Core Molding Technologies, Inc. and Subsidiaries  
 Notes to Consolidated Financial Statements  
 (Unaudited)

### 1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and include all of the information and disclosures required by accounting principles generally accepted in the United States of America for interim reporting, which are less than those required for annual reporting. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (all of which are normal and recurring in nature) necessary to present fairly the financial position of Core Molding Technologies, Inc. and its subsidiaries ("Core Molding Technologies" or the "Company") at June 30, 2012, the results of operations and cash flows for the three and six months ended June 30, 2012. The "Notes to Consolidated Financial Statements," which are contained in the Company's 2011 Annual Report to Shareholders, should be read in conjunction with these consolidated financial statements.

Core Molding Technologies and its subsidiaries operate in the plastics market in a family of products known as "reinforced plastics." Reinforced plastics are combinations of resins and reinforcing fibers (typically glass or carbon) that are molded to shape. Core Molding Technologies is a manufacturer of sheet molding compound ("SMC") and molder of fiberglass reinforced plastics. The Company specializes in large-format moldings and offers a wide range of fiberglass processes, including compression molding of SMC, glass mat thermoplastics ("GMT") and bulk molding compounds ("BMC"); spray-up, hand-lay-up, and resin transfer molding ("RTM"). Additionally, the Company offers reaction injection molding ("RIM"), utilizing dicyclopentadiene technology. Core Molding Technologies maintains five production facilities in Columbus, Ohio; Batavia, Ohio; Gaffney, South Carolina; Warsaw, Kentucky; and Matamoros, Mexico.

The Company operates in one business segment as a manufacturer of SMC and molder of fiberglass reinforced plastics. The Company produces and sells SMC and molded products for varied markets, including light, medium, and heavy-duty trucks, automobiles and automotive aftermarket, marine, and other commercial products.

Certain items previously reported have been reclassified to conform to the current year's reporting format. These reclassifications had no effect on net income or shareholders' equity as previously reported.

### 2. Net Income per Common Share

Net income per common share is computed based on the weighted average number of common shares outstanding during the period. Diluted net income per common share is computed similarly but includes the effect of the assumed exercise of dilutive stock options and restricted stock under the treasury stock method.

The computation of basic and diluted net income per common share is as follows:

	Three Months Ended June 30, 2012	2011	Six Months Ended June 30, 2012	2011
Net income	\$2,341,000	\$2,842,000	\$4,976,000	\$5,111,000
Weighted average common shares outstanding — basic	7,086,000	6,907,000	7,077,000	6,899,000
Effect of dilutive securities	274,000	426,000	301,000	388,000
Weighted average common and potentially issuable common shares outstanding — diluted	7,360,000	7,333,000	7,378,000	7,287,000

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Basic net income per common share	\$0.33	\$0.41	\$0.70	\$0.74
Diluted net income per common share	\$0.32	\$0.39	\$0.67	\$0.70

Table of Contents**3. Major Customers**

Core Molding Technologies currently has two major customers, Navistar, Inc. (“Navistar”) and PACCAR, Inc. (“PACCAR”). Major customers are defined as customers whose sales individually consist of more than ten percent of total sales during any reporting period. The following table presents sales revenue for the above-mentioned customers for the three and six months ended June 30, 2012 and 2011:

	Three Months Ended		Six Months Ended	
	June 30, 2012	2011	June 30, 2012	2011
Navistar product sales	\$15,055,000	\$14,739,000	\$31,854,000	\$28,511,000
Navistar tooling sales	963,000	828,000	1,038,000	828,000
Total Navistar sales	16,018,000	15,567,000	32,892,000	29,339,000
PACCAR product sales	15,082,000	12,446,000	31,521,000	21,474,000
PACCAR tooling sales	196,000	223,000	290,000	223,000
Total PACCAR sales	15,278,000	12,669,000	31,811,000	21,697,000
Other product sales	11,072,000	6,362,000	22,165,000	12,536,000
Other tooling sales	2,176,000	696,000	2,205,000	711,000
Total other sales	13,248,000	7,058,000	24,370,000	13,247,000
Total product sales	41,209,000	33,547,000	85,540,000	62,521,000
Total tooling sales	3,335,000	1,747,000	3,533,000	1,762,000
Total sales	\$44,544,000	\$35,294,000	\$89,073,000	\$64,283,000

**4. Property, Plant & Equipment**

Property, plant and equipment consisted of the following at June 30, 2012 and December 31, 2011:

	June 30, 2012	December 31, 2011
Property, plant and equipment	\$98,138,000	\$93,236,000
Accumulated depreciation	(46,245,000)	) (43,892,000) )
Property, plant and equipment — net	\$51,893,000	\$49,344,000

Property, plant, and equipment are recorded at cost. Depreciation is provided on a straight-line method over the estimated useful lives of the assets. The carrying amount of long-lived assets is evaluated annually to determine if an adjustment to the depreciation period or to the unamortized balance is warranted. Capital expenditures in progress were \$9,055,000 and \$7,271,000 at June 30, 2012 and December 31, 2011, respectively. The Company capitalized \$139,000 of interest expense for the six months ended June 30, 2012. At June 30, 2012 and December 31, 2011, purchase commitments for capital expenditures in progress were \$1,954,000 and \$4,356,000, respectively. These commitments are primarily related to the Company's Matamoros, Mexico facility expansion project.

Table of Contents**5. Post Retirement Benefits**

The components of expense for Core Molding Technologies' post retirement benefit plans for the three and six months ended June 30, 2012 and 2011 are as follows:

	Three Months Ended June 30, 2012		Six Months Ended June 30, 2012	
	2011		2011	
Pension expense:				
Multi-employer plan contributions	\$117,000		\$110,000	\$229,000
Defined contribution plan contributions	127,000		125,000	301,000
Total pension expense	244,000		235,000	530,000
Health and life insurance:				
Interest cost	91,000		132,000	182,000
Amortization of prior service costs	(124,000)	)	(124,000)	(248,000)
Amortization of net loss	40,000		55,000	79,000
Net periodic benefit cost	7,000		63,000	13,000
Total post retirement benefits expense	\$251,000		\$298,000	\$543,000

The Company made payments of \$722,000 to pension plans and \$505,000 for post retirement healthcare and life insurance during the six months ended June 30, 2012. For the remainder of 2012 the Company expects to make approximately \$295,000 of pension plan payments. The Company also expects to make approximately \$497,000 of post retirement healthcare and life insurance payments for the remainder of 2012, all of which are accrued at June 30, 2012.

**6. Debt**

Debt consists of the following at:

	June 30, 2012	December 31, 2011
Capex loan payable to a bank, interest at a variable rate (1.99% and 2.02% at June 30, 2012 and December 31, 2011, respectively) with monthly payments of interest and principal over a seven-year period through May 2016	\$6,714,000	\$7,571,000
Mexican loan payable to a bank, interest at a variable rate (1.94% at June 30, 2012 and December 31, 2011) with annual principal and monthly interest payments over a five-year period through January 2014	3,200,000	4,800,000
Industrial Development Revenue Bond, interest adjustable weekly (0.36% and 0.37% at June 30, 2012 and December 31, 2011, respectively), payable quarterly, principal due in variable quarterly installments through April 2013, secured by a bank letter of credit	825,000	1,210,000
Revolving line of credit, interest at a variable rate (1.94% at June 30, 2012) with monthly interest payments and a maturity date of May 31, 2014	2,233,000	—
Mexican Expansion Revolving loan	—	—
Total	12,972,000	13,581,000
Less current portion	(6,372,000)	(4,104,000)
Long-term debt	\$6,600,000	\$9,477,000

Credit Agreement

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

In 2008, the Company and its wholly owned subsidiary, CoreComposites de Mexico, S. de R.L. de C.V., entered into a credit agreement (the “Credit Agreement”) to refinance certain existing debt and borrow funds to finance the construction of the Company’s manufacturing facility in Mexico.

10

---

## Table of Contents

Under this Credit Agreement, the Company received certain loans, subject to the terms and conditions stated in the agreement, which included (1) a \$12,000,000 Capex loan; (2) an \$8,000,000 Mexican loan; (3) an \$8,000,000 variable rate revolving line of credit; (4) a \$2,678,563 term loan to refinance an existing term loan; and (5) a letter of credit in an undrawn face amount of \$3,332,493 with respect to the Company's existing Industrial Development Revenue Bond ("IDRB") financing. The Credit Agreement is secured by a guarantee of each U.S. subsidiary of the Company, and by a lien on substantially all of the present and future assets of the Company and its U.S. subsidiaries, except that only 65% of the stock issued by CoreComposites de Mexico, S. de C.V. has been pledged. The \$8,000,000 Mexican loan is also secured by substantially all of the present and future assets of the Company's Mexican subsidiary.

The Company is currently in the process of completing a \$14,500,000 capacity expansion to its Matamoros, Mexico production facility. In anticipation of funding needs for this expansion, the Company amended the Credit Agreement in 2011 to secure an additional \$10,000,000 Mexican expansion revolving loan as described below.

On July 9, 2012, the Company and its wholly owned subsidiary, CoreComposites de Mexico, S. de R.L. de C.V., entered into a seventh amendment (the "Seventh Amendment") to the Credit Agreement. Pursuant to the terms of the Seventh Amendment, the parties agreed to extend the commitment for the revolving line of credit to May 31, 2014.

### **Revolving Line of Credit**

At June 30, 2012, the Company had an \$8,000,000 variable rate revolving line of credit, which is now scheduled to mature on May 31, 2014. The revolving line of credit bears interest at daily LIBOR plus 175 basis points and is collateralized by all of the present and future assets of the Company and its U.S. subsidiaries (except that only 65% of the stock issued by CoreComposites de Mexico, S. de C.V. has been pledged).

### **Mexican Expansion Revolving Loan**

At June 30, 2012, the Company had available a \$10,000,000 variable rate revolving loan, scheduled to mature on May 31, 2013. The revolving loan bears interest at daily LIBOR plus 175 basis points and is collateralized by all of the present and future assets of the Company and its U.S. subsidiaries (except that only 65% of the stock issued by CoreComposites de Mexico, S. de C.V. has been pledged).

### **Bank Covenants**

The Company is required to meet certain financial covenants included in the Credit Agreement with respect to leverage ratios, fixed charge ratios, capital expenditures as well as other customary affirmative and negative covenants. As of June 30, 2012, the Company was in compliance with its financial covenants associated with the loans made under the Credit Agreement as described above.

Management regularly evaluates the Company's ability to meet its debt covenants. Based upon the Company's forecasts, which are primarily based on industry analysts' estimates of heavy and medium-duty truck production volumes, as well as other assumptions, management believes that the Company will be able to maintain compliance with its financial covenants for the next 12 months.

### **Interest Rate Swaps**

In conjunction with its variable rate IDRB, the Company entered into an interest rate swap agreement through April 2013, which was initially designated as a cash flow hedging instrument. Under this agreement, the Company paid a fixed rate of 4.89% to the counterparty and received 76% of the 30-day commercial paper rate (0.10% at June 30, 2012). During 2010, the Company determined this interest rate swap was no longer highly effective. As a result, the Company discontinued the use of hedge accounting effective January 1, 2010 related to this swap, and began recording mark-to-market adjustments within interest expense in the Company's Consolidated Statements of Income. The pre-tax loss previously recognized in Accumulated Other Comprehensive Income (Loss), totaling \$200,000 as of December 31, 2009, is being amortized as an increase to interest expense of \$5,000 per month, or \$3,000 net of tax, over the remaining term of the interest rate swap agreement. The fair value of the swap was a liability of \$25,000 and \$52,000 as of June 30, 2012 and December 31, 2011, respectively. The Company recorded interest income of \$27,000 for a mark-to-market adjustment of swap fair value for the first six months of 2012 related to this swap. The notional

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

amount of the swap at June 30, 2012 and December 31, 2011 was \$825,000 and \$1,210,000, respectively. Effective December 18, 2008, the Company entered into an interest rate swap agreement that became effective May 1, 2009 and continues through May 2016, which was designated as a cash flow hedge of the \$12,000,000 Capex loan. Under this agreement, the Company pays a fixed rate of 2.295% to the counterparty and receives LIBOR (0.24% at June 30, 2012). Effective March 31,

Table of Contents

2009, the interest terms in the Company's Credit Agreement related to the \$12,000,000 Capex loan were amended. The Company then determined that this interest rate swap was no longer highly effective. As a result, the Company discontinued the use of hedge accounting effective March 31, 2009 related to this swap, and began recording mark-to-market adjustments within interest expense in the Company's Consolidated Statements of Income. The pre-tax loss previously recognized in Accumulated Other Comprehensive Income (Loss), totaling \$146,000 as of March 31, 2009, is being amortized as an increase to interest expense of \$2,000 per month, or \$1,000 net of tax, over the remaining term of the interest rate swap agreement. The fair value of the swap as of June 30, 2012 and December 31, 2011 was a liability of \$251,000 and \$279,000, respectively. The Company recorded interest income of \$28,000 for a mark-to-market adjustment of swap fair value for the first six months of 2012 related to this swap. The notional amount of the swap at June 30, 2012 and December 31, 2011 was \$6,714,000 and \$7,571,000, respectively. Interest expense includes \$43,000 and \$61,000 of expense for settlements related to the Company's swaps for the three months ended June 30, 2012 and 2011, respectively. For the six months ended June 30, 2012 and 2011, interest expense includes \$93,000 and \$127,000, respectively, of expense for settlements related to the Company's swaps.

## 7. Income Taxes

The Company's consolidated balance sheets at June 30, 2012 and December 31, 2011 include a net deferred tax asset of \$2,938,000 and \$2,888,000, respectively. The Company performs analyses to evaluate the balance of deferred tax assets that will be realized. Such analyses are based on the premise that the Company is, and will continue to be, a going concern and that it is more likely than not that deferred tax benefits will be realized through the generation of future taxable income.

Income tax expense for the six months ended June 30, 2012 is estimated to be \$2,356,000, or 32% of income before income taxes. Income tax expense for the six months ended June 30, 2011 was estimated to be \$2,662,000, or 34% of income before income taxes.

As of June 30, 2012, the Company had no liability for unrecognized tax benefits. The Company does not anticipate that the unrecognized tax benefits will significantly change within the next twelve months.

The Company files income tax returns in the U.S. federal jurisdiction, Mexico and various state jurisdictions. The Company is no longer subject to U.S. federal and state income tax examinations by tax authorities for the years before 2009, and no longer subject to Mexican income tax examinations by Mexican authorities for the years before 2007.

## 8. Share Based Compensation

The Company has a Long Term Equity Incentive Plan (the "2006 Plan"), as approved by the Company's stockholders in May 2006. This 2006 Plan replaced the Long Term Equity Incentive Plan (the "Original Plan") as originally approved by the stockholders in May 1997 and as amended in May 2000. The 2006 Plan allows for grants to directors and employees of non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock, performance shares, performance units and other incentive awards ("Stock Awards") up to an aggregate of 3,000,000 awards, each representing a right to buy a share of Core Molding Technologies common stock. Stock Awards can be granted under the 2006 Plan through the earlier of December 31, 2015, or the date the maximum number of available awards under the 2006 Plan have been granted.

### Stock Options

The following summarizes the activity relating to stock options under the plans mentioned above for the six months ended June 30, 2012:

	Number of Options	Weighted Average Exercise Price
Outstanding at December 31, 2011	400,650	\$3.35
Exercised	(25,775)	) 3.14
Granted	—	—
Forfeited	—	—
Outstanding at June 30, 2012	374,875	\$3.37

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Exercisable at June 30, 2012

354,775

\$3.40

12

---

Table of Contents

The following summarizes the status of, and changes to, unvested options during the six months ended June 30, 2012:

	Number of Options	Weighted Average Exercise Price
Unvested at December 31, 2011	20,100	\$2.75
Granted	—	—
Vested	—	—
Forfeited	—	—
Unvested at June 30, 2012	20,100	\$2.75

At June 30, 2012 and 2011, there was \$14,000 and \$20,000, respectively, of total unrecognized compensation expense related to unvested stock options granted under the plan. That cost is expected to be recognized over the weighted-average period of 1.5 years. Total compensation cost related to incentive stock options was \$3,000 for the six months ended June 30, 2012 and 2011, all of which is included in selling, general and administrative expenses.

**Restricted Stock**

In 2006, the Company began granting shares of its common stock to certain directors, officers, and key managers in the form of unvested stock ("Restricted Stock"). These awards are recorded at the market value of Core Molding Technologies' common stock on the date of issuance and amortized ratably as compensation expense over the applicable vesting period.

The following summarizes the status of Restricted Stock grants as of June 30, 2012 and changes during the six months ended June 30, 2012:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2011	173,556	\$5.21
Granted	59,070	7.93
Vested	(34,683)	) 5.03
Forfeited	—	—
Unvested balance June 30, 2012	197,943	\$6.05

At June 30, 2012 and 2011, there was \$751,000 and \$724,000, respectively, of total unrecognized compensation expense related to Restricted Stock granted under the 2006 Plan. That cost is expected to be recognized over the weighted-average period of 1.7 years. Total compensation cost related to restricted stock grants for the six months ended June 30, 2012 and 2011 was \$217,000 and \$190,000, respectively, all of which was recorded to selling, general and administrative expense.

During the six months ended June 30, 2012 and 2011, employees surrendered 11,624 and 6,404 shares, respectively, of the Company's common stock to satisfy income tax withholding obligations in connection with the vesting of restricted stock.

**9. Fair Value of Financial Instruments**

The Company's financial instruments consist of long-term debt, interest rate swaps, accounts receivable, and accounts payable. The carrying amount of these financial instruments approximated their fair value.

To increase consistency and comparability in fair value measurements, this standard establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy disclosed is based on the lowest level of input that is significant to the fair value measurement. Level 2 inputs are inputs, other than quoted prices in active markets for identical asset or liabilities, that are observable for the asset or liability, either directly or indirectly through corroboration with observable market data.

The Company has two Level 2 fair value measurements all of which relate to the Company's interest rate swaps. The Company utilizes interest rate swap contracts to manage its targeted mix of fixed and floating rate debt, and these swaps are valued using observable benchmark rates at commonly quoted intervals for the full term of the swaps

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

(market approach). These interest rate swaps are discussed in detail in Note 6.

Table of Contents

The following table presents financial liabilities measured and recorded at fair value on the Company's Consolidated Balance Sheets on a recurring basis and their level within the fair value hierarchy as of June 30, 2012 and December 31, 2011:

	(Level 2)	Total Liabilities as of June 30, 2012
Interest rate swap liabilities	\$276,000	\$276,000
	(Level 2)	Total Liabilities as of December 31, 2011
Interest rate swap liabilities	\$331,000	\$331,000

There were no non-recurring fair value measurements for the six months ended June 30, 2012.

Core Molding Technologies' derivative instruments included on the Consolidated Balance Sheets were as follows:

	Balance Sheet Location	June 30, 2012 Fair Value	December 31, 2011 Fair Value
Derivatives not designated as hedging instruments			
Interest rate risk activities	Interest rate swaps	\$276,000	\$331,000

The effect of derivative instruments on the Consolidated Statements of Income was as follows:

Derivatives Not Designated as Hedging Instruments	Location of Gain (Loss) Recognized in Income on Derivative	Amount of Realized/Unrealized Gain (Loss) Recognized in Income on Derivatives	June 30, 2012	June 30, 2011	)
Three months ended					
Interest rate swaps	Interest expense	\$2,000	\$2,000	\$65,000	)
Six months ended					
Interest rate swaps	Interest expense	\$14,000	\$14,000	\$1,000	)

As discussed in Note 6, the Company discontinued the use of hedge accounting for its two interest rate swaps, effective March 31, 2009 for the Capex swap and January 1, 2010 for the IDRIB swap. The Company now records all mark-to-market adjustments related to these interest rate swaps within interest expense in the Company's Consolidated Statements of Income, since the date the Company discontinued hedge accounting for each swap. It is anticipated that during the next twelve months the expiration and settlement of cash flow hedge contracts along with the amortization of losses on discontinued hedges will result in income statement recognition of amounts currently classified in accumulated other comprehensive loss of approximately \$67,000, or \$44,000 net of taxes.

Table of Contents

10. Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update 2011-04, Fair Value Measurement (Topic 820) — Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04). ASU 2011-04 represents the converged guidance of the FASB and the International Accounting Standards Board on fair value measurement. The guidance clarifies certain existing requirements and changes certain principles to achieve convergence between U.S. GAAP and IFRS. ASU 2011-04 also expands the disclosures for fair value measurements. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In June 2011, the FASB issued Accounting Standards Update 2011-05, Presentation of Comprehensive Income (ASU 2011-05). ASU 2011-05 amends guidance on the presentation of comprehensive income to require entities to report components of comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. In December 2011, the FASB issued an update to this guidance, Accounting Standards Update 2011-12, Comprehensive Income (Topic 220) — Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 (ASU 2011-12), which defers the effective date for the presentation of reclassification of items out of accumulated other comprehensive income to some future period. Except for the presentation of reclassification adjustments, the provisions of this guidance are effective for interim and annual periods beginning after December 15, 2011. This accounting standards update impacted our disclosures only, and did not have any impact on our financial condition, results of operations or liquidity. The disclosures required by this accounting standards update are presented in the Consolidated Statements of Comprehensive Income.

In September 2011, the FASB issued Accounting Standards Update 2011-08, Intangibles — Goodwill and Other (Topic 350) — Testing Goodwill for Impairment (ASU 2011-08). ASU 2011-08 amends guidance on the testing of goodwill for impairment to reduce complexity and costs by allowing an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

Part I — Financial Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements within the meaning of the federal securities laws. As a general matter, forward-looking statements are those focused upon future plans, objectives or performance as opposed to historical items and include statements of anticipated events or trends and expectations and beliefs relating to matters not historical in nature. Such forward-looking statements involve known and unknown risks and are subject to uncertainties and factors relating to Core Molding Technologies' operations and business environment, all of which are difficult to predict and many of which are beyond Core Molding Technologies' control. These uncertainties and factors could cause Core Molding Technologies' actual results to differ materially from those matters expressed in or implied by such forward-looking statements.

Core Molding Technologies believes that the following factors, among others, could affect its future performance and cause actual results to differ materially from those expressed or implied by forward-looking statements made in this report: business conditions in the plastics, transportation, marine and commercial product industries; federal and state regulations (including engine emission regulations); general economic, social and political environments in the countries in which Core Molding Technologies operates; safety and security conditions in Mexico; dependence upon two major customers as the primary source of Core Molding Technologies' sales revenues; efforts of Core Molding Technologies to expand its customer base; the actions of competitors, customers, and suppliers; failure of Core Molding Technologies' suppliers to perform their obligations; the availability of raw materials; inflationary pressures; new technologies; regulatory matters; labor relations; the loss or inability of Core Molding Technologies to attract and retain key personnel; federal, state and local environmental laws and regulations; the availability of capital; the ability of Core Molding Technologies to provide on-time delivery to customers, which may require additional shipping expenses to ensure on-time delivery or otherwise result in late fees; risk of cancellation or rescheduling of orders; management's decision to pursue new products or businesses which involve additional costs, risks or capital expenditures; and other risks identified from time-to-time in Core Molding Technologies' other public documents on file with the Securities and Exchange Commission, including those described in Item 1A of the 2011 Annual Report to Shareholders on Form 10-K.

Description of the Company

Core Molding Technologies is a manufacturer of sheet molding compound ("SMC") and molder of fiberglass reinforced plastics. The Company specializes in large-format moldings and offers a wide range of fiberglass processes, including compression molding of SMC, glass mat thermoplastics ("GMT") and bulk molding compounds ("BMC"); spray-up, hand-lay-up, and resin transfer molding ("RTM"). Additionally, the Company offers reaction injection molding ("RIM"), utilizing dicyclopentadiene technology. Core Molding Technologies serves a wide variety of markets, including medium and heavy-duty truck, marine, automotive, and other commercial products. Product sales to heavy and medium-duty truck markets accounted for 86% and 91% of the Company's sales for the six months ended June 30, 2012 and 2011, respectively. The demand for Core Molding Technologies' products is affected by economic conditions in the United States, Canada, and Mexico. Core Molding Technologies' manufacturing operations have a significant fixed cost component. Accordingly, during periods of changing demand, the profitability of Core Molding Technologies' operations may change proportionately more than revenues from operations.

In 1996, Core Molding Technologies acquired substantially all of the assets and assumed certain liabilities of Columbus Plastics, a wholly owned operating unit of Navistar's truck manufacturing division since its formation in late 1980. Columbus Plastics, located in Columbus, Ohio, was a compounding and compression molder of SMC. In 1998,

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Core Molding Technologies began operations at its second facility in Gaffney, South Carolina, and in 2001, Core Molding Technologies acquired certain assets of Airshield Corporation. As a result of this acquisition, Core Molding Technologies expanded its fiberglass molding capabilities to include the spray up, hand-lay-up open mold processes and RTM closed molding. In 2004, Core Molding Technologies acquired substantially all the operating assets of Keystone Restyling Products, Inc., a privately held manufacturer and distributor of fiberglass reinforced products for the automotive-aftermarket industry. In 2005, Core Molding Technologies acquired certain assets of the Cincinnati Fiberglass Division of Diversified Glass, Inc., a Batavia, Ohio-based, privately held manufacturer and distributor of fiberglass reinforced plastic components supplied primarily to the heavy-duty truck market. In 2009, the Company completed construction of a production facility in Matamoros, Mexico that replaced its leased facility. In July 2011, the Company formed Core Specialty Composites and leased a facility in Warsaw, Kentucky for the purpose of adding additional manufacturing capabilities to produce parts for customers outside of the Company's traditional markets.

## Table of Contents

### Overview

For the six months ended June 30, 2012 the Company recorded net income of \$4,976,000, or \$0.70 per basic and \$0.67 per diluted share, compared with net income of \$5,111,000, or \$0.74 per basic and \$0.70 per diluted share, for the six months ended June 30, 2011. Product sales increased 37% as compared to the same period in 2011, which is primarily the result of increased demand from North American heavy and medium-duty truck customers, as well as new business awards.

Industry analysts and several of our customers are forecasting a slowdown in truck production rates for the second half of 2012. Considering these forecasts, the Company anticipates lower product sales during the second half of 2012 as compared to the same period in 2011. However, the Company remains encouraged by recent truck industry analysts' forecasts for 2013, which project production levels to be above the levels estimated for 2012. The Company also anticipates the favorable impact of new product launches scheduled for start in the third and fourth quarters of this year.

The Company previously reported that it anticipated limited production at its Warsaw, Kentucky facility in 2012. Due to changes in market conditions and business plans, the customer served by this operation has informed the Company that it does not intend to continue purchasing products produced at the Company's Warsaw facility beyond the most recent shipment in June 2012. Accordingly, the Company has idled all operations at its Warsaw facility. Through June 30, 2012 the Company recorded product sales of \$355,000 and approximately \$1,500,000 in pre-tax start-up losses related to this operation. Based upon the terms of the supply agreement and recent discussions with the Warsaw customer, the Company does not anticipate incurring any future expenses or asset impairment associated with this operation or the idling and likely closure of this facility.

### Results of Operations

#### Three Months Ended June 30, 2012, as Compared to Three Months Ended June 30, 2011

Net sales for the three months ended June 30, 2012 totaled \$44,544,000, representing an approximate 26% increase from the \$35,294,000 reported for the three months ended June 30, 2011. Included in total sales were tooling project sales of \$3,335,000 and \$1,747,000 for the three months ended June 30, 2012 and 2011, respectively. Tooling project sales result from billings to customers primarily for molds and assembly equipment specific to their products as well as other non-production billings. These sales are sporadic in nature and fluctuate in regard to scope and related revenue on a period-to-period basis. Total product sales, excluding tooling project sales, were approximately 23% higher for the three months ended June 30, 2012, as compared to the same period a year ago. The primary reasons for the increase were higher demand from North American heavy and medium-duty truck customers as well as increased sales from new business awards.

Sales to Navistar totaled \$16,018,000 for the three months ended June 30, 2012, increasing 3% from \$15,567,000 in sales for the three months ended June 30, 2011. Included in total sales was \$963,000 of tooling sales for the three months ended June 30, 2012 compared to \$828,000 for the same three months in 2011. Product sales to Navistar increased 2% for the three months ended June 30, 2012 as compared to the same period in the prior year.

Sales to PACCAR totaled \$15,278,000 for the three months ended June 30, 2012, increasing 21% from \$12,669,000 in sales for the three months ended June 30, 2011. Included in total sales was \$196,000 of tooling sales for the three months ended June 30, 2012 compared to \$223,000 for the same three months in 2011. Product sales to PACCAR increased by 21% for the three months ended June 30, 2012 as compared to the same period in the prior year. The primary reasons for the increase in product sales is higher demand for North American heavy and medium-duty trucks as noted above, further increased demand for certain truck models for which the Company provides content and new product launches.

Sales to other customers for the three months ended June 30, 2012 increased 88% to \$13,248,000 compared to \$7,058,000 for the three months ended June 30, 2011. Included in total sales was \$2,176,000 of tooling sales for the three months ended June 30, 2012 compared to \$696,000 for the same three months in 2011. Product sales to other

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

customers increased \$6,190,000 or 74% for the three months ended June 30, 2012 as compared to the same period in the prior year, with \$3,944,000 of the increase resulting from increased product sales to customers in the marine industry. The remaining increase was primarily due to increased demand for the Company's products from other heavy and medium-duty truck customers.

Gross margin was approximately 16% of sales for the three months ended June 30, 2012, compared with 22% for the three months ended June 30, 2011. The primary reason for the decrease in gross margin as a percent of sales was a change in the Company's product mix to products with lower margins. This change in mix negatively impacted gross margin as a percent of sales by approximately 3%. Start-up costs and production inefficiencies incurred at the Company's new production facility in Warsaw, Kentucky reduced gross margin as a percent of sales by approximately 1%. As discussed above, the Company has now idled all operations at this facility. Production inefficiencies at the Company's other facilities unfavorably impacted gross margin as a percent of sales by approximately 1%. These inefficiencies were primarily related to higher than expected use of production labor.

Table of Contents

Higher raw material prices negatively impacted gross margin as a percent of sales by approximately 1%. Selling, general and administrative expense (“SG&A”) was \$3,587,000 for the three months ended June 30, 2012, compared to \$3,177,000 for the three months ended June 30, 2011. The primary reasons for the increase were higher consulting and outside service costs of \$171,000, increased travel costs of \$85,000 and foreign currency losses of \$59,000.

Interest expense totaled \$16,000 for the three months ended June 30, 2012, compared to interest expense of \$267,000 for the three months ended June 30, 2011. The Company recorded capitalized interest of \$122,000 associated with the facility expansion in Mexico for the three months ended June 20, 2012 and recorded no capitalized interest for the same period of 2011. Reductions in interest rates and reductions in outstanding loan balances due to regularly scheduled principal payments also contributed to the decrease in interest expense.

Income tax expense for the three months ended June 30, 2012 and 2011 was approximately 32% and 34% of total income before income taxes, respectively. Income tax expense decreased as a percent of income before income taxes primarily due to a lower Mexican effective income tax rate for the three months ended June 30, 2012, as compared to the same period in 2011.

The Company recorded net income for the three months ended June 30, 2012 of \$2,341,000, or \$0.33 per basic and \$0.32 per diluted share, compared with net income of \$2,842,000, or \$0.41 per basic and \$0.39 per diluted share, for the three months ended June 30, 2011.

#### Six Months Ended June 30, 2012, as Compared to Six Months Ended June 30, 2011

Net sales for the six months ended June 30, 2012 totaled \$89,073,000, representing an approximate 39% increase from the \$64,283,000 reported for the six months ended June 30, 2011. Included in total sales were tooling project sales of \$3,533,000 and \$1,762,000 for the six months ended June 30, 2012 and 2011, respectively. Tooling project sales result from billings to customers primarily for molds and assembly equipment specific to their products as well as other non-production billings. These sales are sporadic in nature and fluctuate in regard to scope and related revenue on a period-to-period basis. Total product sales, excluding tooling project sales, were approximately 37% higher for the six months ended June 30, 2012, as compared to the same period a year ago. The primary reasons for the increase were higher demand from North American heavy and medium-duty truck customers as well as increased sales from new business awards.

Sales to Navistar totaled \$32,892,000 for the six months ended June 30, 2012, increasing 12% from \$29,339,000 in sales for the six months ended June 30, 2011. Included in total sales was \$1,038,000 of tooling sales for the six months ended June 30, 2012 compared to \$828,000 for the same six months in 2011. Product sales to Navistar increased by 12% for the six months ended June 30, 2012 as compared to the same period in the prior year. The primary reasons for the increase in product sales are higher demand for North American heavy and medium-duty trucks and new product launches.

Sales to PACCAR totaled \$31,811,000 for the six months ended June 30, 2012, increasing 47% from \$21,697,000 in sales for the six months ended June 30, 2011. Included in total sales was \$290,000 of tooling sales for the six months ended June 30, 2012 compared to \$223,000 for the same six months in 2011. Product sales to PACCAR increased by 47% for the six months ended June 30, 2012 as compared to the same period in the prior year. The primary reasons for the increase in product sales is higher demand for North American heavy and medium-duty trucks as noted above, further increased demand for certain truck models for which the Company provides content and new product launches. Sales to other customers for the six months ended June 30, 2012 increased 84% to \$24,370,000 compared to \$13,247,000 for the six months ended June 30, 2011. Included in total sales was \$2,205,000 of tooling sales for the six months ended June 30, 2012 compared to \$711,000 for the same six months in 2011. Product sales to other customers increased \$11,123,000 or 77% for the six months ended June 30, 2012 as compared to the same period in the prior year, with \$7,269,000 of the increase resulting from increased product sales to customers in the marine industry. The remaining increase was primarily due to increased demand for the Company’s products from other heavy and medium-duty truck customers.

Gross margin was approximately 16% of sales for the six months ended June 30, 2012, compared with 22% for the six months ended June 30, 2011. A change in the Company’s product mix to products with lower margins negatively impacted gross margin as a percent of sales by approximately 2%. Start-up costs and production inefficiencies

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

incurred at the Company's new production facility in Warsaw, Kentucky reduced gross margin as a percent of sales by approximately 2%. As discussed above, the Company has now idled all operations at this facility. Production inefficiencies at the Company's other facilities unfavorably impacted gross margin as a percent of sales by approximately 1%. These inefficiencies were primarily related to higher than expected use of production labor. Higher raw material prices also negatively impacted gross margin as a percent of sales by approximately 1%.

Table of Contents

Selling, general and administrative expense (“SG&A”) was \$7,200,000 for the six months ended June 30, 2012, compared to \$6,100,000 for the six months ended June 30, 2011. The primary reasons for the increase were higher consulting and outside service costs of \$381,000, increased labor and benefit costs of \$310,000 and increased travel costs of \$169,000.

Interest expense totaled \$125,000 for the six months ended June 30, 2012, compared to interest expense of \$449,000 for the six months ended June 30, 2011. The Company recorded capitalized interest of \$139,000 associated with the facility expansion in Mexico for the six months ended June 20, 2012 and recorded no capitalized interest for the same period of 2011. Reductions in interest rates and reductions in outstanding loan balances due to regularly scheduled principal payments also contributed to the decrease in interest expense.

Income tax expense for the six months ended June 30, 2012 was approximately 32% of income before income taxes. Income tax expense for the six months ended June 30, 2011 was approximately 34% of income before income taxes. Income tax expense decreased as a percent of income before income taxes primarily due to a lower Mexican effective income tax rate for the six months ended June 30, 2012, as compared to the same period in 2011.

The Company recorded net income for the six months ended June 30, 2012 of \$4,976,000 or \$0.70 per basic and \$0.67 per diluted share, compared with net income of \$5,111,000, or \$0.74 per basic and \$0.70 per diluted share, for the six months ended June 30, 2011.

#### Liquidity and Capital Resources

The Company’s primary sources of funds have been cash generated from operating activities and borrowings from third parties. Primary cash requirements are for operating expenses, increases in working capital and capital expenditures.

Cash provided by operating activities for the six months ended June 30, 2012 totaled \$1,287,000. Net income of \$4,976,000 positively impacted operating cash flows. Non-cash expenses of depreciation and amortization contributed \$2,404,000 to operating cash flow. Changes in working capital decreased cash provided by operating activities by \$5,822,000. Changes in working capital primarily relate to an increase in accounts receivable due to increased product sales as well as higher inventory levels to support the increase in sales, and decreases in accrued liabilities, which included amounts accrued for profit sharing at December 31, 2011 that were paid during the six months ended June 30, 2012. These were partially offset by increased accounts payable at June 30, 2012 as compared to December 31, 2011.

Cash used in investing activities for the six months ended June 30, 2012 was \$5,301,000, which primarily represents building expansion and improvements at the Company’s Matamoros, Mexico facility. As previously disclosed, the Company will require additional capacity at its Matamoros, Mexico facility, which will support increased production volumes as well as new programs for customers expected to launch later this year. The Company plans to invest approximately \$14,500,000 for this capacity expansion, of which approximately \$10,700,000 had been spent as of June 30, 2012. In total, Core Molding Technologies anticipates spending approximately \$4,500,000 during the remainder of 2012 on property, plant and equipment purchases for all of the Company’s operations.

Cash used in financing activities for the six months ended June 30, 2012 totaled \$620,000, which was primarily a result of scheduled repayments of principal on the Company’s outstanding loans.

At June 30, 2012, the Company had no cash on hand, a revolving line of credit of up to \$8,000,000 and a Mexican expansion revolving loan of \$10,000,000. At June 30, 2012, Core Molding Technologies had outstanding borrowings on the revolving line of credit of \$2,233,000, and no outstanding borrowings on the Mexican expansion revolving loan. On July 9, 2012, the Company and its wholly owned subsidiary, CoreComposites de Mexico, S. de R.L. de C.V., entered into a seventh amendment (the "Seventh Amendment") to the Credit Agreement. Pursuant to the terms of the

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Seventh Amendment, the parties agreed to extend the commitment for the revolving line of credit to May 31, 2014. The Mexican expansion revolving loan is scheduled to mature on May 31, 2013.

The Company is required to meet certain financial covenants included in the Credit Agreement with respect to leverage ratios, fixed charge ratios, capital expenditures as well as other customary affirmative and negative covenants. As of June 30, 2012, the Company was in compliance with its financial covenants.

Management regularly evaluates the Company's ability to effectively meet its debt covenants based on the Company's forecasts. Based on the Company's forecasts which are primarily based on industry analysts' estimates of heavy and medium-duty truck production volumes, as well as other assumptions, management believes that the Company will be able to maintain compliance with its financial covenants for the next 12 months. Management believes that cash flow from operating activities and available

Table of Contents

borrowings under the Credit Agreement will be sufficient to meet the Company's liquidity needs. If a material adverse change in the financial position of Core Molding Technologies should occur, or if actual sales or expenses are substantially different than what has been forecasted, Core Molding Technologies' liquidity and ability to obtain further financing to fund future operating and capital requirements could be negatively impacted.

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update 2011-04, Fair Value Measurement (Topic 820) — Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04). ASU 2011-04 represents the converged guidance of the FASB and the International Accounting Standards Board on fair value measurement. The guidance clarifies certain existing requirements and changes certain principles to achieve convergence between U.S. GAAP and IFRS. ASU 2011-04 also expands the disclosures for fair value measurements. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In June 2011, the FASB issued Accounting Standards Update 2011-05, Presentation of Comprehensive Income (ASU 2011-05). ASU 2011-05 amends guidance on the presentation of comprehensive income to require entities to report components of comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements. In addition, an entity is required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. In December 2011, the FASB issued an update to this guidance, Accounting Standards Update 2011-12, Comprehensive Income (Topic 220) — Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 (ASU 2011-12), which defers the effective date for the presentation of reclassification of items out of accumulated other comprehensive income to some future period. Except for the presentation of reclassification adjustments, the provisions of this guidance are effective for interim and annual periods beginning after December 15, 2011. This accounting standards update impacted our disclosures only, and did not have any impact on our financial condition, results of operations or liquidity. The disclosures required by this accounting standards update are presented in the Consolidated Statements of Comprehensive Income.

In September 2011, the FASB issued Accounting Standards Update 2011-08, Intangibles — Goodwill and Other (Topic 350) — Testing Goodwill for Impairment (ASU 2011-08). ASU 2011-08 amends guidance on the testing of goodwill for impairment to reduce complexity and costs by allowing an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

Table of Contents

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations discuss the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to accounts receivable, inventories, self-insurance, post retirement benefits, and income taxes. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

**Accounts receivable allowances:** Management maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. The Company recorded an allowance for doubtful accounts of \$307,000 and \$236,000 at June 30, 2012 at December 31, 2011, respectively. Management also records estimates for customer returns and deductions, discounts offered to customers, and for price adjustments. Should customer returns and deductions, discounts, and price adjustments fluctuate from the estimated amounts, additional allowances may be required. The Company has reduced accounts receivable for chargebacks by \$1,724,000 at June 30, 2012 and \$1,283,000 at December 31, 2011.

**Inventories:** Inventories, which include material, labor and manufacturing overhead, are valued at the lower of cost or market. The inventories are accounted for using the first-in, first-out (FIFO) method of determining inventory costs. Inventory quantities on-hand are regularly reviewed, and where necessary, provisions for excess and obsolete inventory are recorded based on historical and anticipated usage. The Company has recorded an allowance for slow moving and obsolete inventory of \$866,000 at June 30, 2012 and \$862,000 at December 31, 2011.

**Long-Lived Assets:** Long-lived assets consist primarily of property, plant and equipment. The recoverability of long-lived assets is evaluated by an analysis of operating results and consideration of other significant events or changes in the business environment. The Company evaluates whether impairment exists for property, plant and equipment on the basis of undiscounted expected future cash flows from operations before interest. There was no impairment of the Company's long-lived assets for the six months ended June 30, 2012 or June 30, 2011.

**Goodwill:** Core Molding Technologies acquired certain assets of Airshield Corporation in 2001, and as a result, recorded goodwill related to its Matamoros, Mexico operations in the amount of \$1,097,000. The Company evaluates goodwill annually on December 31st to determine whether impairment exists, or at interim periods if an indicator of possible impairment exists. The Company evaluates goodwill for impairment using fair value measurements based on a projected discounted cash flow valuation model, in accordance with ASC 350, "Intangibles-Goodwill and Other." If impairment exists, the carrying amount of the goodwill is reduced to its estimated fair value. There was no impairment of the Company's goodwill for the six months ended June 30, 2012 or June 30, 2011.

**Self-Insurance:** The Company is self-insured with respect to most of its Columbus and Batavia, Ohio, Warsaw, Kentucky, and Gaffney, South Carolina medical and dental claims and Columbus and Batavia, Ohio workers' compensation claims, all of which are subject to stop-loss insurance thresholds. The Company has recorded an estimated liability for self-insured medical and dental claims incurred but not reported and worker's compensation claims incurred but not reported at June 30, 2012 and December 31, 2011 of \$1,007,000 and \$1,045,000, respectively.

**Post retirement benefits:** Management records an accrual for post retirement costs associated with the health care plan sponsored by Core Molding Technologies. Should actual results differ from the assumptions used to determine the reserves, additional provisions may be required. In particular, increases in future healthcare costs above the assumptions could have an adverse effect on Core Molding Technologies' operations. The effect of a change in healthcare costs is described in Note 11 of the Notes to Consolidated Financial Statements, which are contained in the

Edgar Filing: CORE MOLDING TECHNOLOGIES INC - Form 10-Q

Company's 2011 Annual Report to Shareholders on Form 10-K. Core Molding Technologies had a liability for post retirement healthcare benefits based on actuarially computed estimates of \$9,259,000 at June 30, 2012 and \$9,582,000 at December 31, 2011.

21

Table of Contents

**Revenue Recognition:** Revenue from product sales is recognized at the time products are shipped and title transfers. Allowances for returned products and other credits are estimated and recorded as revenue is recognized. Tooling revenue is recognized when the customer approves the tool and accepts ownership. Progress billings and expenses are shown net as an asset or liability on the Company's Consolidated Balance Sheet. Tooling in progress can fluctuate significantly from period to period and is dependent upon the stage of tooling projects and the related billing and expense payment timetable for individual projects and therefore does not necessarily reflect projected income or loss from tooling projects. At June 30, 2012 the Company had a net liability related to tooling in progress of \$1,084,000, which represents approximately \$12,462,000 of progress tooling billings and \$11,378,000 of progress tooling expenses. At December 31, 2011 the Company had a net liability related to tooling in progress of \$1,520,000, which represents approximately \$8,270,000 of progress tooling billings and \$6,750,000 of progress tooling expenses.

**Income taxes:** The Consolidated Balance Sheets at June 30, 2012 and December 31, 2011, include a deferred tax asset of \$2,938,000 and \$2,888,000, respectively. The Company performs analyses to evaluate the balance of deferred tax assets that will be realized. Such analyses are based on the premise that the Company is, and will continue to be, a going concern and that it is more likely than not that deferred tax benefits will be realized through the generation of future taxable income. For more information, refer to Note 10 of the Notes to Consolidated Financial Statements, which are contained in the Company's 2011 Annual Report to Shareholders on Form 10-K.

Table of Contents

Part I — Financial Information

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Core Molding Technologies' primary market risk results from changes in the price of commodities used in its manufacturing operations. Core Molding Technologies is also exposed to fluctuations in interest rates and foreign currency fluctuations associated with the Mexican Peso. Core Molding Technologies does not hold any material market risk sensitive instruments for trading purposes.

Core Molding Technologies has the following five items that are sensitive to market risks: (1) Industrial Development Revenue Bond ("IDRB") with a variable interest rate (although the Company has an interest rate swap to fix the interest rate at 4.89%); (2) Revolving Line of Credit, Mexican Expansion Revolving Loan and Mexican Loan payable under the Credit Agreement, each of which bears a variable interest rate; (3) Capex Loan payable with a variable interest rate (although the Company has an interest rate swap to fix the variable portion of the applicable interest rate at 2.3%); (4) foreign currency purchases in which the Company purchases Mexican pesos with United States dollars to meet certain obligations that arise due to operations at the facility located in Mexico; and (5) raw material purchases in which Core Molding Technologies purchases various resins and fiberglass for use in production. The prices and availability of these materials are affected by the prices of crude oil and natural gas as well as processing capacity versus demand. Assuming a hypothetical 10% increase in commodity prices, Core Molding Technologies would be impacted by an increase in raw material costs, which would have an adverse effect on operating margins.

Assuming a hypothetical 10% change in short-term interest rates, interest paid on the Company's Line of Credit, Mexican Expansion Revolving Loan and the Mexican Loan would have been impacted, as the interest rate on these loans is based upon LIBOR, however, it would not have a material effect on earnings before tax.

A 10% change in future interest rate curves would impact the fair value of the Company's interest rate swaps.

Part I — Financial Information

Item 4. Controls and Procedures

As of the end of the period covered by this report, the Company has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act). Based upon this evaluation, the Company's management, including its Chief Executive Officer and its Chief Financial Officer, concluded that the Company's disclosure controls and procedures were (i) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act was accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure, and (ii) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There were no changes in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred in the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
