**Item 2.02 Results of Operations and Financial Condition**

Goodrich Petroleum Corporation (the Company) issued a press release on March 15, 2006, reporting its fourth quarter 2005 financial and operating results. The Company is furnishing the press release as Exhibit 99.1 to this Form 8-K.

The pretax present value of our proved reserves, discounted at 10% ( PV10 Value ), as discussed in the attached press release on Exhibit 99.1, represents the discounted future net cash flows attributable to our proved oil and gas reserves before income tax, discounted at 10%. PV10 may be considered a non-GAAP measure as defined by the SEC. We believe that the presentation of the PV10 Value is relevant and useful to our investors because it presents the discounted future net cash flows attributable to our proved reserves prior to taking into account corporate future income taxes and our current tax structure. We further believe investors and creditors utilize our PV10 as a basis for comparison of the relative size and value of our reserves to other companies. The standardized measure of discounted future net cash flows represents the present value of future cash flows attributable to our proved oil and natural gas reserves after estimated future income tax, discounted at 10%. Neither PV10 Value nor standardized measure of discounted future net cash flows reflects the impact of hedging transactions. Below is a reconciliation of the PV10 Value to the standardized measure of discounted future net cash flows (in millions):

PV10 Value	\$ 587
Discounted future income taxes	(177)
<b>Standardized measure of discounted future net cash flows</b>	<b>\$ (410)</b>
