Taiwan Semiconductor Manufacturing Company, Ltd. Financial Statements for the Nine Months Ended September 30, 2005 and 2004 and Independent Accountants Review Report

INDEPENDENT ACCOUNTANTS REVIEW REPORT

The Board of Directors and Shareholders

Taiwan Semiconductor Manufacturing Company, Ltd.

We have reviewed the accompanying balance sheets of Taiwan Semiconductor Manufacturing Company, Ltd. as of September 30, 2005 and 2004, and the related statements of income and cash flows for the nine months then ended. These financial statements are the responsibility of the Company s management. Our responsibility is to issue a report on these financial statements based on our reviews.

We conducted our reviews in accordance with Statement on Auditing Standards No. 36 Review of Financial Statements issued by the Auditing Committee of the Accounting Research and Development Foundation of the Republic of China. A review consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of China, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the financial statements referred to above for them to be in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

October 12, 2005

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the accountants—report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language accountants—report and financial statements shall prevail.

TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY, LTD. NOTES TO FINANCIAL STATEMENTS

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2005 AND 2004

(Amounts in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

(Reviewed, Not Audited)

1. GENERAL

Taiwan Semiconductor Manufacturing Company, Ltd. (the Company or TSMC), a Republic of China (R.O.C.) corporation, was incorporated as a venture among the Government of the R.O.C., acting through the Development Fund of the Executive Yuan; Philips Electronics N.V. and certain of its affiliates (Philips); and certain other private investors. On September 5, 1994, its shares were listed on the Taiwan Stock Exchange (TSE). On October 8, 1997, TSMC listed some of its shares of stock on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs).

The Company is engaged mainly in the manufacturing, selling, packaging, testing and computer-aided designing of integrated circuits and other semiconductor devices and the manufacturing of masks.

As of September 30, 2005 and 2004, the Company had 19,475 and 19,089 employees, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the R.O.C.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the R.O.C. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

Significant accounting policies are summarized as follows:

Use of Estimates

The preparation of financial statements in conformity with the aforementioned guidelines and principles requires management to make reasonable assumptions and estimates of matters that are inherently uncertain. The actual results may differ from management s estimates.

Classification of Current and Non-current Assets and Liabilities

Current assets are those expected to be converted to cash, sold or consumed within one year from the balance sheet date. Current liabilities are obligations due on demand within one year from the balance sheet date. Assets and liabilities that are not classified as current are non-current assets and liabilities, respectively.

Cash Equivalents

Government bonds under repurchase agreements, treasury bills, notes, and commercial papers acquired with maturities less than three months from the date of purchase are classified as cash equivalents.

Short-term Investments

Short-term investments primarily consist of corporate bonds, agency bonds, asset-backed securities, bond funds, government bonds and others.

Short-term investments are recorded at historical cost and are carried at the lower of cost or market value as of the balance sheet date. An allowance for decline in value is provided and is charged to current income when the aggregate carrying amount of the investments exceeds the aggregate market value. A reversal of the allowance is recorded for a subsequent recovery of the market value.

The costs of funds and listed stocks sold are accounted for using the weighted-average method; whereas other securities sold are accounted for using the specific identification method.

The market value of funds is determined using the net asset value of the funds at the end of the period, and the market value of listed stocks is determined using the average-closing price of the listed stocks for the last month of the period. The market value of other short-term investments is determined using the average of bid and ask prices as of the balance sheet date.

Cash dividends are recorded as investment income in the current period.

Allowance for Doubtful Receivables

An allowance for doubtful receivables is provided based on a review of the collectibility of accounts receivables. The Company determines the amount of allowance for doubtful receivables by examining the historical collection experience and current trends in the credit quality of its customers as well as its internal credit policies.

Revenue Recognition and Allowance for Sales Returns and Others

The Company recognizes revenue when evidence of an arrangement exists, the shipment is made, price is fixed or determinable, and the collectibility is reasonably assured. Revenues from the design and manufacturing of photo masks, which are used as manufacturing tools in the fabrication process, are recognized when the photo masks are qualified by our customers. The Company records a provision for estimated future returns and other allowances in the period the related revenue is recorded. Provisions for estimated sales returns and other allowances are generally made at a specific percentage based on historical experience, management s judgment, and any known factors that would significantly affect the allowance.

Sales are determined using the fair value taking into account related sales discounts agreed to by the Company and its customers. Sales agreements typically provide that payment is due 30 days from invoice date for a majority of the customers and 30 to 45 days after the end of the month in which the sales occur for some customers. Since the receivables from sales are collectible within one year and such transactions are frequent, the fair value of receivables is equivalent to the nominal amount of cash to be received.

Inventories

Inventories are stated at the lower of cost or market value. Inventories are recorded at standard cost and adjusted to the approximate weighted-average cost at the end of the period. Market value represents replacement cost for raw materials, supplies and spare parts and net realizable value for finished goods and work in process. The Company assesses the impact of changing technology on its inventories on hand and writes off inventories that are considered obsolete. Ending inventories are evaluated for estimated excess quantities and obsolescence based on a demand forecast within a specific time horizon, which is generally 180 days or less. Estimated losses on scrap and slow-moving items are recognized and included in the allowance for losses.

Long-term Investments

Investments in companies wherein the Company exercises significant influence on the operating and financial policy decisions are accounted for using the equity method of accounting. The Company s proportionate share in the net income or net loss of investee companies is recognized in the investment income/loss recognized by equity method, net account. When equity investments are made, the difference, if any, between the cost of investment and the Company s proportionate share of the investee s net equity is amortized using the straight-line method over five years and is also recorded in the investment income/loss recognized by equity method, net account.

When the Company subscribes to additional investee shares at a percentage different from its existing equity interest, the resulting carrying amount of the investment in the investee differs from the amount of the Company s proportionate share in the investee s net equity. The Company records such difference as an adjustment to long-term investments with the corresponding amount charged or credited to capital surplus.

Investments in companies wherein the Company does not exercise significant influence are recorded at historical cost. Cash dividends are recognized as investment income in the year received but are accounted for as reductions in the carrying amount of the investments if the dividends are received in the year of acquisition. Stock dividends are recorded as an increase in the number of shares held and do not affect investment income or the carrying amount of the investment.

Investments in mutual funds are stated at the lower of aggregate cost or net asset value. An allowance is recognized when the net asset value of the funds is lower than their cost, with the corresponding amount recorded as a reduction to shareholders—equity. A reversal of the allowance will result from a subsequent recovery of the net asset value. When an indication of significant impairment is identified in an investee company, the carrying amount of this investment is reduced to reflect an other-than-temporary decline, with the related impairment loss charged to current income.

The costs of stocks and mutual funds sold are determined using the weighted-average method.

Investments in long-term bonds are stated at amortized cost. The discount or premium is amortized over the duration period using the interest method, and recorded as an adjustment to interest income.

When investments in publicly-traded stocks are reclassified from short-term investments to long-term investments or from long-term investments to short-term investments, the Company recognizes a loss to the extent, if any, that the market value of such investments is lower than the carrying amount, and the market value becomes the new basis. If an investee company recognizes an unrealized loss on its long-term investments using the lower-of-cost-or-market method, the Company also recognizes a corresponding unrealized loss in proportion to its ownership percentage in the investee company and records the amount as a component of its shareholders equity.

Gains or losses on sales from the Company to investee companies accounted for using the equity method are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties. The entire amount of the gains or losses on sales to majority-owned subsidiaries is deferred until such gains or losses are realized through the subsequent sales of the related products to third parties. Gains or losses on sales from investee companies to the Company are deferred in proportion to the Company s ownership percentages in the investee companies until realized through transactions with third parties. Gains or losses on sales between investee companies accounted for using the equity method are deferred in proportion to the Company s weighted-average ownership percentages in the investee companies which record such gains or losses until realized through transactions with third parties.

If an investee s functional currency is a foreign currency, translation adjustments will result from the process of translating the investee s financial statements into the reporting currency of the Company. Such adjustments are accumulated and reported as a separate component of shareholders equity.

Property, Plant and Equipment, Assets Leased to Others and Idle Assets

Property, plant and equipment and assets leased to others are stated at cost less accumulated depreciation. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a future period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined, net of depreciation, as if no impairment loss had been recognized. Idle assets are stated at the lower of net realizable value or book value. Significant additions, renewals and betterments incurred during the construction period are capitalized. Maintenance and repairs are expensed in the period incurred. Interest expense incurred during the purchase and construction period is also capitalized. Depreciation is computed using the straight-line method over the following estimated service lives: buildings 10 to 20 years; machinery and equipment 5 years; and office equipment 3 to 5 years.

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed

Upon sale or disposal of property, plant and equipment, the related cost and accumulated depreciation are removed from the corresponding accounts, with any gain or loss credited or charged to non-operating gains or losses in the period of sale or disposal.

Goodwill

Goodwill represents the excess of the consideration paid for acquisition over the fair market value of identifiable net assets acquired and acquisition costs. Goodwill is amortized using the straight-line method over the estimated life of 10 years. If an event occurs or circumstances change that more likely than not reduce the fair value of goodwill below its carrying amount, an impairment loss is charged to current income. Subsequent recovery in the fair value of the goodwill may not be recorded such as to reverse the impairment loss previously recorded.

Deferred Charges

Deferred charges consist of technology license fees, software and system design costs and other charges. The amounts are amortized as follows: Technology license fees—the shorter of the estimated life of the technology or the term of the technology transfer contract; software and system design costs and other charges—3 years. When an indication of significant impairment is identified, any excess of the carrying amount of an asset over its recoverable amount is recognized as a loss. If the recoverable amount increases in a future period, the amount previously recognized as impairment would be reversed and recognized as a gain. However, the adjusted amount may not exceed the carrying amount that would have been determined, net of amortization, as if no impairment loss had been recognized.

Pension Costs

Starting from July 1, 2005, employees are required to choose between the two pension plans available to them. For employees under defined contribution pension plans, pension costs are recorded based on the actual contributions made to employees individual pension accounts. For employees under defined benefit pension plans, pension costs are recorded based on actuarial calculations.

Income Tax

The Company uses an inter-period tax allocation method for income tax. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences and unused tax credits. Valuation allowances are provided to the extent, if any, that it is more likely than not that deferred income tax assets will not be realized. A deferred tax asset or liability is classified as current or noncurrent in accordance with the classification of its related asset or liability. However, if a deferred tax asset or liability does not relate to an asset or liability in the financial statements, then it is classified as either current or noncurrent based on the expected length of time before it is realized or settled. Any tax credits arising from the purchases of machinery, equipment and technology, research and development expenditures, personnel training, and investments in important technology-based enterprises are recognized using the flow-through method.

Adjustments of prior years tax liabilities are added to or deducted from the current year s tax provision. Income tax on unappropriated earnings of 10% is expensed in the year of shareholder approval which is the year subsequent to the year the earnings are generated.

Stock-based Compensation

Employee stock option plans that are amended or have options granted on or after January 1, 2004 must be accounted for by the interpretations issued by the Accounting Research and Development Foundation. The Company adopted the intrinsic value method and any compensation cost determined using this method is charged to expense over the employee vesting period.

Treasury Stock

When the Company repurchases its outstanding common stock, the cost of the reacquired stock is recorded as treasury stock as a reduction to shareholders—equity. When the Company retires treasury stock, the treasury stock account is reduced and the common stock as well as the capital surplus—additional paid-in capital are reversed in proportionate to the equity percentage of the retirement. When the book value of the treasury stock exceeds the sum of the par value and additional paid-in capital, the difference is charged to capital surplus—treasury stock transactions and to retained earnings for any remaining amount. The Company—s stock held by its subsidiaries is also treated as treasury stock and reclassified from long-term investments to treasury stock. The gains resulted from the disposal of the treasury stock held by the subsidiaries and cash dividends received by the subsidiaries from the Company are recorded under capital surplus—treasury stock transactions.

Foreign-currency Transactions

Foreign currency transactions are recorded in New Taiwan dollars at the rates of exchange in effect when the transactions occur. Exchange gains or losses derived from foreign currency transactions or monetary assets and liabilities denominated in foreign currencies are recognized in current income. At the end of each period, assets and liabilities denominated in foreign currencies are revalued at the prevailing exchange rates with the resulting gains or losses recognized in current income.

Derivative Financial Instruments

The Company enters into foreign currency forward contracts to manage foreign exchange exposures on foreign-currency-denominated assets and liabilities. The contracts are recorded in New Taiwan dollars at the current rate of exchange of the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted forward rates on the contract date are amortized over the terms of the forward contracts using the straight-line method. At the end of each period, the receivables or payables arising from forward contracts are restated using the prevailing exchange rates at the balance sheet date with the resulting differences credited or charged to

income. In addition, the receivables and payables related to the forward contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into cross-currency swap contracts to manage currency exposures on foreign-currency-denominated assets and liabilities. The principal amount is recorded using the current rate at the contract date. The differences in the New Taiwan dollar amounts translated using the current rates and the amounts translated using the contracted rates on the contract dates are amortized over the terms of the contracts using the straight-line method. At the end of each period, the receivables or payables arising from cross-currency swap contracts are restated using the prevailing exchange rate with the resulting differences credited or charged to income. In addition, the receivables and payables related to the contracts of the same counter party are netted with the resulting amount presented as either an asset or a liability. The difference in interest computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to the interest income or expense associated with the hedged items. Any resulting gain or loss upon settlement is credited or charged to income in the period of settlement.

The Company enters into interest rate swap contracts to manage exposures to changes in interest rates on existing assets or liabilities. The cash settlement receivable or payable computed pursuant to the contracts on each settlement date or the balance sheet date is recorded as an adjustment to interest income or expense associated with the hedged items.

The notional amounts of foreign currency option contracts entered into for hedging purposes are not recognized as an asset or liability on the contract dates. The premiums paid or received for the options bought or written are amortized and charged to income on a straight-line basis over the term of the related contract. Any resulting gains or losses upon settlement are charged to current income in the period of settlement.

Reclassifications

Certain accounts in the financial statements as of and for the nine months ended September 30, 2004 have been reclassified to conform to the financial statements as of and for the nine months ended September 30, 2005.

The Company entered into investment management agreements with three well-known financial institutions (fund managers) to manage investment portfolios for the Company. In accordance with the investment guidelines and terms specified in these agreements, the securities invested by the fund managers cannot be below a pre-defined credit rating. As of September 30, 2005, the Company had investment portfolios with these fund managers that aggregated to an original amount of US\$1,200,000 thousand. The investment portfolios included securities such as corporate bonds, agency bonds, asset-backed securities, government bonds and others. Securities acquired with maturities less than three months from the date of purchase were reclassified as cash equivalents.

For the nine months ended September 30, 2005 and 2004, net investment loss and income recognized from the equity method investees was NT\$1,277,187 thousand and NT\$3,431,747 thousand, respectively. The carrying amounts of investments accounted for under the equity method and the related investment loss or income were determined based on the reviewed financial statements of the investees as of and for the same periods as the Company.

14

Other investments consisted of the following structured time-deposits:

	Principal	Interest	Range of Interest	Maturity
September 30, 2005	Amount	Receivable	Rates	Date
Step-up callable deposits Foreign bank Callable range accrual deposits	\$ 1,000,000	\$ 422	1.40%-1.50%	Jun. 2007
Foreign bank	7,301,360	27,871	(see below)	Sep. 2009-Jan. 2010
	\$8,301,360	\$ 28,293		
September 30, 2004 Step-up callable deposits				
Domestic bank	\$ 2,000,000	\$ 9,655	2.05%-2.20%	Jul. 2007-Aug. 2007 Jul. 2006-Jun.
Foreign bank Callable range accrual deposits	5,238,240	29,716	1.44%-7.00%	2009
Foreign bank	679,680	385	(see below)	Sep. 2009
	\$7,917,920	\$ 39,756		

The interest rate of the step-up callable deposits is determined by the Company and the related banks. The amount of interest earned by the Company for the callable range accrual deposits is based on a pre-defined range as determined by the 3-month or 6-month LIBOR plus an agreed upon rate ranging between 2.10% and 3.45%. Based on the terms of the deposits, if the 3-month or 6-month LIBOR moves outside of the pre-defined range, the interest paid to the Company is at a fixed rate between zero and 1.5%. Under the term of the contracts, the bank has the right to cancel the contracts prior to the maturity date.

As of September 30, 2005 and 2004, deposits that resided in banks located in Hong Kong amounted to NT\$2,655,040 thousand and NT\$2,378,880 thousand, respectively; those that resided in banks located in Singapore amounted to NT\$663,760 thousand and zero, respectively.

7. PROPERTY, PLANT AND EQUIPMENT

Accumulated depreciation consisted of the following:

	Septen	September 30	
	2005	2004	
Buildings	\$ 41,091,353	\$ 33,972,806	
Machinery and equipment	300,003,419	247,397,596	
Office equipment	5,422,595	4,438,074	
	\$ 246 5 17 267	¢ 205 000 176	
	\$ 346,517,367	\$ 285,808,476	

There was no capitalized interest for the nine months ended September 30, 2005. Interest expense for the nine months ended September 30, 2004 was NT\$1,139,881 thousand (before deducting the amount capitalized of NT\$262,109 thousand for the nine months ended September 30, 2004). The interest rate used for the purpose of calculating the capitalized amount was 2.80% for the nine months ended September 30, 2004.

8. DEFERRED CHARGES, NET

	September 30	
	2005	2004
Technology license fees	\$ 5,410,933	\$7,024,803
Software and system design costs	1,828,117	2,248,598
Other	83,394	246,909
	\$ 7,322,444	\$9,520,310

9. BONDS PAYABLE

	September 30	
	2005	2004
Domestic unsecured bonds:		
Issued in October 1999 and repayable in October 2004, 5.95% interest payable		
annually	\$	\$ 5,000,000
Issued in December 2000 and repayable in December 2005 and 2007 in two		
payments, 5.25% and 5.36% interest payable annually, respectively	15,000,000	15,000,000
Issued in January 2002 and repayable in January 2007, 2009 and 2012 in three		
payments, 2.6%, 2.75% and 3% interest payable annually, respectively	15,000,000	15,000,000
	\$ 30,000,000	\$35,000,000

As of September 30, 2005, future principal repayments for the Company s bonds were as follows:

Amount
\$ 10,500,000
7,000,000
8,000,000
4,500,000
30,000,000
(10,500,000)

\$ 19,500,000

10. OTHER LONG-TERM PAYABLES

Most of the payables resulted from license arrangements related to semiconductor-related patents. Future payments for other long-term payables as of September 30, 2005 were as follows:

Year of Repayment	Amount
2005 (4 th quarter)	\$1,031,062
2006	485,374
2007	464,632
	(Continued)

Year of Repayment	Amount
2008	\$ 265,504
2009	265,504
2010 and thereafter	531,008
	3,043,084
Current portion (under accrued expenses and other current liabilities)	(1,516,436)

\$ 1,526,648

11. PENSION PLANS

The Labor Pension Act became effective on July 1, 2005 and this pension mechanism is deemed a defined contribution plan. The employees who were subject to the Labor Standards Law prior to the enforcement of this Act may choose to be subject to the pension mechanism under this Act or may continue to be subject to the pension mechanism under the Labor Standards Law. For those employees who were subject to the Labor Standards Law prior to July 1, 2005 and still work for the same company after July 1, 2005 and choose to be subject to the pension mechanism under this Act, their seniority as of July 1, 2005 shall be maintained. The Act prescribe that the rate of contribution by an employer to employees pension accounts per month shall not be less than 6% of each employee s monthly salary or wage. The Company has made monthly contributions based on each employee salary or wage to employees pension accounts starting from July 1, 2005, and recognized pension costs of NT\$127,170 thousand for the third quarter of 2005.

The Company has a defined benefit plan under the Labor Standards Law that provides benefits based on an employee s length of service and average monthly salary or wage for the six-month period prior to retirement. The Company contributes an amount equal to 2% of salaries and wages paid each month to a pension fund (the Fund). The Fund is administered by a pension fund monitoring committee (the Committee) and deposited in the Committee s name in the Central Trust of China.

For the nine months ended September 30, 2005 and 2004, changes in the Fund and accrued pension cost under the defined benefit plan are summarized as follows:

	Nine Months Ended September 30	
	2005	2004
The Fund		
Balance, beginning of period	\$ 1,428,001	\$ 1,191,702
Contribution	168,958	170,709
Interest	15,629	15,562
Payment	(8,419)	(1,446)
Balance, end of period	\$ 1,604,169	\$ 1,376,527
Accrued pension cost		
Balance, beginning of period	\$3,101,196	\$ 2,600,251
Accruals	350,475	374,755

Balance, end of period \$3,451,671 \$2,975,006

17

12. INCOME TAX

a. A reconciliation of income tax expense based on income before income tax at statutory rate and current income tax expense before income tax credits was as follows:

	Nine Months Ended September 30		
	2005	2004	
Income tax expense based on income before income tax at statutory rate (25%) Tax-exempt income Temporary and permanent differences	\$ (14,604,548) 8,120,128 (909,174)	\$ (17,421,239) 10,261,110 83,509	
Current income tax expense before income tax credits	\$ (7,393,594)	\$ (7,076,620)	
b. Income tax benefit consisted of the following:			
Current income tax expense before income tax credits Additional tax at 10% on unappropriated earnings Income tax credits Other income tax adjustments Net change in deferred income tax assets and liabilities Investment tax credits Temporary differences Adjustments in valuation allowances	\$ (7,393,594) (1,489,709) 7,771,188 39,749 2,297,281 1,530,726 (1,498,931)	\$ (7,076,620) (821,767) 7,898,387 (427,552) 266,173 755,306 (146,901)	
Income tax benefit	\$ 1,256,710	\$ 447,026	
c. Net deferred income tax assets consisted of the following:			
	Septem	phor 30	
	2005	2004	
Current deferred income tax assets Investment tax credits	\$ 1,781,000	\$ 2,471,000	
Non-current deferred income tax assets, net Investment tax credits Temporary differences Valuation allowances	\$ 26,400,865 (919,809) (14,438,977)	\$ 23,445,067 (2,730,145) (12,918,748)	
	\$ 11,042,079	\$ 7,796,174	

d. Integrated income tax information:

The balance of the imputation credit account as of September 30, 2005 and 2004 was NT\$20,087 thousand and zero, respectively.

The expected and actual creditable ratios for distribution of earnings of 2004 and 2003 were 0.11% and 0.03%, respectively.

The imputation credit allocated to the shareholders is based on its balance as of the date of dividend distribution. The expected creditable ratio may be adjusted when the actual distribution of the imputation credits is made.

18

- e. All earnings generated prior to December 31, 1997 have been appropriated.
- f. As of September 30, 2005, investment tax credits consisted of the following:

Regulation Statute for	Item	(Total Creditable Amount	(Remaining Creditable Amount	Expiry Year
Upgrading Industries	Purchase of machinery and equipment		134,467 4,886,421 4,139,292 11,007,504 3,361,988	\$	444,770 4,139,292 11,007,504 3,361,988	2005 2006 2007 2008 2009

14. SHAREHOLDERS EQUITY

The Company has issued a total of 864,211 thousand ADSs which are traded on the NYSE as of September 30, 2005. The number of common shares represented by the ADSs is 4,321,053 thousand (one ADS represents five common shares).

Capital surplus can only be used to offset a deficit under the Company Law. However, the capital surplus generated from donations and the excess of the issue price over the par value of capital stock (including the stock issued for new capital, mergers, convertible bonds and the surplus from treasury stock transactions) may be appropriated as stock dividends, which is restricted to a certain percentage of the paid-in common stock of the Company.

As of September 30, 2005 and 2004, capital surplus consisted of the following:

	September 30		
	2005	2004	
From merger	\$ 24,003,546	\$ 24,003,546	
Additional paid-in capital	23,175,884	23,048,918	
From convertible bonds	9,360,424	9,360,424	
From long-term investments	145,441	116,157	
From treasury stock transactions	91,690		
Donations	55	55	
	\$ 56,777,040	\$ 56,529,100	

The Company s Articles of Incorporation as revised on May 10, 2005 provide that, when allocating the net profits for each fiscal year, the Company shall first offset its losses in previous years and then set aside the following items accordingly:

- a. Legal capital reserve at 10% of the profits left over, until the accumulated legal capital reserve has equaled the Company s paid-in capital;
- b. Special capital reserve in accordance with relevant laws or regulations or as requested by the authorities in charge;
- c. Bonus to directors and supervisors and bonus to employees of the Company equal to not more than 0.3% and not less than 1% of the remainder, respectively. Directors who also serve as executive officers of the Company are not entitled to receive the bonus to directors and supervisors. The Company may issue stock bonuses to employees of an affiliated company meeting the conditions set by the Board of Directors or, by the person duly authorized by the Board of Directors;
- d. Any balance left over shall be allocated according to the resolution of the shareholders meeting. The Company s Articles of Incorporation also stipulate that profits of the Company may be distributed by way of cash dividend and/or stock dividend. However, distribution of profits shall be made preferably by way of cash dividend. Distribution of profits may also be made by way of stock dividend; provided, however, the ratio for stock dividend shall not exceed 50% of total distribution.

Any appropriations of net income are recorded in the financial statement in the year of shareholder approval. The appropriation for legal capital reserve shall be made until the reserve equals the Company s paid-in capital. The reserve can be used to offset a deficit, or be distributed as dividends and bonuses for the portion in excess of 50% of the paid-in capital if the Company has no unappropriated earnings and the reserve balance has exceeded 50% of the Company s paid-in capital. The Company Law also prescribes that, when the reserve has reached 50% of the Company s paid-in capital, only 50% of the reserve may be transferred to capital.

A special capital reserve equivalent to the net debit balance of the other components of shareholder s equity (for example, unrealized loss on long-term investments and cumulative translation adjustments, but excluding treasury stock) shall be made from unappropriated earnings pursuant to existing regulations promulgated by the Securities and Futures Bureau (SFB). Any special reserve appropriated may be reversed to the extent that the net debit balance reverses.

The appropriations of earnings for 2004 and 2003 had been approved in the shareholders meetings held on May 10, 2005 and May 11, 2004, respectively. The appropriations and dividends per share are as follows:

	Appropriation of Earnings		Dividends Per Share (NT\$)		
	For Fiscal	For Fiscal	For Fiscal Year	For Fiscal Year	
	Year 2004	Year 2003	2004	2003	
Legal capital reserve	\$ 8,820,201	\$ 4,725,870			
Special capital reserve	2,226,427	(68,945)			
Employees profit sharing in cash	3,086,215	681,628			
Employees profit sharing in stock	3,086,215	2,726,514			
Cash dividends to preferred shareholders		184,493	\$	\$ 0.35	
Cash dividends to common shareholders	46,504,097	12,159,971	2.00	0.60	
Stock dividends to common shareholders	11,626,024	28,373,267	0.50	1.41	
Bonus to directors and supervisors	231,466	127,805			
	\$ 75,580,645	\$ 48,910,603			

The amounts of the above appropriations of earnings for 2004 and 2003 are consistent with the resolutions of the meetings of the Board of Directors held on February 22, 2005 and February 17, 2004, respectively. However, the Company Law prescribes that TSMC, as a holder of treasury stock, shall not participate in the appropriation of earnings. Therefore, the actual cash dividend per share and stock dividend per share are slightly more than those in the aforementioned resolutions. If the above bonus to employees, directors and supervisors had been paid entirely in cash and charged against earnings for 2004 and 2003, the after income tax basic earnings per share for the years ended December 31, 2004 and 2003 would have decreased from NT\$3.97 to NT\$3.70 and NT\$2.33 to NT\$2.15, respectively. The shares distributed as a bonus to employees represented 1.33% and 1.35% of the Company s total outstanding common shares as of December 31, 2004 and 2003, respectively.

The above information about the appropriations of bonus to employees, directors and supervisors is available at Market Observation System website.

Under the Integrated Income Tax System that became effective on January 1, 1998, the R.O.C. resident shareholders are allowed a tax credit for their proportionate share of the income tax paid by the Company on earnings generated since January 1, 1998.

15. STOCK-BASED COMPENSATION PLANS

The Company s Employee Stock Option Plans under the 2005 Plan, 2003 Plan and 2002 Plan were approved by the SFB on January 6, 2005, October 29, 2003 and June 25, 2002, respectively. The maximum number of units authorized to be granted under the 2005 Plan, the 2003 Plan and the 2002 Plan was 11,000 thousand, 120,000 thousand and 100,000 thousand, respectively, with each unit eligible to subscribe to one common share when exercisable. The options may be granted to qualified employees of the Company or any of its domestic or foreign subsidiaries, in which the Company s shareholding with voting rights, directly or indirectly, is more than fifty percent (50%). The options of all the plans are valid for ten years and exercisable at certain percentages subsequent to the second anniversary of the grant date. Under the terms of the plans, the options are granted at an exercise price equal to the closing price of the Company s common shares listed on the TSE on the grant date.

Units that had never been granted or had been granted and subsequently cancelled under the 2003 Plan and the 2002 Plan were expired as of September 30, 2005.

Information about outstanding stock options for the nine months ended September 30, 2005 and 2004 was as follows:

Nine months and ad Sentember 20, 2005	Number of Options (in Thousands)	Weighted- Average Exercise Price (NT\$)
Nine months ended September 30, 2005		
Balance, beginning of period Options granted Options exercised Options cancelled	64,367 14,864 (4,160) (3,777)	\$40.5 48.4 39.9 43.5
Balance, end of period	71,294	42.1
Nine months ended September 30, 2004		
Balance, beginning of period Options granted Options cancelled	49,357 20,399 (4,255)	\$43.0 47.3 45.9
Balance, end of period	65,501	44.1

The numbers of outstanding options and exercise prices have been adjusted to reflect the appropriations of dividends in accordance with the plans.

As of September 30, 2005, information about outstanding and exercisable options was as follows:

		Options Outstanding			Options Exercisable		
	Range of Exercise	Number of Options (in	Weighted- average Remaining Contractual	Weighted- average Exercise Price	Number of Options (in	Weighted- average Exercise Price	
		1	Life		`		
	Price (NT\$)	Thousands)	(Years)	(NT\$)	Thousands)	(NT\$)	
29.9-42.1		48,690	7.34	38.8	28,743	38.6	
47.0-54.5		22,604	9.07	49.2			
		71,294			28,743		
			23				

No compensation cost was recognized under the intrinsic value method for the nine months ended September 30, 2005 and 2004. Had the Company used the fair value based method (based on the Black-Scholes model) to evaluate the options granted after January 1, 2004, the assumptions and pro forma results of the Company for the nine months ended September 30, 2005 and 2004 would have been as follows:

		Nine Months Ended September 30			
			2005		2004
Assumptions:					
Expected dividend yield			1.00%-3.44%		1.00 %
Expected volatility		4	3.77%-46.15%	4	3.19%-43.25%
Risk free interest rate			3.07%-3.85%		3.07%-3.85%
Expected life			5 years		5 years
Net income:					
Net income as reported		\$	59,674,900	\$	70,131,981
Pro forma net income			59,591,795		70,092,754
Earnings per share (EPS)	after income tax (NT\$):				
Basic EPS as reported		\$	2.42	\$	2.84
Pro forma basic EPS			2.41		2.83
Diluted EPS as reported			2.42		2.83
Pro forma diluted EPS			2.41		2.83

The estimated weighted average fair value per unit for the options granted during the nine months ended September 30, 2005 and 2004 was NT\$ 17.69 and NT\$19.73, respectively.

16. TREASURY STOCK

	T		(Shares in T	*
	Beginning Shares	Increase/ Distribute	Decrease	Ending Shares
Nine months ended September 30, 2005				
Reclassification of parent company stock held by subsidiaries from long-term investments	45,521	2,242	955	46,808
Nine months ended September 30, 2004				
Reclassification of parent company stock held by subsidiaries from long-term investments Repurchase under share buyback plan	40,597	5,676 124,720	303 124,720	45,970
	40,597	130,396	125,023	45,970

Proceeds from the sales of treasury stock for the nine months ended September 30, 2005 and 2004 were NT\$52,273 thousand and NT\$18,218 thousand, respectively. As of September 30, 2005 and 2004, the book value of the treasury stock was NT\$1,550,112 thousand and NT\$1,616,669 thousand, respectively; the market value was NT\$2,456,486 thousand and NT\$2,056,707 thousand, respectively. The Company s stock held by its subsidiaries are treated as

treasury stock and the holders are entitled to the rights of shareholders. However, starting from June 24, 2005, pursuant to the revised Company Law, the holders are no longer entitled to the right to vote.

The Company held a special meeting of the Board of Directors and approved a share buyback plan to repurchase the Company s common shares listed on the TSE during the period from March 24, 2004 to May 23, 2004. The Company repurchased 124,720 thousand common shares for a total cost of NT\$7,059,798 thousand. All the treasury stock repurchased under the buyback plan was retired on August 16, 2004.

17. EARNINGS PER SHARE

EPS is computed as follows:

			Number of	EPS ((NT\$)
	Amounts (N Before	Numerator) After	Shares (Denominator) (in	Before Income	After Income
	Income Tax	Income Tax	Thousands)	Tax	Tax
Nine months ended September 30, 2005			,		
Basic EPS Income available to common shareholders	\$ 58,418,190	\$ 59,674,900	24,677,788	\$ 2.37	\$ 2.42
Effect of dilutive potential common stock stock options			12,110		
Diluted EPS Income available to common shareholders (including effect of dilutive potential common stock)	\$ 58,418,190	\$ 59,674,900	24,689,898	\$ 2.37	\$ 2.42
Nine months ended September 30, 2004					
Basic EPS Income available to common shareholders	\$ 69,684,955	\$ 70,131,981	24,731,837	\$ 2.82	\$ 2.84
Effect of dilutive potential common stock stock options			7,172		
Diluted EPS Income available to common shareholders (including effect of dilutive potential common stock)	\$ 69,684,955	\$ 70,131,981	24,739,009	\$ 2.82	\$ 2.83

18. RELATED PARTY TRANSACTIONS

The Company engages in business transactions with the following related parties:

- a. Industrial Technology Research Institute (ITRI), the chairman of the Company is one of its directors.
- b. Philips, a major shareholder of the Company.
- c. Subsidiaries

TSMC Shanghai

TSMC North America

TSMC Europe

TSMC Japan

d. Investees

GUC (with controlling financial interest)

VisEra (with controlling financial interest)

VIS (accounted for using equity method)

SSMC (accounted for using equity method)

e. Indirect subsidiaries

WaferTech, LLC (WaferTech)

TSMC Technology, Inc. (TSMC Technology)

The transactions with the aforementioned parties, except for those disclosed in other notes, are summarized as follows:

	2005		2004	
	Amount	%	Amount	%
For the nine months ended September 30

Deferred credits

TSMC Shanghai \$ 681,978 60 \$ 598,350 100

The terms of sales to related parties are not significantly different from those to third parties. For other related party transactions, prices are determined in accordance with the related contractual agreements.

The Company deferred the gains derived from sales of property, plant and equipment to TSMC Shanghai, and then recognized such gains over the depreciable lives of the disposed assets.

19. SIGNIFICANT LONG-TERM LEASES

The Company leases land from the Science-Based Industrial Park Administration. These lease agreements expire on various dates from March 2008 to December 2020 and can be renewed upon their expiration.

27

As of September 30, 2005, future remaining lease payments were as follows:

Yea	r Amou	nt
2005 (4 th quarter)	\$ 63	,992
2006	251	,415
2007	251	,415
2008	233	,250
2009	227	,195
2010 and thereafter	1,292	,511

\$ 2,319,778

20. SETTLEMENT INCOME

TSMC, TSMC North America and WaferTech filed a series of lawsuits in late 2003 and 2004 against Semiconductor Manufacturing International Corporation (SMIC), SMIC (Shanghai) and SMIC Americas. The lawsuits alleged that SMIC companies infringed multiple TSMC patents and misappropriated TSMC s trade secrets. These suits have been settled out of court on January 30, 2005. As part of the settlement, SMIC will pay TSMC US\$175 million over six years to resolve TSMC s claims.

21. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

The significant commitments and contingencies of the Company as of September 30, 2005 are as follows:

- a. On June 20, 2004, the Company and Philips revised the Technical Cooperation Agreement, which was originally signed on May 12, 1997, with an effective date from January 1, 2004 for five years. Upon expiration, this amended Technical Cooperation Agreement will be terminated at the expiration date and will not be automatically renewed. Under this amended Technical Cooperation Agreement, the Company will pay Philips royalties based on a fixed amounts mutually agreed-on, rather than under certain percentage of the Company s annual net sales. The Company and Philips agree to cross license the patents owned by each party. The Company also obtained through Philips a number of patent cross licenses.
- b. Under a technical cooperation agreement with ITRI, the Company shall reserve and allocate up to 35% of certain of its production capacity for use by the Ministry of Economic Affairs (MOEA) or any other party designated by the MOEA. The term of this agreement is for five years beginning January 1, 1987 and is automatically renewed for successive periods of five years unless otherwise terminated by either party with one year prior notice. The agreement was automatically renewed in 1992 and 1997 and on January 1, 2002.
- c. Under several foundry agreements, the Company shall reserve a portion of its production capacity for certain major customers that have guarantee deposits with the Company. As of September 30, 2005, the Company had a total of US\$70,868 thousand of guarantee deposits.
- d. Under a Shareholders Agreement entered into with Philips and EDB Investments Pte Ltd. on March 30, 1999, the parties formed a joint venture company, SSMC, for the purpose of constructing an integrated circuit foundry in Singapore. As of September 30, 2005, the Company s equity interest in SSMC was 32%. The Company and Philips committed to buy specific percentages of the production capacity of SSMC. The Company and Philips are required, in the aggregate, to purchase up to 70% of SSMC s full capacity, but the Company along is not required to purchase more than 28% of the annual installed capacity. If any party defaults on the commitment and the capacity utilization of SSMC fall below a specific percentage of its total capacity, the defaulting party is required to compensate SSMC for all related unavoidable costs.

- e. The Company provides technical services to SSMC under a Technical Cooperation Agreement (the Agreement) entered into on May 12, 1999. The Company receives compensation for such services computed at a specific percentage of net selling price of certain products sold by SSMC. The Agreement shall remain in force for ten years and may be automatically renewed for successive periods of five years each unless pre-terminated by either party under certain conditions.
- f. Under a Technology Transfer Agreement (TTA) with National Semiconductor Corporation (National) entered into on June 27, 2000, the Company shall receive payments for the licensing of certain technology to National. The agreement was to remain in force for ten years and could be automatically renewed for successive periods of two years thereafter unless either party gives notice for early termination under certain conditions. In January 2003, the Company and National entered into a Termination Agreement whereby the TTA was terminated for convenience. Under the Termination Agreement, the Company will be relieved of any further obligation to transfer any additional technology. In addition, the Company granted National an option to request the transfer of certain technologies under the same terms and conditions as the terminated TTA. The option will expire in January 2008.
- g. Beginning in 2001, the Company entered into several licensing arrangements for certain semiconductor patents. The terms of the contracts range from five to ten years with payments to be made in the form of royalties over the term of the related contracts. The Company has recorded the related amounts as a liability with the corresponding amounts recorded as deferred charges which are amortized and charged to cost of sales on a straight-line basis over the estimated life of the technology or the term of the contract, whichever is shorter.
- h. In November 2002, the Company entered into an Amended and Restated Joint Technology Cooperation Agreement with Philips, Freescale Semiconductor, Inc. and STMicroelectronics to jointly develop 90-nm to 65-nm advanced CMOS Logic and e-DRAM technologies. The Company also agreed to align 0.12 micron CMOS Logic technology to enhance its foundry business opportunities. The Company will contribute process technologies and share a portion of the costs associated with this joint development project.
- i. In December 2003, the Company entered into a Technology Development and License Agreement with Freescale Semiconductor, Inc. to jointly develop 65-nm SOI (silicon on insulator) technology. The Company will also license related 90-nm SOI technology from Freescale Semiconductor, Inc. Any intellectual properties arising out of the co-development project shall be jointly owned by the parties. In accordance with the agreement, the Company will pay royalties to Freescale Semiconductor, Inc. and will share a portion of the costs associated with the joint development project.
- j. The Company provides a technology transfer to VIS under a Manufacturing License and Technology Transfer Agreement entered into in August 2004. The Company receives compensation for such technology transfer in the form of royalty payments from VIS computed at specific percentages of net selling price of certain products sold by VIS. VIS agreed to reserve its certain capacity to manufacture for the Company certain products at prices as agreed by the parties.
- k. Amounts available under unused letters of credit as of September 30, 2005 were NT\$6,480 thousand.
- 1. The Company provided guarantees on loans amounting to US\$30,000 thousand and US\$40,000 thousand for TSMC Development, Inc. (TSMC Development) and TSMC-North America, respectively.

22. ADDITIONAL DISCLOSURES

Following are the additional disclosures required by the SFB for the Company and its investees:

a. Financing provided: Please see Table 1 attached;

- b. Endorsement/guarantee provided: Please see Table 2 attached;
- c. Marketable securities held: Please see Table 3 attached;
- d. Marketable securities acquired or disposed of at costs or prices of at least NT\$100 million or 20% of the paid-in capital: Please see Table 4 attached;
- e. Acquisition of individual real estate properties at costs of at least NT\$100 million or 20% of the paid-in capital: None;
- f. Disposal of individual real estate properties at prices of at least NT\$100 million or 20% of the paid-in capital: None;
- g. Total purchases from or sales to related parties of at least NT\$100 million or 20% of the paid-in capital: Please see Table 5 attached;
- h. Receivable from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Please see Table 6 attached;
- i. Names, locations, and related information of investees on which the Company exercises significant influence: Please see Table 7 attached;
- j. Financial instrument transactions:
 - 1) Derivative financial instruments

The Company and TSMC-Shanghai entered into derivative financial instrument transactions during the nine months ended September 30, 2005 and 2004 to manage exposures related to foreign-exchange rate and interest rate fluctuations. Certain information on these contracts was as follows:

- a) Outstanding forward exchange contracts as of September 30, 2005 and 2004
 - i) The Company

September 30, 2005	Financial Instruments	Currency	Maturity	Notional Amount (in Thousands)
Sell		US\$/NT\$	Oct. 2005 to Dec. 2005	US\$ 680,000
September 30, 2004				
Sell		US\$/EUR	Oct. 2004 Oct. 2004 to Apr.	US\$ 33,723
Sell		US\$/NT\$	2005	US\$2,351,000
Sell		EUR/US\$	Nov. 2004	EUR 58,500

As of September 30, 2005 and 2004, receivables resulted from forward exchange contracts (included in the other financial assets account) aggregated approximately NT\$210 thousand and NT\$27,881 thousand, respectively; payables resulted from forward exchange contracts (included in the other current liabilities account) aggregated approximately NT\$277,384 thousand and NT\$887,272 thousand, respectively.

TAT 4.

- ii) As of September 30, 2005, TSMC Shanghai did not have any outstanding forward exchange contracts. TSMC-Shanghai did not enter into any derivative financial instrument contracts during the nine months ended September 30, 2004.
- b) Cross currency swap contracts

Outstanding cross currency swap contracts as of September 30, 2005 were as follows:

	Notional		Range of
	Amount	Range of	Interest Rate
Maturity Date	(in Thousands)	Interest Rate Paid	Received
Oct. 2005 to Dec. 2005	US\$1,574,000	3.65%-4.01%	1.17%-1.38%
	(US\$/NT\$)		

As of September 30, 2005, payables resulted from cross currency swap contracts (included in the other current liabilities account) were NT\$1,148,301 thousand.

The Company did not enter into any cross currency swap contracts during the nine months ended September 30, 2004.

c) Option contracts

Outstanding option contracts as of September 30, 2005 were as follows:

	Notional						
		Financial	Amount				
Type	Buy/Sell	Instrument	(in Thousands)	Maturity			
European	Sell	Call	US\$10,000	Oct. 2005			
European	Buy	Put	US\$10,000	Oct. 2005			

The Company did not entered into any foreign currency option contracts during the nine months ended September 30, 2004.

During the nine months ended September 30, 2005 and 2004, the net exchange gain or loss arising from forward exchange contracts, cross currency swap contracts and foreign currency option contracts was recognized in the foreign exchange loss, net account and the difference in interest was recorded in interest income or expense.

d) Interest rate swap contracts

The Company rescinded all outstanding interest rate swap contracts in the first quarter of 2005 before their original maturities. The rescission loss of NT\$28,295 thousand was recognized in the interest expense account. There were no outstanding contracts as of September 30, 2005.

NT - 42 - - - - 1

Outstanding contracts as of September 30, 2004 were as follows:

		Notional Amount (in
Contract Date	Period	Thousands)
	Sep. 2003 to Dec.	
Sep. 2003	2005	NT\$500,000
	Oct. 2003 to Dec.	
Oct. 2003	2005	NT\$500,000
	Oct. 2003 to Dec.	
Oct. 2003	2005	NT\$500,000
	Oct. 2003 to Dec.	
Oct. 2003	2005	NT\$500,000
	Oct. 2003 to Dec.	
Oct. 2003	2005	NT\$500,000
	Nov. 2003 to Dec.	
Nov. 2003	2005	NT\$500,000

e) Transaction risk

- i) Credit risk. Credit risk represents the positive net settlement amount of those contracts with positive fair values at the balance sheet date. The positive net settlement amount represents the loss to be incurred by the Company if the counter-parties breached the contracts. The banks, which are the counter-parties to the foregoing derivative financial instruments, are reputable financial institutions. Management believes its exposure related to the potential default by those counter-parties is low.
- ii) Market price risk. All derivative financial instruments are intended as hedges for fluctuations in foreign exchange rates and interest rates. Gains or losses from these hedging instruments are likely to be offset by gains or losses from the hedged items. Thus, market price risk is believed to be low.
- iii) Cash flow risk and the amount and period of future cash needs.

As of September 30, 2005, the Company s future cash needs for outstanding forward exchange contracts and cross currency swap contracts were as follows:

	Inflow	Outflow
	(In	
Term	Thousands)	(In Thousands)
Within one year	NT\$73,480,726	US\$2,254,000

The Company has sufficient operating capital to meet the above cash needs. In addition, there will be corresponding cash inflow for the cash outflow. Therefore, cash flow risk is low.

2) Fair values of financial instruments were as follows:

	September 30, 2005		September 30, 2004		
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	
Non-derivative financial instruments	1 miount	Tun vuiuc	Timount	Turi vuruc	
Assets					
Short-term investments	\$48,821,970	\$48,821,970	\$46,128,381	\$46,201,834	

Long-term investments (securities with market price)

33,185,986

37,744,005

24,627,466

27,584,817 (Continued)

32

	September 30, 2005		September 30, 2004 Carrying		
	Carrying Amount	Fair Value	Amount	Fair Value	
Liabilities					
Bonds payable (including current					
portion)	\$30,000,000	\$30,372,946	\$35,000,000	\$35,655,089	
Derivative financial instruments					
Assets (liabilities)					
Forward exchange contracts (sell)	(285,258)	(236,202)	(787,029)	(349,631)	
Cross currency swap contracts	(1,211,143)	(872,372)			
Option contracts		115			
Interest rate swap contracts			4,361	1,391	

The above financial instruments do not include cash and cash equivalents, receivables, other financial assets, payables, and payable to contractors and equipment suppliers. The carrying amounts of the aforementioned financial instruments reported in the balance sheet approximate their fair values.

The above financial instruments also exclude refundable deposits, guarantee deposits, long-term investments that do not have quoted market prices as well as other long-term payables. The future cash inflow and outflow of the deposits approximate their fair values. Some of long-term investments do not have quoted market prices; therefore, fair values for those long-term investments are not shown above. The fair value of other long-term payables is determined using the discounted value of expected cash flows, which approximates their carrying amount.

Fair values of financial instruments were determined as follows:

- a) Fair value of short-term and publicly traded long-term investments is based on quoted market prices.
- b) Fair value of bonds payable is based on their quoted market price.
- c) Fair value of derivative financial instruments is the amount receivable from or payable to the counter-party if the contracts were terminated on the balance sheet date.

The fair values of some financial and non-financial instruments were not included in the fair values disclosed above. Accordingly, the sum of the fair values of the financial instruments listed above does not represent the fair value of the Company as a whole.

- k. Information on investment in Mainland China
 - 1) The name of the investee company in mainland China, the main businesses and products, its issued capital, method of investment, information on inflow or outflow of capital, ratio of ownership, equity in the net gain or net loss, ending balance, amount received as earnings distributions from the investment, and the limitation on investment: Please see Table 8 attached.
 - 2) Significant direct or indirect transactions with the investee company, its prices and terms of payment, unrealized gain or loss, and other related information which is helpful to understand the impact of investment in mainland China on financial reports: Please see Note 18.
