See Notes to the Interim Financial Statements

Table of Contents**Note 1. Basis of Presentation**

The accompanying unaudited financial statements have been prepared by the Company in accordance with generally accepted accounting principles in the United States of America, pursuant to the rules and regulations of the Securities and Exchange Commission. In management's opinion, all adjustments necessary for a fair presentation of the results for the interim period have been reflected in the interim financial statements. The results of operations for any interim period are not necessarily indicative of the results for a full year. All adjustments to the financial statements are of a normal recurring nature. Certain information and footnote disclosures normally included in financial statements have been condensed or omitted. Such disclosures are those that would substantially duplicate information contained in the most recent audited financial statements of the Company, such as significant accounting policies, lease and license commitments and stock options. Management presumes that users of the interim statements have read or have access to the audited financial statements included in the Company's most recent annual report on Form 10-KSB.

Note 2. Inventories

Major components of inventory at September 30, 2004 and December 31, 2003 as follows:

	September 30, 2004	December 31, 2003
	<hr/>	<hr/>
Raw Materials	\$1,832,049	\$1,091,213
Work In Process	445,712	146,307
Finished Goods	1,405,124	786,615
Obsolescence Reserve	(200,000)	(163,000)
	<hr/>	<hr/>
Total	\$3,482,885	\$1,861,135
	<hr/>	<hr/>

Note 3. Financing Arrangement

The Company has a \$2,500,000 annual revolving line of credit agreement with M&I Bank of Minneapolis, Minnesota through June 28, 2005. Advances are due on demand, secured by substantially all assets of the Company, and are subject to a defined borrowing base equal to 75 percent of qualified accounts receivable and 50 percent of qualified inventory. The total unused availability on the line of credit was \$1,121,000 at September 30, 2004. Interest on advances accrues at the bank's reference rate (4 1/4 % at September 30, 2004) is due monthly and is subject to certain restrictive covenants. There were advances of \$1,379,000 outstanding on the revolving line of credit agreement at September 30, 2004, and there were no advances outstanding at December 31, 2003.

On April 15, 2004, the Company signed an amendment to the original credit agreement that provides the Company with a \$1.5 million term loan for the purpose of purchasing capital equipment. As of September 30, 2004, the Company had drawn \$1,000,000 under this agreement, which amount is to be repaid in monthly installments of \$20,833 plus interest at 4.91% through March of 2008. This agreement is subject to the same restrictive covenants as the revolving line of credit agreement.

On September 30, 2004, the Company entered into a ten-year mortgage agreement with US Bank to refinance the previous debt with the City of Mankato that was set to expire in early 2005. The interest rate is fixed at 6.44% with 119 installments of \$11,373 plus the final payment to equal the unpaid principal balance.

Table of Contents**Note 4. Major Customers and Enterprisewide Disclosures**

Major Customers: The Company has customers that accounted for more than 10 percent of net sales for the three and nine months ended September 30, 2004 and 2003 as follows:

	Three Months Ended September 30, 2004	Three Months Ended September 30, 2003
Sales percentage:		
Customer A	57%	53%
Customer B	10%	1%
Customer C	3%	9%
	Nine Months Ended September 30, 2004	Nine Months Ended September 30, 2003
Sales percentage:		
Customer A	59%	54%
Customer B	9%	0%
Customer C	4%	16%

The above customers had net receivables at September 30, 2004 and December 31, 2003 as follows:

	September 30, 2004	December 31, 2003
Accounts receivable percentage:		
Customer A	54%	47%
Customer B	7%	0%
Customer C	2%	9%

Enterprisewide Disclosures: The following table presents revenues from external customers for each of the Company's groups of products and services:

	Three Months Ended September 30, 2004	Three Months Ended September 30, 2003
Proprietary microprocessors and mechanically controlled sensors and alarms	\$ 843,967	\$ 715,364
Electronic controls and assemblies for OEM customers	5,747,071	3,864,825
	<u>\$ 6,591,038</u>	<u>\$ 4,580,189</u>

	<u>Nine Months Ended September 30, 2004</u>	<u>Nine Months Ended September 30, 2003</u>
Proprietary microprocessors and mechanically controlled sensors and alarms	\$ 2,129,479	\$ 1,934,741
Electronic controls and assemblies for OEM customers	<u>15,396,997</u>	<u>12,435,629</u>
	<u>\$17,526,476</u>	<u>\$14,370,370</u>

Table of Contents**Note 5. Earnings Per Share**

Basic earnings per share is computed by dividing net earnings by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net earnings by the weighted-average number of common shares outstanding during the period, including potentially dilutive shares such as the options and warrants to purchase shares of common stock at various amounts per share. The dilutive effect of the additional shares for the three and nine months ended September 30, 2004 and 2003 increased the weighted-average shares outstanding by 119,128 and 174,653 compared to 73,124 and 70,086, respectively.

Note 6. Stock Options, Warrants and Stock-Based Compensation Plans

Warrants: On February 19, 2003, the Company granted to Hayden Communications, Inc., an investor relations firm, warrants to purchase 39,697 shares of common stock. Warrants to purchase 1,654 shares of common stock vest each month beginning March 19, 2003 and continuing for the two-year contractual period. The warrants term will extend three years from the date of full vesting. The contract for services to be provided by Hayden Communications, Inc. does provide both parties with a cancellation right. Such a cancellation would limit the warrants to those vested up to the time of termination. On September 30, 2004, warrants to purchase 39,697 shares of common stock were outstanding, of which 31,426 shares were exercisable. The exercise price of such outstanding warrants is \$1.85 per share.

The warrants were valued using the Black-Scholes pricing model. Because the contract can be terminated, the Company is reflecting the value of the warrants as a prepaid expense and amortizing the expense as investor relations expense over the life of the contract. In addition, the total value of the outstanding warrants, \$43,178, is reflected in the stockholders equity section at September 30, 2004.

Stock-Based Compensation Plans: The Company has a stock-based compensation plan. The Company accounts for this plan under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Accordingly, no stock-based employee compensation cost has been recognized, as all options granted under this plan had an exercise price equal to the market value of the underlying common stock on the date of grant. There were 5,000 options to purchase shares issued to employees and directors during the three months ended September 30, 2004, representing gross compensation expense of \$6,681. The effect on net income and earnings per share for the compensation cost for the stock-based compensation plan has been determined based on the grant date fair values of awards (the method described in FASB Statement No. 123, Accounting for Stock Based Compensation) and is reflected in the table below.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net Income:				
As reported	\$376,954	\$258,150	\$674,344	\$750,790
Deduct total stock-based employee compensation expense determined under the fair value-based method for all awards net of related tax effects	(13,715)	(12,243)	(50,675)	(47,555)

Pro forma	\$ 0.10	\$ 0.08	\$ 0.18	\$ 0.23

Table of Contents**Note 7. Product Warranties:**

The Company provides a limited warranty for a period of one year for its products. The Company's standard warranties require the Company to repair or replace defective products during such warranty period at no cost to the customer. The Company estimates the costs that may be incurred under its basic limited warranty and records a liability in the amount of such costs at the time product revenue is recognized. Factors that affect the Company's warranty liability include the number of units sold, historical and anticipated rates of warranty claims, and cost per claim. The Company periodically assesses the adequacy of its recorded warranty liabilities and adjusts the amounts as necessary. The Company utilizes historical trends and actuarial analysis tools to assist in determining the appropriate loss reserve levels.

Changes in the Company's warranty liability, which is included in other accruals on the balance sheets, during the period are approximately as follows:

	Nine Months Ended September 30,	
	2004	2003
Balance, Beginning	\$ 131,000	\$ 95,000
Accruals for products Sold	74,000	152,000
Charges in accruals for pre-existing warranties	(103,000)	(116,000)
	<u> </u>	<u> </u>
Balance, Ending	\$ 102,000	\$ 131,000
	<u> </u>	<u> </u>

Table of Contents

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

RESULTS OF OPERATIONS

**Three and nine months ended September 30, 2004 v.
Three and nine months ended September 30, 2003**

Net Sales: The Company recorded net sales of \$6,591,038 and \$17,526,476 for the three and nine months ended September 30, 2004, an increase of 44% and 22% from \$4,580,189 and \$14,370,370 for the same periods in 2003, respectively. The increase in sales for the three and nine months ended September 30, 2004 is attributed to increased sales to original equipment manufacture (OEM) customers, offset in part by the decline in sales to Johnson Outdoors, Inc for the current quarter and the first nine months of 2004. Sales of Winland's proprietary products primarily for the security/industrial sector, motor controls and utility controls, increased 18% for the three months ended September 30, 2004 and 10% for the first nine months of 2004, compared to 2003.

The Company has received from its OEM customers purchase orders having an aggregate value of \$11.4 million for delivery during the remainder of 2004 and into 2005. The Company expects to receive additional orders from current OEM customers for future production. Although the Company has purchase orders in place for many of its OEM customers that are scheduled to be fulfilled in 2004, these customers may terminate their relationship with the Company at any time pursuant to certain cancellation provisions. Therefore, there is no assurance that the Company will continue to be engaged by any of these customers. In June of 2003 the Company announced that orders from Johnson Outdoors, Inc. (JOI) would be reduced in the coming years. Sales to JOI represented 4.2% of total sales for the first nine months of 2004 compared to 16% for the same period in 2003.

The Company has continued to provide a full range of Electronic Manufacturing Services (EMS) to OEM customers, delivering product needs from early concept through product realization. The Company continues to explore additional geographic regions to market its OEM services, primarily through networking with referral sources in the Chicago and Minneapolis areas. In addition to the networking and referral sources, the Company has signed representative agreements with two manufacturers' representative firms in the Illinois and Kansas areas. The loss of any significant OEM customer would likely have an adverse effect on the Company's short-term, and potentially long-term, results.

Gross Profits: Gross profit dollars increased slightly to \$1,534,396 or 23.3% of net sales for the three months ended September 30, 2004, compared to \$1,152,085 or 25.2% of net sales for the same period in 2003. Gross profit dollars increased for the nine months ended September 30, 2004 to \$3,935,773, compared to \$3,552,725 for the same period in 2003. Gross profit decreased as a percentage of net sales from 24.7% for the nine month period in 2003 to 22.5% for the nine month period in 2004. The decline in gross profit as a percentage of net sales for the quarter and the nine months ended September 30, 2004 is attributed to additional production costs, including component preparation, manual component placements and manual testing associated with new product introductions and ramp ups in the first nine months of 2004. During the third quarter, the Company was reimbursed for some of the material overrun costs associated with new product introduction from a specific customer. During the third quarter and the nine months ended September 30, 2004, the Company incurred additional labor costs due to overtime and the increased use of a temporary labor force, as well as increased costs associated with billable engineering projects and increased freight, offset in part by reduced warranty and obsolescence expenses when compared to the same period in 2003. These increased costs were associated with a higher volume of new product design as compared to 2003. The Company saw an increase for the third quarter and a reduction for the first nine months of 2004 in employee incentive plan accruals when compared to 2003.

Operating Expenses: General and administrative expense was \$397,607 or 6.0% of net sales and \$1,223,025 or 7.0% of net sales for the three and nine months ended September 30, 2004, compared to \$326,681 or 7.1% of net sales and

\$1,043,341 or 7.3% of net sales for the same periods in 2003.

The increase in general and administrative expense for the three and nine months ended September 30, 2004 is attributed to increased salaries and related expenses, board of directors expense, directors and officers insurance expense, increased banking fees, increased employee incentive plan accruals as well as

Table of Contents

donations expense and investor relations expense, offset in part by a reduction in legal and professional fees and bad debt expense accruals when compared to the same period in 2003.

Sales and marketing expense (including project management) was \$315,789 or 4.8% of net sales and \$946,287 or 5.4% of net sales for the three and nine months ended September 30, 2004, compared to \$238,312 or 5.2% of net sales and \$694,357 or 4.8% of net sales for the same periods in 2003, respectively. The increases in sales and marketing expense for the three and nine months ended September 30, 2004 are directly associated with increased salaries and related expenses, commissions expense and increased employee incentive plan accruals, offset in part by a reduction in leased vehicle expense and employee training expense and promotional materials expense.

Winland's sales and marketing efforts are focused on building long-term relationships with targeted OEM strategic accounts in the markets that it serves. The Company relies on direct sales people along with a referral network to promote its services and uncover new opportunities. Management believes that augmenting its direct sales force with a referral network and utilizing independent sales representatives on a limited basis will effectively provide Winland an opportunity to build market share in the EMS (Electronic Manufacturing Services) market. In 2003, the Company added the new sales position of EMS business development manager to focus exclusively on strategic account development and select targeted accounts that best align with the products and services offered by the Company.

Winland's proprietary products in the Environmental Sensors and Security Retail sectors are marketed through a network of dealers and distributors and supported by internal staff. In an effort to develop the Environmental and Security Retail portion of the business, the Company added the position of Manager for Environmental Security Products and initiated strategic planning for its proprietary products in late 2003.

Research and development expense (primarily design services and support to the OEM customer base) was \$151,753 or 2.3% of net sales for the three months ended September 30, 2004 and \$567,486 or 3.2% of net sales for the first nine months of 2004, compared to \$154,303 or 3.4% of net sales and \$530,829 or 3.7% of net sales for the same periods in 2003. The increase in research and development expense for the first nine months of 2004 compared to the same period in 2003 is primarily attributed to increased design failure guarantee expense associated with designs for customers, increased employee incentive plan accruals offset in part by amounts allocated to billable engineering projects when compared to the same period in 2003. Expenses were down slightly for the third quarter of 2004 due to reduction in salaries and related expenses as well as amounts allocated to billable engineering projects, offset in part by increased employee incentive plan accruals when compared to the same period in 2003.

Interest Expense: Interest expense was \$46,413 and \$110,595 or 0.7% and 0.6% of net sales for the three and nine months ended September 30, 2004, respectively, compared to \$29,701 and 108,692 or 0.6% and 0.8% of net sales for the same periods in 2003, respectively. The increase in interest expense for the third quarter and first nine months of 2004 was primarily due to the new borrowings. With the increase in short-term and long-term borrowings the Company expects to see an increase in interest expense for subsequent periods.

Net Earnings: The Company reported net income of \$376,954 or \$0.11 per basic and diluted share for the three months ended September 30, 2004 and \$674,344 or \$0.20 per basic and \$0.19 per diluted share for the first nine months of 2004, compared to net income of \$258,150 or \$0.09 per basic and \$0.08 per diluted share and \$750,790 or \$0.25 per basic share and \$0.25 per diluted share for the same periods in 2003, respectively. The increase in net income for the third quarter of 2004 is primarily attributed to an increase in gross profits, offset in part by an increased operating expenses, interest expense and income tax expense. The decline in income for the first nine months of 2004 is attributed to increased operating expenses, offset in part by an increase in gross profits.

The Company believes inflation has not significantly affected its results of operations.

The Company uses a 39% blended federal and state income tax rate. Year-to-date pre-tax net income was \$1,105,344 for 2004 and \$1,185,790 for 2003, resulting in income tax expense of \$431,000 and \$435,000, respectively.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

Cash used in operating activities was \$1,532,813 for the nine months ended September 30, 2004, compared to cash provided by operating activities of \$1,726,837 for the same period in 2003, a decline of \$3,259,650. This change was primarily due to increases in inventory levels, accounts receivable, and prepaid expenses as well as a decline in accounts payable balances, offset in part by increased accrued expenses and a reduction in income tax receivable. Cash used in operations resulted in a decrease in cash reserves as well as increases on the borrowings on the bank line-of-credit.

The current ratio at September 30, 2004 was 2.04 to 1, compared to 2.46 to 1 at December 31, 2003. Working capital equaled \$3,920,349 on September 30, 2004, compared to \$3,581,629 on December 31, 2003. The increase in working capital is primarily attributed to realigning of the current maturities related to refinancing the mortgage with a ten year maturity, offset in part by a decrease in cash, used to fund current operating activities, as well as by increased inventory levels, accounts receivable and increased prepaid expenses.

On June 25, 2004 the Company extended its revolving credit agreement with the M&I Bank of Minneapolis, Minnesota with a renewal date of June 28, 2005. There were \$1,379,000 of advances outstanding on the revolving line-of-credit agreement at September 30, 2004, with no advances outstanding at December 31, 2003. The interest rate on the revolving line of credit is at the bank's reference rate, 4.75% at September 30, 2004. The agreement with M&I Bank is also subject to certain restrictive covenants. On April 15, 2004 the Company signed an amendment to the original credit agreement that will provide the Company with a \$1.5 million dollar term loan for the financing of its capital equipment purchases. M&I Bank has advanced \$1,000,000 to the Company as of October 21, 2004, the stated interest rate is fixed at 4.91% on this advance. The loan will be amortized in full over 48 months.

Management believes that our cash balance, availability of funds under the line of credit agreement, the amendment adding the \$1.5 million dollar term loan and anticipated cash flows from operations will be adequate to fund our cash requirements for the next twelve months.

A summary of our contractual cash obligations at September 30, 2004 is as follows:

Contractual Obligations	Payments due by period				
	Total	Remainder Of 2004	2005	2006	2007 and Thereafter
Long-term debt, including interest	\$2,589,100	\$ 153,400	\$534,000	\$495,400	\$1,406,300

Other commercial commitments as described below:

Other Commercial Commitment	Total Amount Committed	Outstanding Balance 9/30/2004	Date of Expiration
Line of Credit	\$2,500,000.00	\$1,379,000.00	June 28, 2005

There are no off balance sheet contractual cash obligations.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The critical accounting policies and estimates to follow include, but are not limited to, revenue recognition, income taxes, product warranties, depreciation and long-lived assets. Some of the most critical policies and estimates are also discussed below.

Table of Contents

The Company derives revenue from primarily two sources: (1) product sales and out of warranty repair revenue, which includes custom electronic controls and assemblies for original equipment manufacturers and proprietary products in the security/industrial and motor control markets and (2) engineering design services that may include programming and prototypes. The Company recognizes revenue from the sale of products and out of warranty repairs when the product is delivered to a common carrier for shipment to a customer. A portion of the Company's business involves the Company shipping product to a primary customer's location where it is held in a separate warehouse. Revenue is recognized when the customer notifies the Company that the inventory has been removed from that warehouse and title to the product is transferred. Revenue recognition occurs for engineering design services as the progress billings are made and at the conclusion of the project. For all sales, the Company uses either a binding purchase order or customer accepted and signed engineering quote as evidence of the arrangement.

The allowance for doubtful accounts is estimated at \$10,000 at September 30, 2004. The Company has not experienced significant bad debt write offs the last several years, therefore, the current allowance is believed to be adequate for any exposures to loss on September 2004 accounts receivable. Factors considered in establishing the reserves include economic conditions and customer financial strength.

The Company has established a reserve for slow moving and obsolete inventories and believes the reserve of \$200,000 at September 30, 2004 is adequate. The reserve is based on an analysis of the existing inventory, including applying probability of obsolescence percentages to the aged inventory brackets and specific identification of obsolete inventory in connection with decisions to exit certain markets.

In addition, the Company has established a reserve of \$102,000 for rework and warranties. This reserve is based on historical experience and analysis of specific known and potential warranty issues. A portion of the reserve is based on a percentage of the sales for the nine-month period ended September 30, 2004. The percentage used reflects historical experience. Specifically identified or potential warranty issues are analyzed to determine the probability of an adverse event and the Company's financial exposure associated with such event and the reserve is established accordingly. The Company believes that the estimated reserve at September 30, 2004 is adequate.

At September 30, 2004, the financial statements reflect deferred tax assets of \$186,300 and deferred tax liabilities of \$87,100. Deferred taxes are provided on an asset and liability method, whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Realization of deferred tax assets is dependent on future taxable income during the period that deductible temporary differences and carryforwards are to be available to reduce taxable income.

The Company depreciates property and equipment over its estimated useful life. There were no impairment charges taken for the three and nine months ended September 30, 2004.

CAUTIONARY STATEMENTS

Certain statements contained in this Quarterly Report on Form 10-QSB and other written and oral statements made from time to time by the Company do not relate strictly to historical or current facts. As such, they are considered forward-looking statements that provide current expectations or forecasts of future events. Such statements can be identified by the use of terminology such as anticipate, believe, estimate, expect, intend, may, could, project, should, will, forecast and similar words or expressions. The Company's forward-looking statements generally relate to the Company's purchase order levels, building market share in the EMS market, growth strategies, financial results, product development, sales efforts and sufficiency of capital. One must carefully consider forward-looking

statements and understand that such statements involve a variety of risks and uncertainties, known and unknown, and may be affected by inaccurate assumptions, including, among others, those discussed below. Consequently, no forward-looking statement can be guaranteed and actual

Table of Contents

results may vary materially. As provided for under the Private Securities Litigation Reform Act of 1995, the Company wishes to caution investors that the following important factors, among others, in some cases have affected and in the future could affect the Company's actual results of operations and cause such results to differ materially from those anticipated in forward-looking statements made in this document and elsewhere by or on behalf of the Company.

The Company derives a significant portion of its revenues from a small number of major OEM customers that are not subject to any long-term contracts with the Company. If any major customers should for any reason decrease the volume of their business or stop doing business with the Company, the Company's business would be adversely affected. Some of the Company's customers are not large, well-established companies, and the business of each customer is subject to various risks such as market acceptance of new products and continuing availability of financing. To the extent that the Company's customers encounter difficulties, or the Company is unable to meet the demands of its OEM customers, the Company could be adversely affected.

The Company's ability to increase revenues and profits is dependent upon its ability to retain valued existing customers and obtain new customers that fit its customer profile. The Company competes for new customers with numerous independent contract design and manufacturing firms in the United States and abroad, many of whom have greater financial resources and more established reputations. The Company's ability to compete successfully in this industry depends, in part, upon the price at which the Company is willing to manufacture a proposed product and the quality of the Company's design and manufacturing services. There is no assurance that the Company will be able to continue to obtain contracts from existing and new customers on financially advantageous terms, and the failure to do so could prevent the Company from achieving the growth it anticipates.

The Company's ability to execute its initiatives to increase sales and expand market share depends upon its ability to develop additional value added capabilities and/or proprietary products and technologies and on the availability of sufficient financing, both equity and debt, to meet fixed and variable costs associated with such growth. In the current economic environment, banks and other sources of financing are conservative in their lending and investment policies. There is no assurance that the Company will be able to obtain the financing necessary to achieve its goals.

The Company's success in providing an improved mix of higher margin products and services depends on the effectiveness of its new product development and planning efforts as well as the timing of such and the availability and costs of any competing products or services on the market.

ITEM 3. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls Procedures.

The Company's Chief Executive Officer, Lorin E. Krueger, and Chief Financial Officer, Jennifer A. Thompson, have reviewed the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon this review, these officers believe that the Company's disclosure controls and procedures are effective in ensuring that information that is required to be disclosed by the Company in reports that it files under the Securities Exchange Act of 1934 is recorded, processed and summarized and reported within the time periods specified in the rules of the Securities and Exchange Commission.

(b) Changes in Internal Controls.

There were no changes in the Company's internal controls over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
