Coca-Cola FEMSA Announces First Quarter 2019 Results

Mexico City, April 26, 2019, Coca-Cola FEMSA, S.A.B. de C.V. (BMV: KOF UBL, NYSE: KOF) (“Coca-Cola FEMSA”, “KOF” or the “Company”), the largest Coca-Cola franchise bottler in the world by sales volume, announces results for the first quarter of 2019.

OPERATIONAL AND FINANCIAL HIGHLIGHTS

- Volumes performed strongly in Brazil; transactions outperformed volumes in Argentina and Brazil.
- Revenues increased 4.8%, while comparable revenues grew 10.0%. Pricing ahead of inflation in most of our operations, combined with volume growth in Brazil was partially offset by unfavorable currency translation effects from all of our operating currencies.
- Operating income declined 0.9% while comparable operating income increased 9.2%, driven mainly by higher concentrate costs, higher PET prices, the depreciation of most of our operating currencies as applied to our U.S. dollar denominated raw material costs and higher labor expenses, effects that were partially offset by lower sweetener costs and operating expense efficiencies.
- Earnings per share¹ were Ps. 0.15 (earnings per unit were Ps. 1.23 and per ADS were Ps. 12.33).

John Santa Maria, Coca-Cola FEMSA’s CEO, commented:

“I am pleased with our Company’s positive results to start the year. Despite currency volatility and uncertain economic conditions that affected our financial performance, our revenues grew 4.8% while our comparable revenues grew 10.0%. In addition, our operating income declined 0.9% while our comparable operating income increased 9.2%. In Mexico & Central America, we reported healthy top-and-bottom line growth, as we continued leveraging our

state-of-the-art analytics capabilities. Our South America Division's performance was driven mainly by strong volume growth in Brazil, where we continued to gain share across categories thanks to our robust portfolio and relentless point-of-sale execution. To protect our profitability, we continued to implement mitigation actions to navigate complex environments in Colombia and Argentina. Finally, guided by the clarity of our vision of becoming a total beverage leader with global footprint, on April 11, we completed our previously announced stock split and listing of units for trading in the Mexican Stock Exchange and the New York Stock Exchange. This important milestone enhances the flexibility of our capital structure by increasing our capacity to issue equity, positioning our Company for further sustainable, profitable growth and expansion."

CONFERENCE CALL INFORMATION

CONSOLIDATED FIRST QUARTER RESULTS

<i>Expressed in millions of Mexican pesos</i>	1Q 2019	1Q 2018	Δ%	Δ%
Total revenues	46,248	44,122	4.8%	10.0%
Gross profit	20,892	20,215	3.3%	8.8%
Operating income	5,714	5,765	(0.9%)	9.2%
Operating cash flow ⁽³⁾	8,541	8,164	4.6%	11.1%

Volume increased 1.0% to 796.1 million unit cases, driven mainly by a 9.1% growth in Brazil and the consolidation of recently acquired territories in Guatemala and Uruguay partially offset by volume declines in the rest of our operations. On a comparable basis, total volumes remained flat at 0.1%.

Total revenues increased 4.8% to Ps. 46,248 million, driven mainly by price increases in line with or above inflation across our territories coupled with volume growth in Brazil, the consolidation of recently acquired territories in Guatemala and Uruguay and a favorable mix effect driven by transactions growing ahead of volumes. These factors were partially offset by the negative translation effect resulting from the depreciation of all of our operating currencies as compared to the Mexican Peso, combined with volume decline in Argentina, Colombia and Mexico. On a comparable basis, total revenues increased 10.0%.

Gross profit increased 3.3% to Ps. 20,892 million, and gross margin contracted 60 basis points to 45.2%. Lower sweetener prices were offset by i) higher concentrate costs in Mexico; ii) higher concentrate costs in Brazil, related to the reduction of tax credits on concentrate purchased from the Manaus Free Trade Zone; iii) higher PET prices across most of our operations; and iv) the depreciation in the average exchange rate of most of our operating currencies as applied to our U.S. dollar-denominated raw material costs. On a comparable basis, gross profit increased 8.8%.

Operating income declined 0.9% to Ps. 5,714 million, and operating margin contracted 70 basis points to 12.4%. This decline was driven mainly by higher labor and freight expenses coupled with restructuring indemnities, effects that were partially offset by operating expense efficiencies. On a comparable basis, operating income increased 9.2%.

(1) According to IFRS 5, figures from 2018 do not include the Philippines as it is presented as a discontinued operation as of January 1, 2018.

(2) Please refer to page 7 for our definition of “comparable” and a description of the factors affecting the comparability of our financial and operating performance.

(3) Operating cash flow = operating income + depreciation + amortization & other operating non-cash charges.

Comprehensive financing result recorded an expense of Ps. 1,593 million, compared to an expense of Ps. 2,100 million in the same period of 2018. This reduction was driven mainly by a reduction in our interest expense, net, a reduction in foreign exchange loss—as our cash exposure in U.S. dollars was negatively impacted by the appreciation of the Mexican Peso during the first quarter of 2019—and a reduction in other financial expenses.

Income tax as a percentage of income before taxes was 32.6% as compared to 30.7% during the same period of the previous year. This increase was driven mainly by the increase in the relative weight of Brazil's profits in our consolidated results, which has a higher tax rate, and a higher effective tax in Colombia.

Net income attributable to equity holders of the company reached Ps. 2,590 million as compared to Ps. 2,414 million during the same period of the previous year. Earnings per share¹ were Ps. 0.15 (earnings per unit⁵ were Ps. 1.23 and earnings per ADS were Ps. 12.33).

(1) Quarterly earnings / outstanding shares. Earnings per share (EPS) for all periods are adjusted to give effect to the stock split resulting in 16,806.7 million shares outstanding. For the convenience of the reader, as a KOF UBL Unit is comprised of 8 shares (3 Series B shares and 5 Series L shares), earnings per unit are equal to EPS multiplied by 8. Operating income	3,076	2,662	15.6%	12.4%
Operating cash flow ⁽³⁾	4,772	4,096	16.5%	12.5%

Volume increased 0.7% to 478.0 million unit cases, driven by the consolidation of recently acquired territories in Guatemala and volume growth in Costa Rica, partially offset by volume decline in Mexico, Nicaragua and Panama. On a comparable basis, volume declined 2.3%.

Total revenues increased 11.4% to Ps. 24,823 million, driven by pricing ahead of inflation across the division, volume growth in Costa Rica and the consolidation of recently acquired territories in Guatemala as of May 1, 2018, partially offset by volume declines in Mexico, Nicaragua and Panama and by a slight unfavorable mix driven by volumes outperforming transactions. On a comparable basis, total revenues increased 7.2%.

Gross profit increased 12.4% to Ps. 11,781 million and gross profit margin expanded 40 basis points to 47.5% driven mainly by our pricing initiatives and lower sweetener costs. These factors were partially offset by higher concentrate costs in Mexico, higher PET prices and an unfavorable currency hedging position in Mexico. On a comparable basis, gross profit increased 8.3%.

Operating income increased 15.6% to Ps. 3,076 million in the first quarter of 2019, and operating income margin expanded 50 basis points to 12.4% during the period driven mainly by lower maintenance and freight costs, partially offset by a non-cash operating foreign exchange loss and restructuring indemnities. SOUTH AMERICA DIVISION FIRST QUARTER RESULTS

Total revenues	21,425	21,845	(1.9%)	13.7%
Gross profit	9,111	9,732	(6.4%)	9.7%
Operating income	2,638	3,103	(15.0%)	5.4%
Operating cash flow ⁽³⁾	3,768	4,068	(7.4%)	9.1%

Volume increased 1.6% to 318.1 million unit cases, driven by a 9.1% volume growth in Brazil and the consolidation of the recently acquired territory in Uruguay partially offset by volume declines in Argentina and Colombia. On a comparable basis, volume grew 4.3%.

Total revenues declined 1.9% to Ps. 21,425 million, driven mainly by a volume contraction in Argentina and Colombia, coupled with an unfavorable currency translation effect resulting from the depreciation of the Argentine Peso, the Brazilian Real, and the Colombian Peso as compared to the Mexican Peso. These factors were partially offset by strong volume growth in Brazil, pricing ahead of inflation in Argentina, Brazil, and Colombia, a favorable mix effect driven by transactions outperforming volumes, and the consolidation of the recently acquired territory in Uruguay as of July 1, 2018. On a comparable basis, total revenues increased 13.7%.

Gross profit decreased 6.4% to Ps. 9,111 million, and gross profit margin contracted 200 basis points to 42.5%. This is a result of higher PET prices in the division, higher concentrate costs in Brazil related to the reduction of tax credits on concentrate purchased from the Manaus free trade zone, and the depreciation of the average exchange rate of the Argentine

Peso, the Brazilian Real, and the Colombian Peso as applied to our U.S. dollar-denominated raw material costs. These factors were partially offset by our pricing initiatives and lower sweetener prices. On a comparable basis, gross profit increased 9.7%.

Operating income decreased 15.0% to Ps. 2,638 million in the first quarter of 2019, resulting in a margin contraction of 190 basis points to 12.3% driven mainly by restructuring indemnities in Colombia, partially offset by operating expense efficiencies. DEFINITIONS

Volume is expressed in unit cases. Unit case refers to 192 ounces of finished beverage product (24 eight-ounce servings) and, when applied to soda fountains, refers to the volume of syrup, powders and concentrate that is required to produce 192 ounces of finished beverage product.

Transactions refers to the number of single units (e.g. a can or a bottle) sold, regardless of their size or volume or whether they are sold individually or in multipacks, except for soda fountains, which represent multiple transactions based on a standard 12 oz. serving.

Operating income is a non-GAAP financial measure computed as “gross profit – operating expenses – other operating expenses, net + operative equity method (gain) loss in associates.”

Operating cash flow is a non-GAAP financial measure computed as “operating income + depreciation + amortization & other operating non-cash charges.”

Earnings per share are equal to “quarterly earnings / outstanding shares.” Earnings per share (EPS) for all periods are adjusted to give effect to the stock split resulting in 16,806,658,096 shares outstanding. For the convenience of the reader, as a KOF UBL Unit is comprised of 8 shares (3 Series B shares and 5 Series L shares), earnings per unit are equal to EPS multiplied by 8. Each ADS represents 10 KOF UBL Units.

COMPARABILITY

In an effort to provide our readers with a more useful representation of our company's underlying financial and operating performance, we are including the term “Comparable.” This means, with respect to a year-over-year comparison, the change of a given measure excluding the effects of: (i) mergers, acquisitions, and divestitures, including acquisitions made in Guatemala and Uruguay as of May and July 2018, respectively; (ii) translation effects resulting from exchange rate movements; and (iii) the results of hyperinflationary subsidiaries in both periods: Argentina's results from 2019 and 2018. In preparing this measure, management has used its best judgment, estimates, and assumptions in order to maintain comparability. The relation between our reported and comparable figures is described in the
