Investment Products Offered

**Are Not FDIC Insured
May Lose Value
Are Not Bank Guaranteed**

The investment return and principal value of an investment in the Fund will fluctuate as the prices of the individual securities in which it invests fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. You should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. For a free copy of the Fund's prospectus, which contains this and other information, visit our web site at www.alliancebernstein.com or call your financial advisor or AllianceBernstein® at (800) 227-4618. Please read the prospectus carefully before you invest.

You may obtain performance information current to the most recent month-end by visiting www.alliancebernstein.com.

This shareholder report must be preceded or accompanied by the Fund's prospectus for individuals who are not current shareholders of the Fund.

You may obtain a description of the Fund's proxy voting policies and procedures, and information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, without charge. Simply visit AllianceBernstein's web site at www.alliancebernstein.com, or go to the Securities and Exchange Commission's (the Commission) web site at www.sec.gov, or call AllianceBernstein at (800) 227-4618.

The Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the Commission's web site at www.sec.gov. The Fund's Forms N-Q may also be reviewed and copied at the Commission's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330. AllianceBernstein publishes full portfolio holdings for the Fund monthly at www.alliancebernstein.com.

AllianceBernstein Investments, Inc. (ABI) is the distributor of the AllianceBernstein family of mutual funds. ABI is a member of FINRA and is an affiliate of AllianceBernstein L.P., the manager of the funds.

Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund (the "Fund") for the semi-annual reporting period ended September 30, 2009. The Fund is a closed-end fund that trades under the New York Stock exchange symbol AWF. On March 11, 2009, the Boards of Directors of the Fund and ACM Managed Dollar Income Fund, Inc. ("Managed Dollar") approved a proposal for the Fund to acquire Managed Dollar (the "Acquisition"). On August 21, 2009, the stockholders of Managed Dollar approved the Acquisition; the Acquisition did not require a vote of the stockholders of the Fund. In connection with the Acquisition, on September 25, 2009, all of Managed Dollar's assets and liabilities were transferred to the Fund, and stockholders of Managed Dollar received shares of the Fund in exchange for their shares of Managed Dollar. The Acquisition did not impact the Fund's overall expenses.

Investment Objective and Policies

The Fund seeks high current income and secondarily, capital appreciation. The Fund invests without limit in securities denominated in non-US currencies as well as those denominated in the US dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of US and non-US corporate issuers. For more information regarding the Fund's risks, please see "A Word About Risk" on page 4 and "Note E Risks Involved in Investing in the Fund" of

the Notes to Financial Statements on pages 56-57.

Investment Results

The table on page 5 shows the Fund's performance compared with its current composite benchmark, which became effective on February 5, 2009. The composite benchmark is composed of equal weightings of the JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global), the JPM Government Bond Index-Emerging Markets (GBI-EM) (local currency-denominated) and the Barclays Capital US Corporate High Yield (HY) 2% Issuer Capped Index, for the six- and 12-month periods ended September 30, 2009. Individual performance for each of these indices is also included for both time periods.

The Fund significantly outperformed its blended benchmark for both the six- and 12-month periods ended September 30, 2009, as investors gained confidence that a sustainable economic recovery was under way. The Fund's overall sector positioning, country allocations and currency exposure all contributed to the outperformance for both periods as capital markets rallied.

The Fund's overweight allocation to the high-yield sector, as well as the Fund's overall higher risk profile, contributed significantly to relative performance for both periods. The Fund's emerging market country selection, particularly overweights in Argentina and the Ukraine, as well as specific bank holdings in Kazakhstan and Russia, also helped relative performance.

Exposure to commercial mortgage-backed securities which rallied strongly contributed positively as did the Fund's overall currency positioning including exposure to the Brazilian real, Hungarian forint and Colombian peso.

Leverage made a positive contribution to the Fund's performance for both the six- and 12-month periods ended September 30, 2009.

Market Review and Investment Strategy

Challenges continued into early 2009 as asset prices in many markets continued to fall and policymakers scrambled to combat the severe global economic downturn. By the second quarter of 2009, however, signs of a bottoming of the global recession resulted in a significant rally in credit sectors as well as equities. Capital markets rebounded on growing evidence that aggressive policy action on a global scale had been successful at staving off a depression-type scenario. Risk assets continued the rally into the third quarter as evidence mounted that the global economy was emerging from a deep recession and appeared on track for a return to modest economic growth in 2010.

The semi-annual period ended September 30, 2009 was marked by historic recovery with high yield returning 40.25%, as represented by the Barclays Capital US Corporate HY 2% Issuer Capped Index. High-yield spreads tightened 736 basis points, ending the reporting period at only 766 basis points over Treasuries. The events of the past year were historic in

proportion, as high yield completed one of its fastest recoveries on record following the largest downturn on record. Corporate earnings appeared to have reached a bottom after a two-year plunge, and positive earnings surprises increased.

The JPM EMBI Global rose 22.13% for the semi-annual period as investors put to work cash that had previously sat on the sidelines. Non-investment-grade emerging market debt generally outperformed investment-grade bonds. No country within the JPM EMBI Global posted a negative return; indeed, several generated returns in excess of 50%, with the Fund benefiting from exposure to several of them. In particular were Argentina and the Ukraine, which returned in excess of 130% and 94%, respectively. Argentinean bond prices were helped by the government's apparent willingness to negotiate with external creditors and the International Monetary Fund (IMF), and perhaps eventually, to overcome the debt-management difficulties that have followed it since its 2001 debt default. The Ukraine was helped by the easing of global risk aversion and progress in its IMF program. In unhedged dollar terms, the JPM GBI-EM rose 22.47% for the six-month period nearly matching dollar-denominated debt.

While the Fund's management team (the Team) does not anticipate significant changes in the Fund's positioning, it recognizes that the environment is shifting necessitating minor adjustments to the Fund's port-

folio mix. Going forward, coupon interest is likely to drive returns. As risk premiums have declined, there has been a reduction in the yield dispersion among countries. Hence, the Team is reducing overweights in some smaller, less liquid countries and reducing underweights in larger, more liquid names. Underweights in countries with the narrowest yield spreads mean that the Fund should be less

exposed than the JPM EMBI Global to the negative impact of higher US Treasury yields. The Team is maintaining the Fund's key overweight positions in the dollar-denominated debt of Russia, Argentina, Kazakhstan and the Ukraine. The Brazilian real will likely remain the Fund's largest local-currency exposure.

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance shown on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein Global High Income Fund Shareholder Information

The Fund's NYSE trading symbol is AWF. Weekly comparative and market price information about the Fund is published each Monday in *The Wall Street Journal* and other newspapers in a table called Closed-End Funds. For additional shareholder information regarding this Fund, please see page 63.

Benchmark Disclosure

The unmanaged JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global), the JPM Government Bond Index-Emerging Markets (GBI-EM) and the Barclays Capital US Corporate High Yield (HY) 2% Issuer Capped Index do not reflect fees and expenses associated with the active management of a mutual fund portfolio. The unmanaged JPM EMBI Global tracks total returns for US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, including loans and eurobonds. The JPM GBI-EM is the first comprehensive, global local emerging markets index, and consists of regularly traded, liquid fixed-rate, domestic currency government bonds to which international investors can gain exposure. The Barclays Capital US Corporate HY 2% Issuer Capped Index is the 2% Issuer Cap component of the US Corporate HY Index. The Barclays Capital US Corporate HY Index is an unmanaged index that includes all fixed-income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least 1 year to maturity. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

The Fund invests primarily in foreign securities which may result in significant fluctuations due to changes in foreign exchange rates and the possibility of substantial volatility due to political and economic uncertainty in foreign countries. The Fund may invest in securities of emerging market nations, which may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed foreign countries. Fluctuations in the exchange rates between the US dollar and foreign currencies may negatively affect the value of the Fund's investments or reduce the returns of the Fund. Price fluctuation in the Fund's portfolio securities may be caused by changes in the general level of interest rates or changes in bond credit quality ratings. Please note, as interest rates rise, existing bond prices fall and can cause the value of an investment in the Fund to decline. Changes in interest rates have a greater effect on bonds with longer maturities than on those with shorter maturities. At the discretion of AllianceBernstein L.P. (the Adviser), the Fund may invest substantially all of its net assets in bonds that are rated below investment grade (i.e., junk bonds) and up to 50% in securities that are not readily marketable. These high-yield bonds involve a greater risk of default and price volatility than other bonds. Investing in non-investment grade securities presents special risks, including credit risk. Investments in the Fund are not guaranteed because of fluctuation in the net asset value of the underlying fixed-income related investments. Similar to direct bond ownership, bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the Fund. The Fund utilizes leverage, which increases volatility since leverage magnifies both positive and negative performance. The Fund maintains asset coverage of at least 300%. While the Fund invests principally in bonds and other fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments.

(a) Security is in default and is non-income producing.

(b) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2009, the aggregate market value of these securities amounted to \$390,931,853 or 34.2% of net assets.

(c) Coupon rate adjusts periodically based upon a predetermined schedule. Stated interest rate in effect at September 30, 2009.

(d) Floating Rate Security. Stated interest rate was in effect at September 30, 2009.

(e) *Pay-In-Kind Payments (PIK).*

38 ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND

Portfolio of Investments

(f) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities, which represent 0.7% of net assets as of September 30, 2009, are considered illiquid and restricted.

Restricted Securities	Acquisition Date	Cost	Market Value	Percentage of Net Assets
Gallery Capital SA 10.125%, 5/15/13	5/10/2006	\$ 2,812,191	\$ 633,600	0.06%
Broder Brothers Co. 12.00%, 10/15/13	5/21/2009	729,805	155,300	0.01%

(g) Indicates a security that has a zero coupon that remains in effect until a predetermined date at which time the stated coupon rate becomes effective until final maturity.

(h) Variable rate coupon, rate shown as of September 30, 2009.

(i) Position, or a portion thereof, has been segregated to collateralize reverse repurchase agreements. The aggregate market value of these securities amounted to \$90,356,220.

(j) Illiquid security.

(k) When-Issued or delayed delivery security.

(l) Fair valued.

(m) This position or a portion of this position represents an unsettled loan purchase. At September 30, 2009, the market value and unrealized gain/(loss) of these unsettled loan purchases amounted to \$903,250 and \$43,380, respectively. The coupon rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate (LIBOR) plus a premium which was determined at the time of purchase.

(n) Non-income producing security.

(o) Investment in affiliated money market mutual fund.

+ Position, or a portion thereof, has been segregated to meet the collateral requirements of the Term Asset-Backed Securities Loan Facility (TALF) program administered by the Federal Reserve Bank of New York. The aggregate market value of these securities amounted to \$55,751,110.

The fund currently owns investments collateralized by subprime mortgage loans. Subprime loans are offered to homeowners who do not have a history of debt or who have had problems meeting their debt obligations. Because repayment is less certain, subprime borrowers pay a higher rate of interest than prime borrowers. As of September 30, 2009, the fund's total exposure to subprime investments was 0.32% of net assets. These investments are valued in accordance with the fund's Valuation Policies (see Note A for additional details).

NOTES TO FINANCIAL STATEMENTS

September 30, 2009 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP), which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market (OTC) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the Adviser) may establish procedures whereby changes in market yields or spreads are used to adjust,

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 43

Notes to Financial Statements

on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security. Investments in money market funds are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

In valuing the Term Asset-Backed Securities Loan Facility (TALF) transactions, the Adviser, on an ongoing basis (i) requests dealer pricing indication, (ii) obtains inputs from third party valuation providers (where loans have traded in conjunction with recent asset sales) and (iii) considers prices at which loans are transferred between parties.

2. Fair Value Measurements

In accordance with the provisions set forth in U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The disclosure requirements also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The Fund has elected the fair value option in valuing the TALF loan liability as permitted by U.S. GAAP regarding the fair value option for financial assets and financial liabilities. The fair value option permits a fund the opportunity to mitigate volatility in net assets caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. Consequently the Fund recorded the loan liability on the statement of assets and liabilities at fair value. The fair value option requires that the TALF loan be marked-to-market giving consideration to relevant market factors including changes in the market value of the collateral related to the TALF loan (see Note C.4). As of September 30, 2009, the Fund did not have a difference between the aggregate fair value and the aggregate unpaid principal balance of the TALF loans outstanding.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of September 30, 2009:

Investments in Securities	Level 1	Level 2	Level 3	Total
Corporates Non-Investment Grades	\$ 0	\$ 418,018,185	\$ 28,659,326	\$ 446,677,511

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of investments and foreign currency denominated assets and liabilities.

4. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund's tax positions taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Portfolios' financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

6. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. generally accepted accounting principles. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

Pursuant to the amended administration agreement, the Fund reimburses the Adviser for certain legal and accounting services provided to the Fund by the Adviser, provided, however, that the reimbursement may not exceed .15% annualized of average weekly net assets. For the six months ended September 30, 2009, such reimbursement amounted to \$60,030, representing .01% annualized of the Fund's average weekly net assets.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended September 30, 2009, there was no reimbursement paid to ABIS.

The Fund may invest in the AllianceBernstein Fixed-Income Shares, Inc.-Government STIF Portfolio, an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. A summary of the Fund's transactions in shares of the Government STIF Portfolio for the six months ended September 30, 2009, is as follows:

Market Value March 31, 2009 (000)	Purchases at Cost (000)	Sales Proceeds (000)	Dividend Income (000)	Market Value September 30, 2009 (000)
\$ 8,438	\$ 224,063	\$ 196,468	\$ 13	\$ 36,033

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 49

Notes to Financial Statements

NOTE C**Investment Transactions**

Purchases and sales of investment securities (excluding short-term investments) for the six months ended September 30, 2009, were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 206,770,163	\$ 204,878,501
U.S. government securities	65,818,035	5,839,968

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding swap contracts and foreign currency transactions) are as follows:

Gross unrealized appreciation	\$ 130,664,774
Gross unrealized depreciation	(71,788,636)
Net unrealized appreciation	\$ 58,876,138

1. Derivative Financial Instruments

The Fund may use derivatives to earn income and enhance returns, to hedge or adjust the risk profile of its portfolio, to replace more traditional direct investments, or to obtain exposure to otherwise inaccessible markets. The Fund may also use derivatives for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under **Currency Transactions**.

The principal types of derivatives utilized by the Fund, as well as the methods in which they may be used are:

Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sales commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions**.

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Fund. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign

currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Fund has in that particular currency contract

Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. The Fund may also use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions .

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value. For the six months ended September 30, 2009, the Fund had no transactions in written options.

Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions . A swap is

an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, collateral may be pledged or received by the Fund in accordance with the terms of the respective swap agreements to provide value and recourse to the Fund or its counterparties in the event of default, bankruptcy or insolvency by one of the parties to the swap agreement.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential counterparty risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities. The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain/(loss) on swaps on the statement of operations, in addition to realized gain/(loss) recorded upon the termination of swap contracts. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of swap contracts on the statement of operations.

Credit Default Swaps:

The Fund may enter into credit default swaps to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults by corporate and sovereign issuers held by the Fund, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. The Fund may purchase credit protection (Buy Contract) or provide credit protection (Sale Contract) on the referenced obligation of the credit default swap. During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the notional amount. The accrual for these interim payments is recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Upfront premiums paid or received in connection with credit default swap contracts are recognized as cost or proceeds on the statement of assets and liabilities and are amortized on a straight line basis over the life of the contract. Amortized upfront premiums are included in net realized gain/(loss) from swaps on the statement of operations. If the Fund is a buyer/(seller) of protection and a credit event occurs, as defined

under the terms of the swap agreement, the Fund will either (i) receive from the seller/(pay to the buyer) of protection an amount equal to the notional amount of the swap contract (the Maximum Payout Amount) and deliver/(take delivery of) the referenced obligation or (ii) receive/(pay) a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer of protection and no credit event occurs, it will lose its investment. If the Fund is a seller of protection and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

Implied credit spreads utilized in determining the market value of credit default swaps on issuers as of period end are disclosed in the portfolio of investments. The implied spreads serve as an indicator of the current status of the payment/performance risk and typically reflect the likelihood of default by the issuer of the referenced obligation. The implied credit spread of a particular reference entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Widening credit spreads and, with respect to buy contracts, increasing market values, in absolute terms when compared to the notional amount of the swap, typically represent a deterioration of the referenced entity's credit soundness and greater likelihood of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity or obligation.

At September 30, 2009, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$76,990,000 with net unrealized appreciation of \$4,196,280 and terms ranging from 3 months to 4 years, as reflected in the portfolio of investments.

In certain circumstances, Maximum Payout Amounts may be partially offset by recovery values of the respective referenced obligations, upfront premium received upon entering into the agreement, or net amounts received from settlement of buy protection credit default swap agreements entered into by the Fund for the same reference obligation with the same counterparty. As of September 30, 2009, the Fund did not have Buy Contracts outstanding for the same referenced obligation with the same counterparty for its Sale Contracts outstanding.

At September 30, 2009 the Fund had entered into the following derivatives (not designated as hedging instruments under Accounting for Derivative Instruments and Hedging Activities):

Derivatives Not Accounted for as Hedging Instruments	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair value	Statement of Assets and Liabilities Location	Fair Value
Credit contracts	Unrealized appreciation of swap contracts	\$ 4,196,280	Unrealized depreciation of swap contracts	\$ 690,809
Foreign exchange contracts	Unrealized appreciation of forward currency exchange contracts	1,168,956	Unrealized depreciation of forward currency exchange contracts	927,615
Total		\$ 5,365,236		\$ 1,618,424

The effect of derivative instruments on the Statement of Operations for the six months ended September 30, 2009:

Derivatives Not Accounted for as Hedging Instruments	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Credit contracts	Net realized gain (loss) on swap contracts; change in unrealized appreciation/ depreciation of swap contracts	\$ 487,136	\$ 3,166,585
Foreign exchange contracts	Net realized gain (loss) on foreign currency transactions; change in unrealized appreciation/ depreciation of foreign currency denominated assets and liabilities	2,852,209	174,560
Total		\$ 3,339,345	\$ 3,341,145

For the six months ended September 30, 2009, the average monthly notional amount of credit default swap contracts was \$75,035,000 and the average monthly principal amount of forward currency exchange contracts was \$64,483,917.

2. Currency Transactions

The Fund may invest in non-U.S. Dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and options. The Fund may enter into transactions for investment oppor-

tunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

3. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price. For the six months ended September 30, 2009, the average amount of reverse repurchase agreements outstanding was \$4,908,716 and the daily weighted average interest rate was 7.78%.

During the period, the Fund paid net interest payment to counterparties.

4. Term Asset-Backed Securities Loan Facility

The Fund participates in the TALF program. Under the TALF program eligible borrowers may obtain a non-recourse loan from the Federal Reserve Bank of New York (FRBNY) by posting certain asset-backed securities and commercial mortgage-backed securities (Eligible Securities) as collateral. The transfer of the collateral is not recorded as a sale on a Fund's records. The Fund agrees to repay the non-recourse loan amount plus accrued interest under the terms of the loan, with the principal balance being due at loan maturity. According to the terms of the TALF program, a Fund is not required to pledge further collateral should the value of the Eligible Securities transferred as collateral fall below the loan amount. The loan is prepayable in whole or in part at any time at the Fund's option. Prepayments of principal received on the collateral during the loan term must be used to immediately reduce proportionately the loan balance outstanding. At the time of loan approval, the Fund pays a one time administration fee based upon the amount borrowed to the FRBNY.

Borrowing under TALF, as with the extension of other types of credit, subjects a Fund to certain risks, including possible delays in the recovery of securities posted as collateral or possible loss of rights in the collateral should a Fund be unable to repay a loan. Additionally, there is the risk that the expenses associated with the TALF loan, including interest expense may be greater than the income earned from the investment of the proceeds and/or the interest earned on the collateral to which a Fund remains entitled. Under the TALF program, interest earned on collateral will be used to pay interest expense associated with a loan. Should the interest earned exceed the interest expense on any given payment date, the remainder may be applied to the principal balance. Conversely, should the

interest earned on the collateral be in shortfall of the interest expense due at any given payment date, a Fund will be required to expend cash for the difference in order to meet its obligation. Interest on the TALF loan is measured based on a predetermined rate on the loan origination and is reported on the statement of operations as interest expense.

For the six months ended September 30, 2009, the average amount of TALF loans outstanding was \$7,986,015 and the weighted average interest rate was 3.27%.

NOTE D

Capital Stock

During the six months ended September 30, 2009, and March 31, 2009, the Fund issued no shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

Derivatives Risk The Fund may invest in derivatives such as forwards, options, futures and swaps. These investments may be illiquid, difficult to price, and

leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments.

Leverage Risk The Fund may utilize leverage through borrowings or the investment techniques of reverse repurchase agreements and dollar rolls. Reverse repurchase agreements and dollar rolls are speculative techniques and the proceeds from these transactions may be used, similar to borrowings by the Fund, for investment purposes. The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may also result in a form of leverage.

The effect of leverage can produce higher shareholder returns than if the Fund were not leveraged, and the use of leverage techniques can add to the net asset value (NAV) of the Common Stock. However, the risks of such techniques are potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock and the relatively greater effect on the NAV of the Common Stock caused by favorable or adverse changes in the currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so, thereby reducing its NAV.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. Dollar is strong (i.e., gaining value relative to other currencies) and other currencies are weak (i.e., losing value relative to the U.S. Dollar). Currency markets are generally not as regulated as securities markets. Independent of the Fund's investments in securities denominated in foreign currencies, the Fund's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

NOTE F**Acquisition of ACM Managed Dollar Income Fund, Inc. by AllianceBernstein Global High Income Fund, Inc. (the Fund)**

On September 25, 2009, the Fund acquired all of the net assets and assumed all of the liabilities of ACM Managed Dollar Income, Inc. (ACM Managed Dollar), pursuant to an Agreement and Plan of Acquisition and Liquidation approved by the Board of Directors of the Fund at the Regular Meetings of the Board of Directors of the Fund held on March 11, 2009. On September 25, 2009, the acquisition was accomplished by a tax-free exchange of 8,835,925 shares of the Fund for 15,166,366 shares of ACM Managed Dollar. The aggregate net assets of the Fund and ACM Managed Dollar immediately before the acquisition were \$1,020,391,036 and \$118,184,167 (including \$4,515,708 of net unrealized appreciation of investments), respectively. Immediately after the acquisition, the combined net assets of the Fund amounted to \$1,138,575,203.

NOTE G**Distributions to Shareholders**

The tax character of distributions paid for the year ending March 31, 2010 will be determined at the end of the current fiscal year.

The tax character of distributions paid during the fiscal years ended March 31, 2009 and March 31, 2008 were as follows:

	2009	2008
Distributions paid from:		
Ordinary income	\$ 84,218,883	\$ 93,428,602
Long-term capital gain	32,608,826	30,808,050
Total taxable distributions	116,827,709	124,236,652
Total distributions paid	\$ 116,827,709	\$ 124,236,652

As of March 31, 2009, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 3,229,611
Accumulated capital and other losses	(63,631,086) ^(a)
Unrealized appreciation/(depreciation)	(242,529,191) ^(b)
Total accumulated earnings/(deficit)	\$ (302,930,666)

^(a) On March 31, 2009, the Fund had a net capital loss carryover for federal income tax purposes of \$33,266,127 of which \$33,266,127 expires in the year 2017. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed. Net capital loss incurred after October 31, and within the taxable year are deemed to arise on the first business day of the Fund's next taxable year. For the year ended March 31, 2009, the Fund defers to April 1, 2009 post-October capital losses of \$30,364,959.

(b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium, the difference between book and tax treatment of swap income and the realization for tax purpose of gain/losses on certain derivative instruments.

NOTE H

Legal Proceedings

As has been previously reported, the staff of the U.S. Securities and Exchange Commission (SEC) and the Office of the New York Attorney General (NYAG) have been investigating practices in the mutual fund industry identified as market timing and late trading of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that the Adviser provide information to them. The Adviser has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below.

Numerous lawsuits have been filed against the Adviser and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. The lawsuits are now pending in the United States District Court for the District of Maryland pursuant to a ruling by the Judicial Panel on Multidistrict Litigation transferring and centralizing all of the mutual funds involving market and late trading in the District of Maryland.

The Adviser believes that these matters are not likely to have a material adverse effect on the Fund or the Adviser's ability to perform advisory services relating to the Fund.

NOTE I

Subsequent Events

In accordance with U.S. GAAP disclosure requirements on subsequent events, management has evaluated events for possible recognition or disclosure in the financial statements through November 25, 2009, the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Fund's financial statements through this date.

FINANCIAL HIGHLIGHTS

Selected Data For A Share of Capital Stock Outstanding Throughout Each Period

	Six Months Ended September 30, 2009 (unaudited)	Year Ended March 31,				
		2009	2008	2007	2006	2005

Portfolio turnover rate	25 %	40 %	67 %	68 %	79 %	147 %

See footnote summary on page 61.

(a) *Based on average shares outstanding.*

(b) *Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.*

(c) *Annualized.*

(1) Member of the Audit Committee, the Governance and Nominating Committee and the Independent Directors Committee. Mr. Foulk is the sole member of the Fair Value Pricing Committee.

(2) The day-to-day management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed-Income: Emerging Market Investment Team. While all members of the team work jointly to determine the majority of the investment strategy including stock selection for the Fund, Messrs. Paul J. DeNoon, Fernando Grisales, Douglas J. Peebles and Matthew S. Sheridan, members of the Global Fixed-Income: Emerging Market Investment Team, are primarily responsible for the day-to-day management of the Fund's portfolio.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase from time to time at market prices shares of its Common Stock in the open market.

This report, including the financial statements herein, is transmitted to the shareholders of AllianceBernstein Global High Income Fund for their information. The financial information included herein is taken from the records of the Fund. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this report.

Annual Certifications As required, on April 30, 2009, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards. The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the reporting period.

Board of Directors

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The Fund distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper, Inc., Morningstar, Inc. and Bloomberg.

The Fund's NYSE trading symbol is AWF. Weekly comparative net asset value and market price information about the Fund is published each Monday in *The Wall Street Journal*, and other newspapers in a table called Closed-End Bond Funds.

Dividend Reinvestment Plan

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect

to receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.

We also offer Exchange Reserves,* which serves as the money market fund exchange vehicle for the AllianceBernstein mutual funds.

You should consider the investment objectives, risks, charges and expenses of any AllianceBernstein fund/portfolio carefully before investing. For free copies of our prospectuses, which contain this and other information, visit us online at www.alliancebernstein.com or contact your financial advisor. Please read the prospectus carefully before investing.

* An investment in the Fund is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the Fund.

Privacy Notice (This information is not part of the Shareholder Report.)

AllianceBernstein L.P., the AllianceBernstein Family of Funds and AllianceBernstein Investments, Inc. (collectively, AllianceBernstein or we) understand the importance of maintaining the confidentiality of our clients' nonpublic personal information. Nonpublic personal information is personally identifiable financial information about our clients who are natural persons. To provide financial products and services to our clients, we may collect information about clients from sources, including: (1) account documentation, including applications or other forms, which may contain information such as a client's name, address, phone number, social security number, assets, income, and other household information, (2) clients' transactions with us and others, such as account balances and transactions history, and (3) information from visitors to our websites provided through online forms, site visitorship data, and online information collecting devices known as cookies.

It is our policy not to disclose nonpublic personal information about our clients (or former clients) except to our affiliates, or to others as permitted or required by law. From time to time, AllianceBernstein may disclose nonpublic personal information that we collect about our clients (or former clients), as described above, to non-affiliated third parties, including those that perform processing or servicing functions and those that provide marketing services for us or on our behalf under a joint marketing agreement that requires the third party provider to adhere to AllianceBernstein's privacy policy. We have policies and procedures to safeguard nonpublic personal information about our clients (and former clients) that include restricting access to such nonpublic personal information and maintaining physical, electronic and procedural safeguards, that comply with applicable standards, to safeguard such nonpublic personal information.

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer and principal accounting officer. A copy of the registrant's code of ethics is filed herewith as Exhibit 12(a)(1).

(b) During the period covered by this report, no material amendments were made to the provisions of the code of ethics adopted in 2(a) above.

(c) During the period covered by this report, no implicit or explicit waivers to the provisions of the code of ethics adopted in 2(a) above were granted.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors has determined that independent directors Garry L. Moody and William H. Foulk, Jr. qualify as audit committee financial experts.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 6. SCHEDULE OF INVESTMENTS.

Please see Schedule of Investments contained in the Report to Shareholders included under Item 1 of this Form N-CSR.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Fund's Board of Directors since the Fund last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no changes in the registrant's internal controls over financial reporting that occurred during the second fiscal quarter of the period that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

The following exhibits are attached to this Form N-CSR:

EXHIBIT NO.	DESCRIPTION OF EXHIBIT
12 (a) (1)	Code of Ethics that is subject to the disclosure of Item 2 hereof
12 (b) (1)	Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
12 (b) (2)	Certification of Principal Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
12 (c)	Certification of Principal Executive Officer and Principal Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
