FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

**For the fiscal year ended December 31, 2006
Commission file number 001-11411**

POLARIS INDUSTRIES INC.
(Exact name of registrant as specified in its charter)

Minnesota
*(State or other jurisdiction
of incorporation or organization)*
2100 Highway 55, Medina MN
(Address of principal executive offices)

41-1790959
*(I.R.S. Employer
Identification No.)*
55340
(Zip Code)

(763) 542-0500

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Class	Name of Each Exchange on Which Registered
Common Stock, \$.01 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant was approximately \$1,679,704,894 as of February 21, 2007, based upon the last sales price per share of the registrant's Common Stock, as reported on the New York Stock Exchange on such date.

As of February 21, 2007, 35,521,137 shares of Common Stock, \$.01 par value, of the registrant were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's Annual Report to Shareholders for the year ended December 31, 2006 (the "2006 Annual Report") furnished to the Securities and Exchange Commission are incorporated by reference into Part II of this Form 10-K.

Portions of the definitive Proxy Statement for the registrant's Annual Meeting of Shareholders to be held on April 19, 2007 filed with the Securities and Exchange Commission (the "2007 Proxy Statement") are incorporated by reference into Part III of this Form 10-K.

Table of Contents**PART I****Item 1. Business**

Polaris Industries Inc. (the Company or Polaris), a Minnesota corporation, was formed in 1994 and is the successor to Polaris Industries Partners LP. The term Polaris as used herein refers to the business and operations of the Company, its subsidiaries and its predecessors which began doing business in the early 1950's. Polaris designs, engineers and manufactures all terrain vehicles (ATVs), snowmobiles, and motorcycles and markets them, together with related replacement parts, garments and accessories (PG&A) through dealers and distributors principally located in the United States, Canada and Europe. Sales of ATVs, snowmobiles, motorcycles, and PG&A accounted for the following approximate percentages of Polaris sales for the years ended December 31:

	ATVs	Snowmobiles	Motorcycles	PG&A
2006	67%	10%	7%	16%
2005	66%	14%	5%	15%
2004	66%	16%	4%	14%

On September 2, 2004, the Company announced its decision to discontinue the manufacture of marine products effective immediately. The marine products division's financial results are reported separately as discontinued operations for all periods presented. See Note 9 of Notes to Consolidated Financial Statements for a discussion of the discontinuation of marine products.

Industry Background

All Terrain Vehicles. ATVs are four-wheel vehicles with balloon style tires designed for off-road use and traversing rough terrain, swamps and marshland. ATVs are used for recreation, in such sports as fishing and hunting, as well as for utility purposes on farms, ranches and construction sites.

ATVs were introduced to the North American market in 1971 by Honda. Other Japanese motorcycle manufacturers including Yamaha, Kawasaki and Suzuki entered the North American ATV market in the late 1970s and early 1980s. Polaris entered the ATV market in 1985, Arctic Cat entered in 1995 and Bombardier Recreational Products Inc. (Bombardier) entered in 1998. In 2004, John Deere entered into the North American ATV market. By 1985, the number of three- and four-wheel ATVs sold in North America had grown to approximately 650,000 units per year, then dropped dramatically to a low of 148,000 in 1989. Since that time, the industry has grown each year in North America until 2005. Polaris estimates that during the calendar year 2006 the world-wide industry sales declined four percent from 2005 levels with approximately 1,088,000 ATVs sold worldwide.

Polaris also competes in the utility vehicle market with its *RANGER*tm off-road utility vehicle products. Polaris estimates that the utility vehicle market sales grew approximately 19 percent during the calendar year 2006 over 2005 levels with approximately 255,000 utility vehicles sold worldwide. The main competitors for the *RANGER*tm are John Deere, Kawasaki, Yamaha, Arctic Cat and Kubota.

Polaris estimates that during the calendar year 2006 the ATV and utility vehicle industry sales combined, declined one percent from 2005 levels with approximately 1,343,000 units sold worldwide.

Snowmobiles. In the early 1950s, a predecessor to Polaris produced a gas powered sled which became the forerunner of the Polaris snowmobile. Snowmobiles have been manufactured under the Polaris name since 1954.

Originally conceived as a utility vehicle for northern, rural environments, the snowmobile gained popularity as a recreational vehicle. From the mid-1950s through the late 1960s, over 100 producers entered the snowmobile market and snowmobile sales reached a peak of approximately 495,000 units in 1971. The Polaris product survived the industry decline in which snowmobile sales fell to a low point of approximately 87,000 units in 1983 and the number of snowmobile manufacturers serving the North American market declined to four: Yamaha, Bombardier, Arctic Cat and Polaris. Polaris estimates that during the season ended March 31, 2006, industry sales of snowmobiles on a worldwide basis were approximately 165,000 units, a decrease of five percent from the previous season.

Table of Contents

Motorcycles. Heavyweight motorcycles are over the road vehicles utilized as a mode of transportation as well as for recreational purposes. There are four segments: cruisers, touring, sport bikes, and standard motorcycles.

Polaris entered the motorcycle market in 1998 with an initial entry product in the cruiser segment. U.S. industry retail cruiser sales more than doubled from 1996 to 2004. Polaris entered the touring segment in 2000. Polaris estimates that the cruiser and touring market segments combined grew three percent in 2006 over 2005 levels with approximately 480,000 cruiser and touring motorcycles sold in the U.S. market. Other major cruiser and touring motorcycle manufacturers include BMW, Harley Davidson, Honda, Yamaha, Kawasaki and Suzuki.

Products

All Terrain Vehicles. Polaris entered the ATV market in the spring of 1985. Polaris currently produces four-wheel ATVs, which provide more stability for the rider than earlier three-wheel versions. Polaris' line of ATVs, consisting of twenty models, includes general purpose, sport and four-wheel drive utility models, with 2007 model year suggested United States retail prices ranging from approximately \$2,000 to \$13,000. In 2000, Polaris introduced its first youth ATV models. In addition, Polaris also introduced a six-wheel off-road utility vehicle and the Polaris *RANGER*tm, an off-road side-by-side utility and recreational vehicle. In 2001, Polaris expanded its utility line, the Polaris Professional Series (PPS), with a third party sourced all surface loader product as well as a 4X4 and 6X6 ATV (ATV Pro), which were modifications of existing products. In 2004, the PPS line was phased out and the *RANGER*tm line expanded to meet both the commercial and recreational customer.

Most of Polaris' ATVs feature the totally automatic Polaris variable transmission, which requires no manual shifting, and a MacPherson strut front suspension, which enhances control and stability. Polaris' on demand all-wheel drive provides industry leading traction performance and ride quality thanks to its patented on demand, easy shift on-the-fly design. Polaris' ATVs include two-cycle and four-cycle engines and both shaft and concentric chain drive. In 1999, Polaris introduced its first manual transmission ATV models. In 2003, Polaris introduced the industry's first electronic fuel injected ATV, the Sportsman 700 EFI. In 2005, Polaris introduced the industry's first independent rear suspension on a sport ATV named the Outlawtm. In January 2007, Polaris introduced the *RANGER RZR*tm, a big bore recreational side-by-side model.

Snowmobiles. Polaris produces a full line of snowmobiles, consisting of twenty-five models, ranging from youth models to utility and economy models to performance and competition models. The 2007 model year suggested United States retail prices range from approximately \$2,200 to \$10,500. Polaris snowmobiles are sold principally in the United States, Canada and Europe. Polaris believes its snowmobiles have a long-standing reputation for quality, dependability and performance. Polaris believes that it and its predecessors were the first to develop several features for wide commercial use in snowmobiles, including independent front suspension, long travel rear suspension, hydraulic disc brakes, liquid cooling for brakes and a three cylinder engine. In 2001, Polaris introduced a new, more environmentally-friendly snowmobile featuring a four-stroke engine designed specifically for snowmobiles.

Motorcycles. In 1998, Polaris began manufacturing V-twin cruiser motorcycles under the Victory[®] brand name. Polaris' 2007 model year line of motorcycles consists of nine models, the Victory Vegas[®], Kingpin[®], Kingpin[®] Tour, Hammertm, Hammertm S, Eight Balltm, Vegas Jackpottm and two limited edition Arlen and Cory Ness Signature Series Vegas Jackpots. Suggested United States retail prices for the 2007 model year Victory motorcycles ranged from approximately \$13,400 to \$23,000. In January 2007, Polaris introduced its first luxury touring model, the Victory Visiontm.

Parts, Garments and Accessories. Polaris produces or supplies a variety of replacement parts and accessories for its ATVs, snowmobiles, motorcycles and personal watercraft. ATV accessories include winches, bumper/brushguards,

plows, racks, mowers, tires, pull-behinds, and oil. Snowmobile accessories include products such as covers, traction products, reverse kits, electric starters, tracks, bags, windshields, oil and lubricants. Motorcycle accessories include saddle bags, handlebars, backrests, exhaust, windshields, seats, oil and various chrome accessories. Polaris also markets a full line of recreational apparel including helmets, jackets, bibs and pants, leathers and hats for its snowmobile, ATV, and motorcycle lines. The apparel is designed to Polaris specifications, purchased from independent vendors and sold by Polaris through its dealers and distributors, and online through its e-commerce subsidiary under the Polaris brand name.

Table of Contents

Discontinued Operations – Marine Products. Polaris entered the personal watercraft (PWC) market in 1992. On September 2, 2004, the Company announced that it had decided to cease to manufacture marine products effective immediately. As technology and the distribution channel evolved, the marine division's lack of commonality with other Polaris product lines created challenges for Polaris and its dealer base. The marine division continued to experience escalating costs and increasing competitive pressures and was never profitable for Polaris. See Note 9 of Notes to Consolidated Financial Statements for a discussion of the discontinuation of marine products.

Manufacturing and Distribution Operations

Polaris' products are assembled at its original manufacturing facility in Roseau, Minnesota and at its facilities in Spirit Lake, Iowa and Osceola, Wisconsin. Since snowmobiles, ATVs and motorcycles incorporate similar technology, substantially the same equipment and personnel are employed in their production. Polaris is vertically integrated in several key components of its manufacturing process, including plastic injection molding, stamping, welding, clutch assembly and balancing, painting, cutting and sewing, and manufacture of foam seats. Fuel tanks, tracks, tires and instruments, and certain other component parts are purchased from third party vendors. Polaris manufactures a number of other components for its snowmobiles, ATVs, and motorcycles. Raw materials or standard parts are readily available from multiple sources for the components manufactured by Polaris. Polaris' work force is familiar with the use, operation and maintenance of the products, since many employees own snowmobiles, ATVs, and motorcycles. In 1991, Polaris acquired a manufacturing facility in Osceola, Wisconsin to manufacture component parts previously produced by third party suppliers. In 1994, Polaris acquired a manufacturing facility in Spirit Lake, Iowa in order to expand the assembly capacity of the Company. Certain operations, including engine assembly and the bending of frame tubes, seat manufacturing, drivetrain and exhaust assembly and stamping are conducted at the Osceola, Wisconsin facility. In 1998, Victory motorcycle production began at Polaris' Spirit Lake, Iowa facility. The production process in Spirit Lake includes welding, finish painting, and final assembly. In early 2002, Polaris completed the expansion and renovation of its Roseau manufacturing facility, which has increased capacity and enhanced production flexibility.

Pursuant to informal agreements between Polaris and Fuji Heavy Industries Ltd. (Fuji), Fuji was the exclusive manufacturer of Polaris' two-cycle snowmobile engines from 1968 to 1995. Fuji has manufactured engines for Polaris ATV products since their introduction in the spring of 1985. Fuji develops such engines to the specific requirements of Polaris. Polaris believes its relationship with Fuji to be excellent. If, however, Fuji terminated its relationship, interruption in the supply of engines would adversely affect Polaris' production pending the continued development of substitute supply arrangements.

In addition, Polaris entered into an agreement with Fuji to form Robin Manufacturing, U.S.A. (Robin) in 1995. Under the agreement, Polaris made an investment for a 40% ownership position in Robin, which builds engines in the United States for recreational and industrial products. See Note 7 of Notes to Consolidated Financial Statements for a discussion of the Robin agreement.

Polaris has been designing and producing its own engines for select models of snowmobiles since 1995 and for all Victory motorcycles since 1998, and for select ATV models since 2001.

In 2000, Polaris entered into an agreement with a Taiwan manufacturer to co-design, develop and produce youth ATVs. In 2004, Polaris expanded the agreement with the Taiwan manufacturer to include the design, development and production of a value-priced Phoenix ATV model and in 2005 to include the Sawtooth ATV model. In 2002, Polaris entered into an agreement with a German manufacturer to co-design, develop and produce four-stroke engines for PWC and snowmobiles. In 2006, Polaris entered into a long term supply agreement with KTM Power Sports AG (KTM) whereby KTM supplies four-stroke engines for use in certain Polaris ATVs.

Polaris anticipates no significant difficulties in obtaining substitute supply arrangements for other raw materials or components that it generally obtains from limited sources.

Contract carriers ship Polaris products from its manufacturing and distribution facilities to our customers.

Table of Contents

Polaris maintains distribution facilities in Vermillion, South Dakota; Winnipeg, Manitoba; Passy, France; Askim, Norway; Ostersund, Sweden; Gloucester, United Kingdom and Ballarat, Victoria, Australia. These facilities distribute PG&A products to our North American dealers and international dealers and distributors.

Production Scheduling

Polaris products are produced and delivered throughout the year. Orders for ATVs are placed by the dealers periodically throughout the year. Delivery of snowmobiles to consumers begins in autumn and continues during the winter season. Orders for each year's production of snowmobiles are placed by the dealers in the spring. Orders for Victory motorcycles are placed by the dealers in the summer after meetings with dealers. Units are built to order each year subject to fluctuations in market conditions and supplier lead times. In addition, non-refundable deposits made by consumers to dealers in the spring for pre-ordered snowmobiles assist in production planning. The anticipated volume of units to be produced is substantially committed to by dealers and distributors prior to production. Retail sales activity at the dealer level is monitored by Polaris for snowmobiles, ATVs, and motorcycles and incorporated into each product's production scheduling.

Manufacture of snowmobiles commences in late winter of the previous season and continues through late autumn or early winter of the current season. Since 1993, Polaris has had the ability to manufacture ATVs year round. Victory motorcycle manufacturing began in 1998 and continues year round. Polaris has the ability to alternate production of the various products on the existing manufacturing lines as demand dictates.

Sales and Marketing

Polaris products are sold through a network of 1,700 independent dealers in North America, and through five subsidiaries and 40 distributors in 126 countries outside of North America.

Polaris sells its snowmobiles directly to dealers in the snowbelt regions of the United States and Canada. Many dealers and distributors of Polaris snowmobiles also distribute Polaris ATVs. At the end of 2006, approximately 900 Polaris dealers were located in areas of the United States where snowmobiles are not regularly sold. Unlike its primary competitors, which market their ATV products principally through their affiliated motorcycle dealers, Polaris also sells its ATVs through lawn and garden and farm implement dealers.

With the exception of France, Great Britain, Sweden, Norway, Australia and New Zealand, sales of Polaris products in Europe and other offshore markets are handled through independent distributors. In 1999, Polaris acquired certain assets of its distributor in Australia and New Zealand and now distributes its products to its dealer network in those countries through a wholly-owned subsidiary. During 2000, Polaris acquired its distributor in France and now distributes its products to its dealer network in France through a wholly-owned subsidiary. In 2002, Polaris acquired certain assets of its distributors in Great Britain, Sweden and Norway and now distributes its products to its dealer networks in Great Britain, Sweden and Norway through wholly-owned subsidiaries. See Notes 1 and 10 of Notes to Consolidated Financial Statements for a discussion of international operations.

Victory motorcycles are distributed directly through authorized Victory dealers. Polaris has a high quality dealer network in North America for its other product lines from which many of the approximately 360 current Victory dealers were selected. Polaris expects to develop a Victory dealer network totaling approximately 450 dealers over the next few years.

Dealers and distributors sell Polaris products under contractual arrangements pursuant to which the dealer or distributor is authorized to market specified products, required to carry certain replacement parts and perform certain

warranty and other services. Changes in dealers and distributors take place from time to time. Polaris believes a sufficient number of qualified dealers and distributors exist in all geographic areas to permit an orderly transition whenever necessary.

In 1996, a wholly-owned subsidiary of Polaris entered into a partnership agreement with a subsidiary of Transamerica Distribution Finance (TDF) to form Polaris Acceptance. Polaris Acceptance provides floor plan financing to Polaris dealers in the United States. Under the partnership agreement, Polaris has a 50% equity interest in Polaris Acceptance. Polaris does not guarantee the outstanding indebtedness of Polaris Acceptance. In 2004, TDF was merged with a subsidiary of General Electric Company and, as a result of that merger, TDF s name was

Table of Contents

changed to GE Commercial Distribution Finance Corporation (GECDF). No significant change in the Polaris Acceptance relationship has resulted from the change of ownership from TDF. In November 2006, Polaris Acceptance sold a majority of its receivable portfolio to a Securitization Facility (Securitization Facility) arranged by General Electric Capital Corporation, a GECDF affiliate, and the partnership agreement was amended to provide that Polaris Acceptance would continue to sell portions of its receivable portfolio to the Securitization Facility from time to time on an ongoing basis. See Notes 3 and 6 of Notes to Consolidated Financial Statements for a discussion of the financial services arrangement.

Polaris has arrangements with Polaris Acceptance (United States) and GE affiliates (Australia, Canada, France, Germany, Great Britain, New Zealand, Norway and Sweden) to provide floor plan financing for its dealers. Substantially all of Polaris North American sales of snowmobiles, ATVs, motorcycles and related PG&A are financed under arrangements whereby Polaris is paid within a few days of shipment of its product. Polaris participates in the cost of dealer financing and has agreed to repurchase products from the finance companies under certain circumstances and subject to certain limitations. Polaris has not historically been required to repurchase a significant number of units. However, there can be no assurance that this will continue to be the case. If necessary, Polaris will adjust its sales return allowance at the time of sale should management anticipate material repurchases of units financed through the finance companies. See Note 6 of Notes to Consolidated Financial Statements for a discussion of this financial services arrangement.

In October 2001 Household Bank (SB), N.A. (Household) and a wholly-owned subsidiary of Polaris entered into a Revolving Program Agreement with Household to provide retail financing to consumers who buy Polaris products in the United States. In August 2005, the wholly-owned subsidiary of Polaris entered into a multi-year contract with HSBC Bank Nevada, National Association (HSBC), formerly known as Household Bank (SB), N.A. under which HSBC will continue managing the Polaris private label credit card program under the StarCard label. The 2005 agreement provides for income to be paid to Polaris based on a percentage of the volume of retail credit business generated. The previous agreement provided for equal sharing of all income and losses with respect to the retail credit portfolio, subject to certain limitations. The 2005 contract removes all credit, interest rate and funding risk to Polaris and also eliminates the need for Polaris to maintain a retail credit cash deposit with HSBC, which was \$50.0 million at August 1, 2005. See Note 6 of Notes to Consolidated Financial Statements for a discussion of this financial services arrangement.

Polaris promotes the Polaris brand among the riding and non-riding public and provides a wide range of products for enthusiasts by licensing the name Polaris. The Company currently licenses the production and sale of a range of items, including die cast toys, video games, boots, and numerous other products.

During 2000, a wholly-owned subsidiary of Polaris established an e-commerce site, purepolaris.com, to sell clothing and accessories over the Internet directly to consumers. The site has been developed with a revenue sharing arrangement with the dealers.

Polaris marketing activities are designed primarily to promote and communicate directly with consumers and secondarily to assist the selling and marketing efforts of its dealers and distributors. Polaris makes available and advertises discount or rebate programs, retail financing or other incentives for its dealers and distributors to remain price competitive in order to accelerate retail sales to consumers. Polaris advertises its products directly using print advertising in the industry press and in user group publications, billboards, television and radio. Polaris also provides media advertising and partially underwrites dealer and distributor media advertising to a degree and on terms which vary by product and from year to year. From time to time, Polaris produces promotional films for its products, which are available to dealers for use in the showroom or at special promotions. Polaris also provides product brochures, leaflets, posters, dealer signs, and miscellaneous other promotional items for use by dealers.

Polaris expended approximately \$108.9 million for sales and marketing in 2006, \$108.4 million in 2005, and \$110.6 million in 2004.

Engineering, Research and Development, and New Product Introduction

Polaris employs approximately 400 persons primarily in its Roseau and Wyoming, Minnesota facilities who are engaged in the development and testing of existing products and research and development of new products and

Table of Contents

improved production techniques. Management believes Polaris and its predecessors were the first to develop, for wide commercial use, independent front suspensions for snowmobiles, long travel rear suspensions for snowmobiles, liquid cooled snowmobile brakes, hydraulic brakes for snowmobiles, the three cylinder engine in snowmobiles, the adaptation of the MacPherson strut front suspension, on demand four-wheel drive systems and the Concentric Drive System for use in ATVs, the application of a forced air cooled variable power transmission system to ATVs and the use of electronic fuel injection for ATVs.

Polaris utilizes internal combustion engine testing facilities to design and optimize engine configurations for its products. Polaris utilizes specialized facilities for matching engine, exhaust system and clutch performance parameters in its products to achieve desired fuel consumption, power output, noise level and other objectives. Polaris' engineering department is equipped to make small quantities of new product prototypes for testing by Polaris' testing teams and for the planning of manufacturing procedures. In addition, Polaris maintains numerous test facilities where each of the products is extensively tested under actual use conditions. In 2005, Polaris completed construction of its 127,000 square-foot research and development facility in Wyoming, Minnesota for engineering, design and development personnel for Polaris' line of ATVs and Victory motorcycles. Total cost of the facility was approximately \$35 million.

Polaris expended for research and development approximately \$73.9 million in 2006, \$71.0 million in 2005, and \$63.8 million in 2004.

Investment in KTM Power Sports AG

In 2005 Polaris purchased a 25 percent interest in Austrian motorcycle manufacturer KTM Power Sports AG (KTM) and began several important strategic projects with KTM intended to strengthen the competitive position of both companies and provide tangible benefits to their respective customers, dealers, suppliers and shareholders. Additionally, Polaris and KTM's largest shareholder, Cross Industries AG (Cross), entered into an option agreement, which provided that under certain conditions in 2007, either Cross could purchase Polaris' interest in KTM or, alternatively, Polaris could purchase Cross' interest in KTM. In December 2006, Polaris and Cross cancelled the option agreement and entered into a share purchase agreement for the sale by the Company of approximately 1.38 million shares of KTM, or approximately 80 percent of its investment in KTM, to a subsidiary of Cross for a purchase price of approximately 58.5 million Euros. The agreement provided for completion of the sale of the KTM shares in two stages. On February 20, 2007, Polaris and Cross completed the sale of approximately 1.11 million shares for a purchase price of approximately 47.0 million Euros. The completion of the sale of an additional 0.27 million shares is to take place on or before June 15, 2007. At the conclusion of the transaction, Polaris will then hold ownership of approximately 0.34 million shares, representing slightly less than 5 percent of KTM's outstanding shares.

Competition

The ATV, snowmobile, motorcycle, and utility vehicle markets in the United States and Canada are highly competitive. Competition in such markets is based upon a number of factors, including price, quality, reliability, styling, product features and warranties. At the dealer level, competition is based on a number of factors including sales and marketing support programs (such as financing and cooperative advertising). Certain Polaris competitors are more diversified and have financial and marketing resources which are substantially greater than those of Polaris.

Management believes Polaris' products are competitively priced and Polaris' sales and marketing support programs for dealers are comparable to those provided by its competitors. Polaris' products compete with many other recreational products for the discretionary spending of consumers, and, to a lesser extent, with other vehicles designed for utility applications.

Product Safety and Regulation

Safety regulation. The federal government and individual states have promulgated or are considering promulgating laws and regulations relating to the use and safety of Polaris products. The federal government is the primary regulator of product safety.

Table of Contents

Polaris ATVs are subject to vehicle safety standards administered by the U.S. Consumer Product Safety Commission (CPSC). In 1988, Polaris, five competitors and the CPSC entered into a ten-year consent decree settling litigation involving CPSC s attempt to force an industry-wide recall of all three-wheel ATVs and four-wheel ATVs sold that could be used by children under 16 years of age.

The settlement required, among other things, that ATV purchasers receive hands on training. In April 1998 this consent decree expired, and Polaris entered into a voluntary action plan under which Polaris agreed to continue various activities previously required under the consent decree, including age recommendations, warning labels, point of purchase materials, hands on training and an information and education effort. Polaris also agreed to continue dealer monitoring to ascertain dealer compliance with safety obligations including age recommendations and training requirements.

Polaris does not believe that its voluntary action plan will have a material adverse effect on Polaris or negatively affect its business to any greater degree than those of its competitors who have undertaken similar action plans with the CPSC. Nevertheless, there can be no assurance that future recommendations or regulatory actions by the federal government or individual states would not have an adverse effect on the Company. Polaris will continue to attempt to assure that its dealers are in compliance with their safety obligations. Polaris has notified its dealers that it may terminate or not renew any dealer it determines has violated such safety obligations. Polaris believes that its ATVs have always complied with safety standards relevant to ATVs.

On January 13, 2005, Polaris announced that it had reached an agreement with the CPSC to pay \$950,000 to settle two long-standing disputes. The disputes were related to CPSC allegations that in the late 1990 s Polaris was not timely in reporting two recalls related to problems with throttle controls and oil lines in certain Polaris ATV models. Polaris disagreed strongly with these allegations but agreed to settle with the CPSC to avoid continuing legal costs associated with protracted legal proceedings.

In August 2006, the CPSC issued a Notice of Proposed Rulemaking to establish mandatory standards for ATVs and to ban three-wheeled ATVs. The proposed rules in large part would require all ATV manufacturers to comply with ANSI/SVIA safety standards which are now voluntary. Polaris currently complies with these standards. Polaris no longer makes three-wheeled ATVs so a three-wheeled ban would not affect Polaris production. Polaris does not believe that the rules will negatively affect its business to any greater degree than those of its competitors who would also be subject to the same mandatory standards.

Polaris snowmobiles are subject to vehicle safety standards administered by the CPSC. Polaris is a member of the International Snowmobile Manufacturers Association (ISMA), a trade association formed to promote safety in the manufacture and use of snowmobiles, among other things. ISMA members include all of the major snowmobile manufacturers. The ISMA members are also members of the Snowmobile Safety and Certification Committee, which promulgated voluntary sound and safety standards for snowmobiles. These standards require testing and evaluation by an independent testing laboratory. Polaris believes that its snowmobiles have always complied with safety standards relevant to snowmobiles.

Polaris PWC are subject to federal vehicle safety standards administered by the U.S. Coast Guard. Polaris believes that its PWC always complied with safety standards relevant to PWC.

Victory motorcycles are subject to federal vehicle safety standards administered by the National Highway Transportation Safety Administration. Victory motorcycles are also subject to various state vehicle safety standards. Polaris believes that its motorcycles have always complied with safety standards relevant to motorcycles.

Polaris products are also subject to international standards related to safety in places where it sells its products outside the United States. Polaris believes that its Victory motorcycles, ATVs, PWC and snowmobiles have always complied with applicable safety standards in the United States and internationally.

Emissions. The federal Environmental Protection Agency (EPA) and the California Air Resources Board (CARB) have adopted emissions regulations applicable to Polaris products.

CARB has emission regulations for ATVs and off-road utility vehicles which the Company already meets. In October 2002, the EPA established new corporate average emission standards effective for model years 2006 through 2012 for non-road recreational vehicles including ATVs, off road utility vehicles and snowmobiles. The

Table of Contents

Company has developed engine and emission technologies along with its existing technology base to meet current and future requirements. In 2002, Polaris entered into an agreement with a German manufacturer to supply four-stroke engines that meet emission requirements for certain snowmobile models.

Victory motorcycles are also subject to EPA and CARB emission standards. Polaris believes that its motorcycles have always complied with these standards. The CARB regulations require additional motorcycle emission reductions in model year 2008. The EPA adopted the CARB emission limits in a January 2004 rulemaking that allows an additional two model years to meet these new CARB emission requirements on a nationwide basis. The Company has developed engine and emission technologies to meet these requirements nationwide by 2010.

Polaris products are also subject to international laws and regulations related to emissions in places where it sells its products outside the United States. Europe currently regulates emissions from certain of the Company's ATV-based products and motorcycles and the Company meets these requirements. Canada's emission regulations for motorcycles are similar to those in the U.S. In December 2006 Canada proposed a new regulation that would essentially adopt the U.S. emission standards for ATVs, off-road utility vehicles, and snowmobiles. These regulations are expected to become effective in 2008.

Polaris believes that its Victory motorcycles, ATVs, PWC, and snowmobiles have always complied with applicable emission standards and related regulations in the United States and internationally. Polaris is unable to predict the ultimate impact of the adopted or proposed regulations on Polaris and its business. Polaris is currently developing and obtaining engine and emission technologies to meet the requirements of the future emission standards.

Use regulation. State and federal laws and regulations have been promulgated or are under consideration relating to the use or manner of use of Polaris' products. Some states and localities have adopted, or are considering the adoption of, legislation and local ordinances which restrict the use of PWC or ATVs to specified hours and locations. The federal government also has restricted the use of ATVs, PWC, and snowmobiles in some national parks. In several instances this restriction has been a ban on the recreational use of these vehicles.

Polaris is unable to predict the outcome of such actions or the possible effect on its business. Polaris believes that its business would be no more adversely affected than those of its competitors by the adoption of any pending laws or regulations. Polaris continues to monitor these activities in conjunction with industry associations and supports balanced and appropriate programs that educate the product user on safe use of its products and how to protect the environment.

Employment

Due to the seasonality of the Polaris business and certain changes in production cycles, total employment levels vary throughout the year. Despite such variations in employment levels, employee turnover has not been high. During 2006, Polaris employed an average of approximately 3,400 persons. Approximately 1,400 of its employees are salaried. Polaris considers its relations with its employees to be excellent. Polaris' employees have not been represented by a union since July 1982.

Available Information

Polaris' Internet website is <http://www.polarisindustries.com>. Polaris makes available free of charge, on or through its website, its annual, quarterly and current reports, and any amendments to those reports, as soon as reasonably practicable after electronically filing such reports with the Securities and Exchange Commission. Polaris also makes available through its website its corporate governance materials, including its Corporate Governance Guidelines, the charters of the Audit Committee, Compensation Committee, Corporate Governance and Nominating Committee and

Technology Committee of its Board of Directors and its Code of Business Conduct and Ethics. Any shareholder or other interested party wishing to receive a copy of these corporate governance materials should write to Polaris Industries Inc., 2100 Highway 55, Medina, Minnesota 55340, Attention: Investor Relations. Information contained on Polaris website is not part of this report.

Forward-Looking Statements

This 2006 Annual Report contains not only historical information, but also forward-looking statements intended to qualify for the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements can generally be identified as such because the context of the statement will include words such as the Company or management believes, anticipates, expects, estimates or words of similar import. Similarly, statements that describe the Company's future plans, objectives or goals are also forward-looking. Forward-looking statements may also be made from time to time in oral presentations, including telephone conferences and/or webcasts open to the public. Shareholders, potential investors and others are cautioned that all forward-looking statements involve risks and uncertainties that could cause results in future periods to differ materially from those anticipated by some of the statements made in this report, including the risks and uncertainties described below under the heading entitled Item 1A Risk Factors and elsewhere in this report. The risks and uncertainties discussed in this report are not exclusive and other factors that the Company may consider immaterial or do not anticipate may emerge as significant risks and uncertainties.

Any forward-looking statements made in this report or otherwise speak only as of the date of such statement, and Polaris undertakes no obligation to update such statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements. Polaris advises you, however, to consult any further disclosures made on related subjects in future quarterly reports on Form 10-Q and current reports on Form 8-K that are filed with or furnished to the Securities and Exchange Commission.

Item 1A. Risk Factors

The following are significant factors known to Polaris that could materially adversely affect the Company's business, financial condition, or operating results, as well as adversely affect the value of an investment in Polaris common stock.

Polaris products are subject to extensive U.S. federal and state and international safety, environmental and other government regulation that may require the Company to incur expenses or modify product offerings in order to maintain compliance with the actions of regulators.

Polaris products are subject to extensive laws and regulations relating to safety, environmental and other regulations promulgated by the U.S. federal government and individual states as well as international regulatory authorities. Although Polaris believes that its snowmobiles, ATVs, and motorcycles have always complied with applicable vehicle safety and emissions standards and related regulations, there can be no assurance that future regulations will not require additional safety standards or emission reductions that would require additional expenses and/or modification of product offerings in order to maintain such compliance. Although Polaris is unable to predict the ultimate impact of adopted or proposed regulations on its business and operating results, Polaris believes that its business would be no more adversely affected than those of its competitors by the adoption of any pending laws or regulations. Polaris products are also subject to laws and regulations that restrict the use or manner of use during certain hours and locations. Polaris continues to monitor these activities in conjunction with industry associations and supports balanced and appropriate programs that educate the product user on safe use of its products and how to protect the environment.

A significant adverse determination in any material product liability claim against Polaris could adversely affect the operating results or financial condition.

Polaris product liability insurance limits and coverage were adversely affected by the general decline in the availability of liability insurance starting in 1985. As a result of the high cost of premiums, and the historically

insignificant amount of claims paid by Polaris, Polaris was self-insured from June 1985 to June 1996. In June 1996, Polaris purchased excess insurance coverage for catastrophic product liability claims for incidents occurring subsequent to the policy date that exceeded its self-insured retention levels. In September 2002, due to insurance market conditions resulting in significantly higher proposed premium costs, Polaris again elected not to purchase insurance for product liability losses. The estimated costs resulting from any losses are charged to expense when it is probable a loss has been incurred and the amount of the loss is reasonably determinable.

Table of Contents

Polaris had a product liability reserve accrual on its balance sheet of \$9.2 million at December 31, 2006 for the possible payment of pending claims related to continuing operations and \$4.3 million for discontinued operations for legal, regulatory and other costs related to marine products. Polaris believes such accruals are adequate. Polaris does not believe the outcome of any pending product liability litigation will have a material adverse effect on the operations of Polaris. However, no assurance can be given that its historical claims record, which did not include ATVs prior to 1985 or motorcycles prior to 1998, will not change or that material product liability claims against Polaris will not be made in the future. Adverse determination of material product liability claims made against Polaris would have a material adverse effect on Polaris' financial condition. See Note 8 of Notes to Consolidated Financial Statements.

Significant product repair and/or replacement due to product warranty claims or product recalls could have a material adverse impact on the results of operation.

Polaris provides a limited warranty for ATVs for a period of six months and for a period of one year for its snowmobiles and motorcycles. Polaris may provide longer warranties related to certain promotional programs, as well as longer warranties in certain geographical markets as determined by local regulations and market conditions. Although Polaris employs quality control procedures, sometimes a product is distributed which needs repair or replacement. Polaris' standard warranties require the Company or its dealers to repair or replace defective products during such warranty periods at no cost to the consumer. Historically, product recalls have been administered through Polaris' dealers and distributors and have not had a material effect on Polaris' business. See Note 1 of Notes to Consolidated Financial Statements.

Changing weather conditions may reduce demand and negatively impact net sales of certain Polaris products.

Lack of snowfall in any year in any particular region of the United States or Canada may adversely affect snowmobile retail sales and related PG&A sales in that region. Polaris seeks to minimize this potential effect by stressing pre-season sales (see Business Production Scheduling) and facilitate the transfer of dealer inventories from one location to another and by balancing production to retail sales and industry conditions. However, there is no assurance that weather conditions would not have a material effect on Polaris' sales of ATVs, snowmobiles, motorcycles, or PG&A.

Polaris faces intense competition in all product lines, including from some competitors that have greater financial and marketing resources. Failure to compete effectively against competitors would negatively impact Polaris business and operating results.

The snowmobile, ATV and motorcycle markets in the United States and Canada are highly competitive. Competition in such markets is based upon a number of factors, including price, quality, reliability, styling, product features and warranties. At the dealer level, competition is based on a number of factors including sales and marketing support programs (such as financing and cooperative advertising). Certain Polaris competitors are more diversified and have financial and marketing resources which are substantially greater than those of Polaris. In addition, Polaris' products compete with many other recreational products for the discretionary spending of consumers, and, to a lesser extent, with other vehicles designed for utility applications. Although Polaris has been able to effectively compete with its numerous competitors, failure to do so could have a material adverse effect on future business performance.

Termination or interruption of informal supply arrangements could have a material adverse effect on the Company's business or results of operations.

Pursuant to informal agreements between Polaris and Fuji in Japan, Fuji was the exclusive manufacturer of Polaris two-cycle snowmobile engines from 1968 to 1995. Fuji has manufactured engines for Polaris' ATV products since

their introduction in the spring of 1985. Such engines are developed by Fuji to the specific requirements of Polaris. Polaris believes its relationship with Fuji to be excellent. If the relationship was terminated by Fuji, Polaris could experience an interruption in the supply of engines that would adversely affect Polaris production pending the establishment of substitute supply arrangements. Polaris continues to develop additional sources for engines to

Table of Contents

reduce the risk of dependence on a single supplier and to minimize the effect of fluctuations in the Japanese yen. Polaris anticipates no significant difficulties in obtaining substitute supply arrangements for other raw materials or components for which it relies upon limited sources of supply. There can be no assurance that alternate supply arrangements will be made on satisfactory terms.

Fluctuations in foreign currency exchange rates could result in declines in Polaris reported net sales and net earnings.

The changing relationships of primarily the U.S. dollar to the Canadian dollar, the Euro and the Japanese yen have from time to time had a negative impact on results of operations. While Polaris actively manages the exposure to fluctuating foreign currency exchange rates by entering into foreign exchange hedging contracts, these contracts hedge foreign currency denominated transactions and any change in the fair value of the contracts would be offset by changes in the underlying value of the transactions being hedged.

The following additional factors that could have a negative effect on the future financial performance of Polaris and its common stock are discussed in the section entitled Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operation of this report:

Higher dealer and factory inventories/lower shipments

Lower levels of consumer spending related to concerns over gasoline and home heating costs

Higher commodity and transportation costs, particularly energy-related costs resulting from recent natural disasters

Higher promotional incentives and floor plan financing costs

Increases in the cost and availability of certain raw materials, including aluminum, steel and plastic resins

Effects from the relationship with KTM

Item 1B. Unresolved Staff Comments

Table of Contents**Item 2. Properties**

The following sets forth the Company's material facilities as of December 31, 2006.

Location	Facility Type/Use	Owned or Leased	Square Footage
Spirit Lake, Iowa	Whole Goods Manufacturing	Owned	258,000
Spirit Lake, Iowa	Warehouse	Leased	45,000
Medina, Minnesota	Headquarters	Owned	130,000
Roseau, Minnesota	Whole Goods Manufacturing	Owned	634,896
Roseau, Minnesota	Injection Molding	Owned	76,800
Roseau, Minnesota	Shipping Facility	Owned	4,900
Vermillion, South Dakota	Distribution Center	Owned	250,000
Vermillion, South Dakota	Warehouse	Leased	51,036
Osceola, Wisconsin	Component Parts Manufacturing	Owned	188,800
Osceola, Wisconsin	Engine Manufacturing	Owned	97,000
Ballarat, Victoria, Australia	Office and Distribution facility	Leased	12,000
Winnipeg, Manitoba, Canada	Office and Distribution facility	Leased	31,000
Passy, France	Office and Distribution facility	Leased	10,000
Askim, Norway	Office and Distribution facility	Leased	10,760
Ostersund, Sweden	Office and Distribution facility	Leased	14,280
Gloucester, United Kingdom	Office and Distribution facility	Leased	8,650
Wyoming, Minnesota	R & D Building	Owned	127,000

Polaris owns substantially all tooling and machinery (including heavy presses, conventional and computer-controlled welding facilities for steel and aluminum, assembly lines, paint lines, and sewing lines) used in the manufacture of its products. Polaris makes ongoing capital investments in its facilities. These investments have increased production capacity for ATVs, snowmobiles and motorcycles. The Company believes Polaris' manufacturing facilities are adequate in size and suitable for its present manufacturing needs.

Item 3. Legal Proceedings

Polaris is involved in a number of legal proceedings, none of which is expected to have a material effect on the financial results or the business of Polaris.

Item 4. Submission of Matters to a Vote of Security Holders

No matter was submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

Executive Officers of the Registrant

Set forth below are the names of the executive officers of the Company as of February 21, 2007, their ages, titles, the year first appointed as an executive officer of the Company, and employment for the past five years:

Name	Age	Title
Thomas C. Tiller	45	Chief Executive Officer
Bennett J. Morgan	43	President and Chief Operating Officer
Jeffrey A. Bjorkman	47	Vice President Operations
John B. Corness	52	Vice President Human Resources
Michael W. Malone	48	Vice President Finance, Chief Financial Officer and Secretary
Mary P. McConnell	54	Vice President and General Counsel
Mark E. Blackwell	53	Vice President Victory Motorcycles and International Operations

Table of Contents

Executive officers of the Company are elected at the discretion of the Board of Directors with no fixed term with the exception of Mr. Tiller who has an employment agreement with the Company expiring on December 31, 2008. Mr. Morgan has an employment agreement with no expiration date. There are no family relationships between or among any of the executive officers or directors of the Company.

Mr. Tiller was appointed President and Chief Operating Officer of the Company in July 1998. In 1999 Mr. Tiller was promoted to President and Chief Executive Officer, and as of April 2005 is solely the Chief Executive Officer of the Company. Prior to joining Polaris, Mr. Tiller was employed by General Electric Company in various management positions for fifteen years.

Mr. Morgan was promoted to President and Chief Operating Officer of the Company in April 2005; prior to that he was Vice President and General Manager of the ATV Division of Polaris. Prior to managing the ATV Division, Mr. Morgan was General Manager of the PG&A Division for Polaris from 1997 to 2001. He joined Polaris in 1987 and spent his early career in various product development, marketing and operations management positions of increasing responsibility.

Mr. Bjorkman has been Vice President Operations of the Company since July 2000. Mr. Bjorkman had been Vice President Manufacturing since January 1995, and prior to that held positions of Plant Manager and Manufacturing Engineering Manager. Prior to joining Polaris in July 1990, Mr. Bjorkman was employed by General Motors Corporation in various management positions for nine years.

Mr. Corness has been Vice President Human Resources of the Company since January 1999. Prior to joining Polaris, Mr. Corness was employed by General Electric Company in various human resource positions for nine years. Before that time, Mr. Corness held various human resource positions with Maple Leaf Foods and Transalta Utilities.

Mr. Malone has been Vice President Finance, Chief Financial Officer and Secretary of the Company since January 1997. Mr. Malone was Vice President and Treasurer of the Company from December 1994 to January 1997 and was Chief Financial Officer and Treasurer of a predecessor company of Polaris from January 1993 to December 1994. Prior thereto and since 1986, he was Assistant Treasurer of a predecessor company of Polaris. Mr. Malone joined Polaris in 1984 after four years with Arthur Andersen LLP.

Ms. McConnell joined Polaris as Vice President and General Counsel in March 2003. Just prior to joining Polaris, Ms. McConnell was General Counsel for the Control Products Division of Honeywell. From 1995 to 2002, Ms. McConnell was the Senior Vice President, General Counsel and Secretary of Genmar Holdings, Inc. Before that time, Ms. McConnell was a partner with the law firm of Lindquist & Vennum, and held various positions with the Dakota County Attorneys Office and the U.S. Corps of Engineers.

Mr. Blackwell was promoted to Vice President Victory Motorcycles and International Operations in October 2005. Mr. Blackwell joined Polaris in September 2000 as General Manager for Victory Motorcycles. Mr. Blackwell has over 30 years of progressive experience in the powersports industry, beginning in retail and working through a variety of assignments at the distributor and manufacturer levels for Japanese, European and American companies.

Table of Contents

The table below sets forth the information with respect to purchases made by or on behalf of Polaris during the fourth quarter of the fiscal year ended December 31, 2006.

Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Value of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares That May Yet Be Purchased Under the Program(1)
October 1 - 31, 2006	430,000	\$ 43.28	\$ 18,611,000	1,652,000
November 1 - 30, 2006	324,000	43.44	14,075,000	1,328,000
December 1 - 31, 2006	3,550,000(2)	46.64(2)	165,582,000(2)	4,778,000(2)
Total	4,304,000	\$ 46.07	\$ 198,268,000	4,778,000

(1) On December 5, 2006, the Board of Directors approved an increase in the Company's common stock share repurchase authorization by 7.0 million shares, bringing the aggregate number of shares authorized for repurchase under the share repurchase program (the Program) to 34.0 million shares. Of that total, approximately 29.2 million shares have been repurchased cumulatively from 1996 through December 31, 2006. This Program does not have an expiration date.

(2) On December 5, 2006, the Company entered into an accelerated share repurchase agreement with Goldman, Sachs & Co. (Goldman) to repurchase up to \$200 million of the Company's common stock on an accelerated basis. On December 7, 2006, the Company agreed to repurchase 3.55 million shares of its common stock from Goldman at an initial purchase price of approximately \$165.6 million, or \$46.64 per share. After giving effect to the accelerated share repurchase transaction, approximately 4.8 million shares currently remain authorized for repurchase.

Item 6. Selected Financial Data

The information under the caption 11-Year Selected Financial Data appearing on pages 10 and 11 of the Company's 2006 Annual Report is incorporated herein by reference.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion pertains to the results of operations and financial position of the Company for each of the three years in the period ended December 31, 2006, and should be read in conjunction with the Consolidated Financial Statements and the Notes thereto included elsewhere in this report. On September 2, 2004, the Company announced its decision to discontinue the manufacture of marine products effective immediately. The marine products division's

financial results are reported separately as discontinued operations for all periods presented.

Executive-Level Overview

The year 2006 was challenging for Polaris. For the first time in twenty five years, the Company did not generate an increase in diluted earnings per share from continuing operations. Both the overall ATV and snowmobile industries declined for the year, and the Company lost market share in each. Although Polaris dealers made progress in lowering their inventory levels in the latter part of 2006, dealer inventories remained at higher levels than the Company or its dealers were comfortable with at year end. Additionally, the gross margin percentage for the Company eroded slightly during the year and Polaris will not have an opportunity to purchase a majority ownership position in KTM Power Sports AG (KTM).

However, there were some positives events during 2006. Several businesses performed well in 2006 including the *RANGER*[™] utility vehicle business, Victory motorcycles, and the financial services business. The Company's cost structure was reduced somewhat during the fourth quarter 2006 and a plan to become more competitive in the core ATV business during 2007 has been developed and is being implemented. During 2006 the Company repurchased nearly 17 percent of its outstanding common stock.

Table of Contents

For the full year ended December 31, 2006, Polaris reported net income from continuing operations of \$112.8 million, a decrease of 18 percent from net income from continuing operations of \$137.7 million for the year ended December 31, 2005. Earnings per share from continuing operations was \$2.72 per diluted share for the year ended December 31, 2006, a 14 percent decrease from earnings per share of \$3.15 per diluted share for the same period in 2005. Sales from continuing operations for the full year ended December 31, 2006 totaled \$1.657 billion, a decrease of eleven percent compared to sales from continuing operations of \$1.870 billion for the full year 2005. The Company's product lines consist of ATVs and utility vehicles, snowmobiles, motorcycles and related PG&A. ATVs is the largest product line representing 67 percent of Polaris' sales in 2006. The decrease in total Company sales in 2006 was primarily due to a ten percent decline in ATV sales and a 39 percent decline in snowmobile sales in 2006. The decrease in ATVs is largely attributable to North American dealers scaling back orders in an effort to further reduce dealer inventory levels in 2006 as ATV industry retail sales softened partially offset by continued strong sales growth in the Company's *RANGER*® product line. Snowmobile sales declined as the overall snowmobile market remained difficult due to inadequate snowfall across most of the North American snowbelt and the resulting high dealer inventory levels at the end of the prior 2005-2006 snowmobile season. Victory motorcycles sales increased 13 percent for the 2006 year driven primarily by new product introductions. The Company sells its products through a network of 1,700 dealers in North America and five subsidiaries and 40 distributors in 126 countries outside of North America. The Company has increased its foreign presence with sales outside of North America representing over 14 percent of total Company sales in 2006 compared to 12 percent in 2005. The Company's gross profit in 2006 decreased 13 percent from 2005 and the gross margin percentage declined slightly to 21.7 percent compared to 22.0 percent in 2005 primarily due to lower volumes, increased floor plan financing and promotional costs offset somewhat by favorable currency rates, product mix change, a refund of certain European import duties and lower warranty expense compared to 2005. Income from financial services experienced strong growth for the full year 2006 increasing 22 percent over 2005 primarily as a result of higher income generated from the retail credit portfolio due to the success of an additional offering to Polaris dealers to finance their used and non-Polaris products through Polaris' retail credit relationship with HSBC.

In 2005 Polaris invested in Austrian motorcycle manufacturer KTM by purchasing a 25 percent interest in that company from a third party for \$85.4 million including transaction costs. Income from the investment in KTM is recorded on an after-tax basis on the income statement as a component of Equity in income of manufacturing affiliates and totaled \$3.6 million for 2006 compared to \$2.3 million in 2005. Additionally, Polaris and KTM's largest shareholder, Cross Industries AG (Cross) entered into an option agreement, which provided that under certain conditions in 2007, either Cross could purchase Polaris' interest in KTM or, alternatively, Polaris could purchase Cross interest in KTM. In December 2006 Polaris and Cross cancelled the option agreement and entered into a share purchase agreement for the sale by the Company of approximately 1.38 million shares of KTM, or approximately 80 percent of its investment in KTM, to a subsidiary of Cross for a purchase price of approximately 58.5 million Euros.

During 2006, the Company repurchased and retired 6.9 million shares of its common stock for a total of \$307.6 million. Of that total, 3.55 million shares of Polaris common stock were repurchased at an initial purchase price of approximately \$165.6 million, or \$46.64 per share through an accelerated share repurchase agreement entered into in December 2006 with Goldman, Sachs & Co. Since inception of the share repurchase program in 1996 approximately 29.2 million shares have been repurchased at an average price of \$30.41 per share. As of December 31, 2006, the Company has authorization from its Board of Directors to repurchase up to an additional 4.8 million shares of Polaris stock.

Additionally, Polaris entered into a new credit agreement in the fourth quarter of 2006. The \$450 million unsecured variable interest rate agreement is comprised of a \$250 million revolving loan facility and a \$200 million term loan. The \$200 million term loan was utilized to fund the accelerated share repurchase transaction. The new five year credit

agreement expires on December 2, 2011, and replaces the Company's previous \$250 million revolving credit agreement.

With the plans the Company has in place, including the assistance being provided to dealers to further reduce their ATV and snowmobile inventories, increases in ATV advertising, promotions and incentives to improve its competitive position, various cost reduction efforts and new product introductions, management believes that 2007 will be a better year than 2006 and will position the Company for accelerating growth in sales and earnings in 2008 and beyond.

Table of Contents

Results of Operations

2006 vs. 2005

Continuing Operations

Sales from continuing operations decreased to \$1.657 billion in 2006, representing an eleven percent decrease from \$1.870 billion in 2005. The decrease in sales was primarily due to lower snowmobile and core ATV sales volume offset somewhat by increases in Victory motorcycles and utility vehicles sales in 2006 compared to 2005.

Sales of ATVs of \$1,117.3 million in 2006 were down ten percent from \$1,239.5 million in 2005. The decrease in sales in 2006 was largely attributable to North American dealers scaling back orders in an effort to further reduce dealer inventory levels due to soft industry retail sales. As a result, dealer inventory levels in North America were lower at the end of 2006 than at the end of the 2005. During the year the overall utility vehicle market continued to perform well and Polaris experienced continued strong sales growth in the *RANGER*[™] product line. The average per unit sales price increased eight percent in 2006 due to the mix impact of the new products introduced during 2006, increased sales of *RANGERS*[™] and favorable currency rates. Sales of ATVs comprised 67 percent of total Company sales in 2006 and 66 percent in 2005.

Sales of snowmobiles of \$156.9 million in 2006 were 39 percent lower than \$256.7 million in 2005. The decrease was due to lower dealer orders in 2006 following a disappointing selling season. The average per unit sales price decreased five percent due to higher promotional costs incurred in 2006 versus 2005, the result of the lack of snow and resulting high dealer inventory levels. Sales of snowmobiles comprised 10 percent of total Company sales in 2006 compared to 14 percent in 2005.

Sales of Victory motorcycles of \$112.8 million in 2006 were 13 percent higher than \$99.5 million in 2005. The increase is attributable to improved brand recognition, the introduction of new products and improvements in the dealer network. Sales of Victory motorcycles comprised seven percent of total Company sales in 2006 compared to five percent in 2005.

Sales of PG&A of \$269.5 million in 2006 were two percent lower than \$274.2 million in 2005. The decline was primarily due to lower ATV and snowmobile vehicle sales. PG&A sales comprised 16 percent of total Company sales in 2006 compared to 15 percent in 2005.

Gross profit decreased to \$359.4 million in 2006, representing a 13 percent decrease compared to \$411.0 million gross profit in 2005. The gross profit margin percentage was 21.7 percent in 2006, a decrease of 30 basis points from 22.0 percent for the full year 2005. The decrease in gross profit dollars and margin percentage was primarily due to lower sales volume for ATVs and snowmobiles, higher promotional costs and floor plan financing costs. These higher costs were partially offset by savings from various cost reduction initiatives, favorable currency rates and a refund of certain European import duties. In addition, warranty expenses decreased nine percent to \$33.2 million for the year ending December 31, 2006 compared to \$36.3 million in the prior year. The decrease in warranty expense in 2006 is the result of lower warranty claim experience, primarily for ATVs.

Operating expenses in 2006 decreased three percent to \$238.4 million from \$244.7 million in 2005. Expressed as a percentage of sales, operating expenses increased to 14.4 percent in 2006 from 13.1 percent in 2005. Research and development expenses for 2006 increased four percent due to continued emphasis on new product development. Sales and marketing expenses were flat with 2005. General and administrative expenses decreased 15 percent in 2006 primarily due to lower compensation plan expenses resulting from lower profitability for the year as well as operating

cost control measures taken by the Company.

Income from financial services in 2006 increased 22 percent to \$47.1 million compared to \$38.6 million for 2005. The income generated from the retail credit portfolio increased for the full year 2006 in part due to the success of an additional offering to Polaris dealers to finance their used and non-Polaris products through Polaris' retail credit relationship with HSBC.

Equity in (income) of manufacturing affiliates (which primarily represents the Company's portion of income from the investment in KTM, net of tax) increased to \$3.6 million for the full year 2006 compared to \$2.3 million for 2005. In December 2006, the Company entered into a share purchase agreement for the sale by the Company of

Table of Contents

approximately 1.38 million shares of KTM, or approximately 80 percent of Polaris' investment in KTM. The sale price per share of KTM stock has been fixed in the share purchase agreement. During the fourth quarter of 2006 the Company recorded income, net of tax, of \$2.0 million related to its 25 percent equity ownership in KTM and also recorded a corresponding impairment charge of \$1.9 million in order to adjust the asset carrying value of the shares to equal the sales price in the share purchase agreement on a per share basis. This impairment charge was included as a component of Equity in (income) of manufacturing affiliates in the accompanying consolidated statements of income.

Interest expense was \$9.8 million in 2006 compared to \$4.7 million in 2005. The increase is due to higher borrowing levels and increased interest rates during the 2006 periods.

Non-operating other (income) expense was income of \$1.9 million in 2006 compared to an expense of \$3.7 million in 2005 primarily due to the weakening of the U.S. dollar and the resulting effects of foreign currency transactions related to the international subsidiaries.

The income tax provision for the full year 2006 was recorded at a rate of approximately 31.1 percent of pretax income, an increase from 30.7 percent recorded in 2005. During each of 2005 and 2006 the Company benefited from certain favorable income tax events.

Net income from continuing operations in 2006 was \$112.8 million, a decrease of 18 percent from \$137.7 million in 2005. Net income from continuing operations as a percent of sales was 6.8 percent in 2006, compared to 7.4 percent in 2005. Net income per diluted share from continuing operations decreased 14 percent to \$2.72 in 2006 from \$3.15 in 2005.

Discontinued Operations and Effect of Adoption of New Accounting Standard

Effective September 2, 2004 the Company ceased to manufacture marine products. The marine products division's financial results are being reported separately as discontinued operations for all periods presented. For the full year ended December 31, 2006, the loss from discontinued operations was \$0.8 million, after tax, or \$0.02 per diluted share, compared to a loss of \$1.0 million or \$0.02 per diluted share in 2005. During 2006, the Company recorded an additional loss on disposal of discontinued operations of \$8.1 million before tax, or \$5.4 million after tax, or \$0.13 per diluted share. This loss includes the estimated costs required to resolve past and potential future product liability litigation claims and warranty expenses related to marine products. Polaris adopted SFAS 123(R) Accounting for Stock-Based Compensation effective the beginning of fiscal year 2006 using the modified retrospective method. In connection with the adoption of this new accounting standard, Polaris recorded an after tax benefit of \$0.4 million or \$0.01 per diluted share on its income statement for the first quarter 2006 resulting from the cumulative effect of the accounting change. Reported net income for the full year ended December 31, 2006, including each of continuing and discontinued operations, the loss on disposal of discontinued operations and the cumulative effect of adopting SFAS 123(R) was \$107.0 million or \$2.58 per diluted share, compared to \$136.7 million, or \$3.12 per diluted share for the year ended December 31, 2005.

Results of Operations

2005 vs. 2004

Continuing Operations

Sales from continuing operations increased to \$1.870 billion in 2005, representing a five percent increase from \$1.773 billion in 2004. The increase in sales was primarily due to favorable product mix change as more higher priced models of Victory motorcycles and utility vehicles were sold in 2005 compared to 2004.

Sales of ATVs of \$1,239.4 million in 2005 were seven percent higher than \$1,159.8 million in 2004. Sales growth was a direct result of new product introductions and strong *RANGER*tm and international sales growth during the year. The average per unit sales price in 2005 increased four percent due to the mix impact of new products introduced during 2005, favorable currency rates and select price increases. Sales of ATVs comprised 66 percent of total Company sales in 2005 and 2004.

Table of Contents

Sales of snowmobiles of \$256.7 million in 2005 were 11 percent lower than \$288.4 million in 2004. The decrease was due to lower dealer orders in 2005 following a disappointing selling season. The average per unit sales price increased two percent due to the higher percentage of higher priced performance snowmobiles sold in 2005 versus 2004, as well as the impact of favorable currency rates. Sales of snowmobiles comprised 14 percent of total Company sales in 2005 compared to 16 percent in 2004.

Sales of Victory motorcycles of \$99.5 million in 2005 were 34 percent higher than \$74.0 million in 2004. The increase was attributable to improved brand recognition, the success of the Hammer and Vegas Jackpot models, a more powerful 100 cubic inch engine and a new six speed transmission, and improvements in the dealer network. The average per unit sales price for motorcycles increased nine percent, which was driven by product mix change as more of the higher priced Victory Hammer, Kingpin and Signature Series models were sold in 2005 compared to 2004. Sales of Victory motorcycles comprised five percent of total Company sales in 2005 compared to four percent in 2004.

Sales of PG&A of \$274.2 million in 2005 were nine percent higher than \$251.0 million in 2004. The PG&A business was positively impacted by growth in ATVs, utility vehicles and motorcycle PG&A sales during 2005. PG&A sales comprised 15 percent of total Company sales in 2005 compared to 14 percent in 2004.

Gross profit decreased to \$411.0 million in 2005, representing a one percent decrease compared to \$416.6 million gross profit in 2004. The gross profit margin percentage was 22.0 percent in 2005, a decrease of 150 basis points from 23.5 percent for the full year 2004. The decrease in gross profit dollars and margin percentage was primarily due to increased raw material costs, declining snowmobile gross margins, higher floor plan financing costs, higher warranty expenses and incremental transportation and fuel costs. These higher costs were partially offset by continued efficiency gains and savings from various cost reduction initiatives. Warranty expenses increased 38 percent to \$36.3 million for the year ended December 31, 2005 compared to \$26.3 million in the prior year. The increase in warranty expense in 2005 was the result of higher warranty claims, primarily for snowmobiles.

Operating expenses in 2005 increased one percent to \$244.7 million from \$242.7 million in 2004. Expressed as a percentage of sales, operating expenses decreased to 13.1 percent in 2005 from 13.7 percent in 2004. Research and development expenses increased eleven percent in 2005 primarily from investments in new product development and the new research and development facility in Wyoming, Minnesota that opened in spring 2005. Sales and marketing expenses decreased two percent in 2005 as result of cost saving efforts. General and administrative expenses decreased four percent in 2005 primarily due to a lower Polaris stock price during 2005 that reduced stock based compensation plan expenses as well as operating cost control measures taken by the Company.

Income from financial services in 2005 increased 21 percent to \$38.6 million compared to \$32.0 million for 2004 due to increased profitability generated from both the wholesale credit portfolio and increased income from the retail credit arrangement with HSBC.

Equity in (income) of manufacturing affiliates (which primarily represents the Company's portion of income from the investment in KTM, net of tax) increased \$2.3 million for the full year 2005 compared to 2004. The Company purchased a 25 percent interest in KTM in the summer of 2005.

Interest expense was \$4.7 million in 2005 compared to \$2.1 million in 2004. The increase in interest expense is primarily the result of higher interest rates and higher average debt levels on borrowings under the credit agreement in 2005 to fund the investment in KTM and higher share repurchases.

Non-operating other expense decreased \$1.6 million in 2005 when compared to 2004 primarily due to the strengthening of the U.S. dollar and the resulting effects of foreign currency hedging transactions related primarily to the Canadian dollar.

The income tax provision for the full year 2005 was recorded at a rate of approximately 30.7 percent of pretax income, a reduction from 33.4 percent recorded in 2004, resulting primarily from certain favorable income tax events.

Net income from continuing operations in 2005 was \$137.7 million, an increase of four percent from \$132.3 million in 2004. Net income from continuing operations as a percent of sales was 7.4 percent in 2005,

Table of Contents

compared to 7.5 percent in 2004. Net income per diluted share from continuing operations increased six percent to \$3.15 in 2005 from \$2.97 in 2004.

Discontinued Operations

Effective September 2, 2004 the Company ceased to manufacture marine products. The marine products division's financial results are being reported separately as discontinued operations for all periods presented. For the full year ended December 31, 2005, the loss from discontinued operations was \$1.0 million, after tax, or \$0.02 per diluted share, compared to a loss of \$8.5 million or \$0.19 per diluted share in 2004. Reported net income for the full year 2005, including both continuing and discontinued operations was \$136.7 million or \$3.12 per diluted share compared to \$99.9 million, or \$2.25 per diluted share for the full year 2004 which included a \$23.9 million, net of tax, loss on disposal of discontinued operations in 2004.

Critical Accounting Policies

The significant accounting policies that management believes are the most critical to aid in fully understanding and evaluating the Company's reported financial results include the following: revenue recognition, sales promotions and incentives, share-based employee compensation, dealer holdback programs, product warranties and product liability.

Revenue recognition: Revenues are recognized at the time of shipment to the dealer or distributor. Historically, product returns, whether in the normal course of business or resulting from repurchases made under the floorplan financing program have not been material. However, Polaris has agreed to repurchase products repossessed by the finance companies up to certain limits. Polaris' financial exposure is limited to the difference between the amount paid to the finance companies and the amount received on the resale of the repossessed product. No material losses have been incurred under these agreements. Polaris has not historically recorded any significant sales return allowances because it has not been required to repurchase a significant number of units. However, an adverse change in retail sales could cause this situation to change.

Sales promotions and incentives: Polaris generally provides for estimated sales promotion and incentive expenses, which are recognized as a reduction to sales, at the time of sale to the dealer or distributor. Examples of sales promotion and incentive programs include dealer and consumer rebates, volume discounts, retail financing programs and sales associate incentives. Sales promotion and incentive expenses are estimated based on current programs and historical rates for each product line. Polaris records these amounts as a liability in the consolidated balance sheet until they are ultimately paid. At December 31, 2006 and 2005, accrued sales promotions and incentives were \$65.2 million and \$62.2 million, respectively, reflecting an increase in the ATV and snowmobile sales promotions and incentives cost environment during 2006. Actual results may differ from these estimates if market conditions dictate the need to enhance or reduce sales promotion and incentive programs or if the customer usage rate varies from historical trends. Adjustments to sales promotions and incentives accruals are made from time to time as actual usage becomes known in order to properly estimate the amounts necessary to generate consumer demand based on market conditions as of the balance sheet date. Historically, sales promotion and incentive expenses have been within the Company's expectations and differences have not been material.

Share-Based Employee Compensation: In the first quarter ended March 31, 2006 Polaris adopted SFAS 123(R) which requires companies to recognize in the financial statements the grant-date fair value of stock options and other equity-based compensation issued to employees. Polaris adopted SFAS 123(R) using the modified retrospective method. In accordance with the modified retrospective method, the consolidated financial statements for prior periods have been adjusted to give effect to the adoption of SFAS 123(R). In addition, Polaris recorded on the consolidated statements of income in the first quarter of 2006 an after tax benefit of \$.4 million or \$0.01 per diluted share from the cumulative effect of the accounting change. Beginning with the first quarter 2006, the Company has reclassified other

share-based compensation expenses, previously reported in General and administrative operating expenses, to Cost of sales and the Operating expenses lines on the consolidated statements of income. The balance sheet and statements of cash flow have also been adjusted to reflect the impact of SFAS 123(R) for all prior periods presented. The impact to the Company's net earnings of adopting SFAS 123(R) is consistent with the pro forma disclosures provided in the footnotes contained in previous financial statements.

Table of Contents

Dealer holdback programs: Polaris provides dealer incentive programs whereby at the time of shipment Polaris withholds an amount from the dealer until ultimate retail sale of the product. Polaris records these amounts as a liability on the consolidated balance sheet until they are ultimately paid. Payments are generally made to dealers twice each year, in the first quarter and the third quarter, subject to previously established criteria. Polaris recorded accrued liabilities of \$80.5 million and \$84.7 million for dealer holdback programs in the consolidated balance sheets as of December 31, 2006 and 2005, respectively.

Product warranties: Polaris provides a limited warranty for ATVs for a period of six months and for a period of one year for its snowmobiles and motorcycles. Polaris may provide longer warranties related to certain promotional programs, as well as longer warranties in certain geographical markets as determined by local regulations and market conditions. Polaris' standard warranties require the Company or its dealers to repair or replace defective products during such warranty periods at no cost to the consumer. The warranty reserve is established at the time of sale to the dealer or distributor based on management's best estimate using historical rates and trends. Polaris records these amounts as a liability in the consolidated balance sheet until they are ultimately paid. At December 31, 2006 and 2005, the warranty reserve was \$27.3 million and \$28.2 million, respectively. Adjustments to the warranty reserve are made from time to time based on actual claims experience in order to properly estimate the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. While management believes that the warranty reserve is adequate and that the judgment applied is appropriate, such amounts estimated to be due and payable could differ materially from what will actually transpire in the future.

Product liability: Polaris is subject to product liability claims in the normal course of business. Polaris self insures its product liability claims. The estimated costs resulting from any losses are charged to operating expenses when it is probable a loss has been incurred and the amount of the loss is reasonably determinable. The Company utilizes historical trends and actuarial analysis tools to assist in determining the appropriate loss reserve levels. At December 31, 2006 and 2005 the Company had accruals of \$9.2 million and \$7.1 million, respectively, for the possible payment of pending claims related to continuing operations. These accruals are included in other accrued expenses in the accompanying consolidated balance sheets. In addition, the Company had accruals of \$4.3 million and \$5.2 million at December 31, 2006 and 2005, respectively, for the possible payment of pending claims related to discontinued operations. While management believes the product liability reserves are adequate, adverse determination of material product liability claims made against the Company could have a material adverse effect on Polaris' financial condition.

New Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard No. 123(R), *Share-based Payment* (SFAS 123(R)). SFAS 123(R) requires all entities to recognize compensation expense in an amount equal to the fair value of share-based payments (e.g. stock options) granted to employees. This applies to all transactions involving the issuance of the Company's equity in exchange for goods or services, including employee services. Under SFAS 123(R), all stock option awards to employees are recognized as expense in the income statement, typically over the requisite service period. SFAS 123(R) carried forward the guidance from SFAS 123 for payment transactions with non-employees. The Securities and Exchange Commission delayed the effective date in April 2005, to require public companies to adopt the standard as of the first annual period beginning after June 15, 2005.

SFAS 123(R) permits public companies to adopt its requirements using one of two methods: 1) Modified Prospective Method under which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS 123(R) for all share-based payments granted after the effective date and (b) based on the requirements of SFAS No. 123 for all awards granted to employees prior to the effective date of SFAS 123(R) that remain unvested on

the effective date; or 2) Modified Retrospective Method which includes the requirements of the modified prospective method described above, but also permits entities to restate the historical financial statements based on the amounts previously recognized under SFAS 123 for purposes of pro forma disclosures for all prior periods presented.

Polaris adopted SFAS 123(R) effective as of the beginning of fiscal year 2006 using the modified retrospective method. In connection with the adoption of this new accounting standard, Polaris has recorded an after tax benefit of

Table of Contents

\$0.4 million or \$0.01 per diluted share on its income statement for the 2006 first quarter resulting from the cumulative effect of the accounting change. All prior periods presented were adjusted to give effect to the adoption of SFAS 123(R) using the modified retrospective method. The Company provided revised quarterly consolidated statements of income for the 2005 year reflecting the adoption of SFAS 123(R) under the modified retrospective method in a Form 8-K dated January 26, 2006.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 describes when an uncertain tax item should be recorded in the financial statements and for how much, provides guidance on recording interest and penalties and accounting and reporting for income taxes in interim periods. FIN 48 is effective for Polaris' year beginning January 1, 2007. The Company does not expect FIN 48 to have a material impact on the Company's financial position or results of operations.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in the current year financial statements. The SAB requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 does not change the guidance in SAB 99, *Materiality*, when evaluating the materiality of misstatements. SAB 108 is effective for fiscal years ending after November 15, 2006. Upon initial application, SAB 108 permits a one-time cumulative effect adjustment to beginning retained earnings. The adoption of this pronouncement had no effect on the Company's financial position, results of operations or cash flows.

Liquidity and Capital Resources

Polaris' primary sources of funds have been cash provided by operating activities and borrowings under its credit arrangements. Polaris' primary uses of funds have been for repayments under the credit agreement, repurchase and retirement of common stock, capital investments, cash dividends to shareholders and new product development.

During 2006, Polaris generated net cash from continuing operating activities of \$152.8 million, a decrease of 6 percent from 2005. The increase in net borrowings of \$232.0 million under the credit agreement were utilized for the repurchase of shares of common stock of \$307.6 million, to fund capital expenditures of \$52.6 million and to pay cash dividends of \$50.2 million. During 2005, Polaris generated net cash from continuing operating activities of \$162.5 million, which was utilized to fund capital expenditures of \$89.8 million, repurchase shares of common stock of \$132.3 million and pay cash dividends of \$47.0 million.

The seasonality of production and shipments causes working capital requirements to fluctuate during the year. Polaris is party to an unsecured bank variable interest rate agreement that matures on December 2, 2011, comprised of a \$250 million revolving loan facility for working capital needs and a \$200 million term loan. The \$200 million term loan was utilized in its entirety in December 2006 to fund the accelerated share repurchase transaction. Borrowings under the agreement bear interest based on LIBOR or prime rates. At December 31, 2006, Polaris had total outstanding borrowings under the agreement of \$250.0 million. At December 31, 2005, Polaris had outstanding borrowings under a prior credit agreement of \$18.0 million. The Company's debt to total capital ratio was sixty percent at December 31, 2006 and five percent at December 31, 2005. Polaris has entered into an interest rate swap agreement to manage exposures to fluctuations in interest rates. At December 31, 2006, the effect of this agreement was to fix the interest rate at 7.21 percent for \$18.0 million of any borrowing until June 2007.

Table of Contents

The following table summarizes the Company's significant future contractual obligations at December 31, 2006 (in millions):

	Total	<1 Year	1-3 Years	>3 Years
Borrowings under credit agreement:				
Revolving loan facility	\$ 50.0			\$ 50.0
Term loan	200.0			200.0
Interest expense under swap agreement	0.6	\$ 0.6		
Engine purchase commitments	15.6	7.8	\$ 7.8	
Operating leases	4.8	2.1	2.2	0.5
Capital leases	0.1	0.1		
Total	\$ 271.1	\$ 10.6	\$ 10.0	\$ 250.5

Additionally, at December 31, 2006, Polaris had letters of credit outstanding of \$4.6 million related to purchase obligations for raw materials.

The Polaris Board of Directors has authorized the cumulative repurchase of up to 34.0 million shares of the Company's common stock. Of that total, approximately 29.2 million shares have been repurchased cumulatively from 1996 through December 31, 2006. During 2006, Polaris paid \$307.6 million to repurchase and retire approximately 6.9 million shares of which 3.55 million of the shares repurchased related to an accelerated share repurchase agreement with Goldman, Sachs & Co in December, 2006. The total shares repurchased had a positive impact on earnings per share of approximately \$0.10 per share for the year ended December 31, 2006. The Company has authorization from its Board of Directors to repurchase up to an additional 4.8 million shares of Polaris stock as of December 31, 2006.

Polaris has arrangements with certain finance companies (including Polaris Acceptance) to provide secured floor plan financing for its dealers. These arrangements provide liquidity by financing dealer purchases of Polaris products without the use of Polaris' working capital. During 2006 Polaris modified its agreement with GE Commercial Distribution Finance Corporation to finance Polaris' Canadian dealers purchases of PG&A in addition to financing the Canadian dealers' wholegood purchases. Substantially all of the worldwide sales of snowmobiles, ATVs, motorcycles and related PG&A are financed under these arrangements whereby Polaris receives payment within a few days of shipment of the product. The amount financed by worldwide dealers under these arrangements at December 31, 2006 and 2005, was approximately \$862.4 million and \$930.0 million, respectively. Polaris participates in the cost of dealer financing up to certain limits. Polaris has agreed to repurchase products repossessed by the finance companies up to an annual maximum of no more than 15 percent of the average month-end balances outstanding during the prior calendar year. Polaris' financial exposure under these agreements is limited to the difference between the amount paid to the finance companies and the amount received on the resale of the repossessed product. No material losses have been incurred under these agreements. However, an adverse change in retail sales could cause this situation to change and thereby require Polaris to repurchase repossessed units.

In 1996, a wholly-owned subsidiary of Polaris entered into a partnership agreement with a subsidiary of TDF to form Polaris Acceptance. In 2004, TDF was merged with a subsidiary of General Electric Company and, as a result of that merger, TDF's name was changed to GE Commercial Distribution Finance Corporation (GECDF). Polaris Acceptance provides floor plan financing to Polaris' dealers in the United States. Polaris' subsidiary has a 50 percent

equity interest in Polaris Acceptance. In November 2006, Polaris Acceptance sold a majority of its receivable portfolio to a Securitization Facility (Securitization Facility) arranged by General Electric Capital Corporation, a GECDF affiliate, and the partnership agreement was amended to provide that Polaris Acceptance would continue to sell portions of its receivable portfolio to the Securitization Facility from time to time on an ongoing basis. At December 31, 2006 and 2005, the outstanding balance of receivables sold by Polaris Acceptance to the Securitization Facility (the Securitized Receivables) amounted to approximately \$599.7 million and \$0.0 million, respectively. The sale of receivables from Polaris Acceptance to the Securitization Facility is accounted for in Polaris Acceptance s financial statements as a true-sale under SFAS 140: Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. Polaris Acceptance is not responsible for any continuing servicing costs or obligations with respect to the Securitized Receivables. The remaining portion of the receivable

Table of Contents

portfolio is recorded on Polaris Acceptance's books, and is funded to the extent of 85 percent through a loan from an affiliate of GECDF (which at December 31, 2006 and 2005, was approximately \$40.7 million and \$681.8 million, respectively). Polaris has not guaranteed the outstanding indebtedness of Polaris Acceptance or the Securitized Receivables. In addition, the two partners of Polaris Acceptance share equally a 15 percent equity cash investment equal to the sum of the portfolio balance in Polaris Acceptance plus the Securitized Receivables. Polaris' total investment in Polaris Acceptance at December 31, 2006 and 2005, was \$55.6 million and \$59.6 million, respectively. The Polaris Acceptance partnership agreement provides for periodic options for renewal, purchase, or termination by either party. Substantially all of Polaris' U.S. sales are financed through Polaris Acceptance and the Securitization Facility whereby Polaris receives payment within a few days of shipment of the product. The partnership agreement provides that all income and losses of the Polaris Acceptance portfolio and income and losses realized by GECDF's affiliates with respect to the Securitized Receivables are shared 50 percent by Polaris' wholly-owned subsidiary and 50 percent by GECDF. Polaris' exposure to losses associated with respect to the Polaris Acceptance Portfolio and the Securitized Receivables is limited to its equity in its wholly-owned subsidiary that is a partner in Polaris Acceptance.

Polaris' investment in Polaris Acceptance is accounted for under the equity method, and is recorded as a component of Investments in finance affiliate in the accompanying consolidated balance sheets. Polaris' allocable share of the income of Polaris Acceptance and the Securitized Receivables has been included as a component of Income from financial services in the accompanying consolidated statements of income. At December 31, 2006, Polaris Acceptance's wholesale portfolio receivables from dealers in the United States (excluding the Securitized Receivables) was \$146.8 million, an 82 percent decrease from \$796.5 million at December 31, 2005. Including the Securitized Receivables, the wholesale receivables from dealers in the United States at December 31, 2006 was \$746.5 million, a six percent decrease from \$796.5 million at December 31, 2005. Credit losses in the Polaris Acceptance portfolio have been modest, averaging less than one percent of the portfolio over the life of the partnership.

In October 2001 Household and a subsidiary of Polaris entered into a Revolving Program Agreement with Household to provide retail financing to consumers who buy Polaris products in the United States. In August 2005, the wholly-owned subsidiary of Polaris entered into a multi-year contract with HSBC, formerly known as Household Bank (SB), N.A. under which HSBC will continue managing the Polaris private label credit card program under the StarCard label. The 2005 agreement provides for income to be paid to Polaris based on a percentage of the volume of retail credit business generated. The previous agreement provided for equal sharing of all income and losses with respect to the retail credit portfolio, subject to certain limitations. The 2005 contract removes all credit, interest rate and funding risk to Polaris and also eliminates the need for Polaris to maintain a retail credit cash deposit with HSBC, which was \$50.0 million at August 1, 2005. For the full year 2006 consumers financed approximately 36 percent of Polaris vehicles sold in the United States through the HSBC arrangement, similar to the penetration rate for 2005, while the volume of revolving credit contracts written in calendar 2006 was \$720.0 million, a 37 percent increase over 2005 due to the success of an additional offering to consumers of the opportunity to finance the purchase of used and non-Polaris products through Polaris' retail credit relationship with HSBC.

In 2005 Polaris invested in Austrian motorcycle manufacturer KTM by purchasing a 25 percent interest in that company from a third party for \$85.4 million including transaction costs. Additionally, Polaris and KTM's largest shareholder, Cross Industries AG (Cross), entered into an option agreement which provided that under certain conditions in 2007, either Cross could purchase Polaris' interest in KTM or, alternatively, Polaris could purchase Cross interest in KTM. In December 2006, Polaris and Cross cancelled the option agreement and entered into a share purchase agreement for the sale by the Company of approximately 1.38 million shares of KTM, or approximately 80 percent of its investment in KTM, to a subsidiary of Cross for a purchase price of approximately 58.5 million Euros. The agreement provided for completion of the sale of the KTM shares in two stages. On February 20, 2007, Polaris and Cross completed the sale of approximately 1.11 million shares for a purchase price of approximately 47.0 million Euros. The completion of the sale of an additional 0.27 million shares is to take place on or before June 15, 2007. At the conclusion of the second stage of the transaction, Polaris will then hold ownership of

approximately 0.34 million shares, representing slightly less than 5 percent of KTM's outstanding shares.

Table of Contents

Improvements in manufacturing capacity and product development during 2006 included \$15.0 million of tooling expenditures for new product development across all product lines. Polaris anticipates that capital expenditures for 2007, including tooling and research and development equipment, will range from \$60.0 million to \$65.0 million.

Management believes that existing cash balances, cash flows to be generated from operating activities, available borrowing capacity under the line of credit arrangement and proceeds from the KTM transaction will be sufficient to fund operations, regular dividends, share repurchases, and capital expenditure requirements for 2007. At this time, management is not aware of any factors that would have a material adverse impact on cash flow beyond 2007.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Inflation, Foreign Exchange Rates and Interest Rates

Commodity inflation has had an impact on the Company's results of operations in 2006. The changing relationships of the U.S. dollar to the Canadian dollar, Euro and Japanese yen have also had a material impact from time-to-time.

During 2006, purchases totaling eleven percent of Polaris' cost of sales were from Japanese yen denominated suppliers. The impact of the Japanese yen exchange rate fluctuation on Polaris' raw material purchase prices and cost of sales in 2006 had a positive financial impact when compared to the prior year. In view of the foreign exchange hedging contracts currently in place, Polaris anticipates that the yen-dollar exchange rate fluctuation will have an insignificant impact on cost of sales during the hedged periods of 2007 when compared to 2006.

Polaris operates in Canada through a wholly-owned subsidiary. Sales of the Canadian subsidiary comprised 12 percent of total Polaris sales in 2006. From time to time, Polaris utilizes foreign exchange hedging contracts to manage its exposure to the Canadian dollar. The U.S. dollar weakened in relation to the Canadian dollar in 2006 which resulted in a positive financial impact on Polaris gross margins when compared to the same periods in 2005. There were no Canadian hedging contracts in place as of December 31, 2006.

In the past, Polaris has been a party to, and in the future may enter into, foreign exchange hedging contracts for the Japanese yen, Euro, and the Canadian dollar to minimize the impact of exchange rate fluctuations within each year. At December 31, 2006, the Company had open Japanese yen foreign exchange hedging contracts with notional amounts totaling \$20.4 million, which mature at various times through the second quarter of 2007. The average exchange rate of the Japanese yen foreign exchange hedging contracts is 113.4 yen to the dollar. At December 31, 2006 the Company had open Euro foreign exchange hedging contracts in place with notional amounts totaling \$77.3 million U.S. dollars which mature at various times through the second quarter of 2007. The Euro hedging contracts were entered into in anticipation of the sale of 80 percent of the Company's investment in KTM during the first half of 2007. The average exchange rate of the Euro foreign exchange hedging contracts is 1.32 Euros per U.S. dollar. These Euro contracts do not meet the criteria for hedge accounting and the resulting unrealized gain or loss is included in the Consolidated Statements of Income.

The fair values of the Japanese yen and Euro hedge contracts at December 31, 2006 represent an unrealized loss of \$1.1 million. A ten percent fluctuation in the currency rates as of December 31, 2006 would have resulted in a change in the fair value of the Euro and Japanese yen hedge contracts of approximately \$9.6 million combined. However, since these contracts hedge foreign currency denominated transactions, any change in the fair value of the contracts would be offset by changes in the underlying value of the transaction being hedged.

Polaris is subject to market risk from fluctuating market prices of certain purchased commodities and raw materials including steel, aluminum, fuel, natural gas, and petroleum-based resins. In addition, the Company is a purchaser of

components and parts containing various commodities, including steel, aluminum, rubber and others which are integrated into the Company's end products. While such materials are typically available from numerous suppliers, commodity raw materials are subject to price fluctuations. The Company generally buys these commodities and components based upon market prices that are established with the vendor as part of the purchase process. During 2006 the Company experienced commodity price increases with some of these key raw materials. As a result, during 2006 the Company entered into derivative contracts to hedge a portion of the exposure to

Table of Contents

commodity risk for aluminum and natural gas. The total amount of hedges in place as of December 31, 2006 is immaterial to the overall financial position of the Company.

The Company generally attempts to obtain firm pricing from most of its suppliers for volumes consistent with planned production. To the extent that commodity prices increase and the Company does not have firm pricing from its suppliers, or its suppliers are not able to honor such prices, the Company may experience gross margin declines to the extent it is not able to increase selling prices of its products. During 2006 the Company experienced commodity price increases with some of its key raw materials. Competitive market pressures limited the ability to pass these cost increases to customers, thereby contributing to the erosion of Polaris' gross margins in 2006.

Polaris is a party to a credit agreement with various lenders consisting of a \$250 million revolving loan facility and a \$200 million term loan. Interest accrues on both the revolving loan and the term loan at variable rates based on LIBOR or prime. Additionally, Polaris is a party to an interest rate swap agreement that locks in a fixed interest rate on \$18.0 million of long-term debt. The Company is exposed to interest rate changes on any borrowings during the year in excess of \$18.0 million. Based upon the average outstanding line of credit borrowings of \$158.3 million during 2006, a one-percent fluctuation in interest rates would have had an approximately \$1.4 million impact on interest expense in 2006.

Polaris has been manufacturing its own engines for selected models of snowmobiles since 1995, motorcycles since 1998 and ATVs since 2001 at its Osceola, Wisconsin facility. Also, in 1995, Polaris entered into an agreement with Fuji to form Robin. Under the terms of the agreement, Polaris has a 40 percent ownership interest in Robin, which builds engines in the United States for recreational and industrial products. Potential advantages to Polaris of having these additional sources of engines include reduced foreign exchange risk, lower shipping costs and less dependence in the future on a single supplier for engines.

Item 8. Financial Statements and Supplementary Data

Management's Report on Company's Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting of the Company. This system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting can only provide reasonable assurance and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the effectiveness of the system of internal control over financial reporting as of December 31, 2006. In making this evaluation, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on management's evaluation and those criteria, management concluded that the Company's system of internal control over financial reporting was effective as of December 31, 2006.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2006 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report in which they expressed an unqualified opinion, which report appears on the following page.

**Report of Independent Registered Public Accounting Firm
on Company's Internal Control over Financial Reporting**

The Board of Directors and Shareholders of Polaris Industries Inc.

We have audited management's assessment, included in the accompanying Management's Report on Company's Internal Control over Financial Reporting, that Polaris Industries Inc. maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Polaris Industries Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Polaris Industries Inc. maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Polaris Industries Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Polaris Industries Inc. as of December 31, 2006 and 2005, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2006 and our report dated February 21, 2007 expressed an unqualified opinion thereon.

**Report of Independent Registered Public Accounting Firm
on Consolidated Financial Statements**

The Board of Directors and Shareholders of Polaris Industries Inc.

We have audited the accompanying consolidated balance sheets of Polaris Industries Inc. and subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Polaris Industries Inc. and subsidiaries at December 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Polaris Industries Inc.'s internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 21, 2007 expressed an unqualified opinion thereon.

Cash and cash equivalents at beginning of period	19,675	138,469	82,761
Cash and cash equivalents at end of period	\$ 19,566	\$ 19,675	\$ 138,469
Supplemental Cash Flow Information			
Interest paid on debt borrowings	\$ 8,769	\$ 4,708	\$ 2,126
Income taxes paid	\$ 52,466	\$ 67,370	\$ 36,170

Prior years results have been adjusted to reflect the adoption of SFAS 123(R) under the modified retrospective method. All periods presented reflect the classification of the marine division's financial results as discontinued operations.

The accompanying footnotes are an integral part of these consolidated statements.

Table of Contents

**POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Note 1: Organization and Significant Accounting Policies

Polaris Industries Inc. (Polaris or the Company) a Minnesota corporation, and its subsidiaries, are engaged in a single industry segment consisting of the design, engineering, manufacturing and marketing of innovative, high-quality, high-performance motorized products for recreation and utility use, including ATVs, snowmobiles, and motorcycles. Polaris products, together with related replacement PG&A are sold worldwide through a network of dealers, distributors and its subsidiaries located in the United States, Canada, France, Great Britain, Australia, Norway and Sweden.

Basis of presentation: The accompanying consolidated financial statements include the accounts of Polaris and its wholly-owned subsidiaries. All inter-company transactions and balances have been eliminated in consolidation. Income from financial services is reported as a component of operating income to better reflect income from ongoing operations of which financial services has a significant impact. Shares and per share information have been adjusted to give effect to the two-for-one stock split declared on January 22, 2004 and payable on March 8, 2004 to shareholders of record on March 1, 2004. Polaris share of the income from the KTM investment is recorded as a component of Equity in (income) of manufacturing affiliates for 2006 and the portion of 2005 that the KTM investment was held. During the first quarter of 2006, the Company adopted SFAS No. 123(R), Share-Based Payment (SFAS 123(R)), which requires companies to recognize in the financial statements the fair value of stock options and other equity-based compensation issued to employees. All prior periods presented were adjusted to give effect to the adoption of SFAS 123(R) using the modified retrospective method. See Note 2 for further discussion.

On September 2, 2004, the Company announced its decision to discontinue the manufacture of marine products effective immediately. The marine products division s financial results are reported separately as discontinued operations for all periods presented.

The Company evaluates consolidation of entities under Financial Accounting Standards Board (FASB) Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities . FIN 46 requires management to evaluate whether an entity or interest is a variable interest entity and whether the company is the primary beneficiary. Polaris used the guidelines in FIN 46 to analyze the Company s relationships, including the relationship with Polaris Acceptance, and concluded that there are no variable interest entities requiring consolidation by the Company in 2004, 2005 and 2006.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Ultimate results could differ from those estimates.

Cash equivalents: Polaris considers all highly liquid investments purchased with an original maturity of 90 days or less to be cash equivalents and are stated at cost, which approximates fair value. Such investments consist principally of commercial paper and money market mutual funds.

Fair value of financial instruments: Except as noted, the carrying value of all financial instruments approximates their fair value.

Allowance for doubtful accounts: Polaris' financial exposure to collection of accounts receivable is limited due to its agreements with certain finance companies. For receivables not serviced through these finance companies, the Company provides a reserve for doubtful accounts based on historical rates and trends. This reserve is adjusted periodically as information about specific accounts becomes available.

Table of Contents

POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Inventories: Inventories are stated at the lower of cost (first-in, first-out method) or market. The major components of inventories are as follows (in thousands):

	December 31,	
	2006	2005
Raw materials and purchased components	\$ 19,391	\$ 17,321
Service parts, garments and accessories	67,302	70,299
Finished goods	155,927	126,311
Less: reserves	(12,087)	(11,909)
Inventories	\$ 230,533	\$ 202,022

Property and equipment: Property and equipment is stated at cost. Depreciation is provided using the straight-line method over the estimated useful life of the respective assets, ranging from 10-40 years for buildings and improvements and from 1-7 years for equipment and tooling. Fully depreciated tooling is eliminated from the accounting records annually.

Goodwill and other assets: SFAS No. 142 prohibits the amortization of goodwill and intangible assets with indefinite useful lives. SFAS No. 142 requires that these assets be reviewed for impairment at least annually. An impairment charge is recognized only when the estimated fair value of a reporting unit, including goodwill, is less than its carrying amount. The Company performed analyses as of December 31, 2006 and December 31, 2005. The results of the analyses indicated that no goodwill impairment existed. In accordance with SFAS No. 142 the Company will continue to complete an impairment analysis on an annual basis.

The changes in the carrying amount of goodwill for the years ended December 31, 2006 and 2005 are as follows (in thousands):

	2006	2005
Balance as of beginning of year	\$ 25,039	\$ 24,798
Goodwill acquired during the year		
Currency translation effect on foreign goodwill balances	1	241
Balance as of end of year	\$ 25,040	\$ 25,039

As required by SFAS No. 142, intangibles with finite lives continue to be amortized. Included in intangible assets are patents and customer lists. Intangible assets before accumulated amortization were \$615,000 at December 31, 2006 and \$3,435,000 at December 31, 2005. Accumulated amortization was \$483,000 at December 31, 2006 and \$3,215,000 at December 31, 2005. The net value of intangible assets is included as a component of Intangible and other assets, net in the accompanying consolidated balance sheets.

Research and Development Expenses: Polaris records research and development expenses in the period in which they are incurred as a component of operating expenses. In the years ended December 31, 2006, 2005 and 2004 Polaris incurred \$73,889,000, \$70,983,000, and \$63,799,000, respectively.

Advertising Expenses: Polaris records advertising expenses as a component of selling and marketing expenses in the period in which they are incurred. In the years ended December 31, 2006, 2005 and 2004 Polaris incurred \$35,239,000, \$33,560,000, and \$34,293,000 respectively.

Shipping and Handling Costs: Polaris records shipping and handling costs as a component of cost of sales at the time the product is shipped.

Product warranties: Polaris provides a limited warranty for ATVs for a period of six months and for a period of one year for its snowmobiles and motorcycles. Polaris may provide longer warranties related to certain promotional programs, as well as longer warranties in certain geographical markets as determined by local regulations and market conditions. Polaris' standard warranties require the Company or its dealers to repair or replace defective

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

products during such warranty periods at no cost to the consumer. The warranty reserve is established at the time of sale to the dealer or distributor based on management's best estimate using historical rates and trends. Adjustments to the warranty reserve are made from time to time as actual claims become known in order to properly estimate the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. Factors that could have an impact on the warranty accrual in any given year include the following: improved manufacturing quality, shifts in product mix, changes in warranty coverage periods, snowfall and its impact on snowmobile usage, product recalls and any significant changes in sales volume.

The activity in the warranty reserve during the years presented is as follows (in thousands):

	For the Year Ended December 31,		
	2006	2005	2004
Balance at beginning of year	\$ 28,178	\$ 28,243	\$ 29,068
Additions charged to expense	33,156	36,312	26,274
Warranty claims paid	(34,031)	(35,427)	(27,099)
Consumer Product Safety Commission settlement paid		(950)	
Balance at end of year	\$ 27,303	\$ 28,178	\$ 28,243

Sales promotions and incentives: Polaris provides for estimated sales promotion and incentive expenses, which are recognized as a reduction to sales, at the time of sale to the dealer or distributor. Examples of sales promotion and incentive programs include dealer and consumer rebates, volume discounts, retail financing programs and sales associate incentives. Sales promotion and incentive expenses are estimated based on current programs and historical rates for each product line. Actual results may differ from these estimates if market conditions dictate the need to enhance or reduce sales promotion and incentive programs or if the customer usage rate varies from historical trends. Polaris recorded accrued liabilities of \$65,226,000 and \$62,227,000 related to various sales promotions and incentive programs as of December 31, 2006 and 2005, respectively. Historically, sales promotion and incentive expenses have been within the Company's expectations and differences have not been material.

Dealer holdback programs: Polaris provides dealer incentive programs whereby at the time of shipment Polaris withholds an amount from the dealer until ultimate retail sale of the product. Polaris records these amounts as a reduction of revenue and a liability on the consolidated balance sheet until they are ultimately paid. Payments are generally made to dealers twice each year, in the first quarter and the third quarter, subject to previously established criteria. Polaris recorded accrued liabilities of \$80,546,000 and \$84,707,000 for dealer holdback programs in the consolidated balance sheets as of December 31, 2006 and 2005, respectively.

Foreign currency translation: The functional currency for the Canadian, Australian, France, Great Britain, Sweden, Norway and Austrian subsidiaries and the New Zealand branch is their respective local currencies.

The assets and liabilities in all Polaris foreign entities are translated at the foreign exchange rate in effect at the balance sheet date. Translation gains and losses are reflected as a component of Accumulated other comprehensive income (loss) in the shareholders' equity section of the accompanying consolidated balance sheets. Revenues and expenses in all of Polaris' foreign entities are translated at the average foreign exchange rate in effect for each month of

the quarter. The net accumulated other comprehensive income (loss) related to translation gains and losses was a net gain of \$15,349,000 at December 31, 2006 and a net gain of \$14,000 at December 31, 2005.

Revenue recognition: Revenues are recognized at the time of shipment to the dealer or distributor. Product returns, whether in the normal course of business or resulting from repossession under its customer financing program (see Note 3), have not been material. Polaris provides for estimated sales promotion expenses which are recognized as a reduction of sales when products are sold to the dealer or distributor customer.

Major supplier: During 2006, 2005 and 2004, purchases of engines and related components totaling 9, 10 and 11 percent, respectively, of Polaris' cost of sales were from a single Japanese supplier. Polaris has agreed with the supplier to share the impact of fluctuations in the exchange rate between the U.S. dollar and the Japanese yen.

Table of Contents

POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Share-Based Compensation: For purposes of determining estimated fair value of share-based payment awards on the date of grant under SFAS 123(R), Polaris used the Black-Scholes Model. The Black-Scholes Model requires the input of certain assumptions that require subjective judgment. Because employee stock options and restricted stock awards have characteristics significantly different from those of traded options, and because changes in the input assumptions can materially affect the fair value estimate, the existing models may not provide a reliable single measure of the fair value of the employee stock options or restricted stock awards. Management will continue to assess the assumptions and methodologies used to calculate estimated fair value of share-based compensation. Circumstances may change and additional data may become available over time, which could result in changes to these assumptions and methodologies and thereby materially impact the fair value determination. If factors change and the Company employs different assumptions in the application of SFAS 123(R) in future periods, the compensation expense that was recorded under SFAS 123(R) may differ significantly from what was recorded in the current period. Refer to Note 2 for additional information regarding share-based compensation.

Accounting for derivative instruments and hedging activities SFAS No. 133: Accounting for Derivative Instruments and Hedging Activities, requires that changes in the derivative's fair value be recognized currently in earnings unless specific hedge criteria are met, and requires that a company must formally document, designate and assess the effectiveness of transactions that receive hedge accounting. The unrealized losses of the derivative instruments of \$1,230,000 at December 31, 2006 and \$3,942,000 at December 31, 2005 were recorded as other accrued liabilities in the accompanying balance sheet. Polaris derivative instruments consist of the interest rate swap agreement and foreign exchange contracts discussed below. The after tax unrealized losses of \$552,000 and \$2,444,000 as of December 31, 2006 and 2005, respectively, were recorded as components of Accumulated other comprehensive income (loss) except for the Company's Euro foreign exchange contracts which do not meet the criteria for hedge accounting and therefore, the resulting unrealized losses are included in the consolidated statements of income as a non-operating other expense.

Interest rate swap agreement: Polaris has one interest rate swap agreement on \$18,000,000 of long term debt. The swap agreement, expiring in June 2007, has been designated as and meets the criteria as a cash flow hedge. The fair value of this swap agreement was calculated by comparing the fixed rate on the agreement to the market rate of financial instruments similar in nature. The fair values of this swap on December 31, 2006 and 2005 were unrealized losses of \$171,000 and \$659,000 respectively, which was recorded as a liability in the accompanying consolidated balance sheets. Gains and losses resulting from this agreement are recorded in interest expense when realized.

Foreign exchange contracts: Polaris enters into foreign exchange contracts to manage currency exposures of certain of its purchase commitments denominated in foreign currencies and transfers of funds from time to time from its Canadian and European subsidiaries. Polaris does not use any financial contracts for trading purposes. At December 31, 2006, Polaris had no open Canadian dollar contracts. At December 31, 2006, Polaris had open Japanese yen contracts with notional amounts totaling U.S. \$20,407,000 and an unrealized loss of \$719,000. These contracts met the criteria for cash flow hedges and the net unrealized loss, after tax, is recorded as a component of Accumulated other comprehensive income (loss) in shareholders' equity. Gains and losses on the Canadian dollar contracts at settlement are recorded in Nonoperating other (income) expense. Gains and losses on the Japanese yen contracts at settlement are recorded in cost of sales. At December 31, 2006, the Company had open Euro foreign exchange hedging contracts in place, in anticipation of the sale of 80 percent of the Company's investment in KTM in the first half of 2007, with notional amounts totaling U.S. \$77,275,000 and an unrealized loss of \$339,000. These Euro contracts did not meet the criteria for hedge accounting and the resulting unrealized loss was included in the consolidated statements of income as a non-operating other expense.

Commodity derivative contracts: Polaris is subject to market risk from fluctuating market prices of certain purchased commodity raw materials including steel, aluminum, fuel, and petroleum-based resins. In addition, the Company purchases components and parts containing various commodities, including steel, aluminum, rubber and others which are integrated into the Company's end products. While such materials are typically available from numerous suppliers, commodity raw materials are subject to price fluctuations. The Company generally buys these commodities and components based upon market prices that are established with the vendor as part of the purchase

Table of Contents

POLARIS INDUSTRIES INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

process. During 2006 the Company experienced commodity price increases with some of these key raw materials. As a result, during 2006, the Company entered into derivative contracts to hedge a portion of the exposure to commodity risk for aluminum and natural gas. The total amount of hedges in place as of December 31, 2006 is immaterial to the overall financial position of the Company. These commodity contracts did not meet the criteria for hedge accounting and the resulting unrealized gains or losses were included in the consolidated statements of income as a component of Cost of sales.

Comprehensive income: Comprehensive income reflects the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. For the Company, comprehensive income represents net income adjusted for foreign currency translation adjustments and the gain or loss on derivative instruments. The Company has chosen to disclose comprehensive income in the accompanying consolidated statements of shareholders' equity and comprehensive income.

New accounting pronouncements: Polaris adopted SFAS 123(R) effective as of the beginning of fiscal year 2006 using the modified retrospective method. In connection with the adoption of this new accounting standard, Polaris recorded an after tax benefit of \$407,000 or \$0.01 per diluted share on its income statement for the 2006 first quarter resulting from the cumulative effect of the accounting change. All prior periods presented were adjusted to give effect to the adoption of SFAS 123(R) using the modified retrospective method. The Company provided revised quarterly consolidated statements of income for the 2005 year reflecting the adoption of SFAS 123(R) under the modified retrospective method in a Form 8-K dated January 26, 2006. See Note 2 for additional disclosures regarding share-based employee compensation.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*—an interpretation of FASB Statement No. 109 (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 describes when an uncertain tax item should be recorded in the financial statements and for what value, provides guidance on recording interest and penalties and accounting and reporting for income taxes in interim periods. FIN 48 is effective for the Company's year beginning January 1, 2007. The Company does not expect FIN 48 to have a material impact on the Company's financial position or results of operations.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in the current year financial statements. The SAB requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 does not change the guidance in SAB 99, *Materiality*, when evaluating the materiality of misstatements. SAB 108 is effective for fiscal years ending after November 15, 2006. Upon initial application, SAB 108 permits a one-time cumulative effect adjustment to beginning retained earnings. The adoption of this pronouncement had no effect on the Company's financial position, results of operations or cash flows.

Reclassifications: Certain reclassifications of previously reported amounts have been made to conform to the current year presentation. The reclassifications had no impact on operations as previously reported.

NOTE 2. Share-Based Employee Compensation

In the first quarter ended March 31, 2006 Polaris adopted SFAS 123(R) which requires companies to recognize in the financial statements the grant-date fair value of stock options and other equity-based compensation issued to employees. Polaris adopted SFAS 123(R) using the modified retrospective method. In accordance with the modified retrospective method, the consolidated financial statements for prior periods have been adjusted to give effect to the adoption of SFAS 123(R). In addition, Polaris recorded on the consolidated statements of income in the first quarter of 2006 an after tax benefit of \$407,000 or \$0.01 per diluted share from the cumulative effect of the accounting change. Beginning with the first quarter 2006, the Company has reclassified other share-based compensation

Table of Contents

POLARIS INDUSTRIES INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

expenses, previously reported in General and administrative operating expenses, to Cost of sales and the Operating expenses lines on the consolidated statements of income. The balance sheet and statements of cash flow have also been adjusted to reflect the impact of SFAS 123(R) for all prior periods presented. The impact to the Company's net earnings of adopting SFAS 123(R) is consistent with the pro forma disclosures provided in the footnotes contained in previous financial statements.

Share-Based Plans

Polaris maintains a stock option plan (Option Plan) under which incentive and nonqualified stock options for a maximum of 8,200,000 shares of common stock may be issued to certain employees. Options granted to date generally vest three years from the award date and expire after ten years.

Polaris maintains a broad based stock option plan (Broad Based Plan) under which incentive stock options for a maximum of 700,000 shares of common stock could be issued to substantially all Polaris employees. Options with respect to 675,400 shares of common stock were granted under this plan during 1999 at an exercise price of \$15.78 and of the options initially granted under the Broad Based Plan, an aggregate of 518,400 vested in March 2002. These options expire in 2009.

Polaris maintains a restricted stock plan (Restricted Plan) under which a maximum of 2,350,000 shares of common stock may be awarded as an incentive to certain employees with no cash payments required from the recipient. The majority of the outstanding awards contain restrictions which lapse after a two to four year period if Polaris achieves certain performance measures.

Polaris maintains a nonqualified deferred compensation plan (Director Plan) under which members of the Board of Directors who are not Polaris officers or employees can elect to receive common stock equivalents in lieu of director's fees, which will be converted into common stock when board service ends. A maximum of 200,000 shares of common stock has been authorized under this plan of which 78,627 equivalents have been earned and an additional 59,810 shares have been issued to retired directors as of December 31, 2006. As of December 31, 2006 and 2005, Polaris' liability under the plan totaled \$3,682,000 and \$3,500,000, respectively.

Polaris maintains a non-employee director stock option plan (the Director Stock Option Plan), under which nonqualified stock options for a maximum of 200,000 shares of common stock may be issued to non-employee directors. Each non-employee director as of the date of the annual shareholders meetings has been granted an option to purchase 4,000 shares of common stock at a price per share equal to the fair market value as of the date of grant. Options become exercisable as of the date of the next annual shareholders meeting following the date of grant and must be exercised no later than 10 years from the date of grant.

Polaris maintains a long term incentive plan (LTIP) under which awards are issued to provide incentives for certain employees to attain and maintain the highest standards of performance and to attract and retain employees of outstanding competence and ability with no cash payments required from the recipient. The awards are paid in cash and are based on certain Company performance measures that are measured over a period of three consecutive calendar years. At the beginning of the plan cycle participants have the option to receive a cash value at the time of awards or a cash value tied to Polaris stock price movement over the three year plan cycle. At December 31, 2006 and 2005, Polaris' liability under the plan totaled \$0, and \$3,997,000, respectively.

Share-Based Compensation Expense

The amount of compensation cost for share-based awards to be recognized during a period is based on the portion of the awards that are ultimately expected to vest. The Company estimates option forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company analyzes historical data to estimate pre-vesting forfeitures and records share compensation expense for those awards expected to vest. During 2006 it was determined that the likelihood of the Company's performance measures associated with 93,000 shares of restricted stock awards outstanding being achieved was no longer probable. Therefore the previously recorded expense associated with these restricted stock awards was reversed in

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

2006. Additionally, during 2006 stock-based compensation expenses for the LTIP grants made prior to 2006 were reversed as it was determined that the likelihood of the Company's performance measures being achieved was no longer probable.

Total share-based compensation expenses are as follows (in thousands):

	For the Year Ended December 31,		
	2006	2005	2004
Option plan	\$ 8,245	\$ 8,142	\$ 7,193
Other share-based awards	(4,824)	4,809	10,357
Total share-based compensation before tax	3,421	12,951	17,550
Tax expense	1,284	4,416	5,642
Total share-based compensation expense included in net income	\$ 2,137	\$ 8,535	\$ 11,908

These share-based compensation expenses are reflected in Cost of sales and Operating expenses in the accompanying consolidated statements of income. For purposes of determining the estimated fair value of share-based payment awards on the date of grant under SFAS 123(R), Polaris has used the Black-Scholes option-pricing model. Assumptions utilized in the model are evaluated and revised, as necessary, to reflect market conditions and experience.

At December 31, 2006 there was \$24,830,000 of total unrecognized stock-based compensation expense related to unvested share-based awards. Unrecognized share-based compensation expense is expected to be recognized over a weighted-average period of 1.7 years. Included in unrecognized share-based compensation is approximately \$11,450,000 related to stock options and \$13,380,000 for restricted stock.

\$49.98 to \$59.45	240,500	7.9	\$ 59.25	28,000	\$ 59.19
\$59.46 to \$75.21	258,500	3.1	\$ 67.74	215,000	\$ 67.50

The weighted average remaining contractual life of outstanding options was 5.5 years as of December 31, 2006.

Table of Contents

POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following assumptions were used to estimate the weighted average fair value of options of \$12.56, \$14.25 and \$15.47 granted during the year ended December 31, 2006, 2005 and 2004, respectively:

	For the Year		
	Ended December 31,		
	2006	2005	2004
Weighted-average volatility	31%	30%	35%
Expected dividend yield	2.6%	2.1%	1.9%
Expected term (in years)	5.1	5.0	5.5
Weighted average risk free interest rate	4.5%	3.9%	3.8%

The total intrinsic value of options exercised during the year ended December 31, 2006 was \$8,201,000. The total intrinsic value of options outstanding and exercisable at December 31, 2006, 2005 and 2004 was \$57,579,000, \$73,321,000 and \$147,865,000, respectively. The total intrinsic value at December 31, 2006 is based on the Company's closing stock price on the last trading day of the year for in-the-money options.

The following table summarizes restricted stock activity for the year ended December 31, 2006:

	Shares	Weighted	
	Outstanding	Average	
		Grant Price	
Balance as of December 31, 2005	167,280	\$	51.50
Granted	289,207		46.74
Vested	(71,780)		37.65
Canceled			
Balance as of December 31, 2006	384,707	\$	50.50
Expected to vest as of December 31, 2006	291,707	\$	46.74

The total intrinsic value of restricted stock expected to vest as of December 31, 2006 was \$13,661,000. The total intrinsic value at December 31, 2006 is based on the Company's closing stock price on the last trading day of the year. The weighted average fair values at the grant dates of grants awarded under the Restricted Stock Plan for the years ended December 31, 2006, 2005 and 2004 were \$46.74, \$66.06 and \$59.45, respectively.

Employee Savings Plans

Polaris sponsors a qualified non-leveraged employee stock ownership plan (ESOP) under which a maximum of 3,250,000 shares of common stock can be awarded. The shares are allocated to eligible participants accounts based on total cash compensation earned during the calendar year. Shares vest immediately and require no cash payments from the recipient. Substantially all employees are eligible to participate in the ESOP, with the exception of Company

officers. Total expense related to the ESOP was \$6,424,000, \$9,265,000, and \$9,533,000 in 2006, 2005 and 2004, respectively. As of December 31, 2006 there were 2,723,127 shares vested in the plan.

Polaris sponsors a 401(k) retirement savings plan under which eligible U.S. employees may choose to contribute up to 50 percent of eligible compensation on a pre-tax basis, subject to certain IRS limitations. The Company matches 100 percent of employee contributions up to a maximum of five percent of eligible compensation. Matching contributions were \$6,959,000, \$7,253,000, and \$6,796,000 in 2006, 2005 and 2004, respectively.

Note 3: Financing

Bank financing: Polaris is a party to an unsecured bank agreement comprised of a \$250,000,000 revolving loan facility for working capital needs and a \$200,000,000 term loan. The entire amount of the \$200,000,000 term loan was utilized in December 2006 to fund the accelerated share repurchase transaction. Interest is charged at rates based on LIBOR or prime. The agreement contains various restrictive covenants which limit investments,

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

acquisitions and indebtedness. The agreement also requires Polaris to maintain certain financial ratios including minimum interest coverage and a maximum leverage ratio. Polaris was in compliance with each of the covenants as of December 31, 2006. The agreement expires on December 2, 2011.

The following summarizes activity under Polaris credit arrangements (dollars in thousands):

	2006	2005	2004
Total borrowings at December 31,	\$ 250,000	\$ 18,000	\$ 18,000
Average outstanding borrowings during year	\$ 158,254	\$ 96,430	\$ 50,268
Maximum outstanding borrowings during year	\$ 395,000	\$ 190,000	\$ 98,000
Interest rate at December 31	5.966%	4.955%	2.765%

Polaris has entered into an interest rate swap agreement to manage exposures to fluctuations in interest rates. The effect of this agreement is to fix the interest rate at 7.21 percent for \$18,000,000 of any borrowing until June 2007. The fair value of the interest rate swap was a liability of \$171,000 as of December 31, 2006.

Letters of credit: At December 31, 2006, Polaris had open letters of credit totaling approximately \$4,578,000. The amounts outstanding are reduced as inventory purchases pertaining to the contracts are received.

Dealer financing programs: Certain finance companies, including Polaris Acceptance, an affiliate (see Note 6), provide floor plan financing to dealers on the purchase of Polaris products. The amount financed by worldwide dealers under these arrangements at December 31, 2006, was approximately \$862,399,000. Polaris has agreed to repurchase products repossessed by the finance companies up to an annual maximum of no more than 15 percent of the average month-end balances outstanding during the prior calendar year. Polaris financial exposure under these arrangements is limited to the difference between the amount paid to the finance companies for repurchases and the amount received on the resale of the repossessed product. No material losses have been incurred under these agreements during the periods presented. As a part of its marketing program, Polaris contributes to the cost of dealer financing up to certain limits and subject to certain conditions. Such expenditures are included as an offset to sales in the accompanying consolidated statements of income.

Note 4: Income Taxes

Components of Polaris provision for income taxes for continuing operations are as follows (in thousands):

	For the Years Ended December 31,		
	2006	2005	2004
Current:			
Federal	\$ 47,060	\$ 52,093	\$ 59,024
State	4,072	5,649	6,453
Foreign	5,745	3,930	3,369
Deferred	(5,889)	(534)	(2,597)

Total	\$ 50,988	\$ 61,138	\$ 66,249
-------	------------------	-----------	-----------

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Reconciliation of the Federal statutory income tax rate to the effective tax rate is as follows:

	For the Years Ended December 31,		
	2006	2005	2004
Federal statutory rate	35.0%	35.0%	35.0%
State income taxes, net of federal benefit	1.7	1.8	2.0
Extraterritorial income exclusion/foreign sales corporation	(1.9)	(2.0)	(2.5)
Settlement of state tax audit		(1.2)	
Other permanent differences	(3.7)	(2.9)	(1.1)
Effective income tax rate	31.1%	30.7%	33.4%

In 2005 the Company realized an income tax benefit generated from the settlement of prior year state income tax audit disputes for the years 1997 through 2000. As a result of the settlement, a portion of the Company's recorded income tax reserves were no longer necessary, resulting in a reduction in the income tax provision for 2005.

U.S. income taxes have not been provided on undistributed earnings of certain foreign subsidiaries as of December 31, 2006. The Company has reinvested such earnings overseas in foreign operations indefinitely and expects that future earnings will also be reinvested overseas indefinitely in these subsidiaries.

Polaris utilizes the liability method of accounting for income taxes whereby deferred taxes are determined based on the estimated future tax effects of differences between the financial statement and tax bases of assets and liabilities given the provisions of enacted tax laws. The net deferred income taxes consist of the following (in thousands):

	December 31,		
	2006	2005	2004
Current deferred income taxes:			
Inventories	\$ 5,315	\$ 6,515	\$ 6,540
Accrued expenses	53,454	52,485	56,460
Derivative instruments	338	1,498	2,489
Total current	59,107	60,498	65,489
Noncurrent net deferred income taxes:			
Cost in excess of net assets of business acquired	5,918	8,609	11,988
Property and equipment	(16,368)	(19,840)	(25,330)
Compensation payable in common stock	12,045	12,908	11,668
Total noncurrent	1,595	1,677	(1,674)
Total	\$ 60,702	\$ 62,175	\$ 63,815

Note 5: Shareholders Equity

Stock repurchase program: The Polaris Board of Directors has authorized the cumulative repurchase of up to 34,000,000 shares of the Company's common stock. During 2006, Polaris paid \$307,621,000 to repurchase and retire approximately 6,880,000 shares. Of that total, 3,550,000 shares of Polaris common stock were repurchased at an initial purchase price of approximately \$165,582,000, or \$46.64 per share through an accelerated share repurchase agreement entered into in December 2006 with Goldman, Sachs & Co. Cumulative repurchases through December 31, 2006 were approximately 29,222,000 shares at a cost of \$888,667,000. All the repurchased shares have been retired.

Table of Contents

POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Shareholder rights plan: During 2000, the Polaris Board of Directors adopted a shareholder rights plan. Under the plan, a dividend of preferred stock purchase rights will become exercisable if a person or group should acquire 15 percent or more of the Company's stock. The dividend will consist of one purchase right for each outstanding share of the Company's common stock held by shareholders of record on June 1, 2000. Each right will entitle its holder to purchase one-hundredth of a share of a new series of junior participating preferred stock at an exercise price of \$150, subject to adjustment. The rights expire in 2010 and may be redeemed earlier by the Board of Directors for \$0.01 per right.

Accumulated other comprehensive income (loss): Accumulated other comprehensive income (loss) consisted of \$15,349,000 and \$14,000 of unrealized currency translation gains as of December 31, 2006 and 2005, respectively, offset by \$552,000 (after tax effect of \$338,000) and \$2,444,000 (after tax effect of \$1,498,000) of unrealized losses, related to derivative instruments as of December 31, 2006 and 2005, respectively.

Net income per share: Basic earnings per share is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during each year, including shares earned under the Director Plan and the ESOP. Diluted earnings per share is computed under the treasury stock method and is calculated to compute the dilutive effect of outstanding stock options and certain shares issued under the Restricted Plan. A reconciliation of these amounts is as follows (in thousands):

	2006	2005	2004
Weighted average number of common shares outstanding	40,072	41,894	42,093
Director Plan	75	66	59
ESOP	177	171	166
Common shares outstanding basic	40,324	42,131	42,318
Dilutive effect of Restricted Plan	78	255	402
Dilutive effect of Option Plan	1,049	1,401	1,768
Common and potential common shares outstanding diluted	41,451	43,787	44,488

During 2006, 2005 and 2004, the number of options that could potentially dilute earnings per share on a fully diluted basis that were not included in the computation of diluted earnings per share because to do so would have been anti-dilutive was 1,347,000, 590,000, and no shares, respectively.

Stock Purchase Plan: Polaris maintains an employee stock purchase plan (Purchase Plan). A total of 1,500,000 shares of common stock are reserved for this plan. The Purchase Plan permits eligible employees to purchase common stock at 85 percent of the average market price each month. As of December 31, 2006, approximately 484,000 shares had been purchased under the Purchase Plan.

Note 6: Financial Services Arrangements

In 1996, a wholly-owned subsidiary of Polaris entered into a partnership agreement with a subsidiary of Transamerica Distribution Finance (TDF) to form Polaris Acceptance. In 2004, TDF was merged with a subsidiary of General Electric Company and, as a result of that merger, TDF's name was changed to GE Commercial Distribution Finance Corporation (GECDF). Polaris's subsidiary has a 50 percent equity interest in Polaris Acceptance. In November 2006, Polaris Acceptance sold a majority of its receivable portfolio to a Securitization Facility (Securitization Facility) arranged by General Electric Capital Corporation, a GECDF affiliate, and the partnership agreement was amended to provide that Polaris Acceptance would continue to sell portions of its receivable portfolio to the Securitization Facility from time to time on an ongoing basis. At December 31, 2006 and 2005, the outstanding balance of receivables sold by Polaris Acceptance to the Securitization Facility (the Securitized Receivables) amounted to approximately \$599,673,000 and \$0, respectively). The sale of receivables from Polaris Acceptance to the Securitization Facility is accounted for in Polaris Acceptance's financial statements as a true-sale under SFAS No. 140: (Accounting for Transfers and Servicing of Financial Assets and

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Extinguishments of Liabilities). Polaris Acceptance is not responsible for any continuing servicing costs or obligations with respect to the Securitized Receivables. The remaining portion of the receivable portfolio is recorded on Polaris Acceptance's books, and is funded to the extent of 85 percent through a loan from an affiliate of GECDF. Polaris has not guaranteed the outstanding indebtedness of Polaris Acceptance or the Securitized Receivables. In addition, the two partners of Polaris Acceptance share equally a 15 percent equity cash investment equal to the sum of the portfolio balance in Polaris Acceptance plus the Securitized Receivables. Polaris' total investment in Polaris Acceptance at December 31, 2006 and 2005, was \$55,629,000 and \$59,601,000, respectively. The Polaris Acceptance partnership agreement provides for periodic options for renewal, purchase, or termination by either party. Substantially all of Polaris' U.S. sales are financed through Polaris Acceptance and the Securitization Facility whereby Polaris receives payment within a few days of shipment of the product. The net amount financed for dealers under this arrangement at December 31, 2006, including both the portfolio balance in Polaris Acceptance and the Securitized Receivables, was \$746,512,000. Polaris has agreed to repurchase products repossessed by Polaris Acceptance up to an annual maximum of 15 percent of the average month-end balances outstanding during the prior calendar year. For calendar year 2007, the potential 15 percent aggregate repurchase obligation is approximately \$89,863,000. Polaris' financial exposure under this arrangement is limited to the difference between the amount paid to the finance company for repurchases and the amount received on the resale of the repossessed product. No material losses have been incurred under this agreement during the periods presented. Polaris' trade receivables from Polaris Acceptance were \$1,449,000 and \$813,000 at December 31, 2006 and 2005, respectively. Polaris' exposure to losses associated with respect to the Polaris Acceptance Portfolio and the Securitized Receivables is limited to its equity in its wholly-owned subsidiary that is a partner in Polaris Acceptance.

Polaris' total investment in Polaris Acceptance at December 31, 2006 of \$55,629,000 is accounted for under the equity method, and is recorded as Investments in finance affiliate in the accompanying consolidated balance sheets. The partnership agreement provides that all income and losses of the Polaris Acceptance and the Securitized Receivables are shared 50 percent by Polaris' wholly-owned subsidiary and 50 percent by GECDF. Polaris' allocable share of the income of Polaris Acceptance and the Securitized Receivables has been included as a component of Income from financial services in the accompanying statements of income.

Summarized financial information for Polaris Acceptance reflecting the effects of the Securitization Facility is presented as follows (in thousands):

	For the Year Ended December 31,		
	2006	2005	2004
Revenues	\$ 61,797	\$ 55,430	\$ 38,066
Interest and operating expenses	29,983	27,082	15,090
Net income before income taxes	\$ 31,814	\$ 28,348	\$ 22,976
		As of December 31,	
		2006	2005
Finance receivables, net		\$ 146,705	\$ 796,459

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In October 2001 Household Bank (SB), N.A. (Household) and a subsidiary of Polaris entered into a Revolving Program Agreement with Household to provide retail financing to consumers who buy Polaris products in the United States. In August 2005, the wholly-owned subsidiary of Polaris entered into a multi-year contract with HSBC Bank Nevada, National Association (HSBC), formerly known as Household Bank (SB), N.A. under which HSBC will continue managing the Polaris private label credit card program under the StarCard label. The 2005 agreement provides for income to be paid to Polaris based on a percentage of the volume of retail credit business generated. The previous agreement provided for equal sharing of all income and losses with respect to the retail credit portfolio, subject to certain limitations. The 2005 contract removed all credit, interest rate and funding risk to Polaris and also eliminated the need for Polaris to maintain a retail credit cash deposit with HSBC, which was approximately \$50,000,000 at August 1, 2005.

Polaris also provides extended service contracts to consumers and certain insurance contracts to dealers and consumers through various third-party suppliers. Polaris does not retain any warranty, insurance or financial risk in any of these arrangements. Polaris' service fee income generated from these arrangements has been included as a component of Income from financial services in the accompanying consolidated statements of income.

Income from financial services as included in the consolidated statements of income is comprised of the following (in thousands):

	For the Year Ended December 31,		
	2006	2005	2004
Equity in earnings of Polaris Acceptance	\$ 15,907	\$ 14,174	\$ 11,488
Income from Securitization Facility	1,161		
Income from HSBC agreement	27,052	22,167	19,184
Income from other financial services activities	2,941	2,299	1,363
Total income from financial services	\$ 47,061	\$ 38,640	\$ 32,035

Note 7: Investment in Manufacturing Affiliates

The caption Investment in manufacturing affiliates in the consolidated balance sheets represents Polaris' equity investment in Robin Manufacturing, U.S.A. (Robin) which builds engines in the United States for recreational and industrial products and the investment in the Austrian motorcycle company KTM Power Sports AG (KTM), which manufactures off-road and on-road motorcycles. Polaris has a 40 percent ownership interest in Robin and as of December 31, 2006 had a 25 percent ownership interest in KTM. Polaris' investments, including associated transaction costs, totaling \$99,433,000 at December 31, 2006 and \$87,772,000 at December 31, 2005 are accounted for under the equity method. Polaris' allocable share of the income, (net of impairment charges) of these investments of \$3,642,000, \$2,308,000 and \$6,000 for 2006, 2005 and 2004, respectively, is recorded in Equity in (income) of manufacturing affiliates in the accompanying consolidated statements of income. During the third quarter of 2006, the Company announced that it had been informed by Cross of Cross' intention to retain its majority interest in KTM and not sell its majority interest in KTM to Polaris. In December 2006 Polaris entered into a share purchase agreement for the sale by the Company of approximately 1,379,000 KTM shares, or approximately 80 percent of its investment in KTM, to a subsidiary of Cross for a purchase price of approximately 58,506,000 million Euros. The agreement provided for the

sale of the KTM shares in two stages during the first half of 2007. At the conclusion of the second stage of the transaction, Polaris will then hold ownership of approximately 345,000 KTM shares, representing slightly less than 5 percent of outstanding KTM shares. The sale price per share of KTM stock has been fixed in the share purchase agreement. During the fourth quarter of 2006 the Company recorded income, net of tax, of \$1,971,000 related to its 25 percent equity ownership in KTM and also recorded a corresponding impairment charge of \$1,884,000 in order to adjust the asset carrying value of the shares to equal the sales price in the share purchase agreement on a per share basis. This impairment charge was included as a component of Equity in (income) of manufacturing affiliates in the accompanying consolidated statements of income. Upon completion of the first stage of the share purchase agreement in the first quarter 2007, Polaris ownership interest in KTM will

Table of Contents**POLARIS INDUSTRIES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

drop below 20 percent of the total outstanding KTM shares. At that time the Company will change from the equity method of accounting to the cost method of accounting for the KTM investment, resulting in unrealized currency translation gains recorded in accumulated other comprehensive income as a component of shareholders' equity, being offset against the asset carrying value of the investment in KTM.

On February 20, 2007, Polaris completed the first closing of its sale of KTM shares to Cross under the terms of the December 2006 agreement. Approximately 1,107,000 shares were delivered at a purchase price of approximately 46,962,000 Euros. As a result of the sale transaction, Polaris expects to record in the first quarter 2007 a gain on the sale of the KTM investment of approximately \$4,840,000 pre-tax, or approximately \$0.09 per diluted share due to the recognition of previously unrealized translation gains recorded in accumulated other comprehensive income, a component of shareholders' equity. The December 2006 agreement provides for the completion of the sale of approximately 272,000 additional shares of KTM stock on or before June 15, 2007. As a result, Polaris currently expects that the completion of the sale will generate an additional gain on the sale of the KTM investment of approximately \$0.02 per diluted share during the second quarter of 2007.

Summary financial information for KTM follows in the table below. KTM reports its financial results in Euros utilizing the International Financial Reporting Standards (IFRS) method; the balances below have been adjusted for the effects of conversion to generally accepted accounting principles in the United States (US GAAP) and translated into U.S. dollars. The balance sheet data presented below is as of the end of KTM's first quarter ended November 30, 2006, the most recent available data. The statement of income data presented below represents the results of operations of KTM for the four most recent quarters ended November 30, 2006:

(In thousands of US \$)

Current assets	\$ 294,900
Noncurrent assets	291,800
Current liabilities	167,500
Noncurrent liabilities	188,000
Shareholders' equity	231,200

(In thousands of US \$)

Net sales	\$ 644,400
Gross profit	201,700
Net income	22,100

At December 28, 2006 KTM's stock was trading at 48.90 with a market capitalization of approximately \$445,000,000 U.S. dollars.

Note 8: Commitments and Contingencies

Product liability: Polaris is subject to product liability claims in the normal course of business. Polaris is currently self insured for all product liability claims. The estimated costs resulting from any losses are charged to operating expenses when it is probable a loss has been incurred and the amount of the loss is reasonably determinable. The

Company utilizes historical trends and actuarial analysis tools to assist in determining the appropriate loss reserve levels. At December 31, 2006 the Company had an accrual of \$9,169,000 for the probable payment of pending claims related to continuing operations. This accrual is included as a component of Other Accrued expenses in the accompanying consolidated balance sheets. In addition, the Company had an accrual of \$4,284,000 for the probable payment of pending claims related to discontinued operations at December 31, 2006.

Litigation: Polaris is a defendant in lawsuits and subject to claims arising in the normal course of business. In the opinion of management, it is unlikely that any legal proceedings pending against or involving Polaris will have a material adverse effect on Polaris' financial position or results of operations.

Table of Contents

POLARIS INDUSTRIES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Leases: Polaris leases buildings and equipment under non-cancelable operating leases. Total rent expense under all lease agreements was \$3,761,000, \$3,678,000, and \$3,590,000 for 2006, 2005 and 2004, respectively. Future minimum payments, exclusive of other costs required under non-cancelable operating leases, at December 31, 2006 total \$4,792,000 cumulatively through 2011.

Note 9: Discontinued Operations

On September 2, 2004, the Company announced its decision to discontinue the manufacture of marine products effective immediately. In the third quarter 2004, the Company recorded a loss on disposal of discontinued operations of \$35,600,000 before tax, or \$23,852,000 after tax. This loss included a total of \$28,705,000 in expected future cash payments for costs to assist the dealers in selling their remaining inventory, incentives and discounts to encourage consumers to purchase remaining products, costs to cancel supplier arrangements, legal and regulatory issues, and personnel termination costs. In addition, the loss included \$6,895,000 in non-cash costs related primarily to the disposition of tooling, other physical assets, and the Company's remaining inventory. During 2006, the Company recorded an additional loss on disposal of discontinued operations of \$8,073,000 before tax, or \$5,401,000 after tax. This loss includes the estimated costs required to resolve past and potential future product liability litigation claims and warranty expenses related to marine products.

Components of the accrued disposal costs are as follows (in thousands):

	Balance Prior To Charge	Charge	Utilization from Closedown Date Through December 31, 2005	Balance December 31, 2005	Utilization During 2006	Charges during 2006	Balance December 31, 2006
Incentive costs to sell remaining inventory including product warranty	\$ 3,960	\$ 11,608	\$ (15,352)	\$ 216	\$ (688)	\$ 550	\$ 78
Costs related to canceling supplier arrangements		14,159	(14,159)				
Legal, regulatory, personnel and other costs	4,327	2,938	(2,088)	5,177	(8,416)	7,523	4,284
Disposition of tooling, inventory and other fixed assets (non-cash)		6,895	(6,895)				

Total \$ 8,287 \$ 35,600 \$ (38,494) \$ 5,393 \$ (9,104) \$ 8,073 \$ 4,362

The financial results of the marine products division included in discontinued operations are as follows (in thousands):

Note 10: Segment Reporting

Polaris has reviewed SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, and determined that the Company meets the aggregation criteria outlined since the Company's segments have similar (1) economic characteristics, (2) product and services, (3) production processes, (4) customers, (5) distribution channels, and (6) regulatory environments. Therefore, the Company reports as a single business segment.

The following data relates to Polaris' foreign continuing operations (in thousands of U.S. dollars):

	For the Years Ended December 31,		
	2006	2005	2004
Canadian subsidiary:

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and its Vice President-Finance and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Vice President-Finance and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings. No changes have occurred during the period covered by this report or since the evaluation date that would have a material effect on the disclosure controls and procedures.

The Company's internal control report is included in this report after Item 8, under the caption Management's Report on Company's Internal Control over Financial Reporting.

Item 9B. Other Information

Not applicable.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Polaris Industries Inc.:

We have audited the consolidated financial statements of Polaris Industries Inc. as of December 31, 2006 and 2005, and for each of the three years in the period ended December 31, 2006, and have issued our report thereon dated February 21, 2007 (included elsewhere in this Form 10-K). Our audit also included the financial statement schedules listed in Item 15(a) of this Form 10-K. These schedules are the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits.

In our opinion, the financial statement schedules for the years ended December 31, 2006, 2005 and 2004, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Minneapolis, Minnesota
