NINE MONTHS ENDED SEPTEMBER 30, 2012 AND 2011

Note 1 - Basis of presentation, organization and other matters

Data Storage Corporation, (the “Company” or “DSC”) provides Hybrid Cloud solutions and services as the result of several transactions: a share exchange with Euro Trend Inc. incorporated on March 27, 2007 under the laws of the State of Nevada; Ownership of DSC incorporated in 2001; and an Asset Acquisition from SafeData LLC in 2010. On October 20, 2008 we completed a Share Exchange Agreement whereby we acquired all of the outstanding capital stock and ownership interests of Data Storage Corporation. In exchange we issued 13,357,143 shares of our common stock to the Data Storage Corporation’s shareholders, a cloud storage and SaaS organization, providing services for disaster recovery. This transaction was accounted for as a reverse merger for accounting purposes. Accordingly, Data Storage Corporation, the accounting acquirer, is regarded as the predecessor entity. On June 17, 2010 we entered into an Asset Purchase Agreement with SafeData, a provider of Cloud Storage and Cloud Computing mostly to IBM’s Mid-Range Equipment users, namely, AS400 and iSeries users under which we acquired all right, title and interest in the end user customer base of SafeData and all related current and fixed assets and contracts including the transfer of all of SafeData’s current liabilities arising out of the business or the assets acquired. Pursuant to the Agreement, we paid an aggregate purchase price equal to \$3,000,000. Giving effect to certain holdback and contingency clauses as defined in the agreement, we paid \$1,229,952 in cash and \$850,000 in shares of our common stock as well as assumption of SafeData Accounts Payable and Receivables.

The Company was incorporated in Delaware on August 29, 2001. The Company is a provider of data backup services. The Company specializes in secure disk-to-disk data backup and restoration solutions for disaster recovery, business continuity, and regulatory compliance.

Condensed Consolidated Financial Statements

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all normal recurring adjustments considered necessary for a fair presentation of the results of operations have been included. The results of operations for the nine months ended September 30, 2012 are not necessarily indicative of the results of operations for the full year. When reading the financial information contained in this Quarterly Report, reference should be made to the financial statements, schedule and notes contained in the

Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Liquidity

The financial statements have been prepared using accounting principles generally accepted in the United States of America applicable for a going concern, which assumes that the Company will realize its assets and discharge its liabilities in the ordinary course of business. For the nine months ended September 30, 2012, the Company has generated revenues of \$2,996,677 but has incurred a net loss of \$1,708,794. Its ability to continue as a going concern is dependent upon achieving sales growth, reduction of operation expenses and ability of the Company to obtain the necessary financing to meet its obligations and pay its liabilities arising from normal business operations when they come due, and upon profitable operations. The Company has been funded by the Mr. Charles M. Piluso, the Company's Chief Executive Officer ("CEO") and largest shareholder since inception as well as several Directors. It is the intention of Mr. Piluso to continue to fund the Company on an as needed basis.

Note 2 - Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiary, Data Storage Corporation, a Delaware Corporation. All significant inter-company transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

Estimated Fair Value of Financial Instruments

The Company's financial instruments include cash, accounts receivable, accounts payable, line of credit and due to related parties. Management believes the estimated fair value of these accounts at September 30, 2012 approximate their carrying value as reflected in the balance sheets due to the short-term nature of these instruments or the use of market interest rates for debt instruments. The carrying values of certain of the Company's notes payable and capital lease obligations approximate their fair values based upon a comparison of the interest rate and terms of such debt given the level of risk to the rates and terms of similar debt currently available to the Company in the marketplace. It is not practical to estimate the fair value of certain notes payable, the convertible debt and the liability for contingent compensation from acquisition. In order to do so, it would be necessary to obtain an independent valuation of these unique instruments. The cost of that valuation would not be justified in light of the circumstances.

Goodwill and Other Intangibles

Goodwill is not subject to amortization and is tested for impairment annually and whenever events or changes in circumstances indicate that impairment may have occurred. Intangible assets were evaluated to determine if they are finite or indefinite-lived. The intangible assets that are finite lived are amortized over the useful life of the asset. Indefinite-lived intangible assets are also tested for impairment annually and whenever events or changes in circumstances indicate that their carrying value may not be recoverable.

Revenue Recognition

The Company's revenues consist principally of cloud storage and cloud computing revenues, SaaS and IaaS. Storage revenues consist of monthly charges related to the storage of materials or data (generally on a per unit basis). Sales are generally recorded in the month the service is provided. For customers who are billed on an annual basis, deferred revenue is recorded and amortized over the life of the contract. Set up fees charged in connection with storage contracts are deferred and recognized on a straight line basis over the life of the contract.

Net Income (Loss) Per Common Share

In accordance with FASB ASC 260-10-5 Earnings Per Share, basic income (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed by dividing net income (loss) adjusted for income or loss that would result from the assumed conversion of potential common shares from contracts that may be settled in stock or cash by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during each period. The inclusion of the potential common shares to be issued have an anti-dilutive effect on diluted loss per share and therefore they are not included in the calculation. Potentially dilutive securities at September 30, 2012 include 4,218,837 options, 28,642 warrants and 588,235 shares upon the conversion of debt.

Recently Issued and Newly Adopted Accounting Pronouncements

FASB ASU No. 2012-02, which provides, subject to certain conditions, an entity the option to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC 350-30, "Intangibles - Goodwill and Other - General Intangibles Other than Goodwill."

In September 2011, the FASB issued Accounting Standards Update No. 2011-08 ("ASU 2011-08"), which updates the guidance in ASC Topic 350, Intangibles – Goodwill & Other. The amendments in ASU 2011-08 permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than the carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than fifty percent. If, after assessing the totality of events or circumstances, an entity determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The amendments in ASU 2011-08 include examples of events and circumstances that an entity should consider in evaluating whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. However, the examples are not intended to be all-inclusive and an entity may identify other relevant events and circumstances to consider in making the determination. The examples in this ASU 2011-08 supersede the previous examples under ASC Topic 350 of events and circumstances an entity should consider in determining whether it should test for impairment between annual tests, and also supersede the examples of events and circumstances that an entity having a reporting unit with a zero or negative carrying amount should consider in determining whether to perform the second step of the impairment test. Under the amendments in ASU 2011-08, an

entity is no longer permitted to carry forward its detailed calculation of a reporting unit's fair value from a prior year as previously permitted under ASC Topic 350. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. ASU 2011-08 is not expected to have a material impact on the Company's financial position or results of operations.

The economic substance of the leases is that the Company is financing the acquisitions through the leases and accordingly, they are recorded in the Company's assets and liabilities. The leases are payable to Systems Trading, Inc. and IBM with combined monthly installments of \$47,819 through various dates in 2011 and 2015. The leases are secured with the computer equipment. Interest rates on capitalized leases vary from 6%-12% and are imputed based on the lower of the Company's incremental borrowing rate at the inception of each lease or the lessor's implicit rate of return.

Future minimum lease payments under the capital leases are as follows:

As of September 30, 2012	\$ 1,245,118

As of September 30, 2012, the Company owed \$100,292 under the revolving credit line.

Share-based compensation expense for options totaling \$196,986 and \$52,420 was recognized in our results for the nine months ended September 30, 2012 and 2011, respectively is based on awards vested. The 2012 options were valued at the grant date at \$400,015 and are being amortized over five (5) years.

The valuation methodology used to determine the fair value of the options issued during the year was the Black-Scholes option-pricing model. The Black-Scholes model requires the use of a number of assumptions including volatility of the stock price, the average risk-free interest rate, and the weighted average expected life of the options.

The risk-free interest rate assumption is based upon observed interest rates on zero coupon U.S. Treasury bonds whose maturity period is appropriate for the term of the Warrants and is calculated by using the average daily historical stock prices through the day preceding the grant date.

Estimated volatility is a measure of the amount by which the Company's stock price is expected to fluctuate each year during the expected life of the award. The Company's estimated volatility is an average of the historical volatility of peer entities whose stock prices were publicly available. The Company's calculation of estimated volatility is based on historical stock prices of these peer entities over a period equal to the expected life of the awards. The Company uses the historical volatility of peer entities due to the lack of sufficient historical data of its stock price.

The weighted average fair value of options granted and the assumptions used in the Black-Scholes model during the nine months ended September 30, 2012 are set forth in the table below.

	2012	2011
Weighted average fair value of options granted	\$ 0.35	\$ 0.41
Risk-free interest rate	1.59%	2.20%
Volatility	98.00%	74.98%
Expected life (years)	10	10

As of September 30, 2012, there was \$400,264 of total unrecognized compensation expense related to unvested employee options granted under the Company's share based compensation plans that is expected to be recognized over a weighted average period of approximately 2.8 years.
