Form 10-Q
August 07, 2013

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q

(Mark One)

☒ Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2013

☐ Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File Number 000-33501

NORTHRIM BANCORP, INC.

(Exact name of registrant as specified in its charter)

Alaska

(State or other jurisdiction of incorporation or organization)

92-0175752

(I.R.S. Employer Identification No.)

3111 C Street

Anchorage, Alaska 99503

(Address of principal executive offices) (Zip Code)

(907) 562-0062

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Edgar Filing: NORTHRIM BANCORP INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act:

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The number of shares of the issuer's Common Stock, par value \$1 per share, outstanding at August 6, 2013 was 6,515,414.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by Northrim BanCorp, Inc. (the “Company”) in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and with instructions to Form 10-Q under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Certain reclassifications have been made to prior year amounts to maintain consistency with the current year with no impact on net income or total shareholders’ equity. The Company determined that it operates as a single operating segment. Operating results for the interim period ended June 30, 2013, are not necessarily indicative of the results anticipated for the year ending December 31, 2013. These consolidated financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

2. Significant Accounting Policies and Recent Accounting Pronouncements

The Company’s significant accounting policies are discussed in Note 1 to the audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

In February 2013, the Financial Accounting Standards Board (“FASB”) issued ASU 2013-02, Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income (“ASU 2013-02”). The amendments to the Codification in ASU 2013-02 do not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. This ASU was effective for the Company’s financial statements for annual and interim periods beginning on or after December 15, 2012, and has been applied prospectively. The adoption of this standard did not have a material impact on the Company’s consolidated financial position or results of operations.

3. Cash and Cash Equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, interest-bearing deposits with other banks, banker’s acceptances, commercial paper, securities purchased under agreement to resell, federal funds sold, and securities with maturities of less than 90 days at acquisition. As of June 30, 2013, the Company had two certificates of deposit totaling \$13.5 million in another bank. Cash and cash equivalent balances placed with the Federal Reserve of San Francisco is the only concentration representing more than 10% of the Company’s equity.

4. Investment Securities

The carrying values and approximate fair values of investment securities at the periods indicated are presented below:

(In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
June 30, 2013				
Securities available for sale				
U.S. Treasury and government sponsored entities	\$ 143,127	\$ 173	\$ 463	\$ 142,837
Municipal securities	21,055	382	56	21,381
U.S. Agency mortgage-backed securities	30	-	-	30
Corporate bonds	55,026	1,005	50	55,981

December 31, 2012				
Securities available for sale				
U.S. Treasury and government sponsored entities	\$ 123,959	\$ 455	\$ -	\$ 124,414
Municipal securities	21,124	613	9	21,728
U.S. Agency mortgage-backed securities	35	1	-	36
Corporate bonds	52,951	1,081	50	53,982
Preferred stock	3,524	234	-	3,758
Total securities available for sale	\$ 201,593	\$ 2,384	\$ 59	\$ 203,918
Securities held to maturity				
Municipal securities	\$ 2,749	\$ 229	\$ -	\$ 2,978
Total securities held to maturity	\$ 2,749	\$ 229	\$ -	\$ 2,978

There were twenty six and six securities with unrealized losses as of June 30, 2013 and December 31, 2012, respectively, that have been in a loss position for less than twelve months. There were no securities with unrealized losses as of June 30, 2013 and December 31, 2012 that have been in an unrealized loss position for more than twelve months. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because the Company does not intend to sell, nor is it required to sell these investments until a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

At June 30, 2013, \$40.6 million in securities, or 18%, of the investment portfolio was pledged, as compared to \$42.7 million, or 20%, at December 31, 2012. We held no securities of any single issuer (other than government sponsored entities) that exceeded 10% of our shareholders' equity at June 30, 2013 and December 31, 2012.

The amortized cost and fair values of debt securities at June 30, 2013, are distributed by contractual maturity as shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Although preferred stock has no stated maturity, it is aggregated in the calculation of weighted average yields presented below in the category of investments that mature in ten years or more.

(In Thousands)	Amortized Cost	Fair Value	Weighted Average Yield
US Treasury and government sponsored entities			
Within 1 year	\$ 45,195	\$ 45,359	0.77 %
1-5 years	97,932	97,478	0.51 %
Total	\$ 143,127	\$ 142,837	0.59 %
U.S. Agency mortgage-backed securities			
1-5 years	\$ 30	\$ 30	4.45 %
Total	\$ 30	\$ 30	4.45 %
Corporate bonds			
Within 1 year	\$ 6,660	\$ 6,704	1.43 %
1-5 years	46,366	47,293	2.25 %
5-10 years	2,000	1,984	0.01
Total	\$ 55,026	\$ 55,981	2.10 %
Preferred stock			
Over 10 years	2,501	2,596	5.19 %
Total	\$ 2,501	\$ 2,596	5.19 %
Municipal securities			
Within 1 year	\$ 4,573	\$ 4,606	2.12 %
1-5 years	10,917	11,084	1.66 %
5-10 years	8,311	8,601	4.80 %
Total	\$ 23,801	\$ 24,291	2.84 %

The proceeds and resulting gains and losses, computed using specific identification, from sales of investment securities for the six months ending June 30, 2013 and 2012, respectively, are as follows:

(In Thousands)	Proceeds	Gross Gains	Gross Losses
2013			
Available for sale securities	\$ 22,013	\$ 318	\$ -
2012			

Available for sale securities \$ 30,424 \$ 273 \$ -

A summary of interest income for the six months ending June 30, 2013 and 2012 on available for sale investment securities is as follows:

(In Thousands)	2013	2012
US Treasury and government sponsored entities	\$ 419	\$ 553
U.S. Agency mortgage-backed securities	1	1
Other	581	630

Total tax-exempt interest income	288	283
Total	\$ 1,289	\$ 1,467

For the periods ending June 30, 2013 and December 31, 2012, we held Federal Home Loan Bank of Seattle (“FHLB”) stock with a book value approximately equal to its market value in the amount of \$1.9 and \$2.0 million, respectively. The Company evaluated its investment in FHLB stock for other-than-temporary impairment as of June 30, 2013, consistent with its accounting policy. Based on the Company’s evaluation of the underlying investment, including the fact that the FHLB of Seattle recently began redeeming stock at par, the long-term nature of the investment, the liquidity position of the FHLB of Seattle, and the Company’s intent and ability to hold the investment for a period of time sufficient to recover the par value, the Company did not recognize an other-than-temporary impairment loss.

5. Loans Held for Sale

From time to time, the Company has purchased residential loans from our mortgage affiliate, Residential Mortgage Holding Company LLC (“RML”). The Company then sells these loans in the secondary market. The Company purchased \$75.7 million and sold \$71.6 million in loans during the six-month period ending June 30, 2013. The Company purchased \$86.6 million and sold \$91.8 million in loans during the six-month period ending June 30, 2012.

6. Loans

The following table presents total portfolio loans by portfolio segment and class of financing receivable, based on our risk classification criteria:

									\$ 704,213

Loans are carried at their principal amount outstanding, net of charge-offs, unamortized fees and direct loan origination costs. Loan balances are charged to the allowance for loan losses (the "Allowance") when management believes that collection of principal is unlikely. Interest income on loans is accrued and recognized on the principal amount outstanding except for loans in a nonaccrual status. All classes of loans are placed on nonaccrual and considered impaired when management believes doubt exists as to the collectability of the interest or principal. Cash payments received on nonaccrual loans are applied directly to the principal balance. Generally, a loan may be returned to accrual status when the delinquent principal and interest are brought current in accordance with the terms of the loan agreement. Additionally, certain ongoing performance criteria, which generally includes a performance period of six months, must be met in order for a loan to be returned to accrual status. Loans are reported as past due when installment payments, interest payments, or maturity payments are past due based on contractual terms.

Edgar Filing: NORTHRIM BANCORP INC - Form 10-Q

Nonaccrual loans totaled \$3.8 million and \$4.5 million at June 30, 2013 and December 31, 2012, respectively. Nonaccrual loans at the periods indicated, by segment are presented below:

(In Thousands)	June 30, 2013	December 31, 2012

The Company considers a loan to be impaired when it is probable that it will be unable to collect all amounts due according to the contractual terms of the loan agreement. Once a loan is determined to be impaired, the impairment is measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate, except that if the loan is collateral dependent, the impairment is measured by using the fair value of the loan's collateral. Nonperforming loans greater than \$50,000 are individually evaluated for impairment based upon the borrower's overall financial condition, resources, and payment record, and the prospects for support from any financially responsible guarantors.

Edgar Filing: NORTHRIM BANCORP INC - Form 10-Q

At June 30, 2013 and December 31, 2012, the recorded investment in loans that are considered to be impaired was \$11.2 million and \$13.1 million, respectively. The following table presents information about impaired loans by class as of the periods indicated:

Total Impaired Loans	\$ 11,555	\$ 226	\$ 14,250	\$ 366

Loans classified as troubled debt restructurings (“TDR”) totaled \$9.1 million and \$12.1 million at June 30, 2013 and December 31, 2012, respectively. A TDR is a loan to a borrower that is experiencing financial difficulty that has been modified from its original terms and conditions in such a way that the Company is granting the borrower a concession that it would not grant otherwise. The Company has granted a variety of concessions to borrowers in the form of loan modifications. The modifications granted can generally be described in the following categories:

Rate Modification: A modification in which the interest rate is changed.

Term Modification: A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Payment Modification: A modification in which the dollar amount of the payment is changed, or in which a loan is converted to interest only payments for a period of time is included in this category.

Combination Modification: Any other type of modification, including the use of multiple categories above.

The Company did not have any newly restructured loans during the six months ended June 30, 2013.

The loans in the following table are past due, and they are nonaccrual loans. The following table presents TDRs that occurred during the twelve month periods ending June 30, 2013 and 2012, respectively, that subsequently defaulted during the six-months ended June 30, 2013 and June 30, 2012:

(In Thousands)	Number of Contracts	June 30, 2013 Recorded Investment	June 30, 2012 Recorded Investment
Troubled Debt Restructurings that Subsequently Defaulted:			
Commercial - AQR pass	1	\$ -	\$ 192
Commercial - AQR substandard	1	-	131
Commercial - AQR doubtful	2	-	563
Real estate construction one-to-four family - AQR substandard	1	-	842
Real estate term non-owner occupied - AQR pass	1	-	881
Consumer secured by 1st deeds of trust - AQR pass	1	-	94
Total	7	\$ -	\$ 2,703

AQR pass graded loans included above in the impaired loan data are loans classified as TDRs. By definition, TDRs are considered impaired loans except in very rare circumstances. All of the Company's TDRs are included in impaired loans. The Company had no commitments to extend additional credit to borrowers whose terms have been modified in TDRs. All TDRs are also classified as impaired loans and are included in the loans individually evaluated for impairment in the calculation of the Allowance. There were no charge offs in the six months ended June 30, 2013 on loans that were later classified as TDRs. Two TDRs with a total recorded investment of \$864,000 had a specific impairment amount totaling \$269,000 at June 30, 2013.

8. Goodwill and Intangible Assets

The Company performs goodwill impairment testing annually in accordance with the policy described in Note 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2012. There was no indication of impairment as of June 30, 2013. The Company continues to monitor the Company's goodwill for potential impairment on an ongoing basis. No assurance can be given that there will not be an impairment charge to earnings during 2013 for goodwill impairment, if, for example, our stock price declines and trades at a significant discount to its book value, although there are many qualitative and quantitative factors that we analyze in determining the impairment of goodwill.

9. Deposit Activities

Total deposits at June 30, 2013 and December 31, 2012 were \$958.9 million and \$970.1 million, respectively. The only deposit category with stated maturity dates is certificates of deposit. At June 30, 2013, the Company had \$91.2 million in certificates of deposit as compared to certificates of deposit of \$92.7 million at December 31, 2012. At June 30, 2013, \$66.9 million, or 73%, of the Company's certificates of deposits are scheduled to mature over the next 12 months as compared to \$67.7 million, or 73%, of total certificates of deposit at December 31, 2012.

10. Derivatives

The Company enters into commercial loan interest rate swap agreements in order to provide commercial loan customers the ability to convert from variable to fixed interest rates. Under these agreements, the Company enters into a variable-rate loan agreement with a customer in addition to a swap agreement that effectively converts the customer's variable rate loan into a fixed rate. The Company then simultaneously enters into a corresponding swap agreement with a third party financial institution ("counterparty") in order to offset its exposure on the fixed component of our customer's interest rate swap. The Company has an agreement with its counterparty that contains a provision that provides if the Company fails to maintain its status as a well-capitalized institution, then the counterparty could terminate the derivative positions and the Company would be required to settle its obligations of the agreement. This agreement also requires that the Company and the counterparty collateralize any fair value shortfalls that exceed \$250,000 with eligible collateral, which includes cash and securities backed with the full faith and credit of the federal government. Similarly, the Company could be required to settle its obligations under the agreement if specific regulatory events occur, such as if the Company were issued a prompt corrective action directive or a cease and desist order, or if certain regulatory ratios fall below specified levels.

The interest rate swap agreements with our customers and the counterparty are not designated as hedging instruments under the Derivatives and Hedging topic of the FASB ASC 815, rather they are accounted for as free standing derivatives with changes in fair value reported in income. The Company had interest rate swaps with an aggregate notional amount of \$20.8 million and zero at June 30, 2013 and December 31, 2012, respectively. At June 30, 2013, the notional amount of interest rate swaps is made up of one \$10.4 million variable to fixed rate swap to a commercial loan customer and one \$10.4 million fixed to variable rate swap with a counterparty. Changes in fair value from these two interest rate swaps offset each other in the second quarter of 2013. Additionally, the Company recognized \$138,000 in fee income related to interest rate swaps in the second quarter of 2013 and did not recognize any fee income related to interest rate swaps in the first quarter of 2013 or in 2012. Interest rate swap income is recorded in other income on the Consolidated Statements of Income.

The following table presents the fair value of derivatives not designated as hedging instruments at June 30, 2013 and December 31, 2012:

(In thousands)		Asset Derivatives	
		June 30, 2013	December 31, 2012
	Balance Sheet Location	Fair Value	Fair Value
Interest rate contracts	Other assets	\$ 137	\$ -

(In thousands)		Liability Derivatives	
		June 30, 2013	December 31, 2012
	Balance Sheet Location	Fair Value	Fair Value

Interest rate contracts	Other Liabilities	\$ 137	\$ -
-------------------------	-------------------	--------	------

11. Stock Incentive Plan

The Company adopted the 2010 Stock Option Plan ("2010 Plan") following shareholder approval of the 2010 Plan at the 2010 Annual Meeting. Subsequent to the adoption of the 2010 Plan, no additional grants may be issued under the prior plans. The 2010 Plan provides for grants of up to 348,232 shares, which includes any shares subject to stock awards under the previous stock option plans.

Stock Options: Under the 2010 Plan and previous plans, certain key employees have been granted the option to purchase set amounts of common stock at the market price on the day the option was granted. Optionees, at their own discretion, may cover the cost of exercise through the exchange at the then fair value of already owned shares of the Company's stock. Options are granted for a 10-year period and vest on a pro rata basis over the initial three years from grant.

The Company measures the fair value of each stock option at the date of grant using the Black-Scholes option pricing model. For the quarters ended June 30, 2013 and 2012, the Company recognized \$17,000 and \$15,000, respectively, in stock option compensation expense as a component of salaries and other personnel expense. For the six months ended June 30, 2013 and 2012, the Company recognized \$34,000 and \$30,000, respectively, in stock option compensation expense as a component of salaries and other personnel expense.

Proceeds from the exercise of stock options in the three months ended June 30, 2013 and 2012, were \$70,000 and \$94,000, respectively. The Company withheld \$70,000 and \$98,000 to pay for stock option exercises or income taxes that resulted from the exercise of stock options in the three months ended June 30, 2013 and 2012, respectively. Proceeds from the exercise of stock options in the six months ended June 30, 2013 and 2012, were \$118,000 and \$158,000, respectively. The Company withheld \$124,000, and \$161,000 to pay for stock option exercises or income taxes that resulted from the exercise of stock options in the six months ended June 30, 2013 and 2012, respectively.

There were no stock options granted in the second quarter of 2013.

Restricted Stock Units: The Company grants restricted stock units to certain key employees periodically. Recipients of restricted stock units do not pay any cash consideration to the Company for the shares and receive all dividends with respect to such shares when the shares vest. Restricted stock units cliff vest at the end of a three-year time period. For the three months ended June 30, 2013 and 2012, the Company recognized \$98,000 and \$98,000, respectively, in restricted stock unit compensation expense as a component of salaries and other personnel expense. For the six months ended June 30, 2013 and 2012, the Company recognized \$193,000 and \$196,000, respectively, in restricted stock unit compensation expense as a component of salaries and other personnel expense.

There were no restricted stock units granted in the second quarter of 2013.

12. Fair Value of Assets and Liabilities

The Company groups its assets and liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1: Valuation is based upon quoted prices for identical instruments traded in active exchange markets, such as the New York Stock Exchange. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2: Valuation is based upon quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's estimation of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

The following methods and assumptions were used to estimate fair value disclosures. All financial instruments are held for other than trading purposes.

Cash and cash equivalents: Due to the short term nature of these instruments, the carrying amounts reported in the balance sheet represent their fair values.

Investment securities: Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. Investments in Federal Home Loan Bank stock are recorded at cost, which also represents fair value.

Loans held for sale: Due to the short term nature of these instruments, the carrying amounts reported in the balance sheet represent their fair values.

Loans: Fair value adjustments for loans are mainly related to credit risk, interest rate risk, required equity return, and liquidity risk. Credit risk is primarily addressed in the financial statements through the Allowance (see Note 7). Loans are valued using a

discounted cash flow methodology and are pooled based on type of interest rate (fixed or adjustable) and maturity. A discount rate was developed based on the relative risk of the cash flows, taking into account the maturity of the loans and liquidity risk. Impaired loans are carried at fair value. Specific valuation allowances are included in the Allowance.

Purchased receivables: Fair values for purchased receivables are based on their carrying amounts due to their short duration and repricing frequency. Generally, purchased receivables have a duration of less than one year.

Accrued interest receivable: Due to the short term nature of these instruments, the carrying amounts reported in the balance sheet represent their fair values.

Deposits: The fair values of demand and savings deposits are equal to the carrying amount at the reporting date. The carrying amount for variable-rate time deposits approximate their fair value. Fair values for fixed-rate time deposits are estimated using a discounted cash flow calculation that applies currently offered interest rates to a schedule of aggregate expected monthly maturities of time deposits.

Accrued interest payable: Due to the short term nature of these instruments, the carrying amounts reported in the balance sheet represent their fair values.

Securities sold under repurchase agreements: Fair values for securities sold under repurchase agreements are based on their carrying amounts due to their short duration and repricing frequency.

Borrowings: Due to the short term nature of these instruments, the carrying amount of short-term borrowings reported in the balance sheet approximate the fair value. Fair values for fixed-rate long-term borrowings are estimated using a discounted cash flow calculation that applies currently offered interest rates to a schedule of aggregate expected monthly payments.

Junior subordinated debentures: Fair value adjustments for junior subordinated debentures are based on discounted cash flows to maturity using current interest rates for similar financial instruments. Management utilized a market approach to determine the appropriate discount rate for junior subordinated debentures.

Derivatives: Interest rate swap positions are valued in a model, which uses as its basis a discounted cash flow technique incorporating credit valuation adjustments to reflect nonperformance risk in the measurement of fair value. Although the Bank has determined that the majority of inputs used to value its interest rate swap derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of June 30, 2013, the Bank has assessed the significance of the impact of these adjustments on the overall valuation of its interest rate swap positions and has determined that they are not significant to the overall valuation of its interest rate swap derivatives. As a result, the Bank has classified its interest rate swap derivative valuations in Level 2 of the fair value hierarchy.

Assets subject to nonrecurring adjustment to fair value: The Company is also required to measure certain assets such as equity method investments, goodwill, intangible assets, impaired loans, and other real estate owned ("OREO") at fair value on a nonrecurring basis in accordance with GAAP. Any nonrecurring adjustments to fair value usually result from the write down of individual assets.

The Company uses either in-house evaluations or external appraisals to estimate the fair value of OREO and impaired loans as of each reporting date. In-house appraisals are considered Level 3 inputs and external appraisals are considered Level 2 inputs. The Company's determination of which method to use is based upon several factors. The

Company takes into account compliance with legal and regulatory guidelines, the amount of the loan, the size of the assets, the location and type of property to be valued and how critical the timing of completion of the analysis is to the assessment of value. Those factors are balanced with the level of internal expertise, internal experience and market information available, versus external expertise available such as qualified appraisers, brokers, auctioneers and equipment specialists.

The Company uses external sources to estimate fair value for projects that are not fully constructed as of the date of valuation. These projects are generally valued as if complete, with an appropriate allowance for cost of completion, including contingencies developed from external sources such as vendors, engineers and contractors. The Company believes that recording other real estate owned that is not fully constructed based on as if complete values is more appropriate than recording other real estate owned that is not fully constructed using as is values. We concluded that as if complete values are appropriate for these types of projects based on the accounting guidance for capitalization of project costs and subsequent measurement of the value of

real estate. GAAP specifically states that estimates and cost allocations must be reviewed at the end of each reporting period and reallocated based on revised estimates. The Company adjusts the carrying value of other real estate owned in accordance with this guidance for increases in estimated cost to complete that exceed the fair value of the real estate at the end of each reporting period.

Commitments to extend credit and standby letters of credit: The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligation with the counterparties at the reporting date.

Limitations: Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Estimated fair values as of the periods indicated are as follows:

(In Thousands)	June 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Level 1 inputs:

Preferred stock	2,596	-	2,596	-
Total available for sale securities	\$ 222,825	\$ -	\$ 222,825	\$ -
Other assets (interest rate contracts)	137	-	137	-
Liabilities				
Other liabilities (interest rate contracts)	\$ 137	\$ -	\$ 137	\$ -
December 31, 2012				
Assets				
Available for sale securities				
U.S. Treasury and government sponsored entities	\$ 124,414	\$ -	\$ 124,414	\$ -
Municipal securities	21,728	-	21,728	-
U.S. Agency mortgage-backed securities	36	-	36	-
Corporate bonds	53,982	-	53,982	-
Preferred stock	3,758	-	3,758	-
Total available for sale securities	\$ 203,918	\$ -	\$ 203,918	\$ -

As of and for the six months ending June 30, 2013 and 2012, no impairment or valuation adjustment was recognized for assets recognized at fair value on a nonrecurring basis, except for certain assets as shown in the following table. For loans measured for impairment, the Company classifies fair value measurements using observable inputs, such as external appraisals, as level 2 valuations in the fair value hierarchy, and unobservable inputs, such as in-house evaluations, as level 3 valuations in the fair value hierarchy.

(In Thousands)	Total	Quoted Prices in	Significant Other	Significant Unobservable	Total (gains)
----------------	-------	---------------------	----------------------	-----------------------------	------------------

		Active Markets for Identical Assets (Level 1)	Observable Inputs (Level 2)	Inputs (Level 3)	losses
June 30, 2013					
Loans measured for impairment ¹	\$ 1,057	\$ -	\$ 745	\$ 312	\$ (371)
Other real estate owned ²	426	-	-	426	88
Total	\$ 1,483	\$ -	\$ 745	\$ 738	\$ (283)
June 30, 2012					
Loans measured for impairment ¹	\$ 4,008	\$ -	\$ 2,920	\$ 1,088	\$ (259)
Other real estate owned ²	639	-	-	639	81
Total	\$ 4,647	\$ -	\$ 2,920	\$ 1,727	\$ (178)

¹Relates to certain impaired collateral dependent loans. The impairment was measured based on the fair value of collateral, in accordance with U.S. GAAP. The unobservable inputs for Level 3 impaired loans did not change between December 31, 2013 and June 30, 2013. The gain related to loans measured for impairment noted above result primarily from principal pay downs on impaired loans during the period.

²Relates to certain impaired other real estate owned. This impairment arose from an adjustment to the Company's estimate of the fair market value of these properties based on changes in estimated costs to complete the projects and changes in market conditions. The Company took a weighted average discount of 13% on impaired other real estate owned classified as Level 3 assets.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion should be read in conjunction with the unaudited consolidated financial statements of Northrim BanCorp, Inc. (the "Company") and the notes thereto presented elsewhere in this report and with the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Note Regarding Forward Looking-Statements

This quarterly report on Form 10-Q includes "forward-looking statements," as that term is defined for purposes of Section 21D of the Securities Exchange Act, as amended, which are not historical facts. These forward-looking statements describe management's expectations about future events and developments such as future operating results, growth in loans and deposits, continued success of the Company's style of banking, and the strength of the local economy. All statements other than statements of historical fact, including statements regarding industry prospects and future results of operations or financial position, made in this report are forward-looking. We use words such as "anticipate," "believe," "expect," "intend" and similar expressions in part to help identify forward-looking statements. Forward-looking statements reflect management's current plans and expectations and are inherently uncertain. Our actual results may differ significantly from management's expectations, and those variations may be both material and adverse. Forward-looking statements are subject to various risks and uncertainties that may cause our actual results to differ materially and adversely from our expectations as indicated in the forward-looking statements. These risks and uncertainties include: the general condition of, and changes in, the Alaska economy; factors that impact our net interest margin; and our ability to maintain asset quality. Further, actual results may be affected by competition on price and other factors with other financial institutions; customer acceptance of new products and services; the regulatory environment in which we operate; and general trends in the local, regional and national banking industry and economy. Many of these risks, as well as other risks that may have a material adverse impact on our operations and business, are identified in Part II. Item 1A Risk Factors of this report, and in our other filings with the Securities and Exchange Commission. However, you should be aware that these factors are not an exhaustive list, and you should not assume these are the only factors that may cause our actual results to differ from our expectations. In addition, you should note that we do not intend to update any of the forward-looking statements or the uncertainties that may adversely impact those statements, other than as required by law.

Critical Accounting Policies

The preparation of the consolidated financial statements requires us to make a number of estimates and assumptions that affect the reported amounts and disclosures in the consolidated financial statements. On an ongoing basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe that our estimates and assumptions are reasonable; however, actual results may differ significantly from these estimates and assumptions which could have a material impact on the carrying value of assets and liabilities at the balance sheet dates and on our results of operations for the reporting periods.

The accounting policies that involve significant estimates and assumptions by management, which have a material impact on the carrying value of certain assets and liabilities, are considered critical accounting policies. The Company's critical accounting policies include those that address the accounting for the Allowance, the valuation of goodwill and other intangible assets, and the valuation of other real estate owned. These critical accounting policies are further described in Item 7, Management's Discussion and Analysis, and in Note 1, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2012. Management has applied its critical accounting policies and estimation methods consistently in all periods presented in these consolidated financial statements.

Update on Economic Conditions

Management believes that economic activity in Alaska is improving, both as a reflection of the general economic recovery in the nation and from the newly passed legislation designed to boost oil and gas exploration and production. According to the Alaska Economic Report & Alaska Legislative Digest's Special Report of July 6, 2013, "Oil activity is now picking up." However, it appears most likely that a referendum to repeal this newly passed oil tax legislation will be placed on the ballot for voter consideration in 2014.

An Anchorage Daily News article on July 7, 2013 stated that construction activity in Anchorage is also picking up: "Through May 31, the Municipality of Anchorage had received building permit applications for an estimated \$302.8 million worth of work. During the first five months of 2013, \$240.9 million worth of building permits were applied for -- a 25 percent year-

over-year increase. Since bottoming out in 2010 with \$144.7 million in permit applications, Anchorage has seen steady growth. The low figure in 2010 coincides with the lowest number of construction jobs statewide in the past decade.”

Highlights and Summary of Performance – Second Quarter of 2013

- Diluted earnings per share in the second quarter of 2013 were \$0.53, compared to \$0.48 per diluted share in the quarter ended June 30, 2012.
- Net interest income increased to \$10.9 million in the second quarter of 2013, compared to \$10.5 million in the quarter ended June 30, 2012.
- Tangible book value was \$20.25 per share at quarter end as compared to \$19.67 per share at December 31, 2012. Tangible book value is a non-GAAP ratio that represents total shareholders’ equity less goodwill and intangible assets divided by the number of shares outstanding. The GAAP measure of book value is total shareholders’ equity divided by the number of shares outstanding. Book value per share was \$21.48 at June 30, 2013, compared to \$20.93 at December 31, 2012.
- Asset quality improved slightly with nonperforming assets declining to \$8.1 million, or 0.70% of total assets at June 30, 2013, compared to \$9.1 million, or 0.78% of total assets at December 31, 2012.
- The allowance for loan losses totaled 2.30% of gross loans at June 30, 2013, compared to 2.33% at December 31, 2012. The allowance for loan losses to nonperforming loans increased to 431% at June 30, 2013, from 362% at December 31, 2012.
- The Company remains well-capitalized with Tier 1 Capital to Risk Adjusted Assets at June 30, 2013, of 15.65%, compared to 15.34% at December 31, 2012. Tangible common equity to tangible assets was 11.40% at June 30, 2013, compared to 11.12% December 31, 2012. Tangible common equity to tangible assets is a non-GAAP ratio that represents total equity less goodwill and intangible assets divided by total assets less goodwill and intangible assets. The GAAP measure of equity to assets is total equity divided by total assets. Total equity to total assets was 12.02% at June 30, 2013 as compared to 11.75% at December 31, 2012.

The Company reported net income and diluted earnings per share of \$3.5 million and \$0.53, respectively, for the second quarter of 2013 compared to net income and diluted earnings per share of \$3.1 million and \$0.48, respectively, for the second quarter of 2012. The Company reported net income and diluted earnings per share of \$6.2 million and \$0.94, respectively, year to date as of June 30, 2013 compared to net income and diluted earnings per share of \$5.7 million and \$0.87, respectively, for the same period in 2012. The increase in net income for both of these periods as compared to the second quarter of 2012 was primarily the result of an increase in net interest income and, to a lesser degree, a decrease in the provision for loan losses. These changes were only partially offset by increases in the provision for income taxes. Additionally, for the second quarter of 2013 as compared to the second quarter of 2012, there was a slight decrease in other operating expense and for the six-month period ending June 30, 2013, there was a decrease in other operating income.

The Company’s total assets increased by less than 1% at June 30, 2013 as compared to December 31, 2012, with increases in loans and investment securities available for sale which were only partially offset by decreases in interest bearing deposits in other banks and cash and due from banks. Net loans increased to \$717.4 million at June 30, 2013 as compared to \$699.5 million at December 31, 2012.

Credit Quality

Nonperforming assets: Nonperforming assets at June 30, 2013 decreased \$948,000, or 10% as compared to December 31, 2012. Nonaccrual loans decreased \$698,000 and OREO decreased \$250,000 at June 30, 2013 as compared to December 31, 2012.

The following table summarizes total OREO activity for the three and six-month periods ending June 30, 2013 and 2012:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In Thousands)			
Balance, beginning of the period	\$ 4,516	\$ 6,657	\$ 4,543	\$ 5,183
Transfers from loans, net	204	-	365	1,499
Investment in other real estate owned	-	1	-	18
Proceeds from the sale of other real estate owned	(433)	(149)	(634)	(199)
Gain on sale of other real estate owned, net	108	7	129	26
Deferred gain on sale of other real estate owned	(15)	13	(23)	2
Impairment on other real estate owned	(87)	(81)	(87)	(81)
Balance at end of period	\$ 4,293	\$ 6,448	\$ 4,293	\$ 6,448

Potential problem loans: Potential problem loans are loans which are currently performing that have developed negative indications that the borrower may not be able to comply with present payment terms and which may later be included in nonaccrual, past due, or impaired loans. At June 30, 2013, management had identified potential problem loans of \$8.4 million as compared to potential problem loans of \$2.7 million at December 31, 2012. The change in potential problem loans during this period is primarily due to the addition of six loans from four borrowers. The largest additions to potential problem loans were two commercial loans totaling \$1.8 million and one commercial real estate loan for \$4.9 million to one borrower. These additions were only partially offset by paydowns on existing potential problem loans.

Troubled debt restructurings (“TDRs”): TDRs are those loans for which concessions, including the reduction of interest rates below a rate otherwise available to that borrower, have been granted due to the borrower’s weakened financial condition. Interest on TDRs will be accrued at the restructured rates when it is anticipated that no loss of original principal will occur, and the interest can be collected, which is generally after a period of six months. The Company had \$6.2 million in loans classified as TDRs that were performing as of June 30, 2013. Additionally, there were \$2.9 million in TDRs included in nonaccrual loans at June 30, 2013 for a total of \$9.1 million. At December 31, 2012 there were \$8.6 million in loans classified as TDRs that were performing and \$3.5 million in TDRs included in nonaccrual loans for a total of \$12.1 million. See Note 6 of the Notes to Consolidated Financial Statements included in Item 1 of this report for further discussion of TDRs.

RESULTS OF OPERATIONS

Income Statement

Net Income

Net income attributable to Northrim BanCorp for the second quarter of 2013 increased \$354,000, or 11%, to \$3.5 million as compared to \$3.1 million for the same period in 2012. Net income attributable to Northrim BanCorp for the six months ended June 30, 2013 increased \$452,000, or 8%, to \$6.2 million as compared to \$5.7 million for the same period in 2012. These increases were primarily due to increases in net interest income.

Net Interest Income / Net Interest Margin

Net interest income for the second quarter of 2013 increased \$433,000, or 4%, to \$10.9 million as compared to \$10.5 million for the second quarter in 2012. Net interest income increased \$641,000, or 3%, to \$21.3 million, for the first six months of 2013 as compared to \$20.7 million for the same period in 2012. These increases arose from increases in interest income on loans and decreases in interest expense, which were partially offset by decreases in interest income on investment securities. The increases in interest income on loans were due to increased average balances, which were partially offset by lower rates on loans, while the decreases in both interest income on investments and interest expense on deposits and borrowings were primarily the result of decreased interest rates. The Company's net interest income as a percentage of average interest-earning assets on a tax equivalent basis decreased by 17 and 19 basis points to 4.34% and 4.33% for the three and six-month periods ending June 30, 2013 as compared to the same periods in 2012.

Average loans, the largest category of interest-earning assets, increased by \$68.2 million, or 10% to \$745.4 million in the three-month period ending June 30, 2013 and increased \$57.9 million, or 9% to \$731.2 million in the six-month period ending June 30, 2013, as compared to the same periods in 2012, respectively. Average commercial loans, real estate term loans, and real estate construction loans increased while average consumer loans and loans held for sale decreased during these periods. Total interest income from loans increased \$429,000 for the second quarter of 2013 and increased \$546,000 during the six-month period ending June 30, 2013 as compared to the same periods in 2012,

respectively, due to increased average balances. These increases were only partially offset by the decrease in interest income from loans due to decreased yields.

Average investments increased 2% and 5% for the three and six-month periods ending June 30, 2013 as compared to the same periods in 2012. Interest income from investments decreased 14% and 11% due to decreased average yields for the three and six-month periods ending June 30, 2013 as compared to the same periods in the prior year.

Average interest-bearing liabilities increased \$18.1 million, or 3%, to \$653.1 million during the second quarter of 2013 and increased \$19.2 million, or 3%, to \$649.3 million during the first six months of 2013 as compared to \$634.9 million and \$630 million, respectively, for the same periods in 2012. These increases are primarily the result of increased average interest-bearing deposit balances. In addition to this increase, the Company incurred a \$2.2 million long term borrowing from the Federal Home Loan Bank of Seattle in the first quarter of 2013 to fund a loan to one borrower for the purpose of constructing a low-income housing project.

The average cost of interest-bearing liabilities decreased \$116,000, or 1 basis point, and \$284,000, or 10 basis points, for the three and six-month periods ending June 30, 2013, respectively, as compared to the same periods in 2012 primarily due to declining market rates across all deposit types, and due to a change in the mix of deposits with a decrease in higher cost certificates of deposit and an increase in lower cost transaction accounts.

Components of Net Interest Margin

The following table compares average balances and rates as well as net tax equivalent margins on earning assets for the three and six-month periods ending June 30, 2013 and 2012:

(Dollars in Thousands)	Three Months Ended June 30,					Interest income/ expense					Average Yields				
	Average Balances		Change			2013		2012			Change		2013		2012
	2013	2012	\$	%		2013	2012	\$	%		\$	%	2013	%	2012
Loans ^{1,2}	\$ 745,357	\$ 677,203	\$ 68,154	10 %		\$ 10,734	\$ 10,305	\$ 429	4 %		5.81	%	6.1	%

Interest-earning assets	1,022,899	949,978	72,921	8 %		11,440	11,123	317	3 %		4.54	%	4.7	%	
Nonearning assets	123,021	114,569	8,452	7 %											
Total	\$ 1,145,920	\$ 1,064,547	\$ 81,373	8 %											
Interest-bearing deposits	\$ 610,784	\$ 597,878	\$ 12,906	2 %		\$ 312	\$ 422	\$ (110)	(26) %		0.20	%	0.2	%	
Borrowings	42,296	37,066	5,230	14 %		199	205	(6)	(3) %		1.88	%	2.1	%	
Total interest-bearing liabilities	653,080	634,944	18,136	3 %		511	627	(116)	(19) %		0.38	%	0.3	%	
Demand deposits and other noninterest-bearing liabilities	353,097	299,819	53,278	18 %											
Equity	139,743	129,784	9,959	8 %											
Total	\$ 1,145,920	\$ 1,064,547	\$ 81,373	8 %											
Net interest income						\$ 10,929	\$ 10,496	\$ 433	4 %						

Net tax equivalent margin on interest earning assets³

4.34 % 4.5

¹ Loan fees recognized during the period and included in the yield calculation totaled \$783,000 and \$663,000 in the second quarter of 2013 and 2012, respectively.

² Average nonaccrual loans included in the computation of the average loans were \$4.2 million and \$6.3 million in the second quarter of 2013 and 2012, respectively.

³ Tax-equivalent net interest margin is a non-GAAP performance measurement in which interest income on non-taxable investments is presented on a tax-equivalent basis using a combined federal and state statutory rate of 41.11% in both 2013 and 2012.

	Six Months Ended June 30,									
	Average Balances		Change		Interest income/ expense		Change		Average Yield

Net tax equivalent margin on earning assets ³									4.33 %	4.52 %

¹ Loan fees recognized during the period and included in the yield calculation totaled \$1.5 and \$1.3 million in the six months ended June 30, 2013 and 2012, respectively.

² Average nonaccrual loans included in the computation of the average loans were \$4.3 million and \$6.5 million in the nine months ended June 30, 2013 and 2012, respectively.

³ Tax-equivalent net interest margin is a non-GAAP performance measurement in which interest income on non-taxable investments is presented on a tax-equivalent basis using a combined federal and state statutory rate of 41.11% in both 2013 and 2012.

The following tables set forth the changes in consolidated net interest income attributable to changes in volume and to changes in interest rates for the three and six-month periods ending June 30, 2013 and 2012. Changes attributable to the combined effect of volume and interest rate have been allocated proportionately to the changes due to volume and the changes due to interest rates.

(In Thousands)	Three months ended June 30, 2013 vs. 2012		
	Increase (decrease) due to		
	Volume	Rate	Total
Interest Income:			
Loans	\$ 1,446	\$ (851)	\$ 429
Long-term investments	180	(275)	(95)
Short-term investments	(26)	9	(17)
Total interest income	\$ 1,600	\$ (1,117)	\$ 317
Interest Expense:			
Interest-bearing deposits	\$ 9	\$ (121)	\$ (110)
Borrowings	28	(34)	(6)
Total interest expense	\$ 37	\$ (155)	\$ (116)

	Six months ended June 30, 2013 vs. 2012		
	Increase (decrease) due to		
	Volume	Rate	Total
Interest Income:			
Loans	\$ 1,474	\$ (928)	\$ 546
Long-term investments	100	(294)	(194)
Short-term investments	3	2	5
Total interest income	\$ 1,577	\$ (1,220)	\$ 357
Interest Expense:			
Interest-bearing deposits	\$ 25	\$ (281)	\$ (256)
Borrowings	96	(124)	(28)
Total interest expense	\$ 121	\$ (405)	\$ (284)

The provision for loan losses was zero and \$89,000 for the second quarters of 2013 and 2012, respectively, and \$150,000 and \$178,000 for the six-month periods ending June 30, 2013 and 2012, respectively. The decrease in the provision for loan losses in both periods is primarily the result of improved credit quality in the loan portfolio. At June 30, 2013, the Allowance was \$16.5 million, or 2.30% of total loans as compared to \$16.4 million, or 2.33% of total loans at December 31, 2012. Nonperforming loans compared to total portfolio loans decreased to 0.53% at June 30, 2013 from 0.64% at December 31, 2012, and the Allowance compared to nonperforming loans increased to 431% at June 30, 2013 from 362% at December 31, 2012. See additional analysis of the Allowance in the Balance Sheet Overview section.

Other Operating Income

Other operating income for the three-month period ending June 30, 2013 decreased \$23,000, or 1%, to \$3.7 million as compared to the same period in 2012. This decrease is the result of a decrease of \$177,000 in rental income and a decrease in gains on the sale of available for sale securities of \$146,000. The decrease in rental income is the result of vacancies in leased space in the Company's corporate office building as areas recently vacated by previous tenants are undergoing capital improvements. The Company expects that this space will remain vacant for 2013 with new tenants leasing the space in 2014. These decreases during the second quarter of 2013 as compared to the same period a year ago were partially offset by an increase of \$133,000 in equity in earnings from RML, the Company's mortgage affiliate, due to increased new loan originations, a \$56,000 increase in purchased receivable income from higher yields on these products, and a \$43,000 increase in electronic banking income due to increased point of sale income.

Other operating income for the six-month period ending June 30, 2013 decreased \$91,000, or 1%, to \$6.8 million as compared to the same period in 2012. This decrease results from a decrease of \$347,000 in rental income for the same reason as discussed above as compared to the same periods in 2012. This decrease was partially offset by an increase of \$74,000 in equity in earnings from RML, a \$46,000 increase in purchased receivable income, and a \$64,000 increase in electronic banking income. These income items increased for the same reasons as discussed above for the changes for the second quarter. Additionally, both gains on the sale of securities and income from Company's employee benefit plan services income increased by \$45,000 each for the six-month period ending June 30, 2013 as compared to the same period a year ago.

Other Operating Expense

Other operating expense for the second quarter of 2013 increased \$96,000, or 1%, to \$9.4 million as compared to \$9.3 million for the second quarter of 2012. This increase was primarily due to an increase in salaries and benefits expense of \$432,000 due to the hiring of new employees at higher salary levels and increases in salaries of existing employees. This increase was partially offset by the following decreases: a decrease of \$115,000 in the reserve for purchased receivables due to a payoff on one account that was specifically reserved in the first quarter of 2013; a decrease of \$106,000 in OREO expense, net of rental income and gains on the sale of OREO properties, which primarily resulted from decreased operating costs attributable to OREO properties; a decrease of \$62,000 in occupancy expense which is primarily the result of lower rent expense due to the Company's termination of a lease for additional office space in the fourth quarter of 2012; and a \$41,000 decrease in equipment expense due to cost savings realized from leasing new ATMs. The Company's ATMs were previously owned assets that were being depreciated.

Other operating expense for the first six months of 2013 was essentially flat as compared to the same period in 2012. The following are the significant changes in individual items that make up total other operating expense: an increase in salaries and benefits expense of \$461,000 due to the hiring of new employees at higher salary levels and increases in salaries of existing employees; a decrease of \$209,000 in OREO expense, net of rental income and gains on the sale of OREO properties; a decrease of \$170,000 in occupancy expense; and a \$57,000 decrease in equipment expense. The reasons for the changes in these expense items are the same as discussed above for the changes for the second quarter.

Income Taxes

The provision for income taxes for the three and six-month periods ending June 30, 2013 increased \$84,000 and \$148,000, or 5% and 6%, respectively, as compared to the same periods in 2012 due to increases in net income before the provision for income taxes. The effective tax rate for the second quarter of 2013 and 2012 was 31% and 32%, respectively. The effective tax rate for the six-month periods ending June 30, 2013 and 2012 was 30% in each period.

Financial Condition

Balance Sheet Overview

Investment Securities

Investment securities at June 30, 2013 increased \$18.9 million, or 9%, to \$225.6 million from \$206.7 million at December 31, 2012. This increase is primarily due to purchases of available for sale securities, which were only partially offset by sales, maturities and security calls.

Loans and Lending Activities

Our loan products include short and medium-term commercial loans, commercial credit lines, construction and real estate loans, and consumer loans. From our inception, we have emphasized commercial, land development and home construction, and commercial real estate lending. This type of lending has provided us with market opportunities and higher net interest margins than other types of lending. However, it also involves greater risks, including greater exposure to changes in local economic conditions, than certain other types of lending.

The loan portfolio increased by \$13.9 million, or 2%, to \$718.26 million at June 30, 2013 from \$704.2 million at December 31, 2012 primarily due to a higher level of commercial loans. The following table details the changes in loan balances by loan type:

(Dollars In Thousands)	June 30, 2013		December 31, 2012	
	Dollar Amount	Percent of Total	Dollar Amount	Percent of Total
Commercial	\$ 299,033	41.7 %	\$ 273,432	38.8 %
Real estate construction one-to-four family	33,143	4.6 %	32,573	4.6 %
Real estate construction other	19,552	2.7 %	21,061	3.0 %
Real estate term owner occupied	78,189	10.9 %	78,107	11.1 %
Real estate term non-owner occupied	224,121	31.2 %	234,643	33.3 %
Real estate term other	32,751	4.6 %	31,809	4.5 %
Consumer secured by 1st deeds of trust	16,728	2.3 %	17,714	2.5 %
Consumer other	18,055	2.5 %	18,305	2.6 %
Subtotal	\$ 721,572		\$ 707,644	
Less: Unearned origination fee, net of origination costs	(3,415)	(0.5) %	(3,431)	(0.4) %
Total loans	\$ 718,157		\$ 704,213	

Due to its efforts to capitalize on market opportunities, the Company expects its loan portfolio to continue to increase during 2013 mainly in the commercial and real estate term areas.

Analysis of Allowance for Loan Losses

The Company maintains an Allowance to reflect losses inherent in the loan portfolio. The Allowance is increased by provisions for loan losses and loan recoveries and decreased by loan charge-offs. The size of the Allowance is determined through quarterly assessments of probable estimated losses in the loan portfolio. Our methodology for making such assessments and determining the adequacy of the Allowance includes the following key elements:

A specific allocation for impaired loans. Management determined the fair value of the majority of these loans based on the underlying collateral values. This analysis is based upon a specific analysis for each impaired loan, including external appraisals on loans secured by real property, management's assessment of the current market, recent payment history, and an evaluation of other sources of repayment. In-house evaluations of fair value are used in the impairment analysis in some situations. Inputs to the in-house evaluation process include information about sales of comparable properties in the appropriate markets and changes in tax assessed values. The Company obtains appraisals on real and personal property that secure its loans during the loan origination process in accordance with regulatory guidance and its loan policy. The Company obtains updated appraisals on loans secured by real or personal property based upon its assessment of changes in the current market or particular projects or properties, information from other current appraisals, and other sources of information. Appraisals may be adjusted downward by the Company based on its evaluation of the facts and circumstances on a case by case basis. External appraisals may be discounted when management believes that the absorption period used in the appraisal is unrealistic, when expected liquidation costs exceed those included in the appraisal, or when management's evaluation of deteriorating market conditions warrants an adjustment. Additionally, the Company may also adjust appraisals in the above circumstances

between appraisal dates. The Company uses the information provided in these updated appraisals along with its evaluation of all other information available on a particular property as it assesses the collateral coverage on its performing and nonperforming loans and the impact that may have on the adequacy of its Allowance. The specific allowance for impaired loans, as well as the overall Allowance, may increase based on the Company's assessment of updated appraisals. When the Company determines that a loss has occurred on an impaired loan, a charge-off equal to the difference between carrying value and fair value is recorded. If a specific allowance is deemed necessary for a loan, and then that loan is partially charged off, the loan remains classified as a nonperforming loan after the charge-off is recognized. Loans measured for impairment based on collateral value and all other loans measured for impairment are accounted for in the same way. As of June 30, 2013 and December 31, 2012, 38% and 35% of nonperforming loans, which totaled \$3.8 million and \$4.5 million, respectively, had partially charged off balances.

A general allocation. The Company has identified segments and classes of loans not considered impaired for purposes of establishing the general allocation allowance. The Company determined the disaggregation of the loan portfolio into segments and classes based on its assessment of how different pools of loans with like characteristics in the portfolio behave over time.

This determination is based on historical experience and management's assessment of how current facts and circumstances are expected to affect the loan portfolio.

The Company has the following loan segments: commercial, real estate construction one-to-four family, real estate construction other, real estate term owner occupied, real estate term non-owner occupied, real estate term other, consumer secured by 1st deeds of trust, and other consumer loans. The Company has five loan classes: pass, special mention, substandard, doubtful, and loss.

After the portfolio has been disaggregated into segments and classes, the Company calculates a general reserve for each segment and class based on the average year loss history for each segment and class using a five year look-back period.

After the Company calculates a general allocation using its loss history, the general reserve is then adjusted for qualitative factors by segment and class. Qualitative factors are based on management's assessment of current trends that may cause losses inherent in the current loan portfolio to differ significantly from historical losses. Some factors that management considers in determining the qualitative adjustment to the general reserve include loan quality trends in our own portfolio, national and local economic trends, business conditions, underwriting policies and standards, trends in local real estate markets, effects of various political activities, peer group data, and internal factors such as underwriting policies and expertise of the Company's employees.

An unallocated reserve. The unallocated portion of the Allowance provides for other credit losses inherent in the Company's loan portfolio that may not have been contemplated in the specific and general components of the Allowance, and it acknowledges the inherent imprecision of all loss prediction models. The unallocated component is reviewed periodically based on trends in credit losses and overall economic conditions.

At June 30, 2013, the unallocated portion of the Allowance as a percentage of the total Allowance was 15%. The unallocated portion of the Allowance as a percentage of the total Allowance was 12% at December 31, 2012

Further discussion of the enhancement to the Company's Allowance methodology can be found in Item 7 in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The following table sets forth information regarding changes in the Allowance for the periods indicated:

	Three Months Ended June 30, 2013		Six Months Ended June 30, 2013	
	2012		2012	
	(In Thousands)			
Balance at beginning of period	\$ 16,641	\$ 16,288	\$ 16,408	\$ 16,503
Charge-offs:				
Commercial	355	-	355	231
Real estate term owner occupied	-	127	-	273
Real estate term other	-	-	-	280
Consumer other	-	-	14	-
Total charge-offs	355	127	369	784

Recoveries:

Commercial	143	223	219	572
Real estate construction one-to-four family	18	-	36	-
Real estate construction other	78	12	78	12
Consumer other	3	5	6	9
Total recoveries	242	240	339	593
Net, (recoveries) charge-offs	113	(113)	30	191
Provision (benefit) for loan losses	-	89	150	178
Balance at end of period	\$ 16,528	\$ 16,490	\$ 16,528	\$ 16,490

While management believes that it uses the best information available to determine the Allowance, unforeseen market conditions and other events could result in adjustment to the Allowance, and net income could be significantly affected if circumstances differed substantially from the assumptions used in making the final determination of the Allowance. Moreover, bank regulators frequently monitor banks' loan loss allowances, and if regulators were to determine that the Company's

Allowance is inadequate, they may require the Company to increase the Allowance, which may adversely impact the Company's net income and financial condition.

Deposits

Deposits are the Company's primary source of funds. Total deposits decreased \$11.2 million to \$958.9 million at June 30, 2013, from \$970.1 million at December 31, 2012. Noninterest-bearing demand deposits at June 30, 2013, decreased 4% from December 31, 2012. However, the Company's mix of deposits continues to contribute to a low cost of funds with balances in transaction accounts representing 90% of total deposits at June 30, 2013 and December 31, 2012, respectively. Savings account balances at June 30, 2013 were up 7% as compared to December 31, 2012. At the end of the second quarter of 2013, noninterest-bearing demand deposits accounted for 36% of total deposits, interest-bearing demand accounts were 14%, savings deposits were 10%, money market balances accounted for 19%, the Alaska CD accounted for 11% and time certificates were 10% of total deposits. There were no depositors with deposits representing 10% or more of total deposits at June 30, 2013 and December 31, 2012.

Borrowings

At June 30, 2013, the Company's maximum borrowing line from the FHLB was \$160.1 million, approximately 14% of the Company's assets. The Company has an outstanding FHLB advance of \$2.2 million as of June 30, 2013 that was originated in the first quarter of 2013. The Company did not have any outstanding FHLB advances at December 31, 2012. FHLB advances are dependent on the availability of acceptable collateral such as marketable securities or real estate loans, although all FHLB advances are secured by a blanket pledge of the Company's assets. The \$2.2 million FHLB advance that the Company drew in the first quarter of 2013 was to match fund a \$2.2 million loan to one borrower for the construction of a low income housing project that qualifies for a long term fixed interest rate of 3.12%. This new FHLB borrowing has an eighteen year term with a 30 year amortization period, which mirrors the term of the construction loan made to the borrower.

The Company purchased its main office facility for \$12.9 million on July 1, 2008. In this transaction, the Company, through Northrim Building LLC, assumed an existing loan secured by the building in an amount of \$5.1 million. At June 30, 2013 and December 31, 2012, the outstanding balance on this loan was \$4.4 million and \$4.5 million, respectively. This loan has a maturity date of April 1, 2014 and a fixed interest rate of 5.95%.

At June 30, 2013 and December 31, 2012, the Company had no short-term (original maturity of one year or less) borrowings that exceeded 30% of shareholders' equity.

Liquidity and Capital Resources

The Company manages its liquidity through its Asset and Liability Committee. In addition to the \$107.5 million of cash and due from banks and interest bearing deposits in other banks and \$185 million in unpledged available for sale securities held at June 30, 2013, the Company had additional funding sources which include fed fund borrowing lines and advances available at the FHLB of Seattle and the Federal Reserve Bank of approximately \$132.9 million as of June 30, 2013.

At June 30, 2013, \$40.6 million in securities, or 18%, of the investment portfolio was pledged, as compared to \$42.7 million, or 21%, at December 31, 2012. As shown in the Consolidated Statements of Cash Flows, net cash provided by operating activities was \$4.8 million for the first six months of 2013. Net cash used by investing activities was \$42.3 million for the same period, primarily due to purchases of available for sale securities and increased loan balances during the period. Net cash used by financing activities was \$9.9 million, primarily due to a decrease in deposits.

The Company issued 2,318 shares of its common stock through the exercise of stock options in the second quarter of 2013 and did not repurchase any shares of its common stock under the Company's publicly announced repurchase program. At June 30, 2013, the Company had 6,515,414 shares of its common stock outstanding.

Capital Requirements and Ratios

The Company and its wholly-owned subsidiary, Northrim Bank (the "Bank"), are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum regulatory capital requirements can result in certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material adverse effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt

corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classifications are also subject to qualitative judgments by regulators about the components of regulatory capital, risk weightings, and other factors. The regulatory agencies may establish higher minimum requirements if, for example, a bank or bank holding company has previously received special attention or has a high susceptibility to interest rate risk.

The requirements address both risk-based capital and leverage capital. At June 30, 2013, all capital ratios of the Company and the Bank exceeded the ratios required for a “well-capitalized” institution.

The following table sets forth the actual capital ratios for the Company and the Bank as calculated under regulatory guidelines, compared to the regulatory minimum capital ratios and the regulatory minimum capital ratios needed to be eligible to qualify as a “well-capitalized” institution as of June 30, 2013.

	Adequately- Capitalized		Well- Capitalized		Actual Ratio Northrim BanCorp, Inc.	Actual Ratio Northrim Bank
June 30, 2013						
Tier 1 risk-based capital	4.00	%	6.00	%	15.65 %	14.06 %
Total risk-based capital	8.00	%	10.00	%	16.91 %	15.31 %
Leverage ratio	4.00	%	5.00	%	13.28 %	11.93 %
December 31, 2012						
Tier 1 risk-based capital	4.00	%	6.00	%	15.34 %	13.87 %
Total risk-based capital	8.00	%	10.00	%	16.60 %	15.12 %
Leverage ratio	4.00	%	5.00	%	12.99 %	11.74 %

The regulatory capital ratios for the Company exceed those for the Bank primarily because the \$18.6 million junior subordinated debenture offerings that the Company completed in the third quarter of 2003 and the fourth quarter of 2005 are included in the Company’s capital for regulatory purposes although such securities are accounted for as a long-term debt in its financial statements. The junior subordinated debentures are not accounted for on the Bank’s financial statements nor are they included in its capital. As a result, the Company has \$18.6 million more in regulatory capital than the Bank, which explains the significant difference in the capital ratios for the two entities.

Off-Balance Sheet Items

The Company is a party to financial instruments with off-balance sheet risk. Among the off-balance sheet items entered into in the ordinary course of business are commitments to extend credit and the issuance of letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized on the balance sheet. Certain commitments are collateralized. As of June 30, 2013 and December 31, 2012, the Company’s commitments to extend credit and to provide letters of credit which are not reflected on its balance sheet amounted to \$187.5 million and \$230.5 million, respectively. Since many of the commitments are expected to expire without being drawn upon, these total commitment amounts do not necessarily represent future cash requirements.

Capital Expenditures and Commitments

As of June 30, 2013, the Company has capital commitments of \$346,000 related to the planned improvements to the Company's corporate office building. The Company expects these capital expenditures to be incurred in the second half of 2013.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our assessment of market risk as of June 30, 2013 indicates that there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2012.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Securities Exchange Act of 1934). Our principal executive and financial officers supervised and participated in this evaluation. Based on this evaluation, our principal executive and financial officers each concluded that as of June 30, 2013, the disclosure controls and procedures are effective in timely alerting them to material information required to be included in the periodic reports to the Securities and Exchange Commission. The design of any system of controls is based in part upon various assumptions about the likelihood of future events, and there can be no assurance that any of our plans, products, services or procedures will succeed in achieving their intended goals under future conditions.

Changes in Internal Control over Disclosure and Reporting

There was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15-d-15(f) of the Securities Exchange Act of 1934) that occurred during the quarterly period ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

During the normal course of its business, the Company is a party to various debtor-creditor legal actions, disputes, claims, and litigation related to the conduct of its banking business. These include cases filed as a plaintiff in collection and foreclosure cases, and the enforcement of creditors' rights in bankruptcy proceedings. Management does not expect that the resolution of these matters will have a material effect on the Company's business, financial position, results of operations, or cash flows.

ITEM 1A. RISK FACTORS

For information regarding risk factors, please refer to Item 1A in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. These risk factors have not materially changed as of June 30, 2013.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a)-(b) Not applicable

(c) There were no stock repurchases by the Company during the three months ending June 30, 2013.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

(a) Not applicable

(b) There have been no material changes to the procedures by which shareholders may nominate directors to the Company's board of directors.

40

ITEM 6. EXHIBITS

- 31.1 Certification of Chief Executive Officer required by Rule 13a-14(a) or Rule 15d-14(a)
