NOTES TO FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2007 AND 2006

1. Summary of significant accounting policies:

A summary of the Company's significant accounting policies consistently applied in the preparation of the accompanying financial statements follows.

Business activity:

Broadway in Chicago, L.L.C. (the Company) is a limited liability company, which was formed under the laws of the State of Illinois. The Company was formed to operate three entertainment facilities for theatre attractions in Chicago, Illinois. The Company began operating at a fourth facility in 2004. The Company presently has a term life of twenty years, with a possible extension of five years with member consent. Three various theatres are owned or leased by related parties and the fourth facility is rented from an unrelated third party.

Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

Cash equivalents:

The Company considers all short-term investments with maturity of three months or less to be cash equivalents.

Receivables:

Accounts receivable are reported at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses on the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience using industry and customer specific data. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote.

Property and equipment:

Depreciation is provided in amounts sufficient to relate the cost of property and equipment to operations over their estimated useful service lives on the straight-line and accelerated methods.
