Cautionary Statement

Certain statements found in this document may constitute forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements reflect management's current views with respect to certain future events and financial performance and include any statement that does not directly relate to any historical or current fact. Words such as anticipate, believe, expect, estimate, forecast, intend, plan, project and similar expressions which indicate future events and trends may identify forward-looking statements. Such statements are based on currently available information and are subject to various risks and uncertainties that could cause actual results to differ materially from those projected or implied in the forward-looking statements and from historical trends. Certain forward-looking statements are based upon current assumptions of future events which may not prove to be accurate. Undue reliance should not be placed on forward-looking statements, as such statements speak only as of the date of this document.

Factors that could cause actual results to differ materially from those projected or implied in any forward-looking statement and from historical trends include, but are not limited to:

increased commoditization of information technology products and digital media related products and intensifying price competition for such products, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;

fluctuations in product demand and industry capacity, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;

uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technology on a timely and cost-effective basis and to achieve market acceptance for such products;

rapid technological innovation, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;

exchange rate fluctuation for the yen and other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated, particularly against the U.S. dollar and the euro;

increases in the price of raw materials including, without limitation, petroleum and other materials, such as copper, steel, aluminum and synthetic resins;

uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in product demand, exchange rate fluctuation and/or increases in the price of raw materials;

general socio-economic and political conditions and the regulatory and trade environment of Hitachi's major markets, particularly Japan, Asia, the United States and Europe, including, without limitation, a return to stagnation or a deterioration of the Japanese economy, direct or indirect restrictions by other nations on imports, or differences in commercial and business customs including, without limitation, contract terms and conditions and labor relations;

Table of Contents

- 2 -

uncertainty as to Hitachi's access to, or ability to protect, certain intellectual property rights, particularly those related to electronics and data processing technologies;

uncertainty as to the outcome of litigation, regulatory investigations and other legal proceedings of which the Company, its subsidiaries or its equity method affiliates have become or may become parties;

the possibility of incurring expenses resulting from any defects in products or services of Hitachi;

uncertainty as to the success of restructuring efforts to improve management efficiency and to strengthen competitiveness;

uncertainty as to the success of alliances upon which Hitachi depends, some of which Hitachi may not control, with other corporations in the design and development of certain key products;

uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing; and

uncertainty as to general market price levels for equity securities in Japan, declines in which may require Hitachi to write down equity securities it holds.

The factors listed above are not all-inclusive and are in addition to other factors contained in Hitachi's periodic filings with the U.S. Securities and Exchange Commission and in other materials published by Hitachi.

About Hitachi, Ltd.

Hitachi, Ltd., (NYSE: HIT / TSE: 6501), headquartered in Tokyo, Japan, is a leading global electronics company with approximately 390,000 employees worldwide. Fiscal 2007 (ended March 31, 2008) consolidated revenues totaled 11,226 billion yen (\$112.3 billion). The company offers a wide range of systems, products and services in market sectors including information systems, electronic devices, power and industrial systems, consumer products, materials, logistics and financial services. For more information on Hitachi, please visit the company's website at <http://www.hitachi.com>.

Hitachi Announces Business Structure Reforms to Improve Performance

Tokyo, March 16, 2009 Hitachi, Ltd. (NYSE:HIT / TSE:6501) is actively examining and rigorously implementing structural reforms on a Group-wide basis to respond to a rapidly changing operating environment, to quickly turn around its performance and improve profitability, and to spur future growth.

As part of these efforts, Hitachi's Board of Directors decided at a meeting held today to implement business structure reforms centered on the split-off of Hitachi's Automotive Systems Group and Consumer Business Group.

1. Hitachi Group Business Structure Reforms

With the operating environment suggesting revenue expansion is unlikely for the foreseeable future because of falling demand in both BtoB and BtoC sectors amid protracted worldwide economic stagnation, Hitachi is executing business- and cost-structure reforms in order to create a robust operating structure that will be able to steadily generate earnings and raise profitability in the future. In the present difficult operating conditions, Hitachi is pushing ahead with "Strengthening The Base '08-'09," a series of initiatives to improve its business structure, with the aim of improving profitability and maintaining and enhancing its financial condition.

Specifically, Hitachi is cutting fixed costs, including personnel expenses, as well as other costs such as procurement. The Company's target is to cut fixed costs by approximately 200.0 billion yen and procurement costs by approximately 300.0 billion yen for fiscal 2009, the year ending March 31, 2010, compared with fiscal 2008. To improve cash flows, Hitachi is in principle postponing capital expenditures across the board, except for investments in rationalization, reducing inventories and expediting the collection of accounts receivable, as it works to steadily improve consolidated performance in fiscal 2009.

Table of Contents

- 2 -

Moreover, in order to strengthen the soundness of its financial condition over the medium and long terms, Hitachi will accelerate its transformation to a robust business structure that is capable of consistently generating high profits. To this end, the Company will undertake a fundamental review of unprofitable businesses as well as re-examine its business portfolio with an emphasis on asset efficiency.

The business structure reforms decided today are an extension of the above policies and address the rapidly changing operating environment. Hitachi's goal is to improve earnings by pushing through business structural reforms by splitting-off the Automotive Systems Group and Consumer Business Group from the parent company. In addition to promoting fast decision-making and responsive business operations, these corporate separations should strengthen competitiveness through greater cooperation with other companies.

Plans call for both business groups to be split-off from Hitachi on July 1, 2009 and established as new companies. Details of the plans will be announced soon after they are determined.

2. Promoting Earnings Recovery Through Structural Reform of the Automotive Systems Business

The automotive systems business is in the process of rightsizing its workforce and realigning and integrating manufacturing bases in response to a rapid and sharp drop-off in work because of the drastic changes taking place in the operating environment. However, in order to stably generate earnings, even in an operating environment where revenue growth cannot be expected for the time being due to falling demand, Hitachi has decided to execute further business structure reforms to strengthen and improve the efficiency of this business. Through these measures, Hitachi aims to quickly return this business to profitability. Specific measures are as follows.

(1) Rebuild the Business Framework to Stay in Step With Difficult Market Conditions

The automotive market is experiencing difficult conditions due to the rapid contraction of global demand. In this market, Hitachi has decided to separate its Automotive Systems Group on July 1 and establish it as a new company, with the goal of building a framework that can consistently generate stable earnings as a key Hitachi Group business going forward.

The new company will have clearer accountability for generating earnings. At the same time, it will be able to make decisions faster and operate more efficiently, as well as actively fuse automotive and electronics technologies.

This corporate separation will be used as an opportunity to realign and integrate manufacturing bases, review the size of the workforce, and further concentrate business resources on key businesses. Through these structural reforms, the new company should grow more to be a leading supplier in the global automotive market.

Table of Contents

- 3 -

Overview of the New Automotive Systems Company

1. Company name: To be decided
2. Separation date: July 1, 2009 (planned)
3. Headquarters: To be decided
4. Representative: Kunihiko Ohnuma (currently Representative Executive Officer, Executive Vice President and Executive Officer, Hitachi, Ltd.)
5. Capital: To be decided (Wholly owned Hitachi subsidiary)
6. Businesses: Development, manufacture, sales and after-sales service of systems and components for automobiles.
7. Business scale: (Unconsolidated) Approx. 280.0 billion yen (Forecast for year ending March 31, 2010/full year basis)
8. Employees: (Unconsolidated) Approx. 7,600 (Estimate upon establishment)

(2) Stepping Up Product Field Prioritization in the Automotive Systems Business

The new company will concentrate business resources on automotive systems that address environmental and safety demands. Specifically, in the environmental field, it will enhance lithium-ion batteries, compact inverters, small motors and other key devices for hybrid vehicles. Also, it will focus on the development, design and manufacturing of direct injection engine systems, variable valve actuation systems and other engine systems where Hitachi's technology are advancing. In safety areas, it will leverage Hitachi's advanced outside recognition technologies for detecting the environment around vehicles, as well as technologies in three fields—braking, steering and suspension—that support automotive control systems, to focus on systems such as braking control and safe driving support.

At the same time, the new company will downsize, exit and restructure operations in business areas that offer little prospect of future market expansion or where Hitachi is uncompetitive. Furthermore, in the Car Information Systems (CIS) business, where the market environment is changing considerably, ongoing business reforms will be stepped up at consolidated subsidiary Clarion Co., Ltd. and further restructuring measures considered.

(3) Realignment of Worldwide Bases, Including Closing Design and Manufacturing Bases

By the end of fiscal 2009, design, development and manufacturing bases both in Japan and overseas will be restructured, integrated or closed. This will see the integration of engine control system and power steering operations where manufacturing takes place at multiple bases. Some locations will also be closed as a result of the Company's withdrawal from the surface treatment processing (plating) business. Furthermore, to strengthen cost competitiveness, more production of starters, suspension and other products will be transferred to subsidiaries in China, Thailand and elsewhere, and materials will increasingly be procured locally. With the aim of strengthening the business base in the sharply contracting North American market, UNISIA OF GEORGIA CORPORATION and TOKICO (USA) INC. will be brought under Kentucky-headquartered Hitachi Automotive Products (USA) Inc., which will oversee North American operations. This effective integration of three companies should improve the efficiency of business operations.

Table of Contents

- 4 -

Major Restructuring and Integration on Bases

Engine control system operations presently split between Sawa Works and Gunma Works will be integrated into Sawa Works.

Power steering operations presently split between Atsugi Works and the Akita Plant of subsidiary Unisia JKC Steering Systems Co., Ltd. will be integrated into the Akita Plant of Unisia JKC Steering Systems.

Propeller shaft operations presently split between Atsugi Works and UNISIA KYUSHU CORPORATION will be integrated into UNISIA KYUSHU.

The Atsugi Works Hiratsuka Plant will be closed following Hitachi's withdrawal from the surface treatment processing (plating) business.

The die-cast business of UNISIA KOWA's Nishine Plant will be integrated with UNISIA KOWA's Kitakami Plant, after which the Nishine Plant will be closed.

The suspension systems operations of Sagami Works and Fukushima Works, including group companies, will be restructured.

UNISIA OF GEORGIA CORPORATION and TOKICO (USA) Inc. will be brought under Kentucky-headquartered Hitachi Automotive Products (USA) Inc., which will oversee North American operations.

Table of Contents

- 5 -

3. Promoting Earnings Recovery Through Structural Reform of the Consumer Business

In the Consumer Business Group, which includes flat-panel TVs, Hitachi began sourcing glass panel components from new TV model, which were previously manufactured by Hitachi Plasma Display Limited, from Panasonic Corporation. In addition, ongoing reforms include rightsizing of the workforce. Now that conversion to a low-risk operating structure is in sight due to progress with these structural reforms, Hitachi has decided to separate the Consumer Business Group in July 2009 and establish it as a new company in order to quickly create an operating structure that can generate stable earnings.

Following this separation, business resources will be concentrated more than ever on key businesses and efforts will be made to deepen strategic collaborative creation with business partners. These measures are the cornerstones of bold initiatives that aim to establish a business structure that can respond adroitly to changes in the marketplace and to restore profitability as quickly as possible and maintain profitability thereafter.

The new company will develop, manufacture and sell flat-panel TVs for the domestic market and commercial-use LCD projectors. It will also take full advantage of cooperation with partners to develop optical disk drives, mobile phone and other product businesses.

Furthermore, the new company will strengthen collaboration with Hitachi Consumer Marketing, Inc., a wholly owned Hitachi subsidiary which sells and services consumer products in Japan, with a view to enhancing marketing capabilities and improving operational efficiency. In specific terms, product strategy formulation functions related to digital media products and home appliances will be transferred to Hitachi Consumer Marketing, in order to put in place a sales-led business structure that directly addresses market needs. This move should enhance sales and marketing capabilities and thus enable greater responsiveness in supplying products matching market needs. Furthermore, by forging stronger ties with Hitachi Living Systems, Ltd., which externally sources and sells Hitachi brand home appliances, it will strengthen the external procurement of Hitachi brand products, which are based on Hitachi's outstanding engineering capabilities.

The Hitachi Group will continue to look at additional business structure reforms, including organizational restructuring, in order to further raise operational efficiency across the entire consumer business range, including home appliances.

Table of Contents

- 6 -

Overview of the New Consumer Business Group Company

1. Company name: To be decided
2. Separation date: July 1, 2009 (planned)
3. Headquarters: To be decided
4. Representative: Shutoku Watanabe (currently Executive Vice President of Consumer Business Group, Hitachi, Ltd.)
5. Capital: To be decided (Wholly owned Hitachi subsidiary)
6. Businesses: Development, manufacturing, and sales of digital media products
7. Business scale: (Unconsolidated) Approx. 160.0 billion yen (Forecast for year ending March 31, 2010/full year basis)
8. Employees: (Unconsolidated) Approx. 750 (Estimate upon establishment)

4. Measures in Environment-Related New Businesses

Hitachi views environmental and energy saving-related fields, which are expected to grow over the medium and long terms, as key domains going forward. In resource recycling operations, Hitachi continues to look at launching new businesses. In addition, on April 1, 2009 Hitachi will establish organizations to plan and propose R&D and business strategies for the whole Hitachi Group regarding lithium-ion battery, renewable energy-related businesses. It will take steps to quickly launch businesses in these areas.

(1) Lithium-ion Battery Business

Hitachi has decided to establish Battery Systems Division under the auspices of the president to harness and utilize Group resources in the lithium-ion battery business. Looking ahead, Hitachi aims to work with subsidiary Hitachi Vehicle Energy, Ltd., related business groups, laboratories, Hitachi Group companies and others to develop next-generation batteries, strengthen the lithium-ion battery business for hybrid vehicles, and break into social infrastructure markets such as railway vehicles and industrial equipment.

(2) Renewable Energy-Related Businesses

Hitachi will also establish Renewable Energy & Smart Grid Division in the Power Systems Group. Moving forward, it will promote expanding business with formulating strategies for future growth in the area of generation systems that use natural energy resources such as solar and wind power, grid interconnection systems and smart grids, by harnessing and utilizing Group resources.

Table of Contents

- 7 -

(3) Resource Recycling Businesses

Interest is growing in recycling businesses that extract and reuse usable resources from waste products, from the perspective of effectively utilizing resources amid concerns about the depletion of the Earth's resources. Hitachi actively recycles home appliances and engages in other resource recycling businesses. The Company plans to establish Material Resource Recycling Office in the Business Incubation Division to lead efforts to formulate strategies for promoting related technological development and the harnessing and utilization of Group resources. Hitachi will speed up studies as well as vigorously take steps to quickly launch businesses.

Through far-reaching cost-structure reforms, the Hitachi Group will work collectively to transform to a robust operating structure that can generate a certain level of revenues and earnings even in a market environment offering no prospects for revenue growth.

In April, Hitachi will establish five new departments that will report directly to the president and executive vice presidents. These new departments will have the following respective missions: vigorously implement management reforms, execute the Strengthening The Base 08-09 initiatives, expand revenues via improved sales capabilities, strengthen the overseas power plant construction business, and develop eco-conscious data center operations. In short, they will be responsible for stepping up the pace of cost-structure reforms and business portfolio improvement. At the same time, plans call for the ongoing promotion of activities to expand revenues Group-wide and strengthen the earnings base through greater collaborative creation with customers.

By implementing these initiatives, Hitachi hopes to respond to a rapidly changing operating environment, as well as quickly turn around its performance and improve profitability. These Group-wide structural reforms that also aim to spur future growth, should transform Hitachi into a company that can generate stable earnings.

Cautionary Statement
