WIND RIVER SYSTEMS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: The Company and Summary of Significant Accounting Policies

The Company. Wind River Systems, Inc. (Wind River) is a global leader in Device Software Optimization (DSO). Wind River 's software is used to develop and run devices better, faster, at lower cost and more reliably. Wind River 's software and development tools are used to optimize the functionality of devices as diverse as digital imaging products, automobile braking systems, Internet routers, avionics control panels and factory automation equipment. Wind River offers customers DSO solutions to enhance product performance, standardize designs across projects and throughout the enterprise, reduce research and development costs, and shorten product development cycles.

Wind River markets its products and services in North America, Europe (including the Middle East and Africa, EMEA), Japan and the Asia Pacific region, primarily through its own direct sales organization, which consists of sales persons and field engineers. Wind River also licenses distributors, primarily in international regions, to serve customers in regions not serviced by its direct sales force. Wind River was incorporated in California in February 1983 and reincorporated in Delaware in April 1993.

Basis of Presentation. Wind River has prepared the condensed consolidated financial statements included herein, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. However, Wind River believes that the disclosures are adequate to ensure the information presented is not misleading. These unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements and the notes thereto included in Wind River 's Annual Report on Form 10-K for the fiscal year ended January 31, 2005 filed with the SEC on April 18, 2005.

Wind River believes that all necessary adjustments, which consisted of normal recurring items, have been included in the accompanying financial statements to state fairly the results of the interim periods. The results of operations for the interim periods presented are not necessarily indicative of the operating results to be expected for any subsequent interim period or for Wind River 's fiscal year ending January 31, 2006. Certain insignificant amounts have been reclassified to conform to the current year presentation.

The condensed consolidated financial statements include the financial information of Wind River and its subsidiaries. All significant inter-company accounts and transactions have been eliminated.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Specifically, estimates are used for but not limited to, the accounting for the allowance for doubtful accounts, sales returns and other allowances, restructuring costs, valuation of investments, goodwill and purchased intangibles, deferred and income taxes, revenue recognition, accrued compensation, stock-based compensation and the outcome of litigation and other contingencies. Wind River bases its estimates on historical experience and various other assumptions that are believed to be reasonable based on the specific circumstances. Wind River 's management has discussed these estimates with the Audit Committee of the Board of Directors (Board). These estimates and assumptions form the basis for making judgments about the carrying value of certain assets and liabilities that are not readily apparent from other sources. Actual

results could differ from those estimates and could affect future operating results.

Stock-Based Compensation. Wind River issues stock options to its employees and outside directors and provides employees the right to purchase stock pursuant to stock option and employee stock purchase programs. Wind River accounts for its stock-based compensation plans under the intrinsic value method of accounting as defined by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25) and related interpretations. Wind River applies the disclosure provisions of Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure an Amendment of SFAS No. 123*. For pro-forma disclosures, the estimated fair value of the options is amortized over the vesting period, typically four years, and the estimated fair value of the stock purchases is amortized over the six-month purchase period.

Wind River accounts for equity instruments issued to non-employees in accordance with the provisions of SFAS No. 123 and Emerging Issues Task Force Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*. Wind River uses the Black-Scholes option-pricing model to value options granted to non-employees.

Table of Contents

Pro Forma Disclosures. Under SFAS No. 123, the fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions used for grants made during the three months ended April 30, 2005 and 2004:

	Three Months Ended April 30,	
	2005	2004
Risk free interest rate	3.86%	3.78%
Expected volatility	77.4%	84.7%
Expected option life (in years)	4.13	4.19
Expected dividends		

The weighted average fair value per share of options granted during the three months ended April 30, 2005 and 2004 was \$8.61 and \$6.72, respectively.

The fair value of employees' stock purchase rights under Wind River's 1993 Employee Stock Purchase Plan (the Purchase Plan) was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions used for purchases made during the three months ended April 30, 2005 and 2004:

	Three Months Ended April 30,	
	2005	2004
Risk free interest rate	2.6%	1.0%
Expected volatility	48.4%	69.7%
Expected option life (in years)	0.5%	0.5%
Expected dividends		

The weighted average fair value of the common stock purchase rights granted under the Purchase Plan during the three months ended April 30, 2005 and 2004 was \$3.90 and \$3.03, respectively.

Had compensation expense under these arrangements been determined pursuant to SFAS No. 123, Wind River's net income and net loss per share for the three months ended April 30, 2005 and 2004 would have been as follows:

Three Months Ended April 30,	
2005	2004

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

	(In thousands, except per share amounts)	
Net income (loss):		
As reported	\$ 1,804	\$ (3,803)
Less: Stock-based compensation expense determined under fair-value-based method for all awards	(5,671)	(2,932)
	<u> </u>	<u> </u>
Pro forma net loss	\$ (3,867)	\$ (6,735)
	<u> </u>	<u> </u>
Basic and diluted net income (loss) per share:		
As reported	\$ 0.02	\$ (0.05)
Pro forma	\$ (0.05)	\$ (0.08)

The pro forma amounts include compensation expense related to employee stock option grants and stock purchase rights. The effects of applying SFAS No. 123 on pro forma disclosures of net income (loss) per share in the three months ended April 30, 2005 and 2004 are not likely to be representative of the pro forma effects on net income (loss) per share in future fiscal periods. See *Recent Accounting Pronouncements* below.

Recent Accounting Pronouncements. In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004), *Share-Based Payment*, (SFAS No. 123R), that addresses the accounting for share-based payment transactions in which an enterprise receives employee services in exchange for either equity instruments of the enterprise or liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. The statement eliminates the ability to account for share-based compensation transactions using the intrinsic value method as prescribed by APB No. 25, *Accounting for Stock Issued to Employees*, and generally requires that such transactions be accounted for using a fair-value-based method and recognized as expenses. The statement requires companies to assess the most appropriate model to calculate the value of the options. Wind River currently uses the Black-Scholes option pricing model to value options and is

Table of Contents

currently assessing which model it may use in the future under the statement and may deem an alternative model to be the most appropriate. The use of a different model to value options may result in a different fair value than the use of the Black-Scholes option-pricing model. In addition, there are a number of other requirements under the new standard that will result in differing accounting treatment than currently required. These differences include, but are not limited to, the accounting for the tax benefit on employee stock options and for stock issued under Wind River's employee stock purchase plan. In addition to the appropriate fair value model to be used for valuing share-based payments, Wind River will also be required to determine the transition method to be used at date of adoption. The allowed transition methods include prospective and retroactive adoption options. Under the retroactive options, prior periods may be restated either as of the beginning of the year of adoption or for all periods presented. The prospective method requires that compensation expense be recorded for all unvested stock options and restricted stock at the beginning of the first quarter of adoption of SFAS No. 123R, while the retroactive methods would record compensation expense for all unvested stock options and restricted stock beginning with the first period restated. The effective date of the new standard for Wind River's Consolidated Financial Statements is its first quarter of fiscal 2007. In March 2005, the SEC issued Staff Accounting Bulletin No. 107 (SAB 107) relating to the adoption of SFAS No. 123R.

Upon adoption, this statement will have a significant impact on Wind River's Consolidated Financial Statements, specifically its statement of operations and earnings per share on a quarterly and annual basis, as Wind River will be required to expense the fair value of its stock option grants and stock purchases under its employee stock purchase plan rather than disclose the impact on its consolidated net income within its footnotes as is its current practice. The amounts disclosed herein are not necessarily indicative of the amounts that will be expensed upon the adoption of SFAS No. 123R. Compensation expense calculated under SFAS No. 123R and SAB 107 may differ materially from amounts currently disclosed based on changes in the fair value of Wind River's common stock, changes in the number of options granted or the terms of such options, the treatment of tax benefits and changes in interest rates or other factors. In addition, upon adoption of SFAS No. 123R, Wind River may choose to use a different valuation model to value the compensation expense associated with its employee stock options.

In March 2004, the EITF reached a consensus on the remaining portions of EITF 03-01, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, (EITF 03-01) effective for the first reporting period beginning after June 15, 2004. EITF 03-01 provides new disclosure requirements for other-than-temporary impairments on debt and equity investments. Companies are required to disclose quantitative information about: (i) the aggregate amount of unrealized losses, and (ii) the aggregate related fair values of investments with unrealized losses, segregated into time periods during which the investment has been in an unrealized loss position of less than 12 months and greater than 12 months. In addition, investors are required to disclose the qualitative information that supports their conclusion that the impairments noted in the qualitative disclosure are not other-than-temporary. In September 2004, the FASB approved FASB Staff Position EITF 03-01, which defers the effective date for recognition and measurement guidance contained in EITF 03-01 until certain issues are resolved. In September 2004, the FASB delayed the accounting provisions of EITF 03-01; however the disclosure requirements remain effective for annual periods ending after June 15, 2004. Wind River will evaluate the additional provisions of this EITF upon its finalization.

Note 2: Derivative Financial Instruments

Wind River may enter into foreign currency forward exchange contracts to manage foreign currency exposures related to certain non-functional currency related inter-company and other balances. Additionally, Wind River may adjust its foreign currency hedging position by taking out additional contracts or by terminating or offsetting existing forward contracts. These adjustments may result from changes in the underlying non-functional currency exposures or from fundamental shifts in the economics of particular exchange rates. Gains and losses on terminated forward contracts, or on contracts that are offset, are recognized in income in the period of contract termination or offset. Wind River's ultimate realized gain or loss with respect to currency fluctuations will depend on the currency exchange rates and other factors in effect as the contracts mature. As of April 30, 2005, Wind River had outstanding contracts with the following terms:

Buy / Sell	Sell	Buy	Sell	Buy	Buy
Currency	GBP(£)	EURO(€)	JPY(¥)	CAD(CAD\$)	SEK(kr)

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

Amount	2,750,000	11,500,000	130,000,000	4,000,000	16,000,000
Rate	1.9065	1.2939	106.13	1.2553	7.0701
USD Equivalent	\$ 5,242,875	\$ 14,879,850	\$ 1,224,913	\$ 3,186,489	\$ 2,263,051
Maturity Date	5/31/05	5/31/05	5/31/05	5/31/05	5/31/05

Contract amounts are representative of the expected amounts to be paid under the terms of these instruments. Wind River does not enter into derivative financial instruments for trading or speculative purposes. As of April 30, 2005, the fair value of the above contracts was not significant.

Table of Contents**Note 3: Deferred Revenues**

Deferred revenues consist of the following:

	As of Apr. 30, 2005	As of Jan. 31, 2005
(In thousands)		
Current deferred revenues:		
Subscription	\$ 45,720	\$ 40,910
Maintenance and other	25,995	24,705
Total current deferred revenues	71,715	65,615
Long-term deferred revenues:		
Subscription	10,483	11,067
Maintenance and other	582	425
Total long-term deferred revenues	11,065	11,492
Total deferred revenues	\$ 82,780	\$ 77,107

Deferred subscription revenues represent customer billings and payments made in advance for software licensed over a subscription period. Subscription periods vary from annual to multi-year and are classified as such. Deferred service revenues include pre-payments for software consulting and other product services, including software license transactions that are not segmentable from consulting services. Revenue for these services is recognized as the services are performed. Deferred maintenance revenues represent customer billings and payments made in advance for annual support contracts. Maintenance is typically billed on a per annum basis in advance and revenue is recognized ratably over the maintenance period.

Note 4: Restructuring Charges

As a result of decisions undertaken regarding the cost structure of its business, beginning in fiscal 2002, Wind River implemented restructuring plans that were designed to align its anticipated revenues more closely with its cost structure. In connection with the restructuring programs, Wind River recorded net restructuring charges of \$185,000 and \$1.2 million during the three months ended April 30, 2005 and 2004, respectively. During the three months ended April 30, 2005, Wind River recorded additional charges under SFAS No. 146 Accounting for Costs Associated with Exit or Disposal Activities (SFAS No. 146) associated with the restructuring program undertaken in the last quarter of fiscal 2005. Additionally, Wind River recorded a charge associated with employee litigation as a result of previous restructurings and revised estimates downward for Wind River's actual experience in the amount of \$143,000 for employee-related items, including outplacement fees and judgments rendered in employee litigation matters. These costs have been classified as operating expenses. Wind River's restructuring programs for the three months ended April 30, 2005 and 2004 have been accounted for in accordance with SFAS No. 146. For a further discussion of factors that may affect the success of the restructuring program, see Factors That May Affect Our Future Results or the Market Price of Our Stock. Our restructuring plans may not enable us to achieve long-term profitability or achieve our business objectives.

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

As of April 30, 2005, Wind River's total restructuring liabilities related to its restructuring programs for the three months ended April 30, 2005, fiscal years 2005 and 2003 totaled approximately \$1.4 million. There were no remaining restructuring liabilities for fiscal 2004. The following table summarizes Wind River's restructuring liabilities as of April 30, 2005:

	Work Force Reduction	Consolidation of Excess Facilities	Other	Total
	_____	_____	_____	_____
	(In thousands)			
Restructuring liabilities as of January 31, 2005	\$ 246	\$ 406	\$ 752	\$ 1,404
Cash charges	91		237	328
Reversals	(87)		(56)	(143)
	_____	_____	_____	_____
Total charges	4		181	185
	_____	_____	_____	_____
Cash payments	(52)	(91)	(68)	(211)
	_____	_____	_____	_____
Restructuring liabilities as of April 30, 2005	\$ 198	\$ 315	\$ 865	\$ 1,378
	_____	_____	_____	_____

Wind River expects the workforce reduction and consolidation of excess facilities liabilities to be paid out by the end of the third quarter of fiscal 2006.

Table of Contents

Note 5: Convertible Subordinated Notes and Other Borrowings

In December 2001, Wind River issued \$150.0 million of 3.75% convertible subordinated notes due December 2006. The notes are unsecured and subordinate to all existing and future senior debt. The notes mature on December 15, 2006, unless earlier redeemed or converted. Interest on the notes is payable in cash semi-annually in arrears on June 15 and December 15 of each year. The notes may be converted, at the option of the holder, into Wind River's common stock at any time at the then-current conversion price, initially \$24.115 per share. Wind River may redeem all or a portion of the notes for cash at the redemption price of 100.75% of the principal amount between December 15, 2004 and December 15, 2005 and 100.0% of the principal amount beginning December 15, 2005 and thereafter.

During fiscal 2005, Wind River repurchased \$75.0 million of the notes on the open market at an aggregate price of \$75.4 million. Additionally, Wind River expensed \$1.0 million in unamortized bond issuance costs, resulting in a total recognized loss on the repurchase of \$1.4 million. As of January 31, 2005, \$75.0 million in convertible subordinated notes (convertible into 3.1 million shares) remained outstanding.

In March 2005, Wind River repurchased an additional \$20.0 million of its 3.75% convertible subordinated notes on the open market at an aggregate price of \$20.1 million. Wind River expensed \$257,000 in unamortized bond issuance costs, resulting in a total recognized loss on the additional repurchase of \$312,000. As of April 30, 2005, \$55.0 million in convertible subordinated notes (convertible into 2.3 million shares) remained outstanding.

In April 2003, in connection with the termination of the synthetic leases associated with Wind River's headquarters facility, Wind River entered into a loan facility with a financial institution in the aggregate principal amount of \$57.4 million, consisting of a non-revolving loan commitment of \$37.4 million and a term loan of \$20.0 million, of which \$40.0 million was borrowed during fiscal year 2004. During the second quarter of fiscal 2005, Wind River repaid all outstanding borrowings under the loan facility, releasing \$46.3 million held in restricted investments in connection with the loan facility and leaving the original facility of \$17.5 million available through October 2005. On April 29, 2005, Wind River elected to terminate the loan facility.

Note 6: Provision for Income Taxes

Wind River recorded a tax provision of \$386,000 and \$700,000 in the three months ended April 30, 2005 and 2004, respectively. Wind River's tax provision is based on estimates of its expected liability for domestic and foreign income and withholding taxes that will be incurred during the year. The decrease in the tax provision of \$314,000 was primarily related to lower foreign withholding taxes and lower foreign income taxes.

Deferred income taxes are recorded in accordance with SFAS No. 109, *Accounting for Income Taxes* (SFAS No. 109) and are determined based on the differences between financial reporting and the tax basis of assets and liabilities using the tax rates and laws in effect when the differences are expected to reverse. SFAS No. 109 provides for recognition of deferred tax assets if the realization of such assets is more likely than not to occur. With the exception of Germany, Wind River has determined that it is more likely than not that its deferred tax assets in all jurisdictions will not be realized, due to uncertainties related to its ability to utilize its deferred tax assets, primarily net operating losses carried forward and foreign tax credits, before they expire. Accordingly, Wind River has recorded a deferred tax asset of \$682,000 in Germany and a full valuation allowance against the remainder of its deferred tax assets at April 30, 2005 and January 31, 2005.

Note 7: Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity of a company during a period from transactions and other events and circumstances, excluding transactions resulting from investments by owners and distributions to owners. The difference between net income (loss) and comprehensive income (loss) results from foreign currency translation adjustments, mark-to-market adjustments and unrealized gains and losses on available-for-sale securities.

Table of Contents

Comprehensive income (loss) for the three months ended April 30, 2005 and 2004 is as follows:

	Three Months Ended April 30,	
	2005	2004
	(In thousands)	
Net income (loss)	\$ 1,804	\$ (3,803)
Other comprehensive loss:		
Foreign currency translation adjustments	(83)	223
Unrealized loss on investments	(626)	(1,372)
Reclassification adjustment for (gain) loss included in net income (loss)	125	(425)
Other comprehensive loss	(584)	(1,574)
Total comprehensive income (loss)	\$ 1,220	\$ (5,377)

Note 8: Net Income (Loss) Per Share Computation

In accordance with SFAS No. 128, *Earnings Per Share*, the calculation of shares used in basic and diluted net income (loss) per share computation is presented below:

	Three Months Ended April 30,	
	2005	2004
	(In thousands except share amounts)	
Net income (loss)	\$ 1,804	\$ (3,803)
Weighted average common shares outstanding basic	83,702	81,162
Effect of dilutive potential common shares	5,423	
Weighted average common shares outstanding diluted	89,125	81,162
Net income (loss) per share:		
Basic and diluted	\$ 0.02	\$ (0.05)

The effect of the assumed conversion of the 3.75% convertible subordinated notes for 2.3 million and 6.2 million shares for the three months ended April 30, 2005 and 2004, respectively, is anti-dilutive, and is therefore excluded from the above computation. Since Wind River had a net loss for the three months ended April 30, 2004, there is no difference between basic and diluted net loss per share. If Wind River had recorded net income for the three months ended April 30, 2004, it would have included in the computation dilutive potential common shares from outstanding stock options totaling approximately 3.4 million for the three months ended April 30, 2004.

Note 9: Commitments and Contingencies

Litigation

From time to time, Wind River is subject to legal proceedings and claims in the ordinary course of business, including claims of alleged infringement of patents and other intellectual property rights. Management believes the outcome of Wind River's outstanding legal proceedings, claims and litigation will not have a material adverse effect on Wind River's business, results of operations, cash flows or financial condition. However, such matters involve complex questions of fact and law and could involve significant costs and the diversion of resources to defend. Additionally, the results of litigation are inherently uncertain, and an adverse outcome is at least reasonably possible. Quarterly, Wind River reviews the status of each significant matter and assess our potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. As additional information becomes available, Wind River reassesses the potential liability related to its pending claims and litigation and may revise its estimates. Such revisions in the estimates of the potential liabilities could have a material impact on our consolidated results of operations or financial position.

On June 7, 2004, Wind River filed a complaint against Green Hills Software, Inc. (Green Hills), a direct competitor, in the Superior Court of California, County of Alameda. The action was transferred to the Superior Court of California, County of Santa Barbara. The subsequently amended complaint requested \$25,000 in damages due to breach by Green Hills of a cooperative marketing and technology agreement entered into between the parties in October 1992. Green Hills subsequently filed an answer and cross-complaint in that action. On January 18, 2005, Green Hills filed a complaint against Wind River in the United States District Court for the Central District of California alleging, among other things, that Wind River violated antitrust and unfair competition

Table of Contents

laws by allegedly refusing to license its VxWorks product to Green Hills and refusing to market VxWorks separately from the integrated development environment for VxWorks. Green Hills requested an award for damages and injunctive relief on these matters. On April 28, 2005, the Court denied Wind River's motion to dismiss and Green Hill's motion for preliminary injunction. On May 12, 2005, Wind River filed its answer. These related lawsuits are still in the preliminary stages, and it is not possible for Wind River to quantify the extent of potential liability to Green Hills, if any, resulting from the Green Hills lawsuits. Wind River does not believe that the lawsuit brought by Green Hills against Wind River has any merit and intends to defend the action vigorously.

Note 10: Segment and Geographic Information

Wind River reports in one industry segment technology for device operating systems and provides the disclosures required in accordance with SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. The Wind River business is principally managed on a consolidated basis. Wind River markets its products and related services to customers in four geographic regions: North America (the United States and Canada), EMEA, Japan and Asia Pacific. Internationally, Wind River markets its products and services primarily through its subsidiaries and various distributors. Revenues are generally attributed to geographic areas based on the country in which the customer is domiciled.

Revenue and long-lived asset information by region is presented below:

	Revenues		Long-lived Assets	
	Three Months Ended		As of Apr. 30,	As of Jan. 31,
	April 30,			
	2005	2004	2005	2005
	(In thousands)		(In thousands)	
North America (1)	\$ 33,854	\$ 29,397	\$ 79,835	\$ 80,684
EMEA	14,500	12,293	4,586	4,758
Japan	8,396	6,884	2,399	2,406
Asia Pacific	5,011	4,198	295	337
Total	\$ 61,761	\$ 52,772	\$ 87,115	\$ 88,185

(1) Represents revenue and long-lived assets primarily in the United States.

Revenue information on a product, subscription and services basis is presented below:

Three Months Ended	
April 30,	
2005	2004

	(In thousands)	
Software license revenues	\$ 11,882	\$ 13,292
Production license revenues	18,162	13,472
Subscription revenues	16,366	9,505
Maintenance revenues	8,759	9,897
Other service revenues	6,592	6,606
Total	\$ 61,761	\$ 52,772

No single customer accounted for more than 10% of Wind River's total revenues in the three months ended April 30, 2005 and 2004, respectively.

Note 11: Subsequent Events

On June 8, 2005, the stockholders of Wind River, upon recommendation of Wind River's Board of Directors (Board), approved the Wind River Systems, Inc. 2005 Equity Incentive Plan (the 2005 Equity Plan). The Board adopted the 2005 Equity Plan on March 10, 2005, subject to stockholder approval. The 2005 Equity Plan will terminate ten years from the date of such adoption. The 2005 Equity Plan replaces the 1987 Equity Incentive Plan, 1995 Non-Employee Directors' Stock Option Plan, the 1998 Non-Officer Stock Option Plan and the 1998 Equity Incentive Plan (the Predecessor Plans). No further awards will be granted under the Predecessor Plans. A maximum of 6,250,000 shares of Common Stock is available for issuance under the 2005 Equity Incentive Plan, plus any shares subject to any outstanding options under the Predecessor Plans that subsequently expire unexercised up to a maximum of an additional 2,500,000 shares.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains statements that we believe are, or may be considered to be, forward-looking statements within the meaning of various provisions of the Securities Act of 1933 and the Securities Exchange Act of 1934. These forward-looking statements generally can be identified by use of statements that include words such as could, may, believe, expect, anticipate, intend, plan, seek, estimate, foresee, project and similar expressions and are found in the sections below entitled Overview,

Liquidity and Capital Resources, Results of Operations and Factors That May Affect Our Future Results or the Market Price of Our Stock and elsewhere in this Quarterly Report. These forward-looking statements include, but are not limited to, statements related to our expected business, results of operations, future financial position, business strategy, including our adoption of an open source strategy, and our shift to an enterprise licensing model, our ability to increase our revenues, our financing plans and capital requirements, our investments, our expenses and tax liability, the effect of recent accounting pronouncements, debt service and principal repayment obligations, cash flows, revenues generated from fixed-price services contracts forecasted trends relating to our services or the markets in which we operate and similar matters and include statements based on current expectations, estimates, forecasts and projections about the economies and markets in which we operate and our beliefs and assumptions regarding these economies and markets. Factors that could cause or contribute to such differences include but are not limited to the success of Wind River's implementation of its new and current business models, products and market strategies, the ability of our customers to sell products that include our software, our ability to address new markets and complex technologies by delivering successful, new products on a timely basis, the impact of competitive products and pricing, the success of our strategic relationships, charges for restructuring and other costs and other risk factors detailed in this Quarterly Report on Form 10-Q and in Wind River's Annual Report on Form 10-K for the fiscal year ended January 31, 2005 (2005 Form 10-K), its Quarterly Reports on Form 10-Q and other periodic filings with the Securities and Exchange Commission (SEC).

These forward-looking statements are based on current expectations and involve known and unknown risks and uncertainties that may cause the results, levels of activity, performance or achievements of Wind River or its industry to be materially different from those expressed or implied by the forward-looking statements. You should carefully review the risk factors described in the Factors That May Affect Our Future Results or the Market Price of Our Stock section below and in other documents we file from time to time with the SEC, including our 2005 Form 10-K, and the other quarterly and other reports we file. We do not intend to update any of the forward-looking statements contained in this report to reflect any future events or developments unless required by law.

The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and notes included elsewhere in this report.

Overview

Wind River is a global leader in Device Software Optimization (DSO). Our software is used to develop and run devices better, faster, at a lower cost and more reliably. Our software and development tools are used to optimize the functionality of devices as diverse as digital imaging products, automobile braking systems, Internet routers, avionics control panels and factory automation equipment. Wind River offers customers DSO solutions to enhance product performance, standardize designs across projects and throughout the enterprise, reduce research and development costs and shorten product development cycles.

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

For additional information about our business and operating model, please see Executive Operating and Financial Summary under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2005 Form 10-K.

Recent Operating Results

Our total revenues were \$61.8 million and \$52.8 million in the three months ended April 30, 2005 and 2004, respectively. Our net income was \$1.8 million or a net income of \$0.02 per fully diluted share in three months ended April 30, 2005. Our net loss was \$3.8 million or a net loss of \$0.05 per fully diluted share in the three months ended April 30, 2004.

Our total deferred revenue increased to \$82.8 million at April 30, 2005 from \$77.1 million at January 31, 2005, primarily as a result of continued increases in sales of our Wind River Platforms and other enterprise license based products under our subscription licenses model. Of the total deferred revenue balance at April 30, 2005, \$11.1 million relates to deferred revenue classified as long-term. This deferred revenue relates to the portion of multi-year contracts that is due to be recognized as revenue in a time period greater than one year from the balance sheet date.

Table of Contents

We generated cash flow from operations of \$11.2 million and \$9.1 million in the three months ended April 30, 2005 and 2004, respectively. We repurchased an additional \$20.0 million of our 3.75% convertible subordinated notes in March 2005.

Critical Accounting Policies and Estimates

Management's discussion and analysis of our financial condition and results of operations are based upon our Condensed Consolidated Financial Statements, which were prepared in accordance with accounting principles generally accepted in the United States, or GAAP. GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Note 2, "Summary of Significant Accounting Policies" in Notes to Consolidated Financial Statements in our 2005 Form 10-K describes our significant accounting policies which are reviewed by us on a regular basis and which are also reviewed by senior management with the Audit Committee of our Board of Directors.

An accounting policy is deemed by us to be critical if it requires an accounting estimate to be made based on assumptions about matters that are uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the financial statements. The policies and estimates that we believe are most critical to an understanding of our financial results and condition and that require a higher degree of judgment and complexity are:

Revenue recognition;

Estimating sales returns and other allowances, and allowance for doubtful accounts;

Valuation of long-lived assets, including goodwill and purchased intangibles;

Restructuring charges;

Accounting for income taxes;

Stock-based compensation; and

Litigation contingencies.

For a more comprehensive discussion of these critical accounting policies, please see "Critical Accounting Policies and Estimates," under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our 2005 Form 10-K.

Results of Operations for the Three Months Ended April 30, 2005 and 2004

Revenues

We recognize revenues from three sources: (1) product revenues, (2) service revenues and (3) subscription revenues, net of sales returns and other allowances. Product revenues consist of revenues from production licenses (sometimes referred to as royalties), and fees for stand-alone software and software programming tools sold under our perpetual licensing model and from sales of our hardware. Service revenues are derived from fees from professional services, which include design and development fees, software maintenance contracts, and customer training and consulting. Subscription revenues consist of revenues from the licensing of products and services under our enterprise licensing model including items such as development tools, an operating system, various protocols and interfaces and maintenance and support services such as installation and training, which are licensed over a limited period of time, typically 12 months.

	Three Months Ended April 30,		Percentage of Total Revenues, net	
	2005	2004	2005	2004
	(In thousands, except percentages)			
Product revenues	\$ 30,044	\$ 26,764	49%	51%
Subscription revenues	16,366	9,505	26	18
Service revenues	15,351	16,503	25	31
Total revenues, net	\$ 61,761	\$ 52,772	100%	100%

Table of Contents

Total revenues increased 17% in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. This was primarily due to higher customer demand for our software and hardware, in particular production licenses and as a result of an improvement in the overall economy. See Factors That May Affect Our Future Results or the Market Price of Our Stock.

Our product and service revenues, in particular maintenance revenues, have also been affected as the result of the transition of some of our customers to our Wind River Platforms. Fees from the Wind River Platforms are recorded as subscription revenue ratably over the license term, which is typically one year. In contrast, under our perpetual model, a significant percentage of the transaction fee is recognized in the quarter the transaction is completed. While this has impacted, and will continue to impact, our revenues in the short-term as customers transition to the Wind River Platforms, our deferred revenues have increased to \$82.8 million at April 30, 2005 from \$77.1 million at January 31, 2005 and we expect this trend to continue.

Product Revenues. Product revenues are comprised of perpetual license revenues, including hardware revenues, and production license revenues from perpetual and subscription licensing. The table below sets forth information for such components.

	Three Months Ended		Percentage of	
	April 30,		Total Revenues, net	
	2005	2004	2005	2004
	(In thousands, except percentages)			
Perpetual license revenues	\$ 11,882	\$ 13,292	19%	25%
Production license revenues	18,162	13,472	30	26
Total product revenues	\$ 30,044	\$ 26,764	49%	51%

Perpetual license revenues declined 11% in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. This was primarily due to the transition to our Wind River Platforms, which are accounted for as subscription revenues. We expect perpetual licenses and hardware revenues to continue to decline as the transition to our Wind River Platforms continues.

Production license revenues increased 35% in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. This increase in the three months ended April 30, 2005 was primarily due to our customers manufacturing more embedded devices that include our technologies, especially in the networking segment, further improvement in our execution in the area of customer compliance and reporting and improvement in our customers' own quarterly reporting processes.

Subscription Revenues. Subscription revenues were \$16.4 million in the three months ended April 30, 2005 compared to \$9.5 million in the three months ended April 30, 2004. The significant increase in the three months ended April 30, 2005 in subscription revenues resulted from the continued transition of a number of our customers from our traditional perpetual licensing model to our Wind River Platforms under the enterprise license model, also known as our subscription model, and increasing business activity levels. We expect that subscription revenues will continue to increase both in absolute dollars and as a percentage of revenue in the future. Fiscal 2004 was the first full fiscal year in which we sold our Wind River Platform products under the enterprise license model. The transition of customers to our enterprise license model will continue to affect the level of our overall revenues because we recognize fees under this business model ratably as opposed to our perpetual model where a significant proportion of the fee is recognized at the time the transaction is completed.

Service Revenues. Service revenues are derived from fees for professional services, which include design and development fees, software maintenance contracts, customer training and consulting.

	Three Months Ended April 30,		Percentage of Total Revenues, net	
	2005	2004	2005	2004
(In thousands, except percentages)				
Maintenance revenues	\$ 8,759	\$ 9,897	14%	19%
Other service revenues	6,592	6,606	11	12
Total service revenues	\$ 15,351	\$ 16,503	25%	31%

Maintenance revenues declined 11% in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. The decline is primarily due to the continued transition of our customers to our Wind River Platforms, which include maintenance as a part of the subscription fee. We expect maintenance revenues will continue to decline as our customers' transition to our Wind River Platforms continues. Other service revenues remained flat in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. During the quarter ended April 30, 2005, we generated \$3.5 million in revenue from fixed-price services contracts compared to \$320,000 in the quarter ended April 30, 2004. Fixed-price services contracts are accounted for under the percentage-of-completion method of accounting. Time and materials services contracts are recognized as services are performed.

Table of Contents

In the short-term, we expect revenues generated from fixed-price services contracts to be similar to that generated in the first quarter of fiscal 2006.

Revenues by Geography

	Three Months Ended April 30,		Percentage of Total Revenues, net	
	2005	2004	2005	2004
(In thousands, except percentages)				
North America	\$ 33,854	\$ 29,397	55%	56%
EMEA	14,500	12,293	23	23
Japan	8,396	6,884	14	13
Asia Pacific	5,011	4,198	8	8
Total revenues, net	\$ 61,761	\$ 52,772	100%	100%

Revenues from international sales increased by 19% to \$27.9 million in the three months ended April 30, 2005 from \$23.4 million in the three months ended April 30, 2004. The overall increase was due to a 18% increase in revenues from EMEA, a 22% increase in revenues from Japan, and a 19% increase in revenues from Asia Pacific, for the three months ended April 30, 2005 compared to the three months ended April 30, 2004. Revenues from sales in North America increased 15% in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. The increases in revenues in each geographic area over these periods resulted primarily from improvements in the overall worldwide economy and in local economies. The impact of foreign exchange rate movements did not have a significant impact on international revenues during the three months ended April 30, 2005. International revenues accounted for 45% and 44% of total revenues for the three months ended April 30, 2005 and 2004, respectively. We expect international sales to continue to represent a significant portion of our revenues, although the actual percentage may fluctuate from period to period. Our international sales are generally denominated in United States Dollars, Euro, United Kingdom Sterling or Japanese Yen.

Deferred Revenues

Our deferred revenues consist of the following:

	As of Apr. 30, 2005	As of Jan. 31, 2005	Dollar Change	Percentage Change
(In thousands, except percentages)				
Current deferred revenues:				
Subscriptions	\$ 45,720	\$ 40,910	\$ 4,810	12%
Maintenance and other	25,995	24,705	1,290	5

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

Total current deferred revenues	71,715	65,615	6,100	9%
Long-term deferred revenues:				
Subscriptions	10,483	11,067	(584)	(5)%
Maintenance and other	582	425	157	37%
Total long-term deferred revenues	11,065	11,492	(427)	(4)%
Total deferred revenues	\$ 82,780	\$ 77,107	\$ 5,673	7%

During fiscal 2005, we began offering subscription and maintenance periods greater than twelve months and, accordingly, began to record long-term deferred revenues which represents the portion of multi-year contracts that are due to be recognized as revenue in a time period greater than one year from the balance sheet date. The growth in subscription deferred revenues results from the continued transition from our traditional perpetual licensing model to our Wind River Platforms enterprise license model and increasing business activity levels. The growth in deferred revenues for subscriptions during the three months ended April 30, 2005 corresponds to the 11% increase in subscription revenue from the three months ended January 31, 2005. The growth in deferred revenues for maintenance and other during the three months ended April 30, 2005 relates primarily to the additional deferred consulting services revenue, due to timing differences between customer billings and revenue recognition.

Table of Contents*Cost of Revenues*

	Three Months Ended April 30,		Percentage of Associated Revenues, net	
	2005	2004	2005	2004
	(In thousands, except percentages)			
Product	\$ 1,622	\$ 1,330	5%	5%
Subscription	3,673	2,334	22	25
Service	7,886	8,932	51	54
Amortization of purchased intangibles	131	987		
Total cost of revenues	\$ 13,312	\$ 13,583		
Gross margin	\$ 48,449	\$ 39,189		
Gross margin percentage	78%	74%		

The general increase in overall costs of products and services, excluding amortization of purchased intangibles, was primarily attributable to personnel related costs.

Cost of Product. Product-related costs consist primarily of salaries and benefits for employees involved in production, other direct production costs, amortization of capitalized software development costs, royalty payments to third parties for the use of their software, and shipping costs. Cost of product increased by 22% or \$292,000, in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. Direct production costs and manufacturing and distribution costs were \$1.3 million and \$556,000 in the three months ended April 30, 2005, and 2004, respectively. The increase was primarily due to increased hardware costs and personnel costs. Third party royalty costs were \$46,000 and \$614,000 in the three months ended April 30, 2005 and 2004, respectively. The decrease was primarily related to the acquisition of the ScopeTools business unit of Real-Time Operations, Inc. (RTI) in the fourth quarter of fiscal 2005, for which we previously recorded royalty expense. Product-related cost of revenues may be affected in the future by costs of distribution related to the introduction of new products, royalty costs for use of third-party software in our products and by the amortization of capitalized software development costs.

Cost of Subscription. Subscription-related costs of revenues consists primarily of subscription-related costs, including salaries and benefits for production employees, other direct production costs, amortization of capitalized software development costs, royalty payments to third parties for the use of their software, shipping costs and costs of providing subscription-related maintenance and support services. Subscription-related maintenance and support service costs were \$2.9 million and \$1.3 million during the three months ended April 30, 2005 and 2004, respectively, and subscription-related production costs were \$788,000 and \$1.0 million during the three months ended April 30, 2005 and 2004, respectively. The increase in absolute dollars in subscription costs in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was primarily due to the allocation of maintenance and support services costs as a result of the related increase of subscription revenue offset by a reduction in product related costs due to a decrease in third party royalty costs due to the acquisition of the ScopeTools business unit of RTI in the fourth quarter of fiscal 2005, for which we previously recorded royalty expense. The decrease in cost of subscription revenues as a percentage of subscription revenues in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was due primarily to the fact that the fixed cost elements of cost of revenue were spread over a higher revenue stream. We expect costs of subscriptions to continue to fluctuate as a percentage of subscription revenue based on the level of sales of our Wind River Platforms and the continued transition of existing customers from our perpetual based licensing to the enterprise license model. Cost of subscriptions may be affected in the future by the direct production costs, amortization of capitalized software development costs, costs of distribution, royalty costs for use of third party software in our products, and the costs of providing subscription-related maintenance and support services.

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

Cost of Service. Service-related cost of revenues consist primarily of personnel related costs associated with providing services, including consulting services, to customers and the infrastructure to manage a services organization, as well as costs to recruit, develop and retain services professionals. Cost of service decreased by 12% or \$1.0 million in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. The decrease in absolute dollars of service costs in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was primarily due to reduced use of outside consultants and reduced training costs and an increased allocation of costs to cost of subscription. We realized overall cost reductions of \$195,000 in professional service costs relating primarily to internal payroll and external contractor costs, \$698,000 in training costs due to allocations and \$154,000 in maintenance costs in the three months ended April 30, 2005 compared to the quarter ended April 30, 2004. The decrease in service costs as a percentage of service revenues in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was related to the decrease in service costs. We expect cost of services to continue to fluctuate as a percentage of service revenue based on our ability to fully utilize our professional services organization.

Table of Contents

Amortization of Purchased Intangibles. Amortization of purchased intangibles relates to amortization of completed technology acquired through purchase transactions. The decrease in amortization in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was due to a lower amortizable base of purchased intangible assets during the respective periods. In January 2005, we acquired the assets and obligations of the ScopeTools business unit of RTI and recorded \$2.1 million in completed technology which is expected to be amortized to cost of revenue over a four-year period.

Operating Expenses

We allocate the total costs for information technology, facilities and fixed asset depreciation to each of the functional areas based on worldwide headcount data. Information technology allocated costs includes salaries, employee-related costs, outside consulting costs for projects, communication costs, hardware and software maintenance contracts costs and depreciation expense for fixed assets. Facilities allocated costs include facility rent for the corporate offices as well as shared function offices, property taxes, depreciation expenses for office furniture and other department operating costs. Fixed asset depreciation allocated costs include straight-line depreciation expense on buildings, leasehold improvements, computer equipment, software, furniture and office equipment.

The general increase in absolute dollars in selling and marketing, product development and engineering and general and administrative costs, relates primarily to increases in personnel expenses, consulting expenses and general operating expenses.

Selling and Marketing. Selling and marketing expenses consist primarily of product and other marketing related expenses, compensation related expenses, sales commissions, facility costs and travel costs.

	Three Months Ended		Percentage
	April 30,		
	2005	2004	Change
	(In thousands, except percentages)		
Selling and marketing	\$ 24,197	\$ 20,959	15%
As a percentage of total revenues	39%	40%	

The increase in absolute dollars of selling and marketing expenses in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was \$3.2 million or 15%. Salaries and related fringe benefit costs increased by \$956,000, due to an increased headcount in the sales organization, and sales commission costs increased by \$1.3 million, due to the increase in revenue. Advertising also increased by \$987,000, due to increased investment in marketing expenditures to strengthen the Wind River brand. These increases were offset by a decrease in facility and information technology allocation costs of \$548,000. We expect an increase in selling and marketing expenses in absolute dollars in both the short- and long-term as we continue to focus on long-term growth in the areas of sales and marketing personnel and marketing and advertising programs.

Product Development and Engineering Expenses. Product development and engineering expenses consist primarily of payroll related expenses, facility costs and consulting fees for our product research and development organization.

	Three Months Ended		Percentage
	April 30,		
	2005	2004	Change
	(In thousands, except percentages)		
Product development and engineering	\$ 16,774	\$ 15,116	11%
As a percentage of net revenues	27%	29%	

The increase in absolute dollars of product development and engineering expenses in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was \$1.7 million or 11%. This increase was primarily due to increases in overall expenditures in research and development programs to ensure that our products continue to meet our customer demands. Salaries and benefits increased by \$2.2 million and external consultant costs increased by \$714,000 during the three months ended April 30, 2005 compared to the three months ended April 30, 2004. These increases were offset by a decrease of \$225,000 in facility and information technology allocation costs. During the three months ended April 30, 2004, we made a payment of \$250,000 related to a strategic alliance. Additionally, we received \$984,000 and \$607,000 in the three months ended April 30, 2005 and 2004, respectively, of funded research and development which offset our gross research and development expenses. In the short-term, dollars received for funded research and development accounted for as an offset to gross product development and engineering expenses may vary depending on the timing and nature of work performed under these programs. In the long-term, we expect the dollars received for funded research and development to be reduced significantly as our programs wind down. We expect that product development and engineering expenses in absolute dollars will not increase significantly in the short-term.

Table of Contents

General and Administrative Expenses. General and administrative expenses consist primarily of compensation-related expenses, facilities-related expenses and external fees for professional services, such as legal and accounting.

	Three Months Ended		
	April 30,		Percentage
	2005	2004	Change
	(In thousands, except percentages)		
General and administrative	\$ 5,584	\$ 5,210	7%
As a percentage of net revenues	9%	10%	

The increase in absolute dollars of general and administrative expenses in the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was \$374,000 or 7%. The increase was primarily due to increased professional services costs of \$631,000 related to attestation and legal costs, an increase in facility and information technology allocation costs of \$370,000, offset by a decrease in external consultant costs of \$428,000. We believe that general and administrative expenses will not increase significantly in the short-term. However, we do expect an increase in absolute dollars in the long-term, as we invest in worldwide staff and infrastructure in the areas of information systems and finance and administration.

Amortization of Other Intangibles

	Three Months Ended		
	April 30,		Percentage
	2005	2004	Change
	(In thousands, except percentages)		
Amortization of other intangibles	\$ 23	\$ 171	(87)%
As a percentage of net revenues	%	%	

The decrease in amortization of other intangibles for the three months ended April 30, 2005 compared to the three months ended April 30, 2004 was due to a lower amortizable base of other intangible assets during the respective periods. In January 2005, we acquired the assets and obligations of the ScopeTools business unit of RTI and recorded \$400,000 in other intangible assets, which are being amortized to operating expenses over a two to seven year period.

Restructuring Charges. As a result of decisions undertaken regarding the cost structure of our business, beginning in fiscal 2002, we implemented restructuring plans that were designed to align our anticipated revenues more closely with our cost structure. In connection with the restructuring programs, we recorded \$185,000 and \$1.2 million of restructuring charges during the three months ended April 30, 2005 and 2004, respectively. During the three months ended April 30, 2005, we recorded additional charges under SFAS No. 146 Accounting for Costs Associated with Exit or Disposal Activities (SFAS No. 146) associated with the restructuring program undertaken in the last quarter of fiscal 2005. Additionally, we recorded a charge associated with employee litigation as a result of previous restructurings and revised estimates downward for actual experience in the amount of \$143,000 in employee-related items, including outplacement fee and judgments rendered in employee litigation matters. These costs have been classified as operating expenses. Our restructuring programs for the three months ended

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

April 30, 2005 and 2004 have been accounted for in accordance with SFAS No. 146. For a further discussion of factors that may affect the success of the restructuring program, see Factors That May Affect Our Future Results or the Market Price of Our Stock. Our restructuring plans may not enable us to achieve long-term profitability or achieve our business objectives.

Table of Contents

As of April 30, 2005, our restructuring liabilities related to our restructuring programs for the three months ended April 30, 2005, fiscal 2005 and 2003 totaled approximately \$1.4 million. There were no remaining restructuring liabilities for fiscal 2004. The following table summarizes our restructuring liabilities as of April 30, 2005:

	Work Force Reduction	Consolidation of Excess Facilities	Other	Total
(In thousands)				
Restructuring liabilities as of January 31, 2005	\$ 246	\$ 406	\$ 752	\$ 1,404
Cash charges	91		237	328
Reversals	(87)		(56)	(143)
Total charges	4		181	185
Cash payments	(52)	(91)	(68)	(211)
Restructuring liabilities as of April 30, 2005	\$ 198	\$ 315	\$ 865	\$ 1,378

We expect the workforce reductions and consolidation of excess facilities to be paid out by the end of the third quarter of fiscal 2006.

Other Income (Expense)

	Three Months Ended		Percentage of	
	April 30,		Total Revenues, net	
	2005	2004	2005	2004
(In thousands, except percentages)				
Interest income	\$ 1,503	\$ 1,707	3%	3%
Interest expense	(1,135)	(1,859)	(2)	(3)
Other income (expense), net	136	554		1
Total other income	\$ 504	\$ 402	1%	1%

Interest Income. Interest income declined 12% or \$204,000, in the three months ended April 30, 2005 compared to the three months ended April 30, 2004. The decrease in interest income was primarily due to lower invested balances. The average yield for the three months ended April 30, 2005 was 3.41% compared to 2.69% for the three months ended April 30, 2004. Total cash and cash equivalents, investments and restricted investments totaled \$188.2 million and \$271.8 million as of April 30, 2005 and April 30, 2004, respectively.

Interest Expense. Interest expense decreased by 39% or \$724,000, in the three months ended April 30, 2005 as compared to the three months ended April 30, 2004. We pay interest on our outstanding 3.75% convertible subordinated notes semi-annually and record the amortization of

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

certain issuance costs associated with these notes as other expense. In March 2005, we repurchased \$20.0 million of our convertible subordinated notes and as a result, recorded a \$312,000 expense related to premium paid and the related acceleration of expense of bond issuance costs. In the three months ended April 30, 2004, we incurred interest of \$1.4 million on our subordinated convertible notes which totaled \$150.0 million at April 30, 2004 and interest of approximately \$184,000 on our loan facility with Wells Fargo. In July of fiscal 2005, the loan facility was fully paid.

Other Income (Expense), Net. Other income (expense) consists primarily of dividends received of \$311,000 and \$138,000 for the three months ended April 30, 2005 and 2004, respectively, and gain on sale of equity investments of \$375,000 for the three months ended April 30, 2004.

Provision For Income Taxes.

We recorded a tax provision of \$386,000 and \$700,000 in the three months ended April 30, 2005 and 2004, respectively. Our tax provision is based on estimates of our expected liability for domestic and foreign income and withholding taxes that will be incurred during the year. The decrease in the tax provision of \$314,000 was primarily related to lower foreign withholding taxes and lower foreign income taxes.

Deferred income taxes are recorded in accordance with SFAS No. 109, Accounting for Income Taxes (SFAS No. 109) and are determined based on the differences between financial reporting and the tax basis of assets and liabilities using the tax rates and laws in effect when the differences are expected to reverse. SFAS No. 109 provides for recognition of deferred tax assets if the realization of such assets is more likely than not to occur. With the exception of Germany, we have determined that it is more likely than not that our deferred tax assets in all jurisdictions will not be realized, due to uncertainties relating to our ability to utilize our deferred tax assets, primarily net operating losses carried forward and foreign tax credits, before they expire. Accordingly, we have recorded a deferred tax asset of \$682,000 in Germany and a full valuation allowance against the remainder of our deferred tax assets at April 30, 2005 and January 31, 2005.

Table of Contents*Post Close Events*

On May 25, 2005, we announced preliminary financial results for the quarter ended April 30, 2005. Subsequent to this announcement, but before the completion of our Quarterly Report on Form 10-Q, management determined that it was appropriate to make adjustments to these previously announced financial results, specifically adjustments to certain accruals that resulted in a decrease to net income of \$49,000. In addition, certain costs were reclassified within the categories of costs of revenues, with no impact on total cost of revenues.

Liquidity and Capital Resources

As of April 30, 2005, we had working capital of approximately \$17.3 million, and cash, cash equivalents and investments of approximately \$188.2 million, which included \$26.2 million of cash and cash equivalents, \$30.6 million of short-term investments and \$131.4 million of investments with maturities of greater than one year. We invest primarily in highly liquid, investment-grade instruments. We have debt service and principal repayment obligations, which could affect our liquidity, cash reserves and ability to obtain additional financing if we need or want to do so.

Cash Flows

Our consolidated statements of cash flows are summarized below:

	Three Months Ended April 30,	
	2005	2004
	(In thousands)	
Net cash provided by operating activities	\$ 11,222	\$ 9,101
Net cash provided by (used in) investing activities	8,389	(16,776)
Net cash provided by (used in) financing activities	(15,684)	4,474

Operating activities primarily include the net income or loss for the periods under consideration, non-cash charges such as depreciation and amortization expense and changes in assets and liabilities. In the three months ended April 30, 2005, our operating activities provided net cash of \$11.2 million compared to \$9.1 million in the three months ended April 30, 2004.

Net cash provided by operating activities for the three months ended April 30, 2005, consisted of cash provided by operations of \$5.2 million and an increase in cash of \$6.0 million arising from changes in assets and liabilities, primarily related to a decrease in accounts receivable and an increase in deferred revenues. The decrease in accounts receivable, net, of \$7.8 million was primarily due to strong cash collections and the increase in deferred revenue of \$6.0 million was due primarily to the customer adoption of our Wind River Platforms under the enterprise license model, which is a subscription-based model. Under this model, customers typically pay for the associated subscription fees upfront under our standard business terms whereas revenue is recognized ratably over the term of the subscription period, typically one year. These increases to cash provided by operations were offset by decreases in accrued liabilities and accrued compensation of \$2.5 million and \$3.2 million,

respectively.

Net cash provided by operating activities for the three months ended April 30, 2004, consisted of cash used in operations of \$64,000 and an increase in cash of \$9.2 million arising from changes in assets and liabilities. During the three months ended April 30, 2004, we paid \$1.4 million relating to our restructuring activities, primarily severance costs. The cash paid for restructuring activities was offset primarily by a decrease in accounts receivable, net, of \$5.2 million primarily due to strong cash collections and an increase in deferred revenue of \$6.7 million relating primarily to the customer adoption of our Wind River Platforms under the enterprise license mode.

Cash from operations includes net income of \$1.8 million and net loss of \$3.8 million offset primarily by depreciation and amortization (including amortization of bond issuance costs) of \$2.4 million and \$3.7 million in the three months ended April 30, 2005 and 2004, respectively. Our operating cash flows depend heavily on the level of our sales. To a large extent our sales depend on general economic conditions affecting us and our customers, as well as the timing of new product introductions and other competitive factors and our ability to control expenses successfully.

Our investing activities provided net cash of \$8.4 million and used net cash of \$16.7 million in the three months ended April 30, 2005 and 2004, respectively. Investing activities generally relate to the purchase of investments, business acquisitions and equipment

Table of Contents

purchases, partially offset by cash provided from the sale and maturity of investments. Acquisitions of property and equipment totaled \$1.5 million and \$1.1 million for the three months ended April 30, 2005 and 2004, respectively. The majority of the change in the periods was related to activity with our investments.

Our financing activities used net cash of \$15.7 million and provided net cash of \$4.5 million in the three months ended April 30, 2005 and 2004, respectively. During the three months ended April 30, 2005, and 2004, we received \$4.4 million and \$4.5 million respectively, from the issuance of common stock from employee stock option exercises. Additionally, in the three months ended April 30, 2005, we repurchased \$20.0 million of the convertible subordinated notes for a total cash outlay of \$20.1 million.

Convertible Subordinated Notes

In December 2001, we issued \$150.0 million of 3.75% convertible subordinated notes due December 2006. The notes are unsecured and subordinate to all existing and future senior debt. The notes mature on December 15, 2006, unless earlier redeemed or converted. Interest on the notes is payable in cash semi-annually in arrears on June 15 and December 15 of each year. The notes may be converted, at the option of the holder, into our common stock at any time at the then-current conversion price, initially \$24.115 per share. We may redeem all or a portion of the notes for cash at the redemption price of 100.75% of the principal amount between December 15, 2004 and December 15, 2005 and 100.0% of the principal amount beginning December 15, 2005 and thereafter.

During the three months ended January 31, 2005, we repurchased \$75.0 million of the notes on the open market for an aggregate price of \$75.4 million. Additionally, we expensed \$1.0 million in unamortized bond issuance costs, resulting in a total recognized loss on the repurchase of \$1.4 million. In March 2005, we repurchased an additional \$20.0 million of the convertible subordinated notes for a total cash outlay of \$20.1 million. We expensed \$257,000 in unamortized bond issuance costs, resulting in total recognized loss on the repurchase of \$312,000. As of April 30, 2005, \$55.0 million in convertible subordinated notes (convertible into 2.3 million shares) remained outstanding.

The indenture under which the notes were issued provides that an event of default will occur if (i) we fail to pay principal or premium on the notes, (ii) we fail to pay interest on the notes and fail to cure such non-payment within 30 days, (iii) we fail to perform any other covenant required of us in the indenture and the failure is not cured or waived within 60 days, or (iv) we or one of our significant subsidiaries fails to pay, at final maturity or upon acceleration, any indebtedness for money borrowed in an outstanding principal amount in excess of \$35.0 million, including lease commitments, and the indebtedness is not discharged, or the default is not cured, waived or rescinded within 60 days after written notice is provided in accordance with the terms of the indenture. If any of these events of default occurs, either the trustee or the holders of at least 25% of the outstanding notes may declare the principal amount of the notes to be due and payable. In addition, an event of bankruptcy, insolvency or reorganization (involving us or any of our significant subsidiaries) will constitute an event of default under the indenture and, in that case, the principal amount of the notes will automatically become due and payable.

In the event of a change in control, the bondholders may require us to purchase our notes at 100% of the principal amount, plus accrued interest; this purchase could be completed in cash, our common stock or common stock of the parent corporation of the acquiring corporation, if publicly traded, or a combination thereof.

Commitments

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

In April 2003, in connection with the termination of the synthetic leases for our headquarters facility, we entered into a loan facility with a financial institution in the aggregate principal amount of \$57.4 million, consisting of a non-revolving loan commitment of \$37.4 million and a term loan of \$20.0 million. As of April 29, 2005, we elected to terminate the loan facility.

Contractual Obligations

As of April 30, 2005, our future financial commitments, including interest payments, were as set forth in the table below:

	Payments due by period				
	Total	Less than 1 year (3)	1-3 years	3-5 years	More than 5 years
	(In thousands)				
Convertible subordinated notes (1)	\$ 55,000	\$	\$ 55,000	\$	\$
Contractual interest on convertible subordinated notes	3,352	1,547	1,805		
Operating leases (2)	20,779	3,033	5,744	3,479	8,523
	\$ 79,131	\$ 4,580	\$ 62,549	\$ 3,479	\$ 8,523

(1) Consists of \$55.0 million, 3.75% convertible subordinated notes. See [Convertible Subordinated Notes](#) above.

Table of Contents

- (2) Minimum, aggregate, future sublease income to be received under noncancelable subleases is approximately \$99,500.
- (3) For the nine months ended January 31, 2006.

In fiscal 2005, we implemented the first phase of the next version of our enterprise resource planning system. In connection with the implementation, we incurred an aggregate of \$3.9 million of external costs in fiscal 2005. Of these costs, \$2.5 million were capitalized during fiscal 2005. In addition, \$450,000 remaining outstanding at January 31, 2005, was paid in the three months ended April 30, 2005. In fiscal 2006, we will implement the second phase of this enterprise resource planning system. In connection with the implementation, we expect to incur approximately \$800,000 in external consulting costs during the second and third quarters of fiscal 2006.

We believe that existing cash, cash equivalents and investments, together with any cash generated from operations will be sufficient to fund our operating activities, capital expenditures, and other obligations for the foreseeable future. However, if during that period or thereafter we are not successful in generating sufficient cash flow from operations or in raising additional financing when required in sufficient amounts on terms acceptable to us, our business could suffer.

We currently plan to reinvest our cash generated from operations in new short and long term investments, in high-quality financial, government, and corporate securities or other investments, consistent with past investment practices, and therefore net cash used in investing activities may increase. However, cash could also be used in the future for acquisitions or strategic investments. Cash may also be used to repurchase equity under our stock repurchase program or repurchase additional subordinated convertible notes.

Off-Balance Sheet Arrangements

As of April 30, 2005, we did not have any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of Regulation S-K promulgated by the SEC.

Recent Accounting Pronouncements

In December 2004, the FASB issued SFAS No. 123 (revised 2004), *Share-Based Payment*, (SFAS No. 123R), that addresses the accounting for share-based payment transactions in which an enterprise receives employee services in exchange for either equity instruments of the enterprise or liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. The statement eliminates the ability to account for share-based compensation transactions using the intrinsic value method as prescribed by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*, and generally requires that such transactions be accounted for using a fair-value-based method and recognized as expenses. The statement requires companies to assess the most appropriate model to calculate the value of the options. We currently use the Black-Scholes option pricing model to value options and are currently assessing which model we may use in the future under the statement and may deem an alternative model to be the most appropriate. The use of a different model to value options may result in a different fair value than the use of the Black-Scholes option-pricing model. In addition, there are a number of other requirements under the new standard that will result in differing accounting treatment than currently required. These differences include, but are not limited to, the accounting for the tax benefit on employee stock options and for stock issued under our employee stock purchase plan. In addition to the appropriate fair value model to be used for valuing share-based payments, we will also be required to determine the transition method to be used at date of adoption. The allowed transition methods include prospective and retroactive adoption options. Under the retroactive options, prior periods may be restated either as of the beginning of the year of adoption or for all periods presented. The prospective method requires that compensation expense be recorded for all unvested stock options and restricted stock at the beginning of the first quarter of adoption of SFAS No. 123R, while the retroactive methods would record compensation expense for all unvested stock options and restricted stock beginning with the first period restated. The effective date of the new standard for our Consolidated

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

Financial Statements is our first quarter of fiscal 2007. In March 2005, the staff of the SEC issued Staff Accounting Bulletin No. 107 (SAB 107) relating to the adoption of SFAS No. 123 R.

Upon adoption, this statement will have a significant impact on our Consolidated Financial Statements, specifically our statement of operations and earnings per share on a quarterly and annual basis, as we will be required to expense the fair value of our stock option grants and stock purchases under our employee stock purchase plan rather than disclose the impact on our consolidated net income within our footnotes as is our current practice (see Note 1 in Notes to Condensed Consolidated Financial Statements contained herein). The amounts disclosed within our footnotes are not necessarily indicative of the amounts that will be expensed upon the adoption of SFAS No. 123R. Compensation expense calculated under SFAS No. 123R and SAB 107 may differ materially from amounts currently disclosed within our footnotes based on changes in the fair value of our common stock, changes in the number of options granted or the terms of such options, the treatment of tax benefits and changes in interest rates or other factors. In addition, upon adoption of SFAS No. 123R, we may choose to use a different valuation model to value the compensation expense associated with our employee stock options.

Table of Contents

In March 2004, the EITF reached a consensus on the remaining portions of EITF 03-01, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, (EITF 03-01) effective for the first reporting period beginning after June 15, 2004. EITF 03-01 provides new disclosure requirements for other-than-temporary impairments on debt and equity investments. Companies are required to disclose quantitative information about: (i) the aggregate amount of unrealized losses, and (ii) the aggregate related fair values of investments with unrealized losses, segregated into time periods during which the investment has been in an unrealized loss position of less than 12 months and greater than 12 months. In addition, investors are required to disclose the qualitative information that supports their conclusion that the impairments noted in the qualitative disclosure are not other-than-temporary. In September 2004, the FASB approved FASB Staff Position EITF 03-01, which defers the effective date for recognition and measurement guidance contained in EITF 03-01 until certain issues are resolved. In September 2004, the FASB delayed the accounting provisions of EITF 03-1; however the disclosure requirements remain effective for annual periods ending after June 15, 2004. We will evaluate the additional provisions of this EITF upon its finalization.

Factors That May Affect Our Future Results or the Market Price of Our Stock

Our business faces significant risks. The risks described below may not be the only risks we face. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our business operations or have a negative impact on our stock price. If any of the events or circumstances described in the following risks actually occur, our business, financial condition or results of operations could suffer, and the trading price of our common stock could decline.

We may not continue to increase adoption of our enterprise license model.

An increasing proportion of our products are licensed under an enterprise license model that is based upon subscription licenses rather than our traditional perpetual licenses. There is a risk that we will not be able to continue or increase our rate of adoption by new or transitioning customers to our subscription-based model, that customers may not accept the new products we offer under our enterprise license model or that they may reject the terms of the model itself. In addition, although enterprise licenses represent a potential source of renewable license revenue, there is also a risk that new and transitioned customers will not renew their licenses at the end of the term.

There is a further risk that we may remain dependent upon large end-of-quarter transactions, that the more complex and time consuming negotiations for enterprise licenses may affect our ability to close such transactions, that customers who purchase enterprise licenses may spend less in the aggregate over the term of the enterprise license than if they had been required to purchase perpetual licenses, and that because our enterprise license model includes limited services, customers may purchase fewer stand-alone services from us, which could negatively impact our services revenue. In any such event, our future revenue and earnings could be below our expectations.

Our enterprise license model has impacted the timing of our reported revenues.

The adoption of a subscription-based license model has impacted the timing of our reported revenues. Under the enterprise license model revenues are recognized ratably over the subscription period. By contrast, our traditional perpetual license requires a majority of license revenues to be recognized in the quarter in which the products are delivered and a much smaller amount relating to the fair value of the maintenance being deferred and recognized subsequently over the maintenance period. Therefore, an order for a subscription-based license will result in lower current-quarter revenue than an equal-sized order for a perpetual license. As a result, our reported revenues have been affected by the adoption of the enterprise license model for our subscription-based products. The impact on near-term and deferred revenues will continue to depend on the rate at which customer s adoption or transition from our perpetual model to our enterprise license model. In addition, an increase in the number of subscription license renewals on multi-year terms may result in larger deferred revenues. To the extent that the adoption rate is

higher than we expect, we may experience a greater decline in near-term revenues, as well as an increase in deferred revenues. If we do not successfully manage the shift in our revenues to our enterprise license model, we may not be able to manage our expenses, many of which are fixed in nature, which could have an adverse effect on our profitability.

Because a significant portion of our revenues continues to be derived from production licenses, we are dependent upon the ability of our customers to develop and penetrate new markets successfully.

Our production license revenues depend both upon our ability to successfully negotiate production license agreements with our customers and, in turn, upon our customers' successful commercialization of their underlying products. In particular, we derive significant revenues from customers that develop products in highly competitive and technologically complex markets such as the Internet infrastructure, server and storage, digital consumer, aerospace and defense, industrial control and automotive markets. If these customers sell fewer products or otherwise face significant economic difficulties, our revenues will decline. For example, our revenues from production licenses increased 35% in the three months ended April 30, 2005, compared to the three months ended April 30,

Table of Contents

2004, which we believe is primarily due to our customers' response to the current market conditions in the high-technology sector. We cannot control our customers' product development or commercialization or predict their success. In addition, we depend on our customers to accurately report the use of their products in order for us to collect our revenues from production licenses. If our customers are not successful with their products or do not accurately report use of their products to us, our production license revenues may decline significantly.

We have adopted an open source strategy that may not be successful or may expose us to additional risks.

We have adopted a strategy to address the open source market, and we recently released the first of our development tool products and the first of our platform products based on open source, and also announced the upcoming release of other platform products based on open source. We cannot be certain whether this strategy will be successful and it may create additional risks for us. Specifically, we cannot be certain that we will be able to develop the products necessary to satisfy customer demand, or that our customers will adopt our products based on open source. Additionally, even if our products are adopted by our customers, they may not be profitable. Very few open source companies have been profitable and we may not be able to generate profits on our Linux-based offerings. Moreover, it is possible that these efforts to coexist with the open source movement could result in a decline in sales of our proprietary software either as a result of a diversion of internal resources or customer preference. Additionally, customers may defer orders in anticipation of our new products. If any of these events were to occur, our revenues and earnings could be adversely affected.

As our products that include open source components are adopted, we face increased legal risks, which could affect our ability to develop or sell our open source products. Our open source strategy may make us increasingly vulnerable to claims that our products infringe third-party intellectual property rights, in particular because many of the open source components we may incorporate with our products are developed by numerous independent parties over whom we exercise no supervision or control. Third parties may, in particular, assert claims for infringement or claims based on trade secret theories. Our risk is further exacerbated by our lack of access to unpublished software patent applications. Defending claims of infringement, even claims without significant merit, can be expensive. An adverse legal decision affecting our intellectual property could materially harm our business. It is also possible that our own intellectual property rights in derivative works we develop under the GNU General Public License (GPL) that applies to Linux, or other open source license, may be infringed and that as a result we may need to bring our own claim against third parties.

In addition, the enforceability of the GPL and other open source licenses affect the success of our open source strategy. The GPL states that any program licensed under it may be liberally copied, modified and distributed. The GPL is a subject of litigation in the case of *The SCO Group, Inc. v. International Business Machines Corp.*, pending in the United States District Court for the District of Utah. It is possible that this court would hold the GNU license to be unenforceable in that litigation, that the GNU license or other open source license could be found to be unenforceable in a separate legal challenge, or that someone could assert a claim for proprietary rights in a program developed and distributed under them. If an open source license that applies to the licensing of components of our open source products is found to be partially or completely unenforceable, or if there are claims of infringement, we could be required to obtain licenses from third parties in order to continue offering our products, reengineer our products, or discontinue the sale of our products in the event reengineering could not be accomplished on a timely basis. An adverse legal decision affecting our intellectual property could materially harm our business.

Uncertainty regarding the legal risks related to open source components could affect sales of our open source products generally. Finally, as a result of legal concerns about open source, we may be forced by our customers to adopt additional indemnification or otherwise protect them from potential threats by third parties. In any such event, our financial condition and results of operations may be adversely affected.

If we do not continue to address new and rapidly changing markets and increasingly complex technologies successfully and deliver our products on a timely basis, our revenues and operating results will decline.

The DSO market is characterized by ongoing technological developments, evolving industry standards and rapid changes in customer requirements and product offerings in the device market. Our success depends upon our ability to adapt and respond to these changes in a timely and cost-effective manner. If we fail to continually update our existing products to keep them current with customer needs or to develop new or enhanced products to take advantage of new technologies, emerging standards and expanding customer requirements, our existing products could become obsolete and our financial performance would suffer. We have from time to time experienced delays in the commercial release of new technologies, new products and enhancements of existing products. These delays are commonplace in the software industry due to the complexity and unpredictability of the development work required. If we fail to commercially release new products on schedule as announced, our financial performance could suffer. We must effectively market and sell new product offerings to key customers, because once a customer has designed a product with a particular operating system, that customer typically is reluctant to change its supplier due to the significant related costs. If we cannot adapt or respond in a cost-effective and timely manner to new technologies and new customer requirements, or if the new products we develop are not attractive to our customers, sales of our products could decline.

Table of Contents

Numerous factors may cause our total revenues and operating results to fluctuate significantly from period to period. These fluctuations increase the difficulty of financial planning and forecasting and may result in decreases in our available cash and declines in the market price of our stock.

A number of factors, many of which are outside our control, may cause or contribute to significant fluctuations in our total revenues and operating results. These fluctuations make financial planning and forecasting more difficult. In addition, these fluctuations may result in unanticipated decreases in our available cash, which could negatively impact our operations. As discussed more fully below, these fluctuations also could increase the volatility of our stock price. Factors that may cause or contribute to fluctuations in our operating results and revenues include:

acceptance by our customers of our Wind River Platforms;

the number and timing of orders we receive, including disproportionately higher receipt and shipment of orders in the last month of the quarter;

changes in the length of our products' sales cycles, which increase as our customers' purchase decisions become more strategic and are made at higher management levels;

reductions in the number of engineering projects started by our customers due to their own difficult financial or economic conditions;

the impact of impairment charges arising from past acquisitions;

the success of our customers' products from which we derive our production license revenues;

the mix of our revenues as between sales of products that have more upfront revenue, subscriptions that have more deferred revenues and services which have lower profit margins;

our ability to control our operating expenses, and fully realize the impact of the restructuring plans we have implemented;

our ability to continue to develop, introduce and ship competitive new products and product enhancements quickly;

possible deferrals of orders by customers in anticipation of new product introductions;

announcements, product introductions and price reductions by our competitors;

our ability to manage costs for fixed-price consulting agreements;

seasonal product purchases by our customers, which historically have been higher in our fourth fiscal quarter;

the impact of, and our ability to react to, natural disasters and/or events of terrorism;

the impact of, and our ability to react to business disruptions arising from or relating to internet or computer viruses service interruptions;

changes in business cycles that affect the markets in which we sell our products and services;

economic, political and other conditions in the United States and internationally;

foreign currency exchange rates; and

the impact of any stock-based compensation charges arising from the issuance of stock options, stock appreciation rights or any other stock-based awards.

One or more of the foregoing factors may cause our operating expenses to be disproportionately high or may cause our net revenues and operating results to fluctuate significantly. Results from prior periods are thus not necessarily indicative of the results of future periods.

Table of Contents

We face intense competition in the device software industry, which could decrease demand for our products or cause us to reduce our prices.

The DSO industry is characterized by rapid change, new and complex technology and intense competition. Our ability to maintain our current market share depends upon our ability to satisfy customer requirements, enhance existing products and develop and introduce new products. Due to the complexity of the markets in which we operate, where our customers often develop device systems in-house, it is difficult to assess the impact of competition on our business and our related share of the markets that we operate in. We have faced increasing competition in recent years as customers have decreased research and development budgets, sought to increase the value they receive from vendors, including us, attempted to leverage a more competitive bidding process when spending research and development budgets and/or deferred or canceled projects, in whole or in part. As a result, we believe that some customers have elected not to purchase our products and have chosen to undertake such development in-house, selected solutions they perceive to be less expensive or relied upon existing licenses from us rather than making new purchases. We expect the intensity of competition to increase in the future. Increased competitiveness may result in reductions in the prices of our products, run-time royalties and services, lower-than-expected gross margins or loss of market share, any of which would harm our business.

Our primary competition comes from internal research and development departments of companies that develop device systems in-house. In many cases, companies that develop device systems in-house have already made significant investments of time and effort in developing their own internal systems, making acceptance of our products as a replacement more difficult. Additionally, many of these in-house departments may increasingly choose to use open-source software, such as the Linux operating system. We also compete with independent software vendors and, to a limited extent, with open-source vendors. Some of the companies that develop device systems in-house and some of these independent software vendors, such as Microsoft Corporation, may have significantly greater financial, technical, marketing, sales and other resources and significantly greater name recognition than we do.

Demands for rapid change and the increasing complexity of the technology in our industry intensify the competition we face. In addition, our competitors may consolidate or establish strategic alliances to expand product offerings and resources or address new market segments. As a result, they may be able to respond more quickly to new or emerging technologies and changes in customer requirements or to devote greater resources to the development, promotion, sale and support of their products. These factors favor larger competitors that have the resources to develop new technologies or to respond more quickly with new product offerings or product enhancements. We may be unable to meet the pace of rapid development set by our competitors or may incur additional costs attempting to do so, which may cause declines in our operating results. Our competitors may foresee the course of market developments more accurately than we do and could in the future develop new technologies that compete with our products or even render our products obsolete, any of which could adversely affect our competitive position.

If our strategic relationships are not successful, our product offerings, distribution and/or revenues may be adversely impacted.

We have many strategic relationships with semiconductor companies and customers. These strategic relationships are complex because some of the companies that are our strategic partners in certain business areas are also our competitors in other business areas. Our strategic partners may also have concurrent relationships with companies that provide open-source and in-house solutions, which may put pressure on our product development roadmaps, timelines and prices. If we are not successful in developing and maintaining these strategic relationships, our business may be harmed. If our collaborative marketing and distribution agreements terminate or expire, the scope of our product offerings may be restricted, and the distribution of our products and revenues may be adversely impacted.

The costs of software development can be high, and we may not realize revenues from our development efforts for a substantial period of time.

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

Introducing new products that rapidly address changing market demands requires a continued high level of investment in research and development. Our product development and engineering expenses, which are net of funded research and development and capitalized research and development were \$16.8 million, or 27% of total revenues, for the three months ended April 30, 2005, compared to \$15.1 million, or 29% of total revenues, for the three months ended April 30, 2004. If we are required to undertake extensive capital outlays to address changes in the device software optimization market, we may be unable to realize revenue as soon as we may expect. The costs associated with software development are increasing, including the costs of acquiring or licensing new technologies. Our investment in new and existing market opportunities prior to our ability to generate revenue from these new opportunities may adversely affect our operating results.

Table of Contents

Our significant international business activities subject us to increased costs and economic risks.

We develop and sell a substantial percentage of our products internationally. For the three months ended April 30, 2005, revenues from international sales were \$27.9 million, or 45% of total revenues, as compared to \$23.4 million, or 44%, of total revenue for the three months ended April 30, 2004. Additionally, we have investments in, or have made acquisitions of, companies located outside the United States. Over the long-term, we expect to continue to make investments to further support and expand our international operations and increase our direct sales force and distribution network in EMEA, Japan and Asia Pacific. Risks inherent in international operations include:

the imposition of governmental controls and regulatory requirements;

the costs and risks of localizing products for foreign countries;

differences in business cultures and sales cycles;

differences in operation and sales support expenses;

unexpected changes in tariffs, import and export restrictions and other barriers and restrictions;

greater difficulty in accounts receivable collection;

restrictions on repatriation of earnings;

exposure to adverse movements in foreign currency exchange rates;

the burdens of complying with a variety of foreign laws;

difficulties in staffing and managing foreign subsidiaries and branch operations;

the costs and risks of operating in countries experiencing geopolitical conflict and/or terrorism;

the effect of our adoption of global pricing models;

difficulties in integrating products and operations from foreign acquisitions;

the impact of local health and political crises that prohibit or severely limit travel or other interaction with a local economic market;

exposure to local economic slowdowns; and

the need to guarantee credit instruments extended to support foreign operations.

Any of these events, regionally and as a whole, could reduce our international sales and increase our costs of doing business internationally and have a material adverse effect on our gross margins and net operating results.

The rights we rely upon to protect the intellectual property underlying our products may not be adequate, which could enable third parties to use our technology and reduce our ability to compete.

Our success depends significantly upon the proprietary technology contained in our products. We currently rely on a combination of patents, copyrights, trademarks, trade secret laws, and contractual provisions to establish and protect our intellectual property rights in our technology and products. We cannot be certain that the steps we take to protect our intellectual property will adequately protect our rights, that others will not independently develop or otherwise acquire equivalent or superior technology, or that we can maintain our technology as trade secrets. In addition, discovery and investigation of unauthorized use of our intellectual property is difficult. We expect software piracy, which is difficult to detect, to be a persistent problem, particularly in those foreign countries where the laws may not protect our intellectual property as fully as in the United States. Employees, consultants, and others who participate in the development of our products may breach their agreements with us regarding our intellectual property. We might not have adequate remedies for infringement or breach of our proprietary rights by third parties, employees or consultants. Further, we have in the past initiated, and in the future may initiate, claims or litigation against third parties for infringement or breach of our proprietary rights or to establish the validity of our proprietary rights. Whether or not such litigation is determined in our favor, such actions could result in significant expense to us, divert the efforts of our technical and management personnel from productive tasks or cause product shipment delays.

Table of Contents

Patent, trademark or copyright infringement or product liability claims against us may result in costly litigation, cause product shipment delays or require us to expend significant resources. In addition, patent or copyright claims may require us to enter into royalty or licensing arrangements.

We occasionally receive communications from third parties alleging patent, trademark or copyright infringement or other intellectual property claims, and there is always the chance that third parties may assert infringement claims against us or against our customers under circumstances that might require us to provide indemnification. Adoption of our open source strategy increases this risk. Additionally, because our products are increasingly used in applications, such as network infrastructure, transportation, medical and mission-critical business systems, in which the failure of the device system could cause property damage, personal injury or economic loss, we may face product liability claims.

Although our agreements with our customers typically contain provisions intended to limit our exposure to infringement and liability claims, these provisions may not be effective in doing so in all circumstances or in all jurisdictions. Any of these types of claims, with or without merit, could result in claims for indemnification by us or costly litigation, could require us to expend significant resources to develop non-infringing technology or remedy product defects, cause product shipment delays or require us to pay significant damages if the claims are successful. In the case of infringement of another party's intellectual property, we may be required to enter into royalty or licensing agreements; however, we cannot be certain that the necessary licenses will be available or that they can be obtained on commercially reasonable terms. If we are not successful in defending these claims or, with respect to infringement claims, were to fail to obtain royalty or licensing agreements in a timely manner and on reasonable terms, our business, financial condition and results of operations would be materially adversely affected.

Our restructuring plans may not enable us to achieve long-term profitability or achieve our business objectives.

In each of fiscal 2002, through 2005, we implemented restructuring plans that were designed to align our anticipated revenues more closely with our cost structure. Our restructuring plans were based on certain assumptions regarding the cost structure of our business and the nature and severity of the current industry adjustment and general economic trends. We cannot be certain that the assumptions underlying the restructuring plans will prove to be accurate. If they are not, our restructuring plans may not result in the correct alignment of our anticipated revenues and cost structure. Our restructuring plans involved the implementation of a number of initiatives, including headcount reductions, facilities closures, and other cost-control measures, that may adversely affect our ability to realize our current or future business objectives. As a result of the headcount reductions, we eliminated an aggregate of 1,194 employee positions since the beginning of fiscal 2002. We also recorded net restructuring charges of \$185,000 and \$1.2 million in the three months ended April 30, 2005 and 2004 respectively. These measures may adversely affect our ability to realize our current or future business objectives. In addition, the costs actually incurred in connection with restructuring actions may exceed our estimated costs of these actions. Additional restructuring actions may result in further cash and/or non-cash charges, which could have a material adverse effect on our business and results of operations. As a result, we cannot be sure that we will return to long-term profitability as a result of our restructuring plans.

Although we have complied with the certification and attestation requirements under Section 404 of the Sarbanes-Oxley Act of 2002 for the year ended January 31, 2005, we may not be able to continue to meet such requirements annually and our failure to satisfy these requirements could adversely affect our financial results and the price of our common stock.

While we have evaluated our internal controls system as of January 31, 2005 and complied with the management certification and auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002 in connection with our Annual Report on Form 10-K for the year ended January 31, 2005, we may not continue to meet such certification and attestation requirements annually. If we are not able to continue to meet the requirements of Section 404 in a timely manner or with adequate compliance, or if our independent registered public accounting firm does not timely attest to the evaluation, we might be subject to sanctions or investigation by regulatory authorities, such as the SEC or the NASDAQ National Market, which could adversely affect our financial results and the market price of our common stock.

Our management, including our CEO and CFO, does not, however, expect that our disclosure controls or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our disclosure controls or procedures can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the control. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents

The Financial Accounting Standards Board's adoption of SFAS No. 123R will cause, and changes to existing accounting pronouncements or taxation rules or practices may cause, adverse revenue fluctuations, affect our reported results of operations or how we conduct our business.

In December 2004, the FASB adopted SFAS No. 123R, which will require us, starting in the first quarter of fiscal year 2007, to measure compensation costs for all stock-based compensation (including our stock options and employee stock purchase plan, as currently constructed) at fair value and record a compensation charge equal to that value. Also, a change in accounting pronouncements or taxation rules or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective. Other new accounting pronouncements or taxation rules and varying interpretations of accounting pronouncements or taxation practice have occurred and may occur in the future. This change to existing rules, future changes, if any, or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business. We expect the adoption of SFAS No. 123R to have a material adverse impact on our net income or loss and our net income or loss per share by decreasing our income or increasing our losses by the additional amount of such stock option charges. We are currently in the process of evaluating the extent of such impact and cannot quantify the amount of such impact at this time.

Our common stock price is subject to volatility.

In recent years, the stock markets in general and the shares of technology companies in particular have experienced extreme price fluctuations. These recent price fluctuations have often been unrelated or disproportionate to the operating performance of the companies affected. Our stock price has similarly experienced significant volatility. As reported on The NASDAQ National Market, during the quarter ended April 30, 2005, our stock had a high sales price of \$16.34 and a low sales price of \$12.51. In some of our past fiscal quarters, we experienced shortfalls in revenue and earnings from levels expected by securities analysts and investors, which have had an immediate and significant adverse effect on the trading price of our common stock. These factors relating to the fluctuations in our revenues and operating results may continue to affect our stock price. Comments by or changes in estimates from securities analysts as well as significant developments involving our competitors or our industry could also affect our stock price.

In addition, the market price of our common stock is affected by the stock performance of other technology companies generally, as well as companies in our industry and our customers in particular. Other broad market and industry factors may negatively affect our operating results or cause our stock price to decline, as may general political or economic conditions in the United States and globally, such as recessions, or interest rate or currency fluctuations. In particular, the stock market may be adversely impacted, or experience unusual volatility, as a result of the outbreak of armed conflict or hostilities involving the United States or incidences of terrorism in, or directed at, the United States or its allies.

We have substantial financial commitments, which could make it difficult for us to obtain financing and deplete our cash reserves. Additionally, these commitments could be accelerated in certain circumstances, which could have a material adverse effect on our financial condition, results of operations and cash flows.

As of April 30, 2005, we had \$55.0 million in outstanding indebtedness under our 3.75% convertible subordinated notes. As of April 30, 2005, we had cash and cash equivalents of \$26.2 million, short-term investments of \$30.6 million and investments with maturities of greater than one year of \$131.4 million. The indenture under which our convertible subordinated notes were issued contains customary events of default, and also provides that an event of default occurs if we (or one of our significant subsidiaries) fail to pay, at final maturity or upon acceleration, any indebtedness for money borrowed in an outstanding principal amount in excess of \$35.0 million, and the indebtedness is not discharged, or the default is not cured, waived or rescinded within 60 days after written notice is provided in accordance with the terms of the indenture. Under the terms of our convertible subordinated notes, if an event of default were to occur for any of the aforementioned reasons or other reasons and we do not or cannot cure the event of default within specified periods, the lenders could in each case accelerate payment of the indebtedness.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Interest Rate Sensitivity**

Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio and debt obligations.

We have an investment policy that has been approved by our Board. We place our investments with high quality credit issuers and, by policy, limit the amount of credit exposure to any one issuer. As stated in our investment policy, our first priority is to reduce the risk of principal loss. Consequently, we seek to preserve our invested funds by limiting default risk, market risk and reinvestment risk. We mitigate default risk by investing in only high quality credit securities that we believe to be low risk and by positioning our portfolio to respond appropriately to a significant reduction in a credit rating of any investment issuer or guarantor. The portfolio includes only marketable securities with active secondary or resale markets to ensure portfolio liquidity.

Our investment portfolio consists of various marketable debt securities. The longer the duration of these securities, the more susceptible these securities are to general changes in market interest rates. As general market interest rates increase, those securities purchased with a lower yield-at-cost will likely show a mark-to-market unrealized loss. All unrealized losses are due to changes in general market interest rates and bond yields. We expect to realize the full value of all these investments upon their maturity.

Foreign Currency Risk

We may enter into foreign currency forward exchange contracts to manage foreign currency exposures related to certain non-functional currency related inter-company and other non-functional accounts receivable and cash balances. Additionally, we may adjust our foreign currency hedging position by taking out additional contracts or by terminating or offsetting existing forward contracts. These adjustments may result from changes in the underlying non-functional currency exposures or from fundamental shifts in the economics of particular exchange rates. Gains and losses on terminated forward contracts, or on contracts that are offset, are recognized in income in the period of contract termination or offset. Our ultimate realized gain or loss with respect to currency fluctuations will depend on the currency exchange rates and other factors in effect as the contracts mature. As of April 30, 2005, we had outstanding contracts with the following terms:

Buy / Sell:	Sell	Buy	Sell	Buy	Buy
Currency:	GBP()	EURO()	JPY(¥)	CAD(CAD\$)	SEK(kr)
Amount:	2,750,000	11,500,000	130,000,000	4,000,000	16,000,000
Rate:	1.9065	1.2939	106.13	1.2553	7.0701
USD Equivalent:	\$5,242,875	\$14,879,850	\$1,224,913	\$3,186,489	\$2,263,051
Maturity Date:	5/31/05	5/31/05	5/31/05	5/31/05	5/31/05

Contract amounts are representative of the expected amounts to be paid under the terms of these instruments. We do not enter into derivative financial instruments for trading or speculative purposes. As of April 30, 2005, the fair value of the above contracts was not significant.

Equity Price Risk

There have been no material changes to our equity price risk since the fiscal year ended January 31, 2005. See Item 7A, Quantitative and Qualitative Disclosures about Market Risk, in our 2005 Form 10-K for the fiscal year ended January 31, 2005.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Control and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of April 30, 2005 to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in Securities and Exchange Commission rules and forms.

Table of Contents

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On June 7, 2004, Wind River filed a complaint against Green Hills Software, Inc. (Green Hills), a direct competitor, in the Superior Court of California, County of Alameda. The action was transferred to the Superior Court of California, County of Santa Barbara. The subsequently amended complaint requested \$25,000 in damages due to breach by Green Hills of a cooperative marketing and technology agreement entered into between the parties in October 1992. Green Hills subsequently filed an answer and cross-complaint in that action. On January 18, 2005, Green Hills filed a complaint against Wind River in the United States District Court for the Central District of California alleging, among other things, that Wind River violated antitrust and unfair competition laws by allegedly refusing to license our VxWorks product to Green Hills and refusing to market VxWorks separately from the integrated development environment for VxWorks. Green Hills requested an award for damages and injunctive relief on these matters. On April 28, 2005, the Court denied Wind River's motion to dismiss and Green Hill's motion for preliminary injunction. On May 12, 2005, Wind River filed its answer. These related lawsuits are still in the preliminary stages, and it is not possible for Wind River to quantify the extent of potential liability to Green Hills, if any, resulting from the Green Hills lawsuits. Wind River does not believe that the lawsuit brought by Green Hills against Wind River has any merit and intends to defend the action vigorously.

ITEM 5. OTHER INFORMATION

On June 8, 2005, the stockholders of Wind River, upon recommendation of Wind River's Board of Directors (Board), approved the Wind River Systems, Inc. 2005 Equity Incentive Plan (the 2005 Equity Plan). The Board adopted the 2005 Equity Plan on March 10, 2005, subject to stockholder approval, and the 2005 Equity Plan will terminate ten years from the date of such adoption. The 2005 Equity Plan replaces the 1987 Equity Incentive Plan, 1995 Non-Employee Directors' Stock Option Plan, the 1998 Non-Officer Stock Option Plan and the 1998 Equity Incentive Plan (the Predecessor Plans). No further awards will be granted under the Predecessor Plans.

Under the 2005 Equity Plan, the number of shares of common stock available for issuance is 6,250,000 shares, plus any shares subject to outstanding options under the Predecessor Plans that subsequently expire unexercised, up to a maximum of an additional 2,500,000 shares. The 2005 Equity Plan permits the grant of stock options (both incentive and non-qualified), stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units and deferred stock units (the Awards) to eligible employees, directors and consultants. In addition, under the 2005 Equity Plan automatic, non-discretionary grants of non-statutory stock options are made to each non-employee director upon election to the Board and on an annual basis thereafter. The 2005 Equity Plan is primarily administered by the Compensation Committee of the Board. In addition, the Board may itself administer the 2005 Equity Plan or appoint one or more committees to administer the 2005 Equity Plan with respect to employees who are neither officers nor directors.

Edgar Filing: WIND RIVER SYSTEMS INC - Form 10-Q

To permit the payment of compensation that qualifies as performance-based compensation under Internal Revenue Code Section 162(m), in any fiscal year of Wind River, no participant may be granted (i) options and stock appreciation rights together covering more than 1,000,000 shares, except that options and stock appreciation rights covering up to a limit of 3,000,000 shares may be granted to a participant during his or her first fiscal year of employment; (ii) performance units with an initial value greater than \$1,000,000, except that a participant may receive such performance units covering up to a limit of \$3,000,000 in initial value during his or her first fiscal year of employment; and (iii) more than 500,000 shares in the aggregate subject to restricted stock, restricted stock units, performance shares, or deferred stock units, except that a participant may receive such awards covering up to a limit of 1,500,000 shares during his or her first fiscal year of employment at Wind River.

At the administrator's discretion, one or more of the following performance goals may apply to an award: annual revenue, cash position, earnings per share, net income, operating cash flow, operating income, return on assets, return on equity, return on sales, and total stockholder return. Except for cash position, return on equity and total stockholder return, a performance goal may apply either to Wind River or to one of its business units.

The 2005 Equity Plan is filed as Exhibit 10.1 to this Quarterly Report.
