FOR IMMEDIATE RELEASE

Hitachi Establishes "Hitachi Group Headquarters"
- Aims to Improve Group Management System and Expand Group Synergy -

Tokyo, March 11, 2004 --- Hitachi, Ltd. (NYSE:HIT / TSE:6501) today announced plans to establish the Hitachi Group Headquarters on April 1, 2004. This will develop and execute Group management strategy expanding Hitachi's group synergy. The establishment of Hitachi Group Headquarters is part of Hitachi's structural reform under the company's current medium-term management plan, "i.e.HITACHI Plan II."

Isao Uchigasaki, Chairman of the Board of Hitachi Chemical Co., Ltd., is to head the Hitachi Group Headquarters and will be appointed concurrently Hitachi Group Executive Officer at Hitachi. The Hitachi Group Headquarters will have three divisions: Hitachi Group - Global Business, headed by Hiroaki Nakanishi, Vice President and Executive Officer, Hitachi Group - Legal and Corporate Communications, headed by Takashi Hatchoji, Vice President and Executive Officer and Hitachi Group - Corporate Strategy, headed by Makoto Ebata, Executive Officer. Mr. Nakanishi and Mr. Hatchoji will be Senior Vice President and Executive Officer, and Mr. Ebata will be Vice President and Executive Officer on April 1, 2004.

As a conglomerate of businesses, Hitachi develops businesses in a broad of field with many subsidiaries, including public companies. The Hitachi Group Headquarters is being established for improving Hitachi's activity on global market, increasing Hitachi's corporate value continuously.

Details of the Hitachi Group Headquarters have not been finalized, but 50 of its approximate 200 staff will be named from subsidiaries and Hitachi's business groups eventually. Also, Hitachi will promote the exchange of personnel between Hitachi and its Group companies. These initiatives will improve Hitachi's group management system from the perspective of the Group as a whole.

- 2 -

Hitachi has previously taken a number of steps designed to improve management of the Group. Two examples are the 1998 establishment of the Hitachi Group Committee and, in June 2003, adoption of the Committee System of Management by Hitachi and 18 publicly owned Group companies. The establishment of the Hitachi Group Headquarters will drive to improve Hitachi's management system which are well-balanced the "Independent Value Creation" and "Strategic Integration", in a way best suited to Hitachi. This will help propel the Hitachi Group toward the "i.e.HITACHI Plan II" goal of positive FIV in fiscal 2005 and growth thereafter by giving full play to its collective strengths.

Note: The Hitachi Group Executive Officer, the head of the Hitachi Group Headquarters, develops and executes initiatives to continually raise the corporate value of each company in the Hitachi Group and the Group as a

Edgar Filing: HITACHI LTD - Form 6-K

whole. The Hitachi Group Executive Officer is also responsible for initiating and promoting projects, as well as upgrading cutting-edge and basic research, so as to capture synergies in terms of business strategy and operations by using headquarter functions.

Hitachi to Merge TOKICO and Hitachi Unisia Automotive
Integrated Operations Make Automotive Products Business More Stronger

Tokyo, March 26, 2004 ---Hitachi, Ltd. (NYSE:HIT / TSE:6501 / 'Hitachi'), TOKICO LTD. (TSE:7232 / 'TOKICO') and Hitachi Unisia Automotive, Ltd. ('Unisia') today announced an agreement to merge operations aiming at stronger automotive products business. The Memorandum of Understanding for the merger was concluded today.

The Hitachi Group has engaged itself in the automotive products business by leveraging the strengths of Hitachi, TOKICO and Unisia in their respective fields of expertise. However, today's market now requires us to offer automotive system solutions using the advantages of the three companies in a more integrated manner. This is prompted by the growing popularity of hybrid electric cars and other environment-conscious vehicles, as well as the increasing use of electronics in drive control systems, namely braking, steering and suspensions systems.

Hitachi currently holds a 23.9% equity interest in TOKICO (42.1% including indirect holdings through subsidiaries) and wholly owns Unisia. The three companies agreed to merge to bolster competitiveness in global markets. We expect that this merger enable us to respond more quickly to customers' technological needs and promote greater operational efficiency.

Plans call for the merger agreement to be concluded by the three companies in late May this year and for TOKICO and Unisia to be merged with Hitachi on October 1 following approval at the June ordinary general meetings of shareholders of TOKICO and Unisia.

-2-

1. Hitachi Group's Position of the Automotive Products Business

The Hitachi Group is in the process of rebuilding its business portfolio to shift to a highly profitable framework under Hitachi's current medium-term management plan, "i.e. HITACHI Plan II." This is being achieved by promoting targeted and new businesses while conducting wide-ranging structural reforms in unprofitable areas.

Hitachi has positioned the automotive products business as a targeted business of the Hitachi Group in the "i.e. HITACHI Plan II", classifying it under the "Global Products Incorporating Advanced Technology" category, which aims to achieve high growth in global markets. Hitachi will advance its automotive products business by leveraging the competitive technologies, products and operating bases of Hitachi Group companies, particularly Hitachi, TOKICO and Unisia.

2. Automotive Products Business Strategy and the Merger

Our aim is to expand the automotive products business by concentrating on four system business areas in the three fields of "environment" (engine management system and electric powertrain system), "safety" (drive control system) and "information" (vehicle information system). Ultimately, the goal is to create Intelligent Transport Systems ('ITS'), an advanced vehicle control system fusing the four essential automobile functions: driving, steering, braking and communicating.

To capture business opportunities in these three fields, which harbor much growth potential, we think it is essential to have development, production and sales capabilities that musters Hitachi Group's vast resources; a flexible organization with adroitness to remain in step with changing business environments; and an integrated management framework for optimizing operations as a whole to achieve the shared goal. Indeed, today's automotive market requires a supplier to be able to offer total system solutions in the fields of "environment" and "safety", which should be made possible by integrating the engine management control, braking, steering and other systems that have been positioned as separate products.

Hitachi, TOKICO and Unisia, that have kept strengths in the fields of "environment" and "safety", and aggressiveness and flexibility in allocation of Hitachi Group's vast resources to meet these needs in these two fields, will capture greater synergies and accelerate efforts to reinforce the global competitiveness of automotive products operations through this merger.

-3-

3. Advantages of the Merger

Since developing its first automotive electrical components in 1930, Hitachi's automotive products business has grown to the point where today it supplies a broad range of products to all automakers worldwide. These products include engine management systems, electric powertrains, vehicle information systems and electronic components. Furthermore, Hitachi has experience and proven track records in the industrial components and equipment and rail vehicle businesses with respect to motors and inverters, that are key components to the growing market of hybrid electric and electric vehicles.

Edgar Filing: HITACHI LTD - Form 6-K

TOKICO, founded in 1937, has established a strong presence in both suspension and braking systems as a comprehensive manufacturer of drive control systems. The company supplies products around the world, mainly to Japanese automakers, Ford Motor Company and DAIMLER CHRYSLER AG. Moreover, TOKICO is a leader in pneumatic equipment and measurement and control systems.

Unisia, a wholly owned subsidiary of Hitachi, has technologies that fuse expertise in advanced hydraulics, electronic control and applied engineering. With this technological base, the company is actively developing the business in the engine management, steering, braking and variable valve systems fields.

Heretofore, the three companies, as core of the Hitachi Group's automotive products business, have established cooperative relationship in various areas, such as the commercialization of adaptive cruise control systems, the joint development of electric braking and sales activities to win joint orders from customers.

The merger of the three companies will make it possible for Hitachi Group to gear up the development pace and commercialization of advanced technologies, such as electric braking and drive control systems. All these will also be achieved by wedding Hitachi's and Unisia's sensor-based environment recognition technology, sophisticated electronic control technology and chassis control technology, with TOKICO's world's first class technologies, which include dampening force control and vehicle height control technology for suspension systems and simulation technology for braking systems.

The main post-merger initiatives and benefits from an operational perspective are as follows:

(1) Reorganization and Integration of Business Divisions

Similar and related business divisions of the three companies will be integrated as one in each field. This integration will bring together the specialist technologies and know-how in each respective domain. Together with an integrated strategy, this will yield a competitive operational structure.

More specifically, the drive control systems businesses of all three companies and the engine management system businesses of Hitachi and Unisia will be fully integrated. The integrated operations will accelerate the development of products combining technologies in all fields.

-4-

(2) Concentration of Resources and Greater Competitiveness from Integrated Sales and R&D activities

The sales activities of the three companies' main businesses will be integrated to unify sales and customer services. This will allow Hitachi to compete more effectively in global markets and respond swiftly to the needs of customers, who have been rapidly increasing global procurement activities in recent years.

And to take the lead in technological innovation across a wide spectrum, the existing R&D functions of the three companies will be integrated and strengthened. Moreover, we have agreed to establish a new R&D organization that is devoted exclusively to the automotive systems. Furthermore, this merger will bring up a closer relationship with Hitachi's existing laboratories, which carry out basic research, to engage in cutting-edge R&D that capitalizes on the Hitachi Group's collective strengths in the four systems and three fields mentioned earlier. The aim is to give Hitachi a technology and product

Edgar Filing: HITACHI LTD - Form 6-K

development capability unrivaled by any other competitors in the industry.

Hitachi's automotive products-related consolidated net sales (*1) and TOKICO's consolidated net sales in the fiscal year ending March 31, 2004 are estimated at approximately 365.0 billion yen and 124.0 billion yen, respectively.

The Hitachi Group has set the fiscal 2010 goal of consolidated net sales of 1 trillion yen (*2) in its automotive products business. The integration of the automotive systems businesses of Hitachi, TOKICO and Unisia will upgrade the operating base and propel the Group toward these goals.

(Notes)

- (*1) Unisia's consolidated net sales have been included in Hitachi's automotive products-related consolidated net sales since October 2002 when the former became a wholly owned subsidiary of Hitachi.
- (*2) Includes the consolidated sales of the "automotive business related" of TOKICO and Shin-Kobe Electric Machinery Co., Ltd. Therefore, the definition is different from that used in Hitachi's consolidated financial results.

-5-

4. Overview of the Merger

(1) Schedule for the merger

March 26, 2004	Conclusion of merger Memorandum of Understanding (*)
May 25, 2004	Conclusion of merger agreement [Board of Directors] (*) (tentative) [(*Approval by executive officers at Hitachi, and resolution by directors at TOKICO and Unisia)]
June 2004	Approval of merger agreement at ordinary general meeting of shareholders (TOKICO and Unisia)
October 1, 2004	Date of merger (tentative)
Early October 2004	Registration of merger (tentative)

Hitachi will merge the two companies without approval of the general meeting of shareholders' of the merger agreement, pursuant to the regulations of Article 413-3, Paragraph 1 of the Commercial Code of Japan.

(2) Method used for merger

As the surviving company, Hitachi will absorb TOKICO and Unisia, which will be dissolved thereafter. Shares of TOKICO will be de-listed as of late September 2004.

(3) Merger ratio

Hitachi and TOKICO asked Nomura Securities Co., Ltd. ('Nomura Securities') and KPMG Corporate Finance K.K. ('KPMG'), respectively, to calculate proposed merger ratios. Based on discussions by Hitachi and TOKICO with reference to the results of these proposals, the two companies agreed on the merger ratio as follows:

Company	Hitachi	TOKICO
Merger ratio	1	0.521

Edgar Filing: HITACHI LTD - Form 6-K

Hitachi shares will not exchange its shares for those of Unisia because Unisia is a wholly owned subsidiary of Hitachi.

Notes

1. Stock allocation ratio

- 0.521 Hitachi shares will be allotted for every 1 TOKICO share held. However, this may change based on discussions among the three companies if there is a significant change in the three companies' financial position between now and the merger date.
- No allocation will be made with respect to 26,952,434 shares of TOKICO common stock held by Hitachi.
- Hitachi will use treasury stock instead of issuing new shares for all the shares allocated at the time of this merger.

2. Calculation methods and basis of calculations used by third parties

Nomura Securities used the market value method with respect to Hitachi, and the market value, peer company comparison and discounted cash flow methods with respect to TOKICO. Nomura Securities calculated a merger ratio proposal based on a comprehensive analysis using these results. KPMG used the market value method with respect to Hitachi, and the market value, discounted cash flow and the adjusted net worth methods for TOKICO. KPMG calculated a merger ratio proposal based on a comprehensive analysis using these results.

3. New Hitachi shares issued as a result of this merger

No new shares will be issued because Hitachi will use its treasury stock.

-6-

(4) Payments

Hitachi will pay 4 yen per 1 TOKICO share held as an equivalent to TOKICO's interim dividend from April 1, 2004 to September 30, 2004, within three months of the date of merger to shareholders recorded in TOKICO's register of shareholders and beneficial shareholders or registered rights holders at the end of the day prior to the merger date. However, this may change based on discussions between Hitachi and TOKICO if there is a significant change in TOKICO's financial position between now and the merger date.

5. Profiles of the Merging Companies

Certain statements found in this document may constitute "forward-looking statements" as defined in the U.S. Private Securities Litigation Reform Act of 1995. Such "forward-looking statements" reflect management's current views with

Edgar Filing: HITACHI LTD - Form 6-K

respect to certain future events and financial performance and include any statement that does not directly relate to any historical or current fact. Words such as "anticipate," "believe," "expect," "estimate," "intend," "plan," "project" and similar expressions which indicate future events and trends are used to assist readers in identifying these "forward-looking statements." Such statements are based on currently available information and are subject to various risks and uncertainties that could cause actual results to differ materially from those projected or implied in the "forward-looking statements" and from historical trends. Certain "forward-looking statements" are based on current assumptions of future events which may not prove to be accurate. Undue reliance should not be placed on "forward-looking statements," as such statements speak only as of the date of this document.

Factors that could cause actual results to differ materially from those projected or implied in any "forward-looking statement" and from historical trends include, but are not limited to:

- rapid technological change, particularly in the Information & Telecommunication Systems segment and Electronic Devices segment;
- uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technology on a timely and cost-effective basis and to achieve market acceptance for such products;
- fluctuations in product demand and industry capacity, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;
- increasing commoditization of information technology products, and intensifying price competition in the market for such products;
- fluctuations in rates of exchange for the yen and other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated, particularly between the yen and the U.S. dollar;
- uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing, particularly in the context of limited credit availability currently prevailing in Japan;
- uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in product demand and/or exchange rates;
- general economic conditions and the regulatory and trade environment of Hitachi's major markets, particularly, the United States, Japan and elsewhere in Asia, including, without limitation, continued stagnation or deterioration of the Japanese economy, or direct or indirect restriction by other nations on imports;
- uncertainty as to Hitachi's access to, and ability to protect, certain intellectual property rights, particularly those related to electronics and data processing technologies;
- uncertainty as to the success of alliances upon which Hitachi depends, some of which Hitachi may not control, with other corporations in the design and development of certain key products; and
- uncertainty as to general market price levels for equity securities in Japan, declines in which may require Hitachi to write-down equity securities it holds.

Edgar Filing: HITACHI LTD - Form 6-K

The factors listed above are not all-inclusive and are in addition to other factors contained in Hitachi's periodic filings with the U.S. Securities and Exchange Commission and in other materials published by Hitachi.

Regarding the merger between Hitachi, Ltd. and TOKICO LTD.

Hitachi, Ltd. and TOKICO LTD. are Japanese companies. Information distributed in connection with the proposed merger is subject to Japanese disclosure requirements, which are different from those of the U.S. Financial information included herein is prepared in accordance with Japanese accounting standards and may therefore not be comparable to the financial information of U.S. companies.

It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws in respect of the merger, since the companies are located in Japan, and some or all of its officers and directors are residents of Japan. You may not be able to sue the companies or their officers or directors in a Japanese court for violations of the U.S. securities laws. Finally, it may be difficult to compel the companies and their affiliates to subject themselves to a U.S. court's judgment.

FOR IMMEDIATE RELEASE

Ricoh and Hitachi Reach Basic Agreement on Ricoh's Acquisition of Hitachi Printing Solutions, Ltd.

Tokyo, March 31, 2004---Ricoh Co., Ltd. (TSE:7752 / 'Ricoh') and Hitachi, Ltd. (NYSE: HIT / TSE:6501 / 'Hitachi') today announced that Ricoh and Hitachi have signed a basic agreement to the effect that Hitachi will transfer all its shares of Hitachi Printing Solutions, Ltd. ('Hitachi PRS'), a 100% owned subsidiary, to Ricoh. Details are as follows.

1. Reasons for the basic agreement

Ricoh is committed to strengthening its printer business, an important pillar of its growth strategy. To this end, Ricoh will strengthen product lines for the office color printer market, printers for mission-critical systems and POD, or print-on-demand, markets, in which Ricoh is yet to participate. In addition, Ricoh will enhance IT sales channels on top of its conventional copier marketing channels. Through these initiatives, Ricoh will optimize "Total Document Volume" as the strategic objective of its imaging solutions business.

In accordance with the basic agreement, Ricoh will acquire Hitachi PRS, which enjoys considerable success with its printers for mission-critical systems, high-speed printers for the POD markets and also low-end color laser printers. Hitachi PRS's participation in the Ricoh group will not only create synergistic effects in the areas of technology, products and human resources for Ricoh printer business but also contribute to increasing Ricoh's corporate value.

Hitachi, for its part, is making every possible effort to ensure that all its businesses win in the global marketplace in accordance with its mid-term business plan: "i.e. HITACHI Plan II." This basic agreement was made within the context of this plan. Hitachi sees printers as important products for its information and communication systems business and intends to provide its customers with even higher valued-added solutions, maintaining all the while a strong business partnership with Ricoh.

2. Corporate profile of Hitachi PRS

(1) Name	Hitachi Printing Solutions, Ltd.
(2) President	Toshiaki Katayama President and Chief Executive Officer
(3) Address	15-1, Konan 2-chome, Minato-ku, Tokyo, Japan
