Special Note Regarding Forward-Looking Statements

This document contains certain statements of a forward-looking nature. Such forward-looking statements, including but not limited to projected growth, trends and strategies, future operating and financial results, financial expectations and current business indicators are based upon current information and expectations and are subject to change based on factors beyond the control of the Company. Forward-looking statements typically are identified by the use of terms such as “look,” “may,” “should,” “might,” “believe,” “plan,” “expect,” “anticipate,” “estimate” and similar words, although some forward-looking statements are expressed differently. The accuracy of such statements may be influenced by a number of business risks and uncertainties that could cause actual results to differ materially from those projected or anticipated, including but not limited to the following:

- the timing of the development of future products;
- projections of revenue, earnings, capital structure and other financial items;
- statements of our plans and objectives;
- statements regarding the capabilities of our business operations;
- statements of expected future economic performance;
- statements regarding competition in our market; and
- assumptions underlying statements regarding us or our business.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. The Company undertakes no obligation to update this forward-looking information. Nonetheless, the Company reserves the right to make such updates from time to time by press release, periodic report or other method of public disclosure without the need for specific reference to this report. No such update shall be deemed to indicate that other statements not addressed by such update remain correct or create an obligation to provide any other updates.

Part I Financial Information

Item 1. Financial Statements.

See the unaudited condensed consolidated financial statements following the signature page of this report, which are incorporated herein by reference.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our company's financial condition and results of operations should be read in conjunction with our unaudited condensed consolidated financial statements and the related notes included elsewhere in this report. This discussion contains forward-looking statements that involve risks and uncertainties. Actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors.

Overview

We are a company with limited liability incorporated in 2007 under the laws of the Cayman Islands. Headquartered in Beijing, we provide products and services to oil and gas companies and their affiliates through Nanjing Recon Technology Co. Ltd ("Nanjing Recon") and Beijing BHD Petroleum Technology Co, Ltd ("BHD"), hereafter referred to as our domestic companies (the "Domestic Companies"), which are established under the laws of the People's Republic of China ("PRC"). As the Company contractually controls the Domestic Companies, we serve as the center of strategic management, financial control and human resources allocation. Due to this contractual control and our obligation to bear the losses of the Domestic Companies, we consider them to be variable interest entities ("VIEs") for accounting purposes and consolidate their results in our financial statements.

Through Nanjing Recon and BHD, our business is mainly focused on the upstream sectors of the oil and gas industry. We derive our revenues from the sales and provision of (1) oilfield automation products, (2) equipment for oil and gas production and transportation, (3) waste water treatment products, and (4) engineering services. Our products and services involve most of the key procedures of the extraction and production of oil and gas, and include automation systems, equipment, tools and on-site technical services.

•

Nanjing Recon: Nanjing Recon is a high-tech company that specializes in automation services for oilfield companies. It mainly focuses on providing automation solutions to the oil exploration industry, including monitoring wells, automatic metering to the joint station production, process monitor, and a variety of oilfield equipment and control systems.

BHD: BHD is a high-tech company that specializes in transportation equipment and stimulation productions and services. Possessing proprietary patents and substantial industry experience, BHD has built up stable and strong working relationships with the major oilfields in China.

Recent Developments

As of the first quarter of fiscal year 2017, the Company has achieved remarkable achievement in oilfield waste water treatment segment. In January 2016, the Company announced its cooperation with Qinghai Oilfield Company, signing an agreement to sell the oilfield RMB3.98 million of related products and services. For the three months period as of September 30, 2016, the Company has completed this agreement and continues to expand markets in environmental protection industry, including oilfield water treatment and other industrial and sewage disposal projects.

The Company has also developed new clients in China's top producing Changqing Oilfield, which is located in China's Xi'an Province. The Company has signed sales contracts for furnaces as of the report day. Management expects further improvement in the coming year.

Products and Services

We currently provide products and services to oil and gas field companies focused on the development and production of oil and natural gas. Our products and services described below correlate to the numbered stages of the oilfield production system graphical expression shown below.

Our products and services include:

Equipment for Oil and Gas Production and Transportation

High-Efficiency Heating Furnaces (*as shown above*). Crude petroleum contains certain impurities that must be removed before it can be sold, including water and natural gas. To remove the impurities and to prevent solidification and blockage in transport pipes, companies employ heating furnaces. BHD researched, developed and implemented a new oilfield furnace that is advanced, highly automated, reliable, easy to operate, safe and highly heat-efficient (90% efficiency).

Burner (*as shown above*). We serve as an agent for the Unigas Burner, which is designed and manufactured by UNIGAS, a European burning equipment production company. The burner we provide has the following characteristics: high degree of automation, energy conservation, high turn-down ratio, high security and environmental safety.

Oil and Gas Production Improvement Techniques

Packers of Fracturing. This utility model is used in concert with the security joint, hydraulic anchor, and slide brushing of sand spray in the well. It is used for easy seat sealing and sand uptake prevention. The utility model reduces desilting volume and prevents sand-up, which makes the deblocking processes easier to realize. The back flushing is sand-stick proof.

Production Packer. At varying withdrawal points, the production packer separates different oil layers and protects the oil pipe from sand and permeation, promoting the recovery ratio.

Sand Prevention in Oil and Water Well. This technique processes additives that are resistant to elevated temperatures into “resin sand” which is transported to the bottom of the well via carrying fluid. The resin sand goes through the borehole, piling up and compacting at the borehole and oil vacancy layer. An artificial borehole wall is then formed, functioning as a means of sand prevention. This sand prevention technique has been adapted to more than 100 wells, including heavy oil wells, light oil wells, water wells and gas wells, with a 100% success rate and a 98% effective rate.

Water Locating and Plugging Technique. High water cut affects the normal production of oilfields. Previously, there was no sophisticated method for water locating and tubular column plugging in China. The mechanical water locating and tubular column plugging technique we have developed resolves the problem of high water cut wells. This technique conducts a self-sealing test during multi-stage usage and is reliable to separate different production sets effectively. The water location switch forms a complete set by which the water locating and plugging can be finished in one trip. The tubular column is adaptable to several oil drilling methods and is available for water locating and plugging in second and third class layers.

Fissure Shaper. This is our proprietary product that is used along with a perforating gun to effectively increase perforation depth by between 46% and 80%, shape stratum fissures, improve stratum diversion capability and, as a result, improve our ability to locate oilfields and increase the output of oil wells.

Fracture Acidizing. We inject acid to layers under pressure, which can form or expand fissures. The treatment process of the acid is defined as fracture acidizing. The technique is mainly adapted to oil and gas wells that are blocked up relatively deeply, or oil and gas wells in low permeability zones.

Electronic Break-Down Service. This service resolves block-up and freezing problems by generating heat from the electric resistivity of the drive pipe and utilizing a loop tank composed of an oil pipe and a drive pipe. This technique saves energy and is environmentally friendly. It can increase the production of oilfields that are in the middle and later periods.

Automation System and Services

Pumping Unit Controller. This controller functions as a monitor to the pumping unit and also collects data for load, pressure, voltage, and startup and shutdown control.

RTU Monitor. This monitor collects gas well pressure data.

Wireless Dynamometer and Wireless Pressure Gauge. These products replace wired technology with cordless displacement sensor technology. They are easy to install and significantly reduce the work load associated with cable laying.

Electric Multi-way Valve for Oilfield Metering Station Flow Control. This multi-way valve is used before the test separator to replace the existing three valve manifolds. It facilitates the electronic control of the connection of the oil lead pipeline with the separator.

Natural Gas Flow Computer System. The flow computer system is used in natural gas stations and gas distribution stations to measure flow.

Recon Supervisory Control and Data Acquisition System (“SCADA”). Recon SCADA is a system which applies to the oil well, measurement station and the union station for supervision and data collection.

EPC Service of Pipeline SCADA System. This service technique is used for pipeline monitoring and data acquisition after crude oil transmission.

EPC Service of Oil and Gas Wells SCADA System. This service technique is used for monitoring and data acquisition of oil wells and natural gas wells.

EPC Service of Oilfield Video Surveillance and Control System. This video surveillance technique is used for controlling the oil and gas wellhead area and the measurement station area.

Technique Service for “Digital oilfield” Transformation. This service includes engineering technique services such as oil and gas SCADA systems, video surveillance and control systems and communication systems.

Factors Affecting Our Business

Business Outlook

The oilfield engineering and technical service industry is generally divided into five sectors: (1) exploration, (2) drilling and completion, (3) testing and logging, (4) production and (5) oilfield construction. Thus far our businesses have been involved in the completion, production and construction processes. Our management still believes we need to expand our core business, move into new markets and develop new businesses quickly for the coming years. Management anticipates there will be opportunities in new markets and our existing markets. We also believe that many existing wells and oilfields need to improve or renew their equipment and service to maintain production and techniques and services like ours will be needed as new oil and gas fields are developed. In the next three years, we plan to focus on the following:

Measuring Equipment and Service. Digital oil field technology and the management of oil companies are highly regarded in the industry. We believe our oilfield SCADA system and assorted products, production managing expert software, and related technical support services will address the needs of the oil well automation system market, for which we believe there will be increasing demand over the short term and strong needs in the long term.

Gathering and Transferring Equipment. With more new wells developed, our management anticipates that demand for our furnaces and burners will grow as compared to last year, especially in the Qinghai Oilfield and Zhongyuan Oilfield.

New business. We have been developing new products for oilfield wastewater treatment and achieved preliminary business on this segment. Our management anticipates expanding the new business more rapidly in the coming year.

Growth Strategy

As a smaller China-focused company, our basic strategy focuses on developing our onshore oilfield business in the upstream sector of the industry.

Large domestic oil companies have historically focused on their exploration and development businesses to earn higher margins and maintain their competitive advantage. With regard to private oilfield service companies, we estimate that approximately 90% specialize in the manufacture of drilling and production equipment. Thus, the market for technical support and project service is still in its early stage. Our management is focused on providing high quality products and services in oilfields in which we have a geographical advantage. This helps us to avoid conflicts of interest with bigger suppliers of drilling equipment while protecting our position within this market segment. Our mission is to increase the automation and safety levels of industrial petroleum production in China and improve the underdeveloped working process and management mode used by many companies by providing advanced technologies. At the same time, we are always looking to improve our business and to increase our earning capability.

Recent Industry Developments

Affected by the worldwide decrease in oil prices, CNPC and Sinopec, parent companies of our direct clients, reduced their capital expenditure and production activities, resulting in a declining market and intensive competition. Management will closely monitor the situation and will seek to extend our business on the industrial chain, such as through providing more integrated services and advanced products and through growing our business from a predominantly above-ground business to include some downhole services as well.

On January 1, 2015, China formally began implementing an updated Environmental Protection Law (the China EPL). The EPL is perceived as the most progressive and stringent law in the history of environmental protection in China. It details harsher penalties for environmental offences and imposes additional requirements for oil and gas production companies. As a result, although they reduced capital expenditures and production activities, China's oil companies have strengthened their investment and resources in oil field environment protection and this market is estimated to be billions of RMB. The Company also focused on this segment and started to develop its own products and service from year 2015.

Factors Affecting Our Results of Operations

Our operating results in any period are subject to general conditions typically affecting the Chinese oilfield service industry and included but are not limited to:

- oil and gas prices;
- the amount of spending by our customers, primarily those in the oil and gas industry;
- growing demand from large corporations for improved management and software designed to achieve such corporate performance;
- the procurement processes of our customers, especially those in the oil and gas industry;
- competition and related pricing pressure from other oilfield service solution providers, especially those targeting the Chinese oil and gas industry;
- the ongoing development of the oilfield service market in China; and
- inflation and other macroeconomic factors.

Unfavorable changes in any of these general conditions could negatively affect the number and size of the projects we undertake, the number of products we sell, the amount of services we provide, the price of our products and services, and otherwise affect our results of operations.

Our operating results in any period are more directly affected by company-specific factors including:

- our revenue growth, in terms of the proportion of our business dedicated to large companies and our ability to successfully develop, introduce and market new solutions and services;
- our ability to increase our revenues from both old and new customers in the oil and gas industry in China;
- our ability to effectively manage our operating costs and expenses; and
- our ability to effectively implement any targeted acquisitions and/or strategic alliances so as to provide efficient access to markets and industries in the oil and gas industry in China.

Critical Accounting Policies and Estimates

Estimates and Assumptions

We prepare our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("US GAAP"), which require us to make judgments, estimates and assumptions. We continually evaluate these estimates and assumptions based on the most recently available information, our own historical experience and various other assumptions that we believe to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. An accounting policy is considered critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time such estimate is made, and if different accounting estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the unaudited condensed consolidated financial statements. We believe that the following policies involve a higher degree of judgment and complexity in their application and require us to make significant accounting estimates. The following descriptions of critical accounting policies, judgments and estimates should be read in conjunction with our unaudited condensed consolidated financial statements and other disclosures included in this quarterly report. Significant accounting estimates reflected in our Company's unaudited condensed consolidated financial statements include revenue recognition, allowance for doubtful accounts, inventory valuation, fair value of share based payments, and useful lives of property and equipment.

Consolidation of VIEs

We recognize an entity as a VIE if it either (i) has insufficient equity to permit the entity to finance its activities without additional subordinated financial support or (ii) has equity investors who lack the characteristics of a controlling financial interest. We consolidate a VIE as our primary beneficiary when we have both the power to direct the activities that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits from the entity that could potentially be significant to the VIE. We perform ongoing assessments to determine whether an entity should be considered a VIE and whether an entity previously identified as a VIE continues to be a VIE and whether we continue to be the primary beneficiary.

Assets recognized as a result of consolidating VIEs do not represent additional assets that could be used to satisfy claims against our general assets. Conversely, liabilities recognized as a result of consolidating these VIEs do not represent additional claims on our general assets; rather, they represent claims against the specific assets of the consolidated VIEs.

Revenue Recognition

We recognize revenue when the following four criteria are met: (1) persuasive evidence of an arrangement exists, (2) delivery has occurred or services have been provided, (3) the sales price is fixed or determinable, and (4) collectability is reasonably assured. Delivery does not occur until products have been shipped or services have been provided to the customers and the customers have signed a completion and acceptance report, risk of loss has transferred to the customer, customer acceptance provisions have lapsed, or the Company has objective evidence that the criteria specified in a customer's acceptance provisions have been satisfied. The sales price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

Hardware and software

Revenue from hardware and software sales is generally recognized when the product with the embedded software system is shipped to the customer and when there are no unfulfilled company obligations that affect the customer's final acceptance of the arrangement. Revenue from software is recognized according to project contracts. Usually this is short term. Revenue is not recognized until completion of the contracts and receipt of acceptance.

Services

The Company provides services to improve software functions and system requirements on separated fixed-price contracts. Revenue is recognized when services are completed and acceptance is determined by a completion report signed by the customer.

Deferred income represents unearned amounts billed to customers related to sales contracts.

Cost of Revenues

When the criteria for revenue recognition have been met, costs incurred are recognized as cost of revenue. Cost of revenues includes wages, materials, handling charges, the cost of purchased equipment and pipes, other expenses associated with manufactured products and services provided to customers, and inventory reserve. We expect cost of revenues to grow as our revenues grow. It is possible that we could incur development costs with little revenue recognition, but based upon our past history, we expect our revenues to grow.

Fair Values of Financial Instruments

The US GAAP accounting standards regarding fair value of financial instruments and related fair value measurements define fair value, establish a three-level valuation hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The three levels of inputs are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable.

The carrying amounts reported in the unaudited condensed consolidated balance sheets for trade accounts receivable, other receivables, advances to suppliers, trade accounts payable, accrued liabilities, advances from customers and notes payable approximate fair value because of the immediate or short-term maturity of these financial instruments. Long-term receivables and borrowings approximate fair value because their interest rates charged approximate the market rates for financial instruments with similar terms.

Receivables

Trade receivables are carried at the original invoiced amount less a provision for any potential uncollectible amounts. Provisions are applied to trade receivables where events or changes in circumstances indicate that the balance may not be collectible. The identification of doubtful accounts requires the use of judgment and estimates of management. Our management must make estimates of the collectability of our accounts receivable. Management specifically analyzes accounts receivable, historical bad debts, customer creditworthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. Increases in our allowance for doubtful accounts would lower our net income and earnings per share.

Valuation of Long-Lived Assets

We review the carrying values of our long-lived assets for impairment whenever events or changes in circumstances indicate that they may not be recoverable. When such an event occurs, we project undiscounted cash flows to be

generated from the use of the asset and its eventual disposition over the remaining life of the asset. If projections indicate that the carrying value of the long-lived asset will not be recovered, we reduce the carrying value of the long-lived asset by the estimated excess of the carrying value over the projected discounted cash flows. In the past, we have not had to make significant adjustments to the carrying values of our long-lived assets, and we do not anticipate a need to do so in the future. However, circumstances could cause us to have to reduce the value of our capitalized assets more rapidly than we have in the past if our revenues were to significantly decline. Estimated cash flows from the use of the long-lived assets are highly uncertain and therefore the estimation of the need to impair these assets is reasonably likely to change in the future. Should the economy or acceptance of our assets change in the future, it is likely that our estimate of the future cash flows from the use of these assets will change by a material amount. There were no impairments at June 30, 2016 and September 30, 2016. However, if impairments were required, our net income and earnings per share would decrease accordingly.

Share-Based Compensation

The Company accounts for share-based compensation in accordance with Accounting Standards Codification (ASC) Topic 718, Share-Based Payment. Under the fair value recognition provisions of this topic, share-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense with graded vesting on a straight-line basis over the requisite service period for the entire award. The Company has elected to mainly utilize the Black-Scholes valuation model to estimate an award's fair value.

Recently enacted accounting pronouncements

In October 2016, the FASB has issued Accounting Standards Update (ASU) No. 2016-17, Consolidation (Topic 810): Interest Held through Related Parties That Are under Common Control, to provide guidance on the evaluation of whether a reporting entity is the primary beneficiary of a VIE by amending how a reporting entity, that is a single decision maker of a VIE, treats indirect interests in that entity held through related parties that are under common control. The amendments are effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2016, and interim periods within fiscal years beginning after December 15, 2017. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the impact of this new standard on its unaudited condensed consolidated financial statements and related disclosures.

Results of Operations

The following consolidated results of operations include the results of operations of the Company and its variable interest entities (“VIEs”), BHD and Nanjing Recon.

Our historical reporting results are not necessarily indicative of the results to be expected for any future period.

Three Months Ended September 30, 2015 Compared to Three Months Ended September 30, 2016

Revenue

	For the Three Months Ended September 30,		Increase /	Percentage	
	2015	2016	(Decrease)	Change	
Hardware and software- non-related parties	¥3,480,752	¥7,802,103	¥4,321,351	124.1	%
Service	113,208	-	(113,208)	(100.0)%
Total revenues	¥3,593,960	¥7,802,103	¥4,208,143	117.1	%

Our total revenues for the three months ended September 30, 2016 were approximately ¥7.8 million (\$1.2 million), an increase of approximately ¥4.2 million or 117.1% from ¥3.6 million for the three months ended September 30, 2015. The overall increase in revenue was mainly caused by our increased hardware and software revenue, which includes revenue from automation products and embedded software, equipment and accessories. The increase in hardware and software revenue was mainly caused by increased demand for our waste water treatment products, and equipment and furnaces for the first quarter of fiscal year 2017.

Revenue – Hardware and software- non-related parties

For the Three Months Ended September 30		Increase /	Percentage
2015	2016	(Decrease)	Change

Edgar Filing: Recon Technology, Ltd - Form 10-Q

Automation product and software	¥2,020,646	¥2,076,736	¥56,090	2.8	%
Equipment and accessories	1,460,106	3,803,918	2,343,812	160.5	%
Waste water treatment products	-	1,921,449	1,921,449	100.0	%
Total revenue - Hardware and software- non-related parties	¥3,480,752	¥7,802,103	¥4,321,351	124.1	%

(1) Revenue from automation products and embedded software increased slightly by ¥56.1 thousand (\$8.4 thousand).

(2) As shown above, the overall increase in revenue was significantly affected by equipment sales increases due to more furnaces provided to our new client, Changqing Oilfield, a major subsidiary of PetroChina.

(3) During fiscal year 2016, the Company expanded the new market of oilfield waste water treatment products. As of first quarter of fiscal year 2017, this segment continued to contribute revenue and margin to our operation. Management expects to obtain more business in the coming months due to the quality of our products and long-term cooperation with oilfield companies.

Cost and Margin

	For the Three Months Ended September 30,		Increase / (Decrease)	Percentage Change	
	2015	2016			
Total revenues	¥3,593,960	¥7,802,103	¥4,208,143	117.1	%
Cost of revenues	3,192,295	6,709,778	3,517,483	110.2	%
Gross profit	¥401,665	¥1,092,325	¥690,660	171.9	%
Margin %	11.2	% 14.0	% 2.8	%	-

Cost of Revenues. Our cost of revenues includes raw materials and costs related to design, implementation, delivery and maintenance of products and services. All materials and components we need can be purchased or manufactured by subcontractors. Usually the prices of electronic components do not fluctuate dramatically due to market competition and will not significantly affect our cost of revenues. However, specialized equipment and incentive chemical products may be directly influenced by metal and oil price fluctuations. Additionally, the prices of some imported accessories mandated by our customers can also affect our costs. Inventory reserve for changes in price level, impairment of inventory, slow moving inventory or other similar causes will also affect our cost.

Our cost of revenues increased from approximately ¥3.2 million in the three months ended September 30, 2015 to approximately ¥6.7 million (\$1.0 million) for the same period in 2016, an increase of approximately ¥3.5 million (\$0.5 million), or 110.2% . This increase was mainly caused by higher revenue during the three months ended September 30, 2016 compared to the same period of 2015.

Gross Profit. Our gross profit increased to approximately ¥1.1 million (\$0.2 million) for the three months ended September 30, 2016 from approximately ¥0.4 million for the same period in 2015. Our gross profit as a percentage of revenue increased to 14.0% for the three months ended September 30, 2016 from 11.2% for the same period in 2015. This was mainly due to the increase of higher margin hardware sales during this period.

In 2015, there was a slow-down in the oilfield industry, thus customers negotiated a lower selling price which caused the margin percentage to be depressed. In 2016, the gross margin percentage increased to a normal amount.

In more detail:

Edgar Filing: Recon Technology, Ltd - Form 10-Q

For the Three Months Ended
September 30,

	2015	2016	Increase / (Decrease)	Percentage Change	
Total revenues-hardware and software- non related parties	¥3,480,752	¥7,802,103	¥4,321,351	124.1	%
Cost of revenues -hardware and software- non related parties	3,192,295	6,709,778	3,517,483	110.2	%
Gross profit	¥288,457	¥1,092,325	¥803,868	278.7	%
Margin %	8.3	% 14.0	% 5.7	% -	

Revenue from hardware and software to non-related parties increased by approximately ¥4.3 million mainly due to the increased orders of waste water treatment products and furnaces. The gross profit from hardware and software sales to non-related parties increased ¥0.8 million (\$0.1 million) compared to the same period of last year.

	For the Three Months Ended September 30,				Percentage Change
	2015	2016	Increase / (Decrease)		
Total revenues-service	¥113,208	¥ -	¥(113,208)	(100.0)	%
Cost of revenues -service	-	-	-	-	%
Gross profit	¥113,208	¥ -	¥(113,208)	(100.0)	%
Margin %	100.0 %	-	(100.0)	%	-

Service revenue for the three months ended September 30, 2015 and 2016 consisted mainly of maintenance services, which were provided upon request by customers.

Operating Expenses

	For the Three Months Ended September 30,				Percentage Change
	2015	2016	Increase / (Decrease)		
Selling and distribution expenses	¥1,112,670	¥1,050,141	¥(62,529)	(5.6)	%
% of revenue	31.0 %	13.5 %	(17.5)	%	-
General and administrative expenses	4,067,219	4,899,328	832,109	20.5	%
% of revenue	113.2 %	62.8 %	(50.4)	%	-
Provision for doubtful accounts	2,109,926	8,026	(2,101,900)	(99.6)	%
% of revenue	58.7 %	0.1 %	(58.6)	%	-
Research and development expenses	1,792,997	618,674	(1,174,323)	(65.5)	%
% of revenue	49.9 %	7.9 %	(42.0)	%	-
Operating expenses	¥9,082,812	¥6,576,169	¥(2,506,643)	(27.6)	%

Selling and Distribution Expenses. Selling and distribution expenses consist primarily of salaries and related expenditures of our sales and marketing organization, sales commissions, costs of our marketing programs including traveling charges, advertising and trade shows, and an allocation of our facilities, depreciation expenses and rental expense, as well as shipping charges. Selling expenses decreased approximately ¥62.5 thousand (\$9.4 thousand) for the three months ended September 30, 2016 compared to the same period in 2015. This decrease was primarily due to a decrease in service fees and shipping charges, as we began working with qualified vendors located closer to our customers. Selling expenses were 31.0% of total revenues in the three months ended September 30, 2015 and 13.5% of total revenues in the same period of 2016.

General and Administrative Expenses. General and administrative expenses consist primarily of costs in human resources, facilities costs, depreciation expenses, professional advisor fees, audit fees, stock based compensation expense and other miscellaneous expenses incurred in connection with general operations. General and administrative expenses increased by 20.5% or ¥0.8 million (\$0.1 million), from approximately ¥4.1 million in the three months ended September 30, 2015 to approximately ¥4.9 million (\$0.7 million) in the same period of 2016. The increase in general and administrative expenses was mainly due to an increase in share-based compensation. General and administrative expenses were 62.8% of total revenues in the three months ended September 30, 2016 and 113.2% of total revenues in the same period of 2015, due to the increase in our total revenue.

Provision for doubtful accounts . Provision for doubtful accounts is the estimated amount of bad debt that will arise from accounts receivables, other receivables and purchase advances. We recorded a provision for doubtful accounts of ¥2.1 million for the three months ended September 30, 2015 and ¥8.0 thousand (\$1.2 thousand) for the same period in 2016. The decrease in provision of doubtful accounts was mainly caused by provision for purchase advances of ¥2.0 million in the three months ended September 30, 2015. During the last few years, we made various down payments for some customized products with a non-refundable requirement. As those projects were canceled or postponed due to unfavorable industry conditions, management recorded a provision for these down payments while still trying to minimize the potential losses in the fiscal year of 2016.

Research and development (“R&D”) expenses. Research and development expenses consist primarily of salaries and related expenditures for our research and development projects. Research and development expenses decreased from approximately ¥1.8 million for three months ended September 30, 2015 to approximately ¥0.6 million (\$0.1 million) for the same period of 2016. This decrease was primarily due to less research and development expense spent on design of chemical products used for waste water treatment.

Net Income

For the Three Months Ended
September 30,

Edgar Filing: Recon Technology, Ltd - Form 10-Q

	2015	2016	Increase / (Decrease)	Percentage Change	
Loss from operations	¥(8,681,147)	¥(5,483,844)	¥3,197,303	(36.8))%
Interest and other income (expense)	(183,916)	3,117	187,033	(101.7))%
Loss before income taxes	(8,865,063)	(5,480,727)	3,384,336	(38.2))%
Benefit for income taxes	(16,457)	(20,143)	(3,686)	22.4	%
Net loss	(8,848,606)	(5,460,584)	3,388,022	(38.3))%
Less: Net income attributable to non-controlling interest	-	-	-	-	%
Net loss attributable to Recon Technology, Ltd	¥(8,848,606)	¥(5,460,584)	¥3,388,022	(38.3))%

Loss from operations. Loss from operations was approximately ¥5.5 million (\$0.8 million) for the three months ended September 30, 2016, compared to a loss of ¥8.7 million for the same period of 2015. This decrease in loss from operations was primary due to an increase in gross profit, and a decrease in provision for doubtful accounts and research and development expenses.

Interest and other income (expense). Interest and other income was approximately ¥3.1 thousand (\$0.5 thousand) for the three months ended September 30, 2016, compared to interest and other expense of ¥0.2 million for the same period of 2015. The ¥0.2 million (\$0.03 million) increase in interest and other income was primarily due to the increased other income and the decreased interest expense.

Benefit for income tax. Benefit for income tax was approximately ¥20.1 thousand (\$3.0 thousand) for the three months ended September 30, 2016, compared to ¥16.5 thousand for the three months ended September 30, 2015. This increase in benefit for income tax was mainly due to an increase in income tax benefit of Nanjing Recon as a result of increased tax rebate for the three months ended September 30, 2016 compared to the same period of 2015.

Net loss. As a result of the factors described above, net loss was approximately ¥5.5 million (\$0.8 million) for the three months ended September 30, 2016, a decrease of approximately ¥3.3 million (\$0.5 million) from net loss of ¥8.8 million for the same period of 2015.

Liquidity and Capital Resources

As of September 30, 2016, we had cash in the amount of approximately ¥554.6 thousand (\$83.2 thousand). As of June 30, 2016, we had cash in the amount of approximately ¥1.8 million.

Indebtedness. As of September 30, 2016, except for approximately ¥12.5 million (\$1.9 million) of short-term borrowings from related parties, we did not have any finance leases or purchase commitments, guarantees or other material contingent liabilities.

Holding Company Structure. We are a holding company with no operations of our own. All of our operations are conducted through our Domestic Companies. As a result, our ability to pay dividends and to finance any debt that we may incur is dependent upon the receipt of dividends and other distributions from the Domestic Companies. In addition, Chinese legal restrictions permit payment of dividends to us by our Domestic Companies only out of their respective accumulated net profits, if any, determined in accordance with Chinese accounting standards and

regulations. Under Chinese law, our Domestic Companies are required to set aside a portion (at least 10%) of their after-tax net income (after discharging all cumulated loss), if any, each year for compulsory statutory reserve until the amount of the reserve reaches 50% of our Domestic Companies' registered capital. These funds may be distributed to shareholders at the time of each Domestic Company's wind up.

Off-Balance Sheet Arrangements. We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of any third parties. In addition, we have not entered into any derivative contracts that are indexed to our own shares and classified as shareholders' equity, or that are not reflected in our financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. Moreover, we do not have any variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Capital Resources. To date we have financed our operations primarily through cash flows from operations and financing activities. As of September 30, 2016, we had total assets of approximately ¥76.4 million (\$11.4 million), which includes cash of approximately ¥0.6 million (\$0.08 million), net accounts receivable due from third parties of approximately ¥37.3 million (\$5.6 million), working capital of approximately ¥41.2 million (\$6.2 million). Shareholders' equity amounted to approximately ¥37.9 million (\$5.7 million).

Cash from Operating Activities. Net cash used in operating activities was approximately ¥0.3 million (\$0.05 million) for the three months ended September 30, 2016. This was a decrease of approximately ¥0.7 million (\$0.1 million) compared to net cash used in operating activities of approximately ¥1.0 million for the three months ended September 30, 2015. The decrease in net cash used in operating activities for the three months ended September 30, 2016 was primarily attributable to collections of notes receivable of ¥1.6 million (\$0.2 million), collections from trade accounts receivable due from third parties of ¥1.0 million (\$0.2 million), collections of other receivable due from third parties of ¥1.9 million (\$0.3 million) and an increase in trade accounts payable due from third parties of ¥1.7 million (\$0.3 million), partly offset by payments for advances due from third parties of ¥2.9 million (\$0.4 million).

Cash from Investing Activities. Net cash provided by investing activities was approximately ¥22.3 thousand (\$3.3 thousand) for the three months ended September 30, 2016, which was an increase in cash provided by investing activities of approximately ¥0.5 million compared to the same period in 2015, which increase is due to a decrease in the Company's purchase of additional property and equipment and an increase in proceeds from disposal of equipment.

Cash from Financing Activities. Net cash used in financing activities amounted to ¥1.0 million (\$0.1 million) for the three months ended September 30, 2016, as compared to net cash used in financing activities of \$7.1 million for the same period in 2015. During the three months ended September 30, 2016, we repaid ¥5.3 million (\$0.8 million) in short-term borrowings to two related parties and repaid ¥0.5 million (\$0.08 million) in short-term borrowings to one third-party, and we received ¥4.8 million (\$0.7 million) from two related parties.

Working Capital. Total working capital as of September 30, 2016 amounted to approximately ¥41.2 million (\$6.2 million), compared to approximately ¥44.5 million as of June 30, 2016. Total current assets as of September 30, 2016 amounted to approximately ¥71.4 million (\$10.7 million), a decrease of approximately ¥2.9 million (\$0.4 million) compared to approximately ¥74.3 million at June 30, 2016. The decrease in total current assets at September 30, 2016 compared to June 30, 2016 was mainly due to decreases in cash, notes receivable and other receivables, partially offset by an increase in purchase advance.

Current liabilities amounted to approximately ¥30.3 million (\$4.5 million) at September 30, 2016, in comparison to approximately ¥29.9 million at June 30, 2016. This increase of liabilities was attributable mainly to an increase in trade accounts payable, partially offset by a decrease in short-term borrowings-third parties and short-term borrowings-related parties.

The decrease in working capital of approximately ¥3.3 million helped to support the loss from operation of approximately ¥5.4 million.

Capital Needs. With the uncertainty of the current market, our management believes it is necessary to enhance collection of outstanding accounts receivable and other receivables, and to be cautious on operational decisions and project selection. Our management believes that our current operations can satisfy our daily working capital needs. We may also raise capital through public offerings or private placements of our securities to finance our development of our business and to consummate any merger and acquisition, if necessary.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Not applicable.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

As of September 30, 2016, the company carried out an evaluation, under the supervision of and with the participation of management, including our Company's chief executive officer and chief financial officer, of the effectiveness of the design and operation of our Company's disclosure controls and procedures under the 2013 COSO framework. Because we do not currently have enough full-time employees with experience with U.S. generally accepted accounting principles, the chief executive officer and chief financial officer concluded that our Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) were ineffective in timely alerting them to information required to be included in the Company's periodic Securities and Exchange Commission filings.

Changes in Internal Control over Financial Reporting

Management continues to focus on internal control over financial reporting. As of September 30, 2016, the Company intends to further implement the following remedial initiatives

Improve the design and documentation related to multiple levels of review over financial statements included in our SEC filings;

Expand the design and assessment test work over the monitoring function of entity level controls;

Enhance documentation retention policies over test work related to continuous management assessments of internal control effectiveness; and

Expand documentation practices and policies related to various key controls to provide support and audit trails for both internal management assessment as well as external auditor testing.

There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934) during the three months ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting, except as disclosed above.

RECON TECHNOLOGY, LTD

Notes to the unaudited condensed consolidated financial statements

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Organization – Recon Technology, Ltd (the “Company”) was incorporated under the laws of the Cayman Islands on August 21, 2007 by Messrs. Yin Shenping, Chen Guangqiang and Li Hongqi (the “Founders”) as a limited liability company. The Company provides specialized oilfield equipment, automation systems, tools, chemicals and field services to petroleum companies mainly in the People’s Republic of China (the “PRC”).

The Company, along with its wholly-owned subsidiaries, Recon Technology Co., Limited (“Recon HK”), Jining Recon Technology Ltd. (“Recon JN”), Recon Investment Ltd. (“Recon IN”) and Recon Hengda Technology (Beijing) Co., Ltd. (“Recon BJ”), conducts its business through the following PRC legal entities (“Domestic Companies”) that are consolidated as variable interest entities (“VIEs”) and operate in the Chinese oilfield equipment & service industry:

1. Beijing BHD Petroleum Technology Co., Ltd. (“BHD”),
2. Nanjing Recon Technology Co., Ltd. (“Nanjing Recon”).

The Company has signed Exclusive Technical Consulting Service Agreements with each of the Domestic Companies, which are our VIEs and Equity Interest Pledge Agreements and Exclusive Equity Interest Purchase Agreements with their shareholders. Through these contractual arrangements, the Company has the ability to substantially influence each of the Domestic Companies’ daily operations and financial affairs, appoint their senior executives and approve all matters requiring shareholder approval. As a result of these contractual arrangements, which enable the Company to control the Domestic Companies, the Company is considered as the primary beneficiary of each Domestic Company. Thus, the Company is able to absorb 90% of net interest or 100% of net loss of those VIEs.

On December 17, 2015, Huang Hua BHD Petroleum Equipment Manufacturing Co. LTD, a fully owned subsidiary established by BHD was organized under the laws of the PRC.

Nature of Operations – The Company engaged in (1) providing equipment, tools and other hardware related to oilfield production and management, including simple installations in connection with some projects; (2) service to improve production and efficiency of exploited oil wells, and (3) developing and selling its own specialized industrial automation control and information solutions. The products and services provided by the Company include:

NOTE 2. LIQUIDITY

As reflected in the Company's unaudited condensed consolidated financial statements, the Company had recurring net losses for the three months ended September 30, 2015 and 2016. In assessing its liquidity, management monitors and analyzes the Company's cash on-hand and its ability to generate sufficient revenue sources in the future to support its operating and capital expenditure commitments. The Company plans to fund its continuing operations through identifying new prospective joint venture and strategic alliance opportunities for new revenue sources, financial supports by major shareholders and reducing costs to improve profitability and replenish working capital. Management believes that the foregoing measures collectively will provide sufficient liquidity for the Company to meet its future liquidity and capital obligations.

NOTE 3. SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation - The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America for interim financial information pursuant to the rules of the SEC and have been consistently applied. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's Form 10-K for the fiscal year ended June 30, 2016. The results of operations for the interim periods presented may not be indicative of the operating results to be expected for the Company's fiscal year ending June 30, 2017.

RECON TECHNOLOGY, LTD

Notes to the unaudited condensed consolidated financial statements

Principles of Consolidation - The unaudited condensed consolidated financial statements include the accounts of the Company, all the subsidiaries and VIEs of the Company. All transactions and balances between the Company and its subsidiaries and VIEs have been eliminated upon consolidation.

Variable Interest Entities - A VIE is an entity that either (i) has insufficient equity to permit the entity to finance its activities without additional subordinated financial support or (ii) has equity investors who lack the characteristics of a controlling financial interest. A VIE is consolidated by its primary beneficiary. The primary beneficiary has both the power to direct the activities that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits from the entity that could potentially be significant to the VIE. The Company performs ongoing assessments to determine whether an entity should be considered a VIE and whether an entity previously identified as a VIE continues to be a VIE and whether the Company continues to be the primary beneficiary.

Assets recognized as a result of consolidating VIEs do not represent additional assets that could be used to satisfy claims against the Company's general assets. Conversely, liabilities recognized as a result of consolidating these VIEs do not represent additional claims on the Company's general assets; rather, they represent claims against the specific assets of the consolidated VIEs.

Currency Translation - The Company's functional currency is the Chinese Yuan ("RMB") and the accompanying unaudited condensed consolidated financial statements have been expressed in Chinese Yuan. The unaudited condensed consolidated financial statements as of and for the three months ended September 30, 2016 have been translated into United States dollars ("U.S. dollars") solely for the convenience of the readers. The translation has been made at the rate of ¥6.6702 = US\$1.00, the approximate exchange rate prevailing on September 30, 2016. These translated U.S. dollar amounts should not be construed as representing Chinese Yuan amounts or that the Chinese Yuan amounts have been or could be converted into U.S. dollars.

Estimates and assumptions - The preparation of the unaudited condensed consolidated financial statements in conformity with U.S. GAAP requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Estimates are adjusted to reflect actual experience when necessary. Significant accounting estimates reflected in the Company's unaudited condensed consolidated financial statements include revenue recognition, allowance for doubtful accounts, allowance for inventory, the useful lives of property and equipment and the fair value of share-based payments. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates.

Fair Values of Financial Instruments - The US GAAP accounting standards regarding fair value of financial instruments and related fair value measurements define fair value, establish a three-level valuation hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The three levels of inputs are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable.

RECON TECHNOLOGY, LTD**Notes to the unaudited condensed consolidated financial statements**

The carrying amounts reported in the unaudited condensed consolidated balance sheets for trade accounts receivable, other receivables, purchase advances, trade accounts payable, accrued liabilities, advances from customers, short-term bank loan and short-term borrowings approximate fair value because of the immediate or short-term maturity of these financial instruments. It was impracticable to estimate the fair value of long-term other receivables, because this is due from the Company's former VIE and there are no comparable markets for receivables with similar terms.

Trade Accounts and Other Receivables - Accounts receivable are carried at original invoiced amount less a provision for any potential uncollectible amounts. Accounts are considered past due when the related receivables are more than a year old. Provision is made against trade accounts and other receivables to the extent they are considered to be doubtful. Accounts are written off after extensive efforts at collection. Other receivables arise from transactions with non-trade customers.

Purchase Advances - Purchase advances are the amounts prepaid to suppliers for purchases of inventory and are recognized as inventory when the final amount is paid to the suppliers and the inventory is delivered.

Inventories - Inventories are stated at the lower of cost or market value, on a first-in-first-out basis. The methods of determining inventory costs are used consistently from year to year. Allowance for inventory obsolescence is provided when the market value of certain inventory items is lower than the cost.

Property and Equipment - Property and equipment are stated at cost. Depreciation on motor vehicles and office equipment is computed using the straight-line method over the estimated useful lives of the assets, which range from two to ten years. Leasehold improvements are amortized over the shorter of the lease term or the estimated useful life of the assets.

<u>Items</u>	<u>Useful life</u>
Motor vehicles	5-10 years
Office equipment	2-5 years
Leasehold improvement	5 years
Production equipment	10 years

Long-Lived Assets - The Company applies the ASC Topic 360 "Property, plant and equipment." ASC Topic 360 requires that long-lived assets, such as property and equipment be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to

estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset. Fair value is determined based on the estimated discounted future cash flows expected to be generated by the asset. There were no impairments at June 30, 2016 and September 30, 2016.

Revenue Recognition - The Company recognizes revenue when the following four criteria are met: (1) persuasive evidence of an arrangement, (2) delivery has occurred or services have been provided, (3) the sales price is fixed or determinable, and (4) collectability is reasonably assured. Delivery does not occur until products have been shipped or services have been provided to the customers and the customers have signed a completion and acceptance report, risk of loss has transferred to the customers, customers' acceptance provisions have lapsed, or the Company has objective evidence that the criteria specified in customers' acceptance provisions have been satisfied. The sales price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

Hardware and software:

Revenue from hardware and software sales is generally recognized when the product with the embedded software system is shipped to the customer and when there are no unfulfilled company obligations that affect the customer's final acceptance of the arrangement. Revenue from software is recognized according to project contracts. Usually this is short term. Revenue is not recognized until completion of the contracts and receipt of acceptance.

RECON TECHNOLOGY, LTD

Notes to the unaudited condensed consolidated financial statements

Service:

The Company provides services to improve software function and system operation on separated fixed-price contracts. Revenue is recognized on the completed contract method when acceptance is determined by a completion report signed by the customer.

Share-Based Compensation - The Company accounts for share-based compensation in accordance with ASC Topic 718, Share-Based Payment. Under the fair value recognition provisions of this topic, share-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense with graded vesting on a straight-line basis over the requisite service period for the entire award. The Company has elected to recognize compensation expenses using the Binomial Lattice valuation model estimated at the grant date based on the award's fair value.

Income Taxes - Provisions for income taxes are based on taxes payable or refundable for the current year and deferred taxes. Deferred taxes are provided on differences between the tax bases of assets and liabilities and their reported amounts in the financial statements, and tax carry forwards. Deferred tax assets and liabilities are included in the financial statements at currently enacted income tax rates applicable to the period in which the deferred tax assets and liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The Company has not been subject to any income taxes in the United States or the Cayman Islands.

The Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position would be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement.

Loss per Share - Basic Earnings/Loss Per Share ("**EPS**") is computed by dividing net loss by the weighted average number of ordinary shares outstanding. Diluted EPS are computed by dividing net loss by the weighted-average number of ordinary shares and dilutive potential ordinary share equivalents outstanding.

Potentially dilutive ordinary shares consist of ordinary shares issuable upon the conversion of ordinary stock options, restricted shares and warrants (using the treasury stock method). The effect from options, restricted shares and warrants would have been anti-dilutive due to the fact that we incurred a net loss during the three months ended September 30, 2015 and 2016.

Recently Issued Accounting Pronouncements

In October 2016, the FASB has issued Accounting Standards Update (ASU) No. 2016-17, Consolidation (Topic 810): Interest Held through Related Parties That Are under Common Control, to provide guidance on the evaluation of whether a reporting entity is the primary beneficiary of a VIE by amending how a reporting entity, that is a single decision maker of a VIE, treats indirect interests in that entity held through related parties that are under common control. The amendments are effective for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2016, and interim periods within fiscal years beginning after December 15, 2017. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the impact of this new standard on its unaudited condensed consolidated financial statements and related disclosures.

NOTE 4. TRADE ACCOUNTS RECEIVABLE, NET

Accounts receivable consisted of the following:

	June 30, 2016	September 30, 2016	September 30, 2016
Third Party	RMB	RMB	U.S. Dollars
Trade accounts receivable	¥42,665,499	¥41,629,636	\$6,241,119

Total - third-party, net	¥38,097,626	¥37,267,708	\$5,587,178

RECON TECHNOLOGY, LTD**Notes to the unaudited condensed consolidated financial statements**

	June 30, 2016 RMB	September 30, 2016 RMB	September 30, 2016 U.S. Dollars
Third Party – long-term			
Beijing Yabei Nuoda Science and Technology Co. Ltd. *	¥2,467,036	¥ 2,467,036	\$ 369,858
Allowance for doubtful accounts	(246,704)	(246,704)	(36,986)
Total - long-term trade accounts receivable, net	¥2,220,332	¥ 2,220,332	\$ 332,872

*The receivable from Yabei Nuoda was recognized primarily from the sale of automation system and services based on written contracts. Based on the repayment agreement signed on September 2, 2015, the outstanding balance was to be collected in three installments during the period from September, 2015 to December, 2017, with each installment of ¥2,467,036 (\$369,858). During the year ended June 30, 2016, the Company received the first payment on time as scheduled.

Provision for accounts receivables due from third party was ¥32,038 for the three months ended September 30, 2015 and recovery of accounts receivables due from third party was ¥205,944 (\$30,875) for the three months ended September 30, 2016, respectively. During the three months ended September 30, 2016, no accounts receivable write-off against allowance for doubtful accounts, the recovery was due to the collections of accounts receivable.

NOTE 5. OTHER RECEIVABLES, NET

Other receivables consisted of the following:

	June 30, 2016 RMB	September 30, 2016 RMB	September 30, 2016 U.S. Dollars
Third Party			
Current Portion			
Due from ENI (A)	¥2,729,033	¥ 2,455,924	\$ 368,192
Loans to third parties (B)	14,168,344	12,108,344	1,815,284
Business advance to staff (C)	4,952,114	5,527,172	828,634
Deposits for projects	893,669	865,892	129,815
Others	534,759	440,085	65,978
Allowance for doubtful accounts	(1,277,807)	(1,295,455)	(194,215)
Total	¥22,000,112	¥ 20,101,962	\$ 3,013,688

Provision for other receivables was ¥19,000 and ¥17,648 (\$2,646) for the three months ended September 30, 2015 and 2016, respectively.

- (A) The remaining part of this loan will be repaid over four years with quarterly installments of ¥699,147, which is due by June 30, 2017. The Company has continued to receive the payments under the agreement.
- (B) Loans to third-parties are mainly used for short-term funding to support the Company's external business partners. These loans are due on demand bearing no interest.
- (C) Business advances to staffs represent advances for business travel and sundry expenses related to oilfield or on-site installation and inspection of products through customer approval and acceptance.

RECON TECHNOLOGY, LTD**Notes to the unaudited condensed consolidated financial statements****NOTE 6. PURCHASE ADVANCES**

The Company purchased products and services from a third party and a related party during the normal course of business. Purchase advances consisted of the following:

	June 30, 2016 RMB	September 30, 2016 RMB	September 30, 2016 U.S. Dollars
Third Party			
Prepayment for inventory purchase	¥17,914,552	¥20,787,693	\$ 3,116,493
Allowance for doubtful accounts	(16,591,247)	(16,787,569)	(2,516,794)
Total	¥1,323,305	¥4,000,124	\$ 599,699

Provision for purchase advances were ¥2,058,888 and ¥196,322 (\$29,432) for the three months ended September 30, 2015 and 2016, respectively. The Company recorded allowance for these down payments and will continue to try to collect or get inventories delivered. These payments were advanced for certain customized equipment of the planned projects. As those projects were delayed or canceled or there is rare chance to be profitable, the Company decided to suspend those projects and recorded allowances related to advanced payments for those projects as the Company may not be able to receive those funds back. Management is still making efforts to collect partially or negotiate with vendors for some other alternative solutions to minimize the Company's loss.

NOTE 7. INVENTORIES

Inventories consisted of the following:

	June 30, 2016 RMB	September 30, 2016 RMB	September 30, 2016 U.S. Dollars
Small component parts	¥55,726	¥55,726	\$ 8,354

Interest expense for short-term borrowings due to related parties was ¥171,448 and ¥132,490 (\$19,863) for the three months ended September 30, 2015 and 2016, respectively.

NOTE 12. SHAREHOLDERS' EQUITY

Stock offering

In June 2015, the Company entered into a securities purchase agreement with certain institutional investors for the sale of 297,197 ordinary shares in a registered direct offering (4,000 shares at an average of \$1.64 on June 9, 2015; 288,105 shares at an average of \$2.12 on June 10, 2015; 5,092 shares at an average of \$2.00 on June 11, 2015). The net cash proceeds received from the stock offering, after deducting ¥1,294,922 (\$212,673) underwriter commission and other associated fees, were ¥2,392,027 (approximately \$0.6 million).

During the year ended June 30, 2016, the Company offered 15,874 ordinary shares under the same purchase agreement from June 2015. The net cash proceeds received from the stock offering were ¥158,268 (\$23,820). During the three months ended September 30, 2016, the Company did not offer any ordinary shares under the purchase agreement.

Appropriated Retained Earnings - According to the Memorandum and Articles of Association, the Company is required to transfer a certain portion of its net profit, as determined under PRC accounting regulations, from current net income to the statutory reserve fund. In accordance with the PRC Company Law, companies are required to transfer 10% of their profit after tax, as determined in accordance with PRC accounting standards and regulations, to the statutory reserves until such reserves reach 50% of the registered capital or paid-in capital of the companies. As of June 30, 2016 and September 30, 2016, the balance of total statutory reserves was ¥4,148,929 and ¥4,148,929 (\$622,008), respectively.

NOTE 13. STOCK-BASED COMPENSATION

Stock-Based Awards Plan

2012 Incentive Plan – The Company granted options to purchase 415,000 ordinary shares to its employees and non-employee director on March 26, 2012. The options have an exercise price of \$2.96, which was equal to the share price of the Company's ordinary shares at March 26, 2012, and will vest over a period of five years, with the first 20%

vesting on March 26, 2013. The options expire ten years after the date of grant, on March 26, 2022. The Company recognizes compensation cost for awards with graded vesting on a straight-line basis over the requisite service period for the entire award. The grant date fair value of the options was ¥10.06 (\$1.49) per share.

2015 Incentive Plan – The Company granted options to purchase 400,000 ordinary shares to its employees and non-employee director on January 31, 2015. The options have an exercise price of \$1.65, which was equal to the share price of the Company's ordinary shares at January 31, 2015, and will vest equally over a period of three years, with one third vesting on January 31, 2016. The options expire ten years after the date of grant, on January 31, 2025.

RECON TECHNOLOGY, LTD**Notes to the unaudited condensed consolidated financial statements**

The Company recognizes compensation cost for awards with graded vesting on a straight-line basis over the requisite service period for the entire award. The grant date fair value of the options was ¥10.13 (\$1.65) per share.

The following is a summary of the stock options activity:

Stock Options	Shares	Weighted Average Exercise Price Per Share
Outstanding as of June 30, 2016	815,600	\$ 3.04
Granted	-	-
Forfeited	-	-
Exercised	-	-
Outstanding as of September 30, 2016	815,600	\$ 3.04

The following is a summary of the status of options outstanding and exercisable at September 30, 2016:

Outstanding Options			Exercisable Options		
Average Exercise Price	Exercise Number	Average Remaining Contractual life (Years)	Average Exercise Price	Exercise Number	Average Remaining Contractual life (Years)
\$6.00	193,000	2.83	\$6.00	193,000	2.83
\$2.96	222,600	5.49	\$2.96	148,400	5.49
\$1.65	400,000	8.34	\$1.65	133,333	8.34
	815,600				

The Share-based compensation expense recorded for stock options granted were ¥509,528 and ¥543,102 (\$81,422) for the three months ended September 30, 2015 and 2016, respectively. The total unrecognized share-based compensation expense for stock options as of September 30, 2016 was approximately ¥2.3 million (\$0.35 million), which is expected to be recognized over a weighted average period of approximately 1.21 years.

Restricted Shares to senior manager

As of September 30, 2016, the Company has granted restricted shares of common stock to senior management as follows:

On December 13, 2013, the Company granted 95,181 restricted shares to Mr. Yin Shenping and 135,181 restricted shares to Mr. Chen Guangqiang at an aggregate value of ¥4,207,496 (\$688,782), based on the stock closing price of \$2.99 at December 13, 2013. These restricted shares will vest over three years with one third of the shares vesting every year from the grant date. The first one third was vested on December 13, 2014 and are now non-restricted.

On January 31, 2015, the Company granted 150,000 restricted shares to Mr. Yin Shenping and 150,000 restricted shares to Mr. Chen Guangqiang at an aggregate value of ¥3,038,558(\$495,000), based on the stock closing price of \$1.65 at January 31, 2015. These restricted shares will vest over three years with one third of the shares vesting every year from the grant date.

RECON TECHNOLOGY, LTD

Notes to the unaudited condensed consolidated financial statements

On October 18, 2015, the Company granted 800,000 restricted shares to its employees and non-employee director as compensation cost for awards. The fair value of the restricted shares was \$704,000 based on the closing stock price \$0.88 at October 18, 2015.

On July 27, 2016, the Company granted 876,000 restricted shares to its employees and non-employee director as compensation cost for awards. The fair value of the restricted shares was \$963,600 based on the closing stock price \$1.10 at July 27, 2016, and no shares were issued as of September 30, 2016.

The Share-based compensation expense recorded for restricted shares granted were ¥617,024 and ¥1,423,568 (\$213,421) for the three months ended September 30, 2015 and 2016, respectively. The total unrecognized share-based compensation expense for restricted shares granted as of September 30, 2016 was approximately ¥11.0 million (\$1.66 million), which is expected to be recognized over a weighted average period of approximately 2.33 years.

Restricted Shares for service

For the three months ended September 30, 2016, the Company has granted restricted shares of common stock to consultants as follows:

On July 27, 2016, the Company approved the grant of 250,000 restricted shares with a value of \$275,000 to designees of an independent consulting firm as compensation for advisory services. Those restricted shares were officially issued on October 21, 2016.

Following is a summary of the restricted stock granted:

NOTE 14. INCOME TAX

The Company is not subject to any income taxes in the United States or the Cayman Islands and had minimal operations in jurisdictions other than the PRC. BHD and Nanjing Recon are subject to PRC's income taxes as PRC domestic companies. The Company follows Implementing Rules for the Enterprise Income Tax Law ("Implementing Rules"), which took effect on January 1, 2008 and unified the income tax rate for domestic-invested and foreign-invested enterprises at 25%.

Nanjing Recon was approved as a government-certified high –technology company on December 11, 2013 and is subject to a reduced income tax rate of 15% through December 11, 2016. Nanjing Recon reapplied for high-technology enterprise approval and has passed all relevant reviews.

As approved by the domestic tax authority in the PRC, BHD was recognized as a government-certified high technology company on November 25, 2009 and is subject to a reduced income tax rate of 15% through November 25, 2018.

NOTE 16. CONCENTRATIONS

For the three months ended September 30, 2015 and 2016, the two largest customers, China National Petroleum Corporation (“CNPC”) and China Petroleum & Chemical Corporation Limited (“SINOPEC”), represented approximately 81.21% and 91.77% of the Company’s total revenue, respectively.

For the three months ended September 30, 2015, four major suppliers accounted for 60% of the company’s total purchases. For the three months ended September 30, 2016, two major suppliers accounted for 58% of the company’s total purchases.

NOTE 17. COMMITMENTS AND CONTINGENCY

(a)

Office Leases

The Company leases three offices in Beijing (two for BHD; one for Recon-JN) and one office in Nanjing for Nanjing Recon. Future payments under such leases are as follows as of September 30, 2016:

	Twelve months ending September 30, Office lease payment	
	RMB	U.S. Dollars
2017	¥1,021,000	\$153,068
2018	360,000	53,971
Total	¥1,381,000	\$207,039

(b) Contingency

The Labor Contract Law of the PRC requires employers to assure the liability of severance payments if employees are terminated and have been working for the employers for at least two years prior to January 1, 2008. The employers will be liable for one month of severance pay for each year of the service provided by the employees. As of September 30, 2016, the Company estimated its severance payments of approximately ¥1.7 million (\$0.25 million) which has not been reflected in its unaudited condensed consolidated financial statements, because management cannot predict what the actual payment, if any, will be in the future.

RECON TECHNOLOGY, LTD**Notes to the unaudited condensed consolidated financial statements****NOTE 18. RELATED PARTY TRANSACTIONS AND BALANCES**

Purchases from related parties – purchases from related parties consisted of the following:

	For the three months ended September 30,		
	2015	2016	2016
	RMB	RMB	U.S. Dollars
