## Section 8 Other Events

### Item 8.01

Uranerz Energy Corporation announces that the environmental permitting efforts on its Nichols Ranch and Hank commercial in-situ recovery ( ISR ) mining projects in Wyoming remain on track. These two properties are located in the Powder River Basin in the Pumpkin Buttes mining district where the first uranium mining in Wyoming started in 1951. There has been continuous uranium mining in the Powder River Basin of Wyoming from the early 1970s and continuing today with Cameco s Smith Ranch and Highlands ISR mines.

The major environmental permits required for an ISR uranium mining operation in the State of Wyoming are the Wyoming Department of Environmental Quality ( DEQ ) Permit to Mine, and the US Nuclear Regulatory Commission ( NRC ) Source Material License. Uranerz started preparing the respective applications for these two permits in early 2006. Most of the required environmental baseline studies such as vegetation, soils, cultural resources, wildlife, meteorology, and wetlands have been completed. The studies remaining to be completed are essentially those on-going disciplines requiring at least one full year of data collection such as background radiation monitoring and regional baseline water quality.

The writing of the actual Uranerz permit applications, including the mine plan and reclamation plan sections, is in an advanced stage. To keep the regulatory agencies informed as to the status of the preparation of our permit applications, we have confirmed meetings scheduled with the DEQ and the NRC on June 7, 2007 and June 27, 2007, respectively. Our plan is to have the permit applications completed and submitted to the two agencies during the fourth quarter of this year. Both agencies have informed Uranerz that review and normal processing of our environmental permit applications will commence once they have been received.

## Section 9- Financial Statements and Exhibits

### Item 9.01 Financial Statements and Exhibits

99.1 News release dated May 29, 2007

#### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
