From the Trustees

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM, III]

John A. Hill and George Putnam, III

Dear Fellow Shareholder:

As we consider how the financial markets may perform in 2004, we think it is important to take note of the increasingly positive trends that have become apparent in the U.S. economy and financial markets. The stimulus provided by fiscal and monetary policies has drawn the economy out of the slump of early 2003 and rising profits prompted a broad rally for stocks. In the bond market, a favorable trend of declining interest rates over the past six months has given way to the possibility of Federal Reserve tightening some time this year. We see indications that these trends will take shape in the remainder of the year and know that Putnam management teams will seek to position the funds to benefit from them.

Putnam Premier Income Trust's strong six-month performance reflects favorable economic and market conditions for the global fixed-income markets that helped bring interest rates down over the course of the period. Despite surging stock market returns in both the United States and Europe, the period was also a positive one for bonds, as low inflation and improved economic conditions helped bolster prices — especially for bonds with lower credit quality. In the following pages, your fund's management team discusses fund performance, market trends, investment strategies, and sector performance that contributed to returns. The management team also discusses its expectations for the months ahead.

We deeply appreciate your continued confidence in Putnam and we are committed to helping you pursue your long-term investment goals. We firmly believe that your patience will be rewarded.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill Chairman of the Trustees George Putnam, III President of the Funds

March 17, 2004

Report from Fund Management

### Fund highlights

- \* During the semiannual period ended January 31, 2004, Putnam Premier Income Trust had a total return at net asset value (NAV) of 10.89%. The fund's return at market price was 10.25%.
- \* Due to its emphasis on high-yield bonds and investments in emerging-market securities, as well as a beneficial currency strategy, the fund significantly outperformed the 3.88% return of its primary benchmark, the Lehman Government Bond Index.
- \* Also as a result of its investments in high-yield bonds, and, to a lesser extent, emerging-market securities, the fund slightly outperformed (at NAV) the 10.80% average return of funds in the Lipper Flexible Income Funds (Closed-End) category.
- \* The fund's return at market price was consistent, although slightly lower, than its return at NAV, reflecting investors' positive perceptions of the fund's investment strategy and the global bond markets generally.
- \* See the Performance Summary beginning on page 7 for complete fund performance, comparative performance, and Lipper data.

## Performance commentary

During the first half of its fiscal year, Putnam Premier Income Trust benefited from an unusually positive confluence of factors that drove solid returns in the global bond markets and strong returns in the equity markets. The U.S. economy steamed forward, with robust growth of 8.2% in the third 2003 calendar quarter, and solid, albeit somewhat slower, growth in the fourth calendar quarter. However, with high productivity, an accommodative Federal Reserve Board monetary policy, and no apparent threat of inflation in either the United States or Europe, bond yields — fluctuating within a broad range — generally declined over the six-month period. This helped bolster returns (since bond prices move in the opposite direction of yields). In this environment, bonds with lower credit quality generally outperformed higher-quality bonds. As a result, your fund slightly outperformed its benchmark index and Lipper category average, primarily due to its focus on high-yield bonds and, to a lesser extent, emerging-market bonds.

### FUND PROFILE

Putnam Premier Income Trust is designed for investors seeking a high level of current income. The fund maintains flexibility across three sectors -- U.S. government and agencies, high-yield corporate, and international -- to seek maximum current income without undue risk to capital. The fund may be appropriate for investors seeking a higher level of income who can accept a moderately higher level of risk.

Market overview

Overall, global bond markets performed well for the six-month period, despite a dramatic upturn in interest rates during June and July 2003. This rise in yields was caused by a change in perceptions about the state of the U.S. economic recovery and the level of risk investors were willing to accept. As investors grew more optimistic about the economy, they became more comfortable with higher levels of risk and therefore less enamored with high-quality bonds such as U.S. Treasuries.

From August 2003 through January 2004, the global bond markets continued to be volatile, with yields rising and falling within a fairly broad range with each bit of news that either challenged or supported the notion of a sustained economic recovery. However, low inflation and an accommodative Fed monetary policy helped bond yields in the United States to trend generally downward. In Europe, low inflation reduced the likelihood of a rate increase by the European Central Bank, and European government agency bonds turned in a solid performance. In emerging markets, the strengthening global economy helped boost commodities exports, helping performance in both the stock and bond markets of these countries. The U.S. dollar continued to weaken, as the country's trade deficit ballooned, causing concerns about the ability of foreign investors to continue supporting the trade gap (foreign direct investment in the United States essentially finances the trade deficit).

U.S. high-yield corporate bonds remained strong, continuing this sector's most impressive year of returns since the early 1990s. Default rates continued to decline, and credit quality improved as companies retired or refinanced debt. Responding to the strong performance, investor demand for high-yield bonds was heavy, and there was ample new issuance.

MARKET SECTOR PERFORMANCE 6 MONTHS ENDED 1/31/04 \_\_\_\_\_\_ \_\_\_\_\_\_ Lehman Government Bond Index (U.S. Treasury and agency securities) 3.88% Citigroup Non-U.S. World Government Bond Index (international government bonds) JP Morgan Chase Global High Yield Index (global high-yield corporate bonds) 11.92% \_\_\_\_\_\_ JP Morgan Chase (EMBI) Global Diversified (global emerging-market securities) \_\_\_\_\_\_ Equities S&P 500 Index (broad stock market) \_\_\_\_\_\_ MSCI EAFE Index (international stocks) Russell 2000 Index (stocks of small and midsize companies) \_\_\_\_\_\_ These indexes provide an overview of performance in different market sectors for the six months ended 1/31/04.

Strategy overview

One of our main strategies during the past six months was to emphasize investments in four dollar-bloc countries (countries whose currencies are tied to the U.S. dollar) -- Canada, the United Kingdom, Australia, and New Zealand. As the global economy began to show signs of growth during the summer of 2003 and these four economies began to strengthen, the central banks of these countries either hinted at raising interest rates or, in the case of Canada and the United Kingdom, actually raised them (twice in Canada and once in the U.K.). We felt the concerns about rapid growth were overblown, and increased the fund's weightings in government agency bonds in all four countries. Over the course of the semiannual period, interest rates in these countries either leveled off or declined, providing a boost to the performance of the fund's holdings. In New Zealand, there has been talk of a rate cut, and Canada's central bank cut interest rates three times in a row. Although the U.K. raised rates early in the period, the yield curve appears to have factored in many more rate hikes than we think are likely. Toward the end of the period, we reduced the weightings in Canada, Australia, and New Zealand after the fund's holdings from these countries had shown strong performance.

We continued to overweight U.S. high-yield corporate bonds during the period, which made a positive contribution to the fund's returns. This sector remains the fund's largest single weighting, and high-yield bonds performed well due to the strong economy, improving credit quality, declining default rates, and a favorable supply/demand environment. Within the U.S. investment-grade sector, we maintained the fund's weighting in mortgage-backed securities, which had solid, albeit unspectacular performance, after being hurt by heavy home mortgage refinancing activity during the spring and summer of 2003.

[GRAPHIC OMITTED: horizontal bar chart SECTOR WEIGHTINGS COMPARED]

### SECTOR WEIGHTINGS COMPARED

	as	of 7/31/03	as	of 1/31/04
High yield		50.1%		47.3%
U.S. investment grade		27.1%		33.2%
International*		22.8%		19.5%

### Footnote reads:

This chart shows how the fund's sector weightings have changed over the last six months. Weightings are shown as a percentage of market value. Holdings will vary over time.

How fund holdings affected performance

The primary trend characterizing the past six months was that securities — of all types, both debt and equity — with greater credit risk significantly outperformed those with higher quality and lower risk, reflecting a new attitude among investors that had not been seen for most of the three and a half years preceding this semiannual period. In the bond markets, securities with lower credit quality outperformed Treasuries in each of the six months from August 2003 through January

<sup>\*</sup> Includes emerging markets.

2004. As a result, the fund's holdings of U.S. high-yield corporate bonds, its largest weighting, made a significant contribution to performance. Within this sector, we sought, on a selective basis, opportunities in lower-quality bonds that offered both higher yields and the potential for an improvement in credit quality. Our primary rationale was that, in an environment of economic recovery and declining corporate default rates, we believed these securities offered the greatest total return potential within the high-yield universe. As the economy and stock market improved during the period, many high-yield bonds -- especially those with lower ratings and higher yields -- had impressive price gains in addition to their attractive yields. To take advantage of this trend, we generally underweighted BB-rated bonds and overweighted those with CCC ratings. We also sought bonds issued by companies with adequate liquidity and a strong ability to meet their obligations. Bonds with CCC ratings were among the best-performing bonds in the high-yield market during the period.

Footnote reads:

These holdings represent 14.7% of the fund's net assets as of 1/31/04. The fund's holdings will change over time.

Although the fund's emerging markets weighting was neutral, relative to

many competitors, this sector contributed strongly to returns. As mentioned, these securities have surged as a result of strong growth in many emerging-market countries, including Brazil, Mexico, India, China, and South Korea. This growth has been due in large part to gains in manufacturing and exports to other rapidly growing countries. As a result of what we believed were excessive valuations near the end of the period, we sharply reduced the fund's exposure to emerging-market securities by the period's end.

European government agency bonds continued to produce solid returns, helped by the rising euro in relation to the continuing decline in the U.S. dollar. Stable or declining interest rates and economic growth in most Continental countries contributed to this sector's performance.

Mortgage-backed securities performed well, although their performance lagged many sectors of lower credit quality because of investors' preference for the latter. Nevertheless, after a difficult summer of volatility caused by high prepayment levels, these securities earned their coupon rates and had relatively stable principal values. We deployed the fund's assets in this sector as an anchor against some of the more volatile sectors with higher credit risk.

Finally, the fund's currency strategy continued to favor a weakening dollar and a rising euro, and made a solid contribution to returns.

Please note that all holdings discussed in this report are subject to review in accordance with the fund's investment strategy and may vary in the future.

The fund's management team

The fund is managed by the Putnam Core Fixed-Income Team. The members of the team are D. William Kohli (Portfolio Leader), David Waldman (Portfolio Member), Carl Bell, Rob Bloemker, Andrea Burke, Kevin Cronin, Steve Horner, Michael Salm, and John Van Tassel.

The outlook for your fund

The following commentary reflects anticipated developments that could affect your fund over the next six months, as well as your management team's plans for responding to them.

The global economy is currently in a state of transition, making it difficult to assess what could happen in the coming months. There has been tremendous stimulus in the United States in the form of tax cuts, a weaker dollar, increased government spending — some related to the Iraq war — and interest rates that have been at historical lows for some time. Meanwhile, there have been few clear signs from central banks that significant tightening will occur in 2004. The increased willingness among investors to accept risk has helped boost the capital markets, which has also provided economic stimulus. Overseas, interest rates are somewhat higher, but are stable and, in some cases, have been reduced. Surging growth in Asia and the U.S. economic recovery have provided the fabled "rising tide that lifts all boats," helping many smaller countries around the world to grow their economies.

Countering these forces are several trends that may hold back growth from a pace that we would normally see in a cyclical recovery from recession. These trends include the ongoing efforts among corporations to reduce debt, which diverts resources from capital spending, as well as continued high productivity, which enables companies to produce more

with the same resources. Finally, low wages in developing regions, such as Asia, are holding down global wages overall. As a result, many developed economies, especially the United States, have experienced a "jobless recovery."

While we suspect the Federal Reserve Board may raise rates sometime this year, it is by no means a certainty. Should the Fed begin to tighten, it will likely do so in a careful, deliberate, and open manner, with significant warning to investors beforehand. As a result, we have positioned the fund to be slightly less sensitive to interest-rate changes, which we believe is a prudent strategy at this time.

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice. International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk.

### Performance summary

This section shows your fund's performance during the first half of its fiscal year, which ended January 31, 2004. In accordance with regulatory requirements, we also include performance for the most current calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. Data represent past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate and you may have a gain or a loss when you sell your shares.

#### Terms and definitions

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities divided by the number of outstanding common shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on stock exchanges such as the American Stock Exchange and the New York Stock Exchange.

### Comparative indexes

Citigroup (formerly Salomon Smith Barney) Non-U.S. World Government Bond Index is an unmanaged index of government bonds issued by 10 countries.

Lehman Government Bond Index is an unmanaged index of U.S. Treasury and agency securities.

JP Morgan Chase Emerging Markets Bond Index (EMBI) Global Diversified is an unmanaged index used to mirror the investable universe of emerging markets debt securities.

JP Morgan Chase Global High Yield Index is an unmanaged index used to mirror the investable universe of the U.S. dollar global high-yield corporate debt market of both developed and emerging markets.

Morgan Stanley Capital International (MSCI) EAFE Index is an unmanaged index of international stocks from Europe, Australasia, and the Far

Russell 2000 Index is an unmanaged index of common stocks that generally measure performance of small to midsize companies within the Russell  $3000\ \text{Index}$ .

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper Inc. is a third-party industry ranking entity that ranks funds (without sales charges) with similar current investment styles or objectives as determined by Lipper. Lipper category averages reflect performance trends for funds within a category and are based on results at net asset value.

A note about duplicate mailings

In response to investors' requests, the SEC has modified mailing regulations for proxy statements, semiannual and annual reports, and prospectuses. Putnam is now able to send a single copy of these materials to customers who share the same address. This change will automatically apply to all shareholders except those who notify us. If you would prefer to receive your own copy, please call Putnam at 1-800-225-1581.

- (a) Percentages indicated are based on net assets of \$1,019,165,926.
- (DEF) Security is in default of principal and interest.
- (NON) Non-income-producing security.
- (STP) The interest rate and date shown parenthetically represent the new interest rate to be paid and the date the fund will begin accruing interest income at this rate.
- (RES) Restricted, excluding 144A securities, as to public resale. The total market value of restricted securities held at January 31, 2004 was \$21,931,633 or 2.2% of net assets.
- (PIK) Income may be received in cash or additional securities at the discretion of the issuer.
- (SEG) This security was pledged and segregated with the custodian to cover margin requirements for futures contracts at January 31, 2004.
  - (R) Real Estate Investment Trust.
  - (d) See Note 1 to the financial statements.

144A after the name of a security represents those exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

TBA after the name of a security represents to be announced securities (Note 1).

The rates shown on Floating Rate Bonds (FRB) and Floating Rate Notes (FRN) are the current interest rates shown at January 31, 2004.

Notes to financial statements January 31, 2004 (Unaudited)

Note 1 Significant accounting policies

Putnam Premier Income Trust (the "fund"), is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The fund's investment objective is to seek high current income which it intends to achieve by allocating its investments among the U.S. government sector, the high yield sector and the international sector of the fixed-income securities market. The fund invests in higher yielding, lower rated bonds that have a higher rate of default due to the nature of the investments.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

- A) Security valuation Investments for which market quotations are readily available are valued at the last reported sales price on their principal exchange, or official closing price for certain markets. If no sales are reported -- as in the case of some securities traded over-the-counter -- a security is valued at its last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are valued at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities. Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore, the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign securities taking into account multiple factors, including movements in the U.S. Securities market. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value. Other investments, including restricted securities, are valued at fair value following procedures approved by the Trustees. Such valuations and procedures are reviewed periodically by the Trustees.
- B) Joint trading account The fund may transfer uninvested cash balances, including cash collateral received under security lending arrangements, into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an indirect wholly-owned subsidiary of Putnam, LLC. These balances may be invested in issuers of high-grade short-term investments having maturities of up to 397 days for collateral received under security lending arrangements and up to 90 days for other cash investments.
- C) Repurchase agreements The fund, or any joint trading account, through its custodian, receives delivery of the underlying securities, the market value of which at the time of purchase is required to be in an

amount at least equal to the resale price, including accrued interest. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the fund and the counterparty. Putnam Management is responsible for determining that the value of these underlying securities is at all times at least equal to the resale price, including accrued interest.

D) Security transactions and related investment income Security transactions are recorded on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Interest income is recorded on the accrual basis. Dividend income is recognized on the ex-dividend date except that certain dividends from foreign securities are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received.

All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

- E) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.
- F) Forward currency contracts The fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the

contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio.

G) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Futures and written option contracts outstanding at period end, if any, are listed after the fund's portfolio.

- H) Interest rate swap contracts The fund may enter into interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage the fund's exposure to interest rates. Interest rate swap contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are recorded as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. Interest rate swap contracts outstanding at period end, if any, are listed after the fund's portfolio.
- I) Credit default contracts The fund may enter into credit default contracts where one party, the protection buyer, makes an upfront payment to a counter party, the protection seller, in exchange for the right to receive a contingent payment. The maximum amount of the payment may equal the notional amount, at par, of the underlying index or security as a result of a related credit event. An upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. An upfront payment made by the fund, as the protection buyer, is recorded as an asset on the fund's books. The credit default contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses. In addition to bearing the risk that the credit event will occur, the

fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index, the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased comparable publicly traded securities or that the counterparty may default on its obligation to perform. The risk of loss may exceed the fair value of these contracts recognized on the statement of assets and liabilities. Credit default contracts outstanding at period end, if any, are listed after the fund's portfolio.

J) TBA purchase commitments The fund may enter into "TBA" (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the fair value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

K) TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction.

Unsettled TBA sale commitments are valued at the fair value of the underlying securities, generally according to the procedures described under "Se cur ity valuation" above. The contract is "marked-to-market" daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end, if any, are listed after the fund's portfolio.

L) Security lending The fund may lend securities, through its agents, to qualified borrowers in order to earn additional income. The loans are collateralized by cash and/or securities in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the fund on the next business day.

The risk of borrower default will be borne by the fund's agents; the fund will bear the risk of loss with respect to the investment of the cash collateral. Income from securities lending is included in investment income on the Statement of operations. At January 31, 2004, the value of securities loaned amounted to \$1,959,195. The fund received cash collateral of \$1,998,864 which is pooled with collateral of other Putnam funds into 9 issuers of high grade short-term investments.

M) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At July 31, 2003, the fund had a capital loss carryover of \$234,718,499 available to the extent allowed by tax law to offset future net capital gain, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
\$39,893,260	July 31, 2007
44,857,570	July 31, 2008
24,930,247	July 31, 2009
44,917,486	July 31, 2010
80,119,936	July 31, 2011

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending July 31, 2004 \$2,541,873 of losses recognized during the period November 1, 2002 to July 31, 2003.

The aggregate identified cost on a tax basis is \$1,052,218,052, resulting in gross unrealized appreciation and depreciation of \$71,335,144 and \$56,791,747 respectively, or net unrealized appreciation of \$14,543,397.

N) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

# Note 2 Management fee, administrative services and other transactions

Putnam Management is paid for management and investment advisory services quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million and 0.55% thereafter.

The fund reimburses Putnam Management an allocated amount for the

compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a subsidiary of Putnam, LLC. Putnam Investor Services, a division of PFTC, provides investor servicing agent functions to the fund. During the six months ended January 31, 2004, the fund paid PFTC \$442,239 for these services.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the six months ended January 31, 2004, the fund's expenses were reduced by \$18,841 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$1,248 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Trustee compensation and expenses in the Statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the Statement of assets and liabilities.

#### Note 3 Purchases and sales of securities

During the six months ended January 31, 2004, cost of purchases and proceeds from sales of investment securities other than U.S. government securities and short-term investments aggregated \$348,872,165 and \$416,542,471, respectively. Purchases and sales of U.S. government securities aggregated \$51,320,792 and \$14,861,379, respectively.

# Note 4 $$\operatorname{Regulatory}$ matters and litigation

On November 13, 2003, Putnam Management agreed to entry of an order by the Securities and Exchange Commission in partial resolution of administrative and cease-and-desist proceedings initiated by the SEC on October 28, 2003 in connection with alleged excessive short-term trading by at least six Putnam Management investment professionals. The SEC's findings reflect that four of those employees engaged in such trading in funds over which they had investment decision-making responsibility and had access to non-public information regarding, among other things, current portfolio holdings and valuations. The six individuals are no longer employed by Putnam Management. Under the order, Putnam Management will make restitution for losses attributable to excessive short-term trading by Putnam employees, institute new employee trading restrictions

and enhanced employee trading compliance, retain an independent compliance consultant, and take other remedial actions. Putnam Management neither admitted nor denied the order's findings, which included findings that Putnam Management willfully violated provisions of the federal securities laws. A civil monetary penalty and other monetary relief, if any, will be determined at a later date. If a hearing is necessary to determine the amounts of such penalty or other relief, Putnam Management will be precluded from arguing that it did not violate the federal securities laws in the manner described in the SEC order, the findings set forth in the SEC order will be accepted as true by the hearing officer and additional evidence may be presented. Putnam Management, and not the investors in any Putnam fund, will bear all costs, including restitution, civil penalties and associated legal fees. Administrative proceedings instituted by the Commonwealth of Massachusetts on October 28, 2003 against Putnam Management in connection with alleged market timing activities by Putnam employees and by participants in some Putnam-administered 401(k) plans are pending. Putnam Management has committed to make complete restitution for any losses suffered by Putnam shareholders as a result of any improper market-timing activities by Putnam employees or within Putnam-administered 401(k) plans.

The SEC's and Commonwealth's allegations and related matters also serve as the general basis for numerous lawsuits, including purported class action lawsuits filed against Putnam Management and certain related parties, including certain Putnam funds. Putnam Management has agreed to bear any costs incurred by Putnam funds in connection with these lawsuits. Based on currently available information, Putnam Management believes that the likelihood that the pending private lawsuits and purported class action lawsuits will have a material adverse financial impact on the fund is remote, and the pending actions are not likely to materially affect its ability to provide investment management services to its clients, including the Putnam funds.

Review of these matters by counsel for Putnam Management and by separate independent counsel for the Putnam funds and their independent Trustees is continuing. In addition, Marsh & McLennan Companies, Inc., Putnam Management's parent company, has engaged counsel to conduct a separate review of Putnam Management's policies and controls related to short-term trading.

Fund information

About Putnam Investments

One of the largest mutual fund families in the United States, Putnam Investments has a heritage of investment leadership dating back to Judge Samuel Putnam, whose Prudent Man Rule has defined fiduciary tradition and practice since 1830. Founded over 65 years ago, Putnam Investments was built around the concept that a balance between risk and reward is the hallmark of a well-rounded financial program. We presently manage over 100 mutual funds in growth, value, blend, fixed income, and international.

Item 10. Controls and Procedures:

-----

(a) The registrant's principal executive officer and principal financial

officer have concluded, based on their evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report on Form N-CSR, that the design and operation of such procedures are generally effective to provide reasonable assurance that information required to be disclosed by the investment company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Although such officers reached the conclusion expressed in the preceding paragraph, they are aware of matters that raise concerns with respect to controls, each of which arose in connection with the administration of 401(k) plans by Putnam Fiduciary Trust Company. The first matter, which occurred in early 2001, involved the willful circumvention of controls by certain Putnam employees in connection with the correction of operational errors with respect to a 401(k)client's investment in certain Putnam Funds, which led to losses in five Putnam Funds (not including the registrant). Such officers became aware of this matter in February 2004. The second matter, which occurred in 2002, involved the willful circumvention by certain Putnam employees of policies and procedures in connection with the payment of Putnam corporate expenses. Such officers did not learn that this matter involved a Putnam Fund until January 2004. Putnam has made restitution to the affected Funds, implemented a number of personnel changes, including senior personnel, begun to implement changes in procedures to address these items and informed the SEC, the Funds' Trustees and independent auditors. An internal investigation and review of procedures and controls are currently ongoing.

In reaching the conclusion expressed herein, the registrant's principal executive officer and principal financial officer considered a number of factors, including the nature of the matters described above, when the matters occurred, the individuals involved, personnel changes that have occurred since these matters occurred, the results to date of the current ongoing investigation and the overall quality of controls at Putnam at this time.

(b) Changes in internal control over financial reporting: Not applicable

## Item 11. Exhibits:

- (a) Not applicable
- (b) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2 under the Investment Company Act of 1940, as amended, and the officer certifications as required by Section 906 of the Sarbanes-Oxley Act of 2002 are filed herewith.

#### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 an the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
