ANGLO SWISS EXPANDS ITS GEM PROPERTIES

Anglo Swiss Resources Inc. (TSX-Venture-ASW, OTC BB ASWRF, Berlin - AMO) has acquired 28 mineral claim units in the Nelson Mining District to add to its current gem property in the Slocan/Nelson Mining Districts known as the Blu Starr Gemstone property. The McAllister and Pipe Groups are contiguous and are located to the southeast of the Blu Starr property.

Anglo Swiss is targeting South-eastern British Columbia for its gem potential as its current discoveries of gemstone (sapphire, iolite, garnet) and a large flake-graphite showing are proof that this area has been long over looked for precious gem deposits. The recent discoveries of emerald, sapphire, opal and the emergence of the diamond industry throughout Canada have greatly advanced investor acceptance of the potential of Canadian gemstones.

Because the geology of B.C. is very complex, it includes geological settings favourable for hosting a wide variety of gemstones. Large areas of B.C. are underlain by high-grade metamorphic rocks similar to those hosting gem deposits in East Africa and those believed to be the source of the gems found in placer deposits in Sri Lanka. B.S. Wilson (1997) Gemstone Occurrences in British Columbia, Canadian Gemmologist, 18(3) p. 74-86.

The Blu Starr Gemstone property is located in the Slocan Valley, South-eastern British Columbia. The property consists of 6200 hectares (15,312 acres) of mineral tenure rights plus an additional 650 hectares (1606 acres) of placer mineral rights contained in 13 placer claims. Exploration to-date on less than 10% of the claim group has yielded dozens of gem outcrops at surface. The Sapphire Hill Zones 1, 2 and 3 from east to west, occur along a strike length of almost 2 kilometres. The property hosts numerous occurrences of sapphire (15), iolite or gem-cordierite (11), gemstone quality garnet (2), as well as a flake graphite deposit; other minerals include aquamarine (beryl), tourmaline, titanite, moonstone and several varieties of quartz crystals.

Previous exploration has confirmed that the geological setting and potential gem grades (carats per tonne) of the numerous showings are extremely promising. Proposed 2004 work programs have been submitted on the Blu Starr property and are awaiting approval from the Ministry of Energy and Mines.

On behalf of the Board,

"Len Danard"  
President & CEO
