Indicate by check mark whether the registrant by furnishing the
information contained in this Form is also thereby furnishing the
information to the Commission pursuant to Rule 12g3-2(b) under
the Securities Exchange Act of 1934.

Yes No

If "Yes" is marked, indicated below the file number assigned to the
registrant in connection with Rule 12g3-2(b):

Winglets to Improve GOL's Aircraft Performance

São Paulo, December 29, 2005 **GOL Linhas Aéreas Inteligentes** (NYSE: GOL and Bovespa: GOLL4), Brazil's low-fare, low-cost airline, will equip its new Boeing 737-800 Next Generation aircraft with Blended Winglets to reduce the Company's fuel costs and significantly improve airplane performance during take-off and landing on short runways.

"In addition to reducing fuel costs, adding this new equipment guarantees that GOL will offer its customers one of the most modern and comfortable fleets in South America with the latest technology," says David Barioni, Technical Vice President at GOL Linhas Aéreas Inteligentes. The aircraft will be equipped with the Short Field Performance Package, including Blended Winglets, which provides additional capabilities for landing at airports with shorter runways including Rio de Janeiro's Santos Dumont (1323 meters) and São Paulo's Congonhas airport (1940 meters), two of the most important airports in Brazil.

GOL and Aviation Boeing Partners signed a contract in November for the delivery of 60 Blended Winglet Systems.

While a standard 737-800 cannot operate economically into Santos Dumont, GOL's Performance Enhanced 737-800s will be able to arrive and depart with full payloads," says Christopher Stafford, Director of Sales and Marketing of Aviation Partners Boeing.

Additional Blended Winglet benefits include reduced engine maintenance costs, quieter and more environmentally friendly operations, and a distinctly high-tech image. As GOL operates its 737NGs at one of the highest utilization rates in the industry, an average of 14 block hours per day, the Company expects the Blended Winglets will save the Company approximately 3% to 4% per aircraft annually in its fuel requirements.

The GOL brand is synonymous with innovation and value in the Brazilian domestic airline market," says Aviation Partners Boeing Vice President of Sales, Patrick LaMoria. Blended Winglet Technology will help GOL keep operating costs low while maximizing flexibility and payload capacity, even out of the more challenging airports in its rapidly growing route system.

About Aviation Boeing Partners

Aviation Partners Boeing is a joint venture of Aviation Partners, Inc. and The Boeing Company created to develop and market performance enhancing wingtip devices for Boeing aircraft. Their patented Blended Winglets are available for 737 Next Generation aircraft, 737 Classic aircraft as well as the Boeing 757-200. Activities are also underway to develop and certify wingtip devices for the Boeing 717, 767-300ER, and 777-200ER along with the heritage Douglas MD-80 aircraft.

About GOL Linhas Aéreas Inteligentes

GOL Linhas Aéreas Inteligentes, a low cost, low fare airline, is one of the most profitable and fastest growing airlines in the industry worldwide. GOL operates a simplified fleet with a single class of service. The Company has one of the youngest and most modern fleets in the industry resulting in low maintenance, fuel and training costs, with high aircraft utilization and efficiency ratios. In addition, safe and reliable services, which stimulate GOL's brand recognition and customer satisfaction, allow GOL to have the best value proposition in the market. GOL currently offers over 420 daily flights to 45 major business and travel destinations in Brazil, Argentina, and Bolivia, with substantial expansion opportunities. GOL's growth plans include increasing frequencies in existing markets and adding service to additional markets in both Brazil and other high-traffic South American travel destinations. GOL's shares are listed on the NYSE and the Bovespa. GOL: here everyone can fly!

This release contains forward-looking statements relating to the prospects of the business, estimates for operating and financial results, and those related to growth prospects of GOL. These are merely projections and, as such, are based exclusively on the expectations of GOL's management concerning the future of the business and its continued access to capital to fund the Company's business plan. Such forward-looking statements depend, substantially, on changes in market conditions, government regulations, competitive pressures, the performance of the Brazilian economy and the industry, among other factors and risks disclosed in GOL's filed disclosure documents and are, therefore, subject to change without prior notice.
