**METHANEX SECURES MORE NATURAL GAS FOR NEW ZEALAND PLANT**

**March 7, 2006**

Methanex Corporation announced today that it has secured approximately six petajoules of additional natural gas feedstock for its 530,000 tonne per year methanol plant in New Zealand. This gas, combined with existing gas entitlements, will enable the New Zealand plant to produce approximately 230,000 tonnes of methanol in 2006. Bruce Aitken, President and CEO of Methanex commented, "We are pleased that we have been able to secure this additional gas for our New Zealand facility. Supply in our industry continues to be very tight, inventories are low and demand is healthy. This incremental production from our New Zealand plant will supply our customers in the Asia Pacific region and we expect it to make a positive contribution to our earnings and cash flows in the first half of this year."

The New Zealand plant was idled during the fourth quarter of 2005 and was restarted in early January 2006. With this additional gas, it is expected to operate until the end of the second quarter of 2006. The New Zealand plant remains a flexible production asset and future operations beyond mid-2006 will be dependent on securing additional economically priced natural gas.

Methanex is a Vancouver based, publicly-traded company engaged in the worldwide production and marketing of methanol. Methanex shares are listed for trading on the Toronto Stock Exchange in Canada under the trading symbol **MX** and on the Nasdaq National Market in the United States under the trading symbol **MEOH**. *This news release contains forward-looking statements. Certain material factors or assumptions were applied in drawing the conclusions or making the forecasts or projections that are included in the forward-looking statements and Methanex believes that it has a reasonable basis for making such forward-looking statements. However, forward-looking statements, by their nature, involve risks and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking statements. The risks and uncertainties include those attendant with producing and marketing methanol and successfully carrying out major capital expenditure projects in various jurisdictions, the ability to successfully carry out corporate initiatives and strategies, conditions in the methanol and other industries including the supply and demand balance for methanol, actions of competitors, world-wide economic conditions and other risks described in our 2004 Management's Discussion & Analysis. Undue reliance should not be placed on forward-looking statements. They are not a substitute for the exercise of one's own due diligence and judgment. The outcomes anticipated in forward-looking statements may not occur and we do not undertake to update forward-looking statements.*
