PART I

Item 1. Business

General

Shoe Pavilion, Inc. is an independent off-price footwear retailer on the West Coast that offers a broad selection of women's, men's and children's designer label and name brand merchandise. The Company was among the first footwear retailers on the West Coast to expand the off-price concept into the designer and name brand footwear market. As of March 21, 2005 the Company operated 84 retail stores, including an internet store, in California, Washington, Oregon and Arizona under the trade name Shoe Pavilion.

In July 1999, the Company entered into a licensing agreement to operate the shoe department of Gordmans, Inc. (formerly Richman Gordon & Price Stores, Inc.) department stores located in the Midwest. The license agreement expired in June 2002 at which time the Company discontinued operating all 40 of the licensed shoe departments in Gordmans department stores.

The Company offers quality designer and name brand footwear typically at 20% to 60% below regular department store prices. Such price discounts are intended to appeal to value-oriented consumers seeking quality brand name footwear not typically found at other off-price retailers or mass merchandisers. The Company is able to offer lower prices by (i) selectively purchasing from manufacturers at significant discounts, large blocks of production over-runs, over-orders, mid- and late-season deliveries and last season's stock, (ii) sourcing in-season name brand and branded design merchandise directly from factories in Italy and China and (iii) negotiating favorable prices with manufacturers by ordering merchandise during off-peak production periods and taking delivery. During 2004, the Company purchased footwear merchandise from over 100 domestic and international vendors, independent resellers and manufacturers that had excess inventory for sale.

The Company's stores utilize a self-service format that allows inventory to be stored directly under a displayed shoe, thereby eliminating the need for a stockroom and significantly increasing retail floor space. The functionality and simplicity of this format enable flexible store layouts that can be easily reconfigured to accommodate a new mix of merchandise. Moreover, this format allows customers to locate all available sizes of a particular shoe and to try them on for comfort and fit without a salesperson's assistance, thereby reducing in-store staffing needs and allowing customers to make independent purchasing decisions.

Shoe Pavilion's stores are based upon a standardized concept that offers a bright, clean, low maintenance and functional shopping environment to customers interested in purchasing quality men's, women's and children's value priced footwear and related accessories. The Company's stores are strategically located in strip malls, outlet centers and downtown locations, frequently in close proximity to other off-price apparel retailers that attract similar customers. Shoe Pavilion stores average approximately 8,500 square feet ranging in size from 2,500 to 24,000 square feet. In 2004, the Company opened six stores and closed five. In 2003 the Company opened four stores and closed seven stores and in 2002 the Company opened 10 stores and closed five. The Company closed all 40 of its licensed shoe departments in 2002, including two it had opened in 2002. During 2005, the Company intends to open nine to twelve new stores, primarily in California, Arizona and Nevada.

The Company was incorporated in Delaware in November 1997 and is the successor to Shoe Pavilion Corporation (formerly Shoe Inn, Inc.), which was incorporated in Washington in 1983. The Company's executive offices are located at 1380 Fitzgerald Drive, Pinole, California 94564. The telephone number is (510) 222-4405 and the Company's internet website address is www.shoepavilion.com.

Table of Contents

Operating Strategy

The Company's objective is to be the leading off-price retailer of designer label and name brand footwear in each of the markets it serves. The operating strategy is designed to allow the Company to offer its customers quality footwear typically at 20% to 60% below department store prices for the same shoes. The key elements of the Company's operating strategy are:

Off-Price Concept, Premium Name Brands. The Company differentiates itself from other off-price retailers and deep discount chains by focusing on higher price point merchandise, extending the off-price concept into the designer and name brand footwear market. As a result, the Company generally does not compete with other discount stores in obtaining most of its merchandise. Similarly, while some department store and brand name retail chains operate discount outlets, such operations generally obtain merchandise from the existing inventory of their retail affiliates rather than from external sources. Some of the Company's most successful stores have benefited from the heightened consumer awareness and preference to shop at discount malls or outlet centers, both of which typically include other off-price retailers.

Broad Selection of Designer Footwear. The Company offers a broad selection of quality footwear from over 75 name brands. The availability and wide variety of premium brand names distinguish Shoe Pavilion and serve to attract first time buyers and consumers who otherwise might shop at more expensive department stores. The wide variety of brand names also enables the Company to tailor its merchandise from store to store to accommodate consumer preferences that may vary by location.

Selective Bulk Purchases; Diverse Vendor Network. The Company is able to offer lower prices by selectively purchasing at significant discounts large blocks of over-runs, over-orders, mid- and late-season deliveries and last season's stock from over 100 domestic and international vendors, independent resellers and manufacturers. The diversity and scope of its vendor network help to provide a constant source of quality merchandise, and the purchase of name brand, traditional styles helps to mitigate the likelihood of inventory writedowns. To augment available merchandise with the latest in-season styles, the Company purchases branded design footwear directly from factories in Italy and China.

Self-Service Stores. The Company believes that its self-service format reinforces its off-price strategy and appeals to value-oriented consumers. The Company's format allows inventory to be stored directly under a displayed shoe, thereby eliminating the need for a stockroom and significantly increasing retail floor space. The functionality and simplicity of this format enable flexible store layouts that can be easily rearranged to complement the current merchandise. Moreover, this format allows customers to locate all available sizes of a particular shoe and to try them on for comfort and fit without a salesperson's assistance, thereby reducing in-store staffing needs and allowing customers to make independent purchasing decisions.

Growth Strategy

Since opening its first store in 1979 in Washington, the Company has expanded to 86 stores, including its internet store. The Company intends to continue to expand by (i) opening new stores; and (ii) increasing comparable store sales.

Open New Stores. The Company intends to increase its presence in its current markets and to enter new markets by selectively opening new stores, which can be served by the Company's business support infrastructure. Management believes that new store openings in the Company's current markets will further increase name recognition, which, in turn, will facilitate expansion into new markets. When entering a new market, the Company prefers to open multiple stores, thereby creating an immediate market presence and enabling television advertising costs to be spread economically across a number of stores.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Increase Comparable Store Sales. During the past several years, comparable store sales have been subject to wide fluctuations. Comparable store sales increased 3.9% in 2004 and decreased 3.9%, in 2003 and 1.0% in

Table of Contents

2002. In an effort to improve comparable store sales performance, management focused on refining its sales efforts, including merchandise selection, advertising and promotions. In addition; in late 2002 the Company expanded its product line to include children's shoes and handbags and in 2004 the Company expanded its product line to include accessories.

The Company's ability to execute its operating and growth strategy is subject to numerous risks and uncertainties. Also, certain events, such as local economic downturns, are beyond the control of management. Consequently, there can be no assurance that the Company will be successful in implementing its strategy or that its strategy, even if implemented, will result in the achievement of the Company's objectives.

The following table sets forth store openings and closings during the past three years:

	2004	2003	2002
	—	—	—
Retail stores:			
Stores open at beginning of period	85	88	83
Opened during period	6	4	10
Closed during period	5	7	5
	—	—	—
Open at end of period	86	85	88
Licensed shoe departments:			
Open at beginning of period			38
Opened during period			2
Closed during period			40
	—	—	—
Open at end of period			
Total open at end of period	86	85	88

Merchandising

Unlike deep-discount retailers, Shoe Pavilion offers high quality merchandise and a consistent selection of name brand dress and casual shoes and related accessories for men, women and children. List prices generally range between \$19.99 and \$59.99 for women's shoes, between \$39.99 and \$99.99 for men's shoes and between \$19.99 and \$34.99 for children's shoes.

Site Selection, Opening Costs and Leases

The Company uses a broker on the West Coast to identify potential retail sites. Prior to opening a new store, management reviews detailed reports on demographics; spending, traffic and consumption patterns; and other site and market related data. As of January 1, 2005, 43 of the Company's stores were located in strip malls, 11 were located in outlet centers, 10 were located in regional malls, 11 were located in free standing stores and 10 were located in other types of facilities primarily downtown locations. The Company also operates an online store at Shoe Pavilion.com.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Opening costs for stores are typically minimal, excluding the initial stocking of inventory. The Company estimates that its total capital requirements to open a typical new store average \$574,000, consisting of approximately \$510,000 for inventory and \$64,000 for fixtures and equipment, excluding leasehold improvements which are frequently paid for by the landlord allowances. Costs vary from store to store depending on, among other things, the location, size, property condition, and the tenant improvement package offered by the landlord. The Company does not own any of its real estate.

Table of Contents

Sourcing and Purchasing

Vendors. During 2004, the Company purchased its inventory from over 100 domestic and international vendors and independent resellers who over bought merchandise. In 2004, the Company's top ten suppliers accounted for approximately 44% of its inventory purchases. No vendor accounted for more than 10% of total inventory purchases in 2004. The Company purchases from its suppliers on an order-by-order basis and has no long-term purchase contracts or other contractual assurances of continued supply or pricing. Since the Company has stores in a number of markets along the West Coast, Shoe Pavilion can accommodate and distribute a wide variety of merchandise that meets the needs of customers in different geographic areas. Management believes that the strength and variety of its supplier network mitigates much of the Company's exposure to inventory supply risks. See Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Affecting Financial Performance Inventory and Sourcing Risk.

Direct Sourcing. The Company purchases in-season name brand and branded design merchandise directly from factories in Italy and China. These purchases include both branded and non-branded goods and provide a consistent source of in-season merchandise. The Company purchases from its manufacturing sources on an order-by-order basis and has no long-term purchase contracts or other contractual assurances of continued supply or pricing provisions. See Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Affecting Financial Performance International Purchasing.

Advertising

Shoe Pavilion spends a substantial portion of its advertising budget on television advertisement. In 2004 the Company spent 5.0% of its net sales on advertising or \$4.3 million. In 2003 the Company spent 6.1% of its net sales on advertising or \$5.1 million. In 2002 the Company spent 4.1% of its net sales on advertising or \$3.5 million. The Company believes that advertising costs for a particular market will be more effectively and economically leveraged as the number of stores increases in that market. The Company occasionally uses print advertising, usually at the time of a new store opening; however, it has found print advertising to be less effective than television advertising. Over the years the Company has found that television is the best way to promote its business in a common viewing market. Shoe Pavilion's signage is consistent at all of its locations, with highly visible signage at the front and, when appropriate, rear of the store.

Merchandise Distribution

In February 2002 the Company engaged an unrelated third party to provide its warehousing and distribution services. The warehousing and distribution are primarily conducted in a facility located in Chino, California.

Information Systems

During 1999, the Company completed the installation of its information systems on an enterprise-wide basis, including all critical areas of corporate office, network infrastructure and point of sale (POS). This fully integrated system, uses an IBM AS 400 that is reliable and scalable, allowing simple upgrades of processing power as the business grows. In addition, the corporate network infrastructure was upgraded to a Windows NT environment with standardized workstations and a common set of desktop applications that may be used throughout the Company. This system provides a stable networking environment as well as a foundation for future expansion.

Competition

The retail footwear market is highly competitive, and the Company expects the level of competition to increase. The Company competes with off-price and discount retailers (e.g., Nordstrom Rack, Payless ShoeSource, Ross Dress for Less and Famous Footwear), branded retail outlets (e.g., Nine West), national retail

Table of Contents

stores (e.g., DSW Shoe Warehouse, Nordstrom, Marshalls, Macy's, Sears, J.C. Penney, Loehmann's, Robinsons-May and Mervyn's), traditional shoe stores and mass merchants. Many of these competitors have stores in the markets in which the Company now operates and in which it plans to expand. Additionally, many of the competitors are larger and have more resources than the Company.

Seasonality

Historically, net sales and net income have been weakest during the first quarter. The Company's quarterly results of operations may also fluctuate significantly as a result of a variety of factors, including timing of new store openings, the level of net sales contributed by new stores, merchandise mix, the timing and level of price markdowns, availability of inventory, store closures, advertising costs, competitive pressures and changes in the demand for off-price footwear.

Employees

As of January 1, 2005, the Company had approximately 310 full-time employees and 280 part-time employees. The number of part-time employees fluctuates depending upon seasonal needs. None of the employees are represented by a labor union.

Executive Officers

Certain information regarding the executive officers of the Company is set forth below:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Dmitry Beinus	52	Chairman of the Board, President and Chief Executive Officer
Robert R. Hall	52	Vice President and Chief Operating Officer
John D. Hellmann	55	Vice President of Finance, Chief Financial Officer and Secretary

Dmitry Beinus has served as Chairman of the Board, President and Chief Executive Officer of the Company since founding the Company in 1979. From 1976 to 1978, Mr. Beinus was employed in the shoe department of Nordstrom, Inc.

Robert R. Hall has served as Vice President and Chief Operating Officer of the Company since January 1997. Mr. Hall joined the Company as a Regional Manager in 1990, and has held various positions within the Company including Operations Manager and Vice President of Merchandising.

John D. Hellmann has served as Vice President of Finance and Chief Financial Officer of the Company since June 2000. From September 1995 until June 2000, Mr. Hellmann served as Vice President and Chief Financial Officer of The Lamaur Corporation, a manufacturer and wholesaler of hair care products.

The Company's executive officers serve at the discretion of the Board of Directors. There is no family relationship between any of the Company's executive officers or between any executive officer and any of the Company's directors.

Item 2. Properties

As of January 1, 2005 the Company's corporate offices were located in a 5,000 square foot facility in Pinole, California. As of January 1, 2005 the Company's 85 stores, excluding its internet store, occupied an aggregate of approximately 722,000 square feet of space. The average store size is approximately 8,500 square feet. The Company leases all of its stores, with leases expiring between 2005 and 2016. The Company has options to renew most of its leases.

Table of Contents**Store Locations**

As of January 1, 2005, the Company operated 85 retail stores in the states of California, Washington, Oregon and Arizona. The Company also operates an internet store. The license agreement with Gordmans expired in June 2002 at which time the Company discontinued operating all 40 of the licensed shoe departments. The number of stores including the Company's internet store in each geographic area is set forth below:

<u>Location</u>	<u>Stores at Year End</u>

Item 3. Legal Proceedings

On March 5, 2002, the Company was sued in Los Angeles County Superior Court by one of its store managers who asserted that he and all other store managers in California were improperly classified as exempt employees under California's wage and hour laws and therefore they were entitled to overtime wages. An amended complaint seeking class action status on behalf of all store managers in California was subsequently filed with the court. The Company denied the plaintiff's claims and filed an answer challenging class certification. In December 2003, the Company entered into a settlement agreement of the lawsuit. Under the terms of the agreement the Company paid store managers a stipulated cash settlement based upon the number of weeks worked for the period from April 1, 1998 through December 31, 2003. During the fourth quarter ended January 3, 2004, the Company recorded a reserve of approximately \$1.0 million for the costs associated with the lawsuit settlement. The Company reduced this reserve by approximately \$258,000 during the third quarter ended October 2, 2004. The Company has

Edgar Filing: SHOE PAVILION INC - Form 10-K

made substantially all payments required to be made under the settlement agreement as of January 1, 2005.

The Company is also party to various legal proceedings arising from normal business activities. Management believes that while it is reasonably possible that some of these matters will result in settlements to be paid by the Company, the ultimate resolution of these matters will not have a material adverse impact on the Company's financial statements.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Table of Contents**PART II****Item 5. Market for the Registrant's Common Equity and Related Stockholder Matters**

The common stock of the Company is traded on the Nasdaq SmallCap Market[®] under the symbol SHOE. The following table sets forth, for the periods indicated, the highest and lowest closing sale prices for the common stock, as reported by the Nasdaq Stock Market[®].

	<u>High</u>	<u>Low</u>
2004

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The statements contained in this Form 10-K which are not historical facts are forward-looking statements that are subject to future risks and uncertainties. Consequently, the Company's actual results could differ materially from those set forth in or implied by forward-looking statements. Factors that could cause or contribute to such differences include those discussed in the Company's filings with the Securities and Exchange Commission, including, without limitation, the factors discussed in this Form 10-K under the captions "Factors Affecting Financial Performance" and "Liquidity and Capital Resources," as well as those discussed elsewhere in this Form 10-K.

Overview

Shoe Pavilion is an independent off-price footwear retailer on the West Coast that offers a broad selection of women's, men's and children's designer label and name brand merchandise. The Company operated 85 retail stores in California, Washington, Oregon and Arizona under the trade name Shoe Pavilion as of January 1, 2005 and 84 retail stores as of January 3, 2004. The Company also operates an internet store for online purchases of footwear.

In July 1999, the Company entered into a licensing agreement to operate the shoe departments of Gordmans, Inc. (formerly Richman Gordman ½ Price Stores, Inc.) department stores located in the Midwest. The license agreement expired in June 2002 at which time the Company discontinued operating all 40 of the licensed shoe departments in Gordmans department stores.

Shoe Pavilion opened six retail stores and closed five in 2004. In 2003 the Company opened four retail stores and closed seven and in 2002 the Company opened 10 stores and closed five. The Company closed 40 licensed shoe departments in 2002, including two it had opened in 2002. During 2005, the Company intends to open nine to twelve new stores, primarily in California, Arizona and Nevada.

The Company expects that the primary source of future sales growth will be new store openings and to a lesser extent from an improvement in comparable store sales. Although comparable store sales have fluctuated the past several years, the Company believes it can achieve an improvement in comparable store sales by focusing on refining its sales efforts, including merchandise selection, advertising and promotions. In late 2002 the Company expanded its product line to include children's shoes and handbags. In 2004 the Company expanded its product line to include athletic accessories. The addition of these categories contributed to the increase in comparable store sales in 2004. The Company defines comparable stores as those stores that have been open for at least 14 consecutive months. Stores open less than 14 consecutive months are treated as new stores, and stores closed during the period are excluded from comparable store sales. The Company's comparable store net sales increased 3.9% in 2004 and decreased 3.9% in 2003 and 1.0% in 2002. Net sales in 2003 and 2002 were negatively impacted because as of June 2002 the Company no longer operated the 40 licensed shoe departments. Net sales generated from the licensed shoe departments were \$5.0 million for the year ended December 28, 2002. In addition, these stores generated a store operating contribution before overhead, distribution costs, interest and taxes of approximately \$.7 million for the year ended December 28, 2002. The Company does not allocate overhead, distribution costs, interest or taxes to stores. The majority of the overhead costs, which consist of costs such as merchandising, accounting, information systems, rent and insurance, are shared expenses of the Shoe Pavilion stores and previously the licensed shoe departments.

The Company seeks to acquire footwear merchandise on favorable financing terms and in quantities large enough to support future growth. This strategy causes an increase in inventory levels at various times throughout the year. As a result, similar to other off-price retailers, the Company's inventory turnover rates are typically less than full-price retailers.

Table of Contents

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the appropriate application of certain accounting policies, many of which require management to make estimates and assumptions about future events and their impact on amounts reported in the Company's financial statements and related notes. Since future events and their impact cannot be determined with certainty, the actual results will inevitably differ from the Company's estimates. Such differences could be material to the financial statements.

Management believes that the Company's application of accounting policies, and the estimates inherently required therein, are reasonable. These accounting policies and estimates are constantly reevaluated, and adjustments are made when facts and circumstances dictate a change. Historically, management has found the Company's application of accounting policies to be appropriate, and actual results have not differed materially from those determined using necessary estimates.

The Company's accounting policies are more fully described in Note 2 to the financial statements, located elsewhere in this Form 10-K. The Company has identified certain critical accounting policies which are described below.

Merchandise inventory. Merchandise inventory is carried at the lower of average cost or market. The Company adjusts inventory based on historical experience and current information in order to assess that inventory is recorded properly at the lower of cost or market. The factors considered include, current sell through, seasonality and length of time held in inventory. The amount ultimately realized from the sale of inventory could differ materially from the Company's estimate.

Fixed assets. In evaluating the fair value and future benefits of fixed assets, the Company performs an analysis of the anticipated undiscounted future net cash flows of the related fixed assets and reduces their carrying value by the excess, if any, of the result of such calculation. The Company believes at this time that the fixed assets' carrying values and useful lives continue to be appropriate.

Accrued workers' compensation. In December 2002, the Company modified its workers' compensation insurance policy to a high deductible insurance program with an overall program ceiling to minimize exposure. The Company began recording an estimated liability for the self-insured portion of the workers' compensation claims. The liability as of January 1, 2005 was \$192,000 and is determined based on information received from our insurance carrier including claims paid, filed and reserved for, as well as using historical experience. Should a greater amount of claims occur compared to what is estimated or the settlement costs increase beyond what was anticipated, the recorded liability may not be sufficient.

Income taxes. A valuation allowance is provided when it is more likely than not that some or a portion or all of the deferred tax asset will not be realized. Based upon its history of earnings the Company believes that the realization of its deferred tax asset is more likely than not and therefore has not provided a valuation allowance for its deferred tax asset.

Table of Contents

The accompanying management's discussion and analysis of financial condition and results of operations gives effect to the restatement discussed in Note 8 of the accompanying consolidated financial statements.

Results of Operations

The following table sets forth, for the periods indicated, the relative percentages that certain income and expense items bear to net sales:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Net sales	100.0%	100.0%	100.0%
Gross profit	34.9	28.4	31.3
Selling expenses	22.5	24.1	21.9
General and administrative expenses	8.1	9.8	9.3
Income (loss) from operations	4.3	(5.5)	0.1
Interest and other expenses, net	(0.4)	(0.4)	(0.2)
Income (loss) before income taxes	3.9	(5.9)	(0.1)
Income tax benefit (expense)	(1.5)	2.4	0.1
Net income (loss)	2.4%	(3.5)%	0.0%

2004 Compared with 2003

Net Sales. Net sales for the 52 weeks ended January 1, 2005 increased 2.6% to \$85.8 million compared to \$83.6 million for the 53 weeks ended January 3, 2004. The fiscal year ended January 3, 2004 had one additional week. Sales for this additional week were approximately \$1.5 million. Excluding this one additional week in fiscal 2003, the increase in net sales in 2004 would be 4.5%. This increase in net sales in 2004 is primarily due to the 3.9% increase in comparable store net sales and sales generated from six stores opened in 2004 (net of five closed).

The increase in comparable store sales was primarily driven by the increase in the women's category and to a lesser degree from the children's category which was added to the Company's product line in late 2002 and other accessories added to the product line in 2004. These increases were partially offset by the decrease in comparable store sales in the men's category.

Gross Profit. Cost of sales includes landed merchandise and occupancy costs. Gross profit for 2004 increased 26.4% to \$29.9 million from \$23.7 million in 2003. Gross profit as a percentage of net sales for 2004 increased to 34.9% compared to 28.4% for 2003. As a percentage of net sales the merchandising gross profit increased 6.4% while the occupancy costs as a percentage of net sales remained relatively unchanged. The increase in gross profit as a percentage of net sales is due in part to a higher average selling price and to a lesser degree a lower average unit cost.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Selling Expenses. Selling expenses in 2004 decreased by \$.9 million or 4.4% to \$19.3 million from \$20.2 million in 2003. As a percentage of net sales selling expenses were 22.5% compared with 24.1% in 2003. The decrease in selling expenses is primarily attributable to the reduction in advertising and worker s compensation costs.

Advertising cost decreased by \$.9 million in 2004. Advertising as a percentage of net sales decreased to 5.0% in 2004 compared to 6.1% in 2003. In the third quarter of 2003 the Company increased advertising. The decrease in advertising is primarily attributable to the reduction in advertising in the third quarter of 2004 compared to 2003. Although the Company believes that the higher amount spent on advertising in the third quarter of 2003 did contribute to the increase in comparable store net sales in the third quarter of 2003, the increase was below the Company s expectations. Because the expanded advertising did not produce the expected results in the third quarter of 2003, the Company reduced its advertising in the third quarter of 2004 as it continues to focus on profitability.

Table of Contents

General and Administrative Expenses. General and administrative expenses consist primarily of corporate and administrative expenses, including payroll, store utilities, warehousing costs, professional fees and insurance. General and administrative expenses decreased by \$1.3 million or 15.1% to \$6.9 million in 2004 from \$8.2 million in 2003. In 2003 the Company recorded a reserve of \$1.0 million for costs associated with the settlement of a wage and hour lawsuit. In the third quarter of 2004 the Company reduced this reserve by approximately \$258,000, as a result of final approval of the settlement by the court.

The recording of the \$1.0 million reserve in 2003 and the \$258,000 reduction of this reserve in 2004 are the principal reasons for the \$1.3 million decrease in general and administrative expenses in 2004 compared to 2003.

2003 Compared with 2002

Net Sales. Net sales for the 53 weeks ended January 3, 2004 were \$83.6 million, relatively unchanged compared to net sales of \$83.8 million for the 52 weeks ended December 28, 2002. The year ended January 3, 2004 had one additional week. Sales for the additional week in 2003 were approximately \$1.5 million. Excluding the additional week in 2003, sales would have declined approximately \$1.7 million or 2.0%. This decline in net sales was principally due to the discontinuation of the licensed shoe departments operations in June 2002 and to the 3.9% decrease in comparable store net sales. The effect of the loss of the Gordman's sales was partially offset by the effect of a full year of sales of nine retail stores opened in 2002 (net of five closed). Net sales from the Gordman's licensed shoe departments in 2002 were \$5.0 million. The decline in the comparable store sales of \$2.8 million was in part due to the impact of the conflict in Iraq primarily in the first and second quarter of 2003, as well as the weak California economy coupled with increased competition.

The Company increased its advertising expenditures in the third quarter of 2003 in an effort to increase sales. The Company's comparable store net sales increased 4.7% during the third quarter, but these increases were below the Company's expectations. In addition, in an effort to increase comparable store sales the Company also expanded its product line in late 2002 to include children's shoes and handbags.

Gross Profit. Cost of sales includes landed merchandise and occupancy costs and for 2002 the license fee paid to Gordmans for the licensed shoe departments. Gross profit as a percentage of net sales decreased to 28.4% in 2003 from 31.3% in 2002. The decrease in gross profit as a percentage of net sales was primarily due to higher occupancy costs as a percentage of net sales as well as higher merchandise cost as a percentage of net sales.

The increase in occupancy costs as a percentage of net sales is primarily attributable to the higher occupancy costs for stores opened in 2002 and 2003 and from the negative occupancy leverage. The negative occupancy leverage was the result of the decrease in comparable store net sales in 2003. The increase in merchandise cost as a percentage of net sales was due in part to more markdowns taken in 2003 to promote sales.

Selling Expenses. Selling expenses in 2003 increased by \$1.8 million or 9.8% to \$20.2 million from \$18.4 million in 2002. As a percentage of net sales, selling expenses were 24.1% in 2003 compared to 21.9% in 2002. The increase in selling expenses was primarily attributable to a \$1.7 million increase in advertising. Advertising as a percentage of net sales increased to 6.1% in 2003 from 4.1% in 2002. In the third quarter ended September 27, 2003 the Company increased advertising spending in an effort to increase sales. Comparable store net sales did increase 4.7% during the third quarter of 2003, although the increase was below the Company's expectations.

Edgar Filing: SHOE PAVILION INC - Form 10-K

General and Administrative Expenses. General and administrative expenses consist primarily of corporate and administrative expenses, including payroll, store utilities, warehousing costs, professional fees and insurance. General and administrative expenses increased by \$.4 million or 4.7% to \$8.2 million in 2003 from \$7.8 million in 2002. The increase in general and administrative expenses in 2003 is primarily attributable to the \$1.0 million reserve recorded in 2003 for costs associated with the settlement of a wage and hour lawsuit and an increase in general insurance costs. These increases were partially offset by a reduction in legal fees and costs of approximately \$.6 million in 2003. During the second quarter ended June 29, 2002, the Company incurred legal

Table of Contents

fees and costs of approximately \$.5 million as part of a settlement of a class action lawsuit filed against the Company.

Income Tax Benefit. The effective tax rate benefit for 2003 was 40.4%. In 2002 the Company's effective tax rate benefit was 64.7%. The effective tax rate benefit change in 2002 was primarily due to the utilization of certain tax credits in 2002.

Inflation

The Company does not believe that inflation has had a material impact on its results of operations during the past three years. There can be no assurance, however, that inflation will not have such an effect in future periods.

Liquidity and Capital Resources

In 2004 and 2002 the Company satisfied its cash requirements by borrowings under the Company's credit facility as compared to 2003 when the Company satisfied its cash requirements through cash flows generated from operations. Net cash provided (used) by operating activities was (\$148,000), \$4.9 million and (\$3.1) million for 2004, 2003 and 2002, respectively. Cash provided from operating activities in 2003 was primarily generated from a \$6.7 million reduction in inventory. The reduction in inventory in 2003 was in part due to the discontinuation of the 40 licensed shoe departments and the reduction in inventory maintained at the Company's outside warehouse. The Company reduced inventory in its outside warehouse in order to improve the Company's liquidity.

Working capital increased to \$19.1 million at January 1, 2005 from \$16.6 million at January 3, 2004. This increase in working capital was primarily due to the increase in inventory in 2004. The increase in inventory in 2004 is due in part to the opening of six stores in 2004, the addition of accessories to the Company's product categories and inventory for planned store openings.

Capital expenditures were \$1.2 million, \$1.0 million and \$1.1 million for 2004, 2003 and 2002, respectively. In 2004 capital expenditures were primarily for leasehold improvements and fixtures for the six stores the Company opened. In 2003 capital expenditures of \$.3 million were for the remodel of four stores, \$.4 million were for leasehold improvements, fixtures and equipment for four new stores and \$.2 million were for leasehold improvements for the build out of the new corporate office. Expenditures for 2002 were primarily for the build out of nine new stores and fixtures for two new licensed shoe departments.

The Company estimates that capital expenditures for 2005 will be approximately \$1.2 million, net of lease incentives. The actual amount of capital expenditures will depend in part upon the number of stores opened in 2005 and the lease incentives received from landlords. The number of stores ultimately opened is in part dependent upon the availability of desirable locations and management's ability to negotiate acceptable lease terms.

Financing activities provided (used) cash of \$1.5 million, (\$3.7) million and \$3.9 million in 2004, 2003 and 2002, respectively. The cash provided by financing activities in 2004 and 2002 relates to the net increase in borrowings under the Company's credit facility. The cash used by financing activities in 2003 relate to the paydown on the Company's credit facility primarily driven by the reduction of inventory by \$6.7 million

in 2003.

In April 2003, the Company entered into a credit facility agreement with Wells Fargo Retail Finance, LLC. The facility expires on April 18, 2006 and provides financing for up to \$20.0 million, including a \$5.0 million sublimit for the issuance of letters of credit. Borrowings under the facility are based upon a percentage of eligible inventory less certain reserves. Borrowings are secured by inventory, equipment, general intangibles and other rights to payments. The agreement prohibits the payment of cash dividends and contains various restrictive covenants, including a limitation on the amount of capital expenditures and the number of stores the Company may open and close during any fiscal year.

Table of Contents

Interest on borrowings is at prime plus up to .25% or Libor plus 1.75% to 2.25%, depending on the amount the Company has available for advances under the line of credit. The average interest rate on outstanding borrowings at January 1, 2005 was 4.1%. As of January 1, 2005 approximately \$10.2 million was available for advances under the facility. As of January 1, 2005 the Company was in compliance with its loan covenants.

Although the credit facility expires in April 2006 and the Company has the intent and ability to maintain this debt outstanding far more than one year, the Company has classified its borrowings under the facility as a current liability in accordance with the provisions set forth in Emerging Issues Task Force (EITF) Issue 95-22 Balance Sheet Classifications, Borrowings Outstanding Under Revolving Credit Agreements that include both a Subjective Acceleration Clause and a Lock-Box Arrangement.

The Company expects that anticipated cash flows from operations and available borrowings under the Company's credit facility will satisfy its cash requirements for at least the next 12 months. The Company's capital requirements may vary significantly from anticipated needs, depending upon such factors as operating results and the number and timing of new store openings.

The following summarizes the Company's significant contractual cash obligations as of January 1, 2005 (\$ in thousands):

Contractual Obligations	Payment due by period				
	Total	Less than 1 year	1-3 years	4-5 years	More than 5 years
Operating leases	\$ 58,848	\$ 12,324	\$ 22,516	\$ 13,085	\$ 10,923
Credit facility (1)	6,612	6,612			
Documentary and stand-by letters of credit	893	393	500		
Purchase obligations for inventory	12,860	12,860			
Service contracts (2)	166	166			
Total contractual obligations	\$ 79,379	\$ 32,355	\$ 23,016	\$ 13,085	\$ 10,923

- (1) Represents outstanding borrowings under the Company's credit facility as of January 1, 2005. Such amounts are not expected to be required to be repaid until April 18, 2006, the end of the commitment for the facility.
- (2) Service contracts relate to annual maintenance and software support on the Company's computer system.

Recently Issued Accounting Standards

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123 (Revised 2004), *Share-Based Payment*, which requires that the compensation cost relating to share-based payment transactions be recognized in financial statements based on alternative fair value models. The share-based compensation cost will be measured based on the fair value of the equity or liability instruments issued. The Company currently discloses pro forma compensation expense quarterly and annually (See Note 2). Upon adoption, the pro forma disclosures previously permitted under SFAS No. 123 will no longer be an alternative to financial statement recognition. The provisions of SFAS No. 123R are effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. The Company is currently evaluating the method of adoption and the effect that the adoption of SFAS No. 123R will have on its financial position and results of operations.

Edgar Filing: SHOE PAVILION INC - Form 10-K

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets, an amendment of APB No. 29, Accounting for Nonmonetary Transactions*. SFAS No. 153 requires exchanges of productive assets to be accounted for at fair value, rather than at carryover basis, unless (1) neither the asset received nor the asset surrendered has a fair value that is determinable within reasonable limits or (2) the transactions lack commercial substance. SFAS No. 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The Company does not expect the adoption of this standard to have a material effect on its financial position, results of operations or cash flows.

Table of Contents

In November 2004, the FASB issued SFAS No. 151, *Inventory Costs - an amendment of ARB No. 43, Chapter 4*. SFAS No. 151 amends the guidance in ARB No. 43 to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). SFAS No. 151 requires that these costs be recognized as current period charges regardless of whether they are abnormal. In addition, SFAS No. 151 requires that allocation of fixed production overheads to the costs of manufacturing be based on the normal capacity of the production facilities. The provisions of SFAS No. 151 are effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company does not expect adoption of this standard to have a material impact on its financial position or results of operations or cash flows.

Factors Affecting Financial Performance

In addition to the other information in this Form 10-K, the following factors should be considered carefully in evaluating an investment in the shares of common stock of the Company. The statements contained in this Form 10-K which are not historical facts are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those set forth in or implied by forward-looking statements. Factors that could cause or contribute to such differences include those discussed below, as well as those discussed elsewhere in this Form 10-K.

Risks Associated with Expansion

The Company's continued growth will depend to a significant degree on its ability to expand its operations through the opening of new stores and to operate these stores on a profitable basis. The success of the Company's planned expansion will be significantly dependent upon the Company's ability to locate suitable store sites and negotiate acceptable lease terms. In addition, several other factors could affect the Company's ability to expand, including the adequacy of the Company's capital resources, the ability to hire, train and integrate employees and the ability to adapt the Company's operational systems. There can be no assurance that the Company will achieve its planned expansion or that any such expansion will be profitable. In addition, there can be no assurance that the Company's expansion within its existing markets will not adversely affect the financial performance of the Company's existing stores or its overall operating results, or that new stores will achieve net sales and profitability levels consistent with existing stores. As part of its expansion planning the Company regularly evaluates the adequacy of its existing systems and procedures, including the product distribution facility, store management, financial controls and management information systems. However, there can be no assurance that the Company will anticipate all of the changing demands that expanded operations may impose on such systems. Failure to adapt its internal systems or procedures as required could have a material adverse effect on the Company's business, financial condition and results of operations.

The Company actively monitors individual store performance and has closed underperforming stores in the past. The Company intends to continue to close underperforming stores in the future, and if it were to close a number of stores, it could incur significant closing costs and reductions in net sales. In certain instances, the Company may be unable to close an underperforming store on a timely basis because of lease terms. A significant increase in closure costs or the inability to close one or more underperforming stores on a timely basis could have a material adverse effect on the Company's business, financial condition and results of operations.

Fluctuations in Comparable Store Sales

Historically, the Company's comparable store sales have fluctuated widely. Although the Company is endeavoring to achieve consistent growth in comparable store sales, there can be no assurance that the Company will not continue to experience volatility in comparable store sales. The Company defines comparable stores as those stores that have been open for at least 14 consecutive months. Stores open less than 14 consecutive

Edgar Filing: SHOE PAVILION INC - Form 10-K

months are treated as new stores, and stores closed during the period are excluded from comparable store sales. The Company's comparable store sales increased 3.9% in 2004 and decreased 3.9% and 1.0% in 2003 and 2002, respectively.

Table of Contents

Inventory and Sourcing Risk

The Company's future success will be significantly dependent on its ability to obtain merchandise that consumers want to buy, particularly name brand merchandise with long-term retail appeal, and to acquire such merchandise under favorable terms and conditions. In 2004, the Company's top ten suppliers accounted for approximately 44% of its inventory purchases. The deterioration of the Company's relationship with any key vendor or vendors could result in delivery delays, merchandise shortages or less favorable terms than the Company currently enjoys. The Company deals with its suppliers on an order-by-order basis and has no long-term purchase contracts or other contractual assurances of continued supply or pricing. As the Company's operations expand, its demand for off-price inventory will continue to increase. The Company's footwear purchases typically involve manufacturing over-runs, over-orders, mid- or late-season deliveries or last season's stock. The inability of the Company to obtain a sufficient supply of readily salable, high margin inventory, to negotiate favorable discount and payment agreements with its suppliers or to sell large inventory purchases without markdowns could have a material adverse effect on the Company's business, financial condition and results of operations. See Item 1 Business Sourcing and Purchasing.

Reliance on Key Personnel

The Company's future success will be dependent, to a significant extent, on the efforts and abilities of its executive officers. The loss of the services of any one of the Company's executive officers could have a material adverse effect on the Company's operating results. In addition, the Company's continued growth will depend, in part, on its ability to attract, motivate and retain skilled managerial and merchandising personnel. There can be no assurance that the Company will be able to retain a substantial percentage of its existing personnel or attract additional qualified personnel in the future.

Seasonality and Quarterly Fluctuations

The Company has experienced, and expects to continue to experience, seasonal fluctuations in its net sales and net income. Historically, net sales and net income have been weakest during the first quarter. The Company's quarterly results of operations may also fluctuate significantly as a result of a variety of factors, including timing of new store openings, the level of net sales contributed by new stores, merchandise mix, the timing and level of price markdowns, availability of inventory, store closures, advertising costs, the success of advertising campaigns competitive pressures and changes in the demand for off-price footwear.

Dependence on Consumer Spending and Preferences

The success of the Company's operations depends upon a number of general economic factors relating to consumer spending, including employment levels, business conditions, interest rates, inflation and taxation. There can be no assurance that consumer spending will not decline in response to economic conditions, thereby adversely affecting the Company's operating results.

All of the Company's products are subject to changing consumer preferences. Consumer preferences could shift to types of footwear other than those that the Company currently offers. Any such shift could have a material adverse effect on the Company's operating results. The Company's future success will depend, in part, on its ability to anticipate and respond to changes in consumer preferences, and there can be no assurance that the Company will be able to effectively anticipate or respond to such changes on a timely basis or at all. Failure to anticipate and respond to changing consumer preferences could lead to, among other things, lower net sales, excess inventory and lower gross margins, any of which

could have a material adverse effect on the Company's business, financial condition and results of operations.

Table of Contents

The Company has One Distribution Center

Most of the inventory purchased by the Company is shipped directly from suppliers to a single centralized distribution center in Chino, California, where the inventory is then processed, sorted and shipped to the Company's stores. Because a substantial portion of the inventory first goes through the Chino distribution center, any disruption at this site could negatively impact the Company's receiving and distribution process. Although the Company maintains business interruption and property insurance there can be no assurance that the insurance would be sufficient or that any insurance proceeds would be timely paid out to the Company.

International Purchasing

The Company purchases in-season name brand and branded-design merchandise directly from factories in Italy and China. The Company has no long-term contracts with direct manufacturing sources and competes with other companies for production facilities. All of the manufacturers with which the Company conducts business are located outside of the United States, and the Company is subject to the risks generally associated with an import business, including foreign currency fluctuations, unexpected changes in foreign regulatory requirements, disruptions or delays in shipments and the risks associated with United States import laws and regulations, including quotas, duties, taxes, tariffs and other restrictions. There can be no assurance that the foregoing factors will not disrupt the Company's supply of directly-sourced goods or otherwise adversely impact the Company's business, financial condition and results of operations in the future. See Item 1 Business Sourcing and Purchasing.

Inventory Shrinkage

The retail industry is subject to theft by customers and employees. Because the Company uses a self-service format, where shoppers have access to both shoes of a pair, the Company must maintain substantial store security. Although the Company has implemented enhanced security procedures, there can be no assurance that the Company will not suffer from significant inventory shrinkage in the future, which could have a material adverse effect on the Company's business, financial condition and results of operations.

Competition

The retail footwear market is highly competitive, and the Company expects the level of competition to increase. The Company competes with off-price and discount retailers (e.g., Nordstrom Rack, Payless ShoeSource, Ross, Dress for Less and Famous Footwear), branded retail outlets (e.g., Nine West), national retail stores (e.g., DSW Shoe Warehouse, Nordstrom, Marshalls, Macy's, Sears, J.C. Penney, Loehmann's, Robinsons-May and Mervyn's), traditional shoe stores and mass merchants. Many of these competitors have stores in the markets in which the Company now operates and in which it plans to expand. Many of the Company's competitors have significantly greater financial, marketing and other resources than the Company. In addition, there can be no assurance that in the future new participants will not enter the off-price segment of the footwear market. Competitive pressures resulting from competitors' pricing policies could materially adversely affect the Company's gross margins. There can be no assurance that the Company will not face greater competition from other national, regional or local retailers or that the Company will be able to compete successfully with existing and new competitors. The inability of the Company to respond to such competition could have a material adverse effect on the Company's business, financial condition and results of operations.

Table of Contents

Future Capital Needs

The Company expects that anticipated cash flows from operations and available borrowings under its credit facility will satisfy its cash requirements for at least the next 12 months. To the extent that the foregoing cash resources are insufficient to fund the Company's activities, including new store openings planned for 2005, additional funds will be required. There can be no assurance that additional financing will be available on reasonable terms or at all. Failure to obtain such financing could delay or prevent the Company's planned expansion, which could adversely affect the Company's business, financial condition and results of operations.

Substantial Control by Single Stockholder

Dmitry Beinus, the Company's Chairman of the Board, President and Chief Executive Officer owns approximately 63% of the Company's outstanding common stock. As a result, Mr. Beinus is able to decide all matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. The concentration of stock ownership could also have the effect of preventing a change in control of the Company.

Possible Volatility of Stock Price

The Company's common stock is quoted on the Nasdaq SmallCap Market, which has experienced and is likely to experience in the future significant price and volume fluctuations, either of which could adversely affect the market price of the common stock without regard to the operating performance of the Company. In addition, the trading price of the Company's common stock could be subject to wide fluctuations in response to quarterly variations in operating results, fluctuations in the Company's comparable store sales, announcements by other footwear retailers, the failure of the Company's earnings to meet the expectations of investors, as well as other events or factors.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

The Company is exposed to market risks, which include changes in U.S. interest rates and foreign exchange rates. The Company does not engage in financial transactions for trading or speculative purposes.

Interest Rate Risk. The interest payable on the Company's credit facility is based on variable interest rates and therefore is affected by changes in market rates. A 1% fluctuation in the interest rate on the Company's credit facility in 2004 would have resulted in a change in interest expense of approximately \$60,000. The Company does not use derivative financial instruments in its investment portfolio and believes that the market risk is insignificant.

Commodity Prices. The Company is not exposed to fluctuation in market prices for any commodities.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Foreign Currency Risks. The Company did not have any foreign exchange contracts outstanding at January 1, 2005 or January 3, 2004. The Company makes minimal purchases outside of the United States that involve foreign currencies and, therefore, has only minimal exposure to foreign currency exchange risks. The Company does not typically hedge against foreign currency risks and believes that foreign currency exchange risk is insignificant. In the past the Company has used foreign exchange contracts to hedge certain purchases in Eurodollars. The purpose of the Company's foreign currency hedging activities is to protect the Company from the risk that the eventual dollar net cash outflow resulting from inventory purchases will be affected by changes in exchange rates.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Shoe Pavilion, Inc.

We have audited the accompanying consolidated balance sheets of Shoe Pavilion, Inc. and subsidiary (the Company) as of January 1, 2005 and January 3, 2004, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended January 1, 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of January 1, 2005 and January 3, 2004, and the results of its operations and its cash flows for each of the three years in the period ended January 1, 2005 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 8, the accompanying 2003 and 2002 consolidated financial statements have been restated.

SHOE PAVILION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND OPERATIONS

General Shoe Pavilion, Inc. (the Company), a Delaware corporation, operates as a single business segment of off-price shoe stores located in California, Washington, Oregon and Arizona, under the name Shoe Pavilion. The Company operated 86 stores, including its internet store, and 85 stores, as of January 1, 2005 and January 3, 2004, respectively.

The Company purchases inventory from international and domestic vendors. For 2004, the Company's top ten suppliers accounted for approximately 44% of inventory purchases.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Consolidation Policy The consolidated financial statements include the Company and its wholly-owned subsidiary, Shoe Pavilion Corporation. All significant intercompany balances and transactions have been eliminated.

Year End The Company's year end is based upon a 52/53 week year ending on the Saturday nearest to December 31. All references herein to 2004, 2003 and 2002 refer to the years ended January 1, 2005, January 3, 2004 and December 28, 2002, respectively. January 3, 2004 was a 53 week year. January 1, 2005 and December 28, 2002 were 52 week years.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash represents cash on hand and cash held in banks.

Estimated Fair Value of Financial Instruments The carrying value of cash, accounts receivable, accounts payable and debt approximates their estimated fair values at January 1, 2005.

Inventories are stated at the lower of average cost or market.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Fixed Assets are stated at cost. Depreciation and amortization are provided on the straight-line method over the estimated useful lives of the assets ranging from three to seven years. Leasehold improvements are amortized on the straight-line method over the shorter of the useful lives of the assets or lease term, generally five years.

Income Taxes Income taxes are accounted under the asset and liability method in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes* . Deferred income taxes result primarily from deferred rent, fixed asset basis differences, UNICAP adjustments and inventory reserves.

Deferred Rent Certain of the Company s store leases provide for free or reduced rent during an initial portion of the lease term. Deferred rent consists of the aggregate obligation for lease payments under these leases accrued on a straight-line basis over the lease term, including any free rent build out periods, in excess of amounts paid. In addition, deferred rent includes construction allowances received from landlords, which are amortized on a straight-line basis over the initial lease term.

Table of Contents**SHOE PAVILION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Preopening Costs Store preopening costs are charged to expense as incurred.

Asset Impairment The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Management evaluates the carrying value of assets associated with stores which have been open at least 14 consecutive months. The Company records an impairment charge to write down the assets to their estimated fair value if the carrying values of such assets exceed their related expected future cash flows. The impairment charge is recorded in selling, general and administrative expenses. Management's estimates and assumptions used in the projections are subject to a high degree of judgment and if actual results differ, additional losses may be recorded. During 2004 and 2003 the Company recorded impairment charges of \$56,000 and \$89,000 to write down assets in one store and 7 stores respectively, to their estimated fair value. No impairment charges were recorded in 2002.

Advertising Expense During 2004, 2003 and 2002 the Company spent \$4.3 million, \$5.1 million and \$3.5 million, respectively on advertising. Advertising costs are expensed as incurred.

Net Income (Loss) Per Share Basic income (loss) per share is computed as net income (loss) divided by the weighted average number of common shares outstanding during the period. Diluted income per share reflects the potential dilution that could occur from the exercise of outstanding stock options and is computed by dividing net income by the weighted average number of common shares outstanding for the period, plus the dilutive effect of outstanding stock options.

Comprehensive Income (loss) is equal to net income (loss) for all periods presented.

Stock-Based Compensation The Company accounts for its stock option plans in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* and its related interpretations. As the Company issues its options at fair value, no compensation expense has been recognized in the financial statements for stock option arrangements.

The following table illustrates the effect on net income (loss) and net income (loss) per share if the Company had applied the fair value recognition provisions of SFAS No. 123, as amended by SFAS No. 148, *Accounting for Stock Based Compensation*, as described in Note 6.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Recently Issued Accounting Standards

In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (Revised 2004), *Share-Based Payment*, which requires that the compensation cost relating to share-based payment transactions be recognized in financial statements based on alternative fair value models. The share-based compensation cost will be measured based on the fair value of the equity or liability instruments issued. The Company currently discloses pro forma compensation expense quarterly and annually (See Note 2). Upon adoption, the pro forma disclosures previously permitted under SFAS No. 123 will no longer be an alternative to financial statement recognition. The provisions of SFAS No. 123R are effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. The Company is currently evaluating the method of adoption and the effect that the adoption of SFAS No. 123R will have on its financial position and results of operations.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets, an amendment of APB No. 29, Accounting for Nonmonetary Transactions*. SFAS No. 153 requires exchanges of productive assets to be accounted for at fair value, rather than at carryover basis, unless (1) neither the asset received nor the asset surrendered has a fair value that is determinable within reasonable limits or (2) the transactions lack commercial substance. SFAS No. 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The Company does not expect the adoption of this standard to have a material effect on its financial position, results of operations or cash flows.

In November 2004, the FASB issued SFAS No. 151, *Inventory Costs an amendment of ARB No. 43, Chapter 4*. SFAS No. 151 amends the guidance in ARB No. 43 to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). SFAS No. 151 requires that these costs be recognized as current period charges regardless of whether they are abnormal. In addition, SFAS No. 151 requires that allocation of fixed production overheads to the costs of manufacturing be based on the normal capacity of the production facilities. The provisions of SFAS No. 151 are effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company does not expect adoption of this standard to have a material impact on its financial position or results of operations or cash flows.

3. FINANCING AGREEMENTS

In April 2003, the Company entered into a credit facility agreement with Wells Fargo Retail Finance, LLC. The facility expires on April 18, 2006 and provides financing for up to \$20.0 million, including a \$5.0 million sublimit for the issuance of letters of credit. Borrowings under the facility are based upon a percentage of eligible inventory less certain reserves. Borrowings are secured by inventory, equipment, general intangibles and other rights to payments. The agreement prohibits the payment of cash dividends and contains various restrictive covenants including a limitation on the amount of capital expenditures and the number of stores the Company may open and close during any fiscal year.

Interest on borrowings is at prime plus up to .25% or Libor plus 1.75% to 2.25%, depending on the amount the Company has available for advances under the line of credit. The Company repaid the amount outstanding on its previous loan agreement from proceeds provided from this

Edgar Filing: SHOE PAVILION INC - Form 10-K

loan facility. The average interest rate on outstanding borrowings at January 1, 2005 was 4.1%. As of January 1, 2005 approximately \$10.2 million was available for advances under the facility. As of January 1, 2005 the Company was in compliance with its loan covenants.

Although the credit facility expires in April 2006 and the Company has the intent and ability to maintain this debt outstanding for more than one year, the Company has classified its borrowings under the facility as a current

Table of Contents

SHOE PAVILION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

liability in accordance with the provisions set forth in Emerging Issues Task Force (EITF) Issue 95-22 Balance Sheet Classifications, Borrowings Outstanding Under Revolving Credit Agreements that include both a Subjective Acceleration Clause and a Lock-Box Arrangement.

4. COMMITMENTS AND CONTINGENCIES

Leases The Company is obligated under operating leases for store locations and equipment. While most of the agreements provide for minimum lease payments and include rent escalation clauses, certain of the store leases provide for additional rentals contingent upon prescribed sales volumes. Additionally, the Company is required to pay common area maintenance and other costs associated with the centers in which the stores operate. Most of the leases provide for renewal at the option of the Company.

Future minimum lease payments required are as follows:

Fiscal Year	<u>Operating Leases</u>
2005	\$ 12,323,601
2006	12,309,922
2007	10,206,561
2008	7,897,543
2009	5,187,977
Thereafter	10,922,557
Total future minimum lease payments	<u>\$ 58,848,161</u>

Rental expense for the years ended January 1, 2005, January 3, 2004 and December 28, 2002 was \$13,688,908, \$13,315,354 and \$12,034,139, respectively, including contingent rentals of \$227,122, \$140,197 and \$664,484, respectively.

Letters of Credit The Company obtains letters of credit in connection with overseas purchase arrangements. The total amounts outstanding were \$393,159 and \$479,917 as of January 1, 2005 and January 3, 2004, respectively. As of January 1, 2005 the Company also had \$500,205 outstanding in standby letters of credit relating to its workers compensation policy and rental agreements.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Contingencies On March 5, 2002, the Company was sued in Los Angeles County Superior Court by one of its store managers who asserted that he and all other store managers in California were improperly classified as exempt employees under California's wage and hour laws and therefore they were entitled to overtime wages. An amended complaint seeking class action status on behalf of all store managers in California was subsequently filed with the court. The Company denied the plaintiff's claims and filed an answer challenging class certification. In December 2003, the Company entered into a settlement agreement of the lawsuit. Under the terms of the agreement the Company paid store managers a stipulated cash settlement based upon the number of weeks worked for the period from April 1, 1998 through December 31, 2003. During the fourth quarter ended January 3, 2004, the Company recorded a reserve of approximately \$1.0 million for the costs associated with the lawsuit settlement. The Company reduced this reserve by approximately \$258,000 during the third quarter ended October 2, 2004. The Company has made substantially all payments required to be made under the settlement agreement as of January 1, 2005.

The Company is also party to various legal proceedings arising from normal business activities. Management believes that while it is reasonably possible that some of these matters will result in settlements to

Table of Contents

SHOE PAVILION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

be paid by the Company, the ultimate resolution of these matters will not have a material adverse impact on the Company's financial statements.

5. INCOME TAXES

The provision (benefit) for income taxes consisted of the following:

	January 1, 2005	January 3, 2004	December 28, 2002
Current:

Deferred:			
Federal	1,298,996	(1,567,820)	(88,488)
State	218,172	(399,725)	57,973
Total deferred	1,517,168	(1,967,545)	(30,515)
Total provision (benefit)	\$ 1,332,778	\$ (1,983,364)	\$ (52,341)

A reconciliation of the provision (benefit) for income taxes to the amount of income tax expense (benefit) that would result from applying the Federal statutory rate of 34% to income (loss) before income taxes is as follows:

	January 1, 2005	January 3, 2004	December 28, 2002
Statutory federal rate	34.0 %	(34.0)%	(34.0)%
State income taxes, net of federal income tax benefit	5.4 %	(5.4)%	(5.3)%
State tax credits	0.0 %	%	(27.2)%
Other	(0.2)%	(1.0)%	1.8 %
Effective tax (benefit) rate	39.2 %	(40.4)%	(64.7)%

Edgar Filing: SHOE PAVILION INC - Form 10-K

During 2002, the Company completed a tax credit study of available California tax credits from 1998 through 2002, which resulted in a state income tax benefit and is reflected in the 2002 rate reconciliation as a rate credit of 27.2%,

Table of Contents**SHOE PAVILION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The components of deferred tax assets (liabilities) are as follows:

	January 1, 2005	January 3, 2004
	<u> </u>	<u> </u>
Current		
Uniform capitalization of inventory costs	\$ 385,115	\$ 332,690
Accrued vacation	153,959	140,854
Inventory reserves	325,130	250,451
Prepaid expenses	(46,036)	(9,194)
State taxes	(50,654)	(77,210)
Legal reserve	0	415,051
Net operating loss	0	1,004,764
Other	(49,938)	41,128
	<u> </u>	<u> </u>
Total current	717,576	2,098,534
	<u> </u>	<u> </u>
Non-Current:		
Deferred state taxes	(112,877)	(160,500)
Difference in basis of fixed assets	1,009,520	819,522
Deferred rent and tenant improvements	674,870	798,030
Net operating loss	0	250,671
	<u> </u>	<u> </u>
Total non-current	1,571,513	1,707,723
	<u> </u>	<u> </u>
Net deferred tax asset	\$ 2,289,089	\$ 3,806,257
	<u> </u>	<u> </u>

A valuation allowance is provided when it is more likely than not that some or a portion or all of the deferred tax asset will not be realized. Based upon its history of earnings the Company believes that the realization of its deferred tax asset is more likely than not and therefore has not provided a valuation allowance for its deferred tax asset.

6. STOCKHOLDERS EQUITY

Stock Options In January 1998, the Company adopted the 1998 Equity Incentive Plan (the "1998 Plan") authorizing the issuance of stock options to acquire up to 1,000,000 shares of its common stock to key employees and consultants of the Company. The 1998 Plan provides for awards of incentive stock options and nonqualified stock option grants to purchase common stock at prices equal to fair market value at the date of grant. Such options vest 25% each year, beginning on each anniversary date from the date of grant and expire ten years from that date. At January 1, 2005, there were 527,479 shares available for grants and options to acquire 176,500 shares of common stock were exercisable.

Edgar Filing: SHOE PAVILION INC - Form 10-K

Directors' Stock Options In January 1998, the Company adopted the Directors' Stock Option Plan (the Directors' Plan) authorizing the issuance of stock options to acquire up to 100,000 shares of common stock to non-employee directors of the Company. The Directors' Plan provides for awards of nonqualified stock options to purchase common stock at prices equal to fair market value at the date of grant. Such options vest 100% one year from grant date and expire six years from that date. At January 1, 2005, there were 55,000 shares available for grant and stock options to acquire up to 37,500 shares of common stock were exercisable.

Table of Contents**SHOE PAVILION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables summarize information about outstanding stock options under both plans:

	Number of shares	Weighted Average Exercise price
Balance at December 29, 2001	289,500	\$ 4.16
Options granted	57,500	1.22
Options canceled	(89,000)	1.65
Balance at December 28, 2002	258,000	4.37
Options granted	7,500	1.03
Options canceled	(17,625)	6.18
Balance at January 3, 2004	247,875	4.14
Options granted	345,000	1.57
Options exercised	(1,021)	1.94
Options canceled	(75,354)	3.57
Balance at January 1, 2005	516,500	\$ 2.51

Weighted average fair value of options granted during 2004, 2003 and 2002 were \$1.35, \$0.68 and \$0.86, respectively.

Range of Exercise Prices	Number Outstanding at January 1, 2005	Weighted Average Remaining Contractual Life (in years)	Weighted Average Exercise Price	Number Exercisable at January 1, 2005	Weighted Average Exercise Price
\$1.03 \$ 1.22	20,000	3.14	\$ 1.15	20,000	\$ 1.15
\$1.28 \$ 1.28	200,000	9.14	1.28		
\$1.81 \$ 1.95	200,500	7.05	1.93	105,500	1.92
\$2.25 \$10.25	96,000	3.19	6.56	88,500	6.93
\$1.03 \$10.25	516,500	6.99	\$ 2.51	214,000	\$ 3.92

SFAS No. 123, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation*, requires the disclosure of pro forma net income (loss) and net income (loss) per share as though the Company had adopted the fair value method as of the beginning of 1995, see Note 2. Under SFAS No. 123, the fair value of stock-based awards to employees is calculated through the use of option pricing models, even though such models

Edgar Filing: SHOE PAVILION INC - Form 10-K

were developed to estimate the fair value of freely tradable, fully transferable options without vesting restrictions, which significantly differ from the Company's stock option awards. These models also require subjective assumptions, including future stock price volatility and expected time to exercise, which greatly affect the calculated values. The Company's calculations were made using the Black-Scholes option pricing model with the following weighted average assumptions and forfeitures being recognized as they occur.

	Year Ended January 1, 2005	Year Ended January 3, 2004	Year Ended December 28, 2002
Expected life in years	9.15 years	5.0 years	8.04 years
Stock price volatility	95.00%	81.97%	67.19%
Risk free interest rate	3.3%	2.6%	4.5%
Dividends during term	None	None	None

Table of Contents**SHOE PAVILION, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****7. EMPLOYEE BENEFIT PLAN**

The Company maintains a 401(k) Savings Plan (the Plan). Employees become eligible to participate in the Plan after completing one year of service and attainment of the age 21. Generally, employees may contribute up to 15% of their compensation or a maximum of \$13,000 in accordance with IRC Sections 402(g), 401(k) and 415. The Company may at its sole discretion, contribute and allocate to each eligible participant's account a percentage of the participant's elective deferral contributions. The Company made no contributions to the Plan for the years ended January 1, 2005 and January 3, 2004. The Company expensed \$5,000 related to the Company's matching contributions for the year ended December 28, 2002. The Company's contributions vest over a five-year period.

8. RESTATEMENT OF FINANCIAL STATEMENTS

Subsequent to the issuance of its financial statements for the year ended January 3, 2004, as a result of views expressed in a letter issued on February 7, 2005 by the Office of the Chief Accountant of the Securities and Exchange Commission (SEC) to the American Institute of Certified Public Accountants regarding certain operating lease-related accounting issues and their application under generally accepted accounting principles in the United States of America (GAAP), the Company determined that its then current method of accounting for rent holidays was not in accordance with GAAP.

The Company's historical accounting practice was to recognize rent expense on a straight-line basis over the initial non-cancelable lease term, with the term commencing when the store opened for business. However, after considering the views expressed in the letter issued by the Chief Accountant of the SEC on February 7, 2005, the Company has now determined that it should have been recording rent expense from the time at which the Company takes possession of the property. As a result, the Company's consolidated financial statements for the fiscal years ended January 3, 2004 and December 28, 2002 have been restated from the amounts previously reported. The cumulative effect of this accounting change is a reduction in retained earnings of \$224,000 as of the beginning of fiscal 2002 and decreases to retained earnings of \$175,000 and \$204,000 for fiscal years 2002 and 2003, respectively. The Company recorded the adjustment related to the current year, which was nominal, in the fourth quarter of fiscal 2004 to correct its lease accounting.

A summary of the effects of the restatement on the Company's financial results has been provided below:

For the year ended:	January 3, 2004	January 3, 2004	December 28, 2002	December 28, 2002
	(As previously reported)	(As restated)	(As previously reported)	(As restated)
Cost of sales and related occupancy expenses	\$ 59,518,841	\$ 59,870,116	\$ 57,293,685	\$ 57,576,266

Edgar Filing: SHOE PAVILION INC - Form 10-K

- (1) Summarized quarterly financial information in fiscal 2003 has been restated to reflect the correction of an error related to lease accounting, as discussed in Note 8.

Table of Contents

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

The Chief Executive Officer and the Chief Financial Officer of the Company, with the participation of the Company's management, carried out an evaluation of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act of 1934 Rule 13a-15(e). Based on that evaluation, after considering the underlying conditions that gave rise to the restatement discussed below, the Chief Executive Officer and the Chief Financial Officer concluded that the disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K, were not effective in ensuring that material information relating to the Company, required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

As discussed in Note 8 to the Financial Statements, as a result of the February 7, 2005 letter issued by the Chief Accountant of the Securities and Exchange Commission regarding certain operating lease-related accounting issues and their application under generally accepted accounting practices in the United States of America (GAAP), the Company reviewed its lease accounting practices. Based upon this review the Company determined that its then current method of accounting for rent holidays was not in accordance with GAAP. As a result, the Company restated its consolidated financial statements for each of the fiscal years ended January 3, 2004, and December 28, 2002, in this Annual Report on Form 10-K.

During the fourth quarter of fiscal 2004, there were no significant changes in the Company's internal controls over financial reporting or in other factors that could significantly affect internal controls over financial reporting.

During the first quarter of 2005, the Company remediated the material weakness in internal control over financial reporting and the ineffectiveness of its disclosure controls and procedures by conducting a review of its accounting related to leases. The Company has established procedures designed to ensure that rent expense will be recognized in the appropriate periods in the Company's financial statements.

Item 9B. Other Information

None
