Prosperity's management uses certain non–GAAP (generally accepted accounting principles) financial measures to evaluate its performance. Specifically, Prosperity reviews tangible book value per share, return on average tangible common equity and the tangible equity to tangible assets ratio. In addition, due to the application of purchase accounting, Prosperity uses certain non-GAAP measures and ratios that exclude the impact of these items to evaluate its allowance for credit losses to total loans (excluding acquired loans accounted for under ASC Topics 310-20 and 310-30). Prosperity has included in this Earnings Release information relating to these non-GAAP financial measures for the applicable periods presented. Please refer to the "Notes to Selected Financial Data" at the end of this Earnings Release for a reconciliation of these non-GAAP financial measures.

#### Results of operations for the three months ended September 30, 2013

For the three months ended September 30, 2013, net income was \$55.278 million compared with \$46.176 million for the same period in 2012. Net income per diluted common share was \$0.91 for the three months ended September 30, 2013 compared with \$0.82 for the same period in 2012. Net interest income before provision for credit losses for the quarter ended September 30, 2013, increased 18.4% to \$126.533 million compared with \$106.893 million during the same period in 2012. The increase was primarily due to a 15.3% increase in average interest-earning assets for the same period. Linked quarter net interest income before provision for credit losses increased 6.6% or \$7.791 million to \$126.533 million compared with \$118.742 million during the three months ended June 30, 2013. The net interest margin on a tax equivalent basis increased to 3.59% for the three months ended September 30, 2013, compared with 3.52% for the same period in 2012 and 3.43% for the three months ended June 30, 2013.

Noninterest income decreased \$2.274 million or 9.5% to \$21.554 million for the three months ended September 30, 2013, compared with \$23.828 million for the same period in 2012. The decrease was primarily due to a decrease in debit card income as a result of a Durbin Amendment that became effective on July 1, 2013. This Federal Reserve rule is applicable to financial institutions that have assets of \$10 billion or more and imposes limits on the amount of interchange, or swipe, fees that can be collected. On a linked quarter basis, noninterest income decreased 14.7% or \$3.720 million.

Noninterest expense increased \$1.295 million or 2.1% to \$61.537 million for the three months ended September 30, 2013, compared with \$60.242 million for the same period in 2012. The increase is primarily due to additional noninterest expenses associated with the acquisition of Coppermark Bancshares, Inc. ("Coppermark Bank") on April 1, 2013. On a linked quarter basis, noninterest expense increased 0.4% or \$237 thousand due to one-time pre-tax merger expenses of \$308 thousand primarily related to the Coppermark Bank and First Victoria National Bank ("FVNB") acquisitions.

Average loans increased 19.4% or \$1.004 billion to \$6.173 billion for the quarter ended September 30, 2013, compared with \$5.169 billion for the same period in 2012. On a linked quarter basis, average loans increased 1.0%

(4.0% annualized) or \$58.796 million from \$6.115 billion at June 30, 2013. Average deposits increased 14.6% to \$12.432 billion for the quarter ended September 30, 2013, compared with \$10.846 billion for the same period of 2012.

Loans at September 30, 2013 were \$6.183 billion, an increase of \$1.103 billion or 21.7%, compared with \$5.079 billion at September 30, 2012. On a linked quarter basis, loans increased \$10.106 million or 0.2% (0.7% annualized) from \$6.172 billion at June 30, 2013. Deposits at September 30, 2013 were \$12.456 billion, an increase of \$1.501 billion or 13.7% compared with \$10.955 billion at September 30, 2012.

For the nine months ended September 30, 2013, net income was \$158.427 million compared with \$119.635 million for the same period in 2012. Net income per diluted common share was \$2.67 for the nine months ended September 30, 2013 compared with \$2.37 for the same period in 2012. Returns on average assets, average common equity and average tangible common equity, each on an annualized basis, for the nine months ended September 30, 2013 were 1.35%, 9.29%, and 22.21%, respectively. Prosperity's efficiency ratio (excluding credit loss provisions, net gains and losses on the sale of assets and securities and taxes) was 42.16% for the nine months ended September 30, 2013.

Net interest income before provision for credit losses for the nine months ended September 30, 2013 increased \$80.952 million or 29.7% to \$353.357 million compared with \$272.405 million during the same period in 2012. The increase was attributable primarily to a 33.3% increase in average earning assets over the same period.

Noninterest income increased \$18.840 million or 36.6% to \$70.269 million for the nine months ended September 30, 2013 compared with \$51.429 million for the same period in 2012. The increase was primarily due to increased NSF fees and service charges and the additional products and services acquired through the acquisition of American State Bank ("ASB") on July 1, 2012. The increase in fees and service charges was mainly the result of the additional accounts acquired in the acquisitions consummated in 2012 and 2013.

Noninterest expense increased \$37.115 million or 26.2% to \$178.604 million for the nine months ended September 30, 2013 compared with \$141.489 million for the same period in 2012. This increase was primarily attributable to the increase in salaries and benefits as a result of the completion of four acquisitions over the past year. Additionally, total noninterest expense for the nine months ended September 30, 2013 included one-time pre-tax merger expenses of \$1.170 million.

Average loans increased 36.0% or \$1.550 billion to \$5.854 billion for the nine months ended September 30, 2013, compared with \$4.304 billion for the same period in 2012. Average deposits increased 33.0% to \$12.294 billion for the nine months ended September 30, 2013, compared with \$9.242 billion for the same period in 2012.

These risks and uncertainties include but are not limited to whether Prosperity can: successfully identify acquisition targets and integrate the businesses of acquired companies and banks; continue to sustain its current internal growth rate or total growth rate; provide products and services that appeal to its customers; continue to have access to debt and equity capital markets; and achieve its sales objectives. Other risks include, but are not limited to: the possibility that credit quality could deteriorate; actions of competitors; changes in laws and regulations (including changes in governmental interpretations of regulations and changes in accounting standards); a deterioration or downgrade in the credit quality and credit agency ratings of the securities in Prosperity's securities portfolio; customer and consumer demand, including customer and consumer response to marketing; effectiveness of spending, investments or programs; fluctuations in the cost and availability of supply chain resources; economic conditions, including currency rate fluctuations and interest rate fluctuations; and weather. These and various other factors are discussed in Prosperity's Annual Report on Form 10-K for the year ended December 31, 2012 and other reports and statements Prosperity has filed with the SEC. #### NOTES TO SELECTED FINANCIAL DATA

Prosperity's management uses certain non–GAAP (generally accepted accounting principles) financial measures to evaluate its performance. Specifically, Prosperity reviews tangible book value per share, return on average tangible common equity and the tangible equity to tangible assets ratio for internal planning and forecasting purposes. In addition, due to the application of purchase accounting, Prosperity uses certain non-GAAP measures and ratios that exclude the impact of these items to evaluate its allowance for credit losses to total loans (excluding acquired loans accounted for under ASC Topics 310-20 and 310-30). Prosperity has included in this Earnings Release information relating to these non-GAAP financial measures for the applicable periods presented. Prosperity believes these non-GAAP financial measures provide information useful to investors in understanding Prosperity's financial results and Prosperity believes that its presentation, together with the accompanying reconciliations, provides a complete understanding of factors and trends affecting Prosperity's business and allows investors to view performance in a manner similar to management, the entire financial services sector, bank stock analysts and bank regulators. Further,

Prosperity believes that these non-GAAP measures provide useful information by excluding certain items that may not be indicative of its core operating earnings and business outlook. These non-GAAP measures should not be considered a substitute for GAAP basis measures and results and Prosperity strongly encourages investors to review its consolidated financial statements in their entirety and not to rely on any single financial measure. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names.
