### **To Our Shareholders:**

In providing this report on our business results for the first half of fiscal 2004, we wish to express our deep gratitude to all our shareholders for the understanding and support you have extended to the Hitachi Group.

During the half-year period, the Japanese economy made solid progress on the strength of expanded private-sector plant and equipment investment, growth in exports, and a rebound in consumer spending.

The resulting improved business environment was among the factors that enabled Hitachi to achieve first-half consolidated revenues of ¥4,329.9 billion, an improvement of 7% from the same period a year earlier.

Major factors affecting profits included a marked improvement in the profit in the HDD business of Information & Telecommunication Systems and substantial increases in operating income posted by Electronic Devices, Digital Media & Consumer Products and High Functional Materials & Components, the segments encompassing the electronic product businesses. As a result, consolidated operating income came to ¥127.3 billion, up 529% from the same period of the preceding year. Interim income before income taxes and minority interests amounted to ¥136.0 billion and net income rose 664% from the same period of the preceding year, to ¥41.1 billion.

Looking at unconsolidated results, Hitachi, Ltd.(the Company), recorded revenues of ¥1,152.8 billion, up 2% from the same period of the preceding year. Although the Company posted an operating loss of ¥21.7 billion, ordinary income came to ¥9.6 billion. In addition, the Company posted extraordinary gain of ¥9.9 billion from the sale of investments and affiliates' stock and extraordinary gain of ¥4.5 billion from the sale of land. Owing to the inclusion of the total extraordinary gain of ¥14.4 billion, interim net income amounted to ¥26.5 billion.

At a meeting of the Board of Directors, the Company decided to pay an interim dividend of ¥5.5 per share.

In line with i.e. Hitachi Plan II, a medium-term management plan setting goals to be reached by 2005, Hitachi is continuously pushing forward with management reforms aimed at enhancing the value of the Hitachi Group. During the half-year period under review, emphasis was placed on building powerful systems for infusing Group management into the corporate fabric. One move in this direction was the establishment of Hitachi Group Headquarters as an office for formulating and implementing a new Hitachi Group growth strategy.

On October 1, 2004, in order to accelerate growth of the automotive equipment business, Hitachi acquired TOKICO Ltd. and Hitachi Unisia Automotive, Ltd. through a merger. Other moves included the consolidation of automatic teller machines (the ATM) and other information equipment businesses with Omron Corporation and transfer of the printer business to Ricoh Company, Ltd. Further, the Company reached an agreement with TOSHIBA CORPORATION and Matsushita Electric Industrial Co., Ltd., under which a joint-venture company for manufacture and sale of LCD panels for flat-panel TVs will be established in January 2005.

Of special note regarding financial strategy is the issuance in October 2004 of ¥100 billion convertible bonds. The procured funds are expected to be used to secure funding for forward-looking investments such as R&D and capital investments in the targeted businesses as profit-making

## Edgar Filing: HITACHI LTD - Form 6-K

resources in an effort to realize further growth in coming years.

The head office of Hitachi, Ltd. moved to Marunouchi, Chiyoda-ku, Tokyo as of September 27, 2004.

Our view is that the future business environment is likely to be affected by a gradually intensifying deceleration of the Japanese economy owing to slower growth in exports and private-sector plant and equipment investment caused by a slowdown in the US economy. We intend to meet the challenge of every issue confronting the company with a Commitment to Growth irrespective of the severity of the business environment and, by achieving the goals of i.e. Hitachi Plan II, to continue remaking Hitachi into a Best Solutions Partner.

We hope we can look forward to receiving your continuing support and understanding of our efforts.

December 2004

Tsutomu Kanai  
Chairman of the Board

Etsuhiko Shoyama  
President and Chief Executive Officer

## Table of Contents

### Outline of Business Results

#### Information & Telecommunication Systems

Revenues increased 2%, to ¥1,071.7 billion, from the same period of the preceding year due to the solid performance of outsourcing services operations in the software and services businesses, and the increased sales of HDDs and ATMs for the new bill in the hardware business. Operating income increased 436%, to ¥28.9 billion, largely attributable to the upturned profit in the HDD operations.

#### Electronic Devices

Hitachi High-Technologies Corporation registered good growth mostly in the semiconductor and LCDs related manufacturing machines, and revenues in the displays operations also rose. Thus the segment saw revenues increase 14% from the same period of the preceding year, to ¥692.0 billion. Operating income increased 718%, to ¥30.0 billion, due primarily to a substantial increase in the profit of Hitachi High-Technologies Corporation and an improvement in the profit of display business.

#### Power & Industrial Systems

Although power generation equipment business was sluggish, Hitachi Construction Machinery Co., Ltd. posted higher revenues in overseas markets, and revenues of air-conditioning equipment and industrial equipment increased. Thus, segment revenues increased 4% from the same period of the preceding year, to ¥1,120.8 billion. Operating income increased 27%, to ¥10.0 billion.

#### Digital Media & Consumer Products

Segment revenues increased 10% from the same period of the preceding year, to ¥646.1 billion, due primarily to the increased revenues of plasma TVs and liquid crystal projectors, and the solid results of home appliances such as room air conditioners and washing machines. Operating income amounted to ¥10.6 billion, an increase of ¥9.8 billion yen from the same period of the preceding year, due primarily to an improvement in the profit of home appliances and an increase in the profit of liquid crystal projectors and other display equipment.

#### High Functional Materials & Components

Good growth was registered by Hitachi Chemical Co., Ltd., Hitachi Metals, Ltd. and Hitachi Cable, Ltd., mostly in the electronic related materials. Segment revenues increased 19% from the same period of the preceding year, to ¥740.4 billion. Operating income rose 337%, to ¥40.3 billion.

Logistics, Services & Others

Hitachi Transport System, Ltd. showed a solid performance. However, due to a decrease in sales of overseas sales companies, caused by reorganization of semiconductor operations, segment revenues amounted to ¥610.3 billion approximately the same as the same period of the preceding year. The segment recorded operating income of ¥7.5 billion, rebounding from an operating loss of ¥0.3 billion in the same period of the preceding year. This was due to the good growth of logistics service operations and an improvement in the operational efficiency of overseas sales companies.

Financial Services

Segment revenues increased 1%, to ¥270.7 billion, from the same period of the preceding year due to the solid performance of financial services related operations. Operating income increased 22%, to ¥9.9 billion.
