Certain Terms Used in This Annual Report on Form 10-K

Unless the context otherwise requires or indicates, we define certain terms in this Annual Report on Form 10-K as follows:

"We," "our company," "the Company," "the REIT," "our" and "us" refer to American Homes 4 Rent, a Maryland real estate investment trust, or REIT, and its subsidiaries taken as a whole (including our operating partnership and its subsidiaries).

"Our operating partnership" refers to American Homes 4 Rent, L.P., a Delaware limited partnership, and its subsidiaries taken as a whole.

"AH LLC" refers to American Homes 4 Rent, LLC, a Delaware limited liability company formed by B. Wayne Hughes, our founder and chairman of our board of trustees.

FORWARD-LOOKING STATEMENTS

Various statements contained in this document, including those that express a belief, expectation or intention, as well as those that are not statements of historical fact, are forward-looking statements. These forward-looking statements may include projections and estimates concerning the timing and success of specific projects and our future production, revenues, income and capital spending. Our forward-looking statements are generally accompanied by words such as "estimate," "project," "predict," "believe," "expect," "intend," "anticipate," "potential," "plan," "goal" or other words that convey the uncertainty of future events or outcomes. We have based these forward-looking statements on our current expectations and assumptions about future events. While our management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control. These and other important factors, including those discussed under "Business," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this document may cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by these forward-looking statements.

While forward-looking statements reflect our good faith beliefs, assumptions and expectations, they are not guarantees of future performance, and you should not unduly rely on them. The forward-looking statements in this document speak only as of the date of this document. We are not obligated to update or revise these statements as a result of new information, future events or otherwise, unless required by law.

Table of Contents

PART I

ITEM 1. BUSINESS

Overview

American Homes 4 Rent is an internally managed Maryland real estate investment trust, or REIT, focused on acquiring, renovating, leasing and operating single-family homes as rental properties. We commenced operations in November 2012 to continue the investment activities of AH LLC, which was founded by our chairman, B. Wayne Hughes, in 2011 to take advantage of the dislocation in the single-family home market. Mr. Hughes has over 40 years of experience in the real estate business and a successful track record as co-founder and former chairman and chief executive officer of Public Storage, a REIT listed on the New York Stock Exchange, or the NYSE. We completed our initial public offering on the NYSE in August 2013.

As of December 31, 2014, we owned 34,599 single-family properties in 22 states and had an additional 703 properties in escrow that we expect to acquire, subject to customary closing conditions, for an aggregate purchase price of approximately \$110.9 million. As of December 31, 2014, 28,250, or 81.6% of our properties were leased. We have an integrated operating platform that consists of approximately 752 personnel dedicated to property management, acquisitions, construction, marketing, leasing, financial and administrative functions.

From our formation through June 10, 2013, we were externally managed and advised by American Homes 4 Rent Advisor, LLC (the "Advisor") and the leasing, managing and advertising of our properties was overseen and directed by American Homes 4 Rent Management Holdings, LLC (the "Property Manager"), both of which were subsidiaries of AH LLC. Until December 10, 2014, our acquisition and renovation functions were performed by AH LLC, to whom we previously paid an acquisition and renovation fee. We internalized the management and advisory functions in June 2013 (the "Management Internalization") and the acquisition and renovation functions in December 2014. See "Item 2 Properties" for more detailed information about our properties and markets.

We seek to become a leader in the single-family home rental industry by aggregating a geographically diversified portfolio of high quality single-family homes and developing "American Homes 4 Rent" into a nationally recognized brand that is well-known for quality, value and tenant satisfaction and is well respected in our communities. In addition to single-family properties, we also may seek to invest in condominium units, townhouses and real estate-related debt investments. Our investments may be made directly or through investment vehicles with third-party investors. In addition to individual property purchases, we may pursue bulk acquisitions from financial institutions, government agencies and competitors. Our objective is to generate attractive, risk-adjusted returns for our shareholders through dividends and capital appreciation.

We believe that we have been organized and operate in conformity with the requirements for qualification and taxation as a REIT under U.S. federal income tax laws, for each of our taxable years commencing with our taxable year ended December 31, 2012, and we expect to satisfy the requirements for qualification and taxation as a REIT under the U.S. federal income tax laws for our taxable year ending December 31, 2015, and subsequent taxable years.

Our principal executive office is located at 30601 Agoura Road, Suite 200, Agoura Hills, California 91301. Our main telephone number is (805) 413-5300. Our website address is www.americanhomes4rent.com. The information contained on our website is not part of or incorporated by reference in this report.

Table of Contents

Our Business and Growth Strategies

Our primary objective is to generate attractive risk-adjusted returns for our shareholders through dividends and capital appreciation by acquiring, renovating, leasing and operating single-family homes as rental properties. We believe we can achieve this objective by pursuing the following strategies:

Secure early-mover advantage and position us as a dominant owner/operator of single-family rental properties. Historically, the single-family home rental market has been extremely fragmented, comprised primarily of private and individual property investors in local markets. Until recently, there have been no large-scale, national market owners/operators due primarily to the challenge of efficiently scaling the acquisition and management of many individual homes. With an opportunity to continue acquiring homes at attractive prices, we intend to continue to leverage our expertise and experience in rapidly building an institutional-quality, professionally managed business. We believe that being one of the first in our industry to do so on a large scale has provided us the "early-mover" advantage to continue aggregating a large, geographically diversified portfolio of high quality properties at prices that provide attractive potential yields and capital appreciation.

Employ a disciplined property acquisition process. We are focused on acquiring homes with a number of key property characteristics, including: (i) construction after 1990; (ii) three or more bedrooms; (iii) two or more bathrooms; (iv) a range of \$100,000 estimated minimum valuation to \$400,000 maximum bid price; and (v) estimated renovation costs not in excess of 25% of estimated value. We target areas with above average median household incomes, well-regarded school districts and access to desirable lifestyle amenities. We believe that homes in these areas will attract tenants with strong credit profiles, produce high occupancy and rental rates and generate long-term property appreciation. Not all of the homes we acquire meet all of these criteria, especially if acquired as part of a bulk purchase. We have an established acquisition and renovation platform to acquire high quality single-family homes. To date, we have primarily acquired properties at foreclosure auctions and through broker sales (primarily multiple listing service, or MLS, and short sales) and, to a lesser extent, bulk portfolio purchases. In the future, we may also source a larger proportion of our property acquisitions through portfolio (or bulk) sales from government agencies, financial institutions and competitors. In addition, we may increase our investments in non-performing loans. Historically through December 10, 2014, our acquisition and renovation activities were handled by AH LLC and we paid AH LLC a fee equal to 5% of the sum of the purchase price and initial renovation costs of each property that we acquired and AH LLC paid all expenses related to acquisition and renovation personnel, including all internal and third-party costs related to the investigation of properties not acquired by us. In December 2014, we internalized these functions and employed all of AH LLC's acquisition and renovation personnel and we no longer pay the 5% fee to AH LLC.

Assemble a geographically diversified portfolio. We will monitor and manage the diversification of our portfolio in order to reduce the risks associated with adverse developments affecting a particular market. We currently are focusing on acquiring single-family homes in selected sub-markets of metropolitan statistical areas, or MSAs, within 22 states, with an emphasis on achieving critical mass within each target market. We continually evaluate potential new markets where we may invest and establish operations as opportunities emerge. We select our markets based on steady population growth, strong rental demand and a desirable level of distressed sales of homes that can be acquired below replacement cost, providing for attractive potential yields and capital appreciation. In addition, if we are unable to gain desired critical mass within a market to operate efficiently, we may pursue ways to exit those markets in a manner designed to maximize shareholder value.

Table of Contents

Efficiently manage and operate properties. Building on the experience at Public Storage of our executive team and our significant in-house property management capabilities, we believe we have created a leading, comprehensive single-family home property management business. As was the case with the self-storage industry, we believe the key to efficiently managing a large number of relatively low-cost properties is to strike the appropriate balance between centralization and decentralization. We believe that in-house property management enables us to optimize rental revenues, effectively manage expenses, realize significant economies of scale, standardize brand consistency and maintain direct contact with our tenants. Our property management platform has local leasing agents and property managers in each of our markets. Corporate-level functions are centralized, including management, accounting, legal, marketing and call centers to handle leasing calls and maintenance calls. These centralized services allow us to provide all markets with the benefits of these functions without the burden of staffing each function in every market. In addition, by having a national property management operation, we have the ability to negotiate favorable terms on services and products with many of our contractors and vendors, including national contractors and vendors. We have completed the internalization of 100% of our property management functions, which we believe provides us with consistency of service, control and branding in the operation of our properties.

Establish a nationally recognized brand. We continue to strive toward further establishing "American Homes 4 Rent" as a nationally recognized brand because we believe that establishing a brand well-known for quality, value and tenant satisfaction will help attract and retain tenants and qualified personnel, as well as support higher rental rates. Based on our executive team's experience at Public Storage, we believe that creating brand awareness will facilitate the growth and success of our company. We have established a toll-free number serviced by our call center and a website to provide a direct portal to reach potential tenants and to drive our brand presence. We believe our brand is gaining recognition within a number of our markets.

Optimize capital structure. We may use leverage to increase potential returns to our shareholders, but we will seek to maintain a conservative and flexible balance sheet. We believe that preferred shares provide an attractive source of permanent capital. We also completed three asset-backed securitization transactions during 2014 and are currently pursuing additional financing products, including additional asset-backed securitizations. We also may participate in investment vehicles with third-party investors as an alternative source of equity to grow our business. Our executive officers have substantial experience organizing and managing investment vehicles with third-party investors.

Portfolio Acquisitions in 2014

During 2014, we completed two significant portfolio acquisitions.

Beazer Rental Homes Acquisition

On July 1, 2014, the Company completed the acquisition of Beazer Pre-Owned Rental Homes, Inc. ("Beazer Rental Homes") for the purpose of acquiring a 100% ownership interest in a portfolio of 1,372 homes located in markets in Arizona, California, Florida and Nevada (the "Beazer Rental Homes Acquisition"). The Beazer Rental Homes Acquisition was completed pursuant to an Agreement and Plan of Merger by and among American Homes 4 Rent, AMH Portfolio One, LLC, a wholly owned subsidiary of the Company ("Merger Sub"), and representatives of the Beazer shareholders, dated as of July 1, 2014 (the "Merger Agreement"). As provided in the Merger Agreement, the acquisition was completed as a tax-free merger of Beazer Rental Homes with Merger Sub. The merger consideration to the security holders of Beazer Rental Homes consisted of 8,158,001 Class A common shares in the Company, \$5.0 million of cash to be held in an indemnification escrow for a period of six months and extinguishment of \$108.2 million outstanding under the Beazer Rental Homes credit facility. The fair

Table of Contents

value of the Class A common shares issued has been estimated to be \$144.8 million, which has been determined using the closing price in the Company's Class A common shares on the date of the Beazer Rental Homes Acquisition.

Ellington Portfolio Acquisition

On December 31, 2014, the Company acquired a 100% ownership interest in a portfolio of 914 homes located in markets in Arizona, Colorado, Georgia, North Carolina, Tennessee and Texas for a total purchase price of approximately \$126.0 million, which included \$74.4 million in cash and the assumption of \$51.6 million of debt (the "Ellington Portfolio Acquisition"). The debt consists of a 5-year note payable, which is secured by a first priority mortgage on 583 of the homes, bears fixed interest at 4.06% and matures on July 1, 2019. The Company completed the Ellington Portfolio Acquisition for the purpose of acquiring a portfolio of 914 single-family properties, which was 96.3% leased as of the acquisition date.

Our Business Activities

Property Acquisition, Renovation, Leasing and Property Management

Property Acquisition. We have a disciplined acquisition platform that is capable of deploying large amounts of capital across all acquisition channels and in multiple markets simultaneously. Our acquisition process begins with an analysis of housing markets. Target markets are selected based on steady population growth, strong rental demand and a desirable level of distressed sales of newer homes that can be acquired below replacement cost, providing for attractive potential yields and potential capital appreciation. Our target markets currently include selected sub-markets of MSAs in 22 states. Within our target markets, our system allows us to screen broadly and rapidly for potential acquisitions and is designed to identify highly targeted sub-markets at the neighborhood and street levels.

We purchase properties through a variety of acquisition channels, including foreclosure auctions, broker sales and portfolio (bulk) sales, and may acquire homes following the acquisition and disposition of non-performing mortgage loans. To date, foreclosure auctions and broker sales (primarily MLS and short sales) have presented the most attractive channels to access a significant supply of quality homes at attractive prices. We have developed an efficient process for bidding on a large number of homes at auctions consistent with local and state laws, which has contributed to our significant pace of capital deployment. Properties become available at auction when a party with a lien on the property forecloses on the lien. The property is then sold at auction, either by a court or trustee, in order to satisfy the debt owed to the lien holder. Auction processes vary significantly between jurisdictions driven by differences in state and local laws. While properties acquired at foreclosure auctions have a limited time frame for due diligence, we have developed a proprietary process that rigorously focuses on the material issues that we believe will affect potential yields before determining a maximum bid amount. Significant issues considered in underwriting homes going through the trustee sale process include an evaluation of our acquisition parameters, as well as the property's location. This evaluation includes a drive-by inspection of the property. Potential eviction and renovation costs are estimated, as well as expected rents and expenses. The property is also researched for the existence of any senior liens. Our local teams have experience in evaluating homes in foreclosure, conducting due diligence and bidding at auctions, which we believe positions us to bid effectively against other competitors. In addition, we underwrite acquisition candidates and have implemented an efficient bid management system and closing and transfer processes that we believe result in properties acquired at an attractive total investment.

We have and will continue to source property acquisition opportunities through broker sales

Table of Contents

(including traditional MLS, real estate owned, or REO, sales and short sales) and portfolio (or bulk) sales from government agencies, financial institutions and competitors. In particular, we have developed an extensive network of real estate brokers that facilitate a large volume of acquisitions through broker sales. We have a team dedicated to identifying opportunities for homes sold in bulk by institutions or competitors. Acquisitions through these channels generally allow more time for underwriting to determine the expected rents, expenses and renovation costs, obtain title insurance and review local covenant conditions and restrictions.

Existing Occupant Transition. Upon acquisition, we often must interact with and replace existing occupants of the homes acquired, whether they are prior homeowners or existing tenants. Our primary objective in this process is to quickly transition these occupants to our tenants, and, if that is not possible, to arrange for them to voluntarily vacate the home promptly. Occasionally, we may offer a modest incentive to existing occupants to vacate. Such a cost is viewed as appropriate in relation to the value gained from accelerating our access to the home to begin renovation. As a last resort, the existing occupants will be evicted. We have attorneys on staff familiar with the laws of the locales of our properties to handle this process.

Existing occupants who are tenants sometimes have a bona fide lease under state and federal regulations that must be honored. In these instances, we will honor such leases, while continuing to work with the tenants to transition them to a lease under our form and rental structure at the conclusion of the existing lease. Renovations are typically not conducted in these instances.

Property Renovation. We have a team of dedicated personnel to oversee the renovation process. This team focuses on maximizing the benefit of our investment in property renovation. Once a home is acquired, if it is not occupied, we promptly begin the renovation process, during which each property is thoroughly evaluated. Any resulting work is presented for bid to approved contractors in each of our markets. We have negotiated substantial quantity discounts in each of our markets for products that we regularly use during the renovation process, such as paint, window blinds, carpet and flooring. By establishing and enforcing best practices and quality consistency, we believe that we are able to reduce the costs of both materials and labor. We have found that a rapid response to renovating our homes improves our relationship with the local communities and homeowners' associations, or HOAs, enhancing the "American Homes 4 Rent" brand recognition and loyalty. For homes that are occupied, property renovation is generally delayed. In general, property renovations are completed within approximately 50 to 60 days after gaining initial access to a property and properties are typically leased approximately 20 to 30 days after completing the renovation process. If a home that is acquired remains occupied, the renovation process may be postponed. However, an assessment is made of potential renovation work that must be addressed once the property can be accessed.

Property Management. We have developed an extensive in-house property management infrastructure, with modern systems, dedicated personnel and local offices in certain of our target markets. In these markets, property managers employed by us execute all property management functions. We directly manage all of our properties without the engagement of a third party manager.

Marketing and Leasing. We are responsible for establishing rental rates, marketing and leasing properties (including screening prospective tenants) and collecting and processing rent. We establish rental rates based on analysis by the local property management teams in each market. Factors considered in establishing the rental rates include a competitive analysis of rents, the size and age of the house, and many qualitative factors, such as neighborhood characteristics and access to quality schools, transportation and services. We advertise the available properties through multiple channels, including our website, Craigslist, MLS, yard signs and local brokers. In some markets, we utilize a network of local real estate agents to show homes to prospective

Table of Contents

tenants. We believe that utilizing local agents makes the process more efficient and creates an additional marketing channel for properties under management.

Prospective tenants may submit an application through our website, Craigslist posting or in person. We evaluate prospective tenants in a standardized manner. Our application and evaluation process includes obtaining appropriate identification, a thorough evaluation of credit and household income, a review of the applicant's rental history, and a background check for criminal activity. Although we require a minimum household FICO score and income to rent ratio, all factors are taken into consideration during the tenant evaluation process, including an emphasis on rental payment history. On average, household FICO scores and income to rent ratios of approved applicants are significantly in excess of our minimum requirements. We are generally able to complete our application and evaluation process the same day the prospective tenant submits a rental application. We collect the majority of rent electronically via Automated Clearing House transfer or direct debit to the tenant's checking account via a secure tenant portal on our website. An auto-pay feature is offered to facilitate rent payment. Tenants' charges and payment history are available to tenants online through the tenant portal. Tenants who do not pay rent by the late payment date (typically within five calendar days) will receive notification and are assessed a late fee. Eviction is a last resort, and the eviction process is managed in compliance with local and state regulations. The eviction process is documented through a property management system with all correspondence and documentation stored electronically.

Tenant Relations and Property Maintenance. We also are responsible for property repairs and maintenance and tenant relations. We offer a 24/7 emergency line to handle after hours issues, and our tenants can contact us through our local property management office or call center. As part of our ongoing property management, we conduct routine repairs and maintenance as appropriate to maximize long-term rental income and cash flows from our portfolio. In addition, our local property managers are involved in periodic visits to our properties to help foster positive, long-term relationships with our tenants, to monitor the condition and use of our homes and to ensure compliance with HOA rules and regulations.

Systems and Technology. Effective systems and technology are essential components of our process. Significant investments have been made in our lease management, accounting and asset management systems. They have been designed to be scalable to accommodate continued growth in our portfolio of homes. Our website is fully integrated into the tenant accounting and leasing system. From the website, which is accessible from mobile devices, prospective tenants can browse homes available for rent, request additional information and apply to rent a specific home. Through the tenant portal existing tenants can set up automatic payments. The system is designed to handle the accounting requirements of residential property accounting, including accounting for security deposits and paying property-level expenses. The system also interfaces with the credit agency, Experian, expediting evaluations of prospective tenant rental applications. We have worked with a search engine optimization firm to ensure we place high in search engine lists and will continue to monitor our placement on search engines. In addition, sponsored key words are generally purchased in selected markets as needed.

Other Business Activities

In September 2013, we announced the formation of AMIP Management, LLC ("AMIP"), a joint venture between us and Johnson Capital Residential Investments, LLC ("JCRI"), an investment entity formed and capitalized by a group of mortgage servicing and real estate finance professionals. AMIP was formed to manage multiple investment funds focused on the acquisition and resolution of distressed residential mortgage assets in the United States. As of December 31, 2014, AMIP held 352 residential mortgages and is focusing on evaluating and negotiating additional acquisitions. There can

Table of Contents

be no assurance that AMIP will be able to acquire any such assets or that any additional investments will be profitable.

Risk Management

We face various forms of risk in our business ranging from broad economic, housing market and interest rate risks, to more specific factors, such as credit risk related to our tenants, re-leasing of properties and competition for properties. We believe that the systems and processes developed by our experienced executive team since commencing our operations in November 2012 allow us to monitor, manage and ultimately navigate these risks.

Insurance

We maintain property and liability and corporate level insurance coverage related to our business, including crime and fidelity, property management errors and omissions, trustees' and officers' errors and omissions, cyber liability, employment practice liability and workers' compensation. We believe the policy specifications and insured limits under our insurance program are appropriate and adequate for our business and properties given the relative risk of loss, the cost of the coverage and industry practice. However, our insurance coverage is subject to substantial deductibles and carveouts, and we will be self-insured up to the amount of such deductibles and carveouts. See "Risk Factors Risks Related to Our Business We are self-insured against many potential losses, and uninsured or underinsured losses relating to properties may adversely affect our financial condition, operating results, cash flows and ability to make distributions on our preferred and common shares."

Competition

We face competition from different sources in each of our two primary activities: acquiring properties and renting our properties. We believe our primary competitors in acquiring our target properties through individual acquisitions are individual investors, small private investment partnerships looking for one-off acquisitions of investment properties that can either be rented or restored and sold, and larger investors, including private equity funds and other REITs, that are seeking to capitalize on the same market opportunity that we have identified. Our primary competitors in acquiring portfolios include large and small private equity investors, public and private REITs and other sizeable private institutional investors. These same competitors may also compete with us for tenants. Competition may increase the prices for properties that we would like to purchase, reduce the amount of rent we may charge at our properties, reduce the occupancy of our portfolio and adversely impact our ability to achieve attractive yields. However, we believe that our acquisition platform, our extensive in-house property management infrastructure and market knowledge in markets that meet our selection criteria provide us with competitive advantages.

Regulation

General

Our properties are subject to various covenants, laws and ordinances, and certain of our properties are also subject to the rules of the various HOAs where such properties are located. We believe that we are in material compliance with such covenants, laws, ordinances and rules, and we also require that our tenants agree to comply with such covenants, laws, ordinances and rules in their leases with us.

Fair Housing Act

The Fair Housing Act, or FHA, its state law counterparts and the regulations promulgated by the U.S. Department of Housing and Urban Development, or HUD, and various state agencies, prohibit discrimination in housing on the basis of race or color, national origin, religion, sex, familial status

Table of Contents

(including children under the age of 18 living with parents or legal custodians, pregnant women and people securing custody of children under the age of 18), handicap or, in some states, financial capability. We believe that our properties are in substantial compliance with the FHA and other regulations.

Environmental Matters

As a current or prior owner of real estate, we are subject to various federal, state and local environmental laws, regulations and ordinances, and we could be liable to third parties as a result of environmental contamination or noncompliance at our properties, even if we no longer own such properties. See "Risk Factors - Risks Related to Our Business - Contingent or unknown liabilities could adversely affect our financial condition, cash flows and operating results."

REIT Qualification

We have elected to be taxed as a REIT, which commenced with our first taxable year ended December 31, 2012. Our qualification as a REIT, and maintenance of such qualification, will depend upon our ability to meet, on a continuing basis, various complex requirements under the Internal Revenue Code of 1986, or the Code, relating to, among other things, the sources of our gross income, the composition and values of our assets, our distributions to our shareholders and the concentration of ownership of our equity shares. We believe that, commencing with our initial taxable year ended December 31, 2012, we have been organized in conformity with the requirements for qualification and taxation as a REIT.

As a REIT, we generally will not be subject to U.S. federal income tax on our REIT taxable income that we currently distribute to our shareholders, but taxable income generated by any taxable REIT subsidiary or "TRS" that we may form or acquire will be subject to federal, state and local income tax. Under the Code, REITs are subject to numerous organizational and operational requirements, including a requirement that they distribute annually at least 90% of their REIT taxable income to their shareholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, our income would be subject to U.S. federal income tax, and we would likely be precluded from qualifying for treatment as a REIT until the fifth calendar year following the year in which we fail to qualify. Even if we qualify as a REIT, we may still be subject to certain U.S. federal, state and local taxes on our income and assets and to U.S. federal income and excise taxes on our undistributed income.

Investment Company Act of 1940

We intend to conduct our operations so that neither we nor any of our subsidiaries are required to register as an investment company under the Investment Company Act of 1940, as amended, or the 1940 Act.

Employees

As of December 31, 2014, we have approximately 752 dedicated full-time personnel. None of our personnel are covered by a collective bargaining agreement.

Seasonality

While we still have limited operating history, we believe that our business and related operating results will be impacted by seasonal factors throughout the year. In particular, we have experienced higher levels of tenant move-outs during the summer months, which impacts both our rental revenues and related turnover costs. Further, our property operating costs are seasonally impacted in certain

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

markets for expenses such as snow removal and heating during the winter season and HVAC repairs and expenses during the summer season.

Available Information

Our website address is www.americanhomes4rent.com. We make available free of charge on or through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports as soon as reasonably practicable after we electronically file the report with or furnish it to the SEC. This information is also available in print to any shareholder who requests it, with any such requests addressed to Investor Relations, American Homes 4 Rent, 30601 Agoura Road, Suite 200, Agoura Hills, CA 91301. We also make available free of charge on our website our Corporate Governance Guidelines, our Code of Business Conduct and Ethics and the charters of our Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee of our Board of Trustees. We intend to disclose on our website any changes to, or waivers from, our Code of Business Conduct and Ethics. The information contained on our website shall not be deemed to be incorporated by reference into this or any other report we file with, or furnish to, the SEC.

ITEM 1A. RISK FACTORS

Risks Related to Our Business

Set forth below are the risks that we believe are material to our shareholders. You should consider these risks carefully when evaluating our Company and our business. The risks described below may not be the only risks we face. Additional risks of which we are currently unaware or that we currently consider immaterial also may impact our business. If any of the following events or circumstances actually occur, our business, prospects, financial condition, results of operations and ability to satisfy our debt obligations and make distributions to our shareholders could be materially and adversely affected, and you could lose all or part of your investment in our securities. Some statements in the following risk factors are forward-looking statements. See the section entitled "Forward-Looking Statements."

We are employing a new and untested business model with no proven track record, which may make our business difficult to evaluate.

Until 2012, the single-family rental business consisted primarily of private and individual investors in local markets and was managed individually or by small, local property managers. Our investment strategy involves purchasing a large number of residential properties and leasing them to suitable tenants. No peer companies exist with an established track record to enable us to predict whether our investment strategy can be implemented successfully over time. It will be difficult for you to evaluate our potential future performance without the benefit of established track records from companies implementing a similar investment strategy. We may encounter unanticipated problems implementing our investment strategy, which may adversely affect our results of operations and ability to make distributions to our shareholders and cause our share price to decline significantly. We believe the acquisition, operation and management of multi-family residential real estate is the most comparable established model for our business, but in contrast to multi-family operations, the geographic dispersion of single-family properties (even within a local clustering) creates significantly greater operational and maintenance challenges and, potentially, significantly higher per-unit operating costs. In addition, since each home has unique features, appliances and building materials, renovations, maintenance, marketing and operational tasks will be far more varied and demanding than in a typical multi-family setting. We may be unable to operate a large portfolio of single-family rental properties in a cost-effective and profitable manner and our business plan may not succeed. We also can provide no assurance that we will be able to successfully achieve our objective of providing attractive risk-adjusted returns to our shareholders.

We are a recently organized REIT with a limited operating history, and we may not be able to successfully operate our business or generate sufficient cash flows to make or sustain distributions on our preferred and common shares.

We were organized in October 2012, and we commenced operations in November 2012 upon completion of our initial private placement. We have a limited operating history, and, through December 31, 2014, we have not generated any earnings. We may not be able to successfully operate our business or implement our operating policies and investment strategy. Furthermore, we may not be able to generate sufficient cash flows to pay our operating expenses, service any debt and make distributions to our shareholders. Our ability to successfully operate our business and implement our operating policies and investment strategy depends on many factors, including:

the availability of, and our ability to identify, attractive acquisition opportunities consistent with our investment strategy;

our ability to effectively manage renovation, maintenance, marketing and other operating costs for our properties;

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

our ability to maintain high occupancy rates and target rent levels;

our ability to compete with other investors entering the single-family sector;

costs that are beyond our control, including title litigation, litigation with tenants or tenant organizations, legal compliance, real estate taxes, HOA fees and insurance;

judicial and regulatory developments affecting landlord-tenant relations that may affect or delay our ability to dispossess or evict occupants or increase rents;

judicial and regulatory developments affecting banks' and other mortgage holders' ability to foreclose on delinquent borrowers;

reversal of population, employment or homeownership trends in target markets;

interest rate levels and volatility, such as the accessibility of short-and long-term financing on desirable terms; and

economic conditions in our target markets, including changes in employment and household earnings and expenses, as well as the condition of the financial and real estate markets and the economy in general.

In addition, we face significant competition in acquiring attractive properties on advantageous terms, and the value of the properties that we acquire may decline substantially after we purchase them.

We may not be able to effectively manage our growth, and any failure to do so may have an adverse effect on our business and operating results.

We have a limited operating history, and we plan to grow our own property portfolio and operations rapidly. From commencement of our operations in November 2012 through December 31, 2014, we have acquired 34,599 single-family properties in 22 states. Our future operating results may depend on our ability to effectively manage our rapid growth, which is dependent, in part, upon our ability to:

stabilize and manage a rapidly increasing number of properties and tenant relationships while maintaining a high level of tenant satisfaction and building and enhancing our brand;

identify and supervise an increasing number of suitable third parties on which we rely to provide certain services outside of property management to our properties;

attract, integrate and retain new management and operations personnel as our organization grows in size and complexity;

continue to improve our operational and financial controls and reporting procedures and systems; and

scale our technology and other infrastructure platforms to adequately service new properties.

Edgar Filing: American Homes 4 Rent - Form 10-K

There can be no assurance that we will be able to achieve these results or that we may otherwise be able to manage our growth effectively. Any failure to do so may have an adverse effect on our business and operating results.

We intend to continue to expand our scale of operations and make acquisitions even if the rental and housing markets are not as favorable as they were when we commenced operations, which could adversely impact anticipated yields.

Our long-term growth depends, in part, on the availability of acquisition opportunities in our target markets at attractive pricing levels. We believe various factors and market conditions have made homes

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

available for purchase at prices that are below replacement costs. We expect that in the future, housing prices will continue to stabilize and return to more normalized levels, and therefore future acquisitions may be more costly. The following factors, among others, are making acquisitions more expensive:

improvements in the overall economy and job market;

a resumption of consumer lending activity and greater availability of consumer credit;

improvements in the pricing and terms of mortgage-backed securities;

the emergence of increased competition for single-family assets from private investors and entities with similar investment objectives to ours; and

tax or other government incentives that encourage homeownership.

We have not adopted and do not expect to adopt a policy of making future acquisitions only if they are accretive to existing yields and distributable cash. We plan to continue acquiring properties as long as we believe such properties offer an attractive total return opportunity. Accordingly, future acquisitions may have lower yield characteristics than recent past and present opportunities and if such future acquisitions are funded through equity issuances, the yield and distributable cash per share will be reduced, and the value of our common and preferred shares may decline.

Our future growth depends, in part, on the availability of additional debt or equity financing. If we cannot obtain additional financing on terms favorable or acceptable to us, our growth may be limited.

Part of our business strategy may involve the use of debt and equity financing to increase potential returns to our shareholders in the future. Our inability in the future to obtain additional financing on attractive terms, or at all, could adversely impact our ability to execute our business strategy, which could adversely affect our growth prospects and future shareholder returns. Our access to capital depends, in part, on:

general business conditions;

financial market conditions;

the market's perception of our business prospects and growth potential;

the market prices of our common and preferred shares;

our current debt levels; and

our current and expected earnings, cash flow and distributions.

We cannot assure you that we will be able to obtain debt or equity financing on terms favorable or acceptable to us or at all. If we are unable to do so, we may have to curtail our investment activities, which could limit our growth prospects, and we may be forced to dispose of assets at inopportune times in order to maintain our REIT qualification. We continue to seek additional sources of financing for our acquisitions. Our pace of acquisitions may depend on the level of funds available for investment. In addition, if we are unable to obtain debt financing, we may have to rely more heavily on additional equity issuances, which may be dilutive to our shareholders, or on less efficient forms of debt financing that require a larger portion of our cash flow from operations, thereby reducing funds available for our operations, future business

Edgar Filing: American Homes 4 Rent - Form 10-K

opportunities, cash distributions to our shareholders and other purposes.

We may also be limited in the amounts we may borrow under our credit facility. The amount that may be borrowed under our credit facility is generally based on the lower of 50% of the value of our qualifying leased and un-leased properties and certain other measures based in part on the net income generated by our qualifying leased and un-leased properties, which we refer to as the "borrowing base." Because the borrowing base is determined in part by the estimated value of, and the net income

Table of Contents

generated by, our qualifying leased and un-leased properties and the quantity, value and rentability of properties in our portfolio may fluctuate from time to time, we may be limited in the amounts we are able to borrow under our credit facility.

Our revenue and expenses are not directly correlated, and because a large percentage of our costs and expenses are fixed, we may not be able to adapt our cost structure to offset declines in our revenue.

Most of the expenses associated with our business, such as acquisition costs, repairs and maintenance costs, real estate taxes, HOA fees, personal and ad valorem taxes, insurance, utilities, employee wages and benefits and other general corporate expenses, are relatively inflexible and will not necessarily decrease with a reduction in revenue from our business. Some components of our fixed assets depreciate more rapidly and will require a significant amount of ongoing capital expenditures. Our expenses and ongoing capital expenditures also will be affected by inflationary increases, and certain of our cost increases may exceed the rate of inflation in any given period. Our rental income is affected by many factors beyond our control such as the availability of alternative rental housing and economic conditions in our target markets. In addition, state and local regulations may require us to maintain properties that we own, even if the cost of maintenance is greater than the value of the property or any potential benefit from renting the property. As a result, we may not be able to fully offset rising costs and capital spending by raising rental rates, which could have a material adverse effect on our results of operations and cash available for distribution.

Our success depends, in part, upon our ability to hire and retain highly skilled managerial, investment, financial and operational personnel, and the past performance of our senior management may not be indicative of future results.

The implementation of our business plan may require that we employ additional qualified personnel. Competition for highly skilled managerial, investment, financial and operational personnel is intense. As additional large real estate investors have entered the single-family rental business, we have faced increased challenges in hiring and retaining personnel, and we cannot assure our shareholders that we will be successful in attracting and retaining such skilled personnel. If we are unable to hire and retain qualified personnel as required, our growth and operating results could be adversely affected.

You should not rely upon the past performance of our senior management as indicative of our future results. Other than their experience with our company and AH LLC, which was organized in June 2011, our executive team has no prior experience in the business of acquiring and renting single-family residences.

We are dependent on our executive officers and dedicated personnel, and the departure of any of our key personnel could materially and adversely affect us.

We rely on a small number of persons to carry out our business and investment strategies. Any of our senior management may cease to provide services to us at any time. The loss of the services of any of our key management personnel, or our inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business and financial results. As we expand, we will continue to need to attract and retain qualified additional senior management but may not be able to do so on acceptable terms or at all.

Table of Contents

Our investments are and will continue to be concentrated in our target markets and in the single-family properties sector of the real estate industry, which exposes us to seasonality fluctuations in rental demand and downturns in our target markets or in the single-family properties sector.

Our investments in real estate assets are and will continue to be concentrated in target markets and in the single-family properties sector of the real estate industry. A downturn or slowdown in the rental demand for single-family housing caused by adverse economic, regulatory or environmental conditions, or other events, in our target markets may have a greater impact on the value of our properties or our operating results than if we had more fully diversified our investments. We believe that there are seasonal fluctuations in rental demand with demand higher in the spring and summer than in the late fall and winter. Such seasonal fluctuations may impact our operating results.

In addition to general, regional, national and international economic conditions, our operating performance will be impacted by the economic conditions in our target markets. We acquire, renovate and rent single-family properties in our target markets, which currently include MSAs within 22 states. As of December 31, 2014, approximately 57% of our properties were concentrated in five states Texas, North Carolina, Florida, Ohio and Georgia. We base a substantial part of our business plan on our belief that property values and operating fundamentals for single-family properties in these markets will improve significantly over the next several years. However, each of these markets experienced substantial economic downturns in recent years and could experience similar or worse economic downturns in the future. We can provide no assurance as to the extent property values and operating fundamentals in these markets will improve, if at all. If the recent economic downturn in these markets persists or if we fail to accurately predict the timing of economic improvement in these markets, the value of our properties could decline and our ability to execute our business plan may be adversely affected, which could adversely affect our financial condition, operating results and ability to make distributions to our shareholders and cause the value of our outstanding securities to decline.

We may not be able to effectively control the timing and costs relating to the renovation of properties, which may adversely affect our operating results and our ability to make distributions on our preferred and common shares.

Nearly all of our properties require some level of renovation immediately upon their acquisition or in the future following expiration of a lease or otherwise. We may acquire properties that we plan to extensively renovate. We also may acquire properties that we expect to be in good condition only to discover unforeseen defects and problems that require extensive renovation and capital expenditures. To the extent properties are leased to existing tenants, renovations may be postponed until the tenant vacates the premises, and we will pay the costs of renovating. In addition, in order to reposition properties in the rental market, we will be required to make ongoing capital improvements and replacements from time to time that tenant deposits and insurance may not cover.

Our properties have infrastructure and appliances of varying ages and conditions. Consequently, we routinely retain independent contractors and trade professionals to perform physical repair work and are exposed to all of the risks inherent in property renovation, including potential cost overruns, increases in labor and materials costs, delays by contractors in completing work, delays in the timing of receiving necessary work permits, certificates of occupancy and poor workmanship. If our assumptions regarding the costs or timing of renovation across our properties prove to be materially inaccurate, our operating results and ability to make distributions to our shareholders may be adversely affected.

We face significant competition for acquisitions of our target properties, which may limit our strategic opportunities and increase the cost to acquire those properties.

We face significant competition for attractive acquisition opportunities in our target markets from other large real estate investors, some of which have greater financial resources and a lower cost of

Table of Contents

capital than we do. Several REITs and other funds have deployed, and others may in the future deploy, significant amounts of capital to purchase single-family homes and may have investment objectives that overlap and compete with ours, including in our target markets. This activity has adversely impacted our level of purchases in certain of our target markets. If our business model or a similar model proves to be successful, we can expect competition to intensify significantly. As a result, the purchase price of potential acquisition properties may be significantly elevated, or we may be unable to acquire properties on desirable terms or at all.

We face significant competition in the leasing market for quality tenants, which may limit our ability to rent our single-family homes on favorable terms or at all.

We face competition for tenants from other lessors of single-family properties, apartment buildings and condominium units, and the continuing development of apartment buildings and condominium units in many of our target markets increases the supply of housing and exacerbates competition for tenants. Many of these competitors may successfully attract tenants with better incentives and amenities, which could adversely affect our ability to obtain quality tenants and lease our single-family properties on favorable terms or at all. Additionally, some competing housing options may qualify for government subsidies that may make such options more affordable and therefore more attractive than our properties. At December 31, 2014, we owned 34,599 single-family properties, 28,250, or 81.6%, of which were leased. Our operating results and ability to make distributions to our shareholders would be adversely affected if we are not able to lease our properties on favorable terms or at all.

Improving economic conditions, combined with historically low residential mortgage rates, may cause some potential renters to seek to purchase residences rather than lease them and, as a result, cause a decline in the number and quality of potential tenants.

Improving economic conditions, along with the availability of historically low residential mortgage interest rates and government sponsored programs to promote home ownership, has made home ownership more affordable and more accessible for potential renters who have strong credit. These factors may encourage potential renters to purchase residences rather than lease them, thereby causing a decline in the number and quality of potential tenants available to us.

Our evaluation of properties involves a number of assumptions that may prove inaccurate, which could result in us paying too much for properties we acquire or overvaluing our properties or our properties failing to perform as we expect.

In determining whether a particular property meets our investment criteria, we make a number of assumptions, including assumptions related to estimated time of possession and estimated renovation costs and time frames, annual operating costs, market rental rates and potential rent amounts, time from purchase to leasing and tenant default rates. These assumptions may prove inaccurate. As a result, we may pay too much for properties we acquire or overvalue our properties, or our properties may fail to perform as we expect. Adjustments to the assumptions we make in evaluating potential purchases may result in fewer properties qualifying under our investment criteria, including assumptions related to our ability to lease properties we have purchased. Reductions in the supply of properties that meet our investment criteria may adversely affect our ability to implement our investment strategy and operating results.

Furthermore, the properties that we acquire vary materially in terms of time to possession, renovation, quality and type of construction, location and hazards. Our success depends on our ability to acquire properties that can be quickly possessed, renovated, repaired, upgraded and rented with minimal expense and maintained in rentable condition. Our ability to identify and acquire such properties is fundamental to our success. In addition, the recent market and regulatory environments relating to single-family residential properties have been changing rapidly, making future trends difficult

Table of Contents

to forecast. For example, an increasing number of homeowners now wait for an eviction notice or eviction proceedings to commence before vacating foreclosed premises, which significantly increases the time period between the acquisition and leasing of a property. Such changes affect the accuracy of our assumptions and, in turn, may adversely affect our operating results.

Purchasing single-family properties through the foreclosure auction process subjects us to significant risks that could adversely affect our operating results, cash flows and ability to make distributions on our preferred and common shares.

Our business plan involves acquiring single-family properties through the foreclosure auction process simultaneously in a number of markets, which involves monthly foreclosure auctions on the same day of the month in certain markets. In these instances, we are only able to visually inspect properties from the street and must purchase these properties without a contingency period and in "as is" condition with the risk that unknown defects in the property may exist. We also may encounter unexpected legal challenges and expenses in the foreclosure process. Upon acquiring a new property, we may have to evict residents who are in unlawful possession before we can secure possession and control of the property. The holdover occupants may be the former owners or tenants of a property, or they may be squatters or others who are illegally in possession. Securing control and possession from these occupants can be both costly and time-consuming.

Further, when acquiring properties on an "as is" basis, title commitments are often not available prior to purchase, and title reports or title information may not reflect all senior liens, which may increase the possibility of acquiring houses outside predetermined acquisition and price parameters, purchasing residences with title defects and deed restrictions, HOA restrictions on leasing or underwriting or purchasing the wrong residence. The policies, procedures and practices we implement to assess the state of title and leasing restrictions prior to purchase may not be effective, which could lead to a material if not complete loss on our investment in such properties. For properties we acquire through the foreclosure auction process, we do not obtain title commitments prior to purchase, and we are not able to perform the type of title review that is customary in acquisitions of real property. As a result, our knowledge of potential title issues will be limited, and no title insurance protection will be in place. This lack of title knowledge and insurance protection may result in third parties having claims against our title to such properties that may materially and adversely affect the values of the properties or call into question the validity of our title to such properties. Without title insurance, we are fully exposed to, and would have to defend ourselves against, such claims. Further, if any such claims are superior to our title to the property we acquired, we risk loss of the property purchased. Any of these risks could adversely affect our operating results, cash flows and ability to make distributions to our shareholders.

In addition, allegations of deficiencies in foreclosure practices could result in claims challenging the validity of some foreclosures that have occurred to date, potentially placing our claim of ownership to the properties at risk. There can be no assurance that such proceedings would not result in a complete dispossession of property from us without compensation.

Each state has its own laws governing the procedures to foreclose on mortgages and deeds of trust, and state laws generally require strict compliance with these laws in both judicial and non-judicial foreclosures. Recently, courts and administrative agencies have been more actively involved in enforcing state laws governing foreclosures, and in some circumstances have imposed new rules and requirements regarding foreclosures. Some courts have delayed or prohibited foreclosures based on alleged failures to comply with proper transfers of title, notice, identification of parties in interest, documentation and other legal requirements. The increase in the number of foreclosures since 2007 has led legislatures in many states to consider modifications to foreclosure laws to restrict and reduce foreclosures. For example, in 2012, California enacted a law imposing new limitations on foreclosures while a request for a loan modification is pending. Further, foreclosed owners and their legal representatives, including

Table of Contents

some prominent and well-financed law firms, have brought litigation questioning the validity and finality of foreclosures that have already occurred. These developments may slow or reduce the supply of foreclosed houses available to us for purchase and may call into question the validity of our title to houses acquired at foreclosure, or result in rescission rights or other borrower remedies, which could result in a loss of a property purchased by us, an increase in litigation and property maintenance costs incurred with respect to properties obtained through foreclosure, or delays in stabilizing and leasing such properties promptly after acquisition.

Claims of deficiencies in the foreclosure process may result in rescission of our purchases at auction or reduce the supply of foreclosed properties available to us.

Allegations of deficiencies in foreclosure practices could result in claims challenging the validity of some foreclosures that have occurred to date, potentially placing our claim of ownership to the properties at risk. Since we do not have title insurance policies for properties we acquire through the foreclosure auction process, such instances or such proceedings may result in a complete loss without compensation.

Each state has its own laws governing the procedures to foreclose on mortgages and deeds of trust, and state laws generally require strict compliance with these laws in both judicial and non-judicial foreclosures. Recently, courts and administrative agencies have been more actively involved in enforcing state laws governing foreclosures, and in some circumstances have imposed new rules and requirements regarding foreclosures. Some courts have delayed or prohibited foreclosures based on alleged failures to comply with proper transfers of title, notice, identification of parties in interest, documentation and other legal requirements. Further, foreclosed owners and their representatives, including some prominent and well-financed legal firms, have brought litigation questioning the validity and finality of foreclosures that have already occurred. These developments may slow or reduce the supply of foreclosed houses available to us for purchase and may call into question the validity of our title to houses acquired at foreclosure, or result in rescission rights or other borrower remedies, which could result in a loss of a property purchased by us, an increase in litigation costs incurred with respect to properties obtained through foreclosure, or delays in stabilizing and leasing such properties promptly after acquisition.

Properties acquired through bulk sales may subject us to the risk of acquiring properties that do not fit our target investment criteria and may be costly or time consuming to divest, which may adversely affect our operating results.

We have occasionally acquired and may continue to acquire properties purchased as portfolios in bulk from other owners of single-family homes. To the extent the management and leasing of such properties has not been consistent with our property management and leasing standards, we may be subject to a variety of risks, including risks relating to the condition of the properties, the credit quality and employment stability of the tenants and compliance with applicable laws, among others. In addition, financial and other information provided to us regarding such portfolios during our due diligence may be inaccurate, and we may not discover such inaccuracies until it is too late to seek remedies against such sellers. To the extent we timely pursue such remedies, we may not be able to successfully prevail against the seller in an action seeking damages for such inaccuracies. If we conclude that certain properties purchased in bulk portfolios do not fit our target investment criteria, we may decide to sell, rather than renovate and rent, these properties, which could take an extended period of time and may not result in a sale at an attractive price.

Table of Contents

Single-family properties that are being sold through short sales or foreclosure sales are subject to risks of theft, mold, infestation, vandalism, illegal activity on the premises, deterioration or other damage that could require extensive renovation prior to renting and adversely impact operating results.

When a single-family property is put into foreclosure due to a default by the homeowner on its mortgage obligations or the value of the property is substantially below the outstanding principal balance on the mortgage and the homeowner decides to seek a short sale, the homeowner may abandon the property or cease to maintain the property as rigorously as the homeowner normally would. Neglected and vacant properties are subject to increased risks of theft, mold, infestation, vandalism, illegal activity on the premises, general deterioration and other maintenance problems that may persist without appropriate attention and remediation. If we begin to purchase a large volume of properties in bulk sales and are not able to inspect them immediately before closing on the purchase, we may purchase properties that may be subject to these problems, which may result in maintenance and renovation costs and time frames that far exceed our estimates. These circumstances could substantially impair our ability to quickly renovate and lease such properties in a cost efficient manner or at all, which would adversely impact our operating results.

If occupancy levels and rental rates in our target markets do not increase sufficiently to keep pace with rising costs of operations, our rental income and distributable cash will decline.

The success of our business model depends, in part, on conditions in the single-family rental market in our target markets. Our asset acquisitions are premised on assumptions about occupancy levels and rental rates, and if those assumptions prove to be inaccurate, our cash flows and profitability will be reduced. A continuation of the recent strengthening of the U.S. economy and job growth, coupled with government programs designed to keep home owners in their homes and/or other factors may contribute to an increase in homeownership rather than renting. In addition, we expect that as investors like us increasingly seek to capitalize on opportunities to purchase housing assets at below replacement costs and convert them to productive uses, the supply of single-family rental properties will decrease and the competition for tenants may intensify. A softening of the rental market in our target areas would reduce our rental income and profitability.

Eminent domain could lead to material losses on our investments in our properties.

Governmental authorities may exercise eminent domain to acquire land on which our properties are built in order to build roads and other infrastructure. Any such exercise of eminent domain would allow us to recover only the fair value of the affected properties. Our investment strategy is premised on the concept that this "fair value" will be substantially less than the real value of the property for a number of years, and we could effectively have no profit potential from properties acquired by the government through eminent domain. Several cities also are exploring proposals to use eminent domain to acquire mortgages to assist homeowners to remain in their homes, potentially reducing the supply of single-family properties in our target markets.

We depend on our tenants and their willingness to renew their leases for substantially all of our revenues. Poor tenant selection and defaults and nonrenewals by our tenants may adversely affect our reputation, financial performance and ability to make distributions on our preferred and common shares.

We depend on rental income from tenants for substantially all of our revenues. As a result, our success depends in large part upon our ability to attract and retain qualified tenants for our properties. Our reputation, financial performance and ability to make distributions to our shareholders would be adversely affected if a significant number of our tenants fail to meet their lease obligations or fail to renew their leases. For example, tenants may default on rent payments, make unreasonable and repeated demands for service or improvements, make unsupported or unjustified complaints to regulatory or political authorities, use our properties for illegal purposes, damage or make

Table of Contents

unauthorized structural changes to our properties that are not covered by security deposits, refuse to leave the property upon termination of the lease, engage in domestic violence or similar disturbances, disturb nearby residents with noise, trash, odors or eyesores, fail to comply with HOA regulations, sublet to less desirable individuals in violation of our lease or permit unauthorized persons to live with them. Damage to our properties may delay re-leasing after eviction, necessitate expensive repairs or impair the rental income or value of the property resulting in a lower than expected rate of return. Widespread unemployment and other adverse changes in the economic conditions in our target markets could result in substantial tenant defaults. In the event of a tenant default or bankruptcy, we may experience delays in enforcing our rights as landlord at that property and will incur costs in protecting our investment and re-leasing the property.

Short-term leases of residential property may expose us to the effects of declining market rents, which may adversely affect our operating results and our ability to make distributions on our preferred and common shares.

Substantially all of our new leases have a duration of one year. As these leases permit tenants to leave at the end of the lease term without penalty, we anticipate our rental revenues may be affected by declines in market rents more quickly than if our leases were for longer terms. Short-term leases may result in high turnover, which involves costs such as restoring the properties, marketing costs and lower occupancy levels. Because we have a limited track record, we cannot accurately predict our turnover rate or the associated costs we will incur. Moreover, we cannot assure you that our leases will be renewed on equal or better terms or at all. If our tenants do not renew their leases or the rental rates for our properties decrease, our operating results and ability to make distributions to our shareholders could be adversely affected.

Declining real estate values and impairment charges could adversely affect our financial condition and operating results.

We intend to review the carrying value of our properties when circumstances, such as adverse market conditions, indicate potential impairment may exist. If our evaluation indicates that we may be unable to recover the carrying value of a material portion of our real estate investments, an impairment charge will be recorded to the extent that the carrying value exceeds the estimated fair value of the properties. These losses would directly impact our financial condition and operating results. The evaluation of anticipated cash flows is highly subjective and is based in part on assumptions regarding future occupancy, rental rates and capital requirements that could differ materially from actual results in future periods. A declining real estate market may cause us to reevaluate the assumptions used in our impairment analysis. Impairment charges would adversely affect our financial condition and operating results.

Our net income and FFO may decrease as a result of costs of providing services on a self-managed basis.

Because we are self-managed, our expenses include the compensation and benefits of our officers, dedicated personnel and consultants, as well as overhead previously paid by AH LLC and its affiliates. Beginning on December 10, 2014, acquisition and renovation services, which were previously provided by AH LLC and its affiliates, were internalized and there can be no assurances that we will be able provide those services at the same level or for the same costs as provided by subsidiaries of AH LLC, and there may be unforeseen costs, expenses and difficulties associated with internalizing those services on a self-managed basis. If the expenses we assume as a result of internalizing these activities are higher than any corresponding increase in revenues or decrease in other expenses, our net income and funds from operations, or FFO, may be lower than they otherwise would have been.

Table of Contents

We are self-insured against many potential losses, and uninsured or underinsured losses relating to properties may adversely affect our financial condition, operating results, cash flows and ability to make distributions on our preferred and common shares.

We attempt to ensure that all of the properties we acquire are adequately insured to cover casualty losses. However, many of the policies covering casualty losses may be subject to substantial deductibles and carveouts, and we will be self-insured up to the amount of the deductibles and carveouts. Since some claims will not exceed the deductibles under our insurance policies, we will be effectively self-insured for some claims. There are also some losses, including losses from floods, windstorms, fires, earthquakes, acts of war, acts of terrorism or riots, that may not always be insured against or that are not generally fully insured against because it is not deemed economically feasible or prudent to do so. In addition, changes in the cost or availability of insurance could expose us to uninsured casualty losses.

In the event that any of the properties we acquire incur a casualty loss that is not fully covered by insurance, the value of our assets will be reduced by the amount of any such uninsured loss, and we could experience a significant loss of capital invested and potential revenues in these properties and could potentially remain obligated under any recourse debt associated with the property. Inflation, changes in building codes and ordinances, environmental considerations and other factors might also keep us from using insurance proceeds to replace or renovate a property after it has been damaged or destroyed. Under those circumstances, the insurance proceeds we receive might be inadequate to restore our economic position on the damaged or destroyed property. Any such losses could adversely affect our financial condition, operating results, cash flows and ability to make distributions on our preferred and common shares. In addition, we may have no source of funding to repair or reconstruct the damaged property, and we cannot assure you that any such sources of funding will be available to us for such purposes in the future.

Contingent or unknown liabilities could adversely affect our financial condition, cash flows and operating results.

We may acquire properties that are subject to contingent or unknown liabilities, including liabilities for or with respect to liens attached to properties, unpaid real estate tax, utilities or HOA charges for which a subsequent owner remains liable, clean-up or remediation of environmental conditions or code violations, claims of customers, vendors or other persons dealing with the acquired entities and tax liabilities, among other things. Purchases of single-family properties acquired at auction, in short sales, from lenders or in bulk purchases typically involve few or no representations or warranties with respect to the properties. In each case, our acquisition may be without any, or with only limited, recourse against the sellers with respect to unknown liabilities or conditions. As a result, if any such liability were to arise relating to our properties, or if any adverse condition exists with respect to our properties that is in excess of our insurance coverage, we might have to pay substantial amounts to settle or cure it, which could adversely affect our financial condition, cash flows and operating results.

In addition, the properties we acquire may be subject to covenants, conditions or restrictions that restrict the use or ownership of such properties, including prohibitions on leasing or requirements to obtain the approval of HOAs prior to leasing. We may not discover such restrictions during the acquisition process, and such restrictions may adversely affect our ability to utilize such properties as we intend.

Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.

Information security risks have generally increased in recent years due to the rise in new technologies and the increased sophistication and activities of perpetrators of cyber attacks. In the ordinary course of our business we acquire and store sensitive data, including intellectual property, our

Table of Contents

proprietary business information and personally identifiable information of our prospective and current tenants, our employees and third-party service providers in our branch offices and on our networks and website. The secure processing and maintenance of this information is critical to our operations and business strategy. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, disruption to our operations and the services we provide to customers or damage our reputation, which could adversely affect our results of operations and competitive position.

A significant number of our properties are part of HOAs, and we and our tenants are subject to the rules and regulations of such HOAs, which may be arbitrary or restrictive, and violations of such rules may subject us to additional fees and penalties and litigation with such HOAs that would be costly.

A significant number of our properties are part of HOAs, which are private entities that regulate the activities of and levy assessments on properties in a residential subdivision. HOAs in which we own properties may have or enact onerous or arbitrary rules that restrict our ability to renovate, market or lease our properties or require us to renovate or maintain such properties at standards or costs that are in excess of our planned operating budgets. Such rules may include requirements for landscaping, limitations on signage promoting a property for lease or sale, or the use of specific construction materials in renovations. The number of HOAs that impose limits on the number of property owners who may rent their homes is increasing. Such restrictions limit acquisition opportunities and could cause us to incur additional costs to resell the property and opportunity costs of lost rental income. Furthermore, many HOAs impose restrictions on the conduct of occupants of homes and the use of common areas and we may have tenants who violate HOA rules and for which we may be liable as the property owner. Additionally, the boards of directors of the HOAs in which we own properties may not make important disclosures about the properties or may block our access to HOA records, initiate litigation, restrict our ability to sell our properties, impose assessments or arbitrarily change the HOA rules. We may be unaware of or unable to review or comply with HOA rules before purchasing the property and any such excessively restrictive or arbitrary regulations may cause us to sell such property at a loss, prevent us from renting such property or otherwise reduce our cash flow from such property, which would have an adverse effect on our returns on these properties.

Joint venture investments that we make may limit our ability to invest in certain markets and could be adversely affected by our lack of sole decision-making authority, our reliance on joint venture partners' financial condition and disputes between us and our joint venture partners.

We have co-invested, and may continue to co-invest in the future with third parties through partnerships, joint ventures or other entities, acquiring non-controlling interests in or sharing responsibility for managing the affairs of a property, partnership, joint venture or other entity. As a result, we may be subject to restrictions that prohibit us from making investments in certain markets until all of the funds in such partnership, joint venture or other entity are invested or committed, and we would not be in a position to exercise sole decision-making authority regarding the property, partnership, joint venture or other entity which could, among other things, impact our ability to satisfy the REIT requirements. Investments in partnerships, joint ventures or other entities may, under certain circumstances, involve risks not present were a third party not involved, including the possibility that joint venture partners might become bankrupt or fail to fund their share of required capital contributions. Joint venture partners may have economic or other business interests or goals that are inconsistent with our business interests or goals, and may be in a position to take actions contrary to our policies or objectives. Such investments also may have the potential risk of impasses on decisions, such as a sale, because neither we nor the partners would have full control over the partnership or

Table of Contents

joint venture. Disputes between us and our partners may result in litigation or arbitration that would increase our expenses and prevent our officers and/or trustees from focusing their time and effort on our business. Consequently, actions by, or disputes with, partners might result in subjecting properties owned by the partnership or joint venture to additional risk. In addition, we may in certain circumstances be liable for the actions of our third-party partners or co-venturers.

We are involved in a variety of litigation.

We are involved in a range of legal actions in the ordinary course of business. These actions may include eviction proceedings and other landlord tenant disputes, challenges to title and ownership rights (including actions brought by prior owners alleging wrongful foreclosure by their lender or servicer), and issues with local housing officials arising from the condition or maintenance of the property. These actions can be time consuming and expensive. While we intend to vigorously defend any non-meritorious action or challenge, we cannot assure you that we will not be subject to expenses and losses that may adversely affect our operating results.

We may be adversely affected by lawsuits alleging trademark infringement as such lawsuits could materially harm our brand name, reputation and results of operations.

Several other companies in the United States, including companies in the real estate industry, may use words, phrases or logos similar to those we develop as part of our brand. As a result, we may face potential claims that the use of our brand infringes on their existing trademarks. The defense of any trademark infringement claim can be both costly and disruptive of the time and resources of our management, even if the claim against us is without merit. If we are unable to successfully defend against such a claim, we may be required to pay substantial damages or settlement costs to resolve the claim. In addition, we may be required to re-brand or incur substantial marketing costs to revise our brand to avoid future disputes. Any such trademark infringement claims and potential remedial measures could materially harm our brand name, reputation and results of operations.

Our board of trustees has approved a very broad investment policy, subject to management oversight, and does not review or approve each acquisition decision made by the Company.

We are authorized to follow a very broad investment policy established by our board of trustees and subject to oversight by our management. Our board of trustees periodically reviews and updates the investment policy and also reviews our portfolio of residential real estate, but it does not review or approve the Company's specific property acquisitions. In addition, in conducting periodic reviews, our board of trustees may rely primarily on information provided to them by the Company and our management. Furthermore, acquisitions may be costly, difficult or impossible to unwind by the time they are reviewed by our board of trustees. The Company has great latitude within the broad parameters of the investment policy set by our board of trustees in determining our acquisition strategies, which could result in net returns that are substantially below expectations or that result in material losses, which would adversely affect our business and operating results.

If we fail to maintain an effective system of integrated internal controls, we may not be able to accurately report our financial results.

In connection with operating as a public company, we are required to provide reliable financial statements and reports to our shareholders. To monitor the accuracy and reliability of our financial reporting, we have established an internal audit function that oversees our internal controls. In addition, we have developed policies and procedures with respect to company-wide business processes and cycles in order to implement effective internal control over financial reporting. While we have undertaken substantial work to comply with Section 404 of the Sarbanes-Oxley Act of 2002, we cannot be certain that we will be successful in maintaining effective internal control over our financial

Table of Contents

reporting and may determine in the future that our existing internal controls need improvement. If we fail to comply with proper overall controls, we could be materially harmed or we could fail to meet our reporting obligations. In addition, the existence of a material weakness or significant deficiency in our internal controls could result in errors in our financial statements that could require a restatement, cause us to fail to meet our reporting obligations, result in increased costs to remediate any deficiencies, attract regulatory scrutiny or lawsuits and cause investors to lose confidence in our reported financial information, leading to a substantial decline in the market price of our common and preferred shares.

Future debt service obligations could adversely affect our operating results, may require us to sell properties and could adversely affect our ability to make distributions on our preferred and common shares.

Our financing strategy contemplates the use of secured and unsecured debt to finance long-term growth. While we intend to limit the sum of the outstanding principal amount of our consolidated indebtedness to up to 50% of our total assets, our governing documents contain no limitations on the amount of debt that we may incur, and our board of trustees may change our financing strategy at any time without shareholder approval. As a result, we may be able to incur substantial additional debt in the future.

Incurring debt could subject us to many risks, including the risks that:

our cash flows from operations will be insufficient to make required payments of principal and interest;

our debt may increase our vulnerability to adverse economic and industry conditions;

we may be required to dedicate a substantial portion of our cash flows from operations to payments on our debt, thereby reducing cash available for distribution to our shareholders, funds available for operations and capital expenditures, future business opportunities or other purposes;

we violate restrictive covenants in the documents that govern our indebtedness, which would entitle our lenders to accelerate our debt obligations;

refinancing of the debt may not be available on favorable terms or at all; and

the use of leverage could adversely affect our ability to make distributions to our shareholders and the market price of our shares.

If we incur debt in the future and do not have sufficient funds to repay our debt at maturity, it may be necessary to refinance the debt through additional debt or equity financings. If, at the time of any refinancing, prevailing interest rates or other factors result in higher interest rates on refinancings, increases in interest expense could adversely affect our operating results and cash flows and, consequently, cash available for distribution to our shareholders. If we are unable to refinance our debt on acceptable terms, we may be forced to dispose of substantial numbers of properties on disadvantageous terms, potentially resulting in losses. To the extent we cannot meet any future debt service obligations, we will risk losing some or all of our properties that may be pledged to secure our obligations to foreclosure. Any unsecured debt agreements we enter into may contain specific cross-default provisions with respect to specified other indebtedness, giving the unsecured lenders the right to declare a default if we are in default under other loans in some circumstances. Defaults under our debt agreements could materially and adversely affect our financial condition and results of operations.

Table of Contents

Our credit facility and our securitizations contain financial and operating covenants that could restrict our business and investment activities. Failure to satisfy these covenants could result in a default under our credit facility that could accelerate the maturity of our debt obligations or, with respect to our securitizations, also require that all cash flow generated from operations service only the indebtedness and the possible foreclosure of the properties securing the indebtedness, which would have a material adverse effect on our business, liquidity, results of operations and financial condition and our ability to make distributions on our preferred and common shares.

Our credit facility and our securitizations contain financial and operating covenants, such as, with respect to our credit facility, debt ratios, minimum liquidity and adjusted tangible net worth tests and, with respect to our securitizations, a minimum debt yield on the portfolio securing the obligations for our first securitization and a minimum debt service coverage ratio for our second and third securitizations, and other limitations that may restrict our ability to make distributions or other payments to our shareholders and may restrict our investment activities. Among others, our credit facility requires that we maintain financial covenants relating to the following matters: (i) cash, cash equivalents and borrowing capacity under any credit facilities in an aggregate amount of at least \$15,000,000, of which at least \$7,500,000 must be in cash and cash equivalents; (ii) a maximum leverage ratio of 1.0 to 1.0; and (iii) adjusted tangible net worth of not less than 85% of our adjusted tangible net worth as of September 30, 2013, plus 85% of the net proceeds of any additional equity capital raises completed on or after September 30, 2013. Our securitizations require, among other things, that a cash management account controlled by the lender collect all rents and cash generated by the properties securing the portfolio. Upon the occurrence of an event of default or failure to satisfy the required minimum debt yield or debt service coverage ratio, the lender may apply any excess cash as the lender elects, including prepayment of principal and amounts due under the loans. These covenants may restrict our ability to engage in transactions that we believe would otherwise be in the best interests of our shareholders. Further, such restrictions could make it difficult for us to satisfy the requirements necessary to maintain our qualification as a REIT for U.S. federal income tax purposes. Failure to meet our financial covenants could result from, among other things, changes in our results of operations, the incurrence of additional debt, substantial impairments in the value of our properties or changes in general economic conditions. If we violate covenants in our credit facility, securitizations or future agreements, we could be required to repay all or a portion of our indebtedness before maturity at a time when we might be unable to arrange financing for such repayment on attractive terms, or at all.

Our credit facility permits us to incur significant indebtedness, which could require that we generate significant cash flow to satisfy the payment and other obligations under our credit facility.

We may incur significant indebtedness in connection with draws under our credit facility. This indebtedness may exceed our cash on hand and/or our cash flows from operating activities. Our ability to meet the payment and other obligations under our credit facility depends on our ability to generate sufficient cash flow in the future. Our ability to generate cash flow, to some extent, is subject to general economic, financial, competitive, legislative and regulatory factors, as well as other factors that are beyond our control. It is possible that our business will not generate cash flow from operations, or that future borrowings will be available to us, in amounts sufficient to enable us to meet our payment obligations under our credit facility. If we are not able to generate sufficient cash flow to service our credit facility and other debt obligations, as well as satisfy the REIT distribution requirement, we may need to refinance or restructure our debt, reduce or delay capital investments, or seek to raise additional capital. If we are unable to implement one or more of these alternatives, we may not be able to meet our payment obligations under our credit facility, which could materially and adversely affect our liquidity.

Table of Contents

We have and expect to continue to utilize non-recourse long-term securitizations, and such structures may expose us to risks, which could result in losses to us.

We have and expect to continue to utilize non-recourse long-term securitizations of pools of homes which we own, if and when they become available and to the extent consistent with the maintenance of our REIT qualification, in order to generate cash for funding new investments. These securitizations involve conveying a pool of homes from the Company's portfolio to a special purpose vehicle which obtains a loan from a third-party lender represented by a promissory note. The promissory note is immediately transferred by the third-party lender to a subsidiary of the Company and then to a REMIC trust in exchange for classes of single-family rental pass-through certificates representing all the beneficial ownership interests in the loan and the trust. Upon receipt of the certificates, the subsidiary of the Company sells the certificates to investors. The securitization of our pools of homes in our portfolio investments can magnify our exposure to losses on those investments because any equity interest we retain in the issuing entity would be subordinate to the certificates issued to investors and we would, therefore, absorb all of the losses sustained with respect to a securitized pool of assets before the investors experience any losses. In addition, accounting rules for securitizations are complex and involve significant judgment and assumptions. These complexities and possible changes in accounting rules, interpretations or our assumptions could undermine our ability to prepare timely and accurate financial statements. Moreover, we cannot be assured that we will be able to access the securitization market, or be able to do so at favorable rates. The inability to consummate securitizations of our portfolio to finance our investments on a long-term basis could require us to seek other forms of potentially less attractive financing or to liquidate assets at an inopportune time or price, which could adversely affect our performance and our ability to grow our business.

Disruptions in the financial markets may materially and adversely affect our ability to secure additional financing.

The credit markets continue to experience significant price volatility, dislocations and liquidity disruptions, the concern of which has led many lenders and institutional investors to reduce, and in some cases cease, to provide credit to businesses and has caused spreads on prospective debt financings to widen considerably. Continued uncertainty in these markets may affect our ability to obtain additional debt financing at all or on terms favorable or acceptable to us. These events also may make it more difficult or costly for us to raise capital through the issuance of our equity securities. Our inability to secure additional financing may impede our ability to acquire new properties. Disruptions in the financial markets could have a material adverse effect on us, including our business, results of operations and our financial condition.

Interest expense on our debt may limit our cash available to fund our growth strategies and shareholder distributions.

Higher interest rates could increase debt service requirements on our floating rate debt and could reduce funds available for operations, distributions to our shareholders, future business opportunities or other purposes. If we need to repay existing debt during periods of rising interest rates, we could be required to liquidate one or more of our investments in properties at times which may not permit realization of the maximum return on such investments and could result in significant losses.

Failure to hedge effectively against interest rate changes may adversely affect our results of operations and our ability to make shareholder distributions.

Subject to complying with the requirements for REIT qualification, we may continue to obtain in the future one or more forms of interest rate protection in the form of swap agreements, interest rate cap contracts or similar agreements to hedge against the possible negative effects of interest rate fluctuations. However, we cannot assure you that any hedging will adequately relieve the adverse effects

Table of Contents

of interest rate increases or that counterparties under these agreements will honor their obligations thereunder. In addition, we may be subject to risks of default by hedging counterparties. Adverse economic conditions could also cause the terms on which we borrow to be unfavorable. We could be required to liquidate one or more of our investments at times which may not permit us to receive an attractive return on our investments in order to meet our debt service obligations.

Conversions of financial and property management systems involve risks that may result in business disruption.

We recently transitioned to a new financial and property management software system, which may result in disruption to our business operations due to data input errors, system incompatibilities and delays in obtaining and processing information. While most system conversions result in temporary inefficiencies during the period of transition, in the event we experience an extended or pervasive interruption of operations, our business could be adversely affected.

Risks Related to the Real Estate Industry

Our performance and the value of our properties are subject to general economic conditions and risks associated with our real estate assets.

If the properties we acquire do not generate income sufficient to meet operating expenses, including debt service and capital expenditures, our ability to make distributions to our shareholders could be adversely affected. There are significant expenditures associated with an investment in real estate (such as debt service, real estate taxes, insurance and maintenance costs) that generally do not decline when circumstances reduce the income from the property. Income from and the value of the properties we acquire may be adversely affected by the following factors:

downturns in international, national, regional and local economic conditions (particularly increases in unemployment);

the attractiveness of the properties we acquire to potential tenants and competition from other properties;

increases in the supply of or decreases in the demand for similar or competing properties in our target markets;

bankruptcies, financial difficulties or lease defaults by our tenants;

changes in interest rates, availability and terms of debt financing;

changes in operating costs and expenses and our ability to control rents;

changes in, or increased costs of compliance with, governmental laws, rules, regulations and fiscal policies, including changes in tax, real estate, environmental and zoning laws, and our potential liability thereunder;

our ability to provide adequate maintenance;

changes in the cost or availability of insurance, including coverage for mold or asbestos;

environmental conditions or retained liabilities for such conditions;

Edgar Filing: American Homes 4 Rent - Form 10-K

tenant turnover;

the illiquidity of real estate investments generally;

residents' perceptions of the safety, convenience and attractiveness of our properties and the neighborhoods where they are acquired;

Table of Contents

the ongoing need for capital improvements, particularly in older properties;

the ability or unwillingness of residents to pay rent increases;

civil unrest, acts of God, including earthquakes, floods and other natural disasters, which may result in uninsured losses, and acts of war or terrorism;

rent control or rent stabilization or other housing laws, which could prevent us from raising rents; and

increases in property-level maintenance and operating expenses.

For these and other reasons, we cannot assure you that we will be profitable or that we will realize growth in the value of our real estate properties.

Environmentally hazardous conditions may adversely affect our financial condition, cash flows and operating results.

Under various federal, state and local environmental laws, a current or previous owner or operator of real property may be liable for the cost of removing or remediating hazardous or toxic substances on such property. Such laws often impose liability whether or not the owner or operator knew of, or was responsible for, the presence of such hazardous or toxic substances. Even if more than one person may have been responsible for the contamination, each person covered by applicable environmental laws may be held responsible for all of the clean-up costs incurred. In addition, third parties may sue the owner or operator of a site for damages based on personal injury, natural resources or property damage or other costs, including investigation and clean-up costs, resulting from the environmental contamination. The presence of hazardous or toxic substances on one of our properties, or the failure to properly remediate a contaminated property, could give rise to a lien in favor of the government for costs it may incur to address the contamination, or otherwise adversely affect our ability to sell or lease the property or borrow using the property as collateral. Environmental laws also may impose restrictions on the manner in which property may be used or businesses may be operated. A property owner who violates environmental laws may be subject to sanctions which may be enforced by governmental agencies or, in certain circumstances, private parties. In connection with the acquisition and ownership of our properties, we may be exposed to such costs. The cost of defending against environmental claims, of compliance with environmental regulatory requirements or of remediating any contaminated property could materially adversely affect our business, financial condition, results of operations and, consequently, amounts available for distribution to our shareholders.

Compliance with new or more stringent environmental laws or regulations or stricter interpretation of existing laws may require material expenditures by us. We may be subject to environmental laws or regulations relating to our properties, such as those concerning lead-based paint, mold, asbestos, proximity to power lines or other issues. We cannot assure you that future laws, ordinances or regulations will not impose any material environmental liability, or that the current environmental condition of our properties will not be affected by the operations of residents, existing conditions of the land, operations in the vicinity of the properties or the activities of unrelated third parties. In addition, we may be required to comply with various local, state and federal fire, health, life-safety and similar regulations. Failure to comply with applicable laws and regulations could result in fines and/or damages, suspension of personnel, civil liability and/or other sanctions.

Tenant relief laws and rent control laws may negatively impact our rental income and profitability.

As landlord of numerous properties, we are involved regularly in evicting tenants who are not paying their rent or are otherwise in material violation of the terms of their lease. Eviction activities impose legal and managerial expenses that raise our costs. The eviction process is typically subject to legal barriers, mandatory "cure" policies and other sources of expense and delay, each of which may

Table of Contents

delay our ability to gain possession and stabilize the property. Additionally, state and local landlord tenant laws may impose legal duties to assist tenants in relocating to new housing, or restrict the landlord's ability to recover certain costs or charge tenants for damage tenants cause to the landlord's premises. Because such laws vary by state and locality, we and any regional and local property managers we hire will need to be familiar with and take all appropriate steps to comply with all applicable landlord tenant laws, and we will need to incur supervisory and legal expenses to ensure such compliance. To the extent that we do not comply with state or local laws, we may be subjected to civil litigation filed by individuals, in class actions or by state or local law enforcement. We may be required to pay our adversaries' litigation fees and expenses if judgment is entered against us in such litigation, or if we settle such litigation.

Furthermore, rent control laws may affect our rental income. Especially in times of recession and economic slowdown, rent control initiatives can acquire significant political support. If rent controls unexpectedly became applicable to certain of our properties, our revenue from and the value of such properties could be adversely affected.

Class action, tenant rights and consumer demands, litigation and adverse media publicity could directly limit and constrain our operations and may result in significant litigation expenses.

Numerous tenants' rights and consumers' rights organizations exist throughout the country and operate in our target markets, and as we grow in scale, we may attract attention from some of these organizations and become a target of legal demands, litigation and adverse media publicity. Many such consumer organizations have become more active and better funded in connection with mortgage foreclosure-related issues, and with the large settlements identified below in the risk factor entitled "Mortgage loan modification programs and future legislative action may adversely affect the number of available properties that meet our investment criteria" and the increased market for single-family rentals arising from displaced homeownership, some of these organizations may shift their litigation, lobbying, media efforts, fundraising and grass roots organizing activities to focus on landlord tenant issues. While we intend to conduct our business lawfully and in compliance with applicable landlord-tenant and consumer laws, such organizations might work in conjunction with trial and pro bono lawyers in one state or multiple states to attempt to bring claims against us on a class action basis for damages or injunctive relief and to seek to publicize our activities in a negative light. We cannot anticipate what form such legal actions might take, or what remedies they may seek. Additionally, these organizations may lobby local county and municipal attorneys or state attorneys general to pursue enforcement or litigation against us, may lobby state and local legislatures to pass new laws and regulations to constrain our business operations or may generate unfavorable publicity for our business. If they are successful in any such endeavors, they could directly limit and constrain our operations, adversely impact our business and may impose on us significant litigation expenses, including settlements to avoid continued litigation or judgments for damages or injunctions.

Acquiring properties during periods when the single-family home sector is experiencing substantial inflows of capital and intense competition may result in inflated purchase prices and increase the likelihood that our properties will not appreciate in value and may, instead, decrease in value.

The allocation of substantial amounts of capital for investment in the single-family home sector and significant competition for income producing real estate may inflate the purchase prices for such assets. To the extent we purchased, or in the future purchase, real estate in such an environment, it is possible that the value of our properties may not appreciate and may, instead, decrease in value, perhaps significantly, below the amount we paid for such properties. In addition to macroeconomic and local economic factors, technical factors, such as a decrease in the amount of capital allocated to the single-family home sector and the number of investors participating in the sector, could cause the value of our properties to decline.

Table of Contents

Mortgage loan modification programs and future legislative action may adversely affect the number of available properties that meet our investment criteria.

The U.S. government, through the Federal Reserve, the FHA and the Federal Deposit Insurance Corporation, or FDIC, has implemented a number of programs designed to provide homeowners with assistance in avoiding residential mortgage loan foreclosures, including the Home Affordable Modification Program, which seeks to provide relief to homeowners whose mortgages are in or may be subject to foreclosure, and the Home Affordable Refinance Program, which allows certain borrowers who are underwater on their mortgage but current on their mortgage payments to refinance their loans. Several states, including states in which our current target markets are located, have adopted or are considering similar legislation. These programs and other loss mitigation programs may involve, among other things, modifying or refinancing mortgage loans or providing homeowners with additional relief from loan foreclosures. Such loan modifications and other measures are intended and designed to lead to fewer foreclosures, which will decrease the supply of properties that meet our investment criteria.

The pace of residential foreclosures is subject to numerous factors. Recently, there has been a backlog of foreclosures due to a combination of volume constraints and legal actions, including those brought by the U.S. Department of Justice, or DOJ, the Department of Housing and Urban Development, or HUD, and State Attorneys General against mortgage servicers alleging wrongful foreclosure practices. Financial institutions also have been subjected to regulatory restrictions and limitations on foreclosure activity by the FDIC. Legal claims brought or threatened by DOJ, HUD and 49 State Attorneys General against the five largest residential mortgage servicers in the country were settled in 2012 for \$25 billion. In 2013, the DOJ announced the settlement of a legal claim relating to mortgage backed securities with J.P. Morgan Chase & Co. for \$13 billion. Settlements such as these help homeowners avoid foreclosure through mortgage modifications, and servicers are often required to adopt specified measures to reduce mortgage obligations in certain situations. It is expected that settlements such as these will help many homeowners to avoid foreclosures that would otherwise have occurred in the near term, and with lower monthly payments and mortgage debts, for years to come. It is also foreseeable that other residential mortgage servicing companies will agree to similar settlements that will further reduce the supply of houses in the process of foreclosure.

In addition, numerous federal and state legislatures have considered, proposed or adopted legislation to constrain foreclosures, or may do so in the future. The Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, also created the Consumer Financial Protection Bureau, which supervises and enforces federal consumer protection laws as they apply to banks, credit unions, and other financial companies, including mortgage servicers. It remains uncertain as to whether any of these measures will have a significant impact on foreclosure volumes or what the timing of that impact would be. If foreclosure volumes were to decline significantly, we would expect REO inventory levels to decline or to grow at a slower pace, which would make it more difficult to find target assets at attractive prices and might constrain our growth or reduce our long-term profitability. Also, the number of families seeking rental housing might be reduced by such legislation, reducing rental housing demand in our target markets.

We may have difficulty selling our real estate investments, and our ability to distribute all or a portion of the net proceeds from such sale to our shareholders may be limited.

Real estate investments are relatively illiquid and, as a result, we may have a limited ability to sell our properties. When we sell any of our properties, we may recognize a loss on such sale. We may elect not to distribute any proceeds from the sale of properties to our shareholders. Instead, we may use such proceeds for other purposes, including:

purchasing additional properties;

repaying debt, if any;

Table of Contents

buying out interests of any co-venturers or other partners in any joint venture in which we are a party;

creating working capital reserves; or

making repairs, maintenance or other capital improvements or expenditures to our remaining properties.

Our ability to sell our properties may also be limited by our need to avoid the 100% prohibited transactions tax that is imposed on gain recognized by a REIT from the sale of property characterized as dealer property. In order to ensure that we avoid such characterization, we may be required to hold our properties for a minimum period of time and comply with certain other requirements in the Code or dispose of our properties through a TRS.

Risks Related to our Relationship with AH LLC and Conflicts of Interest

Completion of the internalization of activities previously handled by AH LLC has exposed us to new and additional responsibilities, costs and risks.

The completion of the Management Internalization in June 2013 and the internalization of acquisition and renovation activities previously handled by AH LLC exposed us to new and additional responsibilities, costs and risks. For example, while we no longer bear the external costs of the advisory management fee paid to the Advisor, our direct overhead increased, as we became responsible for compensation and benefits of our officers and other personnel that were previously paid by the Advisor. If our properties do not perform as anticipated or if we fail to raise additional financing, we may not be able to cover such additional overhead. We also now are subject to those potential liabilities that are commonly faced by employers, such as workers disability and compensation claims, potential labor disputes and other employee-related liabilities and grievances. Although we anticipate the internalization of AH LLC's acquisition and renovation activities to be cash flow positive to the Company, we expect a larger portion of the related costs to be expensed in accordance with GAAP, compared to the 5% acquisition and renovation fee previously paid to AH LLC, which was primarily capitalized and included in the cost basis of our single-family properties. Accordingly, the internalization of these activities could adversely affect our financial condition and operating results.

Our fiduciary duties as the general partner of our operating partnership could create conflicts of interest, which may impede business decisions that could benefit our shareholders.

As the sole general partner of our operating partnership, we have a fiduciary duty to the other limited partners in the operating partnership, the discharge of which may conflict with the interests of our shareholders. AH LLC, as the limited partner of our operating partnership, has agreed that, in the event of a conflict in the fiduciary duties owed by us to our shareholders and in our capacity as the general partner of our operating partnership, to such limited partner, we are under no obligation to give priority to the interests of such limited partner.

In addition, AH LLC, as well as any other limited partners, has the right to vote on certain amendments to the operating partnership agreement and to approve certain amendments that would adversely affect their rights. These voting rights may be exercised in a manner that conflicts with the interests of our shareholders.

Table of Contents

The contribution agreement and other agreements we entered into in connection with the Management Internalization were negotiated between a special committee of our board of trustees and AH LLC. Therefore, the terms of such agreements may not have been as favorable to us as if they had been negotiated with unaffiliated third parties.

AH LLC is owned, directly or indirectly, by family members or trusts for family members or heirs of B. Wayne Hughes, our non-executive Chairman, David P. Singelyn, our Chief Executive Officer and a trustee, Jack Corrigan, our Chief Operating Officer and a trustee, David Goldberg, our Executive Vice President, and other parties. HF Investments 2010, LLC, which is comprised of trusts established by Mr. Hughes for certain of his heirs, owns an approximately 88.66% membership interest in AH LLC. Additionally, membership interests of AH LLC are owned by family members or trusts for family members of Mr. Singelyn (4.93% membership interest), Mr. Corrigan (4.93% membership interest) and Mr. Goldberg (1% membership interest). Accordingly, such trustees and executive officers received substantial economic benefits as a result of the Management Internalization. As a result of the foregoing, the interests of certain of our trustees and executive officers may differ from, and be in conflict with, the interests of our shareholders. The contribution agreement and other agreements we entered into in connection with the Management Internalization were negotiated between a special committee comprised of all of our independent trustees and AH LLC, and their terms, including the consideration payable to AH LLC, may not be as favorable to us as if they had been negotiated with unaffiliated third parties. In addition, we did not obtain a third-party appraisal of the Advisor or the Property Manager.

If we determine that AH LLC breached any of the representations, warranties or covenants made by it in the contribution agreement related to the Management Internalization, we may choose not to enforce, or to enforce less vigorously, our rights because of our desire to maintain our ongoing relationship with AH LLC. Moreover, the representations, warranties, covenants and indemnities in the contribution agreement are subject to limits and qualifiers, which may also limit our ability to enforce any remedy under the agreement.

Messrs. Hughes, Singelyn, Corrigan and Goldberg are subject to certain conflicts of interest with regard to enforcing the indemnification provisions contained in the contribution agreement for the Management Internalization and enforcing some of the ancillary agreements to be entered into by us in connection with the Management Internalization.

Messrs. Hughes, Singelyn, Corrigan and Goldberg received beneficial economic interests in our operating partnership's Series D units and Series E units through their direct or indirect interests in AH LLC, which received 4,375,000 Series D units and 4,375,000 Series E units as a result of the Management Internalization. Certain provisions of the contribution agreement and the ancillary agreements executed in connection with the Management Internalization may have significant financial impacts on AH LLC. In particular, Messrs. Hughes, Singelyn, Corrigan and Goldberg are subject to conflicts of interest in connection with the enforcement against AH LLC of indemnification obligations under the contribution agreement and other transaction documents that could directly impact their or their family's economic interests.

AH LLC may engage in activities that divert their attention from our business, which could adversely affect the execution of our business and our results of operations.

We are subject to conflicts of interest arising out of our relationship with AH LLC. AH LLC and its affiliates, officers, directors, employees or personnel may engage in any business (other than acquiring, renovating, leasing and operating single-family homes as rental properties without the approval of the board of trustees). As a result, their time and effort may be diverted from our business.

Table of Contents

Risks Related to Our Organization and Structure

Provisions of our declaration of trust may limit the ability of a third party to acquire control of us by authorizing our board of trustees to issue additional securities.

Our board of trustees may, without shareholder approval, amend our declaration of trust to increase or decrease the aggregate number of our shares or the number of shares of any class or series that we have the authority to issue and to classify or reclassify any unissued common or preferred shares, and set the preferences, rights and other terms of the classified or reclassified shares. As a result, our board of trustees may authorize the issuance of additional shares or establish a series of common or preferred shares that may delay or prevent a change in control of our company, including transactions at a premium over the market price of our shares, even if shareholders believe that a change in control is in their interest. These provisions, along with the restrictions on ownership and transfer contained in our declaration of trust and certain provisions of Maryland law, could discourage unsolicited acquisition proposals or make it more difficult for a third party to gain control of us, which could adversely affect the market price of our securities.

Provisions of Maryland law may limit the ability of a third party to acquire control of us by requiring our board of trustees or shareholders to approve proposals to acquire our company or effect a change in control.

Certain provisions of the Maryland General Corporation Law, or the MGCL, applicable to Maryland real estate investment trusts may have the effect of inhibiting a third party from making a proposal to acquire us or of impeding a change in control under circumstances that otherwise could provide our shareholders with the opportunity to realize a premium over the then-prevailing market price of their shares, including:

"business combination" provisions that, subject to limitations, prohibit certain business combinations between us and an "interested shareholder" (defined generally as any person who beneficially owns 10% or more of the voting power of our outstanding voting shares or an affiliate or associate of ours who, at any time within the two-year period immediately prior to the date in question, was the beneficial owner of 10% or more of the voting power of our then outstanding shares) or an affiliate of any interested shareholder for five years after the most recent date on which the shareholder becomes an interested shareholder, and thereafter imposes two super-majority shareholder voting requirements on these combinations, unless, among other conditions, our common shareholders receive a minimum price, as defined in the MGCL, for their shares and the consideration is received in cash or in the same form as previously paid by the interested shareholder for its shares; and

"control share" provisions that provide that our "control shares" (defined as voting shares which, when aggregated with all other shares controlled by the shareholder, entitle the shareholder to exercise one of three increasing ranges of voting power in electing trustees) acquired in a "control share acquisition" (defined as the direct or indirect acquisition of ownership or control of issued and outstanding "control shares") have no voting rights except to the extent approved by our shareholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding shares owned by the acquirer, by our officers or by our employees who are also trustees of our company.

By resolution of our board of trustees, we have opted out of the business combination provisions of the MGCL and provided that any business combination between us and any other person is exempt from the business combination provisions of the MGCL, provided that the business combination is first approved by our board of trustees (including a majority of trustees who are not affiliates or associates of such persons). In addition, pursuant to a provision in our bylaws, we have opted out of the control share provisions of the MGCL. However, our board of trustees may by resolution elect to opt in to the

Table of Contents

business combination provisions of the MGCL and we may, by amending our bylaws, opt in to the control share provisions of the MGCL in the future.

In addition, the "unsolicited takeover" provisions of Title 3, Subtitle 8 of the MGCL permit our board of trustees, without shareholder approval and regardless of what is currently provided in our declaration of trust or bylaws, to implement certain takeover defenses, including adopting a classified board or increasing the vote required to remove a trustee. Such takeover defenses may have the effect of inhibiting a third party from making an acquisition proposal for us or of delaying, deferring or preventing a change in control of us under the circumstances that otherwise could provide our common shareholders with the opportunity to realize a premium over the then-current market price. In July 2013, our board of trustees and our shareholders approved an amendment to our declaration of trust under which we will elect not to be subject to these provisions.

Our rights and the rights of our shareholders to take action against our trustees and officers are limited, which could limit your recourse in the event of actions not in your best interests.

Under Maryland law, generally, a trustee will not be liable if he or she performs his or her duties in good faith, in a manner he or she reasonably believes to be in our best interests and with the care that an ordinarily prudent person in a like position would use under similar circumstances. In addition, our declaration of trust limits the liability of our trustees and officers to us and our shareholders for money damages, except for liability resulting from:

actual receipt of an improper benefit or profit in money, property or services; or

active and deliberate dishonesty by the trustee or officer that was established by a final judgment as being material to the cause of action adjudicated.

Our declaration of trust authorizes us to indemnify our trustees and officers for actions taken by them in those capacities to the maximum extent permitted by Maryland law. Our bylaws require us to indemnify each trustee and officer, to the maximum extent permitted by Maryland law, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service to us. In addition, we may be obligated to advance the defense costs incurred by our trustees and officers. As a result, we and our shareholders may have more limited rights against our trustees and officers than might otherwise exist absent the current provisions in our declaration of trust and bylaws or that might exist with other companies.

Our board of trustees may change our strategy or investment policies, financing strategy or leverage policies without shareholder consent.

Our board of trustees may change any of our strategies, policies or procedures with respect to property acquisitions and divestitures, asset allocation, growth, operations, indebtedness, financing and distributions at any time without the consent of shareholders, which could result in the acquisition of properties that are different from, and possibly riskier than, the types of single-family residential real estate investments that we have historically acquired. These changes could adversely affect our financial condition, risk profile, results of operations, the market price of our common and preferred shares and our ability to make distributions to shareholders.

The ability of our board of trustees to revoke our REIT election without shareholder approval may cause adverse consequences to our shareholders.

Our declaration of trust provides that our board of trustees may revoke or otherwise terminate our REIT election, without the approval of our shareholders, if it determines that it is no longer in our best interest to continue to qualify as a REIT. If we cease to be a REIT, we would become subject to U.S. federal income tax on our taxable income and would no longer be required to distribute most of

Table of Contents

our taxable income to our shareholders, which may have adverse consequences on the total return to our shareholders.

Risks Related to Qualification and Operation as a REIT

Qualifying as a REIT involves highly technical and complex provisions of the Code.

Qualification as a REIT involves the application of highly technical and complex Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent violation could jeopardize our REIT qualification. Our qualification as a REIT depends upon our satisfaction of certain asset, income, organizational, distribution, shareholder ownership and other requirements on a continuing basis. New legislation, court decisions or administrative guidance, in each case possibly with retroactive effect, may make it more difficult or impossible for us to qualify as a REIT. Certain rules applicable to REITs are particularly difficult to interpret or to apply in the case of REITs investing in real estate mortgage loans that are acquired at a discount, subject to work-outs or modifications, or reasonably expected to be in default at the time of acquisition. In addition, our ability to satisfy the requirements to qualify as a REIT depends in part on the actions of third parties over which we have no control or only limited influence, including in cases where we own an equity interest in an entity that is classified as a partnership for U.S. federal income tax purposes.

Complying with REIT requirements may limit our ability to hedge effectively and may cause us to incur tax liabilities.

The REIT provisions of the Code may limit our ability to hedge our assets and operations. Under these provisions, any income that we generate from transactions intended to hedge our interest rate risk will be excluded from gross income for purposes of the REIT 75% and 95% gross income tests if the instrument hedges interest rate risk on liabilities used to carry or acquire real estate assets or manages the risk of certain currency fluctuations, and such instrument is properly identified under applicable Treasury Regulations. Income from hedging transactions that do not meet these requirements will generally constitute non-qualifying income for purposes of both the REIT 75% and 95% gross income tests. As a result of these rules, we may have to limit our use of hedging techniques that might otherwise be advantageous or implement those hedges through a TRS. This could increase the cost of our hedging activities because our TRS would be subject to tax on gains or expose us to greater risks associated with changes in interest rates than we would otherwise want to bear. In addition, losses in our TRS will generally not provide any tax benefit, except for being carried back or forward against past or future taxable income in the TRS.

Complying with the REIT requirements may cause us to forgo and/or liquidate otherwise attractive investments.

To qualify as a REIT, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts that we distribute to our shareholders and the ownership of our shares. To meet these tests, we may be required to take or forgo taking actions that we would otherwise consider advantageous. For instance, in order to satisfy the gross income or asset tests applicable to REITs under the Code, we may be required to forgo investments that we otherwise would make. Furthermore, we may be required to liquidate from our portfolio otherwise attractive investments. In addition, we may be required to make distributions to shareholders at disadvantageous times or when we do not have funds readily available for distribution. These actions could reduce our income and amounts available for distribution to our shareholders. Thus, compliance with the REIT requirements may hinder our investment performance.

Table of Contents

Failure to qualify as a REIT, or failure to remain qualified as a REIT, would cause us to be taxed as a regular corporation, which would substantially reduce funds available for distribution to our shareholders.

We believe that we have been organized and have operated in conformity with the requirements for qualification and taxation as a REIT and that our current organization and proposed method of operation will enable us to continue to qualify as a REIT. However, we have not requested and do not intend to request a ruling from the Internal Revenue Service, or the IRS, that we qualify as a REIT. As a result, we cannot assure you that we qualify or that we will remain qualified as a REIT.

If we fail to qualify as a REIT in any taxable year, and we do not qualify for certain statutory relief provisions, we will face serious tax consequences that will substantially reduce the funds available for distributions to our shareholders because:

we would not be allowed a deduction for dividends paid to shareholders in computing our taxable income and would be subject to U.S. federal income tax at regular corporate rates;

we could be subject to the federal alternative minimum tax and possibly increased state and local taxes; and

unless we are entitled to relief under certain U.S. federal income tax laws, we could not re-elect REIT status until the fifth calendar year after the year in which we failed to qualify as a REIT.

In addition, if we fail to qualify as a REIT, we will no longer be required to make distributions and may choose to deploy available cash in a different manner. As a result of all these factors, our failure to qualify as a REIT could impair our ability to expand our business and raise capital, and it would adversely affect the value of our shares.

In connection with the Beazer Rental Homes Acquisition, we may incur adverse tax consequences if Beazer Rental Homes failed to qualify as a REIT before the Beazer Rental Homes Acquisition.

On July 1, 2014, Beazer Rental Homes merged into our wholly owned subsidiary in exchange for 8,158,001 Class A common shares, \$5.0 million of cash to be held in an indemnification escrow and extinguishment of certain liabilities of Beazer Rental Homes. Beazer Rental Homes believed that it was organized and operated in conformity with the requirements for qualification and taxation as a REIT, but Beazer Rental Homes did not request a ruling from the IRS that it qualified as a REIT. Qualification as a REIT involves the application of highly technical and complex Code provisions for which there are only limited judicial and administrative interpretations. The determination of various factual matters and circumstances not entirely within the control of Beazer Rental Homes may have affected its ability to qualify as a REIT. In order to qualify as a REIT, Beazer Rental Homes had to satisfy a number of requirements, including requirements regarding the ownership of its stock and the composition of its gross income and assets. Also, Beazer Rental Homes was required to make distributions to stockholders aggregating annually at least 90% of its net taxable income, excluding any net capital gains. Even if we retain our REIT status, if Beazer Rental Homes failed to qualify as a REIT for a taxable year before the Beazer Rental Homes Acquisition, we could face adverse tax consequences that could materially adversely affect the value of our shares, impair our ability to expand our business and raise capital, and substantially reduce our cash available for distribution, including cash available to pay dividends to our shareholders, because:

we, as the successor by merger to Beazer Rental Homes, would be subject to any corporate income tax liabilities of Beazer Rental Homes, including penalties and interest;

assuming that we otherwise maintained our REIT qualification, we would be subject to tax on the built-in gain on each asset of Beazer Rental Homes existing at the time of the Beazer Rental Homes Acquisition if we were to dispose of the Beazer Rental Homes asset within ten years following the Beazer Rental Homes Acquisition;

Table of Contents

assuming that we otherwise maintained our REIT qualification, we would succeed to any earnings and profits accumulated by Beazer Rental Homes for taxable periods that it did not qualify as a REIT, and we would have to pay a special dividend and/or employ applicable deficiency dividend procedures (including interest payments to the IRS) to eliminate such earnings and profits; and

depending on the reason for Beazer Rental Homes losing its REIT status, we may elect to use the deficiency dividend procedure in order to maintain our REIT status, which may require us to make distributions (and pay interest to the IRS).

Even if we qualify as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes. In addition, we could, in certain circumstances, be required to pay an excise or penalty tax (which could be significant in amount) in order to utilize one or more relief provisions under the Code to maintain our qualification as a REIT. Any of these taxes would decrease cash available for distribution to our shareholders. In addition, in order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we hold some of our assets through a TRS or other subsidiary corporations that are subject to corporate-level income tax at regular rates. Our TRS may have tax liability with respect to "phantom income" if it is treated as a "dealer" for U.S. federal income tax purposes which would require the TRS to mark to market its assets at the end of each taxable year. In addition, our TRS is subject to federal, state and local corporate taxes. Any of these taxes would decrease cash available for distribution to our shareholders.

Failure to make required distributions would subject us to U.S. federal corporate income tax.

We believe that we have operated and we intend to continue to operate in a manner so as to qualify as a REIT for U.S. federal income tax purposes. In order to qualify as a REIT, we generally are required to distribute at least 90% of our "REIT taxable income," determined without regard to the dividends paid deduction and excluding any net capital gain, each year to our shareholders. To the extent that we satisfy this distribution requirement, but distribute less than 100% of our REIT taxable income, we will be subject to U.S. federal corporate income tax on our undistributed net taxable income. In addition, we will be subject to a 4% nondeductible excise tax if the actual amount that we pay out to our shareholders in a calendar year is less than a minimum amount specified under the Code. We intend to continue to make distributions to our shareholders to comply with the REIT requirements of the Code.

Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends, which could adversely affect the value of our shares if they are perceived as less attractive investments.

The maximum rate applicable to "qualified dividend income" paid by regular "C" corporations to U.S. shareholders that are individuals, trusts and estates generally is 20%. Dividends payable by REITs, however, generally are not eligible for the current reduced rate, except to the extent that certain holding requirements have been met and a REIT's dividends are attributable to dividends received by a REIT from taxable corporations (such as a REIT's taxable REIT subsidiaries), to income that was subject to tax at the REIT/corporate level, or to dividends properly designated by the REIT as "capital gains dividends." Although the reduced rates applicable to dividend income from regular "C" corporations do not adversely affect the taxation of REITs or dividends payable by REITs, it could cause investors who are non-corporate taxpayers to perceive investments in REITs to be relatively less

Table of Contents

attractive than investments in the shares of regular "C" corporations that pay dividends, which could adversely affect the value of our shares.

The prohibited transactions tax may limit our ability to engage in sale transactions.

A REIT's income from "prohibited transactions" is subject to a 100% tax. In general, "prohibited transactions" are sales or other dispositions of property other than foreclosure property, held primarily for sale to customers in the ordinary course of business. We may be subject to the prohibited transactions tax equal to 100% of net gain upon a disposition of real property or debt instruments that we hold. Although a safe harbor to the characterization of the sale of property by a REIT as a prohibited transaction is available, we cannot assure you that we can comply with the safe harbor or that we will avoid owning property that may be characterized as held primarily for sale to customers in the ordinary course of business. Consequently, we may choose not to engage in certain sales of our properties or debt instruments or we may conduct such sales through our TRS, which would be subject to U.S. federal and state income taxation. In addition, we may have to sell numerous properties to a single or a few purchasers, which could cause us to be less profitable than would be the case if we sold properties on a property-by-property basis. For example, if we decide to acquire properties or debt instruments opportunistically to renovate in anticipation of immediate resale, we will need to conduct that activity through our TRS to avoid the 100% prohibited transactions tax.

The 100% tax described above may limit our ability to enter into transactions that would otherwise be beneficial to us. For example, if circumstances make it profitable or otherwise uneconomical for us to remain in certain states or geographical markets, the 100% tax could delay our ability to exit those states or markets by selling our assets in those states or markets other than through a TRS, which could harm our operating profits and the trading price of our shares. In addition, in order to avoid the prohibited transactions tax, we may be required to limit the structures we utilize for our securitization transactions, even though the sales or structures might otherwise be beneficial to us.

If the operating partnership fails to qualify as a partnership for U.S. federal income tax purposes, we could fail to qualify as a REIT and suffer other adverse consequences.

We believe that our operating partnership is organized and operated in a manner so as to be treated as a partnership and not an association or a publicly traded partnership taxable as a corporation, for U.S. federal income tax purposes. As a partnership, our operating partnership is not subject to U.S. federal income tax on its income. Instead, each of the partners is allocated its share of our operating partnership's income. No assurance can be provided, however, that the IRS will not challenge our operating partnership's status as a partnership for U.S. federal income tax purposes, or that a court would not sustain such a challenge. If the IRS were successful in treating our operating partnership as an association or publicly traded partnership taxable as a corporation for U.S. federal income tax purposes, we would fail to meet the gross income tests and certain of the asset tests applicable to REITs and, accordingly, would cease to qualify as a REIT. Also, the failure of the operating partnership to qualify as a partnership would cause it to become subject to U.S. federal corporate income tax, which would reduce significantly the amount of its cash available for distribution to its partners, including us.

The ability of our board of trustees to revoke our REIT qualification without shareholder approval may cause adverse consequences to our shareholders.

Our declaration of trust provides that our board of trustees may revoke or otherwise terminate our REIT election, without shareholder approval, if it determines that it is no longer in our best interest to continue to qualify as a REIT. If we cease to qualify as a REIT, we would become subject to U.S. federal income tax on our net taxable income and would no longer be required to distribute most of

Table of Contents

our taxable income to our shareholders, which may have adverse consequences on our total return to our shareholders.

Our ownership of our taxable REIT subsidiary is subject to limitations and our transactions with our taxable REIT subsidiary will cause us to be subject to a 100% penalty tax on certain income or deductions if those transactions are not conducted on arm's-length terms.

The Code provides that no more than 25% of the value of a REIT's assets may consist of shares or securities of one or more TRSs. Our TRSs earn income that otherwise would be nonqualifying income if earned by us. Our TRSs also hold certain properties the sale of which would not qualify for the safe harbor for prohibited transactions described above. In addition, we may contract with a TRS to perform services for our tenants that would cause us to receive impermissible tenant service income under the REIT income tests if performed directly by us. The 25% limitation on ownership of TRS stock could limit the extent to which we can conduct these activities and other activities through TRSs. In addition, the Code limits the deductibility of interest paid or accrued by a TRS to its parent REIT to assure that the TRS is subject to an appropriate level of corporate taxation. The Code also imposes a 100% excise tax on certain transactions between a TRS and its parent REIT that are not conducted on an arm's-length basis. We monitor the value of our respective investments in our TRS for the purpose of ensuring compliance with TRS ownership limitations and we structure our transactions with our TRS on terms that we believe are arm's-length to avoid incurring the 100% excise tax described above. There can be no assurance, however, that we will be able to comply with the 25% taxable REIT subsidiaries limitation or to avoid application of the 100% excise tax.

You may be restricted from acquiring or transferring certain amounts of our shares.

The share ownership restrictions of the Code for REITs, the 8.0% common share ownership limit that applies to all shareholders, other than the Hughes family which is subject to the "excepted holder limit" (as defined in the declaration of trust) and "designated investment entities" (as defined in the declaration of trust) which are subject to a 9.9% common share ownership limit, and the 9.9% preferred share ownership limit, all as provided in our declaration of trust may inhibit market activity in our equity shares and restrict our business combination opportunities.

In order to qualify as a REIT for each taxable year beginning with our taxable year ended December 31, 2013, five or fewer individuals, as defined in the Code, may not own, beneficially or constructively, more than 50% in value of our issued and outstanding equity shares at any time during the last half of a taxable year. Attribution rules in the Code determine if any individual or entity beneficially or constructively owns our equity shares under this requirement. Additionally, at least 100 persons must beneficially own our equity shares during at least 335 days of a taxable year for each taxable year after 2012. To help insure that we meet these tests, our declaration of trust restricts the acquisition and ownership of our equity shares.

Our declaration of trust, with certain exceptions, authorizes our trustees to take such actions as are necessary and desirable to preserve our qualification as a REIT. Unless exempted by our board of trustees, our declaration of trust prohibits any person, other than the Hughes family which is subject to the "excepted holder limit" (as defined in the declaration of trust) and "designated investment entities" (as defined in the declaration of trust), from beneficially or constructively owning more than 8.0% in value or number of shares, whichever is more restrictive, of our outstanding common shares and more than 9.9% in value or number of shares, whichever is more restrictive, of any class or series of our preferred shares. Our board of trustees may not grant an exemption from these restrictions to any proposed transferee whose ownership in excess of the applicable ownership limit would result in our failing to qualify as a REIT. These restrictions on ownership and transfer will not apply, however, if our board of trustees determines that it is no longer in our best interest to continue to qualify as a REIT.

Table of Contents

We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our outstanding common or preferred shares.

At any time, the U.S. federal income tax laws governing REITs or the administrative interpretations of those laws may be amended, possibly with retroactive effect. We cannot predict when or if any new U.S. federal income tax law, regulation or administrative interpretation, or any amendment to any existing U.S. federal income tax law, regulation or administrative interpretation, will be adopted, promulgated or become effective and whether any such law, regulation, or interpretation may take effect retroactively. We and our shareholders could be adversely affected by any such change in or any new U.S. federal income tax law, regulation or administrative interpretation.

We may be required to report taxable income for certain investments in excess of the economic income that we ultimately realize from them.

We and our TRS may invest in mortgages, including non-performing loans, or NPLs, for less than their face amount. The amount of such discount is generally treated as "market discount" for U.S. federal income tax purposes. Accrued market discount is reported as income when, and to the extent that, any payment of principal of the debt instrument is made, unless we elect to include accrued market discount in income as it accrues. Principal payments on certain loans are made monthly, and consequently accrued market discount may have to be included in income each month as if the debt instrument were assured of ultimately being collected in full. If we collect less on the debt instrument than our purchase price plus the market discount we had previously reported as income, we may not be able to benefit from any offsetting loss deductions.

In the event that any debt instruments acquired by us are delinquent as to mandatory principal and interest payments, or in the event payments with respect to a particular debt instrument are not made when due, we may nonetheless be required to continue to recognize the unpaid interest as taxable income as it accrues, despite doubt as to its ultimate collectability. While we would in general ultimately have an offsetting loss deduction available to us when such interest was determined to be uncollectible, the utility of that deduction could depend on our having taxable income in that later year or thereafter.

Finally, we or our TRS may recognize taxable "phantom income" as a result of modifications, pursuant to agreements with borrowers, of debt instruments that we acquire if the amendments to the outstanding debt are "significant modifications" under the applicable Treasury regulations. In addition, our TRS may be treated as a "dealer" for U.S. federal income tax purposes, in which case the TRS would be required to mark to market its assets at the end of each taxable year and recognize taxable gain or loss on those assets even though there has been no actual sale of those assets.

If we issue additional Series B or Series C participating preferred shares, in certain circumstances, the "fast-pay stock" rules could apply.

Under the terms of our Series B or Series C participating preferred shares, we have the ability to issue additional Series B or Series C participating preferred shares without shareholder approval. If we issue additional Series B or Series C participating preferred shares at a price that exceeds the \$25.00 per share redemption price (calculated without any increase for the "HPA Adjustment") by more than a de minimis amount, then those shares might be considered to be "fast-pay stock" under the applicable U.S. Treasury Regulations. Whether those regulations would apply would depend upon all of the facts and circumstances, including the fact that the amount that the Series B or Series C participating preferred shares may be redeemed or converted includes the "HPA Adjustment." The Company believes that if at the time particular additional Series B or Series C participating preferred shares are issued (i) the redemption (and conversion) price (including any HPA Adjustment) for such shares (assuming for this purpose that the shares are then redeemable or subject to conversion) is

Table of Contents

equal to or greater than the issue price for such shares and (ii) the Company expects that during the entire period that such shares are redeemable (or subject to conversion) the redemption (or conversion) price will equal or exceed the issue price, it is likely that the fast-pay stock rules will not apply. However, under a facts and circumstances analysis, there can be no assurance that the fast-pay stock rules would not be determined to apply.

If the fast-pay stock rules were determined to apply to the issuance of additional Series B or Series C participating preferred shares, then the consequences could include:

The holders of our common shares and other preferred shares (including shares of Series B or Series C participating preferred shares not subject to the fast-pay stock rules) being treated as collectively having acquired from us financial instruments (which may be treated as debt or equity for U.S. federal income tax purposes, depending on the facts) with the same terms as the additional shares of Series B or Series C participating preferred shares being issued, with the result that they will be taxed on payments made on those shares as and when made, even though they will not receive those payments.

The holders of the additional shares of Series B or Series C participating preferred shares issued instead having acquired, for U.S. federal income tax purposes, financial instruments (as described above) issued directly to them by the holders of our common shares and other preferred shares in exchange for the price paid for those shares, rather than our shares, with the holders of our common shares and other preferred shares making payments to them with respect to those financial instruments as and when the payments with respect to the additional Series B or Series C participating preferred shares are made.

There is virtually no guidance as to the consequences to the purchasers of the additional shares of Series B or Series C participating preferred shares of payments deemed to be coming to them from the holders of our common shares and other preferred shares with respect to the deemed financial instruments that they purchased from such holders, instead of the payments being considered made by us to them with respect to our Series B or Series C participating preferred shares.

EXECUTIVE OFFICERS OF THE REGISTRANT:

Listed below are the executive officers of the Company. Our executive officers are appointed by, and serve at the discretion of, the Board of Trustees. There are no family relationships between any of the executive officers, and there is no arrangement or understanding between any executive officer and any other person pursuant to which the executive officer was selected.

Edgar Filing: American Homes 4 Rent - Form 10-K

David P. Singelyn, age 53, has served as our Chief Executive Officer and a Trustee since October 2012. Mr. Singelyn co-founded AH LLC with Mr. Hughes in June 2011 and served as the Chief Executive Officer of the Advisor until the Management Internalization. From 2003 through April 2013, Mr. Singelyn was Chairman and President of Public Storage Canada, a real estate company previously

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

listed on the Toronto Stock Exchange, where he built a management team that restructured the operations of the company, including building an operations team and installing accounting and operating computer systems. In 2010, Mr. Singelyn facilitated the restructuring of the ownership entity that was traded on the Toronto stock exchange resulting in the company "going private." In 2005, Mr. Singelyn, along with Mr. Hughes, founded ACE, and he now serves as a co-manager of ACE. Mr. Singelyn is also a director of the William Lawrence and Blanche Hughes Foundation, a non-profit organization dedicated to research of pediatric cancer. Mr. Singelyn served as the Treasurer for Public Storage (NYSE:PSA), from 1989 through 2003, where he was responsible for equity capital raising, debt issuances, corporate cash management and financial management for Public Storage and its subsidiary operations. During his tenure, and with his direct involvement, Public Storage raised funds through the public and institutional marketplaces, including from a number of state pensions. Mr. Singelyn started his career at Arthur Young and Company (now a part of Ernst & Young LLP) and also served as Controller of Winchell's Donut Houses where he was responsible for all accounting functions. Mr. Singelyn earned a Bachelor of Science in Accounting and a Bachelor of Science in Computer Information Systems from California Polytechnic University Pomona.

John "Jack" Corrigan, age 54, has served our Chief Operating Officer and a Trustee since October 2012. Since November 2011, Mr. Corrigan has been the Chief Operating Officer of the Advisor. From 2006 to 2011, Mr. Corrigan was the Chief Executive Officer of A & H Property and Investments, a full service leasing and property management company in Los Angeles County with a portfolio of residential, retail, industrial and office properties where he was responsible for acquisitions, dispositions, development, financing and management operations. Mr. Corrigan served as Chief Financial Officer of PS Business Parks Inc. (NYSE: PSB), a publicly-traded REIT specializing in office and industrial properties throughout the United States, from 1998 to 2004. Prior to his tenure at PS Business Parks, Mr. Corrigan was a partner in the accounting firm of LaRue, Corrigan & McCormick where he was responsible for the audit and consulting practice of that firm. Mr. Corrigan started his career at Arthur Young and Company (now a part of Ernst & Young LLP) and also served as Vice President and Controller of Storage Equities, Inc. (a predecessor entity to Public Storage). Mr. Corrigan earned a Bachelor of Science in Accounting from Loyola Marymount University.

Diana M. Laing, age 60, has served as our Chief Financial Officer since May 2014. Ms. Laing previously served as Chief Financial Officer and Secretary of Thomas Properties Group, Inc., a publicly traded real estate operating company engaged in the development, redevelopment and, operation of Class A office properties in the United States from May 2004 until it merged with Parkway Properties in December 2013. Before that, she held a number of senior executive finance positions in the real estate industry, including as Executive Vice President, Chief Financial Officer and Corporate Secretary of Arden Realty, a New York Stock Exchange-listed REIT engaged in the ownership and operation of commercial office properties, from 1996 to 2000. She is also a member of the Board of Directors of The Macerich Company, a real estate investment trust that owns and operates shopping centers, where she is Chair of the Audit Committee. Ms. Laing graduated from Oklahoma State University with a B.S in Accounting.

David Goldberg, age 65, has served as our Executive Vice President since October 2012. Mr. Goldberg held the same position with the Advisor from 2011 until the Management Internalization. Since 2006, Mr. Goldberg has been a co-manager of ACE, and since 2006 he has served as a legal consultant and senior counsel for Public Storage. From 1991 until 2005, Mr. Goldberg held various legal positions with Public Storage, including Senior Vice President and General Counsel. In such capacity, Mr. Goldberg was responsible for all Public Storage securities, real estate and property management activities and was involved in capital raising, real estate acquisition, corporate reorganization and property management transactions. From 1974 until 1991, Mr. Goldberg was an associate and a partner in the law firm of Agnew, Miller & Carlson and a partner with the law firm of Sachs & Phelps and with the law firm of Hufstедler, Miller, Carlson & Beardsley. Mr. Goldberg earned

Table of Contents

an A.B. in History and Social Studies from Boston University and a Juris Doctorate from the University of California, Berkeley (Boalt School of Law) and is a member of the California State Bar.

Bryan Smith, age 41, has served as our Executive Vice President Director of Property Management since February 2015 and previously was Senior Vice President Director of Property Management since the completion of the Management Internalization. He is responsible for establishing property management operations nationwide, with an initial focus of hiring and training property management teams and establishing leasing offices across the country. From 2011 to 2012, Mr. Smith was Senior Vice President of Acquisitions for the Advisor and he was Senior Vice President Director of Property Management for the Advisor from 2012 until the Management Internalization. From 2009 to 2011, Mr. Smith was a Partner at Tax Review Group, a property tax consulting firm that focuses on reducing the tax liabilities of large residential, commercial, hospitality and land properties located in the western United States, where his responsibilities included business development and operational management of the firm's property tax appeal practice. Prior to joining the Tax Review Group, he was a Partner and Chief Financial Officer at the Watermark Group, a residential and commercial real estate development firm, from 2006 to 2009. Mr. Smith earned a B.A. in Business Economics from the University of California, Los Angeles and an M.B.A. from the UCLA Anderson School of Management. He is a licensed real estate broker and a Certified Public Accountant in the State of California.

Sara H. Vogt-Lowell, age 39, has served as our Chief Legal Officer since October 2012. As Chief Legal Officer she coordinates legal matters and real estate transactions, guides the defense of our company against prospective and pending claims and lawsuits and monitors applicable legal, regulatory and compliance developments. From 2011 until the Management Internalization, Ms. Vogt-Lowell held the same position with the Advisor. From March 2006 through April 2013, she has served as General Counsel for Malibu Management, Public Storage Canada and ACE. Ms. Vogt-Lowell began her legal career at the law firm of Latham & Watkins LLP in 2002 as a member of the finance department where she specialized in real estate transactions. There, she represented a variety of clients, including lenders, residential and commercial developers, landlords, tenants, buyers, sellers and owners of commercial, industrial, residential and other real estate projects, with specific experience in multi-site, multi-state property portfolios. Ms. Vogt-Lowell earned a B.A. in Political Science from the University of California, Los Angeles and a Juris Doctorate from the University of California, Berkeley (Boalt School of Law). Ms. Vogt-Lowell is a member of the California State Bar.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market information**

Our Class A common shares have traded on the NYSE under the symbol "AMH" since August 1, 2013. Prior to that date, there was no public trading market for our Class A common shares. Our Class B common shares are not publicly traded. The following table sets forth the quarterly high and low trading prices per Class A common share as reported on the NYSE and the distributions declared by us with respect to our Class A common shares for each such period:

2014	High	Low	Per Share Distribution	2013	High	Low	Per Share Distribution
First quarter	\$ 17.60	\$ 16.07	\$ 0.05	First quarter	N/A	N/A	N/A
Second quarter	\$ 18.15	\$ 15.76	\$ 0.05	Second quarter	N/A	N/A	N/A
Third quarter	\$ 18.85	\$ 16.71	\$ 0.05	Third quarter ⁽¹⁾	\$ 16.99	\$ 15.29	\$
Fourth quarter	\$ 17.70	\$ 16.32	\$ 0.05	Fourth quarter	\$ 16.95	\$ 15.10	\$ 0.05

(1)

The third quarter of 2013 consists of the period beginning with the first trading date of August 1, 2013, through September 30, 2013.

On February 26, 2015, the last reported sales price per share of our Class A common shares was \$16.48.

Shareholders

As of the close of business on February 26, 2015, there were approximately 36 holders of record of our Class A common shares (excludes beneficial owners whose shares are held in street name by brokers and other nominees) and one shareholder of record of our Class B common shares.

Distributions

The Board declared total distributions of \$0.20 and \$0.05 per Class A common share during the years ended December 31, 2014 and 2013, respectively. Future distributions on our common shares will be determined by and at the sole discretion of our Board of Trustees and will be based on a variety of factors, which may include among others: our actual and projected results of operations; our liquidity, cash flows and financial condition; revenue from our properties; our operating expenses; economic conditions; debt service requirements; limitations under our financing arrangements; applicable law; capital requirements; the REIT requirements of the Code and such other factors as our Board deems relevant. To maintain our qualification as a REIT, we must make annual distributions to shareholders of at least 90% of our taxable income for the current taxable year, determined without regard to deductions for dividends paid and excluding any net capital gains. We intend to distribute our taxable income to our shareholders and retain the balance of our cash available for distribution for reinvestment in properties. However, our cash available for distribution may be less than the amount required to meet the distribution requirements for REITs under the Code and we may be required to borrow money, sell assets or make taxable distributions of our equity shares or debt securities to satisfy the distribution requirements. No distributions can be paid on our common shares unless we have paid all cumulative dividends on our Series A, Series B and Series C preferred shares. The distribution preference of our Series A, Series B and Series C preferred shares could limit our ability to make distributions to the holders of our common shares.

Stock Performance Graph

This performance graph shall not be deemed "filed" for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities under that Section, and shall not be incorporated by reference into any filing by us under the Securities Act except as expressly set forth in such filing.

The following graph compares the cumulative total return on our Class A common shares from August 1, 2013, (the date that our Class A common shares commenced trading on the NYSE) to the NYSE closing price per share on December 31, 2014, with the cumulative total returns on the Standard & Poor's 500 Composite Stock Price Index (the "S&P 500 Index") and the MSCI U.S. REIT Index. The graph assumes the investment of \$100 in our Class A common shares and each of the indices on August 1, 2013, and the reinvestment of all dividends. The return shown on the graph is not necessarily indicative of future performance.

Comparison of Cumulative Total Return Among American Homes 4 Rent, the S&P 500 Index and the MSCI US REIT Index

The following table provides the same information in tabular form:

Index	Quarter Ended

ITEM 6. SELECTED FINANCIAL DATA

The following table presents selected historical consolidated financial information as of and for the years ended December 31, 2014, 2013 and 2012 and for the period from June 23, 2011, to December 31, 2011. The selected financial data below has been derived from our consolidated financial statements, as adjusted for the impact of subsequent accounting changes requiring retrospective application, if any, and should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements, including the related notes, included elsewhere in this Annual Report on Form 10-K. Under the provisions of Accounting Standards Codification ("ASC") No. 805, *Business Combinations*, we have reflected transactions between businesses under common control retroactively based on the date AH LLC commenced acquiring properties, June 23, 2011. As such, the statements of operations reflect activity prior to our date of formation, and the properties contributed to us by AH LLC are reflected retroactively on the balance sheets based on AH LLC's net book value. Therefore, our selected financial data may not be indicative of our past or future results and does not reflect our financial

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion of our financial condition and results of operations should be read in conjunction with the financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements based upon our current expectations that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to, those set forth under "Item 1A. Risk Factors" in this report.

Overview

We are a Maryland REIT focused on acquiring, renovating, leasing and operating single-family homes as rental properties. We commenced operations in November 2012 to continue the investment activities of AH LLC, which was founded by our chairman, B. Wayne Hughes, in 2011 to take advantage of the dislocation in the single-family home market.

As of December 31, 2014, we owned 34,599 single-family properties in selected sub-markets of MSAs in 22 states, compared to 23,268 single-family properties in 22 states as of December 31, 2013. As of December 31, 2014, we had an additional 703 properties in escrow that we expected to acquire, subject to customary closing conditions, for an aggregate purchase price of approximately \$110.9 million. As of December 31, 2014, 28,250, or 81.6%, of our total properties were leased, compared to 17,328, or 74.5%, of our total properties as of December 31, 2013. As of December 31, 2014, our entire portfolio of single-family properties was internally managed through our proprietary property management platform.

Our Properties and Key Operating Metrics

The following table provides a summary of our single-family properties as of December 31, 2014:

Market	Properties ⁽¹⁾		Gross Book Value			Averages Per Property		
	Units	% of Total	\$ millions	% of Total	Avg. per Property	Square Footage	Property Age (years)	Avg. Year Purchased

(1) Includes properties under renovation and excludes vacant properties available for lease and properties held for sale.

(2) Includes leases on properties for which we have completed renovations and excludes leases with tenants existing at the date of acquisition, other than leases with tenants acquired as part of portfolio acquisitions.

(3) Available for Rent 30+ Days represents the number of properties that have been leased after we have completed renovations or are available for rent (i.e., "rent-ready") for a period of greater than 30 days.

(4) Available for Rent 90+ Days represents the number of properties that have been leased after we have completed renovations or are available for rent (i.e., "rent-ready") for a period of greater than 90 days.

(5) Occupancy percentage is computed by dividing the number of leased properties by the number of properties available for rent 30+ days from the date of completing initial renovations (i.e., occupancy percentage is net of vacancy associated with properties in turn).

(6) Occupancy percentage is computed by dividing the number of leased properties by the number of properties available for rent 90+ days from the date of completing initial renovations (i.e., occupancy percentage is net of vacancy associated with properties in turn).

(7) Represents 31 markets in 19 states.

Key Portfolio Transactions in 2014

Beazer Rental Homes Acquisition

In July 2014, the Company completed the acquisition of Beazer Rental Homes for the purpose of acquiring a 100% ownership interest in a portfolio of 1,372 homes located in markets in Arizona, California, Florida and Nevada for merger consideration to the security holders of Beazer Rental Homes that consisted of 8,158,001 Class A common shares in the Company, \$5.0 million of cash to be held in an indemnification escrow for a period of six months and extinguishment of \$108.2 million outstanding under the Beazer Rental Homes credit facility. The fair value of the Class A common shares issued has been estimated to be \$144.8 million, which has been determined using the closing price in the Company's Class A common shares on the date of the acquisition (see Note 11).

Ellington Portfolio Acquisition

On December 31, 2014, the Company acquired a 100% ownership interest in a portfolio of 914 homes located in markets in Arizona, Colorado, Georgia, North Carolina, Tennessee and Texas for a total purchase price of approximately \$126.0 million, which included \$74.4 million in cash and the assumption of \$51.6 million of debt. The debt consists of a 5-year note payable, which is secured by a first priority mortgage on 583 of the homes, bears fixed interest at 4.06% and matures on July 1, 2019. The Company completed the Ellington Portfolio

Edgar Filing: American Homes 4 Rent - Form 10-K

Acquisition for the purpose of acquiring a portfolio of 914 single-family properties, which was 96.3% leased as of the acquisition date (see Note 11).

Table of Contents

Factors That Affect Our Results of Operations and Financial Condition

Our results of operations and financial condition are affected by numerous factors, many of which are beyond our control. Key factors that impact our results of operations and financial condition include our ability to identify and acquire properties; our pace of property acquisitions; the time and cost required to gain access to the properties and then to renovate and lease a newly acquired property at acceptable rental rates; occupancy levels; rates of tenant turnover; the length of vacancy in properties between tenant leases; our expense ratios; our ability to raise capital; and our capital structure.

Property Acquisitions

Since our formation, we have rapidly but systematically grown our portfolio of single-family homes and intend to continue to do so. Our ability to identify and acquire single-family homes that meet our investment criteria is impacted by home prices in our target markets, the inventory of properties available for sale through our acquisition channels, competition for our target assets and our available capital. We expect that our level of acquisition activity will fluctuate based on the number of suitable investments and the level of capital available to invest. During the year ended December 31, 2014, our total portfolio increased by 11,331 homes, including 1,372 homes acquired as part of the Beazer Rental Homes Acquisition, 914 homes acquired as part of the Ellington Portfolio Acquisition, 3,792 homes acquired through trustee acquisitions and 5,253 homes acquired through broker acquisitions.

Prior to December 10, 2014, we paid an acquisition and renovation fee to AH LLC equal to 5% of all costs and expenses incurred in connection with the initial acquisition, repair and renovation of our single-family properties for its services in identifying, evaluating, acquiring and overseeing the renovation of our properties. On December 10, 2014, AH LLC ceased providing acquisition and renovation services for us, we stopped paying AH LLC an acquisition and renovation fee and we hired all of AH LLC's acquisition and renovation personnel necessary for our operations. No termination or other fee was paid to AH LLC in connection with the termination of AH LLC providing such services. Although we anticipate the internalization of AH LLC's acquisition and renovation personnel to be cash flow positive to the Company, we expect a larger proportion of the internalized cost structure to be expensed in accordance with GAAP, compared to the 5% acquisition and renovation fee previously paid to AH LLC, which has been primarily capitalized related to asset acquisitions and included in the cost basis of our single-family properties.

Property Operations

The acquisition of properties involves expenditures in addition to payment of the purchase price, including property inspections, closing costs, liens, title insurance, transfer taxes, recording fees, broker commissions, property taxes and HOA fees, when applicable. In addition, we typically incur costs between \$5,000 and \$25,000 to renovate a home to prepare it for rental. Renovation work varies, but may include paint, flooring, carpeting, cabinetry, appliances, plumbing hardware and other items required to prepare the home for rental. The time and cost involved in initially accessing our homes to prepare them for rental can impact our financial performance and varies among properties based on several factors, including the source of acquisition channel, whether the property is located in a judicial or non-judicial foreclosure state, if applicable, and whether or not the home is occupied at the time of acquisition. This process of finalizing the acquisition and gaining initial access to the home can range from immediate access to multiple months and, on average, takes approximately 20 to 30 days. Additionally, after gaining access to the home, the time to renovate a property can vary significantly among properties and is most impacted by the age and condition of the property. On average, it takes approximately 50 to 60 days to complete the renovation process after gaining initial access to the home. Our operating results are also impacted by the amount of time it takes to market and lease a property, which can vary greatly among properties, and is impacted by local demand, our marketing techniques

Table of Contents

and the size of our available inventory. On average, it takes approximately 20 to 30 days to lease a property after completing the renovation process. Lastly, our operating results are impacted by the length of stay of our tenants and the amount of time it takes to prepare and re-lease a property after a tenant vacates. This process, which we refer to as "turnover," is impacted by numerous factors, including the condition of the home upon move-out of the previous tenant, and by local demand, our marketing techniques and the size of our available inventory at the time of the turnover. On average, it takes approximately 50 to 60 days to complete the turnover process.

Revenue

Our revenue is derived primarily from rents collected under lease agreements with tenants for our single-family properties. These include short-term leases that we enter into directly with our tenants, which typically have a term of one year. Our rental rates and occupancy levels are affected by macroeconomic factors and local and property-level factors, including market conditions, seasonality and tenant defaults, and the amount of time it takes to renovate and re-lease properties when tenants vacate. We generally do not offer free rent or other concessions in connection with leasing our properties. Additionally, our ability to collect revenues and related operating results are impacted by the credit worthiness and quality of our tenants. On average, our tenants have household incomes ranging from \$70,000 to \$90,000 and primarily consist of families with approximately two adults and one or more children.

In addition to rental revenues, we receive fees and other reimbursements, referred to as "tenant charge-backs", from our tenants, which are primarily designed to recover costs for certain items, such as utilities, damages and maintenance. In accordance with GAAP, these fees and tenant charge-backs are presented gross in the consolidated statements of operations.

We expect that the overall occupancy of our portfolio will continue to increase as the proportion of recently acquired properties declines relative to the size of our entire portfolio. Nevertheless, in the near term, our ability to drive revenue growth will depend in large part on our ability to efficiently renovate and lease newly acquired properties, maintain occupancy in the rest of our portfolio and acquire additional properties, both leased and vacant.

Over the longer term and as our total portfolio occupancy stabilizes, our ability to maintain and grow revenues will become more dependent on our ability to retain tenants and increase rental rates. We believe that our platform will allow us to achieve strong tenant retention and lease renewal rates at our properties. During the years ended December 31, 2014 and 2013, we experienced tenant retention rates of 70% and 71%, respectively, at an average rental rate increase of 4% and 3%, respectively. To date, our leasing efforts have been primarily focused on increasing our overall portfolio occupancy rather than raising rental rates. We believe that there will be significant opportunity to optimize rental rates in the future as our total portfolio occupancy stabilizes.

Expenses

We monitor the following categories of expenses that we believe most significantly affect our results of operations.

Property Operating Expenses

Once a property is available for lease, which we refer to as "rent-ready," we incur ongoing property-related expenses, primarily HOA fees (when applicable); property taxes; insurance; marketing expenses; repairs and maintenance; and turnover costs, which may not be subject to our control.

Table of Contents

Property Management Expenses

As we now internally manage our entire portfolio of single-family properties through our proprietary property management platform, we incur costs such as salary expenses for property management personnel, lease expenses for property management offices and technology expenses for maintaining the property management platform. As part of developing our property management platform, we have made significant investments in our infrastructure, systems and technology. We believe that these investments will enable the costs of our property management platform to become more efficient over time and as our overall portfolio grows in size.

Seasonality

While we still have limited operating history, we believe that our business and related operating results will be impacted by seasonal factors throughout the year. In particular, we have experienced higher levels of tenant move-outs during the summer months, which impacts both our rental revenues and related turnover costs. Further, our property operating costs are seasonally impacted in certain markets for expenses such as snow removal and heating during the winter season and HVAC repairs and expenses during the summer season.

General and Administrative Expense

General and administrative expense primarily consists of payroll and personnel costs, trustees' and officers' insurance expenses, audit and tax fees, state taxes, trustee fees and other expenses associated with our corporate and administrative functions.

Note Regarding Our Historical Operations and Presentation of Our Financial Results

From our formation through June 10, 2013, we were externally managed and advised by the Advisor and the leasing, managing and advertising of our properties was overseen and directed by the Property Manager, both of which were subsidiaries of AH LLC. On June 10, 2013, we entered into the Management Internalization and acquired the Advisor and the Property Manager from AH LLC in exchange for 4,375,000 Series D units and 4,375,000 Series E units in the Operating Partnership. We now have an integrated operating platform that provides our property management, marketing, leasing, financial and administrative functions.

Prior to the Management Internalization, AH LLC exercised control over the Company through the contractual rights provided to the Advisor through an advisory management agreement. Accordingly, our consolidated financial statements retroactively reflect two transactions between us and AH LLC as transactions between entities under common control. In December 2012, AH LLC contributed 367 properties to us with an agreed-upon value of \$49.4 million and made a cash investment of \$0.6 million, in exchange for 3,300,000 Class A common shares, 667 Class B common shares, and 32,667 Class A units of our Operating Partnership. In February 2013, AH LLC contributed a portfolio of 2,770 single-family properties to us with an agreed-upon value of \$491.7 million, in exchange for 31,085,974 Series C units of our Operating Partnership and 634,408 of our Class B common shares ("the 2,770 Property Contribution"). As noted in our consolidated financial statements, the accounts relating to the properties acquired in those transactions have been reflected retroactively at AH LLC's net book value. AH LLC commenced acquiring these properties on June 23, 2011, and, accordingly, the consolidated statements of operations reflect activity prior to our date of formation. Our consolidated financial statements are not indicative of our past or future results and do not reflect our financial position, results of operations, changes in equity and cash flows had they been presented as if we had been operating independently during the period presented. Accordingly, this discussion of our financial statements encompasses certain aspects of the historical operations of AH LLC.

Table of Contents**Results of Operations**Comparison of the Year Ended December 31, 2014, to the Year Ended December 31, 2013

The following is a detail of our leased property revenue and operating expenses (in thousands):

	December 31, 2014	For the Years Ended % of Revenue	December 31, 2013	% of Revenue
Rents from single-family properties	\$ 376,385		\$ 132,722	
Fees from single-family properties	5,968		3,639	
Tenant charge-backs	14,931		1,588	
 Total revenues from single-family properties	 397,284		 137,949	
Leased property operating expenses:				
Property tax	62,742	15.8%	21,556	15.7%
HOA fees	7,891	2.0%	3,233	2.3%
Maintenance and turnover costs	46,491	11.7%	12,408	9.0%
Insurance	6,922	1.7%	2,764	2.0%
Bad debt	5,630	1.4%	2,279	1.7%
Property management	35,289	8.9%	9,171	6.6%
 Total leased property operating expenses	 164,965	 41.5%	 51,411	 37.3%
 Net operating income ⁽¹⁾	 \$ 232,319	 58.5%	 \$ 86,538	 62.7%

(1)

Net operating income, or NOI, is a supplemental non-GAAP financial measure. The Company defines NOI as rents and fees from single-family properties and tenant charge-backs, less property operating expenses for leased single-family properties. A reconciliation of NOI to net loss as determined in accordance with GAAP is located at the end of this Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations.

Property Revenues

Our property revenues, which are defined as rents and fees from single-family properties and tenant charge-backs, were \$397.3 million for the year ended December 31, 2014, compared to \$137.9 million for the same period in 2013. This increase was primarily attributable to growth in our average number of leased properties, which rose to 23,154 leased properties for the year ended December 31, 2014, from 9,092 leased properties for the same period in 2013.

Leased Property Operating Expenses

Leased property operating expenses, which consist of direct property operating expenses and property management costs associated with properties that have been initially leased, whether or not they are currently leased, were \$165.0 million for the year ended December 31, 2014, compared to \$51.4 million for the same period in 2013. This increase was primarily attributable to growth in the number of average initially leased properties, which rose to 24,556 for the year ended December 31, 2014, from 9,092 for the same period in 2013.

As a percentage of total revenues from single-family properties, leased property operating expenses increased to 41.5% for the year ended December 31, 2014, from 37.3% for the same period in 2013. This increase was primarily attributable to higher maintenance and turnover costs resulting from a rise in lease expirations and tenant move-outs during the year ended December 31, 2014, compared to the same period in 2013. Additionally, prior to the Management Internalization on June 10, 2013, we paid AH LLC a property management fee equal to 6% of collected rents. Upon completion of the

Table of Contents

Management Internalization, we became directly responsible for all costs of our internal property management platform, which resulted in an increase in total property management costs during the year ended December 31, 2014, compared to the same period in 2013.

Vacant Property Operating Expenses

Vacant property operating expenses and other, which primarily consist of direct property operating expenses and property management costs associated with properties that have been renovated, but not initially leased, were \$23.4 million for the year ended December 31, 2014, compared to \$22.3 million for the same period in 2013.

Additionally, during the year ended December 31, 2014, we incurred approximately \$0.9 million of one-time termination fees and other costs related to finalizing the internalization of certain markets that were transitioned into our property management platform in the fourth quarter of 2013. These costs were included in vacant property operating expenses and other in the consolidated statements of operations. Further, during the first quarter of 2014, we incurred approximately \$1.2 million of freeze-related damages as a result of severe weather conditions in certain markets. As these damages are expected to be fully recovered through insurance reimbursement, we have reflected our related aggregate insurance deductible of \$0.4 million (representing our total aggregate deductible based on three separate winter storms) within vacant property operating expenses and other in the consolidated statements of operations. As a result of the severe weather conditions in certain markets, we also incurred increased vacant property operating costs associated with higher utility usage and cold weather maintenance during the first quarter of 2014.

General and Administrative Expense and Advisory Fees

General and administrative expense, which primarily consists of payroll and personnel costs, trustees' and officers' insurance expense, audit and tax fees, state taxes, trustee fees and other expenses associated with our corporate and administrative functions, was \$21.9 million for the year ended December 31, 2014, compared to \$8.8 million for the same period in 2013.

Prior to the Management Internalization on June 10, 2013, our corporate and administrative functions were provided by the Advisor under the terms of an advisory management agreement. Rather than directly incurring the costs of our corporate and administrative functions, we previously engaged the Advisor, which incurred these costs and performed these functions, and paid an advisory fee that was calculated as 1.75% per year of shareholders' equity (as defined in the advisory management agreement). Advisory fees incurred to the Advisor prior to the Management Internalization during the year ended December 31, 2013, were \$6.4 million.

General and administrative expense for the year ended December 31, 2014, was 0.35% of total year-end assets, compared to general and administrative expense and advisory fees of 0.36% of total year-end assets for the same period in 2013.

Interest Expense

Interest expense was \$19.9 million for the year ended December 31, 2014, compared to \$0.4 million for the same period in 2013. This increase was primarily due to a rise in aggregate borrowings to \$1.8 billion at December 31, 2014, from \$375.0 million at December 31, 2013.

Acquisition Fees and Costs Expensed

Acquisition fees and costs expensed are incurred in connection with our recent business combinations and the acquisition of properties with existing leases (including the fee we previously paid to AH LLC, which was equal to 5% of the actual purchase price of a property). For properties that are

Table of Contents

leased at the time of acquisition, these costs are expensed, rather than capitalized, as a component of the acquisition cost. For the years ended December 31, 2014 and 2013, acquisition fees and costs expensed included \$22.1 million and \$2.8 million, respectively, of acquisition fees and related costs associated with single-family properties acquired with in-place leases, as well as the Beazer Rental Homes Acquisition and the Ellington Portfolio Acquisition, and \$0.3 million and \$2.0 million, respectively, of transaction costs incurred in pursuing unsuccessful single-family property acquisitions.

Depreciation and Amortization

Depreciation and amortization expense consists primarily of depreciation of buildings. Depreciation of our assets is calculated over their useful lives on a straight-line basis over 5 to 30 years. Our intangible assets are amortized on a straight-line basis over the asset's estimated economic useful life. Depreciation and amortization expense was \$165.5 million for the year ended December 31, 2014, compared to \$71.0 million for the same period in 2013.

Comparison of the Year Ended December 31, 2013, to the Year Ended December 31, 2012

The following is a detail of our leased property revenue and operating expenses (in thousands):

	December 31,		For the Years Ended	
	2013	% of Revenue	December 31,	% of Revenue
Rents from single-family properties	\$ 132,722		\$ 4,540	
Fees from single-family properties	3,639			
Tenant charge-backs	1,588			
Total revenues from single-family properties	137,949		4,540	
Leased property operating expenses:				
Property tax	21,556	15.7%	500	11.0%
HOA fees	3,233	2.3%	150	3.3%
Maintenance and turnover costs	12,408	9.0%	694	15.3%
Insurance	2,764	2.0%	95	2.1%
Bad debt	2,279	1.7%	14	0.3%
Property management	9,171	6.6%	291	6.4%
Total leased property operating expenses	51,411	37.3%	1,744	38.4%
Net operating income ⁽¹⁾	\$ 86,538	62.7%	\$ 2,796	61.6%

(1) Net operating income, or NOI, is a supplemental non-GAAP financial measure. The Company defines NOI as rents and fees from single-family properties and tenant charge-backs, less property operating expenses for leased single-family properties. A reconciliation of NOI to net loss as determined in accordance with GAAP is located at the end of this Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations.

Property Revenues

Our property revenues, which are defined as rents and fees from single-family properties and tenant charge-backs, were \$137.9 million for the year ended December 31, 2013, compared to \$4.5 million for the same period in 2012. This increase was primarily attributable to growth in our average number of leased properties, which rose to 9,092 leased properties for the year ended December 31, 2013, from 1,164 leased properties for the same period in 2012.

Table of Contents

Leased Property Operating Expenses

Leased property operating expenses, which consist of direct property operating expenses and property management costs associated with properties that have been initially leased, whether or not they are currently leased, were \$51.4 million for the year ended December 31, 2013, compared to \$1.7 million for the same period in 2012. This increase was primarily attributable to growth in the number of average initially leased properties, which rose to 9,092 for the year ended December 31, 2013, from 1,164 for the same period in 2012.

As a percentage of total revenues from single-family properties, leased property operating expenses decreased to 37.3% for the year ended December 31, 2013, from 38.4% for the same period in 2012. This decrease was primarily attributable to a significant decline in maintenance and turnover costs, partially offset by higher property tax and bad debt expense.

Vacant Property Operating Expenses

Vacant property operating expenses and other, which primarily consist of direct property operating expenses and property management costs associated with properties that have been renovated, but not initially leased, were \$22.3 million for the year ended December 31, 2013, compared to \$1.8 million for the same period in 2012. This increase was primarily attributable to a larger number of renovated, but not initially leased, homes during the year ended December 31, 2013, compared to the same period in 2012.

General and Administrative Expense and Advisory Fees

General and administrative expense, which primarily consists of payroll and personnel costs, trustees' and officers' insurance expense, audit and tax fees, state taxes, trustee fees and other expenses associated with our corporate and administrative functions, was \$8.8 million for the year ended December 31, 2013, compared to \$7.2 million for the same period in 2012. General and administrative expense also includes an allocation of general and administrative expenses incurred by AH LLC that were either clearly applicable to or reasonably allocated to the operations of contributed properties prior to the date of contribution by AH LLC. Allocated general and administrative expenses prior to that date of respective property contribution by AH LLC were \$1.0 million and \$6.9 million for the years ended December 31, 2013 and 2012, respectively.

Prior to the Management Internalization on June 10, 2013, our corporate and administrative functions were provided by the Advisor under the terms of an advisory management agreement. Rather than directly incurring the costs of our corporate and administrative functions, we previously engaged the Advisor, which incurred these costs and performed these functions, and paid an advisory fee that was calculated as 1.75% per year of shareholders' equity (as defined in the advisory management agreement). Advisory fees incurred to the Advisor prior to the Management Internalization during the year ended December 31, 2013, were \$6.4 million, compared to \$0.9 million during the year ended December 31, 2012.

Acquisition Fees and Costs Expensed

Acquisition fees and costs expensed are incurred in connection with our recent business combinations and the acquisition of properties with existing leases (including the fee we previously paid to AH LLC, which was equal to 5% of the actual purchase price of a property). For properties that are leased at the time of acquisition, these costs are expensed, rather than capitalized, as a component of the acquisition cost. For the years ended December 31, 2013 and 2012, acquisition fees and costs expensed included \$2.8 million and \$0.9 million, respectively, of acquisition fees and related costs associated with single-family properties acquired with in-place leases and \$2.0 million and zero, respectively, of transaction costs incurred in pursuing unsuccessful single-family property acquisitions.

Table of Contents

Depreciation and Amortization

Depreciation and amortization expense consists primarily of depreciation of buildings. Depreciation of our assets is calculated over their useful lives on a straight-line basis over 5 to 30 years. Our intangible assets are amortized on a straight-line basis over the asset's estimated economic useful life. Depreciation and amortization expense was \$71.0 million for the year ended December 31, 2013, compared to \$2.1 million for the same period in 2012.

Liquidity and Capital Resources

Our liquidity and capital resources as of December 31, 2014, included cash and cash equivalents of \$108.8 million. Additionally, as of December 31, 2014, \$207.0 million was outstanding under our credit facility, which provides for maximum borrowings of up to \$800 million. From January 1, 2015, through January 31, 2015, the Company borrowed an additional \$146.0 million under the credit facility. On January 31, 2015, the credit facility had an outstanding balance of \$353.0 million.

Liquidity is a measure of our ability to meet potential cash requirements, maintain our assets, fund our operations, make distributions to our shareholders and meet other general requirements of our business. Our liquidity, to a certain extent, is subject to general economic, financial, competitive and other factors beyond our control. Our liquidity requirements consist primarily of funds necessary to pay for the acquisition, renovation and maintenance of our properties, HOA fees (as applicable), real estate taxes, non-recurring capital expenditures, interest and principal payments on our indebtedness, general and administrative expenses, payment of quarterly dividends on our Preferred Shares, and payment of distributions to our Class A common shareholders.

We seek to satisfy our liquidity needs through cash provided by operations, long-term secured and unsecured borrowings, issuances of debt and equity securities (including OP units), asset-backed securitizations, property dispositions and joint venture transactions. We have financed our operations and acquisitions to date through the issuance of equity securities, borrowings under our credit facility and asset-backed securitizations. Going forward, we expect to meet our operating liquidity requirements generally through cash on hand and cash provided by operations. We believe our rental income, net of operating expenses and recurring capital expenditures, will generally provide cash flow sufficient to fund our operations and dividend distributions. However, a significant number of our properties are not fully stabilized. In addition, our real estate assets are illiquid in nature. A timely liquidation of assets might not be a viable source of short-term liquidity should a cash flow shortfall arise, and we may need to source liquidity from other financing alternatives.

Cash Flows

Our cash flows provided by operating activities depend on numerous factors, including the occupancy level of our properties, the rental rates achieved on our leases, the collection of rent from our tenants and the level of property operating expenses, property management operating expenses and general and administrative expenses.

During 2014, net cash provided by operating activities was \$160.5 million, which included \$187.0 million from noncash adjustments to net loss and \$6.6 million from other changes in operating assets and liabilities, partially offset by net loss of \$33.1 million. Net cash used for investing activities was \$1.9 billion, which primarily consisted of cash outflows of \$1.6 billion related to the acquisition of properties, including portfolio acquisitions, and \$185.4 million of renovation costs to prepare our properties for rental. These costs typically include paint, flooring, appliances, blinds and landscaping. Net cash provided by financing activities was \$1.7 billion, which primarily consisted of cash inflows of \$1.5 billion in proceeds from our securitization transactions, partially offset by net repayments of borrowings under our credit facility of \$168.0 million. Net cash used for total operations during 2014 was \$40.2 million.

Table of Contents

During 2013, net cash provided by operating activities was \$16.2 million, which included \$66.6 million from noncash adjustments to net loss, partially offset by \$31.3 million from other changes in operating assets and liabilities and \$19.1 million of net loss. Net cash used for investing activities was \$2.4 billion, which primarily consisted of cash outflows of \$2.0 billion related to the acquisition of properties and \$382.1 million of renovation costs to prepare our properties for rental. These costs typically include paint, flooring, appliances, blinds and landscaping. Net cash provided by financing activities was \$2.1 billion, which primarily consisted of cash inflows of \$844.8 million from our IPO and the concurrent private placements to AH LLC and APFC, \$703.5 million from the issuance of our Class A common shares sold in the March 2013 private placement, \$212.6 million from the issuance of our Preferred Shares and a \$375.0 million net increase in borrowings under the credit facility. Net cash used for total operations during 2013 was \$248.2 million.

During 2012, net cash used for operating activities was \$6.5 million, which included \$10.2 million of net loss, partially offset by \$2.6 million from noncash adjustments to net loss and \$1.1 million from other changes in operating assets and liabilities. Net cash used for investing activities was \$97.5 million, which included cash outflows of \$94.9 million for acquisition-related costs of properties and \$2.6 million in costs to renovate properties. Net cash provided by financing activities was \$501.2 million and primarily consisted of \$494.8 million of proceeds from the issuance of Class A common shares. Net cash provided by total operations during 2012 was \$397.2 million.

Share Issuances

In May 2014, the Company issued 7,600,000 5.5% Series C participating preferred shares in an underwritten public offering and concurrent private placement, raising gross proceeds of \$190.0 million before offering costs of \$9.7 million.

In July 2014, the Company issued 8,158,001 Class A common shares, \$0.01 par value per share, in connection with the acquisition of Beazer Rental Homes.

In August 2014, the Company issued 17,782,861 Class A common shares, \$0.01 par value per share, in an underwritten public offering and concurrent private placement, raising gross proceeds of \$313.3 million before offering costs of \$4.9 million.

Distributions

To qualify as a REIT, we are required to distribute annually at least 90% of our REIT taxable income, without regard to the deduction for dividends paid and excluding net capital gains, and to pay tax at regular corporate rates to the extent that we annually distribute less than 100% of our net taxable income. We intend to pay quarterly dividends to our shareholders, which in the aggregate approximately equal our net taxable income in the relevant year. Our board of trustees declared distributions that totaled \$0.20 per share and \$0.05 per share on our Class A and Class B common shares during the years ended December 31, 2014 and 2013, respectively. Our board of trustees declared distributions that totaled \$1.25 per share, \$1.2875 per share and \$0.912847 per share on our 5.0% Series A participating preferred shares, 5.0% Series B participating preferred shares and 5.5% Series C participating preferred shares, respectively, during the year ended December 31, 2014. Distributions declared on our 5.0% Series A participating preferred shares totaled \$0.229167 per share for the year ended December 31, 2013. Our board of trustees declared distributions that totaled \$0.60452 per share and \$0.15113 per share on our Series C convertible units during the years ended December 31, 2014 and 2013, respectively.

Credit Facility

We have an \$800 million senior secured revolving credit facility with a group of financial institutions. The amount that may be borrowed under the credit facility is generally based on 50% of

Table of Contents

the lower of cost or the value of our qualifying leased and un-leased properties and certain other measures based in part on the net income generated by our qualifying leased and un-leased properties, which is referred to as the "Borrowing Base." Borrowings under the credit facility are available through March 7, 2015, which may be extended for an additional year, subject to the satisfaction of certain financial covenant tests. Upon expiration of the credit facility period, any outstanding borrowings will convert to a term loan through September 30, 2018. All borrowings under the credit facility bear interest at 30 day LIBOR plus 2.75% until March 2017, and thereafter at 30 day LIBOR plus 3.125%. The Company currently anticipates extending the credit facility period for an additional year, on or before March 7, 2015.

The credit facility is secured by our Operating Partnership's membership interests in entities that own our single-family properties and requires that we maintain financial covenants relating to the following matters: (i) minimum liquidity of cash, cash equivalents and borrowing capacity under any credit facilities in an aggregate amount of at least \$15.0 million, of which at least \$7.5 million must be in cash and cash equivalents; (ii) a maximum leverage ratio of 1.0 to 1.0; and (iii) tangible net worth of not less than the sum of 85% of our tangible net worth as of September 30, 2013, plus 85% of the net proceeds of any additional equity capital raises completed on or after September 30, 2013. As of December 31, 2014, the Company was in compliance with all covenants.

Asset-backed Securitizations

May 2014 Securitization

In May 2014, we completed a private securitization transaction (the "2014-SFR1 securitization") in which a newly-formed special purpose entity (the "Borrower") entered into a loan with a third-party lender for \$481.0 million represented by a promissory note (the "Note"). In addition, the Company entered into an interest rate cap agreement for the initial two year term of the loan, with a LIBOR based strike rate equal to 3.85%. The Borrower under the loan is wholly owned by another special purpose entity (the "Equity Owner") and the Equity Owner is wholly owned by the Operating Partnership. The loan is a two-year, floating rate loan, comprised of six floating rate components computed monthly based on one month LIBOR for each interest period plus a fixed component spread for each of the six components resulting in a duration-weighted blended interest rate of LIBOR plus 1.54%, subject to a LIBOR floor of 0.25%. The Note requires monthly payments of interest together with principal payments representing one-twelfth of one percent of the original principal amount.

The loan may be extended for three, 12-month extensions at the Borrower's option, resulting in a fully extended maturity date of June 9, 2019, provided there is no event of default under the Loan Agreement, the Borrower obtains a replacement interest rate cap agreement in a form reasonably acceptable to Lender and the Borrower complies with the other terms set forth in the Loan Agreement.

The Note was immediately transferred by the third-party lender to a subsidiary of the Company and then to a REMIC trust in exchange for seven classes of single-family rental pass-through certificates representing all the beneficial ownership interests in the loan and the trust. Upon receipt of the certificates, a subsidiary of the Company sold the certificates to investors for gross proceeds of \$481.0 million, before issuance costs of \$14.9 million. Proceeds from this transaction were used to pay down the outstanding balance on the credit facility. The principal amount of each class of certificates corresponds to the corresponding principal amount of the loan components with an additional class to hold the residual REMIC interest.

The loan is secured by first priority mortgages on a pool of 3,852 homes transferred to the Borrower from the Company's portfolio of properties. The Borrower's homes were substantially similar to the other properties owned by the Company and were leased to tenants underwritten on substantially the same basis as the tenants in the Company's other properties. During the duration of

Table of Contents

the loan, the Borrower's properties may not generally be transferred, sold or otherwise securitized, the Company can substitute properties only if a property owned by the Borrower becomes a disqualified property under the terms of the loan, and the Borrower is limited in its ability to incur any additional indebtedness.

The loan is also secured by a security interest in all of the Borrower's personal property and a pledge of all of the assets of the Equity Owner, including a security interest in its membership interest in the Borrower. The Company provides a limited guaranty (i) for certain losses arising out of designated acts of intentional misconduct and (ii) for the principal amount of the loan and all other obligations under the loan agreement in the event of insolvency or bankruptcy proceedings.

The loan agreement provides that the Borrower maintain covenants typical for securitization transactions including establishing and maintaining a cash management account controlled by the lender to collect all rents and cash generated by the Borrower's properties. In the absence of an event of default, the Borrower will receive any excess cash after payment of monthly interest, principal and property related expenses. Upon the occurrence of an event of default under the loan or if the Borrower does not maintain a debt yield (net cash flow divided by the outstanding principal balance of the loan) on the portfolio of at least 6.68%, the lender may transfer the excess cash to an account which lender may apply any funds as the lender elects, including to prepay principal and pay any amounts due under the loan. The lender may also foreclose on its security interests, in limited circumstances may enforce the Company's guaranty and may appoint a new property manager. As of December 31, 2014, the Company was in compliance with all covenants under the loan agreement.

The Company has accounted for the transfer of the Note from its subsidiary to the trust as a sale under ASC 860, *Transfers and Servicing*, with no resulting gain or loss as the Note was both originated by the third party lender and immediately transferred at the same fair market value. The Company has also evaluated and not identified any variable interests in the trust. Accordingly, the Company continues to consolidate, at historical cost basis, the 3,852 homes placed as collateral for the Note and has recorded a \$478.6 million asset-backed securitization liability, representing the principal balance outstanding on the Note as of December 31, 2014, in the consolidated balance sheets. The 3,852 collateral homes had a net book value of \$627.0 million as of December 31, 2014.

The interest rate cap agreement entered into as part of the securitization transaction has been formally designated as a cash flow hedge at inception and will be regularly assessed for effectiveness on an ongoing basis. During the year ended December 31, 2014, the Company's interest rate cap agreement was 100% effective as a cash flow hedge and, as a result, changes in fair value have been classified in accumulated other comprehensive loss. These amounts will subsequently be reclassified into earnings in the period in which the hedged transaction affects earnings. Over the next 12 months, the Company estimates that \$0.1 million will be reclassified as an increase to interest expense. The fair value of the interest rate cap agreement is estimated to be \$0.01 million as of December 31, 2014, (see Note 15) and has been included in escrow deposits, prepaid expenses and other assets in the consolidated balance sheets.

September 2014 Securitization

In September 2014, we completed our second securitization transaction (the "2014-SFR2 securitization"), which was structured substantially similar to the 2014-SFR1 securitization. The principal differences from the 2014-SFR1 securitization are: (1) the loan is a fixed rate loan for \$513.3 million with a ten year term, maturity date of October 9, 2024, and a duration-adjusted weighted-average interest rate of 4.42%, (2) no interest rate cap agreement was part of the transaction, (3) the loan is secured by first priority mortgages on a portfolio of 4,487 single-family residential properties owned by the borrower, a subsidiary of the Company and (4) in lieu of a debt yield requirement, the loan agreement provides that if the borrower does not maintain a debt service

Table of Contents

coverage ratio of at least 1.20 to 1.00, the lender may transfer cash to an account from which the lender may apply funds as it elects, including prepayment of the loan and principal. The loan agreement defines the debt service coverage ratio as of any determination date as a ratio in which the numerator is the net cash flow (as defined in the loan agreement) divided by the aggregate debt service for the twelve month period following the date of determination. Also, in addition to the single-family rental pass-through certificates sold to third parties, the Company acquired all of the Class F certificates, which bear no interest, for \$25.7 million. Gross proceeds to the Company from the 2014-SFR2 securitization, after purchase of the Class F certificates, were \$487.7 million, before issuance costs of \$12.9 million. Proceeds from this transaction were used to pay down the outstanding balance on the credit facility and for general corporate purposes.

The Company has accounted for the transfer of the 2014-SFR2 securitization promissory note to the trust as a sale under ASC 860 with no resulting gain or loss as the note was both originated by the third-party lender and immediately transferred at the same fair market value. The Company has also evaluated the purchased Class F certificates as a variable interest in the trust and has concluded that the Class F certificates will not absorb a majority of the trust's expected losses or receive a majority of the trust's expected residual returns. Additionally, the Company has concluded that the Class F certificates do not provide the Company with any ability to direct activities that could impact the trust's economic performance. Accordingly, the Company does not consolidate the trust and continues to consolidate, at historical cost basis, the 4,487 homes placed as collateral for the note and has recorded a \$512.4 million asset-backed securitization liability, representing the principal balance outstanding on the note as of December 31, 2014, in the consolidated balance sheets. Separately, the \$25.7 million of purchased Class F certificates have been reflected as asset-backed securitization certificates in the consolidated balance sheets. The 4,487 collateral homes had a net book value of \$692.6 million as of December 31, 2014.

November 2014 Securitization

In November 2014, we completed our third securitization transaction (the "2014-SFR3 securitization"), which was structured substantially similar to the 2014-SFR2 securitization. The principal differences from the 2014-SFR2 securitization are: (1) the loan is a fixed rate loan for \$528.4 million with a ten year term, maturity date of December 9, 2024, and a duration-adjusted weighted-average interest rate of 4.40%, (2) the loan is secured by first priority mortgages on a portfolio of 4,503 single-family residential properties owned by the borrower, a subsidiary of the Company and (3) the Company did not acquire any of the certificates associated with this transaction. Gross proceeds to the Company from the 2014-SFR3 securitization were \$528.4 million, before issuance costs of \$12.9 million. Proceeds from this transaction were used to pay down the outstanding balance on the credit facility and for general corporate purposes. The Company consolidates, at historical cost basis, the 4,503 homes placed as collateral for the Note and has recorded a \$528.4 million asset-backed securitization liability, representing the principal balance outstanding on the Note as of December 31, 2014, in the consolidated balance sheets. The 4,503 collateral homes had a net book value of \$752.8 million as of December 31, 2014.

Note Payable

As part of the Ellington Portfolio Acquisition on December 31, 2014, the Company assumed a \$51.6 million note payable. The debt consists of a 5-year note payable, which is secured by a first priority mortgage on 583 of the homes acquired as part of the Ellington Portfolio Acquisition, bears interest at 4.06%, matures on July 1, 2019, and contains certain required covenants, including a minimum debt service coverage ratio of 1.56 to 1.00.

Table of Contents

Other Transactions with AH LLC and its Affiliates

Contribution in Connection With Our Initial Private Placement

In connection with our initial private placement, on December 31, 2012, AH LLC contributed 367 single-family properties with an agreed-upon value of \$49.4 million and made a cash investment of \$0.6 million. In connection with this acquisition, AH LLC received 3,300,000 of our Class A common shares, 667 of our Class B common shares and 32,667 Class A units. The agreed-upon value of this contribution was \$50.0 million, with the value of the single-family properties contributed based on their purchase price together with renovation costs, holding costs and transfer costs incurred by AH LLC, and a 5% acquisition fee to AH LLC. Because the transaction has been deemed to be between "entities under common control" under the provisions of ASC 805, *Business Combinations*, the single-family properties acquired have been recorded at AH LLC's net carrying cost of \$47.6 million as of the date of the acquisition, without consideration of the acquisition fees which were expensed.

AH LLC Portfolio Contribution

On February 28, 2013, pursuant to a contribution agreement with AH LLC, we acquired a portfolio of 2,770 single-family properties with an agreed-upon value of \$491.7 million in exchange for 31,085,974 Series C units and 634,408 Class B common shares, in each case based on a price per unit or share of \$15.50. Because the transaction is also considered to be between entities under common control, the accounts relating to the properties acquired have been reflected retroactively in our consolidated financial statements based on the results of operations and net book value recorded by AH LLC. Holders of the Series C units are entitled to distributions equal to actual net cash flow of the portfolio of 2,770 properties that we purchased from AH LLC on February 28, 2013, up to a maximum of 3.9% per unit per annum based on a price per unit of \$15.50. Pursuant to the contribution agreement, AH LLC was responsible for all costs to transfer the properties and for paying costs associated with the completion of initial renovation of the properties after we acquire them. Concurrently with this transaction, the Advisor agreed to a permanent reduction in the advisory management fee of \$9.8 million per year in connection with the increased shareholder's equity.

Holders of the Series C units have a one-time right to convert all such units into Class A units. If on the date of conversion, the contributed properties are not initially leased (as defined) for at least 98% of the scheduled rents (determined on an aggregate basis) the Series C units with respect to the single-family properties leased for at least 98% of the scheduled rents (determined on an aggregate basis) will convert into Class A units on a one for one basis, and the Series C units associated with the remaining single-family properties will convert into a number of Class A units determined by dividing AH LLC's aggregate cost (as defined) of the properties (including the acquisition fees) by \$15.50, with proportionate reductions in Class B shares.

45 Property Acquisition

On December 12, 2014, we and the Operating Partnership entered into a contribution agreement with AH LLC, pursuant to which AH LLC contributed to the Operating Partnership all of AH LLC's interest in 45 properties owned by AH LLC. The value of the properties was determined by broker price opinions prepared by independent third parties. In exchange for the properties, the Operating Partnership issued to AH LLC 653,378 Class A units valued at \$17.11 per unit, the closing price on the NYSE for the Company's Class A common shares on December 11, 2014.

Off-Balance Sheet Arrangements

We have no obligations, assets or liabilities that would be considered off-balance sheet arrangements.

Table of Contents**Contractual Obligations**

Contractual obligations as of December 31, 2014, consisted of the following (in thousands):

	Payments by Period				
	Total	2015	2016 - 2017	2018 - 2019	Thereafter
Credit facility ⁽¹⁾	\$ 207,000	\$	\$	\$ 207,000	\$
Asset-backed securitizations	1,519,390			478,565	1,040,825
Note payable	51,644			51,644	
Operating lease obligations	4,101	1,692	2,265	144	
Purchase obligations	110,866	110,866			
Total	\$ 1,893,001	\$ 112,558	\$ 2,265	\$ 737,353	\$ 1,040,825

- (1) Amount represents principal amount due and excludes any expected interest payments. Interest under the credit facility is based on 30 day LIBOR plus 2.75% as of December 31, 2014.

Critical Accounting Policies and Estimates

Our discussion and analysis of our historical financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could ultimately differ from these estimates. Listed below are those policies that management believes are critical and require the use of judgment in their application. There are other items within the financial statements that require estimation, but they are not considered critical as they do not require significant judgment or are immaterial.

Investment in Real Estate

Transactions in which single-family properties are purchased that are not subject to an existing lease are treated as asset acquisitions and, as such, are recorded at their purchase price, including acquisition fees, which is allocated to land and building based upon their relative fair values at the date of acquisition. Single-family properties that are acquired either subject to an existing lease or as part of a portfolio level transaction are treated as a business combination under ASC 805, *Business Combinations*, and, as such, are recorded at fair value, allocated to land, building and the existing lease, if applicable, based upon their relative fair values at the date of acquisition, with acquisition fees and other costs expensed as incurred. Fair value is determined in accordance with ASC 820, *Fair Value Measurements and Disclosures*, primarily based on unobservable data inputs. In making estimates of fair values for purposes of allocating the purchase price of individually acquired properties subject to an existing lease, the Company utilizes its own market knowledge and published market data. In this regard, the Company also utilizes information obtained from county tax assessment records to assist in the determination of the fair value of the land and building. The Company engages a third party valuation specialist to assist in the determination of fair value for purposes of allocating the purchase price of properties acquired as part of portfolio level transactions.

The value of acquired lease-related intangibles is estimated based upon the costs we would have incurred to lease the property under similar terms. Such costs are capitalized and amortized over the remaining life of the lease. Acquired leases are generally short-term in nature (less than one year).

The nature of our business requires that in certain circumstances we acquire single-family properties subject to existing liens. Liens that we expect to be extinguished in cash are estimated and accrued on the date of acquisition and recorded as a cost of the property.

Table of Contents

We incur costs to prepare our acquired properties for rental. These costs, along with related holding costs, are capitalized to the cost of the property during the period an asset is undergoing activities to prepare it for its intended use. We capitalize interest costs as a cost of the project only during the period for which activities necessary to prepare an asset for its intended use are ongoing, provided that expenditures for the asset have been made and interest costs have been incurred. Upon completion of the renovation of our properties, all costs of operations, including repairs and maintenance, are expensed as incurred.

Impairment of Long-Lived Assets

We evaluate our long-lived assets for impairment periodically or whenever events or circumstances indicate that their carrying amount may not be recoverable. Significant indicators of impairment may include, but are not limited to, declines in home values, rental rates and occupancy percentages, as well as significant changes in the economy. If an impairment indicator exists, we compare the expected future undiscounted cash flows against the net carrying amount. If the sum of the estimated undiscounted cash flows is less than the net carrying amount, we record an impairment loss for the difference between the estimated fair value of the individual property and the carrying amount of the property at that date. No material impairments have been recorded since the inception of the Company.

Leasing Costs

Direct and incremental costs incurred to lease properties are capitalized and amortized over the term of the leases, which generally have a term of one year. Prior to the Management Internalization, we paid the Property Manager a leasing fee equal to one-half of one month's rent for each lease.

Intangible Assets

Intangible assets are amortized on a straight-line basis over the asset's estimated economic life and are tested for impairment based on undiscounted cash flows and, if impaired, are written down to fair value based on discounted cash flows. The identified intangible assets acquired as part of the Management Internalization are amortized over amortizable lives of 4.7 years for trademark and 7.0 years for database.

Goodwill

Goodwill represents the fair value in excess of the tangible and separately identifiable intangible assets that were acquired as part of the Management Internalization (see Note 11). Goodwill has an indefinite life and is therefore not amortized. The Company analyzes goodwill for impairment on an annual basis pursuant to ASC 350, *Intangibles - Goodwill and Other*, which permits us to assess qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than the carrying amount as a basis to determine whether the two-step impairment test is necessary. We also have the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. The first step in the impairment test compares the fair value of the reporting unit with its carrying amount. If the carrying amount exceeds fair value, the second step is required to determine the amount of the impairment loss by comparing the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. Impairment charges, if any, are recognized in operating results. No goodwill impairments have been recorded during the years ended December 31, 2014, 2013 and 2012.

Table of Contents

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses that may result from the inability of tenants to make required rent or other payments. This allowance is estimated based on, among other considerations, payment histories, overall delinquencies and available security deposits.

Revenue and Expense Recognition

We lease single-family properties that we own directly to tenants who occupy the properties under operating leases, generally, with a term of one year. Rental revenue, net of any concessions, is recognized on a straight-line basis over the term of the lease, which is not materially different than if it were recorded when due from tenants and recognized monthly as it is earned.

We accrue for property taxes and HOA assessments based on amounts billed, and, in some circumstances, estimates and historical trends when bills or assessments are not available. If these estimates are not correct, the timing and amount of expenses recorded could be incorrect.

Accounts Payable and Accrued Expenses

Accrued and other liabilities consist primarily of trade payables, resident security deposits, construction liabilities, HOA fees and property tax accruals as of the end of the respective period presented. It also consists of contingent loss accruals, if any. Such losses are accrued when they are both probable and estimable. When it is reasonably possible that a significant contingent loss has occurred, we disclose the nature of the potential loss and, if estimable, a range of exposure.

Fair Value of Financial Instruments

The fair value of a financial instrument is the amount at which the instrument could be exchanged in an orderly transaction between two willing parties. The carrying amount of rent and other receivables, restricted cash, escrow deposits, prepaid expenses and other assets, and accounts payable and accrued expenses approximate fair value because of the short maturity of these amounts. The Company's interest rate cap agreement, contingently convertible Series E units liability and preferred shares derivative liability are the only financial instruments recorded at fair value on a recurring basis within our consolidated financial statements.

Derivatives

We currently use, and in the future may use, interest rate cap agreements for interest rate risk management purposes and in conjunction with certain LIBOR-based variable rate debt to satisfy lender requirements. We assess these derivatives at inception and on an ongoing basis for the effectiveness of qualifying cash flow hedges. For a derivative instrument that is designated and qualifies as a cash flow hedge, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income and reclassified into earnings as interest expense. The ineffective portion of the change in fair value of our interest rate cap agreements is required to be recognized directly in earnings.

Income Taxes

We have elected to be taxed as a REIT under Sections 856 to 860 of the Internal Revenue Code of 1986 (the "Code"), which commenced with our taxable year ended December 31, 2012. We believe that we have operated, and continue to operate, in such a manner as to satisfy the requirements for qualification as a REIT. Accordingly, we will not be subject to federal income tax, provided that we qualify as a REIT and our distributions to our shareholders equal or exceed our REIT taxable income.

Table of Contents

However, qualification and taxation as a REIT depends upon our ability to meet the various qualification tests imposed under the Code, including tests related to the percentage of income that we earn from specified sources and the percentage of our earnings that we distribute. Accordingly, no assurance can be given that we will continue to be organized or be able to operate in a manner so as to remain qualified as a REIT. If we fail to qualify as a REIT in any taxable year, we will be subject to federal and state income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate tax rates, and we may be ineligible to qualify as a REIT for four subsequent tax years. Even if we qualify as a REIT, we may be subject to certain state or local income and capital taxes and U.S. federal income and excise taxes on our undistributed taxable income, if any. Our taxable REIT subsidiary will be subject to federal, state and local taxes on its income at regular corporate rates. The tax years from 2012 through 2014 remain open to examination by the taxing jurisdictions to which the Company is subject.

ASC 740-10, *Income Taxes*, requires recognition of deferred tax assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. We recognize tax benefits of uncertain tax positions only if it is more likely than not that the tax position will be sustained, based solely on its technical merits, with the taxing authority having full authority of all relevant information. The measurement of a tax benefit for an uncertain tax position that meets the "more likely than not" threshold is based on a cumulative probability model under which the largest amount of tax benefit recognized is the amount with a greater than 50% likelihood of being realized upon ultimate settlement with the taxing authority having full knowledge of all the relevant information. As of December 31, 2014, there were no deferred tax assets and liabilities or unrecognized tax benefits recorded. We do not anticipate a significant change in unrecognized tax benefits within the next 12 months.

Non-GAAP Measures

Net Operating Income

Net operating income, or NOI, is a supplemental non-GAAP financial measure. The Company defines NOI as rents and other revenue from single-family properties, less property operating expenses for leased single-family properties. The Company considers NOI to be a meaningful financial measure because we believe it is helpful to investors in understanding the operating performance of our single-family properties. It should be considered only as a supplement to net loss as a measure of our performance. NOI should not be used as a measure of the Company's liquidity, nor is it indicative of funds available to fund the Company's cash needs, including its ability to pay dividends or make distributions. NOI also should not be used as a supplement to or substitute for net loss or net cash flows from operating activities (as computed in accordance with GAAP). Because other REITs may define NOI differently, NOI may not be comparable to NOI reported by other REITs.

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

The following is a reconciliation of NOI to net loss as determined in accordance with GAAP (in thousands):

	For the Years Ended		
	December 31, 2014	December 31, 2013	December 31, 2012
Net loss	\$ (33,092)	\$ (19,066)	\$ (10,236)
Income from discontinued operations		(1,008)	
Gain on remeasurement of equity method investment		(10,945)	
Remeasurement of Preferred Shares	6,158	1,810	
Remeasurement of Series E units	5,119	2,057	
Depreciation and amortization	165,516	70,987	2,111
Acquisition fees and costs expensed	22,386	4,799	869
Noncash share-based compensation expense	2,586	1,079	70
Interest expense	19,881	370	
Advisory fees		6,352	937
General and administrative expense	21,947	8,845	7,199
Property operating expenses for vacant single-family properties and other	23,408	22,341	1,846
Other revenues	(1,590)	(1,083)	
 Net operating income	 \$ 232,319	 \$ 86,538	 \$ 2,796

Funds from Operations and Core Funds from Operations

Funds from operations ("FFO") is a non-GAAP measure that we calculate in accordance with the White Paper on FFO approved by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"), which defines FFO as net income or loss calculated in accordance with GAAP, excluding extraordinary items, as defined by GAAP, gains and losses from sales of depreciable real estate and impairment write-downs associated with depreciable real estate, plus real estate-related depreciation and amortization (excluding amortization of deferred financing costs and depreciation of non-real estate assets), and after adjustment for unconsolidated partnerships and joint ventures. Core funds from operations ("Core FFO") is a non-GAAP financial measure that we use as a supplemental measure of our performance. We compute Core FFO by adjusting FFO for (a) acquisition fees and costs expensed incurred with recent business combinations and the acquisition of properties with existing leases, (b) noncash share-based compensation expense and (c) noncash fair value adjustments associated with remeasuring our Series E units liability and preferred shares derivative liability to fair value.

We present FFO and FFO per FFO share (defined as weighted-average common shares outstanding, with assumed conversion of all Operating Partnership units that are potentially convertible into common shares) because we consider FFO to be an important measure of the performance of real estate companies, as do many analysts in evaluating our Company. We believe that FFO is a helpful measure of a REIT's performance since FFO excludes depreciation, which is included in computing net income and assumes the value of real estate diminishes predictably over time. We believe that real estate values fluctuate due to market conditions and in response to inflation. We also believe that Core FFO and Core FFO per FFO share are helpful to investors as supplemental measures of the operating performance of our Company as they allow investors to compare our operating performance to prior reporting periods without the effect of certain items that, by nature, are not comparable from period to period. FFO and Core FFO are not a substitute for net cash flow provided by operating activities or net loss per share, as determined in accordance with GAAP, as a measure of our liquidity, operating performance or ability to pay dividends. FFO and Core FFO also are not necessarily indicative of cash

Edgar Filing: American Homes 4 Rent - Form 10-K

Table of Contents

available to fund future cash needs. Because other REITs may not compute FFO and Core FFO in the same manner, FFO and Core FFO may not be comparable among REITs.

The following is a reconciliation of net loss attributable to common shareholders, determined in accordance with GAAP, to FFO and Core FFO for the years ended December 31, 2014, 2013 and 2012 (amounts in thousands, except share data):

	For the Years Ended December 31,		
	2014	2013	2012
Net loss attributable to common shareholders	\$ (66,985)	\$ (43,927)	\$ (10,236)
Adjustments:			
Noncontrolling interests in the Operating Partnership	15,229	13,303	
Depreciation and amortization of real estate assets	159,286	68,399	2,111
Gain on disposition of single-family properties		(904)	
 Funds from operations	 \$ 107,530	 \$ 36,871	 \$ (8,125)
 Adjustments:			
Acquisition fees and costs expensed	22,386	4,799	869
Noncash share-based compensation expense	2,586	1,079	70
Gain on remeasurement of equity method investment		(10,945)	
Remeasurement of Series E units	5,119	2,057	
Remeasurement of Preferred shares	6,158	1,810	
Conversion of preferred units		10,456	
 Core funds from operations	 \$ 143,779	 \$ 46,127	 \$ (7,186)
 Weighted-average number of FFO shares ⁽¹⁾	 250,625,401	 239,127,560	 38,697,333
 FFO per weighted-average FFO share	 \$ 0.43	 \$ 0.15	 \$ (0.21)
 Core FFO per weighted-average FFO share	 \$ 0.57	 \$ 0.19	 \$ (0.19)

- (1) Includes weighted-average common shares outstanding and assumes full conversion of all Operating Partnership units outstanding, including Class A units, which totaled 14,440,670 at December 31, 2014, and 13,787,292 at December 31, 2013 and 2012, as well as 31,085,974 Series C units, 4,375,000 Series D units and 4,375,000 Series E units at December 31, 2014, 2013 and 2012.

Table of Contents**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Interest Rate Risk**

The primary market risk to which we believe we are exposed is interest rate risk, which may result from many factors, including government monetary and tax policies, domestic and international economic and political considerations, and other factors that are beyond our control. We may incur additional variable rate debt in the future, including additional amounts that we may borrow under our credit facility. In addition, decreases in interest rates may lead to additional competition for the acquisition of single-family homes, which may lead to future acquisitions being more costly and resulting in lower yields on single-family homes targeted for acquisition. Significant increases in interest rates may also have an adverse impact on our earnings if we are unable to acquire single-family homes with rental rates high enough to offset the increase in interest rates on our borrowings.

As of December 31, 2014, the total outstanding balance of our variable-rate debt was comprised of borrowings on our credit facility and 2014-SFR1 asset-backed securitization of \$207.0 million and \$478.6 million, respectively. As of December 31, 2013, the total outstanding balance of our variable-rate debt was comprised of borrowings on our credit facility of \$375.0 million. All borrowings under our credit facility bear interest at 30 day LIBOR plus 2.75% until March 2017, and thereafter at 30 day LIBOR plus 3.125%, while borrowings under our asset-backed securitization bear interest at a duration-weighted blended interest rate of LIBOR plus 1.54%. Assuming no change in the outstanding balance of our existing variable-rate debt, the following table illustrates the effect of a 100 basis point increase or decrease in the LIBOR rate on our projected annual interest expense as of December 31, 2014 and 2013 (in thousands):

	December 31, 2014	December 31, 2013
Impact to future earnings due to variable rate debt, before the effect of capitalization:		
Rate increase of 1% ⁽¹⁾	\$ (6,856)	\$ (3,750)
Rate decrease of 1% ⁽²⁾	\$ 331	\$ 638

- (1) Calculation of additional projected annual interest expense as a result of a 100 basis point increase reflects the potential impact of our interest rate cap agreement as of December 31, 2014.
- (2) Calculation of projected decrease in annual interest expense as a result of a 100 basis point decrease is reflective of any LIBOR floors or minimum interest rates stated in the agreements of respective borrowings.

These analyses do not consider the effects of the reduced level of overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, we would consider taking actions to further mitigate our exposure to the change. However, because of the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our capital structure.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this Item is included as a separate section in this annual report on Form 10-K. See "Item 15. Exhibits and Financial Statement Schedules."

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Table of Contents

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2014, we performed an evaluation, under the supervision of our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. These controls and procedures have been designed to ensure that information required for disclosure is recorded, processed, summarized, and reported within the requisite time periods. Based on our evaluation, the CEO and CFO concluded that our disclosure controls and procedures were effective as of December 31, 2014.

Changes in Internal Controls over Financial Reporting

There have been no changes to the Company's internal controls over financial reporting that occurred during our last fiscal quarter of the year ended December 31, 2014, that materially affected, or were reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is a process to provide reasonable assurance regarding the reliability of our financial reporting for external purposes in accordance with GAAP. Internal control over financial reporting includes maintaining records that in reasonable detail accurately and fairly reflect our transactions; providing reasonable assurance that transactions are recorded as necessary for preparation of our financial statements; providing reasonable assurance that receipts and expenditures of Company assets are made in accordance with management authorization; and providing reasonable assurance that unauthorized acquisition, use or disposition of Company assets that could have a material effect on our financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the 2013 framework in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2014.

BDO USA, LLP, an independent registered public accounting firm that audited our consolidated financial statements included in this Annual Report, has issued an attestation report on our internal control over financial reporting as of December 31, 2014, which is set forth below.

Table of Contents

Report of Independent Registered Public Accounting Firm

Board of Trustees and Shareholders
American Homes 4 Rent
Agoura Hills, CA

We have audited American Homes 4 Rent and its subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). American Homes 4 Rent's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Item 9A, Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, American Homes 4 Rent maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of American Homes 4 Rent as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2014 and our report dated March 2, 2015 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

Board of Trustees and Shareholders
American Homes 4 Rent
Agoura Hills, CA

We have audited the accompanying consolidated balance sheets of American Homes 4 Rent and its subsidiaries (the "Company") as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. In connection with our audits of the consolidated financial statements, we have also audited the financial statement schedule listed in the accompanying index. These consolidated financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and schedule. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1, the consolidated financial statements include the accounts of certain single-family properties (the "Properties") contributed to the Company by American Homes 4 Rent, LLC, a related entity, on December 31, 2012 and February 28, 2013, which were not legal stand-alone entities. The accounts of the Properties reflect the assets, liabilities, income, and expenses directly attributable to the Properties, as well as allocations deemed reasonable by management, to present the financial position, results of operations, and cash flows of the Properties and do not necessarily reflect the financial position, results of operations, and cash flows of the Properties operated as stand-alone entities during the periods presented and, accordingly, may not be indicative of the Company's future performance.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American Homes 4 Rent and its subsidiaries at December 31, 2014 and 2013, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America.

Also, in our opinion, the financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), American Homes 4 Rent's internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 2, 2015 expressed an unqualified opinion thereon.
