FDA posts briefing materials prior to Advisory Committee meeting for insulin degludec and insulin degludec/insulin aspart
regiddec and insulin degiddec/insulin aspart
Bagsværd, Denmark, 6 November 2012 Novo Nordisk announced today that the US Food
and Drug Administration (FDA) has published the briefing documents ahead of the Advisory
Committee meeting to discuss the New Drug Applications (NDA) for insulin degludec and

The briefing documents from Novo Nordisk and the FDA, which will form the basis for the Advisory Committee's discussion, provide an overview of the non-clinical and clinical data for insulin degludec and insulin degludec/insulin aspart for the treatment of diabetes.

insulin degludec/insulin aspart, which will take place on 8 November 2012.

The briefing materials can be accessed on the FDA webpage: http://www.fda.gov/AdvisoryCommittees/CommitteesMeetingMaterials/Drugs/EndocrinologicandMetabolicDrugsAdvisoryCommittee/ucm285142.htm

Conference call

On 9 November at 8.30 am CET, corresponding to 2.30 am EST, a conference call for investors will be held. Investors will be able to listen in via a link on the investor section of novonordisk.com.

About advisory committee meetings

FDA advisory committees are panels of independent experts who advise the FDA on specific questions raised by the FDA as they consider regulatory decisions. The FDA is not bound by the committee's recommendation, but it takes its advice into consideration when reviewing new drug applications. According to the FDA Amendment Act of 2007 (FDAAA), the FDA should refer new drugs to an advisory committee meeting, or alternatively justify why an advisory committee meeting was not requested.

About insulin degludec and insulin degludec/insulin aspart

Insulin degludec is a once-daily new-generation basal insulin analogue, with an ultra-long duration of action, discovered and developed by Novo Nordisk. Insulin degludec has a distinct slow absorption which provides a flat and stable action profile. Insulin degludec has been studied in a large-scale clinical trial programme, BEGIN®, examining its impact

on glucose control, hypoglycaemia and the possibility to flexibly adjust insulin degludec dosing time to suit patient needs.

Insulin degludec/insulin aspart contains the new-generation basal insulin degludec in a formulation with a bolus boost of insulin aspart. Insulin degludec/insulin aspart is the first and only soluble insulin combination of insulin degludec and the most prescribed rapid-acting insulin, NovoRapid® (NovoLog® in the US), providing both fasting and post-prandial glucose control.

Insulin degludec and insulin degludec/insulin aspart were submitted to the European Medicines Agency (EMA) and the US Food and Drug Administration (FDA) in September 2011 for regulatory review. In addition, applications have been submitted for regulatory approval in Japan, Canada, Switzerland and a range of other countries. Insulin degludec was approved in Japan in September 2012, and in October 2012 insulin degludec and insulin degludec/insulin aspart received positive CHMP opinions in Europe.

Novo Nordisk is a global healthcare company with 89 years of innovation and leadership in diabetes care.
