(1) BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements are prepared in accordance with instructions to Form 10-Q and do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for complete financial statements. All adjustments are of a normal and recurring nature and, in the opinion of management, the statements include all adjustments considered necessary for fair presentation. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K to the Securities and Exchange Commission. Operating results for the six months ended March 31, 2006, are not necessarily indicative of the results that may be expected for the fiscal year ending September 30, 2006. The consolidated balance sheet of the Company as of September 30, 2005, has been derived from the audited balance sheet of the Company as of that date.

In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowances for losses on loans, real estate owned, and valuation of mortgage servicing rights. Management believes that

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

these allowances are adequate, however, future additions to the allowances may be necessary based on changes in economic conditions.

The Company's critical accounting policies involving the more significant judgments and assumptions used in the preparation of the consolidated financial statements as of March 31, 2006, have remained unchanged from September 30, 2005. These policies relate to provision for loan losses and mortgage servicing rights. Disclosure of these critical accounting policies is incorporated by reference under Item 8 "Financial Statements and Supplementary Data" in the Company's Annual Report on Form 10-K for the Company's year ended September 30, 2005.

Certain quarterly amounts for previous periods have been reclassified to conform to the current quarter's presentation.

(9) SEGMENT INFORMATION

In accordance with SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information," the Company has identified three principal operating segments for purposes of financial reporting: Banking, Local Mortgage Banking, and National Mortgage Banking. These segments were determined based on the Company's internal financial accounting and reporting processes and are consistent with the information that is used to make operating decisions and to assess the Company's performance by the Company's key decision makers.

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

The National Mortgage Banking segment originates mortgage loans via the internet primarily for sale to investors. The Local Mortgage Banking segment originates mortgage loans for sale to investors and for the portfolio of the Banking segment. The Banking segment provides a full range of banking services through the Bank's branch network, exclusive of mortgage loan originations. A portion of the income presented in the Mortgage Banking segment is derived from sales of loans to the Banking segment based on a transfer pricing methodology that is designed to approximate economic reality. The Other and Eliminations segment includes financial information from the parent company plus inter-segment eliminations.

The following table presents financial information from the Company's operating segments for the periods indicated. Dollar amounts are expressed in thousands.

(10) RESTATEMENT

In connection with the preparation of the Company's Consolidated Statements of Cash Flows, management reconsidered the classification of repayments on its loans held for sale in accordance guidance under Statement of Financial Accounting Standard No. 95, "Statement of Cash Flows" ("SFAS 95").

The Company has historically classified principal repayments on its loans held for sale in the investing section of the statement of cash flows. The SEC has taken exception with this treatment, and informed the Company that principal repayments on loans held for sale should be classified in the operating section of the statement of cash flows in accordance with guidance under SFAS 95. Additionally, as a result of researching this classification issue, management discovered an error in

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

its calculation of originations and principal repayments of loans held for sale reported in the statement of cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

GENERAL

The principal business of the Company is to provide banking services through the Bank. Specifically, the Bank obtains savings and checking deposits from the public, then uses those funds to originate and purchase real estate loans and other loans. The Bank also purchases mortgage-backed securities ("MBS") and other investment securities from time to time as conditions warrant. In addition to customer deposits, the Bank obtains funds from the sale of loans held-for-sale, the sale of securities available-for-sale, repayments of existing mortgage assets, advances from the Federal Home Loan Bank ("FHLB"), and the purchase of brokered deposit accounts. The Bank's primary sources of income are interest on loans, MBS, and investment securities plus customer service fees and income from mortgage banking activities. Expenses consist primarily of interest payments on customer deposits and other borrowings and general and administrative costs.

The Bank is regulated by the Office of Thrift Supervision ("OTS") and the Federal Deposit Insurance Corporation ("FDIC"), and is subject to periodic examination by both entities. The Bank is also subject to the regulations of the Board of Governors of the Federal Reserve System ("FRB"), which establishes rules regarding reserves that must be maintained against customer deposits.

FINANCIAL CONDITION

ASSETS

The Company's total assets as of March 31, 2006, were \$1,550.3 million, a decrease of \$6.0 million from September 30, 2005, the prior fiscal year end.

11

As the Bank originates mortgage loans each month, management evaluates the existing market conditions to determine which loans will be held in the Bank's portfolio and which loans will be sold in the secondary market. Loans sold in the secondary market can be sold with servicing released or converted into MBS and sold with the loan servicing retained by the Bank. At the time of each loan commitment, a decision is made to either hold the loan for investment, hold it for sale with servicing retained, or hold it for sale with servicing released. Management monitors market conditions to decide whether loans should be held in portfolio or sold and if sold, which method of sale is appropriate. During the six months ended March 31, 2006, the Bank originated \$539.6 million in mortgage loans held for sale, \$272.7 million in mortgage loans held for investment, and \$2.5 million in other loans. This total of \$814.8 million in loans originated compares to \$803.1 million in loans originated during the six months ended March 31, 2005.

Included in the \$53.4 million in loans held for sale as of March 31, 2006, are \$50.9 million in mortgage loans held for sale with servicing released. All loans held for sale are carried at the lower of cost or fair value.

The Bank classifies problem assets as "substandard," "doubtful" or "loss." Substandard assets have one or more defined weaknesses, and it is possible that the Bank will sustain some loss unless the deficiencies are corrected. Doubtful assets have the same defects as substandard assets plus other weaknesses that make collection or full liquidation improbable. Assets classified as loss are considered uncollectible and of such little value that a specific loss allowance is warranted.

The following table summarizes the Bank's classified assets as reported to the OTS, plus any classified assets of the holding company. Dollar amounts are expressed in thousands.

Management records a provision for loan losses in amounts sufficient to cover current net charge-offs and an estimate of probable losses based on an analysis of risks that management believes to be inherent in the loan portfolio. The Allowance for Loan and Lease Losses ("ALLL") recognizes the inherent risks associated with lending activities, but, unlike specific allowances, have not been allocated to particular problem assets but to a homogenous pool of loans. Management believes that the specific loss allowances and ALLL are adequate. While management uses available information to determine these allowances, future allowances may be necessary because of changes in economic conditions. Also, regulatory agencies (OTS and FDIC) review the Bank's allowance for losses as part of their examinations, and they may require the Bank to recognize additional loss provisions based on the information available at the time of their examinations.

The following table sets forth the activity in the allowance for loan losses for the six months ending March 31, 2006, and 2005. Dollar amounts are expressed in thousands.

LIABILITIES AND EQUITY

Customer and brokered deposit accounts increased \$104.6 million during the six months ended March 31, 2006. The weighted average rate on customer and brokered deposits as of March 31, 2006, was 3.52%, an increase from 2.45% as of March 31, 2005.

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

Advances from the FHLB were \$477.6 million as of March 31, 2006, an increase of \$11.7 million from September 30, 2005. During the six-month period, the Bank borrowed \$174.0 million of new advances and repaid \$162.2 million. Management regularly uses FHLB advances as an alternate funding source to provide operating liquidity and to fund the origination and purchase of mortgage loans.

Escrows were \$5.9 million as of March 31, 2006, a decrease of \$3.5 million from September 30, 2005. This decrease is due to amounts paid for borrowers' taxes during the fourth calendar quarter of 2005.

Total stockholders' equity as of March 31, 2006, was \$152.0 million (9.8% of total assets). This compares to \$148.9 million (9.6% of total assets) at September 30, 2005. On a per share basis, stockholders' equity was \$18.05 on March 31, 2006, compared to \$17.65 on September 30, 2005.

The Company paid cash dividends on its common stock of \$0.45 per share on November 25, 2005, and \$0.225 on February 24, 2006. Subsequent to the quarter ended March 31, 2006, the Company announced a cash dividend of \$0.225 per share to be paid on May 26, 2006, to stockholders of record as of May 5, 2006.

Total stockholders' equity as of March 31, 2006, includes an unrealized loss of \$2.6 million, net of deferred income taxes, on available for sale securities. This amount is reflected in the line item "Accumulated other comprehensive income."

RATIOS

The following table illustrates the Company's return on assets (annualized net income divided by average total assets); return on equity (annualized net income divided by average total equity); equity-to-assets ratio (ending total equity divided by ending total assets); and dividend payout ratio (dividends paid divided by net income).

RESULTS OF OPERATIONS - Comparison of three and six months ended March 31, 2006 and 2005.

For the three months ended March 31, 2006, the Company had net income of \$4,715,000 or \$0.56 per share. This compares to net income of \$6,067,000 or \$0.72 per share for the quarter ended March 31, 2005.

For the six months ended March 31, 2006, the Company had net income of \$9,924,000 or \$1.18 per share. This compares to net income of \$12,986,000 or \$1.54 per share for the six months ended March 31, 2005.

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

NET INTEREST MARGIN

The Company's net interest margin is comprised of the difference ("spread") between interest income on loans, MBS and investments and the interest cost of customer and brokered deposits and other borrowings. Management monitors net interest spreads and, although constrained by certain market, economic, and competition factors, it establishes loan rates and customer deposit rates that maximize net interest margin.

The following table presents the total dollar amounts of interest income and expense on the indicated amounts of average interest-earning assets or interest-costing liabilities for the six months ended March 31, 2006 and 2005. Average yields reflect reductions due to non-accrual loans. Once a loan becomes 90 days delinquent, any interest that has accrued up to that time is reserved and no further interest income is recognized unless the loan is paid current. Average balances and weighted average yields for the periods include all accrual and non-accrual loans. The table also presents the interest-earning assets and yields for each respective period. Dollar amounts are expressed in thousands.

Net interest margin before loan loss provision for the three months ended March 31, 2006, decreased \$968,000 from the same period in the prior year. Specifically, interest income increased \$4.3 million due to both an increase in the average balance of interest-earning assets and an increase in the average rate earned on such assets. The increase in interest income was offset by a \$5.3 million increase in interest expense, which resulted from both an increase in the average balance of interest-costing liabilities and an increase in the average rate paid on such liabilities.

Net interest margin before loan loss provision for the six months ended March 31, 2006, decreased \$1.9 million from the same period in the prior year. Specifically, interest income increased \$8.9 million. This increase was the result of a \$129.5 million increase in the average balance of interest-earning assets and a 68 basis point increase in the average rate earned on such assets. The increase in interest income was offset by a \$10.8 million increase in interest expense, which resulted from a 136 basis point increase in the average rate paid on interest-costing liabilities and a \$128.3 million increase in the average balance of such liabilities.

PROVISION FOR LOAN LOSSES

The Company recorded a provision for loan losses of \$93,000 during

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

the quarter ended March 31, 2006, due to an increase in construction and commercial real estate loans classified as "substandard." The Company recorded a provision for loan losses of \$65,000 during the quarter ended December 31, 2005, due to an increase in commercial real estate loans classified as "special mention." Management performs an ongoing analysis of individual loans and of homogenous pools of loans to assess for any impairment. On a consolidated basis, loan loss reserve was 60.1% of total classified assets at March 31, 2006, 55.5% at September 30, 2005, and 48.4% at March 31, 2005.

As stated above, management believes that the provisions for loan losses is adequate. The provision can fluctuate based on changes in economic conditions or changes in the information available to management. Also, regulatory agencies review the Company's allowances for losses as a part of their examination process and they may require changes in loss provision amounts based on information available at the time of their examination.

15

OTHER INCOME

Other income for the three months ended March 31, 2006, decreased \$703,000 from the same period in the prior year. Gain on sale of loans held for sale decreased \$511,000 due to a decrease in mortgage banking volume. Recovery on real estate owned decreased \$218,000 due to recoveries realized on the sale of foreclosed assets held for sale in the prior fiscal year. Customer service fees and charges decreased \$181,000 due primarily to a decrease in residential and commercial lending volumes. These decreases were offset by an increase in other income of \$169,000 due primarily to income recognized on the Company's investment in Central Platte Holdings, LLC.

Other income for the six months ended March 31, 2006, decreased \$1.4 million from the same period in the prior year. Recovery on real estate owned decreased \$899,000 due to recoveries realized on the sale of foreclosed assets held for sale in the prior fiscal year. Gain on sale of loans held for sale decreased \$313,000 due to a decrease in mortgage banking volume. Customer service fees and charges decreased \$126,000 due primarily to a decrease in residential and commercial lending volumes. Other income decreased \$66,000 due primarily to a \$375,000 decrease in the effect of recording the net fair value of certain loan-related commitments in accordance with FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities," which was largely offset by increases in income recognized on foreclosed assets and on the Company's investment in Central Platte Holdings, LLC.

GENERAL AND ADMINISTRATIVE EXPENSES

Total general and administrative expenses for the three months ended March 31, 2006, increased \$599,000 from the same period in the prior year. Advertising increased \$98,000 due to increased direct mail and newspaper advertising. Premises and equipment expense increased \$146,000 due primarily to costs related to the Company's new loan administration and construction lending building, which was completed in March 2005. Additionally, other expense increased \$399,000 due to an increase in credit, appraisal, and underwriting costs related to residential lending, an increase in audit fees due to the implementation of Section 404 of the Sarbanes-Oxley Act of 2002, and costs related to the conversion of the Company's loan origination system.

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

Total general and administrative expenses for the six months ended March 31, 2006, increased \$1.8 million from the same period in the prior year. Specifically, compensation, fringe benefits, and commission-based mortgage banking compensation increased \$596,000 due primarily to the continued growth of the local and national mortgage banking operations, and staffing increases in the Company's technology, audit, and compliance departments. Advertising increased \$361,000 due to increased costs related to the national mortgage banking operation. Premises and equipment expense increased \$227,000 due primarily to costs related to the Company's new loan administration and construction lending building, which was completed in March 2005. Additionally, other expense increased \$638,000 due to an increase in credit, appraisal, and underwriting costs related to residential lending, an increase in audit fees due to the implementation of Section 404 of the Sarbanes-Oxley Act of 2002, and costs related to the conversion of the Company's loan origination system.

REGULATION

The Bank is a member of the FHLB System and its customers' deposits are insured by the Savings Association Insurance Fund ("SAIF") of the FDIC. The Bank is subject to regulation by the OTS as its chartering authority. Since passage of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA" or the "Act"), the FDIC also has regulatory control over the Bank. The transactions of SAIF-insured institutions are limited by statute and regulations that may require prior supervisory approval in certain instances. Institutions also must file reports with regulatory agencies regarding their activities and their financial condition. The OTS and FDIC make periodic examinations of the Bank to test compliance with the various regulatory requirements. The OTS can require an institution to re-value its assets based on appraisals and to establish specific valuation allowances. This supervision and regulation is intended primarily for the protection of depositors. Also, savings institutions are subject to certain reserve requirements under Federal Reserve Board regulations.

16

INSURANCE OF ACCOUNTS

The SAIF insures the Bank's customer deposit accounts to a maximum of \$100,000 for each insured member. Deposit insurance premiums are determined using a Risk-Related Premium Schedule ("RRPS"), a matrix which places each insured institution into one of three capital groups and one of three supervisory groups. Currently, deposit insurance premiums range from 0 to 27 basis points of the institution's total deposit accounts, depending on the institution's risk classification. The Bank is currently considered "well capitalized", which is the most favorable capital group and supervisory subgroup. SAIF-insured institutions are also assessed a premium to service the interest on Financing Corporation ("FICO") debt.

REGULATORY CAPITAL REQUIREMENTS

At March 31, 2006, the Bank exceeds all capital requirements prescribed by the OTS. To calculate these requirements, a thrift must deduct any investments in and loans to subsidiaries that are engaged in activities not permissible for a national bank. As of March 31, 2006, the Bank did not have any investments in or loans to subsidiaries engaged in activities not permissible for national banks.

LOANS TO ONE BORROWER

Institutions are prohibited from lending to any one borrower in excess of 15% of the Bank's unimpaired capital plus unimpaired surplus, or 25% of unimpaired capital plus unimpaired surplus if the loan is secured by certain readily marketable collateral. Renewals that exceed the loans-to-one-borrower limit are permitted if the original borrower remains liable and no additional funds are disbursed. The Bank has enrolled with the OTS to participate in the "Lending Limits Pilot Program." This program allows a federally chartered institution to increase its loans-to-one-borrower limit by an additional amount equal to the lesser of: a) \$10 million; b) 10% of its unimpaired capital and surplus; or c) the percentage of its capital and surplus, in excess of 15%, that a state institution is permitted to lend. Participation in this program increased the Company's loans-to-one-borrower limit by \$10 million with regard to certain borrowers that meet prescribed loan-to-value and property type specifications. This pilot program is set to expire on September 10, 2007.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity measures the ability to meet deposit withdrawals and lending commitments. The Bank generates liquidity primarily from the sale and repayment of loans, retention or newly acquired retail deposits, and advances from FHLB of Des Moines' credit facility. Management continues to use FHLB advances as a primary source of short-term funding. At March 31, 2006, there was \$111.1 million available to the Bank in the form of FHLB advances. The Bank has established relationships with various brokers, and, as a secondary source of liquidity, the Bank purchases brokered deposit accounts. At March 31, 2006, the Bank has \$162.3 million in brokered deposits, and it could purchase up to \$84.2 million in additional brokered deposits and remain "well capitalized" as defined by the OTS.

Fluctuations in the level of interest rates typically impact prepayments on mortgage loans and MBS. During periods of falling interest rates, these prepayments increase and a greater demand exists for new loans. The Bank's customer deposits are partially impacted by area competition. Management believes that the Bank will retain most of its maturing time deposits in the foreseeable future. However, any material funding needs that may arise in the future can be reasonably satisfied through the use of additional FHLB advances and/or brokered deposits. Management is not aware of any other current market or economic conditions that could materially impact the Bank's future ability to meet obligations as they come due.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For a complete discussion of the Company's asset and liability management policies, as well as the potential impact of interest rate changes upon the market value of the Company's portfolio, see the "Asset/Liability Management" section of the Company's Annual Report for the year ended September 30, 2005.

Management recognizes that there are certain market risk factors present in the structure of the Bank's financial assets and liabilities. Since the Bank does not have material amounts of derivative securities, equity securities, or foreign currency positions, interest rate risk ("IRR") is the primary market risk that is inherent in the Bank's portfolio. On a quarterly basis, the Bank monitors the estimate of changes that would potentially occur to its net portfolio value ("NPV") of assets, liabilities, and off-balance sheet items assuming a sudden change in market interest rates. Management presents a NPV analysis to the Board of Directors each quarter and NPV policy limits are reviewed and approved. There have been no material changes in the market risk information provided in the Annual Report for the year ended September 30, 2005.

Item 4. Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and

Edgar Filing: NASB FINANCIAL INC - Form 10-Q

procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934. Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective at the end of the period covered by this quarterly report. There were no changes in the Company's internal control over financial reporting during the period covered by this quarterly report on Form 10-Q that have materially affected or are reasonable likely to materially affect our internal control over financial reporting.
