Juniata Valley Financial Corp. and Subsidiary

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 Basis of Presentation and Accounting Policies

The financial information includes the accounts of Juniata Valley Financial Corp. (the Corporation) and its wholly owned subsidiary, The Juniata Valley Bank (the Bank). All significant intercompany accounts and transactions have been eliminated.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included. Operating results for the nine-month period ended September 30, 2010, are not necessarily indicative of the results for the year ended December 31, 2010. For further information, refer to the consolidated financial statements and footnotes thereto included in Juniata Valley Financial Corp. s Annual Report on Form 10-K for the year ended December 31, 2009.

The Corporation has evaluated events and transactions occurring subsequent to the balance sheet date of September 30, 2010 for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

NOTE 2 Recent Accounting Pronouncements

ASU 2010-09

The Financial Accounting Standards Board (FASB) has issued Accounting Standards Update (ASU) 2010-09, *Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements*. The amendments in the ASU remove the requirement for a Securities Exchange Commission (SEC) filer to disclose a date through which subsequent events have been evaluated in both issued and revised financial statements. Revised financial statements include financial statements revised as a result of either correction of an error or retrospective application of U.S. GAAP. The FASB also clarified that if the financial statements have been revised, then an entity that is not an SEC filer should disclose both the date that the financial statements were issued or available to be issued and the date the revised financial statements were issued or available to be issued. The FASB believes these amendments remove potential conflicts with the SEC s literature.

In addition, the amendments in the ASU require an entity that is a conduit bond obligor for conduit debt securities that are traded in a public market to evaluate subsequent events through the date of issuance of its financial statements and must disclose such date.

All of the amendments in the ASU were effective upon issuance (February 24, 2010) except for the use of the issued date for conduit debt obligors. That amendment was effective for interim or annual periods ending after June 15, 2010. This guidance did not have an impact on the Corporation s financial position or results of operations.

ASU 2010-13

The FASB issued ASU 2010-13, *Compensation Stock Compensation (Topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades*. The ASU codifies the consensus reached in Emerging Issues Task Force (EITF) Issue No. 09-J. The amendments to the codification clarify that an employee share-based payment award with an exercise price denominated in the currency of a market in which a substantial portion of the entity s equity shares trades should not be considered to contain a condition that is not a market, performance, or service condition. Therefore, an entity would not classify such an award as a liability if it otherwise qualifies as equity.

Table of Contents

The amendments in the ASU are effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010. Earlier adoption is permitted. The amendments are to be applied by recording a cumulative-effect adjustment to beginning retained earnings. The amendments will not have an impact on the Corporation s financial position or results of operations.

ASU 2010-18

ASU 2010-18, *Receivables (Topic 310): Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset,* codifies the consensus reached in EITF Issue No. 09-I, Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset. The amendments to the Codification provide that modifications of loans that are accounted for within a pool under Subtopic 310-30 do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. ASU 2010-18 does not affect the accounting for loans under the scope of Subtopic 310-30 that are not accounted for within pools. Loans accounted for individually under Subtopic 310-30 continue to be subject to the troubled debt restructuring accounting provisions within Subtopic 310-40.

ASU 2010-18 is effective prospectively for modifications of loans accounted for within pools under Subtopic 310-30 occurring in the first interim or annual period ending on or after July 15, 2010. Early application is permitted. Upon initial adoption of ASU 2010-18, an entity may make a one-time election to terminate accounting for loans as a pool under Subtopic 310-30. This election may be applied on a pool-by-pool basis and does not preclude an entity from applying pool accounting to subsequent acquisitions of loans with credit deterioration. The Corporation does not expect that the adoption of this standard will have a significant impact on the Corporation s financial condition or results of operations.

ASU 2010-20

ASU 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, will help investors assess the credit risk of a company s receivables portfolio and the adequacy of its allowance for credit losses held against the portfolios by expanding credit risk disclosures.

This ASU requires more information about the credit quality of financing receivables in the disclosures to financial statements, such as aging information and credit quality indicators. Both new and existing disclosures must be disaggregated by portfolio segment or class. The disaggregation of information is based on how a company develops its allowance for credit losses and how it manages its credit exposure.

The amendments in this Update apply to all public and nonpublic entities with financing receivables. Financing receivables include loans and trade accounts receivable. However, short-term trade accounts receivable, receivables measured at fair value or lower of cost or fair value, and debt securities are exempt from these disclosure amendments.

The effective date of ASU 2010-20 differs for public and nonpublic companies. For public companies, the amendments that require disclosures as of the end of a reporting period are effective for periods ending on or after December 15, 2010. The amendments that require disclosures about activity that occurs during a reporting period are effective for periods beginning on or after December 15, 2010. The Corporation does not expect that the adoption of this standard will have a significant impact on the Corporation s financial condition or results of operations.

NOTE 3 Comprehensive Income

U.S. GAAP requires that recognized revenue, expenses, gains, and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities and the liability associated with defined benefit plans, are reported as a separate component of the equity section of the consolidated statements of financial condition, such items, along with net income, are components of comprehensive income.

The components of comprehensive income and related tax effects are as follows (in thousands):

	Three Months Ended September 30, 2010			Three Months Ended September 30, 2009		
	Before Tax Amount	Tax Expense or (Benefit)	Net-of-Tax Amount	Before Tax Amount	Tax Expense or (Benefit)	Net-of-Tax Amount
Net income	$ 1,727	$ 442	$ 1,285	$ 1,718	$ 430	$ 1,288
Other comprehensive income:						
Unrealized gains (losses) on available for sale securities:						
Unrealized gains (losses) arising during the period	(25)	(9)	(16)	506	172	334
Unrealized gains (losses) from unconsolidated subsidiary	1		1	(12)		(12)
Less reclassification adjustment for:						
gains included in net income	(4)	(1)	(3)			
securities impairment charge	40	14	26			
Change in pension liability	32	11	21	(7)	(2)	(5)
Other comprehensive income	44	15	29	487	170	317
Total comprehensive income	$ 1,771	$ 457	$ 1,314	$ 2,205	$ 600	$ 1,605

	Nine Months Ended September 30, 2010			Nine Months Ended September 30, 2009		
	Before Tax Amount	Tax Expense or (Benefit)	Net-of-Tax Amount	Before Tax Amount	Tax Expense or (Benefit)	Net-of-Tax Amount
Net income	$ 4,808	$ 1,197	$ 3,611	$ 5,221	$ 1,358	$ 3,863
Other comprehensive income:						

Unrealized gains (losses) on available for sale securities:						
Unrealized gains arising during the period	239	81	158	236	80	156
Unrealized gains (losses) from unconsolidated subsidiary	14		14	(5)		(5)
Less reclassification adjustment for:						
gains included in net income	(31)	(11)	(20)			
securities impairment charge	40	14	26	226	77	149
Change in pension liability	96	33	63			
Other comprehensive income	358	117	241	457	157	300
Total comprehensive income	$ 5,166	$ 1,314	$ 3,852	$ 5,678	$ 1,515	$ 4,163

Components of accumulated other comprehensive loss, net of tax consist of the following (in thousands):

	9/30/2010	12/31/2009
Unrealized gains on available for sale securities	$ 954	$ 776
Unrecognized expense for defined benefit pension	(1,518)	(1,581)
Accumulated other comprehensive loss	$ (564)	$ (805)

Total weighted-average common shares and equivalents		4,311		4,345
Diluted earnings per share	$	0.84	$	0.89

NOTE 5 Commitments, Contingent Liabilities and Guarantees

In the ordinary course of business, the Corporation makes commitments to extend credit to its customers through letters of credit, loan commitments and lines of credit. At September 30, 2010, the Corporation had $21,185,000 outstanding in loan commitments and other unused lines of credit extended to its customers as compared to $46,589,000 at December 31, 2009.

The Corporation does not issue any guarantees that would require liability recognition or disclosure, other than its letters of credit. Letters of credit are conditional commitments issued by the Corporation to guarantee the performance of a customer to a third party. Generally, all letters of credit have expiration dates within one year of issuance. The credit risk involved in issuing letters of credit is essentially the same as the risks that are involved in extending loan facilities to customers. The Corporation generally holds collateral and/or personal guarantees supporting these commitments. The Corporation had outstanding $968,000 and $974,000 of letters of credit commitments as of September 30, 2010 and December 31, 2009, respectively. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The current amount of the liability as of September 30, 2010 for payments under letters of credit issued was not material. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk.

Table of Contents

NOTE 6 Defined Benefit Retirement Plan

The Corporation had a defined benefit retirement plan covering substantially all of its employees, prior to January 1, 2008. Effective January 1, 2008, the plan was amended to close the plan to new entrants. The benefits under the plan are based on years of service and the employees compensation. The Corporation s funding policy is to contribute annually the maximum amount that can be deducted for federal income taxes purposes. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future. The Corporation has made no contributions in the first nine months of 2010 and does not expect to contribute to the defined benefit plan in the remainder of 2010. Pension expense included the following components for the three and nine month periods ended September 30, 2010 and 2009:

(Dollars in thousands)

	Three Months Ended September 30,		Year-to-Date Through September 30,	
	2010	**2009**	**2010**	**2009**
Components of net periodic pension cost				
Service cost	$ 47	$ 47	$ 140	$ 141
Interest cost	118	112	354	336
Expected return on plan assets	(144)	(116)	(431)	(346)
Additional recognized amounts	32	40	96	120
Net periodic pension cost	$ 53	$ 83	$ 159	$ 251

NOTE 7 Acquisition

In 2006, the Corporation acquired a branch office in Richfield, PA. The acquisition included real estate, deposits and loans. The assets and liabilities of the acquired business were recorded on the consolidated statement of financial condition at their estimated fair values as of September 8, 2006, and their results of operations have been included in the consolidated statements of income since such date.

Included in the purchase price of the branch was goodwill and core deposit intangible of $2,046,000 and $449,000, respectively. The core deposit intangible is being amortized over a ten-year period on a straight line basis. During the first nine months of 2010 and 2009, amortization expense was $34,000. Accumulated amortization of core deposit intangible through September 30, 2010 was $184,000. The goodwill is not amortized, but is measured annually for impairment.

NOTE 8 Investment in Unconsolidated Subsidiary

The Corporation owns 39.16% of the outstanding common stock of The First National Bank of Liverpool (FNBL), Liverpool, PA. This investment is accounted for under the equity method of accounting. The investment is being carried at $3,503,000 as of September 30, 2010. The Corporation increases its investment in FNBL for its share of earnings and decreases its investment by any dividends received from FNBL. A loss in value of the investment which is other than a temporary decline will be recognized. Evidence of a loss in value might include, but would not necessarily be limited to, absence of an ability to recover the carrying amount of the investment or inability of FNBL to sustain an earnings capacity which would justify the carrying amount of the investment.

NOTE 9 Securities

Accounting Standards Codification (ASC) Topic 320, *Investments Debt and Equity Securities*, clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time

sufficient to allow for an anticipated recovery in fair value to avoid recognizing an other-than-temporary impairment. This change does not affect the need to forecast recovery of the value of the security through either cash flows or market price.

Table of Contents

In instances when a determination is made that an other-than-temporary impairment exists but the investor does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, this guidance changes the presentation and amount of the other-than-temporary impairment recognized in the income statement. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income.

The amortized cost and fair value of securities as of September 30, 2010 and December 31, 2009, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities because the securities may be called or prepaid with or without prepayment penalties.

	September 30, 2010			
Securities Available for Sale Type and maturity	Amortized Cost	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
U.S. Treasury securities and obligations of U.S. Government agencies and corporations				
After one year but within five years	$ 33,139	$ 33,612	$ 473	$

Table of Contents

The following table shows gross unrealized losses and fair value, aggregated by category and length of time that individual securities have been in a continuous unrealized loss position, at September 30, 2010 and December 31, 2009 (in thousands):

	Unrealized Losses at September 30, 2010					
	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of state and political subdivisions	$ 5,251	$ (45)	$ 880	$ (5)	$ 6,131	$ (50)
Debt securities	5,251	(45)	880	(5)	6,131	(50)
Equity securities	370	(67)	245	(100)	615	(167)
Total temporarily impaired securities	$ 5,621	$ (112)	$ 1,125	$ (105)	$ 6,746	$ (217)

	Unrealized Losses at December 31, 2009					
	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury securities and obligations of U.S. Government agencies and corporations	$ 10,897	$ (84)	$	$	$ 10,897	$ (84)
Obligations of state and political subdivisions	2,532	(8)			2,532	(8)
Debt securities	13,429	(92)			13,429	(92)
Equity securities	140	(23)	496	(145)	636	(168)
Total temporarily impaired securities	$ 13,569	$ (115)	$ 496	$ (145)	$ 14,065	$ (260)

The unrealized losses noted above are considered to be temporary impairments. Decline in the value of our debt securities is due only to interest rate fluctuations, rather than erosion of quality. As a result, we believe that the payment of contractual cash flows, including principal repayment, is not at risk. As management does not intend to sell the securities, does not believe the Corporation will be required to sell the securities before recovery and expects to recover the entire amortized cost basis, none of the debt securities are deemed to be other-than-temporarily impaired. There are two debt securities that have had unrealized losses for more than 12 months.

Equity securities owned by the Corporation consist of common stock of various financial services providers (Bank Stocks) that have traditionally been high-performing stocks prior to 2008. During 2008 and into 2009, market values of most of the Bank Stocks materially declined. Considerations used to determine other-than-temporary impairment (OTTI) status for individual holdings include the length of time the stock has remained in an unrealized loss position,

the percentage of unrealized loss compared to the carrying cost of the stock, dividend reduction or suspension, market analyst reviews and expectations, and other pertinent developments that would affect expectations for recovery or further decline. There were seven equity securities that comprise a group of securities with unrealized losses for 12 months or more at September 30, 2010 and December 31, 2009 prior to an analysis for OTTI. In the aggregate, the unrealized loss on this group of securities increased very slightly from period to period; however, some individual securities within this group declined in value more than others. Of the two securities in the group that experienced the greatest decline in value, one has declined to 76% of cost and continues to pay full dividends. The other has sustained unrealized losses in excess of 50%, with no prospects or signs of improvement. Therefore, based on the quarterly analysis performed as of September 30, 2010 to assess impairment of the investment portfolio, management has determined that the unrealized loss in this one investment is other than temporary and recorded a charge to earnings of $40,000.

We understand that stocks can be cyclical and will experience some down periods. Historically, bank stocks have sustained cyclical losses, followed by periods of substantial gains. When market values of the bank stocks recover, accounting standards do not allow reversal of any previous other-than-temporary impairment charge until the security is sold, at which time any proceeds above the carrying value will be recognized as gains on the sale of investment securities.

Certain obligations of the U.S. Government and state and political subdivisions are pledged to secure public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law. The fair value of the pledged assets amounted to $30,863,000 and $30,403,000 at September 30, 2010 and December 31, 2009, respectively.

In addition to cash received from the scheduled maturities of securities, some investment securities available for sale are sold at current market values during the course of normal operations and some securities are called pursuant to call features built into the bonds. Following is a summary of proceeds received from all investment securities transactions, and the resulting realized gains and losses (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Gross proceeds from sales of securities	$	$	$	$
Securities available for sale:				
Gross realized gains from called securities	$ 4	$	$ 31	$
Gross realized losses				

NOTE 10 Fair Value Measurements

ASC Topic 820, *Fair Value Measurements and Disclosures*, is effective January 1, 2008, for financial assets and financial liabilities and on January 1, 2009, for non-financial assets and non-financial liabilities. This guidance defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and expands disclosures about fair value measurements.

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. Additional guidance is provided on determining when the volume and level of activity for the asset or liability has significantly decreased. The guidance also includes guidance on identifying circumstances when a transaction may not be considered orderly.

Fair value measurement and disclosure guidance provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed, and significant adjustments to the related prices may be necessary to estimate fair value in accordance with fair value measurement and disclosure guidance.

This guidance clarifies that, when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The guidance provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not to be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets

and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

Fair value measurement and disclosure guidance requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, the guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, the Corporation s creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Corporation s valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Corporation s valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Securities Available for Sale. Debt securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Corporation obtains fair value measurement from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things. Equity securities classified as available for sale are reported at fair value using Level 1 inputs.

Table of Contents

Impaired Loans. Certain impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Other Real Estate Owned. Assets included in other real estate owned are reported at fair value on a non-recurring basis. Values are estimated using Level 3 inputs, based on appraisals that consider the sales prices of similar properties in the proximate vicinity.

The following table summarizes financial assets and financial liabilities measured at fair value as of September 30, 2010 and December 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands). There were no transfers of assets between fair value Level 1 and Level 2 for the quarter ended September 30, 2010.

	September 30, 2010	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Other Unobservable Inputs
Measured at fair value on a recurring basis:				
Equity securities available-for-sale	$ 835	$ 835	$	$
Debt securities available-for-sale	78,065		78,065	
Measured at fair value on a non-recurring basis:				
Impaired loans	1,568			1,568
Other real estate owned	494			494

	December 31, 2009	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Other Unobservable Inputs
Measured at fair value on a recurring basis:				
Equity securities available-for-sale	$ 865	$ 865	$	$
Debt securities available-for-sale	76,491		76,491	
Measured at fair value on a non-recurring basis:				
Impaired loans	1,167			1,167
Other real estate owned	476			476

Certain non-financial assets and non-financial liabilities measured at fair value on a recurring basis include reporting units measured at fair value in the first step of a goodwill impairment test. Certain non-financial assets measured at fair value on a non-recurring basis include non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, as well as intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment. As stated above, this guidance was applicable to these fair value measurements beginning January 1, 2009 and were not significant at September 30, 2010.

Table of Contents

Fair Value of Financial Instruments

ASC Topic 825, *Financial Instruments*, requires disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements.

The estimated fair values of the Corporation s financial instruments are as follows (in thousands):

Financial Instruments
(in thousands)

	September 30, 2010		December 31, 2009	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
Cash and due from banks	$ 10,178	$ 10,178	$ 18,613	$ 18,613
Interest bearing deposits with banks	355	355	82	82
Federal funds sold	5,000	5,000	1,200	1,200
Interest bearing time deposits with banks	1,345	1,341	1,420	1,447
Securities	78,900	78,900	77,356	77,356
Restricted investment in FHLB stock	2,197	2,197	2,197	2,197
Total loans, net of unearned interest	304,260	321,788	311,630	324,061
Accrued interest receivable	1,897	1,897	2,284	2,284
Financial liabilities:				
Non-interest bearing deposits	53,886	53,886	55,030	55,030
Interest bearing deposits	318,662	325,510	322,367	327,724
Securities sold under agreements to repurchase	2,875	2,875	3,207	3,207
Long-term debt			5,000	5,077
Other interest bearing liabilities	1,178	1,180	1,146	1,148
Accrued interest payable	588	588	681	681
Off-balance sheet financial instruments:				
Commitments to extend credit				
Letters of credit				

Management uses its best judgment in estimating the fair value of the Corporation s financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in sales transactions on the dates indicated. The estimated fair value amounts have been measured as of their respective quarter ends and have not been re-evaluated or updated for purposes of these consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each quarter end.

The information presented above should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is provided only for a limited portion of the Corporation s assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation s disclosures and those of other companies may not be meaningful.

The following describes the estimated fair value of the Corporation s financial instruments as well as the significant methods and assumptions used to determine these estimated fair values.

Carrying values approximate fair value for cash and due from banks, interest-bearing demand deposits with other banks, federal funds sold, restricted stock in the Federal Home Loan Bank, interest receivable, non-interest bearing demand deposits, securities sold under agreements to repurchase, and interest payable.

17

Interest bearing time deposits with banks The estimated fair value is determined by discounting the contractual future cash flows, using the rates currently offered for deposits of similar remaining maturities.

Securities Available for Sale Debt securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Corporation obtains fair value measurement from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things. Equity securities classified as available for sale are reported at fair value using Level 1 inputs.

Loans For variable-rate loans that reprice frequently and which entail no significant changes in credit risk, carrying values approximated fair value. Substantially all commercial loans and real estate mortgages are variable rate loans. The fair value of other loans (i.e. consumer loans and fixed-rate real estate mortgages) are estimated by calculating the present value of the cash flow difference between the current rate and the market rate, for the average maturity, discounted quarterly at the market rate.

Impaired Loans Certain impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Fixed rate time deposits The estimated fair value is determined by discounting the contractual future cash flows, using the rates currently offered for deposits of similar remaining maturities.

Long-term debt and other interest bearing liabilities The fair values of long-term debt and other interest bearing liabilities are estimated using discounted cash flow analysis, based on incremental borrowing rates for similar types of borrowing arrangements.

Commitments to extend credit and letters of credit The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account market interest rates, the remaining terms and present credit worthiness of the counterparties. The fair value of guarantees and letters of credit is based on fees currently charged for similar agreements.

NOTE 11 Subsequent Events

On October 19, 2010, the Board of Directors declared a regular cash dividend for the fourth quarter of 2010 of $0.21 per share to shareholders of record on November 15, 2010, payable on December 1, 2010.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements:

The Private Securities Litigation Reform Act of 1995 contains safe harbor provisions regarding forward-looking statements. When used in this discussion, the words believes, anticipates, contemplates, expects, and sim expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties which could cause actual results, performance or achievements expressed or implied by such forward-looking statements to differ materially from those projected. Those risks and uncertainties include changes in interest rates and their impact on the level of deposits, loan demand and value of loan collateral, changes in the market value of the securities portfolio, increased competition from other financial institutions, governmental monetary policy, legislation and changes in banking regulations, changes in levels of FDIC deposit insurance premiums and assessments, risks associated with the effect of opening a new branch, the ability to control costs and expenses, and general economic conditions. The Corporation undertakes no obligation to update such forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Critical Accounting Policies:

Disclosure of the Corporation s significant accounting policies is included in the notes to the consolidated financial statements of the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009. Some of these policies require significant judgments, estimates, and assumptions to be made by management, most particularly in connection with determining the provision for loan losses and the appropriate level of the allowance for loan losses, as well as management s evaluation of the investment portfolio for other-than-temporary impairment.

General:

The following discussion relates to the consolidated financial condition of the Corporation as of September 30, 2010, as compared to December 31, 2009, and the consolidated results of operations for the three and nine months ended September 30, 2010, compared to the same periods in 2009. This discussion should be read in conjunction with the interim consolidated financial statements and related footnotes included herein.

Introduction:

Juniata Valley Financial Corp. is a Pennsylvania corporation organized in 1983 to become the holding company of The Juniata Valley Bank. The Bank is a state-chartered bank headquartered in Mifflintown, Pennsylvania. Juniata Valley Financial Corp. and its subsidiary bank derive substantially all of their income from banking and bank-related services, including interest earned on residential real estate, commercial mortgage, commercial and consumer loans, interest earned on investment securities and fee income from deposit services and other financial services to its customers through 12 locations in central Pennsylvania. Juniata Valley Financial Corp. also owns 39.16% of the First National Bank of Liverpool (Liverpool), located in Liverpool, Pennsylvania. The Corporation accounts for Liverpool as an unconsolidated subsidiary using the equity method of accounting.

Financial Condition:

As of September 30, 2010, total assets decreased by $10,120,000, or 2.3%, as compared to December 31, 2009. The repayment of $5 million of long-term debt in September 2010 was responsible for half of the decrease in total assets since the previous year end. Additionally, deposits decreased by $4.8 million, with interest-bearing deposits decreasing by $3.7 million, and non-interest bearing deposits decreasing by $1.1 million.

The table below shows changes in deposit volumes by type of deposit (in thousands of dollars) between December 31, 2009 and September 30, 2010.

	September 30, 2010	December 31, 2009	Change $	%
Deposits:				
Demand, non-interest bearing	$ 53,886	$ 55,030	$ (1,144)	(2.1%)
NOW and money market	78,452	75,766	2,686	3.5%
Savings	47,631	42,536	5,095	12.0%
Time deposits, $100,000 and more	37,020	38,453	(1,433)	(3.7%)
Other time deposits	155,559	165,612	(10,053)	(6.1%)
Total deposits	$ 372,548	$ 377,397	$ (4,849)	(1.3%)

Overall, loans, net of unearned interest decreased by $7.4 million, between December 31, 2009 and September 30, 2010. As shown in the table below (in thousands of dollars), the net decrease in outstanding loans since December 31, 2009 resulted primarily from decreases in real estate construction and home equity loans, partially offset by an increase in real estate mortgage and commercial loans.

	September 30, 2010	December 31, 2009	Change $	%
Loans:				
Commercial, financial and agricultural	$ 35,203	$ 33,783	$ 1,420	4.2%
Real estate commercial	42,533	39,299	3,234	8.2%
Real estate construction	10,777	24,578	(13,801)	(56.2%)
Real estate mortgage	144,969	135,854	9,115	6.7%
Home equity	48,169	52,893	(4,724)	(8.9%)
Obligations of states and political subdivisions	12,910	13,553	(643)	(4.7%)
Personal	9,699	11,670	(1,971)	(16.9%)
Total loans	$ 304,260	$ 311,630	$ (7,370)	(2.4%)

A summary of the transactions in the allowance for loan losses for each of the nine months ended September 30, 2010 and 2009 (in thousands) are presented below.

	Periods Ended September 30, 2010	2009
Balance of allowance January 1	$ 2,719	$ 2,610
Loans charged off	(556)	(391)
Recoveries of loans previously charged off	11	9
Net charge-offs	(545)	(382)
Provision for loan losses	637	377

Balance of allowance end of period	$	2,811	$	2,605
Ratio of net charge-offs during period to average loans outstanding		0.18%		0.12%

As of September 30, 2010, the Corporation has evaluated large commercial loan relationships and other significant loans for impairment. Of the loans that were evaluated, there is one loan relationship, on which a determination has been made that it is probable that principal and interest will not be collected in full. This loan relationship has an aggregate outstanding balance of $2,138,000. The amount of impairment estimated for these collateral-dependent loans included in the loan relationship is $570,000. Specific allocations totaling $570,000 have been included within the loan loss reserve for these loans, adjusting the carrying value of these loans to the fair value of $1,568,000. Other loans evaluated for impairment have an aggregate outstanding balance of $4,785,000, but it has been determined that there is sufficient collateral to expect full repayment, and no impairment charge has been recorded. Management believes that the specific reserve is adequate to cover potential future losses related to these relationships. Otherwise, there are no material loans classified for regulatory purposes as loss, doubtful, substandard, or special mention which management expects to significantly impact future operating results, liquidity or capital resources. Following is a summary of the Bank s non-performing loans on September 30, 2010 as compared to December 31, 2009.

(Dollar amounts in thousands)	September 30, 2010	December 31, 2009
Non-performing loans		
Nonaccrual loans	$ 5,650	$ 2,629
Accruing loans past due 90 days or more	682	1,369
Restructured loans		
Total	$ 6,332	$ 3,998
Average loans outstanding	$ 309,257	$ 310,813
Ratio of non-performing loans to average loans outstanding	2.05%	1.29%

Stockholders equity increased by $151,000, or 0.3%, from December 31, 2009 to September 30, 2010. Net income of $3,611,000 increased stockholders equity, while dividends paid of $2,627,000 and cash used to purchase Corporation stock into treasury of $1,171,000 reduced the Corporation s capital position, while stock re-issued from treasury for stock option and stock purchase plans added $61,000 to equity. The Corporation repurchased stock into treasury pursuant to its stock repurchase program. During the first nine months of 2010, the Corporation purchased 66,400 shares. Securities available for sale increased in market value, representing an increase to equity of $178,000, net of taxes while accounting for stock-based compensation activity increased equity by $36,000. An adjustment of $63,000 was made to equity to record the amortization of net periodic pension costs of the Corporation s defined benefit retirement plan.

Management is not aware of any current recommendations of applicable regulatory authorities that, if implemented, would have a material effect on the Corporation s liquidity, capital resources, or operations.

Subsequent to September 30, 2010, the following events took place:

On October 19, 2010, the Board of Directors declared a regular cash dividend for the fourth quarter of 2010 of $0.21 per share to shareholders of record on November 15, 2010, payable on December 1, 2010.

Comparison of the Three Months Ended September 30, 2010 and 2009

Operations Overview:

Net income for the third quarter of 2010 was $1,285,000, a decrease of $3,000, or 0.2%, compared to the third quarter of 2009. Basic and diluted earnings per share were $0.30 in both periods. Annualized return on average equity for the third quarter in 2010 was 10.15%, compared to the ratio for the same period in the prior year of 10.39%. For the quarter ended September 30, annualized return on average assets was 1.16% in 2010, versus 1.17% in 2009.

Presented below are selected key ratios for the two periods:

	Three Months Ended September 30,	
	2010	2009
Return on average assets (annualized)	1.16%	1.17%
Return on average equity (annualized)	10.15%	10.39%
Average equity to average assets	11.48%	11.24%
Non-interest income, excluding securities gains and impairment charges, as a percentage of average assets (annualized)	0.88%	0.86%
Non-interest expense as a percentage of average assets (annualized)	2.86%	2.72%

The discussion that follows explains changes in the components of net income when comparing the third quarter of 2010 with the third quarter of 2009.

Net Interest Income:

Net interest income was $4,019,000 for the third quarter of 2010, as compared to $3,935,000 in the same quarter in 2009. Average earning assets grew by 0.6%, while the net interest margin on a fully tax equivalent basis decreased by 11 basis points.

Interest on loans decreased $302,000, or 5.9%, in the third quarter of 2010 as compared to the same period in 2009. An average weighted interest rate decrease of 47 basis points lowered interest income by approximately $218,000, with the remaining decrease attributable to a lower volume of loans.

Interest earned on investment securities and money market investments decreased $106,000 in the third quarter of 2010 as compared to 2009, with average balances increasing $7.4 million during the period. The yield on money market investments (federal funds and interest bearing deposits) decreased by 86 basis points in the third quarter of 2010 as compared to the third quarter of 2009, due to the reduction in interest bearing balances with other financial institutions. Likewise, the overall pre-tax yield on the investment securities portfolio decreased during that same timeframe by 44 basis points.

Average interest-bearing deposits and securities sold under agreements to repurchase decreased by $247,000, while average non-interest bearing deposits grew by $6,039,000. This change in the mix of deposits, in addition to the lower general rate environment, contributed to the reduction in the cost to fund earning assets, which was reduced by 49 basis points, to 1.30%, in the third quarter of 2010.

Total average earning assets during the third quarter of 2010 were $403,394,000, compared to $401,104,000 during the third quarter of 2009, yielding 5.13% in 2010 versus 5.71% in 2009. Funding costs for the earning assets were 1.30% and 1.79% for the third quarters of 2010 and 2009, respectively. Net interest margin on a fully tax-equivalent basis for the third quarter of 2010 was 4.01%. For the same period in 2009, the fully-tax equivalent net interest margin was 4.12%.

Provision for Loan Losses:

In the third quarter of 2010, the provision for loan losses was $70,000, as compared to a provision of $165,000 in the third quarter of 2009. Management regularly reviews the adequacy of the loan loss reserve and makes assessments as to specific loan impairment, historical charge-off expectations, general economic conditions in the Bank s market area, specific loan quality and other factors. The decreased provision was primarily the result of analysis of the values of collateral securing non-performing and impaired loans as well as the reduction in overall outstanding loan balances.

Non-interest Income:

Non-interest income in the third quarter of 2010 was $936,000, compared to $952,000 in the third quarter of 2009, a decrease of $16,000.

Trust fee income was $7,000, or 8.4% higher in the third quarter of 2010 as compared to the third quarter of 2009, and commissions from sales of non-deposit products in the third quarter of 2010 were 21.2%, or $14,000, higher than in the same quarter of the previous year.

Customer service fees were $102,000, or 23.3%, lower in the third quarter of 2010 versus the third quarter of 2009, primarily as a result of reductions in fees collected on overdrawn deposit accounts. On July 1, 2010, a regulation change resulted in a modification to the conditions under which overdraft fees may be assessed, which contributed to the decline in customer service fees.

Sales of properties carried as other real estate generated net gains of $30,000 in the third quarter of 2010, as compared to a net loss of $33,000 during the same period one year earlier.

In the third quarter of 2010, management identified other-than-temporary impairment on one equity in the Corporation s common stock portfolio and, accordingly, an impairment charge to earnings of $40,000 was recorded. The same type of analysis in the third quarter of 2009 resulted in no other-than-temporary impairment charge in that quarter.

As a percentage of average assets, annualized non-interest income, exclusive of net gains on the sale of securities and impairment charge, was 0.88% in the third quarter of 2010 as compared to 0.86% in the same period of 2009, an improvement of 2 basis points.

Non-interest Expense:

Total non-interest expense increased $154,000, or 5.1%, in the third quarter of 2010 as compared to 2009.

Occupancy expense increased by $25,000, or 11.5%, in the third quarter of 2010 as compared to the third quarter of 2009, due to higher utility costs and facilities maintenance. Data processing expenses in the third quarter of 2010 exceeded those in the third quarter of 2009 by $42,000, or 13%, as a result of a major data processing conversion. The increased cost in this period is not expected to continue to be a trend, as it was the result of conversion-related costs. Professional fees were 42.2%, or $38,000, greater in the third quarter of 2010 as compared to the third quarter of 2009, due to some fees incurred for special services that occur infrequently. FDIC insurance premiums were $17,000, or 14.0%, higher in the third quarter of 2010 as compared to the third quarter of 2009, because the premium rates have increased.

As a percentage of average assets, annualized non-interest expense was 2.86% in the third quarter of 2010 as compared to 2.72% in the same period of 2009, an increase of 14 basis points.

Provision for income taxes:

Income tax expense in the third quarter of 2010 was $12,000, or 2.8%, higher than in the same time period in 2009. The effective tax rate in the third quarter of 2010 was 25.6% versus 25.0% in 2009. The ratio of tax-free interest-earning assets to total assets decreased in 2010, providing for a slightly lower amount of non-taxable interest income.

Comparison of the Nine Months Ended September 30, 2010 and 2009

Operations Overview:

Net income for the first nine months of 2010 was $3,611,000, a decrease of $252,000, or 6.5%, compared to the same period in 2009. Basic and diluted earnings per share were $0.84 in the first nine months of 2010, compared to $0.89 in the first nine months of 2009. Annualized return on average equity for the first nine months of 2010 was 9.50%, compared to the prior year s ratio for the same period of 10.48%. For the year-to-date period ended September 30, annualized return on average assets was 1.10% in 2010, versus 1.18% in 2009. The decrease in net income was primarily a result of the increase in the provision for loan losses, a decrease in customer service fees collected and some items recorded in 2009 that affected comparability between the two periods.

Table of Contents

Presented below are selected key ratios for the two periods:

	Nine Months Ended September 30,	
	2010	2009
Return on average assets (annualized)	1.10%	1.18%
Return on average equity (annualized)	9.50%	10.48%
Average equity to average assets	11.53%	11.30%
Non-interest income, excluding securities gains and impairment charges, as a percentage of average assets (annualized)	0.91%	1.02%
Non-interest expense as a percentage of average assets (annualized)	2.91%	2.91%

There were several items that impact comparability when making comparisons of the two periods. Charges to earnings for equity securities deemed to be other-than-temporarily impaired and gains on the sale of properties occurred in the first nine months of 2010 and 2009, with the charge in 2010 being $186,000 less than in 2009. Additionally in 2009, noninterest income was recorded for Pennsylvania sales tax refunds and for deferred fees earned on the sale of credit life insurance. In the area of non-interest expense, in 2009, a special assessment was charged to banks by the FDIC. The discussion that follows further explains these and other changes in the components of net income when comparing the year-to-date results of operations for 2010 and 2009.

Net Interest Income:

Net interest income was $12,064,000 for the first nine months of 2010, as compared to $12,005,000 in the same period in 2009.

Interest on loans decreased $915,000, or 5.8%, in the first nine months of 2010 as compared to the same period in 2009. An average weighted interest rate decrease of 38 basis points, and a decrease of $972,000 in the average balance of the loan portfolio, were responsible for lower interest income in comparison to the 2009 period.

Interest earned on investment securities and money market investments decreased $354,000 in the first nine months of 2010 as compared to 2009, with average balances increasing $5,485,000 during the period. The yield on money market investments (federal funds and interest bearing deposits) decreased by 122 basis points in the first nine months of 2010 as compared to the first nine months of 2009, due to the reduction in balances and rates in interest bearing deposits. Likewise, the overall pre-tax yield on the investment securities portfolio decreased during that same timeframe by 65 basis points.

Average interest-bearing deposits and securities sold under agreements to repurchase increased by $2,531,000, while average non-interest bearing deposits grew by $3,989,000, when comparing the first nine months of 2010 to the same period in 2009. This change in the mix of deposits, in addition to the sustained low rate environment, contributed to a reduction in the cost to fund earning assets, which was reduced by 56 basis points, to 1.43%, in the first nine months of 2010.

Total average earning assets during the first nine months of 2010 were $399,869,000, compared to $395,356,000 during the first nine months of 2009, yielding 5.45% in 2010 versus 5.94% in 2009. Funding costs for the earning assets were 1.43% and 1.89% for the nine months ended September 30, 2010 and 2009, respectively. Net interest margin on a fully tax-equivalent basis for the first nine months of 2010 was 4.22%. For the same period in 2009, the fully-tax equivalent net interest margin was 4.24%.

Provision for Loan Losses:

In the first nine months of 2010, the provision made for loan losses was $637,000. Management regularly reviews the adequacy of the loan loss reserve and makes assessments as to specific loan impairment, historical charge-off expectations, general economic conditions in the Bank s market area, specific loan quality and other factors. In the first nine months of 2009, a loan loss provision of $377,000 was recorded. The increase in the provision in the 2010 period resulted from the reduction in the value of collateral supporting several impaired loans.

24

Table of Contents

Non-interest income:

Non-interest income in the first nine months of 2010 was $2,983,000, compared to $3,103,000 in the first nine months of 2009, a decrease of $120,000. As mentioned in the overview above, there were several items that impact comparability on non-interest income when making comparisons of the two periods. The following table quantifies the impact of these items.

	Year-to-date through September 30,			
Non-interest income (in thousands)		2010		2009
Securities other-than-temporary impairment charge	$	(40)	$	(226)
Gains on the sale of securities		31		
Gains on the sale of OREO		36		
Refund of overcharged PA sales tax from years 2004-2006				40
Prior period income from credit-life insurance sales				323
Total positive impact on non-interest income	$	27	$	137

In the nine months ended in September 2010, management identified other-than-temporary impairment on one equity in the Corporation s common stock portfolio and, accordingly, an impairment charge to earnings of $40,000 was recorded. During the same period in 2009, management similarly identified other-than-temporary impairment on two equities in the Corporation s common stock portfolio, resulting in an impairment charge to earnings of $226,000. The Corporation recognized no gains or losses from the sales or calls of securities during the first half of 2009, while a net gain of $31,000 was recorded in the first nine months of 2010. Sales of properties carried as other real estate generated net gains of $36,000 in the first nine months of 2010, as compared to a net gain of zero during the same period one year earlier. As a result of petitions to the state of Pennsylvania disputing certain charges for state sales tax over the periods of 2004 through 2006, the Corporation received a refund of $40,000 in the first half of 2009. Included also in non-interest income in the first nine months of 2009 was an adjustment of $323,000, representing previously unrecorded fees earned in prior periods from the sales of insurance policies on loans. The adjustment was deemed by management to be immaterial to the consolidated financial statements in all prior periods and therefore required no prior period restatement of earnings. These types of transactions generally do not occur on a regular basis as part of recurring operating income. In the aggregate, the positive impact of these transactions on non-interest income was $110,000 greater in the first nine months of 2009 than in the same period in 2010.

Trust fees earned in the first nine months of 2010 were $47,000 higher than those earned in the first nine months of 2009, primarily due to estate fees earned. Fees for customer service on deposit accounts in the first nine months of 2010 decreased compared to the same period in 2009 by $131,000, or 10.6%, due to reduced activity in the overdraft protection product, brought about in part by a change in regulation that modified the conditions under which overdraft fees are assessed. At $301,000, commissions from the sale of non-deposit products were 7.1% less than the $324,000 in commissions earned in 2009. Income from bank owned life insurance and annuities increased in the first nine months of 2010 compared to the first nine months of 2009 by $45,000, or 12.9%, as a result of carrier diversification. Income from our unconsolidated subsidiary was $179,000, representing earnings recorded under the equity method of accounting for the ownership of 39.16% of the First National Bank of Liverpool during the first nine months of 2010, a 22.6% increase over the previous year s same period.

As a percentage of average assets, annualized non-interest income, exclusive of net gains on the sale of securities and impairment charge, was 0.91% in the first nine months of 2010 as compared to 1.02% in the same period of 2009. If the items impacting comparability were excluded from the computation, the ratios would be 0.90% in 2010 and 0.91% in 2009.

Non-interest expense:

Total non-interest expense increased $92,000, or 1.0%, in the first nine months of 2010 as compared to 2009. The calculation of the regular deposit insurance premium was revised in June of 2009 and the rate was increased, creating

a negative variance of $103,000 in the first nine months of 2010 versus the first nine months of 2009. In addition to the increase in the regular premium, in June of 2009, a one-time special deposit insurance assessment by the FDIC of $194,000 was recorded. All financial institutions insured by the FDIC incurred the cost of a special assessment at that time based upon each banks insurance risk. This special assessment has not been repeated in 2010, and therefore, FDIC insurance expense through September 2010 was $91,000 lower than during the 2009 period.

Employee compensation and benefits costs increased by $63,000, or 1.2%, in first nine months of 2010 compared to the first nine months of 2009, primarily due to an increase in part time salaries and medical insurance costs. Other notable changes in non-interest expense in the comparable periods included increases of $27,000 in costs to maintain foreclosed assets and $43,000 in charitable donations.

As a percentage of average assets, annualized non-interest expense was 2.91% in the first nine months of both 2010 and 2009.

Provision for income taxes:

Income tax expense in the first nine months of 2010 was $161,000, or 11.9%, less than in the same time period in 2009. The effective tax rate in 2010 was 24.9% versus 26.0% in 2009. The ratio of tax-free interest-earning assets to total assets increased in 2010, providing for a lesser amount of non-taxable interest income.

Liquidity:

The objective of liquidity management is to ensure that sufficient funding is available, at a reasonable cost, to meet the ongoing operational cash needs of the Corporation and to take advantage of income producing opportunities as they arise. While the desired level of liquidity will vary depending upon a variety of factors, it is the primary goal of the Corporation to maintain a high level of liquidity in all economic environments. Principal sources of asset liquidity are provided by securities maturing in one year or less, other short-term investments such as federal funds sold and cash and due from banks. Liability liquidity, which is more difficult to measure, can be met by attracting deposits and maintaining the core deposit base. The Corporation is a member of the Federal Home Loan Bank of Pittsburgh for the purpose of providing short-term liquidity when other sources are unable to fill these needs. During the first nine months of 2010, the average balance of short-term borrowings from the Federal Home Loan Bank was $208,000, with none outstanding on September 30, 2010. As of September 30, 2010, the Corporation had no long-term debt and had unused borrowing capacity with the Federal Home Loan Bank of $150 million.

Funding derived from securities sold under agreements to repurchase (accounted for as collateralized financing transactions) is available through corporate cash management accounts for business customers. This product gives the Corporation the ability to pay interest on corporate checking accounts.

In view of the sources previously mentioned, management believes that the Corporation s liquidity is capable of providing the funds needed to meet loan demand.

Off-Balance Sheet Arrangements:

The Corporation s consolidated financial statements do not reflect various off-balance sheet arrangements that are made in the normal course of business, which may involve some liquidity risk, credit risk, and interest rate risk. These commitments consist mainly of loans approved but not yet funded, unused lines of credit and letters of credit issued using the same credit standards as on-balance sheet instruments. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment terms. Letters of credit are conditional commitments issued to guarantee the financial performance obligation of a customer to a third party. Unused commitments and letters of credit at September 30, 2010 were $21,185,000 and $968,000, respectively. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Corporation. Management believes that any amounts actually drawn upon can be funded in the normal course of operations. The Corporation has no investment in or financial relationship with any unconsolidated entities that are reasonably likely to have a material effect on liquidity or the availability of capital resources.

Interest Rate Sensitivity:

Interest rate sensitivity management is the responsibility of the Asset/Liability Management Committee. This process involves the development and implementation of strategies to maximize net interest margin, while minimizing the earnings risk associated with changing interest rates. Traditional gap analysis identifies the maturity and re-pricing terms of all assets and liabilities. A simulation analysis is used to assess earnings and capital at risk from movements in interest rates. See Item 3 for a description of the complete simulation process and results.

Capital Adequacy:
Bank regulatory authorities in the United States issue risk-based capital standards. These capital standards relate a banking Corporation s capital to the risk profile of its assets and provide the basis by which all banking companies and banks are evaluated in terms of capital adequacy. The risk-based capital standards require all banks to have Tier 1 capital of at least 4% and total capital, including Tier 1 capital, of at least 8% of risk-adjusted assets. Tier 1 capital includes common stockholders equity and qualifying perpetual preferred stock together with related surpluses and retained earnings. Total capital is comprised of Tier 1 capital, limited life preferred stock, qualifying debt instruments, and the reserves for possible loan losses. Banking regulators have also issued leverage ratio requirements. The leverage ratio requirement is measured as the ratio of Tier 1 capital to adjusted average assets. At September 30, 2010, the Bank exceeded the regulatory requirements to be considered a well capitalized financial institution, i.e., a leverage ratio exceeding 5%, Tier 1 capital exceeding 6% and total capital exceeding 10%.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the exposure to economic loss that arises from changes in the values of certain financial instruments. The types of market risk exposures generally faced by financial institutions include equity market price risk, interest rate risk, foreign currency risk and commodity price risk. Due to the nature of its operations, only equity market price risk and interest rate risk are significant to the Corporation.

Equity market price risk is the risk that changes in the values of equity investments could have a material impact on the financial position or results of operations of the Corporation. The Corporation s equity investments consist of common stocks of publicly traded financial institutions.

Recent declines and volatility in the values of financial institution stocks have significantly reduced the likelihood of realizing significant gains in the near-term. Although the Corporation has realized occasional gains from this portfolio in the past, the primary objective of the portfolio is to achieve value appreciation in the long term while earning consistent attractive after-tax yields from dividends. The carrying value of the financial institutions stocks accounted for 0.2% of the Corporation s total assets as of September 30, 2010. Management performs an impairment analysis on the entire investment portfolio, including the financial institutions stocks on a quarterly basis. As of September 30, 2010, other-than-temporary impairment was identified and recorded on one stock. There is no assurance that further declines in market values of the common stock portfolio in the future will not result in other-than-temporary impairment charges, depending upon facts and circumstances present.

The equity investments in the Corporation s portfolio had an adjusted cost basis of approximately $935,000 and a fair value of $835,000 at September 30, 2010. Net unrealized losses in this portfolio were approximately $100,000 at September 30, 2010.

In addition to its equity portfolio, the Corporation s investment management and trust services revenue could be impacted by fluctuations in the securities markets. A portion of the Corporation s trust revenue is based on the value of the underlying investment portfolios. If securities values decline, the Corporation s trust revenue could be negatively impacted.

Interest rate risk creates exposure in two primary areas. First, changes in rates have an impact on the Corporation s liquidity position and could affect its ability to meet obligations and continue to grow. Second, movements in interest rates can create fluctuations in the Corporation s net interest income and changes in the economic value of equity.

The primary objective of the Corporation s asset-liability management process is to maximize current and future net interest income within acceptable levels of interest rate risk while satisfying liquidity and capital requirements. Management recognizes that a certain amount of interest rate risk is inherent, appropriate and necessary to ensure profitability. A simulation analysis is used to assess earnings and capital at risk from movements in interest rates. The model considers three major factors of (1) volume differences, (2) repricing differences, and (3) timing in its income simulation. As of the most recent model run, data was disseminated into appropriate repricing buckets, based upon the static position at that time. The interest-earning assets and interest-bearing liabilities were assigned a multiplier to simulate how much that particular balance sheet item would re-price when interest rates change. Finally, the estimated timing effect of rate changes is applied, and the net interest income effect is determined on a static basis (as if no other factors were present). As the table below indicates, based upon rate shock simulations on a static basis, the Corporation s balance sheet is relatively rate-neutral as rates would change downward. Each 100 basis point increase

results in approximately $129,000 decline in net interest income in the static environment. This negative effect of rising rates is offset to a large degree by the positive effect of imbedded options that include loans floating off their floors and likely internal deposit pricing strategies. After applying the effects of options, over a one-year period, the net effect of an immediate 100, 200, 300 and 400 basis point rate increase would change net interest income by $(67,000), $(23,000), $65,000 and $155,000, respectively. Rate shock modeling was done for a declining rate of 25 basis points only, as the federal funds target rate currently is between zero and 0.25%. As the table below indicates, the net effect of interest rate risk on net interest income is neutral in a rising rate environment. Juniata s rate risk policies provide for maximum limits on net interest income that can be at risk for 100 through 400 basis point changes in interest rates.

Table of Contents

Effect of Interest Rate Risk on Net Interest Income
(Dollars in thousands)

Change in Interest Rates (Basis Points)	Change in Net Interest Income Due to Interest Rate Risk (Static)	Change in Net Interest Income Due to Imbedded Options	Total Change in Net Interest Income
400	$ (516)	$ 671	$ 155
300	(386)	451	65
200	(257)	234	(23)
100	(129)	62	(67)
0			
-25	33	(35)	(2)

The net interest income at risk position remained within the guidelines established by the Corporation s asset/liability policy.

No material change has been noted in the Bank s equity value at risk. Please refer to the Annual Report on Form 10-K as of December 31, 2009 for further discussion of this matter.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of September 30, 2010, the Corporation carried out an evaluation, under the supervision and with the participation of the Corporation s management, including the Corporation s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to the Securities Exchange Act of 1934 (Exchange Act), Rule 13a-15(e). Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in Corporation reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms. These controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files under the Exchange Act is accumulated and communicated to the issuer s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based upon that evaluation, the Corporation s Chief Executive Officer and Chief Financial Officer concluded that the Corporation s disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential conditions, regardless of how remote.

Attached as Exhibits 31 and 32 to this quarterly report are certifications of the Chief Executive Officer and the Chief Financial Officer required in accordance with Rule 13a-14(a) of the Exchange Act. This portion of the Corporation s quarterly report includes the information concerning the controls evaluation referred to in the certifications and should be read in conjunction with the certifications for a more complete understanding of the topics presented.

Changes in Internal Control Over Financial Reporting

There were no significant changes in the Corporation s internal control over financial reporting since December 31, 2009.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

In the opinion of management of the Corporation, there are no legal proceedings pending to which the Corporation or its subsidiary is a party or to which their property is subject, which, if determined adversely to the Corporation or its subsidiary, would be material in relation to the Corporation s or its subsidiary s financial condition. There are no proceedings pending other than ordinary routine litigation incident to the business of the Corporation or its subsidiary. In addition, no material proceedings are pending or are known to be threatened or contemplated against the Corporation or its subsidiary by government authorities.

Item 1A. RISK FACTORS

In addition to the risk factors that were disclosed in the Annual Report on Form 10-K as of December 31, 2009, the Corporation has added the following.

Recently enacted financial reform legislation may have a significant impact on the Corporation and results of its Operation.

On July 21, 2010, the President of the United States signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act). The goals of the new legislation include restoring public confidence in the financial system following the 2007-2008 financial and credit crises, preventing another financial crisis and allowing regulators to identify failings in the system before another crisis can occur. Among other things, the Act creates the Financial Stability Oversight Council, with oversight authority for monitoring and regulating systemic risk, and the Bureau of Consumer Financial Protection, which will have broad regulatory and enforcement powers over consumer financial products and services. The Act also changes the responsibilities of the current federal banking regulators, imposes additional corporate governance and disclosure requirements in areas such as executive compensation and proxy access, and limits or prohibits proprietary trading and hedge fund and private equity activities of banks. The scope of the Act impacts many aspects of the financial services industry, and it requires the development and adoption of many implementing regulations over the next several months and years; thus, the effects of the Act on the financial services industry will depend, in large part, upon the extent to which regulators exercise the authority granted to them under the Act and the approaches taken in implementing regulations. The Corporation and the entire financial services industry have begun to assess the potential impact of the Act on business and operations, but at this early stage, the likely impact cannot be ascertained with any degree of certainty. However, it would appear that the Corporation is likely to be impacted by the Act in the areas of corporate governance, deposit insurance assessments, capital requirements and restrictions on fees that may be charged to consumers.

Table of Contents

Mortgage foreclosure practices and procedures in our industry have come under public and regulatory scrutiny.

Recently, the media began reporting on possible documentation and procedural problems with respect to mortgage foreclosures at several of the nation s largest banks and mortgage servicing businesses. As a result of the economic downturn which began in 2008 and which persists today, larger banks and mortgage servicing companies have been processing a large number of foreclosures nationwide. It has been reported that, in some foreclosures, the required procedural steps (which often vary by state and in some cases by local jurisdictions within a state) required to complete a foreclosure have not been followed. As a result, questions have been raised concerning the validity of some foreclosures. The foreclosure procedures used by banks and servicing companies have also come under scrutiny by consumer advocates, attorneys representing borrowers, federal and state government officials and banking regulators.

As a financial institution, Juniata offers residential mortgage loans. A small percentage of Juniata s borrowers default on their mortgage loans. When a default occurs, Juniata attempts to resolve the default in a way that provides the greatest return to Juniata, which is typically achieved by pursuing options that allow the borrower to remain as the owner of the home. However, when these efforts are not successful, it becomes necessary for Juniata to foreclose on the loan. Unlike larger banks and mortgage servicers, however, Juniata analyzes whether foreclosure is necessary on a case-by-case basis and the number of residential foreclosures undertaken by Juniata is not substantial. Juniata is not aware of any material deficiencies with respect to its foreclosure procedures.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information on repurchases by the Corporation of its common stock in each month of the quarter ended September 30, 2010:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
July 1 31, 2010		$		147,836
August 1 31, 2010				147,836
September 1 30, 2010	8,300	17.50	8,300	139,536
Totals	8,300		8,300	139,536

(1) On March 23, 2001, the Corporation announced plans to buy back 100,000 (200,000 on a post-split basis) shares of its

common stock. There is no expiration date to this buyback plan, but subsequent to the initial plan, the Board of Directors authorized the repurchase of 400,000 additional shares in 2005 and then authorized 200,000 additional shares in September of 2008. As of November 8, 2010, the number of shares that may yet be purchased under the program was 139,536. No repurchase plan or program expired during the period covered by the table. The Corporation has no stock repurchase plan or program that it has determined to terminate prior to expiration or under which it does not intend to make further purchases.

Item 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable

Item 4. (Removed and Reserved)

Item 5. OTHER INFORMATION

None

Item 6. EXHIBITS

3.1	Amended and Restated Articles of Incorporation (incorporated by reference to Exhibit 4.1 to the Corporation s Form S-3 Registration Statement No. 333-129023 filed with the SEC on October 14, 2005)
