

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

agency securities.

NASDAQ Composite Index is an unmanaged index that tracks broad market performance of those securities sold on the NASDAQ exchange. Since this index includes many companies in the technology sector, where market trends change quickly, this index can be volatile.

Credit Suisse First Boston (CSFB) High Yield Index is an unmanaged index of high-yield debt securities.

JP Morgan Global High Yield Index is an unmanaged index that is designed to mirror the investable universe of the U.S. dollar-denominated global high-yield corporate debt market, including domestic and international issues.

Russell 2000 Index is an unmanaged index of common stocks that generally measure performance of small to midsize companies within the Russell 3000 Index.

Salomon Smith Barney (SSB) Non-U.S. World Government Bond Index is an unmanaged index of government bonds issued by 10 countries.

Standard & Poor's 500 Index is an unmanaged index of common stock performance.

Lipper Inc. is a third-party industry ranking entity that ranks funds (without sales charges) with similar current investment styles or objectives as determined by Lipper.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

A GUIDE TO THE FINANCIAL STATEMENTS

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares, the amount subtracted from total assets includes the net assets allocated to remarketed preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings -- as well as any unrealized gains or losses over the period -- is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

affected by distributions to shareholders and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

NOTES TO FINANCIAL STATEMENTS January 31, 2003 (Unaudited)

Note 1

Significant accounting policies

Putnam Premier Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The fund's investment objective is to seek high current income by allocating its investments among the U.S. government sector, high yield sector and international sector of the fixed-income securities market.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are valued at market value, which is determined using the last reported sales price on its principal exchange, or if no sales are reported -- as in the case of some securities traded over-the-counter -- the last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are valued at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees, which determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and variable relationships, generally recognized by institutional traders, between securities. For foreign investments, if trading or events occurring in other markets after the close of the principal exchange in which the securities are traded are expected to materially affect the value of the investments, then those investments are valued, taking into consideration these events, at their fair value following procedures approved by the Trustees. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Other investments, including restricted securities, are valued at fair value following procedures approved by the Trustees.

B) Joint trading account The fund may transfer uninvested cash balances, including cash collateral received under security lending arrangements,

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an indirect wholly-owned subsidiary of Putnam, LLC. These balances may be invested in issuers of high-grade short-term investments having maturities of up to 397 days for collateral received under security lending arrangements and up to 90 days for other cash investments.

C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.

D) Security transactions and related investment income Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recorded as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received.

All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when accrued or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

F) Forward currency contracts The fund may engage in forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

intends to buy are denominated, when a fund holds cash reserves and short-term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is "marked to market" daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Forward currency contracts outstanding at period end are listed after The fund's portfolio.

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Future and written option contracts outstanding at period end are listed after The fund's portfolio.

H) Total return swap contracts The fund may engage in total return swap agreements, which are arrangements to exchange a market linked return for an interest payment, both based on a notional principal amount. To the extent that the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the fund will receive a payment from or make a payment to the counterparty, respectively. Total return swap agreements are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made at the end of the measurement period are recorded as realized gains or losses. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or in the price of the underlying security or index, the possibility that there is no liquid market for these agreements or that the counterparty may default on its obligation to perform. Total return swap contracts outstanding at period end are listed after The fund's portfolio.

I) Interest rate swap contracts The fund may engage in interest rate swap agreements, which are arrangements between two parties to exchange

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

cash flows based on a notional principal amount, to manage the funds exposure to interest rates. Interest rate swaps are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are included as part of interest income. A portion of the payments received or made upon early termination are recorded as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. Interest rate swap contracts outstanding at period end are listed after The fund's portfolio.

J) Credit default contracts The fund may engage in credit default contracts where one party, the protection buyer, makes an upfront payment to a counter party, the protection seller, in exchange for the right to receive a contingent payment as a result of a credit event related to a specified security or index. The upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. The credit default contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made as a result of a credit event or termination of the contract are recorded, net of a proportional amount of the upfront payment, as realized gains or losses. In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index, the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased comparable publicly traded securities or that the counter party may default on its obligation to perform. Credit default contracts outstanding at period end are listed after The fund's portfolio.

K) TBA purchase commitments The fund may enter into "TBA" (to be announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

L) TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover"

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

for the transaction.

Unsettled TBA sale commitments are valued at the current market value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is "marked-to-market" daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end are listed after The fund's portfolio.

M) Security lending The fund may lend securities, through its agent Citibank N.A., to qualified borrowers in order to earn additional income. The loans are collateralized by cash and/or securities in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the fund on the next business day. The risk of borrower default will be borne by Citibank N.A. The fund will bear the risk of loss with respect to the investment of the cash collateral. Income from securities lending is included in investment income on the Statement of operations. At January 31, 2003, the value of securities loaned amounted to \$59,890. The fund received cash collateral of \$61,585, which is pooled with collateral of other Putnam funds into 23 issuers of high-grade short-term investments.

N) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At July 31, 2002, the fund had a capital loss carryover of approximately \$154,608,000 available to the extent allowed by tax law to offset future capital gains, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
-----	-----
\$39,893,000	July 31, 2007
44,858,000	July 31, 2008
24,930,000	July 31, 2009
44,927,000	July 31, 2010

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending July 31, 2003 approximately \$46,453,000 of losses recognized during the period November 1, 2001 to July 31, 2002.

The aggregate identified cost on a tax basis is \$1,004,635,632, resulting in gross unrealized appreciation and depreciation of \$46,184,634 and \$106,701,855, respectively, or net unrealized depreciation of \$60,517,221.

O) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2

Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million and 0.55% of any amount over \$1.5 billion.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a wholly-owned subsidiary of Putnam, LLC. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the six months ended January 31, 2003, the fund's expenses were reduced by \$32,031 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$1,208 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan"), which allows the Trustees to defer the receipt of all or a portion of Trustees Fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Compensation of Trustees in the Statement of operations. Accrued pension liability is included in Payable for compensation of Trustees in the Statement of assets and liabilities.

Note 3

Purchases and sales of securities

During the six months ended January 31, 2003, cost of purchases and proceeds from sales of investment securities other than U.S. government obligations and short-term investments aggregated \$404,263,861 and

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-30D

\$557,493,521, respectively. Purchases and sales of U.S. government obligations aggregated \$581,580,417 and \$604,648,777, respectively.

FUND INFORMATION

ABOUT PUTNAM INVESTMENTS

One of the largest mutual fund families in the United States, Putnam Investments has a heritage of investment leadership dating back to Judge Samuel Putnam, whose Prudent Man Rule has defined fiduciary tradition and practice since 1830. Founded over 65 years ago, Putnam Investments was built around the concept that a balance between risk and reward is the hallmark of a well-rounded financial program. We presently manage over 100 mutual funds in growth, value, blend, fixed income, and international.
