

- Net cash provided by operating activities for the quarter and nine months was \$14.9 billion and \$32.5 billion compared with \$6.4 billion and \$20.4 billion respectively a year ago.
  
  - The effective tax rate on replacement cost profit for the third quarter was 33% and for the nine months was 35%; a year ago, the rates were 33% and 32% respectively.
  
  - Net debt at the end of the quarter was \$22.0 billion compared to \$22.2 billion a year ago. The ratio of net debt to net debt plus equity was 17%, compared with 20% a year ago.
  
  - Total capital expenditure and acquisitions was \$8.9 billion for the quarter and \$23.7 billion for the nine months. Capital expenditure, excluding acquisitions and asset exchanges and excluding the accounting for our transactions with Husky (see page 26) and Chesapeake (see page 17), was \$5.2 billion for the quarter, \$14.9 billion for the nine months and is expected to be around \$21-22 billion for the year. Disposal proceeds were \$365 million for the quarter and \$700 million for the nine months.
  
  - The quarterly dividend, to be paid in December, is 14 cents per share (\$0.84 per ADS) compared with 10.825 cents per share a year ago. For the nine months, the dividend showed an increase of 30%. In sterling terms, the quarterly dividend is 8.705 pence per share, compared with 5.308 pence per share a year ago; for the nine months, the increase was 43%. During the quarter, the company repurchased 92.9 million of its own shares for cancellation at a cost of \$911 million. For the nine months, share repurchases were 269.8 million at a cost of \$2.9 billion.
- (a) Profit attributable to BP shareholders.
- (b) With effect from 1 January 2008, replacement cost profit excludes inventory holding gains and losses net of tax. Comparative amounts have been amended to the new basis. See page 2 for further details.
- (c) Comparative data for 2008 has been amended. See Note 2(d) on page 24 for further details.

The commentaries above and following are based on replacement cost profit and should be read in conjunction with the cautionary statement on page 11.

(1,982)	(3,696)	(5,099)	Taxation on a replacement cost basis(c)	(12,524)	(7,221)
(72)	(112)	(137)	Minority interest	(367)	(219)
			<b>Replacement cost profit attributable to BP shareholders(c)</b>	<b>23,006</b>	<b>14,975</b>
539	3,952	(2,978)	Inventory holding gains (losses)	2,300	2,131
			Taxation (charge) credit on inventory		
(176)	(1,340)	998	holding gains and losses	(805)	(660)
			<b>Profit for the period attributable to BP shareholders</b>	<b>24,501</b>	<b>16,446</b>

- (a) The consolidation adjustment in the third quarter of 2008 was impacted by a significant fall in prices and a substantial reduction in the volumes of equity crude within the refining and marketing system.
- (b) Replacement cost profit reflects the current cost of supplies. The replacement cost profit for the period is arrived at by excluding from profit inventory holding gains and losses. BP uses this measure to assist investors to assess BP's performance from period to period. Replacement cost profit is not a recognized GAAP measure.
- (c) Effective 1 January 2008, replacement cost profit excludes inventory holding gains and losses and their associated tax effect. Previously, replacement cost profit excluded inventory gains and losses while the tax charge remained unadjusted and included the tax effect on inventory holding gains and losses. Comparative amounts have been amended to the new basis and the impact of the change is shown in the table below. There is no impact on profit for the period.
- (d) Comparative data for 2008 has been amended. See Note 2(d) on page 24 for further details.

### Dividends

#### Dividends payable

BP today announced a dividend of 14 cents per ordinary share to be paid in December. Holders of ordinary shares will receive 8.705 pence per share and holders of American Depository Receipts (ADRs) \$0.84 per ADS. The dividend is payable on 8 December to shareholders on the register on 14 November. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 8 December.

(a) Comparative data for 2008 has been amended. See Note 2(d) on page 24 for further details.

Net debt and net debt ratio are non-GAAP measures. We believe that these measures provide useful information to investors. Net debt enables investors to see the economic effect of gross debt, related hedges and cash and cash equivalents in total. The net debt ratio enables investors to see how significant net debt is relative to equity from shareholders. Net debt has been redefined to include the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to finance debt, for which hedge accounting is claimed. The derivatives are reported on the balance sheet within the headings 'Derivative financial instruments'. Amounts for comparative periods are presented on a consistent basis. See Note 2(c) on page 24 for further information.

227	350	<b>424</b> Rest of Europe		<b>1,050</b>	1,136
1,775	3,601	<b>3,739</b> US		<b>10,425</b>	5,689
3,672	6,944	<b>6,058</b> Rest of World		<b>18,790</b>	10,047
6,307	10,771	<b>12,709</b>		<b>33,552</b>	19,732

(a) Includes profit after interest and tax of equity-accounted entities.

The replacement cost profit before interest and tax for the third quarter and first nine months of 2008 was \$12,709 million and \$33,552 million respectively, increases of 102% and 70% over the same periods of 2007. The increases in both periods were primarily due to higher oil and gas realizations. Additionally, the results reflected a higher contribution from the gas marketing and trading business, but were impacted by higher production taxes and higher depreciation. Costs were higher, driven by sector-specific inflation, but this was substantially mitigated by reductions resulting from our focus on cost control. The results also included higher earnings from equity-accounted entities, primarily from TNK-BP. The third-quarter result benefited from gains from non-operating items (see below).

The net non-operating gain of \$1,118 million in the third quarter primarily comprises fair value gains on embedded derivatives. In the first nine months, the net non-operating charge was \$1,234 million with the most significant item being fair value losses on embedded derivatives partly offset by the reversal of certain provisions and of a previous impairment charge. The corresponding periods in 2007 contained net non-operating gains of \$10 million and \$1,145 million respectively. Additionally, in the third quarter, fair value accounting effects had a favourable impact of \$97 million compared with an unfavourable impact of \$36 million a year ago. For the first nine months, the unfavourable effect was \$535 million compared with an unfavourable effect of \$79 million a year ago.

Reported production for the quarter was 3,664mboe/d, slightly higher than the third quarter of 2007. After adjusting for the impact of lower entitlement in our production-sharing agreements (PSAs), production was around 5% higher than the third quarter of 2007. The continued ramp-up of production following the start-up of major projects in late 2007 and the first half of 2008 more than offset the impacts of hurricanes in the Gulf of Mexico and other operational events in the third quarter.

Reported production for the first nine months was 3,802mboe/d, slightly higher than the same period of the previous year. After adjusting for the effect of entitlement changes in our PSAs, production for the first nine months was around 6% higher than the same period of 2007.

In the Gulf of Mexico, we progressed the commissioning of Thunder Horse (BP 75% and operator) with the start-up of the second well. In Australia, the North West Shelf Venture's fifth LNG processing train became fully operational and, shortly after the end of the quarter, its third major offshore gas production facility (Angel) began producing. BP is one of six equal participants in the North West Shelf Project.

Also during the quarter, Sonatrach announced exploration success in Algeria with the Tin Zaouatene-1 (TZN-1) discovery in the Bourarhet Sud Blocks 230 & 231 (BP 49% and operator). Shortly after the end of the quarter, we announced a discovery in the Freedom prospect in the deepwater Gulf of Mexico (BP 25% and operator) and, jointly with Sonangol, we announced Dione, our sixteenth discovery in ultra-deepwater Block 31, offshore Angola (BP 26.67% and operator).

In August, we completed the acquisition of Chesapeake Energy Corporation's interests in approximately 90,000 net acres of leasehold and producing natural gas properties in the Arkoma Basin Woodford Shale play for \$1.75 billion. In addition, in September, we acquired a 25% interest in Chesapeake's Fayetteville Shale assets in Arkansas for \$1.9 billion. As a result of this transaction, BP acquired approximately 135,000 net acres of leasehold.

In the fourth quarter, we expect increased production reflecting normal seasonal patterns, continuing project ramp-ups and recovery from the hurricanes in the Gulf of Mexico and other operational events in the third quarter.

			<b>Replacement cost profit (loss)</b>		
371	539	<b>1,972</b>	<b>before interest and tax</b>	<b>3,760</b>	3,917
			<b>By region :</b>		
19	118	<b>188</b>	<b>UK</b>	<b>413</b>	914
492	429	<b>1,045</b>	<b>Rest of Europe</b>	<b>2,103</b>	1,374
(522)	(401)	<b>338</b>	<b>US</b>	<b>91</b>	573
382	393	<b>401</b>	<b>Rest of World</b>	<b>1,153</b>	1,056
371	539	<b>1,972</b>		<b>3,760</b>	3,917

- (a) Includes profit after interest and tax of equity-accounted entities.

The replacement cost profit before interest and tax for the third quarter and nine months was \$1,972 million and \$3,760 million respectively. The results in the equivalent periods of 2007 were \$371 million and \$3,917 million respectively. The net impact of non-operating items, which is included in the results, was nil in the quarter and was a gain of \$510 million in the nine months. A year ago, the results included a net non-operating charge of \$344 million for the quarter and a net non-operating gain of \$194 million for the nine months. Fair value accounting effects had favourable impacts of \$636 million for the current quarter and \$576 million for the nine months. A year ago, the impacts were unfavourable by \$93 million for the quarter and \$295 million for the nine months.

We continue to make good progress with the turnaround of the segment, delivering underlying year-on-year

performance improvement in both Fuels Value Chains (FVCs) and International Businesses, against a weaker external business environment. Compared with 2007, the third-quarter result benefited from stronger commercial refining, supply and trading performance in the FVCs and improved marketing performance, partially offset by a negative foreign exchange effect caused by the strengthening of the US dollar. For the nine months, in addition to these factors, improved refinery operations have in part mitigated the impact of a considerably lower refining margin environment. The International Businesses continued to deliver a strong performance in the third quarter. Progress on our efficiency improvements has helped to offset the effects of inflation and higher energy costs.

Refining throughputs for the quarter and nine months were 2,185mb/d and 2,197mb/d respectively, compared with 2,148mb/d and 2,169mb/d for the same periods last year, the increases being primarily driven by the recoveries at the Texas City and Whiting refineries, partially offset by the net loss of throughput from previous disposals and acquisitions. Solomon availability was 4.3 percentage points higher than a year ago. Relative to the second quarter of 2008, it was slightly lower, as a result of the disruption at the Texas City refinery in September caused by Hurricane Ike. Most of the refinery units were restarted within two weeks after the hurricane shutdown. In addition, we successfully started up the second residue hydrotreater train on 1 October and have completed mechanical work on ultraformer number 3. This unit is expected to start production during the fourth quarter, completing the restoration of the economic capability of Texas City refinery.

On 29 August 2008, BP announced an agreement with Enbridge Inc. to develop a new delivery system to transport Canadian heavy crude oil from Flanagan, Illinois, to Houston and Texas City, Texas. The system is expected to be in service by late 2012 with an initial capacity of 250,000 barrels per day. The joint investment of the phased capacity additions is expected to be in the range of \$1-2 billion.

Refinery turnaround activities are expected to be higher in the fourth quarter than in the third. The slowing of global economies, exacerbated by the current instability in global financial markets, remains a key risk to our marketing and supply businesses.

- (a) These effects represent the favourable (unfavourable) impact relative to management's measure of performance. Further information on fair value accounting effects is provided on pages 3 and 11.
- (b) Solomon refining availability is defined as the ratio of units which are available for processing, regardless of whether they are actually being used, to total capacity. Where there is planned maintenance, such capacity is not regarded as being available.
- (c) The Global Indicator Refining Margin (GIM) is the average of regional indicator margins weighted for BP's crude refining capacity in each region. Each regional indicator margin is based on a single representative crude with product yields characteristic of the typical level of upgrading complexity. The regional indicator margins may not be representative of the actual margins achieved by BP in any period because of BP's particular refinery configurations and crude and product slate.

(a) Includes profit after interest and tax of equity-accounted entities.

Other businesses and corporate comprises the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents) and corporate activities worldwide.

The replacement cost profit before interest and tax for the third quarter was a loss of \$16 million, compared with a loss of \$511 million a year ago. This result reflects a higher contribution from the operating businesses and lower corporate costs. For the nine months, the replacement cost loss before interest and tax was \$543 million in 2008 compared with a loss of \$782 million a year ago.

The net non-operating charge was \$128 million for the third quarter and \$332 million for the nine months. The third-quarter result included a \$30 million restructuring charge, a \$76 million net charge in relation to new, and revisions to existing, environmental and other provisions and a net charge of \$22 million for impairment and other provisions. The prior year included a net non-operating charge of \$201 million in the third quarter and \$175 million for the nine months.

On 15 September, Alternative Energy announced BP's first bioethanol production from its Brazilian biofuels joint venture, Tropical BioEnergia, a significant milestone in the implementation of BP's biofuels strategy. Tropical

BioEnergia farms sugar cane and refines it into fuel in a new 435 million litres per year (115 million US gallons per year) refinery. BP's investment in Tropical BioEnergia is the largest made by any international oil company into Brazil's ethanol market.

In August, BP and Verenium Corporation announced the creation of a strategic partnership to accelerate the development and commercialization of cellulosic ethanol. Under the initial phase of the strategic alliance, Verenium is to receive \$90 million in funding from BP over 18 months in exchange for rights to current and future technology held within the partnership.

Also in August, BP started commercial operations at its Silver Star wind farm in Texas, a 60MW gross capacity installation in partnership with Clipper Windpower, Inc. and at Edom Hills, California, a 20MW wholly-owned wind farm. On 20 October, BP started commercial operations of phase 1 of the Sherbino wind farm in Texas. The first 150MW of the project, which has a potential capacity of 750MW, has been built through a 50:50 joint venture with Padoma Wind Power LLC, a wholly owned subsidiary of NRG Energy, Inc.

	<b>Third quarter 2008</b>	<b>Second quarter 2008</b>	<b>Third quarter 2007</b>
<b>Wind</b> – net rated capacity as at period end (megawatts) (a)	<b>243</b>	172	32
<b>Solar</b> – cell production capacity as at period end (megawatts)(b)	<b>277</b>	255	201

- (a) Net wind capacity is the sum of the rated capacities of the assets/turbines that have entered into commercial operation, including BP's share of equity-accounted entities. The equivalent capacities on a gross-JV basis (which includes 100% of the capacity of equity-accounted entities where BP has partial ownership) are 453MW as at the third quarter of 2008, 373MW as at the second quarter of 2008 and 32MW as at the third quarter last year.
- (b) Solar capacity is the theoretical cell production capacity per annum of in-house manufacturing facilities.

### **Information on fair value accounting effects**

BP uses derivative instruments to manage the economic exposure relating to inventories above normal operating requirements of crude oil, natural gas and petroleum products as well as certain contracts to supply physical volumes at future dates. Under IFRS, these inventories and contracts are recorded at historic cost and on an accruals basis, respectively. The related derivative instruments, however, are required to be recorded at fair value with gains and losses recognized in income because hedge accounting is either not permitted or not followed, principally due to the impracticality of effectiveness testing requirements. Therefore, measurement differences in relation to recognition of gains and losses occur. Gains and losses on these inventories and contracts are not recognized until the commodity is sold in a subsequent accounting period. Gains and losses on the related derivative commodity contracts are recognized in the income statement from the time the derivative commodity contract is entered into on a fair value basis using forward prices consistent with the contract maturity.

IFRS requires that inventory held for trading be recorded at its fair value using period end spot prices whereas any related derivative commodity instruments are required to be recorded at values based on forward prices consistent with the contract maturity. Depending on market conditions, these forward prices can be either higher or lower than

spot prices resulting in measurement differences.

BP enters into contracts for pipelines and storage capacity which, under IFRS, are recorded on an accruals basis. These contracts are risk managed using a variety of derivative instruments which are fair valued under IFRS. This results in measurement differences in relation to recognition of gains and losses.

The way that BP manages the economic exposures described above, and measures performance internally, differs from the way these activities are measured under IFRS. BP calculates this difference by comparing the IFRS result with management's internal measure of performance, under which the inventory and the supply and capacity contracts in question are valued based on fair value using relevant forward prices prevailing at the end of the period. We believe that disclosing management's estimate of this difference provides useful information for investors because it enables investors to see the economic effect of these activities as a whole. The impacts of fair value accounting effects, relative to management's internal measure of performance, are shown in the table on page 3. Information for all quarters of 2006 and 2007 can be found at [www.bp.com/FVAE](http://www.bp.com/FVAE).

*Cautionary Statement: The foregoing discussion contains forward-looking statements particularly those regarding capital expenditure, increased production, expected refinery turnaround activities and the continuing risk of slowing global economies, exacerbated by the global credit freeze, to our marketing and supply businesses. By their nature, forward-looking statements involve risk and uncertainty and actual results may differ from those expressed in such statements depending on a variety of factors including the following: the timing of bringing new fields onstream; industry product supply; demand and pricing; operational problems; general economic conditions (including inflation); political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations and quotas; exchange rate fluctuations; development and use of new technology; the success or otherwise of partnering; the actions of competitors; natural disasters and adverse weather conditions; changes in public expectations and other changes to business conditions; wars and acts of terrorism or sabotage; and other factors discussed in this announcement. For more information you should refer to our Annual Report and Accounts 2007 and our 2007 Annual Report on Form 20-F filed with the US Securities and Exchange Commission.*

Capital expenditure, excluding acquisitions and asset exchanges and excluding the accounting for our transactions with Husky (see page 26) and Chesapeake (see note (a) below), was \$5,229 million for the quarter and \$14,940 million for the nine months.

- (a) Third quarter 2008 includes capital expenditure of \$3,652 million in Exploration and Production relating to the purchase of all of Chesapeake Energy Corporation's interest in the Arkoma Basin Woodford Shale assets and the purchase of a 25% interest in Chesapeake's Fayetteville Shale assets.
- (b) During the first quarter 2008 there was capital expenditure of \$2,848 million in Exploration and Production and an asset exchange of \$1,793 million in Refining and Marketing relating to the formation of an integrated North American oil sands business with Husky Energy, Inc. Second quarter 2008 includes a further \$111 million in Refining and Marketing reflecting closing adjustments relating to this transaction. Third quarter 2008 includes a reduction of \$23 million in Exploration and Production reflecting closing adjustments relating to this transaction. For further information see Note 3.
- (c) Nine months ended 30 September 2007 includes \$1,132 million for the acquisition of Chevron's Netherlands manufacturing company.

## Notes

### 1. Basis of preparation

The interim financial information included in this report has been prepared in accordance with IAS 34 'Interim Financial Reporting'.

The results for the interim periods are unaudited and in the opinion of management include all adjustments necessary for a fair presentation of the results for the periods presented. All such adjustments are of a normal recurring nature. The interim financial statements and notes included in this report should be read in conjunction with the consolidated financial statements and related notes for the year ended 31 December 2007 included in *BP Annual Report and Accounts 2007*.

BP prepares its consolidated financial statements included within its Annual Report and Accounts in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), IFRS as adopted by the European Union (EU) and in accordance with the provisions of the Companies Act 1985. IFRS as adopted by the EU differs in certain respects from IFRS as issued by the IASB, however, the differences have no impact on the group's consolidated financial statements for the periods presented. The financial information presented herein has been prepared in accordance with the accounting policies expected to be used in

preparing the Annual Report and Accounts 2008, which do not differ significantly from those used in *BP Annual Report and Accounts 2007*.

## 2. Resegmentation and other changes to comparatives

### (a) Resegmentation

On 11 October 2007, we announced our intention to simplify the organizational structure of BP. From 1 January 2008, there are only two business segments – Exploration and Production and Refining and Marketing. A separate business, Alternative Energy, handles BP's low-carbon businesses and future growth options outside oil and gas. This includes solar, wind, gas-fired power, hydrogen, biofuels and coal conversion.

As a result, and with effect from 1 January 2008:

- The Gas, Power and Renewables segment ceased to report separately.
- The natural gas liquids (NGLs), liquefied natural gas and gas and power marketing and trading businesses were transferred from the Gas, Power and Renewables segment to the Exploration and Production segment.
- The Alternative Energy business was transferred from the Gas, Power and Renewables segment to Other businesses and corporate.
- The Emerging Consumers Marketing Unit was transferred from Refining and Marketing to Alternative Energy.
- The Biofuels business was transferred from Refining and Marketing to Alternative Energy.
- The Shipping business was transferred from Refining and Marketing to Other businesses and corporate.

As a result of the transfers identified above, Other businesses and corporate has been redefined. It now consists of the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents) and corporate activities worldwide.

Financial information for 2003 to 2007 has been restated to reflect the ressegmentation and is available in *BP Financial and Operating Information 2003-2007* and to download from [www.bp.com/investors](http://www.bp.com/investors). Quarterly data is provided for 2004-2007 and annual data for 2003.

<b>Profit before interest and tax</b>	<b>25,045</b>	<b>6,809</b>	<b>25,045</b>	<b>6,809</b>

**(b) Revised income statement presentation**

We have implemented a minor change in the presentation of the group income statement whereby the unwinding of the discount on provisions and on other payables is now included within finance costs. Previously, this was included within other finance income or expense. This line item has now been renamed net finance income or expense relating to pensions and other post-retirement benefits. This change does not affect profit before interest and taxation, profit before taxation or profit for the period. The financial information for comparative periods shows the revised presentation, as set out below.

	<b>Nine months 2007</b>	<b>Third quarter 2007</b>
<b><u>As reported</u></b>		
<b>\$ million</b>		
Profit before interest and taxation	25,045	6,809
Finance costs	777	262
Other finance income	(278)	(89)
<b>Profit before taxation</b>	<b>24,546</b>	<b>6,636</b>
<b><u>As amended</u></b>		
<b>\$ million</b>		
Profit before interest and taxation	25,045	6,809
Finance costs	985	337
Net finance income relating to pensions and other post-retirement benefits	(486)	(164)
<b>Profit before taxation</b>	<b>24,546</b>	<b>6,636</b>

Top of page 24

**Notes****2. Resegmentation and other changes to comparatives (continued)****(c) Revised definition of net debt**

Net debt has been redefined to include the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to finance debt, for which hedge accounting is claimed. The derivatives are reported on the balance sheet within the headings 'Derivative financial instruments'. Amounts for comparative periods are presented on a consistent basis.

	<b>Nine months and third quarter 2007</b>
<b><u>As reported</u></b>	
<b>\$ million</b>	
Net debt	22,835
Equity	91,494
Ratio of net debt to net debt plus equity	20%
<b><u>As amended</u></b>	
<b>\$ million</b>	
Net debt	22,195
Equity	91,494
Ratio of net debt to net debt plus equity	20%

**(d) Amendment to first and second quarter 2008 consolidation adjustment**

The consolidation adjustment for the nine months amounts to \$167 million. The consolidation adjustments for the first and second quarters of 2008 have been amended from the amounts previously reported to correct for an error in the calculation for the elimination of unrealised profit arising on transfers of inventory between business segments. The amounts as previously reported and as amended are set out below. The impact of these errors was immaterial for 2007 and so comparative data for 2007 has not been amended.

	<b>First quarter 2008</b>	<b>Second quarter 2008</b>	<b>First half 2008</b>
<b>Consolidation adjustment</b>			

**\$ million**

As previously reported	(195)	(39)	(234)
As amended	(784)	(221)	(1,005)

Profit for the period attributable to BP shareholders and replacement cost profit attributable to BP shareholders have been reduced by \$357 million and \$107 million, after tax, for the first and second quarters respectively. The error had no impact on the results of the Exploration and Production and Refining and Marketing segments or Other businesses and corporate, which are unchanged.

Further details of the main income statement and balance sheet items impacted by this change are shown in the following tables.

**Notes**

**3. Significant transaction in the nine months**

In December 2007, BP signed a memorandum of understanding with Husky Energy Inc. to form an integrated North American oil sands business. The transaction was completed on 31 March 2008, with BP contributing its Toledo refinery to a US jointly controlled entity to which Husky contributed \$250 million cash and a payable of \$2,590 million. In Canada, Husky contributed its Sunrise field to a second jointly controlled entity, with BP contributing \$250 million in cash and a payable of \$2,267 million. The Toledo refinery assets and associated liabilities were classified as a disposal group held for sale at 31 December 2007.

Both jointly controlled entities are owned 50:50 by BP and Husky and are accounted for using the equity method.

The amounts set out below reflect the initial recording of the transaction at 31 March 2008 and subsequent closing adjustments.

	<b>\$ million</b>
<b>Income statement</b>	
Gains on sale of businesses and fixed assets	806
<b>Profit before taxation</b>	806
Taxation	345
<b>Profit for the period</b>	461
<b>Balance sheet</b>	
Non-current assets – investments in jointly controlled entities	4,729
Current liabilities – trade and other payables	266
Non-current liabilities	
Other payables	2,001
Deferred tax liabilities	653
	2,654
Total liabilities	2,920
<b>Net assets</b>	1,809

**Cash flow statement**

Investment in jointly controlled entities	(250)
---	-------

**Capital expenditure and acquisitions**

Exploration and Production	2,825
Refining and Marketing	1,904
	4,729
Including acquisitions and asset exchanges:	1,904

During the nine months, equity-accounted earnings from these jointly controlled entities amounted to \$154 million.

BP purchased refined products from the Toledo jointly controlled entity during the nine months amounting to \$2,710 million. In addition, BP purchased crude oil from third parties which it sold to the Toledo jointly controlled entity under an agency agreement. The fees earned by BP for this service, and the total amounts receivable and payable at 30 September 2008 under these arrangements, were not significant. BP will also purchase refinery feedstocks from the Sunrise jointly controlled entity once production commences, which is expected in 2012.
