Short-term investments (amortized cost: $1,679.2, $1,343.5, and $1,551.8)	1,679.2	1,343.5	1,551.8	
Total investments	16,609.5	16,029.6	15,963.0	
Cash	**February 28,**			
	2007	**2006**	**2007**	**2006**
Average shares outstanding for basic earnings per share	117,266,573	117,551,782	117,348,716	116,743,700
Effect of dilutive securities-stock based incentive/purchase plans	4,540,841	6,278,846	4,073,657	6,114,460
Average shares outstanding for diluted earnings per share	121,807,414	123,830,628	121,422,373	122,858,160

At February 28, 2007, all of the Company s outstanding stock options, restricted stock and Stock Appreciation Rights (SARs) with total share commitments of 6,986,817 were dilutive based on the average share price of $27.38. All stock options and SARs expire by 2013.

The Company s restricted stock is included in the number of shares of common stock issued and outstanding, but omitted from the basic earnings per share calculation until the shares vest.

At February 28, 2007, the Company had authorization to purchase 2,642,260 of its common shares.

NOTE I DERIVATIVES AND RISK MANAGEMENT

The Company s worldwide operations and product lines expose it to risks from fluctuations in foreign currency exchange rates and metals commodity prices. The objective of the Company s risk management program is to mitigate these risks using futures or forward contracts (derivative instruments). The Company enters into metal commodity forward contracts to mitigate the risk of unanticipated changes in gross margin due to the volatility of the commodities prices, and enters into foreign currency forward contracts, which match the expected settlements for purchases and sales denominated in foreign currencies. Also, when its sales commitments to customers include a fixed price freight component, the Company occasionally enters into freight forward contracts to minimize the effect of the volatility of ocean freight rates. Forward contracts on natural gas may also be entered to reduce the price volatility of gas used in production. The Company designates only those contracts which closely match the terms of the underlying transaction as hedges for accounting purposes. These hedges resulted in an immaterial amount of ineffectiveness in the statements of earnings and there were no components excluded from the assessment of hedge effectiveness for the three or six

months ended February 28, 2007 and 2006. Certain of the foreign currency and commodity contracts were not designated as hedges for accounting purposes, although management believes they are essential economic hedges. The following table shows the impact on the condensed consolidated statements of earnings of the changes in fair value of these economic hedges:

(in thousands)	Three Months Ended February 28, 2007	Three Months Ended February 28, 2006	Six Months Ended February 28, 2007	Six Months Ended February 28, 2006
	Earnings (Expense)		Earnings (Expense)	
Net sales (foreign currency instruments)	$ (242)	$ (180)	$ (131)	$(87)
Cost of goods sold (commodity instruments)	(1,518)	1,926	(3,724)	49

The Company s derivative instruments were recorded as follows on the condensed consolidated balance sheets:

(in thousands)	February 28, 2007	August 31, 2006
Derivative assets (other current assets)	$ 2,786	$5,633
Derivative liabilities (other payables)	7,357	8,323

The following table summarizes activities in other comprehensive income (losses) related to derivatives classified as cash flow hedges held by the Company during the six months ended February 28, 2006 (in thousands):

Change in market value (net of taxes)	$ 3,552
(Gains) losses reclassified into net earnings, net	(1,527)
Other comprehensive gain (loss) unrealized gain (loss) on derivatives	$ 2,025

11

Table of Contents

During the twelve months following February 28, 2007, $2.7 million in losses related to commodity hedges and capital expenditures are anticipated to be reclassified into net earnings as the related transactions mature and the assets are placed into service, respectively. Also, an additional $112 thousand in gains will be reclassified as interest expense related to an interest rate lock.

All of the instruments are highly liquid, and none are entered into for trading purposes.

NOTE J CONTINGENCIES

See Note 11, Commitments and Contingencies, to the consolidated financial statements for the year ended August 31, 2006 relating to environmental and other matters. There have been no significant changes to the matters noted therein.

In the ordinary course of conducting its business, the Company becomes involved in litigation, administrative proceedings and governmental investigations, including environmental matters. Management believes that adequate provision has been made in the condensed consolidated financial statements for the potential impact of these issues, and that the outcomes will not significantly impact the results of operations or the financial position of the Company, although they may have a material impact on earnings for a particular quarter.

In February 2007, we entered into a guarantee agreement to assist one of our Chinese coke suppliers to obtain pre-production financing from a bank. In addition, we entered into another guarantee agreement for one of our suppliers of finished goods to obtain working capital financing from a financial institution. In the aggregate, the Company s maximum exposure under the guarantees at February 28, 2007 is approximately $12.3 million. The fair value of the guarantees is negligible.

NOTE K BUSINESS SEGMENTS

The Company s reportable segments are based on strategic business areas, which offer different products and services. These segments have different lines of management responsibility as each business requires different marketing strategies and management expertise.

The Company has five reportable segments: domestic mills, CMCZ, domestic fabrication, recycling and marketing and distribution.

The following is a summary of certain financial information by reportable segment:

	Three Months Ended February 28, 2007							
(in thousands)	**Domestic Mills**	**CMCZ**	**Domestic Fabrication**	**Recycling**	**Marketing and Distribution**	**Corporate**	**Eliminations**	**Consolidated**

NOTE L RELATED PARTY TRANSACTIONS

One of the Company s international subsidiaries has an agreement for steel purchases with a key supplier of which the Company owns an 11% interest. The total amounts of purchases from this supplier were $170 million and $118.4 million for the six months ended February 28, 2007 and 2006, respectively.

NOTE M SUBSEQUENT EVENTS

On March 2, 2007, the Company announced that its Polish steel mill, CMC Zawiercie S.A. (CMCZ), purchased all of the shares of CMCZ owned by the Polish Ministry of State Treasury for approximately $59.5 million. The shares acquired represent approximately 26.8% of the total CMCZ shares outstanding. The Company intends to redeem the shares and with this purchase and subsequent redemption, CMC will hold approximately 99% of the outstanding shares of CMCZ.

On March 5, 2007, the Company announced that it has entered into a definitive agreement to purchase substantially all the operating assets of Nicholas J. Bouras Inc. for approximately $63 million plus inventory on hand at the time of closing which is expected within 40 days following regulatory approval. Included in the deal are Bouras affiliates United Steel Deck, Inc., The New Columbia Joist Co., and ABA Trucking Corp. United Steel Deck manufactures steel deck at facilities in South Plainfield, NJ; Peru, IL; and Rock Hill, SC. New Columbia Joist manufactures steel joists in New Columbia, PA. ABA Trucking Corporation provides delivery services for United Steel Deck and New Columbia Joist. The purchase does not include Bouras subsidiary Prior Coated Metals and its affiliate Bouras Properties LLC. This acquisition will be integrated as part of CMC s Domestic Fabrication segment and will operate under the trade name CMC Joist & Deck.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management s Discussion and Analysis should be read in conjunction with our Form 10-K filed with the Securities and Exchange Commission (SEC) for the year ended August 31, 2006.

CRITICAL ACCOUNTING POLICIES

Our critical accounting policies are consistent with the information set forth in Item 7, Management s Discussion and Analysis of Financial Condition and Results of Operations, included in our Form 10-K filed with the SEC for the year ended August 31, 2006 and are, therefore, not presented herein.

CONSOLIDATED RESULTS OF OPERATIONS

	Three Months Ended February 28,		%	Six Months Ended February 28,		%
(in millions)	2007	2006	Change	2007	2006	Change
Net sales	$2,015.8	$1,639.5	23%	$4,002.3	$3,285.2	22%
Net earnings	65.9	80.1	(18)%	151.3	149.7	1%
EBITDA	136.4	153.0	(11)%	304.9	286.2	7%

In the table above, we have included a financial statement measure that was not derived in accordance with GAAP. We use EBITDA (earnings before interest expense, income taxes, depreciation and amortization) as a non-GAAP performance measure. In calculating EBITDA, we exclude our largest recurring non-cash charge, depreciation and amortization. EBITDA provides a core operational performance measurement that compares results without the need to adjust for federal, state and local taxes which have considerable variation between domestic jurisdictions. Tax regulations in international operations add additional complexity. Also, we exclude interest cost in our calculation of EBITDA. The results are, therefore, without consideration of financing alternatives of capital employed. We use EBITDA as one guideline to assess our unleveraged performance return on our investments. EBITDA is also the target benchmark for our long-term cash incentive performance plan for management. Reconciliations to net earnings are provided below:

	Three Months Ended February 28,		%	Six Months Ended February 28		%
(in millions)	2007	2006	Change	2007	2006	Change
Net earnings	$ 65.9	$ 80.1	(18)%	$151.2	$149.7	1%
Interest expense	8.9	7.0	27%	17.1	13.9	23%
Income taxes	37.7	45.5	(17)%	87.6	82.9	6%
Depreciation and amortization	23.9	20.4	17%	49.0	39.7	23%
EBITDA	$136.4	$153.0	(11)%	$304.9	$286.2	7%

Our EBITDA does not include interest expense, income taxes and depreciation and amortization. Because we have borrowed money in order to finance our operations, interest expense is a necessary element of our costs and our ability to generate revenues. Because we use capital assets, depreciation and amortization are also necessary elements of our costs. Also, the payment of income taxes is a necessary element of our operations. Therefore, any measures that exclude these elements have material limitations. To compensate for these limitations, we believe that it is appropriate to consider both net earnings determined under GAAP, as well as EBITDA, to evaluate our performance. Also, we separately analyze any significant fluctuations in interest expense, depreciation and amortization and income taxes.

Overview Reported net earnings and EBITDA decreased by 18% to $65.9 million and 11% to $136.4 million, respectively, for the three months ended February 28, 2007 as compared to 2006. For the six months ended

February 28, 2007, net earnings increased by 1% to $151.2 million and EBITDA by 7% to $304.9 million as compared to the same period last year. Traditionally, our second quarter (December to February) is our weakest quarter because of the seasonal nonresidential construction slowdown. For the quarter just ended, net earnings was also affected as a result of destocking at service centers, increased cost of steel scrap, the softening in the residential housing market, mill maintenance and certain oversupply conditions in the U.S. These factors contributed to our steel shipping volumes being down by 40 thousands tons and larger than expected LIFO charges in our Domestic Mills and Domestic Fabrication segments. In contrast, for the six months ended February 28, 2007, operating results were slightly better as sales were up and the Company had two strong quarters from CMCZ our Polish operations and a faster inventory turnover at our Recycling segment that benefited from higher scrap prices. In addition, we also experienced a recovery in the steel prices for our finished goods and a

15

Table of Contents

tremendous unprecedented demand for our construction products in emerging markets, in particular in the markets of North Africa, the Middle East, Central and Eastern Europe, Russia and Asia. The following financial events were significant during our second quarter ended February 28, 2007:

Net sales for the quarter increased by 23% over last year s second quarter to $2.0 billion with CMCZ and the Marketing and Distribution segments contributing the largest proportion to the company s overall net sales growth.

After-tax LIFO expense of $12.3 million or $0.10 per diluted share as compared with income of $2.6 million or $0.02 per share in last year s second quarter.

Our Polish (CMCZ) operations continued to achieve record profitability with its adjusted operating profit of $25.8 million. Net sales increased 74% over last year s second quarter.

Adjusted operating profit for the Domestic Mills segment was down by 13% to $61.7 million caused mainly by a LIFO expense of $8.6 million, an $8 million increase over the prior year quarter, increased maintenance costs of $4.2 million and a lower adjusted operating profit at our copper tube mill.

Adjusted operating profit of our Domestic Fabrication segment decreased $24.6 million to $13.9 million, a 64% decline from the prior year s quarter due primarily to a $16 million swing from a LIFO credit to a LIFO expense and a margin squeeze caused by higher steel prices. Shipments were about even from last year s quarter with our Rebar products showing a slight volume improvement of 6%.

Our Recycling segment s adjusted operating profit of $20.9 million increased 12% over last years quarter primarily as the result of a pre-tax LIFO income of $2.7 million and an 11% increase in shipments.

Our Marketing and Distribution segment had a 38% sales increase over the second quarter of 2006 and an adjusted operating profit of $15.2 million an 18% increase in despite of absorbing a pre-tax LIFO expense of $6.7 million.

Selling, general and administrative expenses include $9.9 million of costs associated with the investment in the global deployment of SAP software.

On March 2, 2007, the Company announced that its Polish steel mill, CMC Zawiercie S.A. (CMCZ), purchased all of the shares of CMCZ owned by the Polish Ministry of State Treasury for approximately $59.5 million, making CMC the owner of approximately 99% of the outstanding shares of CMCZ.

On March 5, 2007, the Company announced that it has entered into a definitive agreement to purchase substantially all the operating assets of Nicholas J. Bouras Inc. for approximately $63 million plus inventory on hand at the time of closing which is expected within 40 days following regulatory approval.

SEGMENT OPERATING DATA

See Note K Business Segments, to the condensed consolidated financial statements.

We use adjusted operating profit (loss) to compare and evaluate the financial performance of our segments. Adjusted operating profit is the sum of our earnings before income taxes, minority interests and financing costs.

The following tables show our net sales and adjusted operating profit (loss) by business segment:

	Three Months Ended February 28,		**%**	**Six Months Ended February 28,**		**%**
(in thousands)	**2007**	**2006**	**Change**	**2007**	**2006**	**Change**

LIFO Impact on Adjusted Operating Profit LIFO is an inventory costing method that assumes the most recent inventory purchases or goods manufactured are sold first. This results in current sales prices offset against current inventory costs. In periods of rising prices it has the effect of eliminating inflationary profits from net income. In periods of declining prices it has the effect of eliminating deflationary losses from net income. In either case the goal is to reflect economic profit. The table below reflects LIFO income or (expense) representing decreases or (increases) in the LIFO inventory reserve. CMCZ is not included in this table as it uses FIFO valuation exclusively for its inventory:

(in thousands)	Three Months Ended February 28, 2007	2006	Six Months Ended February 28, 2007	2006
Domestic mills	(8,648)	(686)	(12,619)	(10,358)

Consolidated increase (decrease) to adjusted profit before tax	(18,899)	4,037	(29,046)	(17,628)

Domestic Mills We include our four domestic steel and our copper tube minimills in our domestic mills segment. Our domestic steel mills had an adjusted operating profit for the three months ended February 28, 2007 of $59.4 million, down 8% as compared to the prior year s second quarter due to a larger than expected LIFO pre-tax expense of $14 million and a slight decrease in net sales. The increase in LIFO was driven by a 12% cost increase coupled with a modest increase in the quantity of inventory for the quarter just ended as compared to a LIFO expense for the prior year s quarter of $686 thousand. The average metal margin increased by $33 to $326 per ton, as average selling prices (total sales) rose $41 per ton offset by an increase in the average cost of scrap used of $8 per ton. The volume of shipments was down by 7% to 563 thousand tons, tons melted and rolled fell 46 and 17 thousand tons to 531 and 515 thousands tons, respectively as compared to last year s second quarter. The largest decline in volume occurred at our

CMC Steel Texas mill due to scheduled annual maintenance of 19 days to replace the furnace shell and foundation in the melt shop and 13 days to replace the lining of the reheat furnace in the rolling mill. Repair and maintenance expense increased by 46% or $4.2 million from last year s second quarter.

The table below reflects steel and ferrous scrap prices per ton:

	Three Months Ended February 28,		**Increase (Decrease)**		**Six Months Ended February 28,**		**Increase (Decrease)**	
	2007	**2006**	**Amount**	**%**	**2007**	**2006**	**Amount**	**%**
Average mill selling price (finished goods)	$556	$516	$40	8%	$563	$513	$50	10%
Average mill selling price (total sales)	541	500	41	8%	549	495	54	11%
Average ferrous scrap production cost	215	207	8	4%	211	205	6	3%
Average metal margin	326	293	33	11%	337	290	47	16%
Average ferrous scrap purchase price	200	184	16	9%	192	184	8	4%

Table of Contents

The table below reflects our domestic steel minimills operating statistics (short tons in thousands):

	Three Months Ended February 28		Increase (Decrease)		Six Months Ended February 28,		Increase (Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Tons melted	531	577	(46)	(8)%	1,063	1,151	(88)	(8)%
Tons rolled	515	532	(17)	(3)%	1,046	1,054	(8)	(1)%
Tons shipped	563	603	(40)	(7)%	1,089	1,227	(138)	(11)%

All of our domestic steel minimills were profitable during the second quarter ended February 28, 2007. For the six months ended February 28, 2007, our Alabama mill was 30% more profitable over the same period last year as a direct result of increased sales of specialty products and inventory on hand as its customers were trying to keep ahead of scheduled announced price increases. Average selling prices for all of our domestic mills were higher for the three and six months ended February 28, 2007 as compared to 2006. Utility costs decreased by $5.7 million, split evenly between electricity and natural gas with declines in both pricing and usage.

The table below reflects our copper tube minimill s prices per pound and operating statistics:

	Three Months Ended February 28,		Increase (Decrease)		Six Months Ended February 28,		Increase (Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Pounds shipped (in millions)	11.5	15.7	(4.20)	(27)%	21.9	31.9	(10.00)	(31)%
Pounds produced (in millions)	10.4	16.7	(6.30)	(38)%	20.5	32.6	(12.10)	(37)%
Average selling price	$3.50	$2.84	$ 0.66	23%	$3.82	$2.63	$ 1.19	45%
Average copper scrap production cost	$3.05	$1.73	$ 1.32	76%	$3.07	$1.62	$ 1.45	90%
Average metal margin	$0.45	$1.11	$(0.66)	(59)%	$0.75	$1.01	$ (0.26)	(26)%
Average copper scrap purchase price	$2.78	$2.02	$ 0.76	38%	$2.96	$1.87	$ 1.09	58%

Our copper tube minimill s adjusted operating profit was $2.2 million and $5.6 million for the three and six months ended February 28, 2007, respectively, as compared to $6.1 million and $10.3 million, respectively, for the same period in 2006. While the average selling price for the quarter just ended increased by 23% to $3.50 from last year s quarter, the average metal margin decreased by 59% to $0.45 as a result of higher copper scrap purchase price and production cost. Also pounds shipped declined 27% to 11.5 million pounds and production decreased 38% to 10.4 million pounds as compared to last year s second quarter. The operating results of our copper tube minimill were affected by a weak housing market in the U.S., destocking at distributors and lower copper prices. There was a pre-tax LIFO income of $5.4 million compared to a pre-tax LIFO expense of $1.7 million in the prior year as copper prices fell throughout the quarter with only a partial recovery near quarter end.

CMCZ Our combined Polish operation continued to achieve record profitability as the adjusted operating profit for the three and six months ended February 28, 2007 was $25.8 million and $51.6 million, respectively. Average selling prices rose 20% to 1,486 PLN ($507) per short ton while the cost of scrap utilized increased 19% to 826 PLN ($282)

per short ton resulting in a 21% increase in metal margin to 660 PLN ($225). The increase in the metal spread was combined with a 29% increase in short tons shipped with 57% of the products shipped domestically. The strong operating results at CMCZ resulted from a strong Polish GDP growth, the growing infrastructure work in Central and Eastern Europe, a mild winter and an improving German economy all of which contributed to the excellent performance level during the second quarter in an otherwise traditionally weak period. Our mega shredder continues to sustain higher melt shop yields and lower melt shop costs. Both fab shops, including our newest acquisition in eastern Germany, were profitable.

Table of Contents

The following table reflects CMCZ s operating statistics and average prices per short ton:

	Three Months Ended February 28,		Increase		Six Months Ended February 28,		Increase	
	2007	2006	Amount	%	2007	2006	Amount	%
Tons melted (thousands)	378	285	93	33%	736	570	166	29%

Average ferrous scrap purchase price	$ 253	$ 179	$ 74	41%	$ 244	$ 176	$ 68	39%

The change in foreign currency exchange rates had minimal impact on our adjusted operating profit for 2007 and 2006, respectively.

Domestic Fabrication For the quarter just ended February 28, 2007, net sales for our domestic fabrication businesses were constant at $404 million as compared to $408 million for last year s quarter. For the six months ended February 28, 2007 net sales increased $44.4 million to $853 million from the same period last year. Adjusted operating profit for the three and six months just ended was $13.9 million, a 64% decline and $45.4 million a 20% decline, respectively, as compared to the same period last year. Rising steel prices had dual negative effects on our Domestic Fabrication segment. First, adjusted operating profit was affected by a pre-tax LIFO expense for the quarter of $6.3 million compared to last year s income of $9.7 million, a swing of $16 million that resulted from a 5% increase in price and 13% increase in quantities. Second, while average pricing was up across all product areas as compared to prior year, margins were temporarily squeezed until jobs currently bid at higher prices reach our production. Shipments were about even with the prior year.

Our domestic fabrication plants shipments and average selling prices per ton were as follows:

	Three Months Ended February 28,		Increase (Decrease)		Six Months Ended February 28,		Increase (Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Average selling price*								
Rebar	$ 817	$ 780	$ 37	5%	$ 806	$ 761	$ 45	6%

Recycling For the three and six months ended February 28, 2007 net sales for the Recycling segment increased 30% to $354 million and 45% to $737 million, respectively over the same period last year. In a quarter marked by particularly volatile metal pricing, our rapid inventory turnover strategy resulted in an all-time record second quarter for the segment. We experienced a continuing strong demand from our foreign consumers that resulted in significant price increases for our products. Adjusted operating profit of $20.9 million increased 12% over last year s quarter and just surpassed the previous record second quarter of fiscal 2005. Profitability was balanced between ferrous and nonferrous product lines. Ferrous prices were on an upward tear at the end of the quarter and rose 8% on average for the quarter compared to last year. Average nonferrous pricing rose 28% over the previous year as copper prices, though falling during the quarter, were still significantly higher than last year. Quarterly ferrous shipments rose 6% to 517 thousand tons compared to the previous year; nonferrous shipments were up 11% to 82 thousand tons. The total volume of scrap processed, including all our domestic processing operations, equaled 881 thousand tons against 862 thousand tons in last year s second quarter. During the quarter just ended, we received $2.0 million from a business interruption insurance claim for lost profits at one of our shredders that was down for 43 days due to a fire.
The following table reflects our recycling segment s average selling prices per ton and tons shipped (in thousands):

	Three Months Ended February 28,		Increase (Decrease)		Six Months Ended February 28,		Increase (Decrease)	
	2007	2006	Amount	%	2007	2006	Amount	%
Ferrous sales price	$ 206	$ 190	$ 16	8%	$ 194	$ 192	$ 2	1%
Nonferrous sales price	$2,723	$2,133	$590	28%	$2,815	$1,981	$834	42%
Ferrous tons shipped	517	490	27	6%	1,090	957	133	14%
Nonferrous tons shipped	82	74	8	11%	167	144	23	16%
Total volume processed and shipped*	881	862	19	2%	1,818	1,701	117	7%

* Includes our processing plants affiliated with our domestic steel mills.

Reduced tons in inventory led to pre-tax LIFO income of $2.7 million this quarter compared to LIFO expense of $3.2 million for last year s second quarter. For the six months ended February 28, 2007, we recorded a pre-tax LIFO income of $1.5 million as compared to a LIFO expense of $4.6 million for the same period in 2006.

Marketing and Distribution For the quarter just ended February 28, 2007, adjusted operating profit increased by 18% to $15.2 million as sales increased 38%. Underlining the strength of the global metal markets, the Marketing and Distribution segment achieved these results in spite of absorbing a pre-tax LIFO expense of $6.7 million due to higher prices (especially ferrous) for the quarter as compared to an expense in the prior year of $1.8 million. International steel markets were notably strong with general increases in prices, quantities, and profits in Australia, Germany, the U.K. and our inter-Asian (mainly Chinese export) markets. Industrial materials and products continued their strong performance, though down slightly from the prior year. Our nonferrous semis import business gained over the prior year on the strength of rising profitability from stainless steel products. For the six months ended February 28, 2007, adjusted operating profit declined 36% to $23.1 million from the same period last year even though sales increased 27%. LIFO expense of $21 million is a major swing from last year s LIFO credit of $1.5 million. The LIFO expense resulted from ferrous and nonferrous price increases and large increases in inventory, substantially in transit, which is a good indicator of upcoming strong sales activity.

Corporate and Eliminations Our corporate expenses for the three and six months ended February 28, 2007 increased $11.3 and $14.2 million, respectively, over the prior year due primarily to costs incurred for our investment in the global installation of SAP software.

CONSOLIDATED DATA

On a consolidated basis, for the quarter just ended February 28, 2007, the LIFO method of inventory valuation decreased our net earnings on a pre-tax basis by $18.9 million or (10) cents per diluted share as compared to an increase of $4.0 million or 2 cents per diluted share for the same period last year. For the six months ended February 28, 2007 and 2006, LIFO decreased our net earnings on a pre-tax basis by $29 million or (16) cents per diluted share and $17.6 million or (9) cents per diluted share, respectively.

Our overall selling, general and administrative (SG&A) expenses increased by $22.9 million and $51.4 million for the three and six months quarter ended February 28, 2007 as compared to 2006, respectively, because of increases in salary compensation, benefits and professional services. For the three and six months ended February 28, 2007, SG&A includes $9.9 million and $10.7 million of costs associated with our investment in the global deployment of SAP software.

During the three and six months ended February 28, 2007, our interest expense increased by $1.9 million and $3.2 million, respectively, as compared to 2006, primarily due to increased discount costs on extended-term documentary letters of credit and higher average short-term borrowings.

Our overall effective tax rate for the three and six months ended February 28, 2007 was 34.9 % and 35.3 %, respectively as compared to 36.4% and 35.7% for the same periods in 2006, due primarily to a shift in profitability to low tax jurisdictions (Poland). Approximately $3.2 million of additional tax expense was recognized in the three months ended February 28, 2007 due to the final computation of the 85% dividends received deduction afforded by the Foreign Earnings Repatriation Provision of the American Jobs Creation Act of 2004 on the repatriated unremitted foreign earnings from a Swiss subsidiary made during the fourth quarter of fiscal 2006. The true-up of the dividends received deduction increased the effective tax rate by 2.9%.

CONTINGENCIES

See Note J Contingencies, to the condensed consolidated financial statements.

In the ordinary course of conducting our business, we become involved in litigation, administrative proceedings, governmental investigations including environmental matters, and contract disputes. We may incur settlements, fines, penalties or judgments and otherwise become subject to liability because of some of these matters. While we are unable to estimate precisely the ultimate dollar amount of exposure to loss in connection with these matters, we make accruals as amounts become probable and estimable. The amounts we accrue could vary substantially from amounts we pay due to several factors including the following: evolving remediation technology, changing regulations, possible third-party contributions, the inherent shortcomings of the estimation process and the uncertainties involved in litigation. Accordingly, we cannot always estimate a meaningful range of possible exposure. We believe that we have adequately provided in our financial statements for the estimable potential impact of these contingencies. We also believe that the outcomes will not significantly affect the long-term results of operations, our financial position or cash flows. However, they may have a material impact on earnings for a particular quarter.

We are subject to federal, state and local pollution control laws and regulations in all locations where we have operating facilities. We anticipate that compliance with these laws and regulations will involve continuing capital expenditures and operating costs.

OUTLOOK

Our outlook remains strong. We anticipate a record third quarter LIFO diluted net earnings per share between $0.70 to $0.80 (estimated pre-tax LIFO expense of $25 million) compared to last year s third quarter of $0.62 per share which is the current record third quarter.

The Company s third fiscal quarter is aligned to be its strongest ever third quarter. Global infrastructure growth is creating unprecedented demand for rebar and other steel long products, in particular in the markets of North Africa, Middle East, North Europe, Central and Eastern Europe, Russia and Asia. In the U.S., the non-residential construction market should remain strong and robust. The comparatively mild winter in many northern hemisphere countries, as well as the early settlement of 2007 iron ore contract

prices, set the stage for significant price increases of most steel products starting in early calendar 2007. U.S. ferrous scrap prices, in particular obsolete grades, are currently at record levels due to both international and domestic demand. As ferrous scrap flow increases, there could be a correction. Rebar prices are likely to reach record levels in many international markets. The level of rebar imports into the U.S. should remain at lower levels compared with 2006. U.S. steel prices, in general, are likely to continue to lag international prices, and this will continue to curb the level of imports into the U.S.

For our segments, we believe that our U.S. steel mills will benefit from higher prices and higher shipments. In addition, our copper tube mill should improve over the second quarter s performance. Based on a booming construction market in Central and Eastern Europe, CMCZ (Poland) should have an exceptional quarter. Our Domestic Fabrication segment should increase shipments although there will be some margin squeeze due to the rapidly rising steel prices. The Recycling segment should benefit from record ferrous scrap prices and strong nonferrous scrap prices. Our Marketing and Distribution segment should benefit from strong growth in most global markets and should have a solid third quarter.

LIQUIDITY AND CAPITAL RESOURCES

See Note F Credit Arrangements, to the condensed consolidated financial statements.

Our sources, facilities and availability of liquidity and capital resources as of February 28, 2007 (dollars in thousands):

Source	Total Facility	Availability
Net cash flows from operating activities	$ 87,776	$ N/A
Commercial paper program *	400,000	373,925
Domestic accounts receivable securitization	130,000	56,000
International accounts receivable sales facilities	159,653	76,494
Bank credit facilities uncommitted	1,007,448	436,907
Notes due from 2007 to 2013	350,000	**
Trade financing arrangements	**	As required
CMCZ revolving collateralized credit facility	33,670	33,670
CMCZ revolving unsecured credit facility	33,670	33,670
CMCZ & CMC Poland equipment notes	12,192	

* The commercial paper program is supported by our $400 million unsecured revolving credit agreement. The availability under the revolving credit agreement is reduced by $26.1 million of stand-by letters of credit issued as of

February 28, 2007.

** With our investment grade credit ratings and current industry conditions we believe we have access to cost-effective public markets for potential refinancing or the issuance of additional long-term debt.

Certain of our financing agreements, both domestically and at CMCZ, include various covenants, of which we were in compliance at February 28, 2007. There are no guarantees by the Company or any of its subsidiaries for any of CMCZ s debt.

Off-Balance Sheet Arrangements For added flexibility, we may secure financing through securitization and sales of certain accounts receivable both in the U.S. and internationally. See Note D Sales of Accounts Receivable, to the condensed consolidated financial statements. We may continually sell accounts receivable on an ongoing basis to replace those receivables that have been collected from our customers. Our domestic securitization program contains certain cross-default provisions whereby a termination event could occur should we default under another credit arrangement, and contains covenants that conform to the same requirements contained in our revolving credit agreement.

Cash Flows Our cash flows from operating activities primarily result from sales of steel and related products, and to a lesser extent, sales of nonferrous metal products. We have a diverse and generally stable customer base.

Significant fluctuations in working capital:

Decreased accounts receivable we had a faster turnover and collection ratio. In addition, we sold $95.3 million of accounts receivable as part of our accounts receivable securitization program.

Increased inventories more in transit inventory and higher inventory costs in some divisions.

Table of Contents

Decreased accrued expenses annual incentive compensation payments made during the first quarter partially offset by accruals in annual compensation expense for fiscal year 2007.

We expect our current approved total capital spending for fiscal year 2007 to be approximately $240 million, including $28 million to commence the construction of the greenfield micro mill in Phoenix, Arizona and $20 million to start the installation of a new wire block mill in CMCZ. We invested $48 million in property, plant and equipment during the second quarter just ended. We continuously assess our capital spending and reevaluate our requirements based upon current and expected results. Historically, we have not spent all of our approved budget during the fiscal year.

We are also undertaking a 5-year Enterprise Resource Planning (ERP) system implementation program to improve our operating systems and the Company is anticipating spending approximately $26 million during the current fiscal year. As a result, one of our divisions recorded an impairment of $1.4 million to write-off development costs for existing software that will be replaced by the deployment of SAP.

During the three months ended February 28, 2007, we purchased 699,500 shares of our common stock as part of our stock repurchase program at an average price of $25.37 per share for a total of $17.7 million. Our contractual obligations for the next twelve months of $1.3 billion are typically expenditures with normal revenue processing activities. We believe our cash flows from operating activities and debt facilities are adequate to fund our ongoing operations and planned capital expenditures.

CONTRACTUAL OBLIGATIONS

The following table represents our contractual obligations as of February 28, 2007:

		Payments Due By Period*			
(dollars in thousands)	**Total**	**Less than 1 Year**	**1-3 Years**	**3-5 Years**	**More than 5 Years**
Contractual Obligations:					
Long-term debt[1]	$ 363,770	$ 54,600	$106,200	$ 2,922	$200,048
Interest[2]	91,514	20,246	29,477	22,561	19,230
Operating leases[3]	114,766	29,439	46,480	24,525	14,322
Purchase obligations[4]	1,564,716	1,150,502	306,614	71,211	36,389
Total contractual cash obligations	$2,134,766	$1,254,787	$488,771	$121,219	$269,989

* We have not discounted the cash obligations in this table.

(1) Total amounts are included in the February 28, 2007 condensed consolidated balance sheet. See Note F, Credit Arrangements, to the condensed consolidated

financial statements.

(2) Interest payments related to our short-term debt are not included in the table as they do not represent a significant obligation as of February 28, 2007.

(3) Includes minimum lease payment obligations for non-cancelable equipment and real-estate leases in effect as of February 28, 2007.

(4) About 91% of these purchase obligations are for inventory items to be sold in the ordinary course of business. Purchase obligations include all enforceable, legally binding agreements to purchase goods or services that specify all significant terms, regardless of the duration of the agreement. Agreements

with variable terms are excluded because we are unable to estimate the minimum amounts.

Other Commercial Commitments We maintain stand-by letters of credit to provide support for certain transactions that our insurance providers and suppliers request. At February 28, 2007, we had committed $31.8 million under these arrangements. All of the commitments expire within one year.

See Note J Contingencies, to the condensed consolidated financial statements regarding our guarantees.

FORWARD-LOOKING STATEMENTS

This Form 10-Q contains forward-looking statements regarding the outlook for our financial results including net earnings, product pricing and demand, currency valuation, production rates, inventory levels, new capital investments, software implementation costs, and general market conditions. These forward-looking statements generally can be identified by phrases such as we expect, anticipate believe, ought, should, likely, appear, , project, fore similar words or phrases of similar impact. There is inherent risk and uncertainty in any forward-looking statements. Variances will occur and some could be materially different from our current opinion. Developments that could impact our expectations include the following:

- interest rate changes,
- construction activity,
- metals pricing over which we exert little influence,
- increased capacity and product availability from competing steel minimills and other steel suppliers including import quantities and pricing,
- court decisions,
- industry consolidation or changes in production capacity or utilization,
- global factors including political and military uncertainties,
- credit availability,
- currency fluctuations,
- energy prices,
- cost of construction,
- successful implementation of new technology,
- successful integration of acquisitions,
- decisions by governments impacting the level of steel imports, and
- pace of overall economic activity, particularly China.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required hereunder for the Company is consistent with the information set forth in Item 7a. Quantitative and Qualitative Disclosures about Market Risk included in the Company s Annual Report on Form 10-K for the year ended August 31, 2006, filed with the Securities Exchange Commission and is, therefore, not presented herein.

Also, see Note I Derivatives and Risk Management, to the condensed consolidated financial statements.

ITEM 4. CONTROLS AND PROCEDURES

The term disclosure controls and procedures is defined in Rules 13a-15(e) of the Securities Exchange Act of 1934, or the Exchange Act. This term refers to the controls and procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files under the Exchange Act is recorded, processed, summarized and reported within required time periods. Our Chief Executive Officer and our Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this quarterly report, and they have concluded that as of that date, our disclosure controls and procedures were effective at ensuring that required information will be disclosed on a timely basis in our reports filed under the Exchange Act.

No change to our internal control over financial reporting occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

At the registrant s annual meeting of stockholders held January 25, 2007, the four nominees named in the Proxy Statement dated December 11, 2006, were elected to serve as directors until the 2010 annual meeting. There was no solicitation in opposition to the nominees for directors. Proposals to amend the Company s 1999 Non-Employee Director Stock Plan, to approve the Company s 2006 Cash Incentive Plan, to approve the Company s 2006 Long-Term Equity Incentive Plan , and to ratify the appointment of Deloitte & Touche LLP as auditors of the registrant for the fiscal year ending August 31, 2007 were approved. The stockholder proposal was not approved.

Of the 118,350,644 shares outstanding on the record date, 109,333,121 were present in person or by proxy constituting approximately 92.38% of the total shares entitled to vote. Information as to the vote on each director standing for election, all matters voted on at the meeting and directors continuing in office are provided below:

Proposal 1 Election of Directors.

Nominee	For	Withheld	Not Voted
Moses Feldman	107,308,753	2,024,368	0
Ralph E. Loewenberg	107,726,608	1,606,513	0
Murray R. McClean	107,310,031	2,023,090	0
Stanley A. Rabin	107,905,414	1,427,707	0

Directors continuing in office are:

Harold L. Adams

Robert D. Neary

Anthony A. Massaro

Dorothy G. Owen

J. David Smith

Robert R. Womack
