(1) Because the operating cash flows of our Intuit Real Estate Solutions (IRES) discontinued operations were not material for any period presented, we have not segregated them from continuing operations on these statements of cash flows. We have presented the effect of the gain on disposal of IRES on the statement of cash flows for the nine months ended April 30, 2010. See Note 6.

See accompanying notes.

Table of Contents

INTUIT INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies*Description of Business*

Intuit Inc. provides business and financial management solutions for small and medium-sized businesses, consumers, accounting professionals and financial institutions. Our flagship products and services, including QuickBooks, Quicken and TurboTax, simplify small business management and payroll processing, personal finance, and tax preparation and filing. ProSeries and Lacerte are Intuit's tax preparation offerings for professional accountants. Our financial institutions division, anchored by Digital Insight, provides outsourced online banking services to banks and credit unions. Incorporated in 1984 and headquartered in Mountain View, California, we sell our products and services primarily in the United States.

Basis of Presentation

These condensed consolidated financial statements include the financial statements of Intuit and its wholly owned subsidiaries. We have eliminated all significant intercompany balances and transactions in consolidation. In July 2009 we acquired PayCycle, Inc. for a total purchase price of approximately \$169 million and in November 2009 we acquired Mint Software Inc. for total consideration of approximately \$170 million. Accordingly, we have included the results of operations for PayCycle and Mint in our consolidated results of operations from their respective dates of acquisition. In January 2010 we sold our Intuit Real Estate Solutions (IRES) business. We have reclassified our financial statements for all periods prior to the sale to reflect IRES as discontinued operations. Unless noted otherwise, discussions in these notes pertain to our continuing operations.

We have included all adjustments, consisting only of normal recurring items, that we considered necessary for a fair presentation of our financial results for the interim periods presented. These unaudited condensed consolidated financial statements and accompanying notes should be read together with the audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. Results for the three and nine months ended April 30, 2010 do not necessarily indicate the results we expect for the fiscal year ending July 31, 2010 or any other future period.

We have reclassified certain amounts previously reported in our financial statements to conform to the current presentation, including amounts related to reportable segments and discontinued operations.

Seasonality

Our QuickBooks, Consumer Tax and Accounting Professionals businesses are highly seasonal. Revenue from our QuickBooks software products tends to be highest during our second and third fiscal quarters. Sales of income tax preparation products and services are heavily concentrated in the period from November through April. Seasonal patterns mean that our total net revenue is usually highest during our second quarter ending January 31 and third quarter ending April 30. We typically report losses in our first quarter ending October 31 and fourth quarter ending July 31, when revenue from our tax businesses is minimal while operating expenses continue at relatively consistent levels.

Significant Accounting Policies

We describe our significant accounting policies in Note 1 to the financial statements in Item 8 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. On August 1, 2009 we adopted the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) as the sole source for authoritative guidance. On August 1, 2009 we also adopted certain authoritative guidance on fair value measurements for nonfinancial assets and nonfinancial liabilities and on business combinations that affected our significant accounting policies. See *Fair Value of Nonfinancial Assets and Nonfinancial Liabilities* and *Business Combinations* below. There have been no other changes to our significant accounting policies during fiscal 2010.

Table of Contents**Fair Value of Nonfinancial Assets and Nonfinancial Liabilities**

We describe our accounting policies for the valuation of goodwill, purchased intangible assets and other long-lived assets in *Goodwill, Purchased Intangible Assets and Other Long-Lived Assets* in Note 1 to the financial statements in Item 8 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. On August 1, 2009 we adopted the provisions of the authoritative guidance on fair value measurements for nonfinancial assets and nonfinancial liabilities that we do not recognize or disclose at fair value on a recurring basis (at least annually). These include reporting units measured at fair value in a goodwill impairment test, other nonfinancial assets or liabilities measured at fair value for impairment testing, and nonfinancial assets acquired and liabilities assumed in a business combination. In accordance with this guidance, we define fair value as the price that would be received from the sale of an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. As a result, we now estimate the fair values of these assets and liabilities from the perspective of a market participant rather than from an entity-specific perspective. In addition, we consider and use all valuation methods that are appropriate in estimating the fair value of these assets and liabilities. See Note 2, *Fair Value Measurements - Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis*, for information on the impact of our adoption of this guidance.

Business Combinations

On August 1, 2009 we adopted the acquisition method of accounting for business combinations. The acquisition method of accounting requires us to use significant estimates and assumptions, including fair value estimates, as of the business combination date and to refine those estimates as necessary during the measurement period (defined as the period, not to exceed one year, in which we may adjust the provisional amounts recognized for a business combination) in a manner that is generally similar to the previous purchase method of accounting.

Under the acquisition method of accounting we recognize separately from goodwill the identifiable assets acquired, the liabilities assumed, and any noncontrolling interests in an acquiree, generally at the acquisition date fair value. We measure goodwill as of the acquisition date as the excess of consideration transferred, which we also measure at fair value, over the net of the acquisition date amounts of the identifiable assets acquired and liabilities assumed. Costs that we incur to complete the business combination such as investment banking, legal and other professional fees are not considered part of consideration and we charge them to general and administrative expense as they are incurred. Under the acquisition method we also account for acquired company restructuring activities that we initiate separately from the business combination.

Should the initial accounting for a business combination be incomplete by the end of a reporting period that falls within the measurement period, we report provisional amounts in our financial statements. During the measurement period, we adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts recognized as of that date and we record those adjustments to our financial statements. We apply those measurement period adjustments that we determine to be significant retrospectively to comparative information in our financial statements, including adjustments to depreciation and amortization expense.

Under the acquisition method of accounting for business combinations, if we identify changes to deferred tax asset valuation allowances or liabilities related to uncertain tax positions during the measurement period and they relate to new information obtained about facts and circumstances that existed as of the acquisition date, those changes are considered a measurement period adjustment and we record the offset to goodwill. We record all other changes to deferred tax asset valuation allowances and liabilities related to uncertain tax positions in current period income tax expense. This accounting applies to all of our acquisitions regardless of acquisition date.

Other Accounting Pronouncements Adopted in the Current Period

On August 1, 2009 we adopted authoritative guidance for the determination of the useful lives of intangible assets. This guidance amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful lives of recognized intangible assets. Our adoption of this guidance had no impact on our financial position, results of operations or cash flows.

On August 1, 2009 we adopted authoritative guidance for the accounting and reporting of noncontrolling interests in consolidated entities and for the deconsolidation of those entities. As a result of our adoption of this guidance, we

retrospectively reclassified the balances for the noncontrolling interests in SBS to stockholders equity for all

8

Table of Contents

periods presented. These balances were not significant. The expense that we recorded for the noncontrolling interest in SBS's income was not significant compared with our consolidated financial results for any period presented and we have therefore included it in interest and other income, net in our statements of operations.

On November 1, 2009 we adopted authoritative guidance for measuring liabilities at fair value. This guidance amends the factors that should be considered in fair value measurements of liabilities when a quoted price in an active market is not available. Our adoption of this guidance had no impact on our financial position, results of operations or cash flows.

On February 1, 2010 we adopted authoritative guidance for the disclosure of fair value measurements. This guidance requires more robust disclosures about the different classes of assets and liabilities that we measure at fair value, the valuation techniques and inputs we use, the activity in Level 3 fair value measurements, and transfers between Levels 1, 2, and 3. Our adoption of this guidance had no impact on our financial position, results of operations or cash flows.

Computation of Net Income (Loss) Per Share

We compute basic net income or loss per share using the weighted average number of common shares outstanding during the period. We compute diluted net income per share using the weighted average number of common shares and dilutive potential common shares outstanding during the period. Dilutive potential common shares include shares issuable upon the exercise of stock options and upon the vesting of restricted stock units (RSUs) under the treasury stock method.

We include stock options with combined exercise prices, unrecognized compensation expense and tax benefits that are less than the average market price for our common stock, and RSUs with unrecognized compensation expense and tax benefits that are less than the average market price for our common stock, in the calculation of diluted net income per share. We exclude stock options with combined exercise prices, unrecognized compensation expense and tax benefits that are greater than the average market price for our common stock, and RSUs with unrecognized compensation expense and tax benefits that are greater than the average market price for our common stock, from the calculation of diluted net income per share because their effect is anti-dilutive. Under the treasury stock method, the amount that must be paid to exercise stock options, the amount of compensation expense for future service that we have not yet recognized for stock options and RSUs, and the amount of tax benefits that will be recorded in additional paid-in capital when the awards become deductible are assumed to be used to repurchase shares.

In loss periods, basic net loss per share and diluted net loss per share are the same since the effect of potential common shares is anti-dilutive and therefore excluded.

Table of Contents

The following table presents the composition of shares used in the computation of basic and diluted net income per share for the periods indicated.

	Three Months Ended		Nine Months Ended	
	April	April	April	April

Significant Customers

No customer accounted for 10% or more of total net revenue in the three or nine months ended April 30, 2010 or April 30, 2009. No customer accounted for 10% or more of total accounts receivable at April 30, 2010 or July 31, 2009.

Recent Accounting Pronouncements

ASU 2009-13, *Revenue Recognition (Topic 605) Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*

In October 2009 the FASB issued Accounting Standards Update (ASU) 2009-13, *Revenue Recognition (Topic 605) Multiple-Deliverable Revenue Arrangements a Consensus of the FASB Emerging Issues Task Force*. This update provides amendments to the criteria in ASC Topic 605, *Revenue Recognition*, for separating consideration in multiple-deliverable arrangements by establishing a selling price hierarchy. The selling price used for each deliverable will be based on vendor-specific objective evidence (VSOE) if available, third-party evidence if VSOE

Table of Contents

is not available, or estimated selling price if neither VSOE nor third-party evidence is available. ASU 2009-13 also eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. ASU 2009-13 is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, which means that it will be effective for our fiscal year beginning August 1, 2010. We are in the process of evaluating this update and therefore have not yet determined the impact that adoption of ASU 2009-13 will have on our financial position, results of operations or cash flows.

2. Fair Value Measurements

The authoritative guidance defines fair value as the price that would be received from the sale of an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. We measure and disclose the fair value of certain assets and liabilities on a recurring basis and other assets and liabilities on a non-recurring basis, as described below. The authoritative guidance establishes a three-level hierarchy for disclosure that is based on the extent and level of judgment used to estimate the fair value of assets and liabilities.

Level 1 uses unadjusted quoted prices that are available in active markets for identical assets or liabilities.

Level 2 uses inputs other than quoted prices included in Level 1 that are either directly or indirectly observable through correlation with market data. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and inputs to valuation models or other pricing methodologies that do not require significant judgment because the inputs used in the model, such as interest rates and volatility, can be corroborated by readily observable market data.

Level 3 uses one or more significant inputs that are unobservable and supported by little or no market activity, and that reflect the use of significant management judgment. Level 3 assets and liabilities include those whose fair value measurements are determined using pricing models, discounted cash flow methodologies or similar valuation techniques, and significant management judgment or estimation.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

We measure our cash equivalents, available-for-sale debt securities and long-term debt at fair value on a recurring basis. We have classified these assets and liabilities in accordance with the fair value hierarchy. In instances where the inputs used to measure the fair value of an asset or liability fall into more than one level of the fair value hierarchy, we have classified them based on the lowest level input that is significant to the determination of the fair value.

Table of Contents

The following table presents financial assets and financial liabilities that we measured at fair value on a recurring basis at the dates indicated.

<i>(In millions)</i>	April 30, 2010			Total Fair Value	July 31, 2009			Total Fair Value
	Level 1	Level 2	Level 3		Level 1	Level 2	Level 3	
Assets:								
Cash equivalents (1)	\$ 509	\$	\$	\$ 509	\$ 893	\$	\$	\$ 893
Available-for-sale debt securities:								
Municipal bonds (2)		1,016		1,016		448		448
Municipal auction rate securities (3)			198	198			245	245
Corporate notes (2)		291		291		44		44
U.S. agency securities (2)		193		193		25		25
U.S. treasury securities (2)		39		39				
Total assets	\$ 509	\$ 1,539	\$ 198	\$ 2,246	\$ 893	\$ 517	\$ 245	\$ 1,655
Liabilities:								
Long-term debt (4)	\$	\$ 1,075	\$	\$ 1,075	\$	\$ 1,001	\$	\$ 1,001

(1) \$384 million included in cash and cash equivalents and \$125 million included in funds held for customers on our balance sheet at April 30, 2010. \$621 million included in cash and cash equivalents and \$272 million included in funds held for customers on our balance sheet at July 31, 2009.

- (2) \$1.4 billion included in investments and \$149 million included in funds held for customers on our balance sheet at April 30, 2010. \$517 million included in investments on our balance sheet at July 31, 2009.
- (3) \$110 million included in investments and \$88 million included in long-term investments on our balance sheet at April 30, 2010. \$151 million included in investments and \$94 million included in long-term investments on our balance sheet at July 31, 2009.
- (4) Carrying value on our balance sheets at April 30, 2010 and July 31, 2009 was \$998 million. See Note 8.

Financial assets whose fair values we measure on a recurring basis using Level 2 inputs consist of municipal bonds, corporate notes, U.S. agency securities and U.S. treasury securities. We measure the fair values of these assets using quoted prices for similar assets or liabilities in active markets. Financial liabilities whose fair values we measure on a recurring basis using Level 2 inputs consist of long-term debt. We measure the fair value of our long-term debt based on the trading prices of the senior notes and the interest rates we could obtain for other borrowings with similar terms.

See Note 8.

There were no significant transfers to or from Levels 1, 2 or 3 during the three or nine months ended April 30, 2010. The following table presents a reconciliation of activity for financial assets that we measure at fair value on a recurring basis using significant unobservable inputs (Level 3 assets) for those periods.

<i>(In millions)</i>	Three Months Ended April 30, 2010	Nine Months Ended April 30, 2009
Beginning balance	\$ 216	\$ 245
Settlements at par	(18)	(47)
Ending balance	\$ 198	\$ 198

Financial assets whose fair values we measure on a recurring basis using Level 3 inputs consist of municipal auction rate securities. Based on the maturities of the underlying securities and the put option described below, we classified \$110 million and \$151 million of these securities as short-term investments and \$88 million and \$94 million as long-term investments on our balance sheets at April 30, 2010 and July 31, 2009. At these dates all of the municipal auction rate securities we held were rated A or better by the major credit rating agencies and 83% or more were collateralized by student loans guaranteed by the U.S. Department of Education. These securities are long-term debt

Table of Contents

instruments that are intended to provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined intervals, typically every 35 days. Due to a decrease in liquidity in the global credit markets, in February 2008 auctions began failing for the municipal auction rate securities we held. Regularly scheduled auctions for these securities have generally continued to fail since that time. When these auctions initially failed, higher interest rates for many of the securities went into effect in accordance with the terms of the prospectus for each security. As of April 30, 2010, we had received all interest payments in accordance with the contractual terms of these securities. We estimated the fair values of the municipal auction rate securities we held at April 30, 2010 based on a discounted cash flow model that we prepared. Key inputs to our discounted cash flow model included the projected future interest rates; the likely timing of principal repayments; the probability of full repayment considering guarantees by the U.S. Department of Education of the underlying student loans or insurance by other third parties; publicly available pricing data for recently issued student loan backed securities that are not subject to auctions; and the impact of the reduced liquidity for auction rate securities. The following table presents information about significant inputs to our discounted cash flow model at the dates shown:

	Inputs to Model at	
	April 30, 2010	July 31, 2009
Range of average projected future yield rates	1.96% - 3.50%	0.63% - 3.78%
Range of overall discount rates used in model (like-kind security yield rate plus illiquidity factor)	1.57% - 1.82%	1.61% - 1.86%
Like-kind security yield rate	0.32%	0.36%
Range of illiquidity factors	125 - 150 bps	125 - 150 bps
Expected holding period in years	7	7

Using our discounted cash flow model we determined that the fair values of the municipal auction rate securities we held at April 30, 2010 were approximately equal to their par values. As a result, we recorded no decrease in the fair values of those securities for the three or nine months then ended. We do not intend to sell our municipal auction rate securities and it is not more likely than not that we will be required to sell them before recovery at par, which may be at maturity.

On November 4, 2008 we accepted an offer from UBS AG (UBS), one of the broker-dealers for our municipal auction rate securities, that gives us the option to sell UBS a total of \$110 million in municipal auction rate securities at par value at any time during a two-year period beginning June 30, 2010. The put option also gives UBS the discretion to buy any or all of these securities from us at par value at any time. To date UBS has not purchased any of these securities from us. We chose not to elect the fair value option for the put option at the time we accepted the UBS offer. We accounted for the put option at its cost of zero on November 4, 2008, the date that we entered into the agreement, because we considered the value of the securities subject to the put option to be substantially equal to their par values at that date. The put option is considered to be a separate and freestanding financial instrument between UBS and Intuit because it is non-transferable and could not be attached to the related auction rate securities if they were to be sold to a third party. Since the put option is freestanding, we did not consider the option when estimating the fair value of the UBS auction rate securities we held at April 30, 2010 and July 31, 2009. We currently intend to exercise our option to sell UBS all of these municipal auction rate securities at par value in accordance with the terms of the offer within the next twelve months.

Based on our expected operating cash flows and our other sources of cash, we do not believe that the reduction in liquidity of our municipal auction rate securities will have a material impact on our overall ability to meet our liquidity needs.

Table of Contents*Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis*

As discussed in Note 1, *Significant Accounting Policies*, on August 1, 2009 we adopted the provisions of the authoritative guidance on fair value measurements for nonfinancial assets and nonfinancial liabilities that we do not recognize or disclose at fair value on a recurring basis (at least annually). These include reporting units measured at fair value in a goodwill impairment test, other nonfinancial assets or liabilities measured at fair value for impairment testing, and nonfinancial assets acquired and liabilities assumed in a business combination. In the absence of an event or circumstance that indicates that the carrying value of a reporting unit may not be recoverable, we test our goodwill for impairment annually during our fourth fiscal quarter.

3. Cash and Cash Equivalents, Investments and Funds Held for Customers

We consider highly liquid investments with maturities of three months or less at the date of purchase to be cash equivalents. Cash equivalents consist primarily of AAA-rated money market funds in all periods presented. Investments consist of available-for-sale investment-grade debt securities and municipal auction rate securities that we carry at fair value. Funds held for customers consist of cash, AAA-rated money market funds and available-for-sale investment-grade debt securities. Long-term investments consist primarily of municipal auction rate securities that we carry at fair value. Due to a decrease in liquidity in the global credit markets, we estimate the fair values of our municipal auction rate securities based on a discounted cash flow model that we prepare. See Note 2 for more information. Except for direct obligations of the United States government, securities issued by agencies of the United States government, and money market funds, we diversify our investments by limiting our holdings with any individual issuer.

The following table summarizes our cash and cash equivalents, investments and funds held for customers by balance sheet classification at the dates indicated.

<i>(In millions)</i>	April 30, 2010		July 31, 2009	
	Amortized		Amortized

14

Table of Contents

We use the specific identification method to compute gains and losses on investments. We include realized gains and losses on our available-for-sale debt securities in interest and other income, net in our statements of operations. Gross realized gains and losses on our available-for-sale debt securities for the three and nine months ended April 30, 2010 and April 30, 2009 were not significant. We accumulate unrealized gains and losses on our available-for-sale debt securities, net of tax, in accumulated other comprehensive income in the stockholders' equity section of our balance sheets. Gross unrealized gains and losses on our available-for-sale debt securities at April 30, 2010 and July 31, 2009 were not significant.

We periodically review our investment portfolios to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns. We believe that the investments we held at April 30, 2010 were not other-than-temporarily impaired. While certain available-for-sale debt securities have fair values that are below cost, we do not intend to sell these securities and it is not more likely than not that we will be required to sell them before recovery at par, which may be at maturity. The unrealized losses at April 30, 2010 are due to changes in interest rates, including market credit spreads, and not due to increased credit risks associated with the specific securities.

The following table summarizes our available-for-sale debt securities classified by the stated maturity date of the security at the dates indicated.

<i>(In millions)</i>	April 30, 2010		July 31, 2009	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due within one year	\$ 366	\$ 367	\$ 185	\$ 186
Due within two years	475	475	159	160
Due within three years	39	39	5	5
Due after three years	856	856	411	411
Total available-for-sale debt securities	\$ 1,736	\$ 1,737	\$ 760	\$ 762

Available-for-sale debt securities due after three years in the table above included \$198 million and \$230 million in municipal auction rate securities at April 30, 2010 and July 31, 2009, of which \$110 million and \$136 million were subject to the UBS put option that is effective in June 2010. See Note 2. Of the remaining available-for-sale debt securities, 97% had an interest reset date, put date or mandatory call date within two years of those dates.

4. Comprehensive Net Income (Loss)

We add components of other comprehensive income or loss, such as changes in the fair value of available-for-sale debt securities and foreign currency translation adjustments, to our net income or loss to arrive at comprehensive net income or loss. Other comprehensive income or loss items have no impact on our net income or loss as presented in our statements of operations.

Table of Contents

The components of comprehensive net income, net of income taxes, were as shown in the following table for the periods indicated.

<i>(In millions)</i>	Three Months Ended		Nine Months Ended	
	April 30, 2010	April 30, 2009	April 30, 2010	April 30, 2009
Net income	\$ 576	\$ 485	\$ 622	\$ 518
Components of other comprehensive income:				
Changes in net unrealized gains (losses) on investments, net of reclassification adjustment for realized gains (losses), net of income taxes		10		
Foreign currency translation adjustment, net of income taxes	3	1	4	(5)
Total other comprehensive income (loss), net of income taxes	3	11	4	(5)
Comprehensive net income, net of income taxes	\$ 579	\$ 496	\$ 626	\$ 513
Income tax provision (benefit) netted against total other comprehensive income (loss)	\$ 1	\$ 7	\$ 1	\$ (3)

5. Business Combinations*Mint Software Inc.*

On November 2, 2009 we acquired all of the outstanding equity interests of Mint Software Inc. for total consideration of approximately \$170 million. The total consideration included approximately \$24 million for the fair value of assumed equity awards and cash retention bonuses that will be charged to expense over a three year service period. Mint is a provider of online personal finance services and became part of our Other Businesses segment. We acquired Mint to expand our online personal finance offerings in support of our Connected Services strategy.

Under the acquisition method of accounting we allocated the fair value of the total consideration transferred to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values on the date of acquisition. The fair values assigned to identifiable intangible assets acquired were based on estimates and assumptions determined by management. We recorded the excess of consideration over the aggregate fair values as goodwill. Using information available at the time the acquisition closed, we allocated approximately \$1 million of the consideration to tangible assets and liabilities and approximately \$43 million of the consideration to identified intangible assets. We recorded the excess consideration of approximately \$102 million as goodwill, none of which is deductible for income tax purposes. The identified intangible assets are being amortized over a weighted average life of seven years.

We have included Mint's results of operations in our consolidated results of operations from the date of acquisition. Mint's results of operations for periods prior to the date of acquisition were not material when compared with our consolidated results of operations.

PayCycle, Inc.

On July 23, 2009 we acquired all of the outstanding equity interests of PayCycle, Inc. for a total purchase price of approximately \$169 million, including the fair value of certain assumed stock options. PayCycle is a provider of online payroll solutions to small businesses and became part of our Employee Management Solutions segment. We acquired PayCycle to expand our online payroll offerings in support of our Connected Services strategy.

Under the purchase method of accounting we allocated the total purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values on the date of acquisition. The fair values assigned to identifiable intangible assets acquired were based on estimates and assumptions determined by management. We recorded the excess of purchase price over the aggregate fair values as goodwill. Using information available at the time the acquisition closed, we allocated approximately \$5 million of the purchase price

Table of Contents

to tangible assets and liabilities and approximately \$42 million of the purchase price to identified intangible assets. We recorded the excess purchase price of approximately \$122 million as goodwill, none of which is deductible for income tax purposes. We may adjust the preliminary purchase price allocation after obtaining more information about asset valuations and liabilities assumed. The identified intangible assets are being amortized over a weighted average life of seven years.

We have included PayCycle's results of operations in our consolidated results of operations from the date of acquisition. PayCycle's results of operations for periods prior to the date of acquisition were not material when compared with our consolidated results of operations.

6. Discontinued Operations

On January 15, 2010 we sold our Intuit Real Estate Solutions (IRES) business for approximately \$128 million in cash and recorded a net gain on disposal of \$35 million. The decision to sell IRES was a result of management's desire to focus resources on Intuit's core products and services. IRES was part of our Other Businesses segment.

We determined that IRES became a discontinued operation in the second quarter of fiscal 2010. We have therefore segregated the net assets and operating results of IRES from continuing operations on our balance sheets and in our statements of operations for all periods prior to the sale. Assets held for sale at July 31, 2009 consisted primarily of goodwill. Because IRES operating cash flows were not material for any period presented, we have not segregated them from continuing operations on our statements of cash flows. We have presented the effect of the net gain on disposal of IRES in net income from discontinued operations on our statements of cash flows for the nine months ended April 30, 2010.

Net revenue and net income (loss) from IRES discontinued operations were as shown in the following table for the periods indicated.

<i>(In millions)</i>	Three Months Ended		Nine Months Ended	
	April 30, 2010	April 30, 2009	April 30, 2010	April 30, 2009
Net revenue from discontinued operations	\$	\$ 18	\$ 33	\$ 55
Net income (loss) from discontinued operations				
Net loss from discontinued operations	\$	\$	\$	\$ (1)
Net gain on disposal of discontinued operations			35	
Total net income (loss) from discontinued operations	\$	\$	\$ 35	\$ (1)

7. Current Liabilities*Unsecured Revolving Credit Facility*

On March 22, 2007 we entered into an agreement with certain institutional lenders for a \$500 million unsecured revolving credit facility that will expire on March 22, 2012. Advances under the credit facility will accrue interest at rates that are equal to, at our election, either Citibank's base rate or the London InterBank Offered Rate (LIBOR) plus a margin that ranges from 0.18% to 0.575% based on our senior debt credit ratings. The applicable interest rate will be increased by 0.05% for any period in which the total principal amount of advances and letters of credit under the credit facility exceeds \$250 million. The agreement includes covenants that require us to maintain a ratio of total debt to annual earnings before interest, taxes, depreciation and amortization (EBITDA) of not greater than 3.25 to 1.00 and a ratio of annual EBITDA to interest payable of not less than 3.00 to 1.00. We were in compliance with these covenants at April 30, 2010. We may use amounts borrowed under this credit facility for general corporate purposes or for future acquisitions or expansion of our business. To date we have not borrowed under this credit facility.

Table of Contents*Other Current Liabilities*

Other current liabilities were as follows at the dates indicated:

<i>(In millions)</i>	April 30, 2010	July 31, 2009
Reserve for product returns	\$ 53	\$ 22
Reserve for rebates	36	30
Interest payable	7	21
Executive deferred compensation plan	44	37
Current portion of license fee payable	10	10
Other	37	33
Total other current liabilities	\$ 187	\$ 153

The balances of several of our other current liabilities, particularly our reserves for product returns and rebates, are affected by the seasonality of our business. See Note 1, *Seasonality*.

8. Long-Term Obligations*Senior Unsecured Notes*

On March 12, 2007 we issued \$500 million of 5.40% senior unsecured notes due on March 15, 2012 and \$500 million of 5.75% senior unsecured notes due on March 15, 2017 (together, the Notes), for a total principal amount of \$1 billion. The Notes are redeemable by Intuit at any time, subject to a make-whole premium. We paid \$56 million in cash for interest on the Notes during the nine months ended April 30, 2010 and April 30, 2009. Based on the trading prices of the Notes at April 30, 2010 and July 31, 2009 and the interest rates we could obtain for other borrowings with similar terms at those dates, the estimated fair value of the Notes at those dates was approximately \$1.1 billion and \$1.0 billion.

Other Long-Term Obligations

Other long-term obligations were as follows at the dates indicated:

<i>(In millions)</i>	April 30, 2010	July 31, 2009
Total license fee payable	\$ 74	\$ 71
Total deferred rent	62	64
Long-term deferred revenue	27	20
Long-term income tax liabilities	17	48
Other	3	4
Total long-term obligations	183	207
Less current portion (included in other current liabilities)	(19)	(20)
Long-term obligations due after one year	\$ 164	\$ 187

Table of Contents**9. Income Taxes***Effective Tax Rate*

We compute our provision for or benefit from income taxes by applying the estimated annual effective tax rate to income or loss from recurring operations and other taxable items. Our effective tax rate for the three months ended April 30, 2010 was approximately 34%. In that quarter we recorded discrete tax benefits that were primarily related to foreign tax credit benefits associated with the distribution of profits from our non-U.S. subsidiaries and our plans to indefinitely reinvest substantially all remaining non-U.S. earnings in support of our international expansion plans. Excluding those discrete tax benefits, our effective tax rate for that period was approximately 37%. This differed from the federal statutory rate of 35% primarily due to state income taxes, which were partially offset by the benefit we received from the domestic production activities deduction and federal and state research and experimentation credits. Our effective tax rate for the three months ended April 30, 2009 was approximately 36% and did not differ significantly from the federal statutory rate of 35%. State income taxes were partially offset by the benefit we received from the domestic production activities deduction and federal and state research and experimentation credits. Our effective tax rate for the nine months ended April 30, 2010 was approximately 34%. In that period we recorded discrete tax benefits as described above. Excluding those discrete tax benefits, our effective tax rate for that period was approximately 37%. This differed from the federal statutory rate of 35% primarily due to state income taxes, which were partially offset by the benefit we received from the domestic production activities deduction and federal and state research and experimentation credits. Our effective tax rate for the nine months ended April 30, 2009 was approximately 33%. Excluding discrete tax benefits primarily related to a favorable agreement we entered into with a tax authority with respect to tax years ended prior to fiscal 2009 and the retroactive reinstatement of the federal research and experimentation credit, our effective tax rate for that period was approximately 36% and did not differ significantly from the federal statutory rate of 35%. State income taxes were partially offset by the benefit we received from the domestic production activities deduction and the federal and state research and experimentation credits.

Unrecognized Tax Benefits and Other Considerations

The total amount of our unrecognized tax benefits at July 31, 2009 was \$40 million. Net of related deferred tax assets, unrecognized tax benefits were \$33 million at that date. If we were to recognize these net benefits, our income tax expense would reflect a favorable net impact of \$28 million. The recognition of the balance of these net benefits would result in an increase to stockholders' equity of \$5 million. There were no material changes to these amounts during the three and nine months ended April 30, 2010. We do not believe that it is reasonably possible that there will be a significant increase or decrease in unrecognized tax benefits over the next 12 months.

10. Stockholders' Equity*Stock Repurchase Programs*

Intuit's Board of Directors has authorized a series of common stock repurchase programs. Shares of common stock repurchased under these programs become treasury shares. We repurchased 24.6 million shares for \$750 million under these programs during the nine months ended April 30, 2010 and 7.4 million shares for \$200 million under these programs during the nine months ended April 30, 2009. At April 30, 2010, we had authorization from our Board of Directors to expend up to an additional \$150 million for stock repurchases through November 20, 2012. Repurchased shares of our common stock are held as treasury shares until they are reissued or retired. When we reissue treasury stock, if the proceeds from the sale are more than the average price we paid to acquire the shares we record an increase in additional paid-in capital. Conversely, if the proceeds from the sale are less than the average price we paid to acquire the shares, we record a decrease in additional paid-in capital to the extent of increases previously recorded for similar transactions and a decrease in retained earnings for any remaining amount.

Table of Contents*Stock Option Activity*

A summary of activity under all share-based compensation plans for the nine months ended April 30, 2010 was as follows:

<i>(Shares in thousands)</i>	Shares Available for Grant	Options Outstanding Number of Shares	Weighted Average Exercise Price Per Share
Balance at July 31, 2009	8,086	45,674	\$ 26.00
Additional shares authorized	9,000		
Options assumed and converted in connection with business combinations		372	3.08
Options granted	(1,653)	1,653	30.60
Restricted stock units granted	(1,148)		
Options exercised		(12,984)	23.74
Options canceled or expired (1)	1,906	(2,380)	29.62
Restricted stock units forfeited (1)	1,004		
Balance at April 30, 2010	17,195	32,335	\$ 26.61
Exercisable at April 30, 2010		21,684	\$ 25.74

(1) Stock options and restricted stock units canceled, expired or forfeited under our 2005 Equity Incentive Plan are returned to the pool of shares available for grant. Stock options and restricted stock units canceled, expired or forfeited under older expired plans are not returned to the pool of shares available for

grant.

Restricted Stock Unit Activity

A summary of restricted stock unit activity for the nine months ended April 30, 2010 was as follows:

	Number of Shares	Restricted Stock Units Weighted Average Grant Date Fair Value
<i>(Shares in thousands)</i>		
Nonvested at July 31, 2009	9,398	\$ 27.06
Granted	1,148	30.36
Restricted stock granted in connection with business combinations	231	29.14
Vested	(2,113)	29.34
Forfeited	(1,006)	26.42
Nonvested at April 30, 2010	7,658	\$ 27.08

Table of Contents*Share-Based Compensation Expense*

The following table summarizes the total share-based compensation expense that we recorded for the periods shown.

	Three Months Ended		Nine Months Ended	
	April 30, 2010	April 30, 2009	April 30, 2010	April 30, 2009
<i>(In millions, except per share amounts)</i>

General and administrative	11	11	31	26
Discontinued operations		1	1	3
Total share-based compensation expense	34	37	99	94
Income tax benefit	(12)	(13)	(35)	(33)
Decrease in net income	\$ 22	\$ 24	\$ 64	\$ 61
Decrease in net income per share:				
Basic	\$ 0.07	\$ 0.07	\$ 0.20	\$ 0.19
Diluted	\$ 0.07	\$ 0.07	\$ 0.20	\$ 0.18

At April 30, 2010, there was \$180 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under all equity compensation plans which we expect to recognize as expense in the future. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures. We expect to recognize that cost over a weighted average vesting period of 1.8 years.

11. Litigation

Intuit is subject to certain routine legal proceedings, as well as demands, claims and threatened litigation, that arise in the normal course of our business, including assertions that we may be infringing patents or other intellectual property rights of others. We currently believe that the ultimate amount of liability, if any, for any pending claims of any type (either alone or combined) will not materially affect our financial position, results of operations or cash flows. The ultimate outcome of any litigation is uncertain and, regardless of outcome, litigation can have an adverse impact on Intuit because of defense costs, negative publicity, diversion of management resources and other factors. Our failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect our business.

12. Segment Information

We have defined seven reportable segments based on factors such as how we manage our operations and how our chief operating decision maker views results. We define the chief operating decision maker as our Chief Executive Officer and our Chief Financial Officer. Our chief operating decision maker organizes and manages our business primarily on the basis of product and service offerings.

All of our business segments except Other Businesses operate primarily in the United States and sell primarily to customers in the United States. International total net revenue was less than 5% of consolidated total net revenue for all periods presented.

We include expenses such as corporate selling and marketing, product development, and general and administrative expenses and share-based compensation expenses that are not allocated to specific segments in unallocated corporate

items. Unallocated corporate items also include amortization of purchased intangible assets and acquisition-related charges.

Table of Contents

The accounting policies of our reportable segments are the same as those described in the summary of significant accounting policies in Note 1 to the financial statements in Item 8 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. Except for goodwill and purchased intangible assets, we do not generally track assets by reportable segment and, consequently, we do not disclose total assets by reportable segment.

The following table shows our financial results by reportable segment for the periods indicated. Results for our Other Businesses segment have been adjusted for all periods presented to exclude results for our Intuit Real Estate Solutions business, which became a discontinued operation in the second quarter of fiscal 2010. See Note 6.

13. Subsequent Event*Acquisition of Medfusion, Inc.*

On May 21, 2010 we acquired privately held Medfusion, Inc. for approximately \$91 million in cash. Medfusion is a provider of online patient-to-provider communication services and became part of our Other Businesses segment. We acquired Medfusion to expand our online healthcare offerings in support of our Connected Services strategy.

We will include Medfusion's results of operations in our consolidated results of operations from the date of acquisition. Medfusion's results of operations for periods prior to the date of acquisition were not material when compared with our consolidated results of operations.

Table of Contents

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) includes the following sections:

Executive Overview that discusses at a high level our operating results and some of the trends that affect our business.

Significant changes since our most recent Annual Report on Form 10-K in the Critical Accounting Policies and Estimates that we believe are important to understanding the assumptions and judgments underlying our financial statements.

Results of Operations that includes a more detailed discussion of our revenue and expenses.

Liquidity and Capital Resources which discusses key aspects of our statements of cash flows, changes in our balance sheets, and our financial commitments.

You should note that this MD&A discussion contains forward-looking statements that involve risks and uncertainties. Please see Item 1A in Part II of this Quarterly Report on Form 10-Q for important information to consider when evaluating such statements.

You should read this MD&A in conjunction with the financial statements and related notes in Part I, Item 1 of this report and our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. In July 2009 we acquired PayCycle, Inc. for a total purchase price of approximately \$169 million and in November 2009 we acquired Mint Software Inc. for total consideration of approximately \$170 million. Accordingly, we have included the results of operations for PayCycle and Mint in our consolidated results of operations from their respective dates of acquisition. In January 2010 we sold our Intuit Real Estate Solutions (IRES) business. We have reclassified our financial statements for all periods prior to the sale to reflect IRES as discontinued operations. Unless noted otherwise, the following discussion pertains to our continuing operations.

Executive Overview

This overview provides a high level discussion of our operating results and some of the trends that affect our business. We believe that an understanding of these trends is important in order to understand our financial results for the first nine months of fiscal 2010 as well as our future prospects. This summary is not intended to be exhaustive, nor is it intended to be a substitute for the detailed discussion and analysis provided elsewhere in this Quarterly Report on Form 10-Q.

About Intuit

Intuit is a leading provider of business and financial management solutions for small and medium-sized businesses, consumers, accounting professionals and financial institutions. We organize our portfolio of businesses into four principal categories – Small Business Group, Tax, Financial Institutions and Other Businesses. These categories include seven financial reporting segments.

Small Business Group: This category includes three segments – Financial Management Solutions, Employee Management Solutions, and Payment Solutions.

Our Financial Management Solutions segment includes QuickBooks financial and business management software and services; technical support; financial supplies; and Intuit Websites, providing Web site design and hosting services for small and medium-sized businesses.

Our Employee Management Solutions segment provides payroll products and services for small businesses.

Our Payment Solutions segment provides merchant services for small businesses, including credit and debit card processing, electronic check conversion and automated clearing house services.

Table of Contents

Tax: This category also includes two segments – Consumer Tax and Accounting Professionals.

Our Consumer Tax segment includes TurboTax income tax preparation products and services for consumers and small businesses.

Our Accounting Professionals segment includes ProSeries and Lacerte professional tax products and services.

This segment also includes QuickBooks Premier Accountant Edition and the QuickBooks ProAdvisor Program for accounting professionals.

Financial Institutions: This segment consists primarily of outsourced online services for banks and credit unions provided by our Digital Insight business. It includes our online banking and bill-pay services as well as our Personal FinanceWorks and Small Business FinanceWorks offerings, which provide comprehensive online financial management solutions for consumers and small businesses.

Other Businesses: This segment includes Quicken personal finance products and services; Mint.com online personal finance services; and our business in Canada.

Seasonality and Trends

Our QuickBooks, Consumer Tax and Accounting Professionals businesses are highly seasonal. Revenue from our QuickBooks software products tends to be highest during our second and third fiscal quarters. Sales of income tax preparation products and services are heavily concentrated in the period from November through April. In our Consumer Tax business, a greater proportion of our revenue has been occurring later in this seasonal period due in part to the growth in sales of TurboTax Online, for which revenue is recognized upon printing or electronic filing of a tax return. These seasonal patterns mean that our total net revenue is usually highest during our second quarter ending January 31 and third quarter ending April 30. We typically report losses in our first quarter ending October 31 and fourth quarter ending July 31, when revenue from our tax businesses is minimal while operating expenses continue at relatively consistent levels. We believe the seasonality of our revenue is likely to continue in the future. In our MD&A we often focus on year-to-date results for our seasonal businesses as they are generally more meaningful than quarterly results.

Overview of Financial Results

Total net revenue for the first nine months of fiscal 2010 was \$2.9 billion, an increase of 10% compared with the same period of fiscal 2009. Revenue was higher in all of our business segments. Consumer Tax segment revenue increased \$131 million or 13% due to growth in TurboTax Online units. Operating income increased 16% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Cost of service and other revenue as a percentage of related revenue was slightly lower in the fiscal 2010 period due to unit growth in TurboTax Online. Higher operating expenses included higher expenses for incentive compensation that are directly related to our financial results, the addition of operating expenses for acquired businesses, and changes in the market value of executive deferred compensation plan liabilities. Net income from continuing operations increased 13% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Partially offsetting the increase in operating income, interest expense was higher in the 2010 period. Due to all of the foregoing factors, diluted net income per share from continuing operations of \$1.80 for the first nine months of fiscal 2010 grew 15% compared with the same period of fiscal 2009.

We ended the first nine months of fiscal 2010 with cash, cash equivalents and investments totaling \$1.9 billion, including \$110 million in municipal auction rate securities. We also held \$88 million in municipal auction rate securities that we classified as long-term investments at that date. In the first nine months of fiscal 2010 we generated cash from operations, from the issuance of common stock under employee stock plans, and from the sale of our Intuit Real Estate Solutions business. During the same period we used cash for net purchases of investments, for the repurchase of shares of our common stock under our stock repurchase programs, for the acquisition of Mint, and for capital expenditures. At April 30, 2010, we had authorization from our Board of Directors to expend up to an additional \$150 million for stock repurchases through November 20, 2012.

Table of Contents**Critical Accounting Policies and Estimates**

In preparing our financial statements, we make estimates, assumptions and judgments that can have a significant impact on our net revenue, operating income or loss and net income or loss, as well as on the value of certain assets and liabilities on our balance sheet. We believe that the estimates, assumptions and judgments involved in the accounting policies described in Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009 have the greatest potential impact on our financial statements, so we consider them to be our critical accounting policies and estimates. Except for the changes to our critical accounting policies and estimates discussed below, we believe that there were no significant changes in those critical accounting policies and estimates during the first nine months of fiscal 2010. Senior management has reviewed the development and selection of our critical accounting policies and estimates and their disclosure in this Quarterly Report on Form 10-Q with the Audit and Risk Committee of our Board of Directors.

Fair Value of Nonfinancial Assets and Nonfinancial Liabilities

On August 1, 2009 we adopted the provisions of the authoritative guidance on fair value measurements for nonfinancial assets and nonfinancial liabilities that we do not recognize or disclose at fair value on a recurring basis (at least annually). These include reporting units measured at fair value in a goodwill impairment test, other nonfinancial assets or liabilities measured at fair value for impairment testing, and nonfinancial assets acquired and liabilities assumed in a business combination. See Note 1, *Significant Accounting Policies - Fair Value of Nonfinancial Assets and Nonfinancial Liabilities*, in Part I, Item 1 of this Quarterly Report on Form 10-Q for a discussion of this guidance.

We describe the estimates, judgments, and assumptions we make in connection with goodwill and purchased intangible asset impairment assessments under *Goodwill, Purchased Intangible Assets and Other Long-Lived Assets Impairment Assessments* in the Critical Accounting Policies and Estimates section in Item 7 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. The authoritative guidance we adopted on August 1, 2009 generally increases the level of estimates, judgments and assumptions we must make in connection with goodwill and purchased intangible asset impairment assessments, and with estimating the fair value of nonfinancial assets acquired and liabilities assumed in a business combination. In accordance with the new guidance, we define fair value as the price that would be received from the sale of an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Given the nature of nonfinancial assets and liabilities, the change from an entity-specific perspective to a market participant perspective is significant and inherently more complex. For example, if there are no known markets or we do not have access to any markets, we will be required to identify hypothetical market participants and develop a hypothetical market based on the expected assumptions of those market participants. In addition, we consider and use multiple valuation methods, if appropriate. Using multiple valuation methods can yield a range of possible results, which we must evaluate in order to choose the most representative point within the range. Assumptions and estimates about future values can be affected by a variety of internal and external factors. Changes in these factors may require us to revise our estimates and record future impairment charges for goodwill and purchased intangible assets, or retroactively adjust provisional amounts that we have recorded for the fair values of assets and liabilities in connection with business combinations. These charges and adjustments could materially decrease our future operating income and net income and result in lower asset values on our balance sheet.

Goodwill Impairment Assessments

As discussed in our Annual Report on Form 10-K for the fiscal year ended July 31, 2009, in the absence of indicators of impairment we test goodwill for impairment annually during our fourth fiscal quarter. As part of that test, we compare the estimated fair value of each reporting unit to its carrying value. We determine the estimated fair value of each reporting unit based on a weighted combination of income and market approaches. We describe the estimates, judgments and assumptions we make in connection with goodwill impairment assessments under *Goodwill, Purchased Intangible Assets and Other Long-Lived Assets* in Note 1 to the financial statements in Item 8 of that report and *Goodwill, Purchased Intangible Assets and Other Long-Lived Assets Impairment Assessments* in the Critical Accounting Policies and Estimates section in Item 7 of that Form 10-K.

Table of Contents

In the fourth quarter of fiscal 2009 we performed our annual goodwill impairment test. The estimated fair values of all of our reporting units exceeded their carrying values and we concluded that they were not impaired. While we concluded that the estimated fair values of all of our reporting units substantially exceeded their carrying values, the estimated fair value of our Financial Institutions reporting unit exceeded its carrying value of \$1.1 billion by approximately 5%. In the course of estimating the fair value of that reporting unit, we considered the extent to which it was consistently meeting or exceeding internal financial expectations and key business milestones, and the extent to which it was consistently meeting or exceeding the financial performance of similar lines of business within comparable companies. After considering these additional factors, we concluded that it was more likely than not that our Financial Institutions reporting unit would not be impaired in the future. Since that time, there have been no indicators of impairment for this reporting unit.

For all of our reporting units, estimates of fair value can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. The recent global economic downturn has caused significant disruptions in global financial markets and in the banking and financial services industry. Potential events or circumstances that could reasonably be expected to negatively affect the key assumptions we used in estimating the fair value of our Financial Institutions reporting unit include the consolidation or failure of financial institutions, which may result in a smaller market for our products and services and may cause us to lose relationships with key customers, and cost-cutting efforts by financial institutions, which may cause us to lose current or potential customers or achieve less revenue per customer. If the estimated fair value of our Financial Institutions reporting unit declines due to any of these factors, we may be required to record future goodwill impairment charges.

Business Combinations

We describe the estimates, judgments and assumptions we make in connection with our accounting for business combinations under *Business Combinations Purchase Accounting*, in the Critical Accounting Policies and Estimates section in Item 7 of our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. On August 1, 2009 we adopted revised authoritative guidance on accounting for business combinations. See Note 1, *Significant Accounting Policies Business Combinations*, in Part I, Item 1 of this Quarterly Report on Form 10-Q for a discussion of this guidance.

Although the level of estimates, judgments, and assumptions we must make in connection with our accounting for business combinations did not change significantly as a result of adopting this guidance, our accounting for certain aspects of business combinations will now result in charges to expense rather than affect the original purchase price allocation and goodwill. For example, for all of our acquisitions regardless of acquisition date we will record any changes to deferred tax asset valuation allowances and liabilities related to uncertain tax positions in current period income tax expense unless those changes are identified during the one-year measurement period and relate to new information obtained about facts and circumstances that existed as of the acquisition date. In addition, should the initial accounting for a business combination be incomplete by the end of a reporting period that falls within the measurement period, we will report provisional amounts in our financial statements. During the measurement period, we will adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts recognized as of that date. We will apply those measurement period adjustments that we determine to be significant retrospectively to comparative information in our financial statements, including adjustments to depreciation and amortization expense. The new authoritative guidance requires that we account for acquired company restructuring activities that we initiate separately from the business combination rather than as part of the purchase price. It also requires us to charge investment banking, legal and other professional fees that we incur to complete the transaction to expense as we incur them.

As a result of our adoption of this authoritative guidance on accounting for business combinations, we may incur additional income tax expenses, restructuring expenses, and expenses for professional fees incurred to complete acquisitions. We may also be required to retroactively adjust provisional amounts that we have recorded for the fair values of assets and liabilities in connection with those acquisitions. These charges and adjustments could materially decrease our future operating income and net income and result in lower asset values on our balance sheet.

Table of Contents**Results of Operations****Financial Overview**

	Q3		\$ %		YTD		\$ %	
	FY10	FY09	Change	Change	Q3 FY10	Q3 FY09	Change	Change
<i>(Dollars in millions, except per share amounts)</i>

Net income from continuing operations	576	485	91	19%	587	519	68	13%
Diluted net income per share from continuing operations	\$ 1.78	\$ 1.47	\$ 0.31	21%	\$ 1.80	\$ 1.57	\$ 0.23	15%

Current Fiscal Quarter

Total net revenue increased \$190 million or 13% in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009. In our Small Business Group, Financial Management Solutions segment revenue increased 16% due to higher average selling prices in our QuickBooks desktop business and growth in Intuit Websites and QuickBooks Online customers. Employee Management Solutions segment revenue increased 13% due to growth in the customer base that was driven by our July 2009 acquisition of PayCycle. Payment Solutions segment revenue increased 8% due to growth in the merchant customer base and a slight increase in charge volume per merchant. In our Tax businesses, Consumer Tax segment revenue increased 12% due to growth in TurboTax Online units. Accounting Professionals segment revenue increased 15% as we recognized about \$9 million in revenue that we deferred from the second quarter to the third quarter of fiscal 2010 due to changes in our product and service offerings. Financial Institutions segment revenue increased 21% due to growth in bill-pay end users and a new seasonal offering, TurboTax for Online Banking. Other Businesses segment revenue increased 20% due to a favorable currency impact in our Canadian business.

Operating income from continuing operations increased \$123 million or 16% in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009. Total costs and expenses were \$67 million higher in the fiscal 2010 quarter. Total costs and expenses in the third quarter of fiscal 2010 increased about \$27 million due to higher incentive compensation expenses that are directly related to our financial results and about \$12 million due to operating expenses for PayCycle and Mint. See *Cost of Revenue* and *Operating Expenses* later in this Item 2 for more information.

Net income from continuing operations increased \$91 million or 19% in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009 due to the increase in operating income discussed above and discrete tax benefits that lowered our effective tax rate to approximately 34% in the third quarter of fiscal 2010. Our effective tax rate was approximately 36% in the third quarter of fiscal 2009. See *Income Taxes* later in this Item 2 for more information about our effective tax rates for these periods.

Due to all of the foregoing factors, diluted net income per share from continuing operations of \$1.78 in the third quarter of fiscal 2010 increased 21% compared with \$1.47 in the same quarter of fiscal 2009.

Fiscal Year to Date

Total net revenue increased \$266 million or 10% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. In our Small Business Group, Financial Management Solutions segment revenue increased 2% due to strength in Intuit Websites. Employee Management Solutions segment revenue increased 11% due to growth in the customer base that was driven by our July 2009 acquisition of PayCycle. Payment Solutions segment revenue increased 9% due to growth in the merchant customer base, partially offset by lower transaction volume per merchant. In our Tax businesses, Consumer Tax segment revenue increased 13% due to 18% growth in TurboTax Online units. Accounting Professionals segment revenue grew 5% due to price increases. Financial Institutions

Table of Contents

segment revenue increased 13% due to growth in bill-pay end users and transaction volumes; higher FinanceWorks revenue; and a new seasonal offering, TurboTax for Online Banking. Other Businesses segment revenue increased 17% due to higher Quicken revenue and a favorable currency impact in our Canadian business.

Operating income from continuing operations increased \$126 million or 16% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Total costs and expenses were \$140 million higher in the fiscal 2010 period. Total costs and expenses in the first nine months of fiscal 2010 increased about \$21 million due to higher cost of revenue associated with higher revenue; about \$30 million due to higher incentive compensation expenses that are directly related to our financial performance; about \$29 million due to operating expenses for PayCycle and Mint; and a total of about \$15 million for changes in the market value of executive deferred compensation plan liabilities. See *Cost of Revenue* and *Operating Expenses* later in this Item 2 for more information.

Net income from continuing operations increased \$68 million or 13% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Partially offsetting the increase in operating income discussed above, interest expense was \$10 million higher in the fiscal 2010 period due to factors described in *Interest Expense* later in this Item 2.

Due to all of the foregoing factors, diluted net income per share from continuing operations of \$1.80 in the first nine months of fiscal 2010 increased 15% compared with \$1.57 in the same period of fiscal 2009.

Business Segment Results

The information below is organized in accordance with our seven reportable business segments. Results for our Other Businesses segment have been adjusted for all periods presented to exclude results for our Intuit Real Estate Solutions business, which became a discontinued operation in the second quarter of fiscal 2010. See Note 6 to the financial statements in Part 1, Item 1 of this report for more information.

Segment operating income or loss is segment net revenue less segment cost of revenue and operating expenses. See *Executive Overview Seasonality and Trends* earlier in this Item 2 for a description of the seasonality of our business.

Segment expenses do not include certain costs, such as corporate selling and marketing, product development, and general and administrative expenses and share-based compensation expenses, which are not allocated to specific segments. These unallocated costs totaled \$156 million and \$128 million in the third quarter of fiscal 2010 and 2009 and \$455 million and \$370 million in the first nine months of fiscal 2010 and 2009. Unallocated costs increased in the first nine months of fiscal 2010 compared with the same period of fiscal 2009 due to increases in corporate selling and marketing expenses in support of the growth of our businesses.

Segment expenses also do not include amortization of purchased intangible assets and acquisition-related charges. See Note 12 to the financial statements in Part I, Item 1 of this report for reconciliations of total segment operating income or loss to consolidated operating income or loss for each fiscal period presented.

We calculate revenue growth rates and segment operating margin figures using dollars in thousands. Those results may vary from figures calculated using the presented dollars in millions.

Table of Contents*Financial Management Solutions*

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change
Product revenue	\$ 103	\$ 92		\$ 288	\$ 298	
Service and other revenue	61	50		164	146	
Total segment revenue	\$ 164	\$ 142	16%	\$ 452	\$ 444	2%
% of total revenue	10%	10%		16%	17%	
Segment operating income	\$ 44	\$ 22	99%	\$ 106	\$ 89	18%
% of related revenue	27%	16%		23%	20%	

Financial Management Solutions (FMS) product revenue is derived primarily from QuickBooks desktop software products and financial supplies such as paper checks, envelopes, invoices, business cards and business stationery. Financial Management Solutions service and other revenue is derived primarily from QuickBooks Online; QuickBooks support plans; Intuit Websites, which provides Web site design and hosting services for small and medium-sized businesses; and royalties from small business online services.

FMS total net revenue increased \$22 million or 16% in the third quarter of fiscal 2010 compared with the third quarter of fiscal 2009. About half of this increase occurred in our QuickBooks desktop business, where higher average selling prices more than offset a 3% decline in total paid QuickBooks software units. Average selling prices were higher in the fiscal 2010 quarter because we offered fewer promotional discounts compared with the same quarter of fiscal 2009. Intuit Websites and QuickBooks Online customer growth also contributed to higher revenue in the fiscal 2010 quarter. FMS total net revenue increased \$8 million or 2% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009, driven by strength in Intuit Websites.

FMS segment operating income as a percentage of related revenue increased in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Operating income was higher in the fiscal 2010 period due to the increase in revenue described above, partially offset by higher cost of revenue and customer service expenses associated with growth in Intuit Websites. In addition, operating income benefited from decreases of about \$14 million in staffing expenses and about \$8 million in advertising and other marketing program expenses in the fiscal 2010 period.

Employee Management Solutions

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change

Table of Contents

Employee Management Solutions (EMS) product revenue is derived primarily from QuickBooks Payroll, a family of products sold on a subscription basis offering payroll tax tables, payroll reports, federal and state payroll tax forms, and electronic tax payment and filing to small businesses that prepare their own payrolls. EMS service and other revenue is derived from our online payroll services (including the PayCycle service we acquired in fiscal 2009), fees for direct deposit services, and other small business payroll services. Service and other revenue for this segment also includes interest earned on funds held for customers.

EMS total net revenue increased \$12 million or 13% in the third quarter of fiscal 2010 and \$31 million or 11% in the first nine months of fiscal 2010 compared with the same periods of fiscal 2009. Revenue was higher in the fiscal 2010 periods due to a 10% increase in the customer base that was driven by our July 2009 acquisition of PayCycle.

EMS segment operating income as a percentage of related revenue was flat in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009. Higher revenue was offset by higher costs and expenses due to our acquisition of PayCycle.

Payment Solutions

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change

Total segment revenue	\$ 79	\$ 74	8%	\$ 233	\$ 215	9%
% of total revenue	5%	5%		8%	8%	
Segment operating income	\$ 15	\$ 11	44%	\$ 50	\$ 23	121%
% of related revenue	19%	14%		21%	10%	

Payment Solutions service revenue is derived primarily from merchant services for small businesses that include credit card, debit card and gift card processing services; check verification, check guarantee and electronic check conversion, including automated clearing house (ACH) and Check21 capabilities; and Web-based transaction processing services for online merchants. Service and other revenue for this segment also includes interest earned on funds held for customers.

Payment Solutions total net revenue increased \$5 million or 8% in the third quarter of fiscal 2010 and \$18 million or 9% in the first nine months of fiscal 2010 compared with the same periods of fiscal 2009, driven by 16% growth in the merchant customer base. Transaction volume per merchant was up 1% in the third quarter of fiscal 2010, the first increase since the third quarter of fiscal 2008. Transaction volume per merchant declined 3% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009.

Payment Solutions segment operating income as a percentage of related revenue increased in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009. In the first nine months of fiscal 2010, operating income was higher due to the increase in revenue described above and decreases of about \$6 million in facilities expenses and about \$4 million in staffing expenses.

Table of Contents*Consumer Tax*

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change
Product revenue	\$ 178	\$ 158		\$ 268	\$ 252	
Service and other revenue	693	619		841	726	
Total segment revenue	\$ 871	\$ 777	12%	\$ 1,109	\$ 978	13%
% of total revenue	54%	55%		38%	37%	
Segment operating income	\$ 705	\$ 634	11%	\$ 764	\$ 659	16%
% of related revenue	81%	82%		69%	67%	

Consumer Tax product revenue is derived primarily from TurboTax federal and state consumer and small business desktop tax return preparation software. Consumer Tax service and other revenue is derived primarily from TurboTax Online tax return preparation services and electronic tax filing services.

Consumer Tax total net revenue increased \$131 million or 13% in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Total federal TurboTax units were up 11% and TurboTax Online federal units grew 18% in the fiscal 2010 period. Online federal units represented more than 70% of total federal TurboTax units for the 2009 consumer tax season.

Consumer Tax segment operating income as a percentage of related revenue increased in the first nine months of fiscal 2010 compared with the same period of fiscal 2009 because operating expenses increased at a lower rate than revenue in the 2010 period.

Accounting Professionals

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change
Product revenue	\$ 145	\$ 155		\$ 283	\$ 305	
Service and other revenue	60	24		68	28	
Total segment revenue	\$ 205	\$ 179	15%	\$ 351	\$ 333	5%
% of total revenue	13%	13%		12%	12%	
Segment operating income	\$ 167	\$ 140	19%	\$ 229	\$ 206	11%
% of related revenue	81%	78%		65%	62%	

Accounting Professionals product revenue is derived primarily from ProSeries and Lacerte professional tax preparation software products and from QuickBooks Premier Accountant Edition and ProAdvisor Program for professional accountants. Accounting Professionals service and other revenue is derived primarily from electronic tax filing services, bank product transmission services and training services.

Accounting Professionals total net revenue for the first nine months of fiscal 2010 increased \$18 million or 5% compared with the same period of fiscal 2009 due to price increases. Accounting Professionals total net revenue increased 15% in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009. About \$9 million in

Table of Contents

Accounting Professionals revenue shifted from the second quarter of fiscal 2010 to the third quarter of fiscal 2010, primarily due to changes in our product and service offerings.

Accounting Professionals segment operating income as a percentage of related revenue increased in the first nine months of fiscal 2010 compared with the same period of fiscal 2009 due to operating efficiencies achieved in the product development and customer support functions in the fiscal 2010 period.

Financial Institutions

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change
Product revenue	\$	\$		\$	\$	
Service and other revenue	94	78		258	229	
Total segment revenue	\$ 94	\$ 78	21%	\$ 258	\$ 229	13%
% of total revenue	6%	6%		9%	9%	
Segment operating income	\$ 27	\$ 18	50%	\$ 64	\$ 49	31%
% of related revenue	29%	23%		25%	22%	

Financial Institutions service and other revenue is derived primarily from outsourced online banking software products that are hosted in our data centers and delivered as on-demand service offerings to banks and credit unions by our Digital Insight business.

Financial Institutions total net revenue increased \$16 million or 21% in the third quarter of fiscal 2010 and \$29 million or 13% in the first nine months of fiscal 2010 compared with the same periods of fiscal 2009. Revenue growth in the third quarter of fiscal 2010 was driven by an increase in bill pay end users and by a new seasonal offering, TurboTax for Online Banking, which accounted for about 12 points of the revenue growth in that quarter. Revenue growth in the first nine months of fiscal 2010 was driven by a 16% increase in bill-pay end users, higher bill-pay transaction volumes, growth in FinanceWorks revenue and the introduction of TurboTax for Online Banking.

Financial Institutions segment operating income as a percentage of related revenue increased in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009 due to higher revenue partially offset by higher operating expenses.

Other Businesses

<i>(Dollars in millions)</i>	Q3 FY10	Q3 FY09	% Change	YTD Q3 FY10	YTD Q3 FY09	% Change
Product revenue	\$ 69	\$ 60		\$ 147	\$ 132

% of total revenue	6%	5%		7%	7%	
Segment operating income	\$ 38	\$ 38	1%	\$ 63	\$ 61	4%
% of related revenue	42%	50%		30%	34%	

Table of Contents

Other Businesses consist primarily of Quicken, Mint.com and our business in Canada. Quicken product revenue is derived primarily from Quicken desktop software products. Quicken service and other revenue is derived primarily from Quicken Online, fees from consumer online transactions, and Quicken Loans trademark royalties. Mint.com service revenue is derived primarily from lead generation fees. In Canada, product revenue is derived primarily from localized versions of QuickBooks and Quicken as well as consumer desktop tax return preparation software and professional tax preparation products. Service revenue in Canada consists primarily of revenue from payroll services and QuickBooks support plans.

Other Businesses total net revenue increased \$15 million or 20% in the third quarter of fiscal 2010 and \$31 million or 17% in the first nine months of fiscal 2010 compared with the same periods of fiscal 2009. Revenue increased in the third quarter of fiscal 2010 due to a favorable foreign currency impact in our Canadian business. Revenue increased in the first nine months of fiscal 2010 due to 16% higher Quicken revenue that was driven by higher unit sales and a favorable foreign currency impact in our Canadian business. The weaker U.S. dollar accounted for approximately 13 percentage points of Other Businesses segment revenue growth in the third quarter of fiscal 2010 and approximately seven percentage points of Other Businesses segment revenue growth in the first nine months of fiscal 2010 compared with the same periods of fiscal 2009.

Other Businesses segment operating income as a percentage of related revenue decreased in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009. Higher revenue in the fiscal 2010 periods was offset by higher costs and expenses associated with our November 2009 acquisition of Mint and by our continued investment in emerging market opportunities. Canadian costs and expenses were also higher in the 2010 periods due to the weaker U.S. dollar.

Cost of Revenue

<i>(Dollars in millions)</i>	Q3 FY10	% of Related Revenue	Q3 FY09	% of Related Revenue	YTD Q3 FY10	% of Related Revenue	YTD Q3 FY09	% of Related Revenue
Cost of product revenue	\$ 34	6%	\$ 34	6%	\$ 117	10%	\$ 122	10%
Cost of service and other revenue	118	11%	115	13%	341	20%	315	21%
Amortization of purchased intangible assets	5	n/a	15	n/a	43	n/a	44	n/a
Total cost of revenue	\$ 157	10%	\$ 164	12%	\$ 501	17%	\$ 481	18%

Cost of service and other revenue as a percentage of service and other revenue decreased in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009 due to unit growth in TurboTax Online, which has relatively lower costs of revenue compared with our other service offerings.

Amortization of purchased intangible assets decreased in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009 due to the completion of the amortization for certain Digital Insight intangible assets that we acquired in the third quarter of fiscal 2007. Amortization of purchased intangible assets for the first nine months of fiscal 2010 included a \$6 million charge for the write-off of certain purchased technology that we no longer intend to use in our Financial Management Solutions segment, which partially offset this decline.

Table of Contents**Operating Expenses**

<i>(Dollars in millions)</i>	Q3 FY10	% of Total Net Revenue	Q3 FY09	% of Total Net Revenue	YTD Q3 FY10	% of Total Net Revenue	YTD Q3 FY09	% of Total Net Revenue

Acquisition-related charges	10	1%	10	1%	31	1%	33	1%
Total operating expenses	\$ 562	35%	\$ 488	34%	\$ 1,490	51%	\$ 1,370	52%

Current Fiscal Quarter

Total operating expenses as a percentage of total net revenue increased slightly in the third quarter of fiscal 2010 compared with the same quarter of fiscal 2009. Revenue grew \$190 million and total operating expenses increased \$74 million in the fiscal 2010 quarter. Total operating expenses increased about \$27 million due to higher expenses for incentive compensation that are directly related to our financial results and about \$12 million for the operating expenses of acquired businesses.

Fiscal Year to Date

Total operating expenses as a percentage of total net revenue decreased slightly in the first nine months of fiscal 2010 compared with the same period of fiscal 2009. Revenue grew \$266 million and total operating expenses increased \$120 million in the fiscal 2010 period. Total operating expenses increased about \$30 million due to higher expenses for incentive compensation that are directly related to our financial results and about \$29 million for the operating expenses of acquired businesses. In addition, we recorded a charge of about \$6 million for increases in the market value of executive deferred compensation plan liabilities in operating expenses during the first nine months of fiscal 2010 while we recorded a benefit of about \$9 million for declines in the market value of those liabilities during the same period of fiscal 2009. We record increases and decreases in the related executive deferred compensation plan assets in interest and other income, net.

Non-Operating Income and Expenses**Interest Expense**

Interest expense of \$46 million and \$36 million for the first nine months of fiscal 2010 and 2009 consisted primarily of interest on \$1 billion in senior notes that we issued in March 2007. Interest expense was about \$4 million higher in the fiscal 2010 period due to imputed interest on license fees payable for technology that we acquired in May 2009. Interest expense was about \$7 million lower in the fiscal 2009 period due to capitalization of interest during the construction of our Washington data center, which we began occupying in the second half of fiscal 2009.

Table of Contents*Interest and Other Income, Net*

<i>(In millions)</i>	Three Months Ended		Nine Months Ended	
	April	April	April	April 30,
	30,	30,	30,	2009
	2010	2009	2010	2009
Interest income	\$ 2	\$ 4	\$ 7	\$ 17
Net gains (losses) on executive deferred compensation plan assets	3	2	5	(10)
Other				4
Total interest and other income, net	\$ 5	\$ 6	\$ 12	\$ 11

The impact of lower interest rates more than offset the impact of higher average invested balances and resulted in lower interest income in the third quarter and first nine months of fiscal 2010 compared with the same periods of fiscal 2009. In accordance with generally accepted accounting principles, we record gains and losses associated with executive deferred compensation plan assets in interest and other income, net and gains and losses associated with the related liabilities in operating expenses. The amounts recorded in operating expenses generally offset the amounts recorded in interest and other income, net.

Income Taxes

Our effective tax rate for the third quarter of fiscal 2010 was approximately 34%. In that quarter we recorded discrete tax benefits that were primarily related to foreign tax credit benefits associated with the distribution of profits from our non-U.S. subsidiaries and our plans to indefinitely reinvest substantially all remaining non-U.S. earnings in support of our international expansion plans. Excluding those discrete tax benefits, our effective tax rate for that period was approximately 37%. This differed from the federal statutory rate of 35% primarily due to state income taxes, which were partially offset by the benefit we received from the domestic production activities deduction and federal and state research and experimentation credits. Our effective tax rate for the third quarter of fiscal 2009 was approximately 36% and did not differ significantly from the federal statutory rate of 35%. State income taxes were partially offset by the benefit we received from the domestic production activities deduction and the federal and state research and experimentation credits.

Our effective tax rate for the first nine months of fiscal 2010 was approximately 34%. In that period we recorded discrete tax benefits as described above. Excluding those discrete tax benefits, our effective tax rate for that period was approximately 37%. This differed from the federal statutory rate of 35% primarily due to state income taxes, which were partially offset by the benefit we received from the domestic production activities deduction and federal and state research and experimentation credits. Our effective tax rate for the first nine months of fiscal 2009 was approximately 33%. Excluding discrete tax benefits primarily related to a favorable agreement we entered into with a tax authority with respect to tax years ended prior to fiscal 2009 and the retroactive reinstatement of the federal research and experimentation credit, our effective tax rate for that period was approximately 36% and did not differ significantly from the federal statutory rate of 35%. State income taxes were partially offset by the benefit we received from the domestic production activities deduction and the federal and state research and experimentation credits.

Discontinued Operations

On January 15, 2010 we sold our Intuit Real Estate Solutions (IRES) business for approximately \$128 million in cash and recorded a net gain on disposal of approximately \$35 million. IRES was part of our Other Businesses segment. We have accounted for IRES as a discontinued operation and segregated its operating results from continuing operations in our statements of operations for all periods prior to the sale. IRES revenue was \$18 million for the third quarter of fiscal 2009. IRES revenue was \$33 million for the first nine months of fiscal 2010 and \$55 million for the first nine months of fiscal 2009.

Table of Contents**Liquidity and Capital Resources***Overview*

At April 30, 2010, our cash, cash equivalents and investments totaled \$1.9 billion, an increase of \$582 million from July 31, 2009 due to the factors noted under *Statements of Cash Flows* below. Cash, cash equivalents and investments at April 30, 2010 included \$110 million in municipal auction rate securities. At that date we also held \$88 million in municipal auction rate securities that we classified as long-term investments on our balance sheet. See *Auction Rate Securities* below for more information. Our primary source of liquidity has been cash from operations, which entails the collection of accounts receivable for products and services. Our primary uses of cash have been for research and development programs, selling and marketing activities, capital projects, acquisitions of businesses, debt service costs and repurchases of common stock.

In March 2007 we issued five-year and ten-year senior unsecured notes totaling \$1 billion in connection with our acquisition of Digital Insight Corporation. See *Contractual Obligations - Commitments for Senior Unsecured Notes* later in this Item 2 for more information. We also have a \$500 million unsecured revolving line of credit facility that is described later in this Item 2. To date we have not borrowed under the facility.

The following table summarizes selected measures of our liquidity and capital resources at the dates indicated:

<i>(Dollars in millions)</i>	April 30, 2010	July 31, 2009	\$ Change	% Change
Cash, cash equivalents and investments	\$ 1,929	\$ 1,347	\$ 582	43%
Long-term investments	92	97	(5)	(5%)
Long-term debt	998	998		0%
Working capital	1,170	884	286	32%
Ratio of current assets to current liabilities	1.8 : 1	1.8 : 1		

Auction Rate Securities

At April 30, 2010, we held a total of \$198 million in municipal auction rate securities. We estimate the fair values of these securities based on a discounted cash flow model that we prepare. See Note 2 to the financial statements in Part I, Item 1 for more information. Based on the maturities of the underlying securities and the put option described below, we classified \$110 million of these securities as short-term investments and \$88 million of these securities as long-term investments on our balance sheet at that date. All of the municipal auction rate securities we held at April 30, 2010 were rated A or better by the major credit rating agencies and 83% were collateralized by student loans guaranteed by the U.S. Department of Education. These securities are long-term debt instruments that are intended to provide liquidity through a Dutch auction process that resets the applicable interest rate at pre-determined intervals, typically every 35 days. Due to a decrease in liquidity in the global credit markets, in February 2008 auctions began failing for the municipal auction rate securities we held. Regularly scheduled auctions for these securities have generally continued to fail since that time. When these auctions initially failed, higher interest rates for many of the securities went into effect in accordance with the terms of the prospectus for each security. As of April 30, 2010, we had received all interest payments in accordance with the contractual terms of these securities.

On November 4, 2008 we accepted an offer from UBS AG (UBS), one of the broker-dealers for our municipal auction rate securities, that gives us the option to sell UBS a total of \$110 million in municipal auction rate securities at par value at any time during a two-year period beginning June 30, 2010. The offer also gives UBS the discretion to buy any or all of these municipal auction rate securities from us at par value at any time. To date UBS has not purchased any of these securities from us. We currently intend to exercise our option to sell UBS all of these municipal auction rate securities at par value in accordance with the terms of the offer within the next twelve months. We continue to have counter-party risk associated with UBS.

Based on our expected operating cash flows and our other sources of cash, we do not believe that the reduction in liquidity of our municipal auction rate securities will have a material impact on our overall ability to meet our liquidity needs.

Table of Contents*Statements of Cash Flows*

The following table summarizes selected items from our statements of cash flows for the first nine months of fiscal 2010 and 2009. See the financial statements in Part I, Item 1 of this report for complete statements of cash flows for those periods.

	Nine Months Ended		\$	%
	April 30, 2010	April 30, 2009		
<i>(Dollars in millions)</i>				
Net cash provided by (used in):				
Operating activities	\$ 1,149	\$ 878	\$ 271	31%
Investing activities	(966)	25	(991)	(3964%)
Financing activities	(435)	(84)	(351)	418%
Effect of exchange rate changes on cash	3	(10)	13	(130%)
Increase (decrease) in cash and cash equivalents	\$ (249)	\$ 809		

Operating Activities

During the first nine months of fiscal 2010 we generated \$1.1 billion in cash from our operations. This included net income of \$622 million and adjustments for depreciation and amortization of \$198 million and share-based compensation expense of \$99 million. Amortization expense in the first nine months of fiscal 2010 included a charge of \$6 million for the write-off of certain purchased technology that we no longer intend to use in our Financial Management Solutions segment. This charge was offset by lower amortization expense due to the completion of the amortization for certain Digital Insight intangible assets that we acquired in the third quarter of fiscal 2007. Included in income taxes payable at April 30, 2010 is approximately \$250 million in income taxes that we expect to pay during the fourth quarter of fiscal 2010.

During the first nine months of fiscal 2009 we generated \$878 million in cash from our operations. This included net income of \$518 million and adjustments for depreciation and amortization of \$189 million and share-based compensation expense of \$94 million.

Investing Activities

We used \$966 million in cash for investing activities during the first nine months of fiscal 2010. We received a net \$122 million in cash from the sale of our Intuit Real Estate Solutions business. We used \$984 million in cash for net purchases of investments, \$141 million in cash for acquisitions of businesses (primarily Mint Software Inc.) and \$100 million in cash for capital expenditures.

Investing activities generated \$25 million in cash during the first nine months of fiscal 2009. We received \$181 million in cash from net sales of investments, which was partially offset by the use of \$148 million in cash for capital expenditures.

Financing Activities

We used \$435 million in cash for financing activities during the first nine months of fiscal 2010, including \$750 million for the repurchase of common stock under our stock repurchase programs partially offset by the receipt of \$326 million in cash from the issuance of common stock under employee stock plans.

We used \$84 million in cash for financing activities during the first nine months of fiscal 2009, including \$200 million for the repurchase of common stock under our stock repurchase programs partially offset by the receipt of \$126 million in cash from the issuance of common stock under employee stock plans.

Stock Repurchase Programs

Our Board of Directors has authorized a series of common stock repurchase programs. Shares of common stock repurchased under these programs become treasury shares. During the first nine months of fiscal 2010 and 2009 we repurchased 24.6 million and 7.4 million shares of our common stock for \$750 million and \$200 million under these

Table of Contents

programs. At April 30, 2010, we had authorization from our Board of Directors to expend up to an additional \$150 million for stock repurchases through November 20, 2012.

Acquisition of Mint Software Inc.

On November 2, 2009 we acquired Mint Software Inc. for total consideration of approximately \$170 million. Mint is a provider of online personal finance services and became part of our Other Businesses segment.

Disposition of Intuit Real Estate Solutions

On January 15, 2010 we sold our Intuit Real Estate Solutions (IRES) business for approximately \$128 million in cash and recorded a net gain on disposal of approximately \$35 million. IRES was part of our Other Businesses segment and had revenue of approximately \$74 million in fiscal 2009.

Acquisition of Medfusion, Inc.

On May 21, 2010 we acquired privately held Medfusion, Inc. for approximately \$91 million in cash. Medfusion is a provider of online patient-to-provider communication services and became part of our Other Businesses segment.

Unsecured Revolving Credit Facility

On March 22, 2007 we entered into an agreement with certain institutional lenders for a \$500 million unsecured revolving credit facility that will expire on March 22, 2012. Advances under the credit facility will accrue interest at rates that are equal to, at our election, either Citibank's base rate or the London InterBank Offered Rate (LIBOR) plus a margin that ranges from 0.18% to 0.575% based on our senior debt credit ratings. The applicable interest rate will be increased by 0.05% for any period in which the total principal amount of advances and letters of credit under the credit facility exceeds \$250 million. The agreement includes covenants that require us to maintain a ratio of total debt to annual earnings before interest, taxes, depreciation and amortization (EBITDA) of not greater than 3.25 to 1.00 and a ratio of annual EBITDA to interest payable of not less than 3.00 to 1.00. We were in compliance with these covenants at April 30, 2010. We may use amounts borrowed under this credit facility for general corporate purposes or for future acquisitions or expansion of our business. To date we have not borrowed under the credit facility. We monitor counterparty risk associated with the institutional lenders that are providing the credit facility. We currently believe that the credit facility will be available to us should we choose to borrow under it.

Liquidity and Capital Resource Requirements

We evaluate, on an ongoing basis, the merits of acquiring technology or businesses, or establishing strategic relationships with and investing in other companies. We may decide to use cash and cash equivalents, investments, and our revolving line of credit facility to fund such activities in the future.

Based on past performance and current expectations, we believe that our cash and cash equivalents, investments, and cash generated from operations will be sufficient to meet anticipated seasonal working capital needs, capital expenditure requirements, contractual obligations, commitments and other liquidity requirements associated with our operations for at least the next 12 months. As discussed above in this Item 2 under *Liquidity and Capital Resources Auction Rate Securities*, we do not believe that the reduction in the liquidity of our municipal auction rate securities will have a material impact on our overall ability to meet our liquidity needs.

Off-Balance Sheet Arrangements

At April 30, 2010, we did not have any significant off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of Regulation S-K.

Contractual Obligations

We presented our contractual obligations in our Annual Report on Form 10-K for the fiscal year ended July 31, 2009. Except as discussed below, there have been no significant changes in those obligations during the first nine months of fiscal 2010.

Table of Contents

Commitments for Senior Unsecured Notes

On March 12, 2007 we issued \$500 million of 5.40% senior unsecured notes due on March 15, 2012 (the 2012 Notes) and \$500 million of 5.75% senior unsecured notes due on March 15, 2017 (the 2017 Notes) (together, the Notes). The Notes are redeemable by Intuit at any time, subject to a make-whole premium. Interest is payable semiannually on March 15 and September 15. At April 30, 2010, our maximum commitment for interest payments under the Notes was \$255 million.

We monitor the credit markets as part of our ongoing cash management activities. We currently intend to either pay off the 2012 Notes when they become due using operating cash or refinance those notes if the credit markets are favorable at that time.

Recent Accounting Pronouncements

For a description of recent accounting pronouncements and the potential impact of these pronouncements on our financial position, results of operations and cash flows, see Note 1 to the financial statements in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Table of Contents**ITEM 3****QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Investment Risk**

There has been significant deterioration and instability in the financial markets during fiscal 2009 and 2010. This period of extraordinary disruption and readjustment in the financial markets exposes us to additional investment risk. The value and liquidity of the securities in which we invest could deteriorate rapidly and the issuers of these securities could be subject to credit rating downgrades. In light of the current market conditions and these additional risks, we actively monitor market conditions and developments specific to the securities in which we invest. We believe that we take a conservative approach to investing our funds in that we invest only in highly-rated securities and diversify our portfolio of investments. While we believe we take prudent measures to mitigate investment related risks, such risks cannot be fully eliminated because of market circumstances that are outside our control.

Our investments consist of instruments that meet quality standards consistent with our investment policy. This policy specifies that, except for direct obligations of the United States government, securities issued by agencies of the United States government, and money market funds, we diversify our investments by limiting our holdings with any individual issuer. We do not hold derivative financial instruments in our portfolio of investments.

See Note 3 to the financial statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for a summary of the cost and fair value of our investments by type of issue. See Note 2 to the financial statements and *Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources*, in Part I, Item 2 for a description of market events that have affected the liquidity of certain municipal auction rate securities that we held at April 30, 2010.

Interest Rate Risk

Our cash equivalents and investments are subject to market risk due to changes in interest rates. Interest rate movements affect the interest income we earn on cash equivalents and investments and the fair value of those investments. Should the Federal Reserve Target Rate increase by 25 basis points from the level of April 30, 2010, the value of our investments would decrease by approximately \$2 million. Should the Federal Reserve Target Rate increase by 100 basis points from the level of April 30, 2010, the value of our investments would decrease by approximately \$9 million.

We are also exposed to the impact of changes in interest rates as they affect our \$500 million revolving credit facility. Advances under the credit facility accrue interest at rates that are equal to Citibank's base rate or the London InterBank Offered Rate (LIBOR) plus a margin that ranges from 0.18% to 0.575% based on our senior debt credit ratings. Consequently, our interest expense would fluctuate with changes in the general level of these interest rates if we were to borrow any amounts under the credit facility. At April 30, 2010, no amounts were outstanding under the credit facility.

On March 12, 2007 we issued \$500 million of 5.40% senior unsecured notes due on March 15, 2012 and \$500 million of 5.75% senior unsecured notes due on March 15, 2017. We carry these senior notes at face value less unamortized discount on our balance sheets. Since these senior notes bear interest at fixed rates, we have no financial statement risk associated with changes in interest rates. However, the fair value of these notes fluctuates when interest rates change. See Note 2 and Note 8 to the financial statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for more information.

Impact of Foreign Currency Rate Changes

The functional currencies of our international operating subsidiaries are the local currencies. We translate the assets and liabilities of our foreign subsidiaries at the exchange rates in effect on the balance sheet date. We translate their revenue, costs and expenses at the average rates of exchange in effect during the period. We include translation

Table of Contents

gains and losses in the stockholders' equity section of our balance sheets. We include net gains and losses resulting from foreign exchange transactions in interest and other income, net in our statements of operations. Since we translate foreign currencies (primarily Canadian dollars, British pounds, Indian rupees and Singapore dollars) into U.S. dollars for financial reporting purposes, currency fluctuations can have an impact on our financial results. The historical impact of currency fluctuations on our financial results has generally been immaterial. We believe that our exposure to currency exchange fluctuation risk is not significant because our international subsidiaries invoice customers and satisfy their financial obligations almost exclusively in their local currencies. Although the impact of currency fluctuations on our financial results has generally been immaterial in the past and we believe that for the reasons cited above currency fluctuations will not be significant in the future, there can be no guarantee that the impact of currency fluctuations will not be material in the future. As of April 30, 2010, we did not engage in foreign currency hedging activities.

ITEM 4

CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based upon an evaluation of the effectiveness of disclosure controls and procedures, Intuit's Chief Executive Officer (CEO) and Chief Financial Officer (CFO) have concluded that as of the end of the period covered by this Quarterly Report on Form 10-Q our disclosure controls and procedures as defined under Exchange Act Rule 13a-15(e) and 15d-15(e) were effective to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission and is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

During our most recent fiscal quarter, there has not occurred any change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**ITEM 1A
RISK FACTORS**

This Quarterly Report on Form 10-Q contains forward-looking statements. All statements in this report, other than statements that are purely historical, are forward-looking statements. Words such as expect, anticipate, intend, plan, believe, forecast, estimate, seek, and similar expressions also identify forward-looking statements. In this report, forward-looking statements include, without limitation, the following:

our expectations and beliefs regarding future conduct and growth of the business;

the assumptions underlying our Critical Accounting Policies and Estimates, including our estimates regarding product rebate and return reserves; stock volatility and other assumptions used to estimate the fair value of share-based compensation; and expected future amortization of purchased intangible assets;

our belief that the investments we hold are not other-than-temporarily impaired;

our belief that the reduction in liquidity of the municipal auction rate securities we hold will not have a material impact on our overall ability to meet our liquidity needs;

our belief that our exposure to currency exchange fluctuation risk will not be significant in the future;

our expectations regarding future payment or refinancing of the 2012 Notes;

our assessments and estimates that determine our effective tax rate;

our belief that our cash and cash equivalents, investments and cash generated from operations will be sufficient to meet our working capital, capital expenditure and other liquidity requirements for at least the next 12 months;

our beliefs regarding seasonality and other trends for our businesses;

our assessments and beliefs regarding the future outcome of pending legal proceedings and the liability, if any, that Intuit may incur as a result of those proceedings; and

the expected effects of the adoption of new accounting standards.

We caution investors that forward-looking statements are only predictions based on our current expectations about future events and are not guarantees of future performance. We encourage you to read carefully all information provided in this Quarterly Report and in our other filings with the Securities and Exchange Commission before deciding to invest in our stock or to maintain or change your investment. These forward-looking statements are based on information as of the filing date of this Quarterly Report, and we undertake no obligation to publicly revise or update any forward-looking statement for any reason.

Because forward-looking statements involve risks and uncertainties, there are important factors that may cause actual results to differ materially from those contained in the forward-looking statements. These factors include the following:

We face intense competitive pressures that may harm our operating results.

Future revenue growth depends upon our ability to adapt to technological change and successfully introduce new and enhanced products and services.

As our product and service offerings become more complex our revenue streams may become less predictable.

Business interruption or failure of our information technology and communication systems may impair the availability of our products and services, which may damage our reputation and harm our future financial results.

The recent global economic downturn may harm our business and financial condition.

The nature of our products necessitates timely product launches and if we experience significant product quality problems or delays, it may harm our revenue, earnings and reputation.

Our hosting, collection, use and retention of personal customer information create risk that may harm our business.

Our reliance on a limited number of manufacturing and distribution suppliers may harm our business.

Our revenue and earnings are highly seasonal and our quarterly results fluctuate significantly.

If we are unable to develop and maintain critical third party business relationships, the business may be adversely affected.

Because we depend on a small number of larger retailers and distributors, changes in these relationships may harm our business.

Increased government regulation of our businesses may harm our operating results.

Expansion of our operations in international markets exposes us to operational and compliance risks.

Table of Contents

If we encounter problems with our third-party customer service and technical support providers our business and future financial results may be harmed.

We are exposed to risks associated with credit card and payment fraud and with credit card processing.

If we fail to adequately protect our intellectual property rights, competitors may exploit our innovations, which may weaken our competitive position and reduce our revenue and earnings.

Third parties claiming that we infringe their proprietary rights may cause us to incur significant legal expenses and prevent us from selling our products.

We expect copying and misuse of our intellectual property to be a persistent problem which may cause lost revenue and increased expenses.

Our use of third party intellectual property in our products and services may harm our business.

Our acquisition and divestiture activities may disrupt our ongoing business, may involve increased expenses and may present risks not contemplated at the time of the transactions.

We have issued \$1 billion in a debt offering and may incur other debt in the future, which may adversely affect our financial condition and future financial results.

We are subject to risks associated with information disseminated through our services.

If actual product returns exceed returns reserves our future financial results may be harmed.

Acquisition-related costs and impairment charges may cause significant fluctuation in our net income.

Our investments in auction rate securities are subject to risks that may cause losses and affect the liquidity of these investments.

If we fail to process transactions effectively our revenue and earnings may be harmed.

Because competition for our key employees is intense, we may not be able to attract and retain the highly skilled employees we need to support our planned growth.

We are frequently a party to litigation that is costly to defend and consumes the time of our management.

Unanticipated changes in our tax rates may affect our future financial results.

Our business depends on our strong reputation and the value of our brands.

This list does not include all risks that could affect our business, and if these or any other risks or uncertainties materialize, or if our underlying assumptions prove to be inaccurate, actual results could differ materially from past results and from our expected future results.

Our Annual Report on Form 10-K for the fiscal year ended July 31, 2009 lists in more detail various important risk factors facing our business in Part I, Item 1A under the heading *Risk Factors*. Except as set forth below, there have been no material changes from the risk factors disclosed in that section of our Form 10-K. We incorporate that section of the Form 10-K into this filing and encourage you to review that information. We also encourage you to review our other reports filed periodically with the Securities and Exchange Commission for any further information regarding

risks facing our business.

If we are unable to develop and maintain critical third party business relationships, the business may be adversely affected.

Our growth is dependent on the strength of our business relationships with many third party partners and our ability to continue to develop and maintain new and existing relationships. We rely on various business partners, including third party software and service providers, vendors, licensing partners and development partners, among others, in many areas of our business in order to deliver our products and services. In certain instances, these third party relationships are sole source or limited source relationships and can be difficult to replace or substitute depending on the level of integration of the third party's products or services into, or with, our products and services and/or the general availability of such third party's products and services. The failure of these third parties to provide adequate services and technologies or to update their services and technologies, could result in a disruption to our business operations. In addition, if a key business partner becomes insolvent, fails or is acquired, we may lose critical relationships, functionality or services on which we rely to provide certain of our products and services. Alternative arrangements and services may not be available to us on commercially reasonable terms or we may experience business interruptions upon a transition to an alternative partner or vendor.

In our financial institutions business, we also rely on core processors and other third parties to enable our online banking and bill pay services. Consolidation among core processors or between core processors and online banking and bill-pay providers may create larger or vertically-integrated competitors that may have stronger relationships with our current or potential financial institutions clients. If these core processors fail to support any of the

Table of Contents

functionality in our products and services or significantly raise their prices, we may lose customers and our financial results may suffer.

The recent global economic downturn may harm our business and financial condition.

The recent global economic downturn has caused disruptions and extreme volatility in global financial markets and increased rates of default and bankruptcy, and has impacted consumer and small business spending. These macroeconomic developments have affected and may continue to negatively affect our business and financial condition. Potential new customers may not purchase or delay purchase of our products and services, and many of our existing customers may discontinue purchasing or delay upgrades of our existing products and services, thereby negatively impacting our revenues and future financial results. Decreased consumer spending levels may also reduce credit and debit card transaction processing volumes causing reductions in our payments revenue. In addition, weakness in the end-user consumer and small business markets may negatively affect the cash flow of our distributors and resellers who may, in turn, delay paying their obligations to us, which may increase our credit risk exposure and cause delays in our recognition of revenue or future sales to these customers.

Additionally, if macroeconomic or other factors continue to cause banks, credit unions, mortgage lenders and other financial institutions to fail, or result in further cost-cutting efforts or consolidation of these entities, we may lose current or potential customers, achieve less revenue per customer and/or lose valuable relationships with such of these entities that provide critical services to our customers. Any of these events may likely harm our business and our future financial results.

Table of Contents**ITEM 2****UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS****PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

Stock repurchase activity during the three months ended April 30, 2010 was as follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans
February 1, 2010 through February 28, 2010	625,000	\$ 32.24	625,000	\$ 329,848,694
March 1, 2010 through March 31, 2010	2,725,256	\$ 34.22	2,725,256	\$ 236,595,461
April 1, 2010 through April 30, 2010	2,459,064	\$ 35.22	2,459,064	\$ 149,999,095
Total	5,809,320	\$ 34.43	5,809,320	

Notes:

- All shares purchased as part of publicly announced plans during the three months ended April 30, 2010 were purchased under a plan we announced on November 19, 2009 under which we are authorized to repurchase up to \$600 million of our common stock from time to time over a three-year period ending on November 20, 2012.
