1. Interim Report for the 118th Business Term

## To Our Shareholders

We are pleased to provide this overview of the first half (from January 1, 2018 to June 30, 2018) of our 118th Business Term.

The world economy in the first half of this term remained on a path of moderate recovery as a whole. As for exchange rates, the yen appreciated against the U.S. dollar and depreciated against the euro compared with the first half of the previous term.

Under such conditions, sales of the Office Business Unit, which consists of office multifunction devices, laser printers, etc., were in line with the same period last year, while sales of the Imaging System Business Unit, which consists of digital cameras, inkjet printers, etc., decreased year on year. Sales of the Medical System Business Unit, which includes computed tomography (CT) systems, decreased compared to the first half of the last year, during which demand was particularly high. However, the Industry and Others Business Unit, which consists of lithography equipment, network cameras, etc., continued to deliver strong sales results and achieved a significant increase in sales.

As a result of the above, on a consolidated basis, net sales for the first half of this term increased by 0.1% year on year, while net income attributable to Canon Inc. increased by 8.5% year on year owing to the effect of improved profitability.

For the interim dividend, we decided to pay 80.00 yen per share, which is equivalent to half of the annual dividend paid in the previous term (including the commemorative dividend), from the perspective of ensuring stable returns to shareholders. The dividend is payable on August 27.

Although the business environment surrounding the Canon Group remains fluid, we will stay united in our endeavor to further improve our business results.

We look forward to our shareholders' continued support and encouragement.

August, 2018

Chairman & CEO FUJIO MITARAI

### Highlights of Consolidated Results

&#127761; In the first half of this term, the world economy continued to gradually recover and each of Canon Group's businesses focused on selling new products that met market needs. As a result, consolidated net sales increased by 0.1% from the first half of the previous term.

&#127761; We strove to improve profitability by putting effort into sales promotions for high value-added products, with a focus on new products, and into ongoing cost reduction initiatives. As a result, consolidated net income attributable to Canon Inc. increased by 8.5% from the first half of the previous term.

### **Office Business Unit**

In the area of office multifunction devices, overall unit sales increased slightly year on year as a decrease of monochrome machines was offset by an increase of color machines. Sales of commercial printing products, including digital sheet-fed presses handled by Océ, were in line with the same period last year, document solutions delivered strong sales results. As for laser multifunction printers and laser printers, although sales of consumables were relatively weak, sales of printers remained firm. As a result, sales for this business unit increased by 0.8% on a consolidated basis, in comparison to the first half of the previous term.

### **Imaging System Business Unit**

Interchangeable-lens digital cameras experienced a decrease in unit sales, but high market share was maintained because sales of full-frame sensor models remained firm and sales promotions focusing on mirrorless cameras, such as a new product EOS Kiss M, were carried out. As for inkjet printers, although unit sales of refillable ink tank models increased particularly in Southeast Asia, overall sales decreased year on year. As a result, sales for this business unit decreased by 8.1% on a consolidated basis, in comparison to the first half of the previous term.

### **Medical System Business Unit**

CT systems sold by Canon Medical Systems continued to hold the top market share position in Japan and sales of new products in the area of diagnostic ultrasound systems were strong, particularly in Europe. However, sales in the first quarter did not grow as much as the last year, in which demand was particularly high, due to a postponement in capital investment by medical institutions caused by the revision of medical treatment fees in Japan. Although sales recovered in the second quarter, sales for this business unit for the first half of this term decreased by 3.9% on a consolidated basis, in comparison to the first half of the previous term.

### **Industry and Others Business Unit**

Unit sales of semiconductor lithography equipment grew significantly due to strong capital investment by memory manufacturers. Sales of network cameras remained strong as the areas of its application continued to expand beyond crime prevention. Sales of OLED panel manufacturing equipment of Canon Tokki were strong as in the last year due to the successful cultivation of new customers. As a result, sales for this business unit increased by 16.1% on a consolidated basis, in comparison to the first half of the previous term.

**For those shareholders who receive dividends by exchanging a Receipt of Dividend**

**Guidance for the direct deposit of dividends into an account**

We recommend the direct deposit of dividends into an account as a safer and more expeditious way to receive dividends. Please select one of the three ways to have dividends deposited into an account that are outlined below.

**System of allocating dividends to securities company accounts in proportion to the number of shares held in respective accounts**

With this method, the shareholder is able to receive dividends for each account they have with a securities company in proportion to the number of shares they hold.

**System of receiving dividends in the account registered for receipt of dividends**

With this method, the shareholder is able to receive dividends for all of the issues they hold through one designated account with a financial institution (excluding the Japan Post Bank).

**System of designating an account for each issue held**

With this method, the shareholder is able to designate the account that the dividends will be transferred to for each issue they hold.

For information regarding procedures:

**If you hold shares through a securities company, please contact the securities company where you have an account.**

**If you don't hold shares through a securities company, please contact Mizuho Trust & Banking Co., Ltd.**
