Item 1. Report to Shareholders

Welcome, Shareholder

In this report, you'll learn about how your investment in Van Kampen Municipal Opportunity Trust II performed during the annual period. The portfolio management team will provide an overview of the market conditions and discuss some of the factors that affected investment performance during the reporting period. In addition, this report includes the trust's financial statements and a list of trust investments as of October 31, 2003.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the trust will achieve its investment objective. The trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and, therefore, the value of the trust shares may be less than what you paid for them. Accordingly, you can lose money investing in this trust.

SYMBOL: VOT

AVERAGE ANNUAL TOTAL RETURNS	BASED ON NAV	BASED ON MARKET PRICE
Since Inception (6/25/93)	6.70%	5.97%
10-year	6.27	6.08
5-year	6.52	6.81
1-year	7.24	10.27

Past performance is no guarantee of future results. Investment return, net asset value (NAV) and common share market price will fluctuate and trust shares, when sold, may be worth more or less than their original cost.

As a result of recent market activity, current performance may vary from the figures shown. For more up-to-date information, please visit vankampen.com or speak with your financial advisor. The NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the trust at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions. Total return assumes an investment at the beginning of the period, reinvestment of all distributions for the period in accordance with the trust's dividend reinvestment plan, and sale of all shares at the end of the period.

The Lehman Brothers Municipal Bond Index is a broad-based statistical composite of municipal bonds. The index is unmanaged and does not include any sales charges or fees. Such costs would lower performance. It is not possible to invest directly in an index.

Trust Report

FOR THE 12-MONTH PERIOD ENDED OCTOBER 31, 2003

Van Kampen Municipal Opportunity Trust II is managed by the adviser's Municipal Fixed Income team. (1) Current members include Timothy D. Haney, Vice President; Robert Wimmel, Vice President; and John Reynoldson, Executive Director.

MARKET CONDITIONS

The economic backdrop for the 12 months ended October 31 was largely characterized by the persistent weakness of the U.S. economy. One of the most closely watched economic indicators, employment strength, was in negative territory for much of the period. Repeated comments from government and private-sector economists suggesting that the U.S. economy might be entering a deflationary period also seemed to weigh heavily on the minds of investors over the course of the year. At the same time, ongoing budgetary and fiscal difficulties at the state and local level contributed to ratings downgrades for

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

many municipal bonds. The Federal Reserve Board (the Fed) attempted to allay these fears and keep the economy moving in the right direction by cutting the Fed Funds target rate twice during the period to a level of 1.00 percent. Although the stock markets appeared to look past the sluggish economic data, bonds, in general, were hampered.

While yields on intermediate- and long-term bonds ended the period roughly where they began, the road between those two points was decidedly bumpy. The 12-month period can be divided into two distinct market environments. The first of these, which lasted from October 2002 to mid-June 2003, saw municipal yields fall by roughly 80 basis points to levels not seen since the late 1960s. These plummeting yields led to a surge in issuance as municipalities moved to lock in low financing and, in the case of older bonds, low refinancing costs. These record levels of supply met with substantial demand as investors in search of relative stability poured cash into municipal bond funds. Demand for municipal bonds was also strong from so-called "cross-over" buyers--investors who traditionally favor taxable investments, but were drawn to the relatively attractive yields of municipal bonds.

The municipal market reversed abruptly in mid-June, when yields began to climb from their lows. Investors during this phase shifted their attention to the advancing equity market, which reduced demand for municipal bonds. Interest from cross-over investors also evaporated as the relative attractiveness of the taxable market returned. Issuance remained strong throughout this leg of the period, though it abated somewhat in the last three months of the reporting year. These forces combined to drive municipal bond yields off of their historic lows, ending the period where they began.

PERFORMANCE ANALYSIS

The trust's return can be calculated based upon either the market price or the net asset value (NAV) of its shares. NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities by the total number of common shares outstanding, while market price reflects the supply and demand for the shares. As a result, the two returns can differ significantly. On both a market price and an NAV basis, the trust outperformed its benchmark, the Lehman Brothers Municipal Bond Index. (See table below.)

The trust's significant position in health-care bonds generated attractive income, as well as price appreciation driven by yield-seeking investors drawn to the bonds' relatively robust yields. Certain issues in this sector met their investment objectives during the period, and we subsequently sold them in favor of bonds with superior total-return potential. Our strategy of avoiding housing bonds also helped the trust; the sector performed poorly amidst record levels of mortgage refinancing activity.

The trust uses leverage to enhance its dividend to common shareholders by borrowing money at short-term rates through the issuance of preferred shares. The proceeds are reinvested in longer-term securities, taking advantage of the difference between short- and longer-term rates. With short-term rates at historic lows during the period, the difference between short- and longer-term rates was relatively high. This made using leverage a particularly profitable approach during the period, and added to the trust's strong performance.

While the trust outperformed its benchmark, not all of its positions performed strongly over the entire period in question. With interest rates falling to

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

historic lows, our analysis showed an increasing possibility of a damaging upward shift in interest rates. We positioned the trust defensively by maintaining a duration (a measure of interest-rate sensitivity) that was slightly shorter than that of the benchmark during the period. This position helped the trust when rates climbed, but kept it from fully participating in the bond market rally earlier in the period.

We attempted to be equally defensive in managing the portfolio's maturity structure. Given the steepness of the yield curve for much of the period

(steepness is a measure of the difference in yields between long- and short-maturity securities), we focused on a strategy designed to outperform in a curve-flattening environment. We purchased premium bonds in the 13- to 20-year range which were priced to 10-year call dates. These bonds offer attractive yields compared to bonds with similar interest-rate risk. We sold bonds in the 7- to 10-year range, an area of the curve that we feel will underperform if short rates rise. This curve flattening did not occur as early as we anticipated, however, and the strategy hampered performance when short rates fell in the first part of the period. However, when long-bond yields rose in the latter part of the period, our emphasis on defensive bonds in the 13- to 20-year range helped to preserve principal.

In addition to this core strategy, we also traded high-grade bonds in the 30-year range based on relative value fluctuations. We sought out issues that were cheap relative to comparable bonds, and then sold them after they achieved their performance targets in order to reinvest the proceeds into securities that we believe that have greater total-return prospects.

Many municipalities faced budget shortfalls and potential credit downgrades during the period. In this challenging environment, we sought to preserve principal by emphasizing the highest credit quality tiers of the municipal bond market. As of October 31, 2003, approximately 83 percent of the trust's long-term investments were invested in bonds rated AA and above. We will continue with our disciplined investment approach, monitoring the market closely for compelling opportunities.

(a) As required, effective November 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began accreting market discount on fixed income securities. The effect of this change for the period ended October 31, 2002 was to increase net investment income per share by \$.01, decrease net realized and unrealized gains and losses per share by \$.01 and increase the ratio of net investment income to average net assets applicable to common shares by .03%. Per share, ratios and supplemental data for the periods prior to October 31, 2002 have not been restated to reflect this change in presentation.

(b) Total return assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.

(c) Ratios do not reflect the effect of dividend payments to preferred shareholders.

(d) Ratios reflect the effect of dividend payments to preferred shareholders.

(e) Calculated by subtracting the Trust's total liabilities (not including the preferred shares) from the Trust's total assets and dividing this by the number of preferred shares outstanding.

NOTES TO
FINANCIAL STATEMENTS

October 31, 2003

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Municipal Opportunity Trust II (the "Trust") is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Trust's investment objective is to provide a high level of current income exempt from federal income tax, consistent with preservation of capital. The Trust intends to invest substantially all of its assets in municipal securities rated investment grade at the time of investment. The Trust commenced investment operations on June 25, 1993.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Municipal bonds are valued by independent pricing services or dealers using the mean of the bid and asked prices or, in the absence of market quotations, at fair value based upon yield data relating to municipal bonds with similar characteristics and general market conditions. Securities which are not valued by independent pricing services or dealers are valued at fair value using procedures established in good faith by the Board of Trustees. Futures contracts are valued at the settlement price established each day on the exchange on which they are traded. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Trust may purchase and sell securities on a "when-issued" or "delayed delivery"

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

basis with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Trust will segregate assets with the custodian having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. At October 31, 2003, the Trust had \$4,340,599 of when-issued and delayed delivery purchase commitments.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis. Bond premium is amortized and discount is accreted over the expected life of each applicable security.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Trust intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At October 31, 2003, the Trust had an

18

NOTES TO FINANCIAL STATEMENTS

October 31, 2003

accumulated capital loss carryforward for tax purposes of \$1,415,668, which will expire between October 31, 2004 and October 31, 2008. Of this amount, \$343,729 will expire on October 31, 2004.

At October 31, 2003 the cost and related gross unrealized appreciation and depreciation are as follows:

Cost of investments for tax purposes.....	\$269,895,421
	=====
Gross tax unrealized appreciation.....	\$ 16,709,770
Gross tax unrealized depreciation.....	(561,371)

Net tax unrealized appreciation on investments.....	\$ 16,148,399
	=====

E. DISTRIBUTION OF INCOME AND GAINS The Trust declares and pays monthly dividends from net investment income to common shareholders. Net realized gains, if any, are distributed annually on a pro rata basis to common and preferred shareholders. Distributions from net realized gains for book purposes may include short-term capital gains and a portion of futures gains, which are included as ordinary income for tax purposes.

The tax character of distributions paid for the years ended October 31, 2003 and 2002 was as follows:

	2003	2002
Distributions paid from:		

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

Ordinary income.....	\$12,965	\$117,168
Long-term capital gain.....	-0-	-0-
	-----	-----
	\$12,965	\$117,168
	=====	=====

Due to inherent differences in the recognition of income, expenses and realized gain/ losses under accounting principles generally accepted in the United States of America and federal income tax purposes, permanent differences between book and tax basis reporting have been identified and appropriately reclassified on the Statement of Assets and Liabilities. Permanent book and tax differences relating to the capital loss carryforward expiring in the current year totaling \$11,045,981 were reclassified from accumulated net realized loss to paid in surplus. Additionally, permanent book and tax differences relating to book to tax accretion differences totaling \$21,009 have been reclassified from accumulated undistributed net investment income to accumulated net realized loss.

As of October 31, 2003, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income..... \$132,494

Net realized gains and losses may differ for financial reporting and tax purposes as a result of gains or losses recognized for tax purposes on open futures transactions on October 31, 2003 and the deferral of losses resulting from wash sales transactions.

NOTES TO FINANCIAL STATEMENTS

October 31, 2003

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, Van Kampen Investment Advisory Corp. (the "Adviser") will provide investment advice and facilities to the Trust for an annual fee payable monthly of .60% of the average daily net assets of the Trust. In addition, the Trust will pay a monthly administrative fee to Van Kampen Investments Inc. or its affiliates (collectively "Van Kampen"), the Trust's Administrator, at an annual rate of .05% of the average daily net assets of the Trust. The administrative services provided by the Administrator include record keeping and reporting responsibilities with respect to the Trust's portfolio and preferred shares and providing certain services to shareholders.

For the year ended October 31, 2003, the Trust recognized expenses of approximately \$19,600 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom (Illinois), counsel to the Trust, of which a trustee of the Trust is an affiliated person.

Under separate Accounting Services and Legal Services agreements, the Adviser provides accounting and legal services to the Trust. The Adviser allocates the cost of such services to each trust. For the year ended October 31, 2003, the Trust recognized expenses of approximately \$37,600 representing

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

Van Kampen's cost of providing accounting and legal services to the Trust, which are reported as part of "Other" and "Legal" expenses, respectively, in the Statement of Operations.

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are officers of Van Kampen.

The Trust has implemented deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

At October 31, 2003, Van Kampen owned 6,700 common shares of the Trust.

3. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$99,126,018 and \$102,510,669, respectively.

4. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

In order to seek to manage the interest rate exposure of the Trust's portfolio in a changing interest rate environment, the Trust may purchase or sell financial futures contracts or engage in transactions involving interest rate swaps, caps, floors or collars. The Trust expects to enter into these transactions primarily as a hedge against anticipated interest rate or fixed-income market changes, for duration management or for risk management purposes, but may also enter into these transactions to generate additional income. All of the Trust's portfolio holdings, including derivative instruments, are marked to market each day with the change in value reflected in the unrealized appreciation/depreciation. Upon disposition, a

20

NOTES TO FINANCIAL STATEMENTS

realized gain or loss is recognized accordingly, except when exercising a call option contract or taking delivery of a security underlying a futures contract. In this instance, the recognition of gain or loss is postponed until the disposal of the security underlying the futures contract.

During the period, the Trust invested in futures contracts, a type of derivative. A futures contract is an agreement involving the delivery of a particular asset on a specified future date at an agreed upon price. The Trust generally invests in exchange traded futures on U.S. Treasury Bonds and Notes and typically closes the contract prior to delivery date. These contracts are generally used to manage the Trust's effective maturity and duration. Upon entering into futures contracts, the Trust maintains an amount of cash or liquid securities with a value equal to a percentage of the contract amount with either a future commission merchant pursuant to rules and regulations promulgated under

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

the 1940 Act, as amended, or with its custodian in an account in the broker's name. This amount is known as initial margin. During the period the futures contract is open, payments are received from or made to the broker based upon changes in the value of the contract (the variation margin). The risk of loss associated with a futures contract is in excess of the variation margin reflected on the Statement of Assets and Liabilities.

Transactions in futures contracts for the year ended October 31, 2003, were as follows:

5. PREFERRED SHARES

As of October 31, 2003, the Trust has outstanding 4,600 Auction Preferred Shares ("APS") in three series. Series A and B each contain 1,600 shares while Series C contains 1,400 shares. Dividends are cumulative and the dividend rates are generally reset every 7 days through an auction process. The average rate in effect on October 31, 2003 was .885%. During the year ended October 31, 2003, the rates ranged from .500% to 1.800%.

21

NOTES TO FINANCIAL STATEMENTS

October 31, 2003

The Trust pays annual fees equivalent to .25% of the preferred share liquidation value for the remarketing efforts associated with the preferred auctions. These fees are included as a component of "Preferred Share

REPORT OF INDEPENDENT AUDITORS

To the Board of Trustees and Shareholders of Van Kampen Municipal Opportunity Trust II

We have audited the accompanying statement of assets and liabilities of Van Kampen Municipal Opportunity Trust II (the "Trust"), including the portfolio of investments, as of October 31, 2003, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the four years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The Trust's financial highlights for the periods ended prior to October 31, 2000, were audited by other auditors whose report, dated December 6, 1999, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 2003, by correspondence with the Trust's custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Van Kampen Municipal Opportunity Trust II as of October 31, 2003, the results of its operations, the changes in its net assets and the financial highlights for the respective stated periods, in conformity with accounting principles generally accepted in the United States of America.

DIVIDEND REINVESTMENT PLAN

The Trust offers a dividend reinvestment plan (the "Plan") pursuant to which Common Shareholders may elect to have dividends and capital gains distributions reinvested in Common Shares of the Trust. The Trust declares dividends out of net investment income, and will distribute annually net realized capital gains, if any. Common Shareholders may join or withdraw from the Plan at any time.

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

If you decide to participate in the Plan, State Street Bank and Trust Company, as your Plan Agent, will automatically invest your dividends and capital gains distributions in Common Shares of the Trust for your account.

HOW TO PARTICIPATE

If you wish to participate and your shares are held in your own name, call 1-800-341-2929 for more information and a Plan brochure. If your shares are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to see if it would participate in the Plan on your behalf. If you wish to participate in the Plan, but your brokerage firm, bank or nominee is unable to participate on your behalf, you should request that your shares be re-registered in your own name which will enable your participation in the Plan.

HOW THE PLAN WORKS

Participants in the Plan will receive the equivalent in Common Shares valued on the valuation date, generally at the lower of market price or net asset value, except as specified below. The valuation date will be the dividend or distribution payment date or, if that date is not a trading day on the national securities exchange or market system on which the Common Shares are listed for trading, the next preceding trading day. If the market price per Common Share on the valuation date equals or exceeds net asset value per Common Share on that date, the Trust will issue new Common Shares to participants valued at the higher of net asset value or 95% of the market price on the valuation date. In the foregoing situation, the Trust will not issue Common Shares under the Plan below net asset value. If net asset value per Common Share on the valuation date exceeds the market price per Common Share on that date, or if the Board of Trustees should declare a dividend or capital gains distribution payable to the Common Shareholders only in cash, participants in the Plan will be deemed to have elected to receive Common Shares from the Trust valued at the market price on that date. Accordingly, in this circumstance, the Plan Agent will, as agent for the participants, buy the Trust's Common Shares in the open market for the participants' accounts on or shortly after the payment date. If, before the Plan Agent has completed its purchases, the market price exceeds the net asset value per share of the Common Shares, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Trust's Common Shares, resulting in the acquisition of fewer Common

24

Shares than if the dividend or distribution had been paid in Common Shares issued by the Trust. All reinvestments are in full and fractional Common Shares and are carried to three decimal places.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Trust reserves the right to amend or terminate the Plan as applied to any dividend or distribution paid subsequent to written notice of the changes sent to all Common Shareholders of the Trust at least 90 days before the record date for the dividend or distribution. The Plan also may be amended or terminated by the Plan Agent by at least 90 days written notice to all Common Shareholders of the Trust.

COSTS OF THE PLAN

The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Trust. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. No other charges will be made to participants for reinvesting dividends or capital gains distributions, except for certain brokerage

Edgar Filing: VAN KAMPEN MUNICIPAL OPPORTUNITY TRUST II - Form N-CSR

commissions, as described above.

TAX IMPLICATIONS

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gains distributions does not relieve you of any income tax which may be payable on dividends or distributions.

RIGHT TO WITHDRAW

Plan participants may withdraw at any time by calling 1-800-341-2929 or by writing State Street Bank and Trust Company, P.O. Box 8200, Boston, MA 02266-8200. If you withdraw, you will receive, without charge, a share certificate issued in your name for all full Common Shares credited to your account under the Plan and a cash payment will be made for any fractional Common Share credited to your account under the Plan. You may again elect to participate in the Plan at any time by calling 1-800-341-2929 or writing to the Trust at:

The Van Kampen companies and investment products* respect your right to privacy. We also know that you expect us to conduct and process your business in an accurate and efficient manner. To do so, we must collect and maintain certain nonpublic personal information about you. This is information we collect from you on applications or other forms, and from the transactions you conduct with us, our affiliates, or third parties. We may also collect information you provide when using our Web site, and text files (also known as "cookies") may be placed on your computer to help us to recognize you and to facilitate transactions you initiate. We do not disclose any nonpublic personal information about you or any of our former customers to anyone, except as permitted by law. For instance, so that we may continue to offer you Van Kampen investment products and services that meet your investing needs, and to effect transactions that you request or authorize, we may disclose the information we collect to companies that perform services on our behalf, such as printers and mailers that assist us in the distribution of investor materials. These companies will use this information only for the services for which we hired them, and are not permitted to use or share this information for any other purpose. To protect your nonpublic personal information internally, we permit access to it only by authorized employees, and maintain physical, electronic and procedural safeguards to guard your nonpublic personal information.
