Table of Contents**FOR IMMEDIATE RELEASE****Hitachi Announces Consolidated Financial Results for the Third Quarter of Fiscal 2004**

Tokyo, February 2, 2005 Hitachi, Ltd. (NYSE:HIT / TSE:6501) today announced its consolidated financial results for the third quarter of fiscal 2004, ended December 31, 2004.

1. Business Results and Financial Position

Note: All figures were converted at the rate of 104 yen to the U.S. dollar, the approximate exchange rate on the Tokyo Foreign Exchange Market as of December 30, 2004.

Business Results**(1) Summary of Fiscal 2004 Third-Quarter Consolidated Business Results**

- Notes: 1. All figures, except for the outlook for fiscal 2004, were converted at the rate of 104 yen to the U.S. dollar, the approximate exchange rate on the Tokyo Foreign Exchange Market as of December 30, 2004.
2. Segment information and operating income (loss) are presented in accordance with accounting principles generally accepted in Japan.

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	2,123.7	4%	20,421
Operating income	34.3	(46%)	330
Income before income taxes and minority interests	70.9	54%	682
Income before minority interests	35.9	416%	345
Net income	26.6		256

Table of Contents

- 2 -

During the third quarter, the world economy, while still in a recovery mode, grew at a slower pace due to weakening demand for digital-related equipment and the effects of surging prices for crude oil and other raw materials around the world.

In the Japanese economy, too, there was a heightened sense of a slowdown. In addition to a downturn in exports and a peaking of investment in plant and equipment, the slowdown was caused by a slower rate of growth in consumer spending, including softening sales of digital consumer electronics.

Against this backdrop, Hitachi's consolidated revenues increased 4% year on year, to 2,123.7 billion yen, despite year-on-year decreases in the Information & Telecommunication Systems segment and Electronic Devices segment, particularly in respect of LCDs. Segments recording year-on-year increases in revenues included Power & Industrial Systems and High Functional Materials & Components.

Operating income dropped 46%, to 34.3 billion yen due to sharp year-on-year decreases in operating income in the Information & Telecommunication Systems segment, where prices fell for servers, HDDs and other products, and the Electronic Devices segment, where earnings on LCDs worsened due to a sudden market drop-off. Furthermore, the Digital Media & Consumer Products segment recorded an operating loss.

Other income climbed 169% year on year, to 49.1 billion yen due to a marked improvement in earnings from equity-method affiliates resulting from such factors as income from a change in equity accompanying the public listing of Elpida Memory, Inc. Other deductions declined 64%, to 12.6 billion yen, due in part to a year-on-year decrease in restructuring charges.

As a result, Hitachi recorded income before income taxes and minority interests of 70.9 billion yen, up 54% year on year. After income taxes of 34.9 billion yen, Hitachi posted income before minority interests of 35.9 billion yen. Net income was 26.6 billion yen, sharply higher than in the corresponding period a year earlier.

Table of Contents

- 3 -

(2) Revenues and Operating Income (Loss) by Segment

Results by segment were as follows.

[Information & Telecommunication Systems]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	482.4	(6%)	4,639
Operating income	2.1	(84%)	21

Information & Telecommunication Systems revenues decreased 6%, to 482.4 billion yen. Software and services revenues increased year on year as a whole, with solid performances by the outsourcing business and other businesses in services countering lower software sales. Hardware sales declined year on year due to factors such as lower prices for servers, PCs, HDDs and other products.

The segment posted operating income of 2.1 billion yen, 84% down year on year, due to lower prices in hardware on the whole.

Note: HDD operations are conducted by Hitachi Global Storage Technologies (Hitachi GST), which has a December 31 fiscal year-end, different from Hitachi's March 31 year-end. Hitachi's results for the third quarter ended December 31, 2004 include operating results of Hitachi GST for the three-month period from July through September 2004.

[Electronic Devices]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	300.2	(10%)	2,887
Operating income	2.2	(81%)	22

Edgar Filing: HITACHI LTD - Form 6-K

Electronic Devices revenues decreased 10%, to 300.2 billion yen, despite healthy growth in sales of semiconductor and LCD manufacturing equipment at Hitachi High-Technologies Corporation. The decline was attributed to sharply lower sales of displays due to a sudden market downturn for LCDs.

The segment posted an 81% year-on-year decline in operating income, to 2.2 billion yen, again despite an increase in earnings at Hitachi High-Technologies, particularly from semiconductor and LCD manufacturing equipment. The segment result reflected sharply lower earnings from the display business, due to factors such as a fall in sales prices.

Table of Contents

- 4 -

[Power & Industrial Systems]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	560.0	16%	5,385
Operating income	5.9	96%	58

Power & Industrial Systems revenues increased 16%, to 560.0 billion yen. In addition to the effects of consolidating an equity-method affiliate that manufactures and sells elevators and escalators in China in the first half of fiscal 2004 and of Hitachi, Ltd. merging with TOKICO LTD. in the third quarter, this performance reflected higher sales at Hitachi Construction Machinery Co., Ltd.

The segment posted a 96% increase in operating income, to 5.9 billion yen, on higher earnings at Hitachi Construction Machinery and improved earnings in air-conditioning systems, industrial machinery and other products.

[Digital Media & Consumer Products]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	325.3	(1%)	3,129
Operating loss	(1.7)		(17)

In Digital Media & Consumer Products, revenues were 325.3 billion yen, largely the same as the previous year. Although the shipments of plasma TVs and LCD projectors increased, sales of home appliances were affected by lower sales prices and Hitachi Maxell, Ltd. recorded lower revenues.

The segment recorded an operating loss of 1.7 billion yen, compared with operating income of 11.3 billion yen in the third quarter of the previous fiscal year. This was the result of falling sales prices in the segment as a whole.

Edgar Filing: HITACHI LTD - Form 6-K

Note: The optical disk drive business is conducted by Hitachi-LG Data Storage, Inc. (HLDS), which has a December 31 fiscal year-end. Hitachi's results for the third quarter ended December 31, 2004 include operating results of HLDS for the three-month period from July through September 2004.

Table of Contents

- 5 -

[High Functional Materials & Components]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	379.5	15%	3,649
Operating income	22.0	48%	212

In High Functional Materials & Components, revenues rose 15%, to 379.5 billion yen. Hitachi Metals, Ltd. posted a sharp increase in sales due to strong sales to automotive- and electronics-related fields as well as the effect of consolidating NEOMAX Co., Ltd., formerly Sumitomo Special Metals Co., Ltd., from the first half of fiscal 2004. Hitachi Chemical Co., Ltd. and Hitachi Cable, Ltd. also recorded sharply higher sales, with growth at the former reflecting strong sales, particularly to the automotive-related field, and growth at the latter reflecting higher copper prices, which forced up sales prices of wires and cables and other products.

The segment operating income climbed 48%, to 22.0 billion yen due to factors such as the robust performances of Hitachi Chemical Co., Ltd., Hitachi Metals, Ltd. and Hitachi Cable, Ltd.

[Logistics, Services & Others]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	312.1	1%	3,002
Operating income	2.4	(29%)	23

In Logistics, Services & Others, revenues were on a par with a year earlier at 312.1 billion yen. Hitachi Transport System, Ltd. and Hitachi Mobile Co., Ltd. both posted healthy sales.

The segment posted operating income of 2.4 billion yen, down 29% year on year, due to lower prices of products and services, particularly at overseas sales companies.

[Financial Services]

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	130.3	(5%)	1,254
Operating income	8.0	9%	77

In Financial Services, revenues declined 5%, to 130.3 billion yen.

Operating income increased 9%, to 8.0 billion yen.

(3) Revenues by Market

	Three months ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Japan	1,307.9	2%	12,577
Overseas	815.8	6%	7,844
Asia	339.5	9%	3,264
North America	238.3	4%	2,292
Europe	178.3	4%	1,715
Other Areas	59.5	4%	573

Revenues in Japan and overseas both surpassed the same period in the previous fiscal year on strong growth in the Power & Industrial Systems and High Functional Materials & Components segments.

Revenues in Japan rose 2%, to 1,307.9 billion yen.

Overseas revenues rose 6%, to 815.8 billion yen due to growth in sales of materials for electronics-related products and in sales at Hitachi Construction Machinery, in addition to such other factors as the effect of consolidating an equity-method affiliate that manufactures and sells elevators and escalators in China in the first half of fiscal 2004.

(4) Financial Position

	As of December 31, 2004		
	Billions of yen	Change from September 30, 2004	Millions of U.S. dollars
Total assets	9,844.3	207.4	94,657
Total liabilities	6,686.5	144.1	64,293
Debts	2,606.4	140.5	25,061
Minority interests	884.8	10.4	8,508
Stockholders equity	2,273.0	52.9	21,856

Edgar Filing: HITACHI LTD - Form 6-K

Stockholders' equity ratio	23.1%	0.1 point increase
D/E ratio (including minority interests)	0.83 times	0.03 point increase
	<hr style="width: 100%;"/>	<hr style="width: 100%;"/>

Total assets increased 207.4 billion yen, to 9,844.3 billion yen, compared with September 30, 2004, due to factors such as the merger with TOKICO LTD. in the third quarter of fiscal 2004. Debts increased 140.5 billion yen, to 2,606.4 billion yen, compared with September 30, 2004. Stockholders' equity increased 52.9 billion yen, to 2,273.0 billion yen due to factors such as the increase in net income, and the increase in the capital surplus and the decrease in treasury stock accompanying the merger with TOKICO. As a consequence, the stockholders' equity ratio improved by 0.1 of a percentage point to 23.1%. The debt-to-equity ratio (including minority interests) was 0.83 times due to the increase in debts.

(5) Cash Flows

	Three months Ended December 31, 2004		
	Billions of yen	Year-over-year Change	Millions of U.S. dollars
Cash flows from operating activities	(36.6)	20.3	(352)
Cash flows from investing activities	(169.8)	(37.3)	(1,633)
Free cash flows	(206.4)	(17.0)	(1,985)
Cash flows from financing activities	124.0	20.7	1,193

Operating activities used net cash of 36.6 billion yen, 20.3 billion yen less than in the previous fiscal year, reflecting the large increase in net income.

Investing activities used net cash of 169.8 billion yen, 37.3 billion yen increase over the previous fiscal year. This was the result of an increase in capital investments, mainly for Hitachi's key businesses, and other factors.

Free cash flows, the sum of cash flows from operating and investing activities, were an outflow of 206.4 billion yen, 17.0 billion yen more than a year earlier.

Financing activities provided net cash of 124.0 billion yen, 20.7 billion yen more than in the previous fiscal year due to the issue of euro-yen zero coupon convertible bonds and other factors.

Cash and cash equivalents as of December 31, 2004 amounted to 531.1 billion yen, a decrease of 87.9 billion yen during the third quarter.

2. Business Results for the Nine Months Ended December 31, 2004**(1) Summary, Revenues by Segment and Operating Income by Segment**

Summary

	Nine Months Ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Revenues	6,453.7	6%	62,055
Operating income	161.7	94%	1,555
Income before income taxes and minority interests	206.9	51%	1,990
Income before minority interests	103.8	388%	999
Net income	67.8	758%	652

Eliminations & Corporate Items	(17.1)		(165)

The world economy in the nine months to December 31, 2004, a period including the third quarter of fiscal 2004, remained on a recovery footing as a whole. Demand rose for IT-related equipment, particularly in the U.S., and domestic demand rose in China. Corporate earnings declined, however, in the second half of the period, due to factors such as surging raw materials prices, particularly in Asia.

Edgar Filing: HITACHI LTD - Form 6-K

The Japanese economy also continued to grow steadily, led by exports and plant and equipment investments. However, in the latter half of the period, electronic device inventories increased and growth in sales of electronics-related products was lackluster.

Table of Contents

- 9 -

Against this backdrop, Hitachi's consolidated revenues for the nine months to December 31, 2004 increased 6% year on year, to 6,453.7 billion yen, with most of the business segments posting year-on-year increases. The Electronic Devices segment saw strong growth in sales of semiconductor and LCD manufacturing equipment and other products, Digital Media & Consumer Products recorded strong growth in sales of plasma TVs and other products, and High Functional Materials & Components recorded higher revenues, particularly for components and materials for electronics-related products. These performances reflected buoyant conditions in the digital consumer electronics market in the first half of the period.

Operating income climbed 94%, to 161.7 billion yen, as almost all segments, including High Functional Materials & Components, Electronic Devices and Information & Telecommunication Systems, posted year-on-year increases.

Other income was 80.4 billion yen, down 36% on the same period a year ago. This decrease was due to a decline in gains on the sale of investment securities and to other factors, despite a switch from a loss to income from equity-method affiliates due to substantial improvements at Renesas Technology Corp. and Elpida Memory. Other deductions declined 51%, to 35.2 billion yen compared with the previous fiscal year, when there was a loss from equity-method affiliates and exchange losses.

As a result, Hitachi recorded income before income taxes and minority interests of 206.9 billion yen, up 51% year on year. After income taxes of 103.0 billion yen, Hitachi posted income before minority interests of 103.8 billion yen. Net income climbed 758% year on year, to 67.8 billion yen.

(2) Revenues by Market

	Nine Months Ended December 31, 2004		
	Billions of yen	Year-over-year % change	Millions of U.S. dollars
Japan	4,017.2	3%	38,628
Overseas	2,436.4	12%	23,427
Asia	1,033.8	20%	9,940
North America	680.8	3%	6,547
Europe	524.6	10%	5,045
Other Areas	197.1	12%	1,895

Revenues for the nine months ended December 31, 2004 were up year on year.

Table of Contents

- 10 -

Revenues in Japan rose 3%, to 4,017.2 billion yen. Digital Media & Consumer Products recorded strong growth in sales of plasma TVs and other products, and High Functional Materials & Components recorded higher revenues, particularly for components and materials for electronics-related products.

Overseas revenues increased 12%, to 2,436.4 billion yen due to growth in sales of construction machinery at Hitachi Construction Machinery, particularly to European and U.S. markets, higher sales in social infrastructure, digital media and electronics-related materials, particularly in the Chinese market, and other factors.

(3) Cash Flows

	Nine Months Ended December 31, 2004		
	Billions of yen	Year-over-year Change	Millions of U.S. dollars
Cash flows from operating activities	121.0	(46.5)	1,164
Cash flows from investing activities	(370.6)	(81.0)	(3,563)
Free cash flows	(249.5)	(127.5)	(2,399)
Cash flows from financing activities	12.7	83.2	123

Operating activities provided net cash of 121.0 billion yen, 46.5 billion yen less than in the previous fiscal year, reflecting factors such as a increasing of payment in payables.

Investing activities used net cash of 370.6 billion yen, an increase of 81.0 billion yen. This was the result of an increase in capital investments, mainly for Hitachi's key businesses, absence of large sales of shares and other factors.

Free cash flows, the sum of cash flows from operating and investing activities, were an outflow of 249.5 billion yen, 127.5 billion yen more year on year.

Financing activities provided net cash of 12.7 billion yen, 83.2 billion yen more than the cash used a year earlier. This reflected such factors as the issue of euro-yen zero coupon convertible bonds.

Edgar Filing: HITACHI LTD - Form 6-K

Cash and cash equivalents as of December 31, 2004 amounted to 531.1 billion yen, a decrease of 233.2 billion yen during the nine-month period, which includes the third quarter.

Table of Contents

Outlook for Fiscal 2004**Consolidated**

	Fiscal 2004, ending March 31, 2005		
	Billions of Yen	Change from outlook on	Year-over-year
		Oct. 29, 2004	% change
Revenues	8,840.0	(60.0)	2%
Operating income	260.0	(40.0)	41%
Income before income taxes and minority interests	235.0	(65.0)	(1%)
Income before minority interests	95.0	(55.0)	147%
Net income	50.0	(50.0)	215%

Unconsolidated

	Fiscal 2004, ending March 31, 2005		
	Billions of Yen	Change from outlook on	Year-over-year
		Oct. 29, 2004	% change
Revenues	2,570.0	0.0	3%
Ordinary income	20.0	(5.0)	(1%)
Net income	10.0	(30.0)	(75%)

In terms of trends in the world economy, Hitachi expects Asian economies to remain healthy, supported by domestic demand in China, and European economies are expected to continue their modest recovery. However, the U.S. economy is expected to slow slightly as the benefits of tax cuts, low interest rates and other government policies fade. Due to these factors, as well as surging crude oil and other raw materials prices, a downturn in market conditions for electronic-related products and other influences, the pace of growth in the world economy is expected to slow.

The Japanese economy is expected to slow further as demand for digital consumer electronics softens and the drop in plant and equipment investment, such as in the electronics components industry, begins to have an impact.

Table of Contents

- 12 -

Under these circumstances, and based on the large impact on results of falling sales prices, deteriorating profitability in some projects in the Information & Telecommunication Systems segment and other factors, Hitachi expects to book restructuring charges. Due to this and other factors, as outlined above, Hitachi has lowered its fiscal 2004 forecasts issued with first-half results on October 29, 2004 on both a consolidated basis and unconsolidated basis. The projections assume a fourth-quarter exchange rate of 103 yen to the U.S. dollar.

Looking ahead, Hitachi will push ahead with active investments in key businesses and ongoing business structural reforms in a drive to further strengthen actions designed to bolster competitiveness on a groupwide basis.

In particular, with respect to deteriorating earnings in the Information & Telecommunication Systems segment, Hitachi plans to expedite initiatives groupwide, including nurturing project managers, enhancing productivity in systems construction such as by developing common technology, and broadening upstream consulting and the outsourcing business. These efforts target the establishment of a resilient business base and the prevention of unprofitable projects in the future.

Cautionary Statement

Certain statements found in this document may constitute forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements reflect management's current views with respect to certain future events and financial performance and include any statement that does not directly relate to any historical or current fact. Words such as anticipate, believe, expect, estimate, forecast, intend, plan, project and similar expressions which indicate future events and trends may identify forward-looking statements. Such statements are based on currently available information and are subject to various risks and uncertainties that could cause actual results to differ materially from those projected or implied in the forward-looking statements and from historical trends. Certain forward-looking statements are based upon current assumptions of future events which may not prove to be accurate. Undue reliance should not be placed on forward-looking statements, as such statements speak only as of the date of this document.

Factors that could cause actual results to differ materially from those projected or implied in any forward-looking statement and from historical trends include, but are not limited to:

- rapid technological change, particularly in the Information & Telecommunication Systems segment and Electronic Devices segment;
- uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technology on a timely and cost-effective basis and to achieve market acceptance for such products;

Table of Contents

- 13 -

- fluctuations in product demand and industry capacity, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;
- increasing commoditization of information technology products, and intensifying price competition in the market for such products;
- fluctuations in rates of exchange for the yen and other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated, particularly between the yen and the U.S. dollar;
- uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing;
- uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in product demand and/or exchange rates;
- general economic conditions and the regulatory and trade environment of Hitachi's major markets, particularly, the United States, Japan and elsewhere in Asia, including, without limitation, a return to stagnation or deterioration of the Japanese economy, or direct or indirect restriction by other nations on imports;
- uncertainty as to Hitachi's access to, or ability to protect, certain intellectual property rights, particularly those related to electronics and data processing technologies;
- uncertainty as to the success of alliances upon which Hitachi depends, some of which Hitachi may not control, with other corporations in the design and development of certain key products; and
- uncertainty as to general market price levels for equity securities in Japan, declines in which may require Hitachi to write-down equity securities it holds.

The factors listed above are not all-inclusive and are in addition to other factors contained in Hitachi's periodic filings with the U.S. Securities and Exchange Commission and in other materials published by Hitachi.

FOR IMMEDIATE RELEASE

Hitachi to Increase Share in Fujitsu Hitachi Plasma Display

Acquiring stock and plasma technology patents from Fujitsu

TOKYO, Japan, February 2, 2005 Hitachi, Ltd. (NYSE:HIT/TSE:6501) today announced that it has reached an agreement with Fujitsu Limited (TSE: 6702) regarding acquisition of Fujitsu Hitachi Plasma Display Limited (FHP) stock owned by Fujitsu. The move, aimed at strengthening Hitachi's position in the plasma display panel (PDP) business, also involves the transfer to Hitachi of Fujitsu's PDP technology patents at the end of March 2005. Once Hitachi and Fujitsu have provided financial assistance for eliminating FHP's excessive debt by the end of March, the transfer of stock is to move forward quickly from April and, by adding 30.1% of FHP's issued shares to Hitachi's holdings, will make FHP a consolidated subsidiary of Hitachi.

The tighter tie between Hitachi and FHP will enable the companies to implement a still more unified business strategy. Already the leading supplier in the plasma TV market, Hitachi continues to enhance its market presence by aggressive introduction of higher resolution large-screen TVs in response to the worldwide trend toward digital broadcasting. As a manufacturer specializing in PDPs, FHP is committed to maintaining and advancing its status as the market's prime mover by supplying leading-edge high-resolution, large-screen panels geared to set maker requirements to an increasing number of manufacturers. No immediate change will be made in FHP's name or management after the company becomes a Hitachi subsidiary.

Table of Contents

- 2 -

Hitachi established its leading position in plasma TVs through a vigorous market pioneering program that included introduction of the world's first 32V/37V HDTV plasma TV models and models incorporating high-capacity hard disk drives. In Japan, particularly, Hitachi is well known as the innovator of a new dimension in audio-visual enjoyment that uses a thin, large-screen TV to create a home theater-like ambience matched to ubiquitous era sensibilities. Hitachi is also the creator of "Wooo World", a formula for building a new entertainment lifestyle by combining a DVD camera, HDD recorder and other new-generation devices around a plasma TV at the core. "Wooo World" has been very well received by customers in Japan. Intent on dominating the development of markets worldwide, Hitachi has launched an initiative to enliven and expand demand for plasma TVs and related products in Europe and North America, as well as in China and throughout Asia.

FHP has achieved a commanding position in the global PDP market largely through the development of its own trail-blazing technologies, including the ALIS (Alternate Lighting of Surfaces Method) panel driving system that brings out the full potential of HDTV broadcasting by combining 1000-plus scanning line resolution with high brightness, the still more advanced e-ALIS system compatible with large-screen plasma panels, and the recently developed TERES (Technology of Reciprocal Sustainer) system that enables panel driving at half the conventional voltage.

In the rapidly growing market for plasma and other types of slim TVs, both advanced image processing technologies and added value imparted by the display panel are highly important factors. If Hitachi is to maintain and improve its superior position in the thin larger-screen TV market, therefore, it needs to shift to a new business model that brings these factors under an integrated business strategy. Strengthening the plasma TV business is important but not enough in itself. Hitachi must also implement a unified strategy encompassing both new ubiquitous network system-oriented AV businesses that capitalize on the synergy among the Hitachi Group's HDD-DVD drive, LSI and other component capabilities, and the PDP business that is the source of a key device used in AV product businesses. Moreover, the steady intensification of competition in the PDP market makes it essential for FHP to develop and produce technologically advanced panels that meet the needs of a large number of set manufacturers, and for this the company needs to utilize Hitachi's know-how as a plasma TV manufacturer still more actively in the development of high value-added panels. The acquisition of stock and patents is a measure well matched to the needs of the two companies that can be expected to strengthen both the plasma TV and plasma display panel businesses.

Table of Contents

- 3 -

The tighter integration of business strategy will allow Hitachi and FHP to better utilize their positions as global suppliers of market-leading plasma display panels and plasma TVs to inspire the advent of the ubiquitous society.

Etsuhiko Shoyama, Hitachi's President and Chief Executive Officer, had the following to say about the agreement with Fujitsu:

The significance to Hitachi of the plasma TV business and the PDP business that supplies it with one of its key devices is very great because plasma TVs are a core product among Hitachi consumer product offerings and the consumer product business is fundamental to building a powerful Hitachi brand. By continuing to supply the market with plasma TVs that fully utilize the superb performance of FHP's PDPs, Hitachi has earned recognition as a main player in furthering the ubiquitous society. The more powerful synergy between the plasma TV and plasma display panels businesses made possible by FHP's joining the Hitachi Group will be used to expand Hitachi's plasma TV business and also to contribute to growth of the overall plasma TV market. Another effect that I envision is that the value of the Hitachi brand will be enhanced by the invigoration of consumer product operations resulting from a more active plasma TV business and this in turn will make a major contribution to businesses in the social infrastructure, information systems and other sectors.

About Fujitsu Hitachi Plasma Display Limited

President: Yoichi Morimoto
Headquarters: Kawasaki City, Kanagawa Prefecture, Japan

For immediate release

**Hitachi and Panasonic Agree on Comprehensive
Collaboration in Plasma Display Business**

TOKYO, Japan, February 7, 2005 Hitachi, Ltd. (NYSE:HIT/TSE: 6501) and Matsushita Electric Industrial Co., Ltd. (NYSE:MC/TSE: 6752), best known for its Panasonic brand products, announced today that they will be joining forces to develop and expand the plasma TV market under an agreement that calls for all-around collaboration in moving forward with the plasma display (PDP) business. The two companies, both leaders in the plasma TV arena, have agreed to collaborate in a broad range of activities, including R&D, production, marketing and intellectual property. The color PDP was developed by researchers and engineers in Japan making the best use of their advanced technologies and innovative ideas. The agreement between Hitachi and Panasonic is aimed at further development of color PDP technologies and growth of the Plasma TV market on a global scale.

The color PDP was realized mostly with advanced Japanese technologies of image displays and it has become a key device in the digital consumer product field. The PDP is a self-luminous device that produces a picture by emitting light from many individual pixels. It has numerous notable features, such as wide viewing angle, fast response, and outstanding color rendering. Since the PDP is emissive (produces its own light), the amount of light it emits can be flexibly regulated according to the use environment. This makes it an ideal device from the ecological viewpoint, because it can conserve energy while offering large-screen size and high-definition. In addition, the PDP has a highly efficient productivity, making its cost competitiveness strong.

Table of Contents

- 2 -

The plasma TV, which was developed to take full advantage of these features of the PDP, has achieved rapid market penetration against the backdrop of the spread of digital broadcasting worldwide. The Plasma TV accounts for about 90% of the global market for thin, large screen TV sets (Techno Systems Research Co., Ltd. survey) and are expected to enjoy phenomenal growth in coming years.

Concluding that the self-luminous PDP is the most suitable display for slim, large-screen, high-definition TVs, Hitachi and Panasonic agreed to establish a comprehensive cooperative relationship encompassing every aspect of the PDP business.

Although the specific points of collaboration are to be discussed and implemented progressively, some of the points currently envisioned by Hitachi and Panasonic are as follows:

1. R&D

In order to increase cost competitiveness by, for example, establishing standards for PDP module components, the companies will jointly explore whether and how they can work in liaison with component manufacturers. Synergism between the companies' businesses, such as product performance enhancement and cost reduction, will be sought through mutual utilization of the best components of the Hitachi and Panasonic groups. An effort will be made to further strengthen the technological capability of the companies through the exchange of up-to-date PDP news and information from around the world.

2. Production

Standardization of next-generation production facilities and mutual benchmarking of production processes will be explored with an eye to boosting PDP production capacity and efficiency.

3. Marketing

The companies will collaborate in reaching out to consumers with easy-to-understand explanations of the advantages of PDP from the customer's viewpoint, including their wide viewing angle, motion picture performance, color rendering capability and other superb picture quality features, and the excitement of having an energy-efficient home theater that adds realism to movie viewing in one's own home.

Table of Contents

- 3 -

4. Intellectual property

In view of the increasingly important role of patents in expanding the PDP business, Hitachi is to consider setting up a company to manage its PDP patents. Panasonic will consider investment into such company, which will enable a continuing and stable cross-licensing relationship between the two companies.

Hitachi and Panasonic have a partnership in a broad range of endeavors, most notably in the consumer products sector, and have achieved many successes in the joint development of products and other areas.

The companies view the agreement announced today as a step toward a still stronger collaborative relationship that will enable them to help make life more enjoyable for people around the world.

About Hitachi, Ltd.

Hitachi, Ltd., (NYSE:HIT/TSE:6501) headquartered in Tokyo, Japan, is a leading global electronics company, with approximately 326,000 employees worldwide. Fiscal 2003 (ended March 31, 2004) consolidated sales totaled 8,632.4 billion yen (\$81.4 billion).
