Item 2.02. Results of Operations and Financial Condition

Explanatory note: Pioneer Natural Resources Company and its subsidiaries ("Pioneer" or the "Company") presents in this Item 2.02 certain information regarding the impact of changes in the fair values of its derivative instruments on the results of operations for certain prior periods and certain other information regarding its accounting for derivative instruments. It is the Company's current expectation that it will provide similar disclosure following the end of each fiscal quarter going forward.

Prior to February 1, 2009, the Company entered into and designated certain commodity and interest rate derivative instruments as cash flow hedges of commodity price risk and interest rate risk in accordance with generally accepted accounting principles in the United States ("GAAP"). Effective February 1, 2009, the Company discontinued hedge accounting on all of its existing derivative instruments, and since that date forward has accounted for derivative instruments using the mark-to-market ("MTM") accounting method.

On January 31, 2009, the Company determined the fair value of its derivative hedge instruments and increased the effective portion of its net hedge gains recorded in accumulated other comprehensive income – deferred hedge gains, net of tax ("AOCI"), in the equity portion of its consolidated balance sheet, to \$99.3 million. In accordance with GAAP, the Company transfers the net hedge gains included in AOCI to oil, natural gas liquids ("NGL") and gas revenues and interest expense in the same periods in which the transactions that they hedged are recognized in earnings. During the three and nine months ended September 30, 2009, the Company transferred \$26.3 million and \$96.2 million, respectively, of net gains from AOCI to oil, NGL and gas revenues and \$1.6 million and \$5.9 million, respectively, of losses from AOCI to interest expense.

Under the mark-to-market accounting method, the Company has accounted for all changes in the fair values of its derivative instruments since February 1, 2009 as gains or losses in the earnings of the periods in which they occurred. The following table summarizes MTM derivative losses, net that Pioneer expects to record in its earnings for the three and nine months ended September 30, 2009:

Cautionary Statement Concerning Forward-Looking Statements

Except for historical information contained herein, the statements in Items 2.02 and 7.01 of this Current Report on Form 8-K are forward-looking statements that are made pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements and the business prospects of the Company are subject to a number of risks and uncertainties that may cause the Company's actual results in future periods to differ materially from the forward-looking statements. These risks and uncertainties include, among other things, volatility of commodity prices, product supply and demand, competition, the ability to obtain environmental and other permits and the timing thereof, other government regulation or action, the ability to obtain approvals from third parties and negotiate agreements with third parties on mutually acceptable terms, international operations and associated international political and economic instability, litigation, the costs and results of drilling and operations, access to and availability of drilling equipment and transportation, processing and refining facilities, Pioneer's ability to replace reserves, implement its business plans or complete its development activities as scheduled, access to and cost of capital, the financial strength of counterparties to Pioneer's credit facility and derivative contracts and the purchasers of Pioneer's oil, NGL and gas production, uncertainties about estimates of reserves and resource potential and the ability to add proved reserves in the future, the assumptions underlying production forecasts, quality of technical data, environmental and weather risks, and acts of war or terrorism. These and other risks are described in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and other filings with the Securities and Exchange Commission. In addition, the Company may be subject to currently unforeseen risks that may have a materially adverse impact on it. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward-looking statements. The Company undertakes no duty to publicly update these statements except as required by law.
