-

**Item 2.02 Results of Operations and Financial Condition.**

On February 15, 2011, we issued a press release announcing our results of operations for the fourth quarter and full year 2010. A copy of that release is furnished herewith as Exhibit 99.1 in accordance with General Instruction B.2 to Form 8-K.

The press release furnished as an exhibit to this report includes forward-looking statements within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. These forward-looking statements are subject to certain risks and uncertainties, as disclosed from time to time in our filings with the Securities and Exchange Commission. As a result of these factors, our actual results may differ materially from those indicated or implied by such forward-looking statements.

We also presented in the press release non-GAAP financial measures under Regulation G. We presented our adjusted net income and adjusted income (loss) derived from operating activities for all periods presented in the release. The components of adjusted net income and adjusted income (loss) derived from operating activities are computed by using amounts which are determined in accordance with accounting principles generally accepted in the United States of America ( GAAP ). Adjusted net income is computed by adding the adjustments of goodwill and intangible asset impairment charges, all related to our Canadian business units; full cost ceiling test writedowns from our U.S. oil and gas joint venture; discontinued operations income, net of tax from our Canada and Colombia oil and gas joint ventures impairment charges to wholly owned oil and gas properties; impairment charges to long-lived assets across multiple business units; acquisition-related expenses and other non-operational items; other than temporary impairments to available-for-sale securities; and a noncash stock compensation charge, and then subtracting the tax benefit related to these adjustments. Adjusted income (loss) derived from operating activities is computed by subtracting direct costs, general and administrative expenses, depreciation and amortization, and depletion expense from Operating revenues and then adding Earnings (losses) from unconsolidated affiliates. As part of our press release information, we provided a reconciliation of adjusted net income and adjusted income (loss) derived from operating activities to income before income taxes, which is its nearest comparable GAAP financial measure.

We included our adjusted income (loss) derived from operating activities in the release because management evaluates the performance of our business units and the consolidated company based on several criteria, including adjusted income (loss) derived from operating activities, and because we believe this financial measure is an accurate reflection of our ongoing profitability. We included adjusted net income because management believes the non-GAAP financial measure to be more indicative of our ongoing operating results and financial condition.
