**BANCO DE CHILE  
REPORT ON FORM 6-K**

Attached is an English translation of a Press Release issued by Banco de Chile ( the Bank ) on October 28, 2005, regarding its financial statements for the third quarter ended September 30, 2005.

---

## 2005 Third Quarter Results

**Santiago, Chile,  
October 28, 2005**  
**Banco de Chile (NYSE:  
BCH)**, a Chilean  
full service financial  
institution, market leader  
in a wide variety  
of credit and non credit  
products and  
services across all  
segments of  
the Chilean financial  
market, today announced  
results for the  
third quarter  
ended September 30,  
2005.

## FINANCIAL HIGHLIGHTS

Net income for 3Q05 reached Ch\$ 48,304 million, a 19.4% increase over the same quarter of 2004.

ROAE of 28.2% for the 3Q05 largely exceeded, once again, the system's average of 17.0%.

The Bank's unconsolidated loan portfolio, net of interbank loans, increased by 12.6% during the last twelve months, allowing a 4 basis point increase in market share.

The Basle ratio grew from 11.3% in June 2005 to 12.0% at the end of September, 2005 as a result of the capital increase coming from the placement of a 2.5% stake of shares previously purchased by the Bank.

## Third Quarter 2005 Highlights

## The Bank

- **Banco de Chile continues to lead the profitability ranking in the Chilean financial sector.** After strong nine month results, the Bank has been able to sustain its profitability leadership in the market, reaching the highest ROAE in the Chilean financial system for both the nine-month period and the 3Q05, with ratios of 29.1% and 28.2%, respectively.
- **Loan portfolio growth.** As of September 30, 2005 the Bank's loan portfolio, net of interbank loans, totaled Ch\$7,599,725 million, reflecting an annual growth of 11.7%. The Bank reached a market share of 17.78% as of September 30, 2005, an increase of approximately 4 basis points from the 17.74% posted as of September 30, 2004.
- **Sale of the shares repurchased during 2004.** The Bank increased its capital and reserves by an amount of Ch\$57,758 million during 3Q05 as a result of the sale of 2.5% of the Bank's shares. This sale was made according to the share repurchase program. Consequently, the total capital to risk adjusted assets increased from 11.3% to 12.0%, while basic capital to total assets rose from 5.0% to 5.7%. This capital increase is primarily intended to finance the Bank's loan growth.
- **Distribution network expansion.** In line with the Bank's focus on strengthening its position in the retail market, 11 new branches were opened during 3Q05, most of them CrediChile branches, in order to increase its geographical coverage. In addition, 26 new ATMs were inaugurated during 3Q05, totaling 1,183 units as of September 2005.
- **Banco de Chile's New York Branch reached agreements with Regulators and agreed to pay civil money penalty.** On October 12, 2005, Banco de Chile's U.S. Branches agreed to a total payment of a \$3 million civil money penalty to resolve allegations related to its compliance with the Bank Secrecy Act and anti-money laundering regulations.  
The agreements were separately entered into with the Office of the Comptroller of the Currency (OCC) and the Financial Crimes Enforcement Network of the United States Department of the Treasury (FinCEN). These actions marked the end of a yearlong process during which the Bank's officials fully cooperated with regulators. The Bank's U.S. branches are implementing more strict policies and procedures for anti-money laundering compliance by improving internal controls, strengthening independent audit functions and increasing overall U.S. human resources capabilities.
- **Successful local bond placements.** During the 3Q05 the Bank placed a total amount of UF2.67 million (US\$88.6 million) in 5-year bonds on the local market, with an average cut-off rate of 2.59%, equivalent to a spread of 90 basis points over the corresponding Chilean Central Bank bonds. The proceeds from the bonds will be used to improve the asset and liability structure and to finance residential mortgage loans.
- **Banco de Chile was the winner of The Banker's Country Award.** The Bank was acknowledged for the second consecutive year as Bank of the Year 2005 for Chile by The Banker, a member of the Financial Times Group. This award recognized the Bank's overall performance, technological innovation and successful

business strategy.

- **Recognition to subsidiaries.** Banco de Chile's Insurance Brokerage subsidiary was awarded Best Company to Work for in Chile. This award is given each year to companies that create a workplace environment that fosters trust, pride and teamwork amongst its employees, according to a survey conducted on some 170 companies, by the Great Place to Work Institute. In addition, the Bank's Financial Advisory subsidiary was recently named by the Chilean newspaper Diario Financiero and the Deloitte consulting firm, as the Best Chilean M&A (Merger & Acquisition) Bank of Year 2004. This award recognized the subsidiary's outstanding advisory role in several important deals throughout the evaluated period.
- **Banchile Financial Advisory Subsidiaries closed important deals during the quarter.** The Financial Advisory subsidiary completed the successful negotiation and management of a long-term financing arrangement in the amount of UF 1,250,000 with the largest chain of cemeteries in Chile. This financial transaction counted on the important participation of five banks, including Banco de Chile, in a syndicated credit agreement for a 6-year term to restructure the current debt and finance future investments. During this quarter, and representing the seller, the subsidiary also closed the sale of a corporation in the manufacturing sector. It is worth noting that in this operation, Banco de Chile granted additional long-term financing to the buyer.
- **New mutual fund launching.** The Banchile Investment Fund subsidiary launched the new Fondo Mutuo Chile Garantizado, fund in which the nominal amount invested will be 100% guaranteed, and will provide an estimated return between 60%- 80% of the average monthly valuation of the inter 10 index of the Santiago Stock Exchange (composed by the 10 main local stocks holding ADS programs). This new fund confirms the subsidiaries' focus on delivering innovative financial solutions to its clients.

*Financial System Highlights*

- **The system's loan portfolio**, net of interbank loans, as of September 30, 2005, totaled US\$78,372 million, increasing by 12.4% on an annual basis. The annual loan growth continues to be driven by individuals, with important increases of 19.9% and 18.1% in consumer and residential mortgage loans. Loans for factoring and leasing contracts during the twelve-month period also increased considerably. During 3Q05, total loans expanded by 2.5% demonstrating overall growth, with the exceptions of foreign trade and contingent loans which were affected by the decrease in the exchange rate during this quarter. Past-due loans continued to decline and consequently, the past due to total loans ratio dropped to 1.01% in 3Q05 from 1.39% in 3Q04.
- **Net income for the financial system decreased slightly by 2.5% during 3Q05** as compared to the previous quarter, amounting to Ch\$204,165 million. This decrease was mainly driven by higher provisions for loan losses which were partially offset by an increase in non-operating income, higher results from subsidiaries and lower income taxes. Consequently, the 3Q05 net income implied a system's ROAE of 17.0%, down from the 18.1% in 2Q05.
- **Increase in the monetary policy interest rate.** During 3Q05 the Central Bank raised its short term reference interest rate by 25 basis points per month, reaching 4.25% in October 2005. This was in line with the Central Bank's gradual process of monetary normalization and a consequence of the upward trend in inflation. Inflation for 3Q05 was 1.9%, attaining a monthly peak of 1.0% in September, mainly driven by higher costs of fuel and food.

2005 Third Quarter Results

Banco de Chile 2005 Third-Quarter  
Consolidated Results

**NET INCOME**

Net income for the 3Q05 continues to be outstanding, representing the second highest quarterly net income after 2Q05.

The Bank's 3Q05 net income resulted in an annualized return on average assets (**ROAA**) and annualized return on average shareholders' equity (**ROAE**) of 1.86% and 28.2%, respectively, higher than the 3Q04 comparable figures of 1.63% and 24.9%.

Net income increased by 19.4% to Ch\$ 48,304 million in 3Q05 from Ch\$40,455 million in 3Q04, mainly reflecting:

- a decrease in provisions for loan losses,
- higher benefits related to demand deposits and net assets positions denominated in UF,
- increased fee income coming from the Bank's subsidiaries,
- positive gains on financial instruments, and
- higher loan volume.

These positive drivers were partially offset by higher level of operating expenses, lower loan spreads, negative repricing effects and losses in the US branches during 3Q05.

The contribution of the Bank's subsidiaries to the consolidated results amounted to Ch\$6,234 million and represents 12.9% of total net income. The slight increase in the subsidiaries' overall net profits for the current quarter compared to 3Q04 was mainly driven by improved performance of the Bank's Factoring, Insurance Brokerage and Socofin

subsidiaries.

<b>Bank, Subsidiaries and Foreign Branches' Net Income</b>				
(in millions of Chilean pesos)	<b>3Q04</b>	<b>2Q05</b>	<b>3Q05</b>	<b>% Change 3Q05/3Q04</b>
Bank	32,432	47,398	<b>44,834</b>	38.2%
Foreign Branches	1,844	(838)	<b>(2,764)</b>	-
Stock Brokerage	2,891	3,448	<b>2,553</b>	(11.7)%
Gral Adm. of Funds	2,492	2,141	<b>2,491</b>	(0.0)%

Financial Advisory	90	9	<b>101</b>	12.2%
Factoring	437	300	<b>565</b>	29.3%
Securitization	(12)	23	<b>26</b>	-
Promarket	8	16	<b>22</b>	175.0%
Socofin	180	295	<b>251</b>	39.4%
Trade Services	-	50	<b>53</b>	-
<b>Total Net Income</b>	<b>40,455</b>	<b>52,937</b>	<b>48,304</b>	<b>19.4%</b>

The positive contribution made by the Factoring subsidiary in 3Q05, as compared to 3Q04, was a result of the strong expansion of 30.5% in its loan volume and lower provisions for loan losses. Higher revenues posted by the Insurance Brokerage during 3Q05 were closely related to strong sales of insurance products supported by marketing campaigns specifically tailored to cross-sell this product.

Lower results coming from the Stock Brokerage were principally a consequence of a decrease in earnings related to fixed income securities and trading of US dollars and an increase in personnel expenses related to indemnities, effects that were partially offset by higher income from stocks trading and higher fees generated by the investment banking unit.

The General Administrator of Funds continues to generate robust net income, however, the 3Q05 figure remained stable as compared to 3Q04, as higher fee income accounted for in 3Q05 was totally offset by higher payments related to the service agreement between this subsidiary and the Bank, regarding the use of distribution channels. It is worth noting, that this agreement has no impact on the bottom line.

Net income registered in 3Q05 and, to a lesser extent, in 2Q05, was adversely impacted by losses accounted for by the foreign branches as a consequence of extraordinary expenses incurred by the New York branch. This responded to efforts undertaken to comply with the Consent Order agreed with the OCC, which mainly includes legal counsel and advisory expenses.

On the other hand, net income for the 3Q05 decreased by 8.8% compared to the previous quarter's record level. This decline mainly responded to a decrease in gains on sales of financial instruments and, to a lesser extent, to a drop in the net financial income as the inflation rates dropped.

**NET FINANCIAL INCOME**

Net financial income increased by 5.4% to Ch\$96,414 million in 3Q05 from the Ch\$91,479 million in 3Q04, as a result of a 1.9% expansion in average interest earning assets and a slight increase of 14 basis points in net financial margin<sup>1</sup>.

<b>Net Financial Income</b>				
(in millions of Chilean pesos)	<b>3Q04</b>	<b>2Q05</b>	<b>3Q05</b>	<b>% Change 3Q05/3Q04</b>
Interest revenue	143,857	193,167	<b>172,367</b>	19.8%
Interest expense	(64,006)	(94,900)	<b>(86,797)</b>	35.6%
Foreign Exchange transactions, net	11,628	572	<b>10,844</b>	(6.7)%
<b>Net Financial Income</b>	<b>91,479</b>	<b>98,839</b>	<b>96,414</b>	<b>5.4%</b>
Avg. Int. earning assets	8,944,516	9,396,076	<b>9,116,425</b>	1.9%
<b>Net Financial Margin<sup>1</sup></b>	<b>4.09%</b>	<b>4.21%</b>	<b>4.23%</b>	-

The increase in average interest earning assets was mainly attributed to the 9.8% annual increase in average total loans, principally commercial, residential mortgage loans, consumer and contingent loans, which partially offset the 30.6% decrease in average investments.

The increase in net financial margin from 4.09% in 3Q04 to 4.23% in 3Q05 was mainly explained by:

- the higher inflation rate, measured by the variation of the UF of 1.3% during 3Q05, compared to 1.0% in 3Q04, which implied that during 3Q05 the Bank earned higher interest income on the portion of UF denominated interest earning assets financed by nominal interest bearing liabilities and by non-interest bearing liabilities.
- A better asset mix reflected in a lower proportion of financial investments and higher proportion of high yield loans, such as consumer loans, leasing and factoring contracts.

However, these positive effects were partially offset by lower loans spreads and the negative repricing effect resulting from the successive increases in the short-term interest rates during 3Q05, as the Bank's liabilities reprice faster than its assets. During 3Q05, the short-term interest rate was raised by 75 basis points while in 3Q04 this rate was raised only by 25 basis points at the end of that period.

3Q05 net financial income decreased by 2.5% as compared to the previous quarter, mainly as a consequence of lower inflation rate (1.3% during 3Q05 versus 1.7% in 2Q05) and, to a lesser extent, to higher negative repricing effects as the short-term interest rates increased by 75 basis points during 3Q05, as compared to 50 basis points increase during 2Q05.

The Bank continued to achieve a high level of sustainable fee income during 3Q05, totaling Ch\$35,262 million, representing increases of 1.5% and 3.1% as compared to the same quarter of 2004 and to the previous quarter, respectively. These increases were primarily due to the growth in commissions coming from our subsidiaries, which significantly improved their contribution to total fee income to a 43.4% in 3Q05, from 34.7% in 3Q04 and 38.7% in 2Q05.

The Stock Brokerage subsidiary continues to show a strong performance through increased volumes of stock transactions. In addition, during 3Q05 an important expansion on accrued fees was also achieved related to its participation in stock offerings and to corporate advisory income coming from its investment banking unit. The better performance of the General Administrator of Funds in terms of fee income has also been favored by the good economic climate in Chile and by its permanent effort to provide excellent and innovative products and services to its customers. Consequently, average funds under management grew by 10.8% and the client base did so by 15.9% during the last twelve months, while both indicators jumped by 5.2% during the quarter. As the insurance related business has become a key fee generating product, special insurance campaigns were launched during 3Q05 thus implying a significant growth in total sales as well as in fee income accounted for by both the Bank and its insurance subsidiary.

---

<sup>1</sup> Net financial income divided by average interest earning assets.

---

## 2005 Third Quarter Results

The Financial Advisory subsidiary's higher fee income during 3Q05 was principally related to a syndicated credit arrangement and services provided for the sale of a manufacturing company. Higher factoring commissions were also related to an important business transaction with a corporate client of the infrastructure sector, corresponding to a financing project for the Freeway route.

The decline in net fee income observed in the Bank's line during 3Q05, as compared to 3Q04, was mainly explained by lower income from assets received in lieu of payment and an increase in fees paid to the sales force and co-branding expenses principally related to credit card campaigns and to the Bank's strategy in increasing its client base in the retail sector. The lower income coming from these items, accounted for in the fee income line, was partially offset by higher fee income from traditional products such as sight accounts, ATMs and credit lines due to the 22% annual expansion of the ATM network and the increase in the number of current accounts.

The 3.1% increase in fee income during 3Q05 compared to the previous quarter was principally attributable to the Stock Brokerage and the General Administration of Funds. This growth shows the importance of the complimentary operations of the Bank and its subsidiaries, as well as the wide ranging solutions that the Bank is able to deliver to its clients.

<b>Net Income from Services, by Company</b>				
(in millions of Chilean pesos)	<b>3Q04</b>	<b>2Q05</b>	<b>3Q05</b>	<b>% Change 3Q05/3Q04</b>

### NET GAINS ON SALES OF FINANCIAL INSTRUMENTS

On the third quarter of 2005, gains on sales of financial instruments increased to Ch\$1,236 million from a loss of Ch\$2,329 million in 3Q04. This loss was mainly related to: (i) the sale of a loan associated to the retail sector which effect at bottom line level was totally offset by the related provision release; and (ii) losses associated to the sale of

Central Bank securities as a result of a specific increase in long-term interest rates during September 2004. It is worth mentioning that during 2Q05 long-term interest rates decreased by approximately 50 basis points implying higher mark to market income and therefore explaining higher gains on sales during such quarter.

## PROVISIONS

Provisions amounted to Ch\$12,518 million in 3Q05, a 38% decrease as compared to the Ch\$20,063 million in 3Q04 and a 13.3% increase relative to the Ch\$ 11,045 million in the previous quarter. The annual decline in provisions confirms the trend observed since 2004, mainly reflecting the improved asset quality of the wholesale loan portfolio (large and medium size companies) and, to a lesser extent, of the retail segment. Better asset quality is directly related to better economic conditions and expectations fostered by higher aggregate demand led by both investment and consumption. In particular, the higher amount of provisions recorded in 3Q04 were mainly related to the downgrading of certain clients of the construction sector. The slight increase in provisions during 3Q05 compared to the previous quarter was principally related to corporations belonging to the retail and manufacturing sectors. However, over 90% of total provisions were associated to retail banking (individuals and small companies).

Provisions to average loans declined to 0.66% in 3Q05 from 1.16% in 3Q04, as well as the ratio of charge-offs to average loans which reached 0.74% in 3Q05 from 1.02% in 3Q04.

Recoveries / Avg. Loans	0.74%	0.49%	<b>0.42%</b>	

**OTHER INCOME AND EXPENSES**

Total Other Income and Expenses decreased to Ch\$6,750 million in 3Q05 from Ch\$8,192 million in 3Q04, mainly as a consequence of lower recoveries of loans previously charged-off. It is worth noting that the 3Q04 figure of non-operating income, net, mainly reflects a one-time provision regarding previous year credit cards related expenses and, lower non-operating income coming from the sale of assets received in lieu of payment.

**OPERATING EXPENSES**

Total operating expenses reached Ch\$69,435 million during 3Q05, an increase of 12.5% compared to 3Q04, principally explained by the 23.8% expansion in administrative expenses and, to a lesser extent, by the 6.2% increase in personnel salaries.

The Ch\$5,532 million increase in administrative expenses during 3Q05, as compared to 3Q04, was largely attributable to extraordinary legal counsel and advisory service expenses incurred during 3Q05 by the New York branch and related to the actions taken in order to fully comply with the US regulator requirements. Higher administrative expenses accounted for in the foreign branches amounted to Ch\$4,451 million in 3Q05, representing about 80% of the overall increase in this line. To a lesser extent, higher administrative expenses were also fueled by higher computer and technology expenses and to rental and maintenance of fixed assets.

The 6.2% increase in personnel salaries between 3Q05 and 3Q04, is mainly explained by the incorporation of new employees, wage increases, higher performance related compensations, and an increase in indemnities.

The quarterly contraction in operating expenses during 3Q05, compared to the previous period, was largely the result of lower indemnity expenses, as in 2Q05 some adjustments to the organizational structure of the Bank were made, mainly in its commercial areas, in line with its new business model supported by the Neos project. This decrease was partially offset by higher administrative expenses accounted for both in the Bank and in the New York branch.

Operating expenses for the quarter represented 52.2% of operating revenues, thus increasing from 49.8% and 50.6% attained in 3Q04 and 2Q05, respectively, but continued to be lower than the 52.9% reached by the Chilean banking system in the same period.

## LOSS FROM PRICE- LEVEL RESTATEMENT

Loss from price-level restatement amounted to Ch\$4,779 million in 3Q05 as compared to Ch\$3,773 million during 3Q04, mainly as a consequence of higher inflation rates used for adjustment purposes: 1.3% in 3Q05 up from 1.0% in 3Q04.

## INCOME TAXES

The Bank's income taxes totaled Ch\$4,626 million in 3Q05 as compared to Ch\$6,071 million in 3Q04, representing effective income tax rates of 8.7% and 13.0%, respectively, lower than Chile's 17% statutory corporate tax rate as, by law, the Bank is allowed to deduct the dividend payments to SAOS from its taxable income base.

## LOAN PORTFOLIO

The low interest rate environment that continues to prevail in the Chilean economy has allowed for both the Bank and the Chilean financial system to achieve attractive loan growth rates equivalent to approximately two times the GDP growth rate. Accordingly, at the end of September 2005, the Bank reached its highest level in terms of volume, with a total loan portfolio, net of interbank loans, of Ch\$7,599,725 million. The sustained loan growth has permitted the Bank to attain an annual loan expansion of 11.7%, also positively impacted by high economic growth and favorable macroeconomic conditions.

Commercial loans, residential mortgage loans, consumer, contingent and lease contracts have peaked during this period. Also, it is important to emphasize that during the year, the Bank achieved robust loan increases of 17.4% in large corporations and healthy growth increases in individuals and medium size companies of 12.4% and 11.5%, respectively.

During 3Q05 the Bank's highest loan growth was mainly registered in the individual segment and medium sized companies with 3.6% and 4.5%, respectively. Large corporate loans were importantly impacted by the decline in the

exchange rate which implied a contraction in foreign trade and contingent loans. During 3Q05, loan growth in the individual segment was mainly led by mortgage loans financed by the Bank's general borrowings and consumer loans, principally installments credits, from both high income and lower income individuals. It is worth noting that the Bank held its focus on the retail segment, where there is considerable room to expand, particularly in small companies and lower-income individuals. Accordingly, during 3Q05 the Bank has opened 10 new CrediChile branches in order to improve the geographical coverage of this segment.

<b>Total Past Due Loans</b>	<b>100,255</b>	<b>83,075</b>	<b>75,956</b>	<b>(24.2)%</b>	<b>(8.6)%</b>

Economic growth maintained its upward trend, positively impacting investment and employment and, consequently, the asset quality indicators. Accordingly, past due loans amounted to Ch\$ 75,956 million as of September 2005, an annual and quarterly decline of 24.2% and 8.6%, respectively, mainly coming from commercial loans. As a consequence, the ratio of past due loans, for the quarter ended September 2005, improved to 0.99% from 1.46% in the quarter ended September 2004, and from 1.09% in the previous quarter. The coverage ratio reached 181.1% in 3Q05 from 167.58% in 3Q04 and from 169.64% in 2Q05. It is worth mentioning that the unconsolidated past due loan ratio, as of September 2005 was similar to the system's average figure of 1.01%, while the Bank's coverage ratio stood higher than the 168% system's average at the same date.

## FUNDING

Total liabilities increased by 3.8% during the last twelve months as a consequence of a 6.8% growth in interest bearing liabilities, which more than offset the 2.0% contraction in non-interest bearing liabilities.

The successive increases in short-term interest rates during 2005 have enhanced the demand for time deposits while, and at the same time, negatively impacted bankers draft volumes. In fact, time deposits registered an annual increase of 16.0%, while bankers drafts decreased by 20.4% during the same period.

It is worth mentioning that the Bank has been expanding the duration of its liabilities mainly due to more attractive long and medium-term interest rates. Accordingly, long-term liabilities such as syndicated credits (accounted for as foreign borrowings), subordinated bonds and other bonds have importantly increased during the last twelve months. The 72.5% annual expansion of other bonds was principally related to a 5 year term bond placement for UF5 million in 2Q05 and to a series of placements of 5- year bonds for a total amount of UF2.67 million, in the local market, during 3Q05. Regarding subordinated bond growth, during 1Q05 the Bank placed a new series of these bonds for a total amount of UF2 million with an annual real rate of 4.34%, maturing in 2023. The higher level of foreign borrowings was influenced by the syndicated credit agreement signed by the Bank in April 2005 for an amount of US\$200 million, in order to finance its foreign trade loans booked in Chile, and to expand the New York Branch working capital.

The 4.7% quarterly drop in total liabilities was mainly in response to both the 8.9% contraction in the investment portfolio and, at the same time, to the 10.5% increase in capital and reserves during 3Q05. The decline in total liabilities was mainly concentrated in non-interest bearing liabilities influenced by the rise in short term interest rates.

## INVESTMENT PORTFOLIO

As of September 2005, the Bank's investment portfolio totaled Ch\$1,308,926 million, a decrease of 8.9% as compared to June 2005. This was mainly driven by short-term Central Bank securities maintained in order to comply with lower technical reserve requirements<sup>2</sup> as a consequence of the increase in capital and reserves resulting from the 2.5% sale of the Bank's stocks. It is important to point out that in a context of expected increase in interest rates, the Bank maintained a shorter duration of its investment portfolio.

At September 30, 2005, the investment portfolio was principally comprised of:

<sup>2</sup> Technical reserve applies to demand deposits, checking accounts, or obligations payable on sight, other deposits unconditionally payable immediately or within a term of less than 30 days and time deposits payable within 10 days prior to maturity, to the extent their aggregate amount exceeds 2.5 times the amount of a bank's capital and reserves.

## SHAREHOLDERS' EQUITY

As of September 30, 2005, the Bank's Shareholder Equity totaled Ch\$730,500 million (US\$1,369 million), a 10.3% increase compared to 3Q04. This increase was mainly due to a 12.8% growth in net income during the last twelve months and to the sale of 2.5% of Banco de Chile's shares, the final stage of its repurchase program, which implied an increase in the capital and reserves line in the amount of Ch\$57,758 million. On the other hand, the drop in the adjustment for translation differences<sup>3</sup> was primarily a consequence of the 12.1% annual decline in the exchange rate.

At the end of September 2005, on a consolidated basis, Total Capital to Risk-Adjusted Assets (BIS ratio) was 12.0%, and Basic Capital to Total Assets was 5.7%, both well above the minimum requirements of 10% and 3%, respectively, applicable to Banco de Chile.

**Notes**

(1) These figures were expressed in constant Chilean pesos as of September 30, 2005.

(2) These figures were calculated considering the nominal net income, the shares outstanding and the exchange rates existing at the end of each period.

(3) The ratios were calculated as an average of daily balances.

(4) Annualized data.

**FORWARD-LOOKING INFORMATION**

The information contained herein incorporates by reference statements which constitute forward-looking statements, in that they include statements regarding the intent, belief or current expectations of our directors and officers with respect to our future operating performance. Such statements include any forecasts, projections and descriptions of anticipated cost savings or other synergies. You should be aware that any such forward-looking statements are not guarantees of future performance and may involve risks and uncertainties, and that actual results may differ from those set forth in the forward-looking statements as a result of various factors (including, without limitations, the actions of competitors, future global economic conditions, market conditions, foreign exchange rates, and operating and financial risks related to managing growth and integrating acquired businesses), many of which are beyond our control. The occurrence of any such factors not currently expected by us would significantly alter the results set forth in these statements.

Factors that could cause actual results to differ materially and adversely include, but are not limited to:

- changes in general economic, business or political or other conditions in Chile or changes in general economic or business conditions in Latin America;
- changes in capital markets in general that may affect policies or attitudes toward lending to Chile or Chilean companies;
- unexpected developments in certain existing litigation;
- increased costs;
- unanticipated increases in financing and other costs or the inability to obtain additional debt or equity financing on attractive terms; and

You should not place undue reliance on such statements, which speak only as of the date that they were made. Our independent public accountants have not examined or compiled the forward-looking statements and, accordingly, do not provide any assurance with respect to such statements. These cautionary statements should be considered in connection with any written or oral forward-looking statements that we may issue in the future. We do not undertake any obligation to release publicly any revisions to such forward-looking statements after completion of this offering to reflect later events or circumstances or to reflect the occurrence of unanticipated events.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
